

SESSIONAL PAPER No. 27

at little expense be extended so as to irrigate the whole bottom of the farm. The cattle numbered twenty-three head, six horses, nine pigs and thirty-six poultry, all in the best of condition.

Mr. Barner was bringing the garden into good condition, and was paying more attention in the meantime to the useful instead of the ornamental.

The farmer, Mr. Milne, is experienced in the business, having been farmer at Regina industrial school, and was for some years at the Experimental Farm, Indian Head. The crops before I left promised to be as good as last year.

Financial.—I audited the books and accounts for the year and found all correct, and a balance on hand after paying all expenses. The deficit of a year ago, \$1,969.14, was paid by the Methodist Missionary Society, and all accounts liquidated on August 11, 1899.

Supplies are purchased in Brandon, and by paying cash the best terms possible are obtained, and compare favourably with prices in Winnipeg.

Bread continues to be purchased, twenty-six two-pound loaves for one dollar, or a shade less than two cents a pound. The bread supplied is of the best quality. Beef was seven cents a pound, delivered at the school as required.

The staff is an efficient one, and the utmost harmony prevails, each one doing his or her best for the success of the work, and I cannot say too much in favour of the principal for his excellent management during the year. He took hold when things were in a poor condition, and it will now compare in efficiency with any of the schools in its management and in satisfactory results, for, after all, this is what tells. Mr. Ferrier is early and late attending to one thing or another, and strangers when visiting are struck with the fine appearance of the farm and buildings, and with the healthy, clean and well dressed boys and girls. My inspection was a satisfactory one.

FILE HILLS BOARDING SCHOOL.

During the year I made a second visit to this school. The pupils were having their holidays. The buildings had undergone a complete renovation, and painting, plastering and kalsomining had been done from top to bottom, and it was never in such good order.

Mr. Stewart had left in May last, and Rev. Mr. Farrer is now principal, and Mrs. Farrer, sen., is matron, and is a most capable one.

The garden had a large crop of all kinds of vegetables.

I have, &c.,

ALEX. MCGIBBON,

Inspector of Indian Agencies and Reserves.

NORTH-WEST TERRITORIES,
BATTLEFORD INSPECTORATE,

PRINCE ALBERT, October 31, 1900.

The Honourable

The Superintendent General of Indian Affairs,
Ottawa.

SIR,—I have the honour to submit my third annual report on the inspection of Indian schools.

THE CHURCH OF ENGLAND BOARDING SCHOOL, UNION LAKE.

This school was inspected on December 8 and January 24.

Staff.—Rev. J. R. Matheson, principal; Mrs. Matheson, M.D., C.M., matron; Miss M. Lang, teacher; Miss Shaw, seamstress; Miss Phillips, housekeeper; Miss Bus-sell, cook; Albert Fraser, general assistant.

64 VICTORIA, A. 1901

Attendance.—The pupils present numbered thirty-four, classified as follows :—

Standard I.	Treaty, 3; non-treaty, 4; total, 7
“ II.	“ 4 “ 2 “ 6
“ III.	“ 4 “ 7 “ 11
“ IV.	“ 3 “ 7 “ 10
	— — —
Total.	“ 14 “ 20 “ 34

School-room.—The school-room is a plain but commodious room, well lighted and ventilated, and properly equipped with blackboards, desks and other furniture. There was on hand a sufficient supply of maps, text-books, reference books, stationery and other school material.

Class-work.—The efficiency of the class-work has been materially increased by the appointment of a duly qualified teacher, whose attention is devoted solely to the work of the class-room. The pupils passed a creditable examination. Singing is regularly taught, though outside of ordinary school hours. The discipline of the school is good.

Industries.—Much of the spare time of the boys is turned to useful account at gardening and the care of stock, while the girls have regular instruction in needle-work and every kind of house-work.

Premises.—The buildings have been enlarged during the past year, and the premises generally have been greatly improved in appearance.

THE ROMAN CATHOLIC BOARDING SCHOOL, UNION LAKE.

This school was inspected on December 22.

Staff.—Rev. W. Comiré, principal; Rev. Sister St. Ignatius, superior; Rev. Sister St. Patrick, first teacher; Rev. Sister Mary of Nazareth, second teacher; Rev. Sister St. Stanislaus, boys' seamstress; Rev. Sister Aimée de Marie, girls' seamstress; Rev. Sister St. Lawrence, laundress; Rev. Sister St. Alexis, housekeeper; Rev. Sister Ste. Honore, cook.

Attendance.—There are in all sixty-two pupils enrolled, classified as follows :—

Standard I.	Treaty, 24; non-treaty, 11; total, 35
“ II.	“ 9 “ 1 “ 10
“ III.	“ 3 “ .. “ 3
“ IV.	“ 9 “ 1 “ 10
“ V.	“ 3 “ .. “ 3
“ VI.	“ 1 “ .. “ 1
	— — —
Total.	“ 49 “ 13 “ 62

Management.—The discipline of the school is good, and the conduct of the pupils is exemplary. All the subjects of the programme are regularly taught, and during class hours there is a close and constant application to study. Throughout the building all necessary attention is given to cleanliness, ventilation and arrangement.

The accounts of the institution are kept with detail and accuracy. The present accommodation is in some respects insufficient, an additional class-room, a recreation-room, and a more convenient kitchen being required.

SADDLE LAKE BOARDING SCHOOL.

This school is conducted under the auspices of the Roman Catholic Church. It was inspected on January 12 and 16.

SESSIONAL PAPER No. 27

Staff.—Rev. H. Grandin, principal; Rev. Sister St. Evillé, superior; Rev. Sister Dougherty, first teacher; Rev. Sister O'Neill, second teacher; Rev. Sister Eugénie, cook; Rev. Sister Briault, nurse; Rev. Sisters Celina, Colorabe and Legoff, general assistants; Joseph Hookin, disciplinarian; Edmond Schmidt, servant.

Attendance.—The enrolment consists of forty-four treaty and two non-treaty pupils, classified thus :—

Standard I.....	14
“ II.....	9
“ III.....	10
“ IV.....	8
“ V.....	5
Total.....	46

Classes.—In their class-work the pupils are arranged in two divisions, according to sex. Both are under competent instruction, and the general tone is good. Reading and the use of English rightly receive chief attention, and in the higher forms the pupils read with much facility and with a fair understanding in any part of their reading books. I had the privilege of attending a Christmas entertainment given almost entirely by the pupils of the school. In recitations, songs, dialogues and drills they acquitted themselves creditably, and showed that much care had been exercised in their training. A handsomely executed time-table is hung conspicuously in the boy's school-room. It is well arranged and is adhered to.

THE BATTLEFORD INDUSTRIAL SCHOOL.

This school was inspected March 22 to 31. It is under the auspices of the Church of England.

