

(3) Laundry, 40 x 20 feet, containing one furnace and two boilers, also closets for soap, soiled and clean linen.

(4) Girls' home, 40 x 32 feet, the ground floor of which is used for recreation, sitting and store-rooms; the upper floor contains girls' dormitory, linen and bath-rooms with a room for the matron.

(5) A building 24 x 22 feet used as sewing-rooms on the first floor, and clothing and sleeping-room for teacher, cook and assistant matron on second floor.

(6) Main buildings 32 x 30 feet and an extension 48 x 18 feet. The ground floor contains parlour, office, boys' dining-room, kitchen, pantry and girls' dining-room, with a cellar under the boys' dining-room. The second floor is used for girls' school-room, music hall, chapel and two spare rooms. These last three buildings are adjoining.

(7) Wood-shed for kitchen and house 60 x 20 feet, with tool and oil compartments.

(8) Boys' home, 64 x 33 feet. On the lower floor are the infirmary, the store-room for provisions and clothing, the shoemaker's-room, the lavatory, the boys' play-hall and school-room. The upper floor is used for boys' dormitory as well as for principal's and foreman's bedrooms.

(9) Boat-house which is located alongside the wharf, is 30 x 20 and shelters four boats.

Lower row: (10) Gymnasium 50 x 20; this building was erected this year.

(11) Water tank. On the hill at the rear of the boys' home stands a twelve hundred gallon tank. The hydraulic ram-house is built on the beach.

(12) Carpenter and shoemaker shop 40 x 20.

(13) Lumber shed 30 x 10.

(14) Stables, pig-sty and hen-house 36 x 20.

(15) Barn 52 x 22, with a lean-to 42 x 10.

Accommodation.—The number of pupils authorized by the department is fifty, but about seventy-five could be accommodated.

Attendance.—During the year thirty-eight boys and twenty girls were on the roll. Eighteen new pupils were admitted; seven were discharged with the consent of Mr. Superintendent Vowell, and three died at home of consumption.

Class-room Work.—Gratifying progress was made in the school-room. The girls and boys have separate class-rooms. At the end of the fiscal year the pupils were graded as follows:—

Standard I.....	8
“ II.....	9
“ III.....	13
“ IV.....	22
“ V.....	8
“ VI.....	1

The boys who are learning a trade, as well as the girls, have half a day at school and half a day at their trade. The junior pupils have six hours school a day.

Farm and Garden.—Nearly all the male pupils take lessons in gardening; the girls have charge of the flower gardens. All the senior boys, when not occupied in the shops, work on the farm. This summer our crops have a very promising appearance; at the present time our stock consists of fifteen head of cattle.

Industrial Work.—Twelve boys have received instruction in industrial work.

Carpenter-shop.—Mr. Foreman D. Gallant has charge of this workshop, but at the same time he has to superintend the farm; it is only at certain periods that he can afford to give instruction in carpentry. With his apprentices he has, however, been able to erect a gymnasium 50 x 20, to construct a lean-to to the barn 42 x 10, to build three hundred yards of picket fence and do all the repairing which the buildings required.

Shoemaker-shop.—Mr. J. M. Read gives instruction one week monthly, and when he is not at the school the apprentices do all the repairing. Some of the boys are already quite skilful.

Bakery.—Eight boys and three girls have acquired the art of bread-making and take great interest in supplying the house with excellent bread.

Besides these industrial branches, lessons in milking, butter-making, painting and whitewashing have also been imparted to some of the senior boys.

Girls' Industrial Work.—The girls have been taught all kinds of housework, also knitting, darning, crochet work, lace and flower-making, hand and machine sewing, cutting and finishing all kinds of wearing apparel. We have four sewing-machines and a great deal of work has been turned out during the year.

The work in the laundry, under the supervision of the matron, is performed by the boys as well as by the girls.

Moral and Religious Training.—Religious instruction is daily given to the pupils during half an hour, and on Sundays officers and pupils attend divine service in the village church.

The conduct of the pupils has, on the whole, been satisfactory.

