Moose Factory, Ont.,
March 4, 1950

Mr. J.S. Allan,
Superintendent,
James Bay Indian Agency,
Moose Factory, Ont.

Dear Mr. Allan:

Re: Bishop Gordon School Children X-rays

Further to my long explanatory letter of January 12th., 1950, I have to report that late in January I received readings from Dr. Simpson of the Division of TB Prevention, Parliament Buildings, Toronto on certain of these children as follows:

Films on Isobel Utter shows no evidence of Pulmonary TB
" " Jane Blueboy " " " " " "
" " Walter Jeffries " " " " " "
" " Mary Georgekiss " " " " " "
" " Edith Whiskeychan " " " " " "
" " Beulah Visitor shows " " " " " "
" " Emily Georgekiss " " " " " "
" " Elizabeth Mark " " " " " "
" " Mary Ann Gull " " " " " "
" " Frances Cowboy " " " " " "
" " Marion Hester " " " " " "

Show Primary TB healed. Possible heart pathology. Recommendations, written observation for heart condition only.

" " Kathleen Weistche Shows Pneumonitis resolving. This could be childhood TB resolving. Suggest new films and re-examination in six months.

" " James Cheezo shows that the film was of very poor technical quality. Shadows in both lungs are so vague that they may be due to the quality of the film and of no clinical significance. Suggest repeat X-ray.

" " Daniel Matsynia show this as a very poor film and very difficult to interpret. No definite evidence of Pulmonary Tuberculosis. A Tuerculin test should be done and if possible film repeated.

" " Clifford Shashaweskum show this film is of such poor technical quality and so poorly positioned that a definite reading cannot be made. No evidence of Pulmonary TB. Recommend that this film be repeated, a tuberculin test done and further report made.

Due to my absence from my office on various occasions and to the rush of other work I realize I have been tardy in getting these reports to you,

Indian Affairs. (RG 10, Volume 6204, file 467-10, part 4)

Referring to my discussion with Mr. J. Long to have the other X-rays done on an early date, he advised that due to the unusual amount of work he had to do as Acting Principal and to faulty plumbing which prevented him from the proper preparation of his developing and fixing fluids he was long delayed in getting these other children x-rayed. This has been done only recently and the films are being sent to Toronto for a reading on the other six children who are on your list of twenty-one, viz: Clara Jolley, Beatrice Mark, George Stewart, George Couttit, Lucy Outherland, Lazarus Wilpin.

I failed to note in my last letter that George Couttit was returned last summer from Sanatorium with recommendations that he be permitted to attend the school. My recommendation he be x-rayed was only routine.

A summary of the above shows that the findings of these children are not sufficient to dismiss them from the school for health reasons. However, I have further to report that recommendations were made to keep under careful observation the following.

Alma Natapatuk
James Visitor

Caroline Fans
Alice Fans

This will be done. One of them are serious enough for dismissal.

I have to report that my nurses have done Tuberculin test on all the children living in at the school and only 32 were negative. I might say that this has been the usual finding on each of our annual examinations at this school.

My nurses are also continuing with the inoculations which will be completed in due course. We will then be able to fill in the forms sent by Agent Cariviere.

Dr. Simpson has been advised of the number of TB tests that are negative and I have recommended that these be given BCG vaccinations. I am awaiting a supply of the same and directions for such from there.

All of which is respectfully reported.

Yours truly,

(Sgd.) B.H. Harper
(B.H. Harper, M.D.)
Indian Health Services.

*Mr. [unclear]
please [unclear]*

Dear Colonel Neary:

Re David KOOMAYUK, Disc No. E4-384, Eskimo age 15

In February, 1949, a fifteen year old Eskimo boy, David Koomayuk, was flown by mercy plane from Creswell Bay on Boothia Peninsula to the Dr. Charles Camsell Memorial Hospital in Edmonton suffering the loss of both feet from gangrene. Since then he has been fitted with artificial limbs and is now able to move around quite freely. During his stay in hospital he has been taking advantage of the educational opportunities provided, and has learned to talk English fairly fluently already. He has received a considerable amount of publicity due to his rather extraordinary progress for he is considered particularly brilliant. He has started Grade 3 arithmetic and in his reading has almost completed his Grade 2 reader.

age 16+

Unfortunately, a short time ago he ^{con}tracted a slight case of tuberculosis, but this has been cleared up and Dr. Falconer advises that the boy will be ready for discharge about January 1, 1951.

I am attaching herewith a copy of a letter I am sending to Dr. Moore. In this you will notice that the suggestion has been made that David should be placed at Moose Factory in order that he can attend the school there and also have the benefit of the medical service available at the hospital. Furthermore, he would be in the company of other Eskimo people and would possibly have the opportunity to work into a job that he could handle satisfactorily.

This is to advise that I am informed by the Principal of Moose Fort Indian Residential School that Charles Cachagee is now ready for High School. It is suggested that he be transferred to Shingwauk School, at Sault Ste. Marie, and as his brother Michael commenced Grade 8 in the fall term, it is thought that both of these boys should be transferred to Shingwauk.

Mr. Seegmiller also feels that Jean Davies, who is 14 years old should have a change of school and recommends that she be transferred from Moose Fort Indian Residential to Ahingwauk, if it is at all possible.

May consideration please be given to these transfers and let me have your views in this matter in order that arrangements may be made with Singwauk before the fall term.

Will you please advise.