Staff.—Rev. E. R. Matheson, principal; Thomas McKim, head teacher; M. B. Edwards, general assistant; J. H. Scott, farmer; E. Brown, carpenter; P. Taylor, blacksmith; J. Suffern, night-watchman; Mrs. M. A. Ward, matron; Miss C. Thornton, assistant matron; Miss E. Shepperd, nurse; Miss I. B. Brokowski, cook; Miss B. Plumb, baker and dairy-maid; Miss E. Schofield, laundress.

Attendance.—There were at the date of inspection ninety-four pupils enrolled. Of these four were sick and ninety were present at examination.

Classes.—The progress of the pupils has been seriously retarded by frequent changes of teachers, especially in the primary form, where the work had become much disorganized. The senior form is again in charge of a competent teacher, and better results may be expected. On account of low speaking and indistinct articulation oral work is less satisfactory than written. It is worthy of note that one of the pupils passed the public school leaving examination in 1899, and another was being prepared for the same examination in 1900, with a fair prospect of success.

Industries.—The usual industries are carried on, gardening, the care of stock, and carpentry receiving the largest share of attention, and being attended with good success.

Premises.—The buildings are for the most part in good repair, and the grounds have undergone some further improvement with the effect of rendering them neat and attractive.

Management.—The records of the institution are accurately kept; all moneys received and disbursed are fully accounted for; and the expenditure has been kept strictly within the per capita grant.

64 VICTORIA, A. 1901

EMMANUEL COLLEGE, PRINCE ALBERT.

This institution was inspected on May 4 to 9th. It is under the auspices of the Church of England.

Staff.—At the date of inspection the staff consisted of Rev. James Taylor, principal; Allan Scott, head teacher; Mrs. Jones, matron; Miss Jones, assistant matron; Miss H. McKay, primary teacher.

Attendance.—There were fifty-seven pupils enrolled, classified thus :—

Standard I.....	18
“ II.....	7
“ III.....	15
“ IV.....	7
“ V.....	6
“ VI.....	4
Total.....	57

Class Work.—Nine of the most advanced pupils were absent from the examination, and the progress shown by those present was only partially satisfactory. This is in part attributable to repeated changes of teachers, which, however, was quite unavoidable.

Industries.—Gardening and farming in connection with the institution, which have always been attended with success, are being prosecuted with renewed vigour. The work is all done by the boys under the direction of the principal, and the training in these industries afforded here is of a most useful character.

Premises.—The buildings were in need of remodelling and repairs, but the surroundings of the school are attractive, and the premises are kept in good order.

DUCK LAKE BOARDING SCHOOL.

This school was inspected May 14 to 19. It is under the auspices of the Roman Catholic Church.

Staff.—The staff at the date of inspection was as follows :—Rev. M. J. P. Paquette, principal; Rev. Alex. Fournier, assistant principal; Thos. Dwyer, teacher senior boys; Alfred Boyer, carpenter; George Boyer, stockman; Hugo Girard, farmer; Moise Charette, assistant farmer; J. M. Guillemot, gardener; D. McKenzie, baker; Joseph Lacroix, night-watchman; Louis Arcand, fireman; Madame Kent, matron and teacher of senior girls; Madame Elizabeth, teacher junior girls; Madame Josephine, general assistant; Sister Agnes, cook; Sister Barghmans, laundress; Sister Madeline, seamstress; Miss Paris, assistant seamstress.

Attendance.—The pupils in attendance number ninety-six, and are classified thus :—

Standard I.....	45
“ II.....	23
“ III.....	19
“ IV.....	9
Total.....	96

Twenty-two were admitted since last inspection, and a considerable number immediately before, thus accounting for the large proportion of pupils in Standard I.

Examination.—The class work has been attended with fair success, and the results of the examination were moderately satisfactory, and encouraging, inasmuch as an improvement is indicated.

SESSIONAL PAPER No. 27

Space and Equipment.—Lack of space and school-room accommodation is being remedied by the erection of a large addition to the main building. Already comfortable patent desks for one hundred pupils are on hand; and with these improved facilities an increased prosperity should attend the work of the class-rooms.

Industries.—Carpentry, gardening and the care of stock and poultry are taught under competent instructors, and the larger boys display much skill and interest in these industries. The girls are taught all departments of house-work very systematically.

Discipline.—Outside of school hours all the pupils are kept under strict discipline and supervision.

DAY SCHOOLS.

The following day schools within the limits of this inspectorate were visited during the year: Red Pheasant's, Sweet Grass', Thunderchild's, Poundmaker's, Little Pine's, Saddle Lake, Goodfish Lake, Whitefish Lake, John Smith's, James Smith's, Whitecap's, Mistawasis', Ahtakakoop's, Sturgeon Lake, Wahspaton's, Montreal Lake and Lac la Ronge.

All these are being conducted with moderate success except Sturgeon Lake, which seems likely to be closed for lack of attendance. For the most part the teachers fall short of the department's requirements as to qualification; but only in exceptional cases is it possible to procure duly qualified teachers, owing to the meagreness of the remuneration, and the privations that are at present inseparable from the work.

I have, &c.,

W. J. CHISHOLM,
Inspector of Indian Agencies.

BRITISH COLUMBIA.

ALBERNI BOARDING SCHOOL,

ALBERNI, July 6, 1900.

The Honourable

The Superintendent General of Indian Affairs,
Ottawa.

SIR,—I have the honour to submit the annual report of the boarding school at Alberni, for the year ended June 30, 1900.

Location.—This school is located on the banks of the Somas river, close to the Shesah reserve. The school is two and a half miles from Alberni.

Land.—There are sixteen acres of land in connection with the school.

Buildings.—The main building is 38 x 43 feet, three stories high, not including basement. In the basement are a milk-room, laundry, drying-room, pump and furnace. In the first flat are children's dining-room, 25 x 17 feet, reception-room, staff dining-room, kitchen, pantry, scullery and store-room. In the second story are two boys' dormitories, 24 feet 6 inches by 17 feet 6 inches each; wash-room, 11 x 12 feet; bath-room, store-room and teachers' rooms. In the third story are the girls' dormitory, 17½ x 20 feet; wash-room, 11 x 9 feet; staff bed-rooms and store-room. The school-room is fifty yards from the main building, 25 x 20 feet. A house, 30 x 20 feet, one story and a-half high, serves as a play-room for boys, and tool-house down stairs, and a carpenter shop upstairs; an annex to this house, 12 x 26 feet, serves as a

64 VICTORIA, A. 1901

laundry. Other buildings are stables, wood-shed, 30 x 13 feet; root-house, 14 x 20 feet.

Accommodation.—There is accommodation for forty-five pupils, besides staff.

Attendance.—There are thirty-three pupils on the roll, twenty-one boys and twelve girls; our actual attendance is twenty-nine. Two of the boys have gone on a sealing cruise for three months. During the year, eight boys and eight girls received their discharge, and twelve boys and five girls were admitted.