Health and Sanitary Condition.—The health of the pupils has also been good. In the month of January about twenty pupils caught a severe attack of la grippe and one was stricken down with pneumonia, all however recovered.

Three of the old pupils, namely Ellen Moses, No. 27; Josephine Norris, No. 33; and Johnnie, No. 73, who last year were at home, on sick leave, died of pulmonary diseases.

The sanitary condition of the school is good, the sewerage drains are well looked after and the ventilation of the dormitories and school-rooms carefully attended to.

Water Supply.—A never-failing stream of fresh water flowing between the two main buildings supplies the institution with an abundance of water. A hydraulic ram with a twelve-hundred gallon tank, conveys the water through the various buildings.

Fire Protection.—The boys are regularly trained in the operating of the fire-hose, the handling of ladders and fire buckets as well as the working of the four Star chemical fire-engines.

Heating.—The heating of the institution is provided for by ordinary box stoves.

Recreation.—During play hours the favourite amusements of the boys are foot and base ball, swimming, fishing and boating during the summer, and coasting, chess and checker games during the winter. The girls, in their own play-grounds, amuse themselves at swinging, skipping and playing ball.

Our new gymnasium affords also excellent amusement, especially in rainy weather when outdoor exercise is impossible. This new building proves to be a very useful addition to the school, for besides giving opportunity for athletic and calisthenic sport, it is supplied with a permanent stage which makes it of great value for receptions and entertainments. Our concerts consist of recitations, dialogues and choruses, with vocal and instrumental music. Several of these entertainments were given to the public; at times for the white people of the neighbourhood and at times for the Indians, who all appreciated them very much.

The brass band is still under the able leadership of Mr. Gallant, and takes a prominent part in all our entertainments. This summer the band boys were invited by the committee of the Queen's Birthday celebration to play during two days in the city of Victoria, and were greatly admired and favourably commented upon.

Remarks.—All the officers of the school have diligently performed their various and arduous duties and greatly helped me in the management of the institution.

BRITISH COLUMBIA,

METLAKAHTLA INDUSTRIAL SCHOOL,

METLAKAHTLA, 19th August, 1898.

The Honourable
The Superintendent General of Indian Affairs,
Ottawa.

SIR,—I have the honour to submit this report for the fiscal year ended 30th June, 1898.

Location of School.—This school is situated in the village of Metlakahtla on the Tsimpsean Peninsula, on a southern slope which modifies the winter temperature. The surrounding scenery is pleasant and extensive.

Buildings.—The buildings are as follows:—

(1) The main building with a frontage of 90 feet and 60 feet deep, T shaped, and two stories high. The office, the principal's bed-room, the kitchen store, hospital, sewing and dining rooms, are on the lower floor; and on the upper, the dormitories and the cook's sleeping-room.

(2) A house 42 x 25 feet used for class-teaching.

(3) A building 70 x 22 feet divided into wood-shed, laundry, carpenter and shoemaker's-shops.

(4) Blacksmith's-shop and coal-house, 24 x 18 feet.

(5) Hen-house 12 x 8 feet.

(6) Stable 12 x 10 feet.

(7) Girl's home, 54 x 36 feet two stories high, with a wing 18 x 18 feet, and a one-story annex, 18 x 16 feet. It contains the rooms occupied by the matron and her assistants, the girls' dormitories, a dining and store-rooms and a kitchen. The annex is used as a laundry and bath-room.

This building with a piece of land 120 x 120 feet was leased by the Indians to the Right Reverend the Bishop of Caledonia for a home. The rest of the buildings are Government property. All are kept in good repair. It will, however, soon be necessary to re-shingle about half of the roof of the main building—that part which covered the old store, that was fitted up to start the school in.

Accommodation.—The accommodation in the boys' division is good, but the girls' department although enlarged and improved, since it was handed over by the Indians, is scarcely sufficient, for one room is used both as a kitchen and a dining-room, and another as a work, class, and sitting-room.

Attendance.—The attendance, except during the fishing season, averaged about fifty pupils, twenty-five boys and twenty-five girls.

Class-room Work.—The girls, during the greater part of the year, were taught by the Rev. W. Hogan. After the Easter holidays they were placed under the instruction of Miss Jackson, a missionary lady and competent teacher. The boys were taught by the principal. Fair progress has been made.

The standing of the pupils at the end of the year was as follows: six were in Standard I, seven in Standard II, twenty-one in Standard III, five in Standard IV, ten in V, and three in Standard VI. The subjects of study and instruction were reading, writing, arithmetic, grammar, geography, history, composition, singing, drawing, and religious knowledge.

Industrial Work.—Fourteen boys were employed as carpenters. Seven of these were for some time learning to paint. And two did the shoemaking required for the school. The carpenters were employed laying floors, and ceiling and lining rooms in the main building, making stairs, re-flooring the old school-room, fencing garden and repairing buildings.

Outside this institution they built a six-roomed house, 49 x 32 feet, intended as a residence for the Rev. W. Hogan, and payment for the work done has been made in aid of the school funds, as shown by the statement of receipts and expenditure forwarded with this report.

The girls, under the supervision of the matron, Miss Tyte, received careful instruction in housework, cooking, baking, laundry and needlework, dressmaking and crocheting.

Garden and Grounds.—The land between the main building and school-house, after much labour expended in digging out roots and stumps, has been trenched and drained, dug over three times, planted and nicely fenced in as a garden. The grounds, too, in front of the school, have been improved to some extent but much remains yet to be done.

Moral and Religious Training.—We try, and, I think, with a fair measure of success, to improve the moral character of our pupils by daily teaching them the importance of doing what is right. In the class-room three-quarters of an hour are given every day, except on Saturdays to devotional exercises and religious instruction. All attend divine service and school twice a day on Sundays.

Health and Sanitary Condition.—There was very little sickness, except about the end of March and beginning of April. At that time many of the children were attacked by an epidemic of influenza then prevalent on this part of the coast. They were carefully tended and all got well again.

The drainage is good, and particular attention is paid to cleanliness and ventilation.

Water Supply.—In my last report I mentioned that the girls' department was in need of a larger supply of water. Since then a tank with a capacity of about fifteen hundred gallons has been erected. I think that is sufficient.

Fire Protection.—The chimneys are made of terra cotta pipes, and the flues are frequently cleaned. The boys' department is supplied with chemical fire-extinguishers, firemen's axes, buckets and ladders, and these are kept handy and ready for use.

A small force pump is still required, but monetary considerations stand in the way.

Heating.—The class and sitting rooms are sufficiently warmed by stoves, but the dormitories are not heated in any way.

Recreation.—During the hours set apart for play the boys indulge in foot and baseball, in favourable weather swimming and boating. Their favourite pastimes indoors are singing and playing checkers and dominoes.

The girls amuse themselves with lotto, dominoes, drawing slates, singing and dressing dolls. Outside, with see-saws and different kinds of games with balls.

The girls, under proper supervision, camped out for about a week and enjoyed themselves very much. They would have remained longer in camp but for a change in the weather.

Principal.

BRITISH COLUMBIA,
ST. MARY'S MISSION BOARDING SCHOOL,
MISSION CITY, 1st July, 1898.

The Honourable
The Superintendent General of Indian Affairs,
Ottawa.

SIR,—I have the honour to submit my annual report for the year ended 30th June, 1898.

Location and Area.—This school is located in a healthy and picturesque part of the Fraser Valley, a mile and a quarter east of Mission Junction, on the C. P. R. main line. In connection with the school there is land under cultivation to the extent of one hundred acres.

Buildings.—The boys' and girls' schools are separate. The buildings are of wood, 90 x 45 feet, with plastered walls. The outbuildings consist of wood-sheds, store-houses, play-houses, stables, barns, and a laundry. All these buildings are kept in good repair by the foreman and boys.

Grounds.—The extensive grounds attached to both schools are beautifully decorated with flower beds, and neatly kept by the pupils.

Accommodation.—Forty pupils can be accommodated in each school.

Attendance.—The average attendance for the year was 74.5. The department allows a grant of \$60 per capita for sixty pupils only. The other pupils are provided for at the expense of the mission.