Class-room Work.—In the class-room are taught the usual subjects in the public school course; special attention is given to composition and the use of English.

Farm and Garden.—About six acres are cleared, and nearly all of it is under cultivation. We have an orchard of one hundred and sixty trees; apples, plums, pears, peaches and cherries, besides a lot of small fruit. The garden is doing fairly well. The land is exceedingly difficult to clear, and some of it requires draining before it is ready for cultivation, entailing a great deal of expense before any return is made.

Industries Taught.—Farming and gardening is taught, also plain carpenter work. Having thoroughly renovated the home, the boys have taken part in the painting and kalsomining. The girls are given a thorough knowledge of housekeeping.

Moral and Religious Training.—The children are regularly instructed in the teaching of the Bible. Family worship is held morning and evening. The pupils attend church in Alberni every alternate Sabbath, the other Sabbath having service in the school-house. Every Sabbath we have Sabbath school at 3 p.m. In the evening a song service is held.

Health and Sanitary Condition.—The children have enjoyed good health, having only had two serious cases of sickness. Our sanitary conditions are good.

Water Supply.—The supply for the home is obtained from the Somas river, a wind-mill pumping it up into a large cistern, and into a tank for fire-extinguishing. We have also a well for drinking water.

Fire Protection.—There are four Carr extinguishers distributed through the building. Fire-pails full of water are kept in convenient places. About one hundred and fifty feet of hose is kept on hand in case of fire.

Heating.—The home is heated by a hot-air furnace in the basement.

Recreation.—The boys indulge in football, and are very fond of the game, but the football ground has its drawbacks, as some forty stumps eight feet high, and a few of them three feet thick, are distributed over the ground. The boys and girls are very fond of swimming and canoeing. In winter indoor games are provided.

I have, &c.,

JAS. R. MOTION,

Principal.

BRITISH COLUMBIA,
BISHOP CHRISTIE (CLAYOQUOT) BOARDING SCHOOL,
VANCOUVER ISLAND, July 20, 1900.

The Honourable

The Superintendent General of Indian Affairs,
Ottawa.

SIR,—I have the honour to submit my first report for the year ended June 30, 1900..

History.—The Bishop Christie Indian boarding school owes its existence chiefly to the untiring efforts of the Rev. A. J. Brabant, the pioneer Indian missionary of the west coast of Vancouver island, and is named after the Right Rev. A. Christie,

SESSIONAL PAPER No. 27

Bishop of Victoria, B.C., who warmly supported Father Brabant in the realization of his favourite project. A grant for fifty children having been obtained and all preliminaries being arranged, active work was commenced in June, 1899, and on May 20 of this year the building was ready for occupancy. On May 28, school was opened with ten pupils. At the close of the fiscal year the register showed sixteen boys and twelve girls.

Location.—The school possesses an ideal location for a boarding school on the gently rising northern shore of St. Mary's cove, in Clayoquot sound, on the west coast of Vancouver island. Situate about two miles from the Opitsat reserve, and three miles from Clayoquot post office, it is far enough to secure privacy and near enough to be within easy reach. Guarded against the cold north wind by high mountains, sheltered by mighty veterans of the primeval forest from the prevailing east and west winds, it enjoys a charming view of the varied scenery of Clayoquot sound.

Land.—One hundred and sixty acres of bush land have been pre-empted for the benefit of the school.

Buildings.—The building, 40 x 60, frame, is divided into two separate equal parts, one for boys and one for girls. On the first floor are found the parlour, the office, the kitchen, and separate dining-rooms and class-rooms for boys and girls, the latter being used also for play-rooms. The second floor comprises the chapel, two officers' bed-rooms and two dormitories with twelve beds each. In the attic are two more dormitories with thirteen beds each, and two small bed-rooms. The children's bedsteads are all iron, white enamelled, and each bed is furnished with excelsior mattresses, two heavy woollen blankets, double sheets, one feather pillow and one white spread. All the rooms are high and airy, well ventilated; the class-rooms are provided with large windows, admitting a flood of light.

Accommodation.—There is good accommodation for twenty-five boys and twenty-five girls, fifty being the authorized number.

Class-room Work.—The course of studies outlined by the department is followed as closely as possible under the circumstances. For the present, as all the pupils are new, unable to speak English, attention is given mainly to reading and writing.

Industrial Work.—The boys are employed at clearing and beautifying the premises around the building, and the girls attend to the general housework and take their turns in the kitchen. Four boys have already learned to make bread. Some of the girls though perfect strangers to the work, are showing remarkable skill in sewing, both hand and machine, and in knitting.

Moral and Religious Training.—Particular attention is given to this branch of education. The children in the short time that they have been at the school have learned all the usual prayers. Morning and evening prayers are said in common. The conduct and obedience of the children is most commendable.

Water Supply.—There is an abundant supply of good crystal water, which is pumped by a hydraulic ram into two tanks of one thousand five hundred gallons capacity and placed sufficiently high to force the water through all parts of the building.

Fire Protection.—This is rather deficient. On every floor, though, there are two taps, and fire-hose is kept in readiness on each side of the building. All necessary measures will be provided in course of time.

Heating.—All heating is done by means of stoves.

Recreation.—At low tide the sandy beach affords the children a large and beautiful play-ground for their favourite outdoor pastimes, as football, baseball, jumping, vaulting and racing for boys, and skipping-rope and croquet for girls. For the rainy season they are well provided with all kinds of indoor games.

64 VICTORIA, A. 1901

Remarks.—While many equipments and improvements are still wanting, it is the intention of the management to provide them in the course of the year, and no pains will be spared to place the school in first-class working condition in as short a time as possible.

I have, &c.,

P. MAURUS, O.S.B.,
Principal.

BRITISH COLUMBIA,
THE PORT SIMPSON GIRLS' HOME,
PORT SIMPSON, June 30, 1900.

The Honourable

The Superintendent General of Indian Affairs,
Ottawa.

SIR,—I have the honour to submit the following report of the Crosby Girls' Home (Port Simpson boarding school) for the year ended June 30, 1900.

Location.—The school is located at Port Simpson, and is situated just outside the limits of the Tsimpsean reserve.

Land.—The land is owned by the Woman's Missionary Society of the Methodist Church, Canada. There is an area of two acres which is well fenced, but, for the most part, in a rough condition.

Buildings.—The buildings consist of a house, 60 x 40 feet; wood-shed, 24 x 12 feet; tank-house, 15 x 13 feet; play-room, 28 x 20 feet. The wood-shed, tank-house and play-room are all connected with the main building. There are also a chicken-house, 10 x 8 feet, and water-closet, 12 x 5 feet. The house is a frame building of four stories, with rooms as follows:—

First Floor.—Kitchen, 21 x 24 feet; pantry, 13 x 18 feet; furnace-room, 24 x 11 feet; store-room, 21 x 8 feet; lavatory and dressing-room, 17 x 26 feet; laundry, 14 x 10 feet; bath-room, 6 x 8 feet; root cellar, 12 x 14 feet; height of ceilings, 8 feet.