Class-room Work.—Classes are regularly conducted both morning and afternoon. Advancement was made by the pupils in all the branches prescribed by the department. The whole tone of the pupils is much more manly and self-reliant than formerly. English is the common language of the school, the Indian language is indeed seldom heard in the institution, except with the newly arrived pupils.

Farm and Garden.—All the boys receive instruction in farming and gardening. The number of boys working each day on the farm varies according to the work and season. The farm and garden are managed with a view of supplying the schools with meat and vegetables, milk and butter.

Industrial Work.—This work for the boys consists chiefly in general repairs, mending furniture, sweeping, scrubbing, sawing and splitting firewood.

The girls receive instruction in general housework ; they are also taught gardening.

Moral and Religious Training.—This has been the object of our greatest attention. A part of each day is devoted to religious instruction. On Sundays they attend divine service at the mission church. On the whole the conduct of the pupils is satisfactory, punishments are rarely resorted to.

Health and Sanitary Condition.—The general health of the pupils has been good, though a few have suffered from scrofula. The sanitary condition of the school is carefully attended to. Great attention is given to proper ventilation, and disinfectants are used freely whenever needed.

Water Supply and Fire Protection.—The water, which is excellent, is supplied by a mountain stream. Chemical extinguishers, firemen's axes, ladders and buckets are kept in places of convenient access.

Heating.—Stoves are used in heating buildings.

Recreation.—The pupils take part in various outdoor games, such as baseball.

Principal.

BRITISH COLUMBIA,

WILLIAM'S LAKE INDUSTRIAL SCHOOL,

WILLIAM'S LAKE, 20th July, 1898.

The Honourable
The Superintendent General of Indian Affairs,
Ottawa.

SIR,—I have the honour to submit herewith my report on the William's Lake Industrial school for the fiscal year ended 30th June, 1898.

Location.—The William's Lake Industrial School is situated in the Lac la Hache Valley, on the bank of San Jose's River, four miles before it flows into the William's Lake, one hundred and thirty-five miles from Ashcroft, our nearest railway station, and about one mile from the Cariboo Trunk Road.

Land.—The Mission owns over a thousand acres of land so that we have a good chance to teach the children all they must know to be able hereafter to manage a farm of their own, as raising grain, vegetables, curing hay, looking after stock, milking and making butter.

Buildings.—We have now three fine buildings, which never fail to attract the attention of the passers by and to elicit from strangers an exclamation of surprise, namely, the boys' new school, the girls' department and the harness-shop:—

1. The boys' school is 66 x 30 ft., two stories and a half; the first story comprises a school-room 30 x 28 ft., the chapel 30 x 18 ft., the officers' room 12 x 12 ft., another room 12 x 8 ft. and a parlor 10 x 10 ft., the second story comprises the dormitory 48 x 30 ft., the teacher's room 12 x 12 ft., the infirmary 14 x 12 ft. In the half story the boys have got each a press to keep their clothes, there is besides a kind of work-room, where we keep a small printing press, a turning-lathe and a table with scissors, thread, needles &c., where the boys repair to do the little sewing and mending they are supposed to be able to do themselves.

2. The harness shop is 38 x 22 ft., two stories; on the first floor is the working shop 28 x 22 ft. and the office 10 x 22 ft., on the second floor the instructor has his lodgings.

3. The girl's department is quite a large building with a frontage of one hundred and forty feet, at each end there is a wing 30 x 20 ft., one part (ninety feet frontage) is two stories and a half and is the counterpart of the boys school; the other part, (fifty feet frontage) is only two stories.

We have also a fine meat-house 20 x 23 ft., a stone building, a cold storage. The old house where we have still the kitchen, the refectory as well as the lodgings for some of the men, the dairy-house, and the blacksmith's shop look shabby by the side of the new buildings and will have to give place to better buildings as soon as our means will allow.

Accommodation.—At present we have ample accommodation for fifty boys and fifty girls.

Attendance.—The average attendance has been forty-nine and fifty during the whole year: two girls who had already leave of absence on account of sore eyes and weak constitution were taken off the roll; we had the misfortune of losing two pupils one boy and one girl; but we admitted five new pupils so that we had at the end of the year twenty-four boys and twenty-eight girls.