Second Floor.—Pupils' dining-room, 26 x 25 feet; teachers' dining-room, 14 x 11 feet; teachers' sitting-room, 15 x 12 feet; office, 10 x 11 feet; pantry, 11 x 13 feet; hall, 9 x 24 feet; sewing-room, 24 x 14 feet; school-room, 20 x 24 feet; ceilings, 10 feet 6 inches in height.

Third Floor.—Two dormitories, each 27 x 20 feet; hospital-room, 15 x 24 feet; hall, 9 x 24 feet; store-room, 10 x 15 feet; matron's bed-room, 17 x 12 feet; sewing teacher's bed-room, 15 x 11 feet; height of ceilings, 10 feet 6 inches.

Fourth Floor.—Dormitory, 37½ x 20 feet; dormitory, 22 x 26 feet; school teacher's bed-room, 13 x 13 feet; hall, 9 x 16 feet; height of ceilings, 9 feet 4 inches.

Accommodation.—Accommodation can be provided for fifty pupils and four teachers.

Attendance.—Enrolment, fifty; average, 36.325. Present number, forty-one.

Class-room Work.—In the class-room, excellent work has been done and promotions made in every standard. The subjects taught are: reading, writing, arithmetic, grammar, dictation, spelling, geography, history, hygiene, music, Bible history and doctrine, and the Methodist catechism.

Garden.—A few flowers, vegetables and berry bushes are cultivated, but owing to unfavourable conditions of soil and climate, little can be accomplished in this line.

SESSIONAL PAPER No. 27

Industries Taught.—The industrial teaching consists of instruction in general house-work, laundry work, cooking and bread-making; also, in sewing, knitting and fancy work. Under the instruction of teachers in the different departments, the pupils perform all the work of the establishment.

Moral and Religious Training.—The pupils are carefully trained to be honest, truthful, obedient, industrious, kind and obliging. A Bible lesson is taught each day, and religious instruction takes a prominent place in the school routine.

Health and Sanitary Condition.—The sanitary condition is good and drainage excellent. There were five cases of measles during the year, all of whom recovered. Three pupils have died during the year, one of consumption, one of tubercular meningitis, and one of kidney disease.

Water Supply.—The water supply is derived from a stream at some distance from the house, and is conducted by a flume into a tank, from which it is distributed through the house by means of pipes. The rain water from the roof is also received into the tank. All water passes through a filter before being received into the tank.

Fire Protection.—The fire protection consists of two chemical fire-extinguishers, one dozen pails, one fireman's axe and three ladders. An efficient fire brigade is organized in the village, and the fire hall is but a short distance from the school. Steps are being taken to organize a fire drill among the pupils and to better equip the home for protection in case of fire.

Heating.—Heating is furnished by six stoves, and an open grate. The hot-air furnace is worn out.

Recreation.—Regular hours are set apart for recreation, which consists of games, music, walks, boating and general play. Club-swinging is practised, and exercise in the open air encouraged and enforced.

I have, &c.,

LAVINIA CLARKE,
Principal.

BRITISH COLUMBIA,
St. MARY'S MISSION BOARDING SCHOOL,
MISSION CITY, July 15, 1900.

The Honourable

The Superintendent General of Indian Affairs,
Ottawa.

SIR,—I have the honour to submit my annual report for the fiscal year ended June 30, 1900.

Location.—The St. Mary's Mission boarding school is situated on the north bank of the Fraser river, one mile east of Mission junction, on the Canadian Pacific railway. The surrounding scenery is most beautiful. As the buildings stand on a bench some two hundred feet above the level of the river, a splendid view is obtained of several snow-tipped mountains and a large portion of the ever-verdant Fraser valley.

Land.—There are three hundred and sixty acres of land in connection with the school, the property of St. Mary's Mission. This area of land comprises forty acres of pasture, fifteen acres in grain, sixty acres in hay, and ten acres in roots and vegetables; the rest being heavy timber land. The soil is fairly good, but, on account of the heaviness of the timber, the clearing of land is very slow and expensive. How-

64 VICTORIA, A. 1901

ever, we succeeded this year in clearing about ten acres, which are now ready for the plough.

Buildings.—The boys' and girls' schools, which are four hundred and twenty feet apart, stand in a line with the mission chapel, and command a magnificent view from the river and the railway. Their dimensions and divisions are as follows :—

I.—The boys' school consists of main building, 36 x 72 feet, and a wing, 22 x 20 feet. The first floor comprises the following rooms, viz. : chapel, 35 x 17 feet; vestry, 5 x 15 feet; parlour, 14 x 14 feet; school-room, 26 x 20 feet; dining-room, 32 x 15 feet; kitchen, 13 x 19 feet; pantry, 8 x 8 feet; store-room, 14 x 8 feet; bed-rooms, 8 x 12 feet; wash-room, 8 x 8 feet.

The second floor comprises : linen-room, 14 x 14 feet ; library, 14 x 14 feet ; infirmary, 14 x 10 feet ; nine bed-rooms, 14 x 9 feet ; water-closet and bath, 8 x 8 feet.

The third floor comprises : dormitory, 30 x 54 feet ; toilet-room, 15 x 8 feet ; toilet-room, 12 x 8 feet ; water-closet and bath, 8 x 8 feet.

II.—The girls' school consists of main building, 36 x 72 feet, and a wing, 24 x 48 feet. The first floor comprises the following rooms, viz. :—two parlours, 10 x 14 feet; two bed-rooms, 11 x 14 feet; school-room, 22 x 14 feet; recreation-room, 30 x 14 feet; dining-room, 31 x 14 feet; linen-room, 8 x 14 feet; kitchen, 24 x 24 feet; pantry, 5 x 8 feet. The first floor comprises two parlours, 10 x 14 feet.

The second floor comprises : chapel, 16 x 35 feet; vestry, 9 x 14 feet; school-room, 44 x 14 feet; sewing-room, 24 x 14 feet; three bed-rooms, 9 x 14 feet; bath-room, 24 x 24 feet; water-closet, 8 x 8 feet.

The third floor comprises : dormitory, 44 x 29 feet; two toilet-rooms, 7 x 10 feet; bed-room, 8 x 14 feet; water-closet, 6 x 8 feet.

The boys' and girls' schools, which are frame buildings with plastered walls, are now nearly twenty years old, and much in need of substantial repairs. The foundations are giving way in many places ; the floors are much worn out, the plastering and painting need to be renewed. It is our intention to pay these matters prompt attention as soon as the pecuniary means are available.

III.—The outbuildings in connection with the school, their dimensions and uses are as follows :—

Laundry, 46 x 32 feet, comprising, on the first floor, washing-room, 30 x 32 feet, provided with three boilers set in bricks, twenty-four stationary wash-tubs, four washing-machines and two wringers ; an ironing-room, 12 x 30 feet, provided with brick stove, mangle and sad-irons.

The second floor comprises only one room, 44 x 30 feet, used for drying clothes.

A two-story frame building, 42 x 22 feet, comprising school-room, 20 x 12 feet; music-room, 20 x 26 feet; carpenter-shop, 20 x 26 feet, and shoe-shop, 12 x 20 feet.

One story frame building, used for recreation, 30 x 20 feet.

Wood-shed, granary and meat-store combined, 25 x 36 feet.

Barn, combined, 84 x 36 feet.

Accommodation.—There is accommodation for forty boys and forty girls, but the school-room and refectory in the boys' school, and the recreation-room, dining-room and sewing-room in the girls' school, are much too small for the number of pupils in daily attendance.

Attendance.—The attendance for the year averages about seventy-nine, that is, 42.05 for the girls and 36.18 for the boys.

Class-room Work.—Marked progress was made in the various branches of study; which chiefly consists of reading, writing, arithmetic, spelling, grammar, geography, dictation, composition, vocal and instrumental music; lessons in calisthenics, gymnastics and dumb-bell exercises are also daily given to the pupils.

SESSIONAL PAPER No. 27

The school hours are from 9 to 11.30 a.m., and from 2 to 3 p.m. Besides the regular school hours, the pupils have study from 5 to 6 p.m.

The grading of the pupils is as follows :—

	Girls.	Boys.
Standard I.....	6	8
“ II.....	14	10
“ III.....	11	11
“ IV.....	7	7
“ V.....	3	7
“ VI.....	3	..

Industrial Training.—The importance of industrial training has not been lost sight of, and the results are becoming more and more apparent.

Besides the routine work of washing dishes, sweeping and scrubbing, the boys' duties consist of labour in the field and garden, care of stock, grading roads, planting trees, repairing fences and buildings. The duties of the girls consist of house-cleaning, cooking, baking, laundrying and sewing under the direction of the sisters. It is pleasant to be able to report that both the boys and girls take a great interest in doing their work as perfectly as possible.

Moral and Religious Training.—Special attention is given to the moral and religious training of the pupils. Every morning they assist at mass in the school chapel. School is always opened and closed with prayer. Half an hour every evening is spent in the memorizing of the catechism, hymns and prayers. On the whole, the conduct of the pupils has generally been good.

Health and Sanitary Condition.—The sanitary condition is good, and drainage, on account of the situation of the school, excellent. During the year the majority of the pupils were attacked severely with the grippe or influenza, from the effects of which two deaths occurred.

Water Supply.—An abundance of excellent water is supplied by a mountain stream.

Fire Protection.—Four chemical fire-extinguishers, fireman's axes, ladders and buckets are constantly kept in places of convenient access. The pupils and staff are systematically organized for efficient co-operation in case of fire. Fire practices, with marked progress, are held every Saturday.

Heating.—The heating is done by means of stoves.

Recreation.—Two hours daily, besides Wednesday and Saturday afternoon, are given exclusively to recreation. The boys' chief amusements are football, baseball and swimming. The girls have their own play-ground and play croquet, hand-ball, and go for walks, in charge of a sister.

General Remarks.—In conclusion, I desire to place on record my grateful appreciation of the interest in our work evinced by the Indian Superintendent, Mr. A. W. Vowell, and our good agent, Mr. Devlin, who visited our school and examined the children several times during the year. I beg also to tender my thanks to the members of the staff for their faithful work in the various departments.

I have, &c.,

J. A. BEARD, O.M.I.,

Principal.

64 VICTORIA, A. 1901

BRITISH COLUMBIA,
SQUAMISH MISSION BOARDING SCHOOL,
VANCOUVER, July 24, 1900.

The Honourable
The Superintendent General of Indian Affairs,
Ottawa.

SIR,—I have the honour to submit my first annual report for the fiscal year ended June 30, 1900.

Location.—This school is situated on the north shore of Burrard inlet, immediately opposite the city of Vancouver and about four miles distant therefrom.

Buildings.—The main structure consists of entrance hall, parlour, girls' school-room, dining-room, boys' school-room, kitchen and store-room, all of which are on the ground floor. The second story is occupied by dormitories for boys and girls and sleeping-rooms for matron and staff, also a small chapel. The outbuildings consist of wood-shed, 35 x 16 feet ; laundry, 40 x 20 feet, and stable, 20 x 30 feet.

Land.—The area of land connected with the school is twenty-one acres, and is owned by the Sisters of the Instruction of the Holy Infant Jesus. A nice garden has been cleared and planted by the boys during the past spring and gives us a plentiful supply of vegetables for use of the school, besides giving plenty of healthy exercise to both boys and girls.

Girls' Industrial Work.—The girls have been taught all kinds of housework, knitting, sewing, darning, crochet work and flower-making.

Class-room Work.—This consist of reading, writing, arithmetic, spelling, dictation, geography and vocal music.

Moral and Religious Training.—Religious instruction is daily given to the pupils from 4.30 to 5 p.m. Every morning and evening they have prayers in common ; on Sundays and holy days they attend religious service in the parish church. The conduct of all the pupils has been satisfactory during the whole course of the year.

Health and Sanitary Condition.—The health of the pupils has been good and no sickness of any moment occurred amongst them. The sanitary conditions and drainage are excellent.

Water Supply.—Our water supply, whilst not over plentiful, is very good. It is obtained from a small creek a short distance from the school.

Fire Protection.—We have two Stempel fire-extinguishers constantly kept in readiness for use.

Recreation.—The boys spend their recreations in football and baseball, and during summer season in swimming and boating. The girls' amusements are dominoes, chess, skipping ropes, drawing slates and dressing dolls.

General Remarks.—Numerous visitors from Vancouver and New Westminster have inspected the school and seemed pleased with all they saw.

Mr. A. W. Vowell, Indian Superintendent, and Mr. Devlin, Indian agent, came last spring and were satisfied with the good appearance and tidiness of our pupils.

I have, &c.,

E. M. BUNOZ,
Principal.

SESSIONAL PAPER No. 27

BRITISH COLUMBIA,
ALL HALLOWS BOARDING SCHOOL,
YALE, July 2, 1900.

The Honourable
The Superintendent General of Indian Affairs,
Ottawa.

SIR,—I have the honour to submit herewith my annual report for the year ended June 30, 1900.

Location.—This school is situated on the right bank of the Fraser river, in the province of British Columbia, about a quarter of a mile below Yale station, on the Canadian Pacific Railway.

Land.—The school stands in about four acres of land, which is held in trust for the mission.