Class-room Work.—This consists of reading, writing, arithmetic, spelling, grammar, dictation, composition, geography, vocal and instrumental music. The following statement will show how pupils stand in their studies:—

Standard I	6
“ II	7
“ III	12
“ IV	12
“ V	15

Industries Taught.—The principal industries taught in this institution are harness and saddle making and shoe mending ; four boys are learning the trade regularly and the Instructor Mr. A. C. Foster is well pleased with their progress. Four other boys have been employed in helping the carpenter and doing some painting. With the exception of the small boys all take lessons in farming and gardening, learn to milk and work at the hay, all the vegetables required by the Institution were raised by the boys under the supervision of their foreman and the provision of butter and cheese was attended to by the girls.

Girls' Industries.—The girls are taught to do housework, cook, bake, sew, knit and make butter and cheese ; they also learn crochet-work and lace-making. They have some outdoor exercise, and have a little garden of their own, where they raise flowers as well as vegetables

Moral and Religious Training.—Peculiar care is taken to inculcate in the minds of the pupils sound principles of morality based on the great truths of religion. Every morning and every evening they have prayers in common ; on Sundays and holydays they attend religious service in the parish church. Every day one-half hour is devoted to catechism and religious instruction.

Health.—The general health has been fairly good. However, we had the misfortune of losing two pupils, one boy and one girl, who died at school. Since the school started—July, 1891—these two are the first whom the school has lost through death.

Sanitary Condition.—The school itself is in a very good sanitary situation. The buildings are well lighted and ventilated ; the dormitories have a large number of windows ; the ceiling are high, and the bedsteads are not overcrowded.

Water Supply.—We get our water supply from San José's River through a ditch three feet wide at the bottom, four at the top and three and a-half feet deep, which passes above the establishment. From this ditch we fill a big well or reservoir near the girls' department, another well near the kitchen door in the boys' department, and also a big reservoir, dug by the boys, in front of their new school-house. This last reservoir is twenty-five feet in diameter and seven feet deep.

Fire Protection.—We have four Star fire-extinguishers, fifty water buckets and two sappers' axes, which are equally divided between the two departments and always kept ready for use.

Heating.—The whole establishment is heated by stoves, and great care is taken of chimney flues and pipes, to avoid the danger of fire.

Recreation.—The boys spend their recreation time differently, according to the season. In winter they take great pleasure in sliding ; they use for that purpose small sleighs made by themselves. In summer football and baseball are favourite games ; they have also a great liking for the bow and arrows. In the spring every boy is bound to have his bow and arrows. They practice shooting and some become very expert at it.

§Sumahalsa is headman of the Piminos, Pakeist, Spaptsin, Nepa and Paska Bands. Owing to the aridity of their lands his people are scattered into small bands, occupying the more fertile portions of their reserves.

* The old chief, Chuyaska, occupies a small reserve up Clapperton Creek, six miles from Zoht.

† This group includes the minor bands of Chataway, Kekalus and Skuwaha. Joseph Lewis also claims to be chief.

‡ The Speyam Band has no chief, being contiguous to the Kaptsitsau Band. The two bands make common cause in obtaining work on the Canadian Pacific Railroad; John, the Kamus chief, being the headman for the Chomox, Kamus and Speyam Bands.

All chieftainships throughout the North-West Coast Agency are hereditary and the heir to a chieftainship is considered a chief from his birth, but he requires to make a potlach before succeeding to the powers of a chieftain. Second chieftainships are more family headships than tribal chiefs.

† Many chiefs as well as others have dropped their Indian names and hold only the names of white people given them by missionaries.

Rev. D. McISAAC, <i>Indian Agent.</i>												

* Owing to rot the potato crop for 1898 was very small.

CUMBERLAND COUNTY

*Micmac			$1\frac{1}{2}$	20								
F. A. RAND, <i>Indian Agent.</i>												

* Crops did not do well during 1898. A great portion of the oats were cut green for fodder. Thi which they derived quite a portion of their living.