Buildings.—These consist of (a) a large commodious school-house, to which a small wash-house has recently been added; (b) a large additional dormitory; (c) a house for teachers and visitors; (d) a small chapel; and (e) a wood-shed, and the other usual offices.

Accommodation.—The main school building is capable of accommodating twenty-eight girls, and three teachers; the additional dormitory will hold eight or ten girls.

The building of a new wing to the school is in contemplation. This will provide for all the dormitories being under one roof, and will also give a much-needed work-room, and an additional dining-room.

Attendance.—All the children attending the school are boarders. Three are at present absent on sick-leave.

Class-room Work.—The school is divided into (a) the upper school, consisting of Standards IV, V, VI, and (b) the lower school, of Standards I, II, III. The vice-principal, and two English teachers, teach all the usual subjects throughout the school; the matron takes the needlework classes. A few of the elder girls take classes in reading, spelling and arithmetic in the lower school, in order to develop and stimulate their own powers of teaching and influencing others.

Garden.—About two acres of land is laid out in fruit, vegetables and flower gardens. Here the girls are shown the advantages and desirability of paying attention to horticulture in all its branches. They are encouraged to work in the garden whenever it is possible, though the uncertainty of the climate, and the children's own desire for a thorough school education, prevent any great amount of systematic training in this department.

Industries Taught.—These are chiefly such as will best fit the girls to be useful in their own homes, or as domestic servants; such as housework (in all its branches), laundry work, bread-making, and simple cookery; also some amount of school teaching and of gardening as mentioned above.

Moral and Religious Training.—This is most carefully attended to in every respect by those concerned in the children's welfare. A short religious instruction is given almost daily, and the virtues of truthfulness, obedience, honesty, purity, cleanliness, order, self-reliance, self-respect and thrift are constantly inculcated and enforced. Though many applications are received begging for girls from this school to be sent as domestic servants to excellent situations, yet they are never allowed to go until we can feel that the moral and religious training they have received here has sufficiently established and strengthened their character.

64 VICTORIA, A. 1901

Health.—Although every possible precaution is taken to admit only apparently healthy children to the school, and although great care is taken of them while here, yet inherited scrofula, or tubercular disease sometimes shows itself in a child even after the lapse of years. The children, in general, show by their cosy, healthy, sturdy appearance what thorough care is taken of them, but they are naturally delicate, and a slight chill often attacks the lungs at once. There were no serious cases of illness in the school during the entire autumn and winter (except a few glandular swellings), but in April about thirty children were attacked by an epidemic of influenza, and one girl has since then had a sharp attack of pneumonia, followed by pleurisy.

Sanitary Condition.—The sanitary condition of the school is very satisfactory, the drainage having been put into thorough order this spring.

Water Supply.—This is plentiful, and excellent in quality, being obtained from a mountain stream close to the house.

Fire Protection.—This is given by an abundant water supply, laid on in the various buildings, which can readily be utilised by attaching about 150 feet of garden hose to one of the many taps in the house. There are also four Star fire-extinguishers on the premises. The children are trained to such prompt obedience and are so well disciplined that they have shown themselves capable of rendering very efficient assistance in putting out fires which have occurred near at hand.

Heating.—The buildings are heated by wood and coal stoves, the pipes of which pass through brick chimneys.

Recreation.—A large play-ground has been laid out for the school, containing a swing, and a summer-house, besides a flower garden for each child. Here the children have much healthful play and exercise in fine weather, besides their daily walk of one hour. In bad weather their large play-room is utilised for games and other recreations.

The Closing Exercises.—The annual prize-giving takes place in July. Prizes are given for proficiency in scripture, arithmetic, and other school subjects, also for bread-making, and for excellence in other household duties. A silver medal is awarded for good conduct. The closing exercises consist of music, songs, marching, recitations, a musical drill, and other items of interest, all carefully prepared by pupils and teachers, and at which friends and acquaintances are invited to be present.

A Wedding.—One of the elder girls was honourably married from the school this spring to a young Indian from the Lower Fraser. The chief spoke very well of his character, and the friends on both sides seemed much pleased by the marriage.

I have, &c.,

AMY, SISTER SUPERIOR,

C. A. H.

BRITISH COLUMBIA,

ALERT BAY INDUSTRIAL SCHOOL,

ALERT BAY, August 6, 1900.

The Honourable

The Superintendent General of Indian Affairs,
Ottawa.

SIR,—I have the honour to submit my annual report of the Alert Bay industrial school, together with an inventory of government property under my charge, for the fiscal year ended June 30, 1900.

Location.—The industrial school is healthily situated on rising ground, at the extreme west end of Alert bay, and commands a very pleasant view seaward, and is also sheltered from northerly winds.

SESSIONAL PAPER No. 27

The land connected with the school comprises four hundred and ten acres of thick bush, six of which have been cleared by the pupils, with a small amount of outside help.

Buildings.—The school building is of wood, 60 x 40 feet, tastefully and strongly erected, with plastered walls and light, lofty, airy rooms.

Attached to the main building is a wing, 54 x 18 feet, comprising workshop and play-room; the outer buildings comprise laundry, cow-shed, small wood-shed, root-house, a hen-house and run, and large wood-shed, 60 x 30 feet; the last three named were erected by the pupils. There are also six dry-earth closets.

Accommodation.—There is ample accommodation for twenty-five pupils, and in the event of that number increasing, a large loft in the top of the building could easily be converted into a comfortable bed-room for another ten pupils, thus reaching the authorized number of thirty-five.

Attendance.—The attendance, I am pleased to state, has increased slightly during the year, the number on the roll being twenty-eight. The pupils were graded as follows:—

Standard I.....	5
“ II.....	5
“ III.....	7
“ IV.....	8
“ V.....	3

Class-room Work.—The work in the class-room has been most satisfactory and encouraging. The boys have striven hard to learn, and marked improvement has been made in reading, spelling, arithmetic and English.

Conduct.—The conduct during the whole year has been particularly good. The pupils have, without exception, behaved well in class.

Industrial Work.—All the boys have helped in the general housework and washing, and most of them have taken pride in doing well the portion of work allotted to each. In the carpenter's shop twelve boys have received regular instruction, and five of them have excelled in this branch of work. These boys, with their teacher, have erected a cottage near the school for the use of the trades instructor.

Religious Instruction.—Morning and evening prayer is said daily in the dining-room, and a Bible lesson is given every morning to each class. The pupils are continually taught the necessity and advantage of cleanliness and purity of mind and body, and a continuous supervision is exercised over them from morning to night.

Health.—The health of the boys has been good. We are indeed thankful for this, especially so, as there has been so much sickness in the village.

Sanitary Condition.—The sanitary condition is satisfactory. A good drain carries the water from the kitchen, lavatory, bath-rooms and laundry to the sea. Disinfectants are regularly used, floors often scrubbed, garbage and refuse matter burned and ventilation properly attended to.

Water Supply.—Water is supplied to the house from a well near by. The water is pumped up daily into a large tank by the pupils, which is regularly cleaned.

Fire Protection.—All necessary precautions are taken against fire. A ladder is kept ready for use. Twenty-four fire buckets and four Star extinguishers are kept on hand. A fire hose 100 feet long is ready for use, and the pupils are adept in having the water in play in a very short time. Fire drill is practised in accordance with the desire of the department.

Heating.—The heating is all done by means of stoves. Chimneys and flues are kept clean.

Recreation.—The boys spend most of their recreation time in football, of which they are very fond. They also play chess, draughts, parlour croquet and

64 VICTORIA, A. 1901

crokinole in the winter evenings. They are kept well supplied with toys, picture books, &c. A brass band is a desideratum which will be filled as soon as our means permit.

Girls' Department.—The girls of the Girls' Home have been under the care of Miss Carleton. Eight girls have been in residence. They have been admirably taught all the branches of housework, and the class-room work has been under the care of Miss Edwards, a most efficient teacher.

General Remarks.—The Bishop of Caledonia has appointed Miss Loxton Edwards to be assistant matron, for whose help I have to thank the Church Missionary Society. My thanks are also given to Indian Agent Pidcock for his kindly visits to the institutions and many encouraging words given to the pupils. Mr. Halliday, the trades instructor, has been a great help in teaching the boys in Sunday school.

I have, &c.,

A. W. CORKER,
Principal.

BRITISH COLUMBIA,
COQUALEETZA INDUSTRIAL INSTITUTE,
CHILLIWACK, August 23, 1900.

The Honourable
The Superintendent General of Indian Affairs,
Ottawa.

SIR,—I have the honour to submit my annual report for the year ended June 30, 1900.

Location.—Our institute is situated on the right bank of the Lucucuck river, three miles from the town of Chilliwack, which is accessible by two lines of steamers from New Westminster giving a daily service, Sunday excepted, and also by the Canadian Pacific Railway via Harrison station, from thence by steamer to Chilliwack landing.

Land.—We have now ninety acres of excellent land, which is held by the missionary society of the Methodist Church for the use of the institute, for which we pay an annual rental of \$390.

Buildings.—These are as follows:—(1) the institute proper, a three story brick structure, of imposing appearance, well lighted and ventilated, erected by the missionary society of the Methodist Church for institute purposes, at a cost, including furnishings, of about \$25,000, towards which the Indian Department contributed \$5,000. The first floor is raised about five feet from the land level so as to admit of the basement being well lighted, and is approached by convenient steps at the two front entrances, leading to halls nine feet wide extending from the front to the rear porches of the building, a distance of forty feet, from which steps again descend to the boys' and girls' yards, respectively. These two halls with others similarly situated on the second and third floors divide two wings of the building from the central portion. The latter, including the kitchen annex, at the rear, and the tower at the front, has an extreme width of 63 feet. The main room of this portion is the children's dining-room, 24 x 41 feet, containing ten tables transversely placed, capable of accommodating over one hundred pupils. At the rear of the dining-room is the kitchen, 18 x 22½ feet, off which are two pantries, one 7 x 9 feet, used in connection with the teachers' dining-room, and the other, 9 x 17 feet, used with the children's dining-room. At the front of the children's dining-room is the tower, con-

SESSIONAL PAPER No. 27

taining on this floor the principal's office, $7\frac{1}{2} \times 11\frac{1}{2}$ feet, and a hall with stairs leading to the second and third floors. The right wing contains a sitting-room, $14 \times 11\frac{1}{2}$ feet, with a bed-room off, $10 \times 11\frac{1}{2}$ feet; teachers' dining-room, $11\frac{1}{2} \times 19$ feet, and a dressmaking-room, $14\frac{1}{2} \times 21$ feet. The left wing contains a sitting-room, 12×13 feet, with a bed-room off, 10×12 feet; a sewing-room, $18\frac{1}{2} \times 21$ feet, and a store-room adjoining, 9×21 feet.

The main room on the second floor is the school-room, which occupies the entire breadth of the central portion of the building, as does the childrens' dining-room on the first floor, and is the same size, viz., 24×41 feet. To the rear of the school-room are three bed-rooms over the kitchen, sizes respectively, $13\frac{1}{2} \times 9\frac{1}{2}$ feet, $14\frac{1}{2} \times 8\frac{1}{2}$ feet, and $10 \times 11\frac{1}{2}$ feet; also a bath-room, $6 \times 9\frac{1}{2}$ feet. The right wing on this floor contains boys' dormitory No. 1, 40×21 feet, with a capacity for twenty-four beds, and a teacher's bed-room, 17×13 feet. Similarly the left wing contains girls' dormitory No. 1, 40×21 feet, with a capacity for twenty-four beds, and a teacher's bed-room, $13 \times 9\frac{1}{2}$ feet. Adjacent to the dormitories on each side is a store-room for clothing and bedding when not in use.

The third floor contains dormitories and teachers' rooms, and additional store-rooms for clothing and bedding. The boys' dormitories on this flat are No. 2, 24×40 feet, with a capacity for twenty-one beds, and No. 3, 12×20 feet, with a capacity for eight beds; also three teachers' rooms, 9×13 , 8×11 , and 11×11 feet. The girls' dormitories are identical in size with the boys, viz., No. 2, 21×40 feet, with a capacity for twenty-one beds, and No. 3, 12×20 feet, with a capacity for eight beds, and three teachers' rooms, 9×13 , 8×11 , and 11×11 feet respectively.

Total capacity of dormitories, one hundred and six, and rooms for staff, 13.

The basement occupying the entire area under the building contains:

Two lavatories, each 11×20 feet, having seven bowls and two bath-rooms.

Two furnace-rooms, which are also halls by which access is had to the recreation-rooms, the laundry, lavatories, and dry-air water-closets. Size on the boys' side, $16\frac{1}{2} \times 40$ feet, on the girls' side, $8\frac{1}{2} \times 40$ feet.

Laundry-room, $29\frac{1}{2} \times 31\frac{1}{2}$ feet, extreme width.

Dairy, $22\frac{1}{2} \times 18$ feet.

Smead-Dowd water-closets, $10 \times 31\frac{1}{2}$ feet.

Scullery, $6\frac{1}{2} \times 22\frac{1}{2}$ feet.

(2) Two barns; one exclusively for hay and grain, 50×64 feet; the other, 48×52 feet, contains horse and cow stables, a capacious root-cellar, a granary, a harness-room, and a carriage and implement room.

(3) A kindergarten building, 28×40 feet, admirably adapted for its purpose, where also the band instruments are kept, and where the band have their practices and receive their instruction.

(4) A frame, one-story cottage, 26×34 feet, occupied by the farm instructor's family.

(5) A frame building, 20×75 feet, containing in its different parts shoe shop, carpenter shop, wood-shed, a brick-lined root-cellar and a flour-room. A portion of this building has been fitted up during the year for a drying-room.

(6) A granary has also been completed, having become necessary to hold the grain raised this year on our farm, and in which this season's crop is actually garnered size, 20×30 feet.

(7) A shed, 24×35 feet, has also been put up to protect wagons and other agricultural implements from the weather.

(8) Other minor buildings are: a tank-house, containing a tank of two hundred and forty barrels capacity, for rain water for use in the laundry; a windmill with inclosed building, containing a one-hundred barrel tank, from which the kitchen and lavatories are supplied; a hen-house, 12×16 feet; a bake-house, 12×16 feet, and a pig-pen.

Attendance.—The total attendance during the year has been one hundred and ten pupils, with an average for the year of over eighty-four. Fifteen were received,

64 VICTORIA, A. 1901

twenty-four discharged and three died, leaving a present attendance of eighty-three. Of these, forty-two are boys and forty-one are girls.

Class-room Work.—This work has been prosecuted faithfully, the result being that commendable progress has been made by the pupils with very few exceptions.

The grading by standards is :

Standard	I.	28
"	II.	15
"	III.	24
"	IV.	24
"	V.	9
"	VI.	10

Ten of the larger girls have been learning music during the year. Some of these can lead the singing at the organ in a religious service very acceptably. Too much cannot be said in praise of the advantages of the kindergarten system for quite young children: in the words of the Hon. Geo. W. Ross, 'By an easy transition, scarcely perceptible to the child, the kindergarten leads naturally from the nursery to the school-room. Its work is congenial, its discipline kindly, and its methods in harmony with child-nature. No school system can be said to be properly organized that is not founded upon the kindergarten.'

Farm and Garden.—The past season was highly favourable in respect to the produce of the farm and also of the garden. Our yield of hay was excellent, averaging not far short of three tons to the acre. After retaining sufficient for home consumption, we disposed of over one hundred tons, most of which brought ten dollars per ton. Of other produce the yield was about as follows: oats, three tons; pease, two tons; turnips, eight tons; carrots, eight tons; mangolds, thirty-four tons, and potatoes, twenty tons.

Industries Taught.—In accordance with the policy of the Indian Department, the first place is given to farm and garden work. A few of the boys learn shoemaking. Some are selected to assist in doing such carpenter work as has to be done about the premises, and in the use of the more common tools they acquire considerable skill. Three of the larger boys did fifty-six days' work at painting on the institute building last autumn. The work was as satisfactory as that done by the painter who had the work in charge. We want that our boys shall be generally handy—men of all work—as being best suited to the conditions of this country. Hence they are taught the care of their own rooms, washing their own clothes, preparing vegetables for meals, and cooking them, scrubbing floors, baking bread, besides all the different parts of farm and garden work, care of stock, &c. The boys and girls both need to be trained especially in habits of diligence, orderliness, promptness, thoroughness, and thrift. If we are successful in establishing these qualities as abiding elements in character, we shall have accomplished much. This is a work which requires years of patient and painstaking effort, and is greatly facilitated by being commenced when the subject is quite young, and by being begun in the kindergarten room. The industrial training of the girls includes housework in all its branches such as care of rooms, scrubbing, cooking, and laundry work; also sewing, knitting and baking. Upon these essentials of housekeeping we lay especial stress. To fit the girls for the common duties of the home should, we feel, be our first care. The larger girls are taught fancy needlework, dressmaking, and the finer kinds of baking and cooking. Again we have the gratification of reporting success in the competition for prizes at the agricultural exhibitions held last autumn at Chilliwack and at New Westminster. As in previous years, our boys and girls were successful against all comers in carrying off many prizes.

Moral and Religious Training.—To this most important duty the utmost attention is given. The importance of kindness, honesty, truthfulness, temperance, and reverence for God and sacred things, is constantly urged and their observance en-

SESSIONAL PAPER No. 27

forced. Religious instruction is imparted daily in the schools, and in meetings held for the purpose on Tuesday evening of each week. Sabbath school is held each Lord's day from 9.30 to 10.30 a.m. Morning and evening worship is conducted for the whole school daily. All the children attend divine service at either the Indian or the white church in the neighborhood in the afternoon, and the larger ones at the institute at 7.30 p.m. (the smaller children having retired for the night.) Several of the children by their consistent lives and humble profession of faith in Christ give evidence of having undergone a change of heart.

Health and Sanitary Condition.—The health of the pupils has been, during the past year, exceptionally good. Three of the children have died through the development of inherited tendencies undetected and presumably undetectable at the time of their admission to the institute. Every care is taken to maintain the most healthful conditions by securing good ventilation, supplying wholesome food and plenty of it, and by frequent fumigations and the liberal use of disinfectants where any unsanitary conditions may be suspected to exist.

Water Supply.—This is drawn from a barrel sunk in the gravel near the bed of the Lucucuck river, into which the water filters from the river; from thence it is pumped by a windmill into an elevated tank and conveyed to the house through pipes. The supply is abundant, and even before being filtered is excellent in quality.

Fire Protection.—This consists in (1) the building being of brick, (2) fire-escapes at the windows, (3) a plentiful supply of water, (4) barrels of water kept in the halls, and a supply of fire buckets within easy reach in case of need, (5) Carr chemical engines, furnished by the department, (6) fireman's axes also supplied by the department, and placed where they may be instantly had in case of need.

Heating.—The building is heated with hot air, the Smead-Dowd system being used.

Recreation.—A portion of each day is set apart for recreation, which is utilized with great heartiness, principally in the play-grounds, but indoors in the play-rooms when the weather is bad. With the boys the popular amusement at present is football, which they sometimes play with the young men of the vicinity, who are pleased to have our boys share their sports with them. Half-holidays are frequently given the pupils and social evenings are arranged for, which they very much enjoy. Checkers, crokinole, and the like, they indulge in occasionally, but the more active outdoor games they prefer. But the band is of all others the recreation in which the members take the chief delight. Under the skilful leadership of Mr. R. Marshall, they are attaining proficiency which excites general remark. Scarcely a garden party is given by any of the churches in the settlement but our band is engaged to furnish music. We are pleased with this; for we feel that the more our children are brought into contact with the right kind of white people, the better it is for them, and the more sympathy is felt for them, and for the work which we are striving to do.

General Remarks.—It is right that I should in my annual report acknowledge, as I gratefully do, the uniform courtesy and promptness of the Indian Superintendent in dealing with all matters which it becomes my duty to bring before him. His visits are also looked forward to with much pleasure as occasions of much interest and profit. They invariably do good. We owe much also to the energetic agent of the Fraser River agency for his zealous co-operation to enforce the policy of the department, and to make our institute subserve in the highest degree the good of the Indian race.

I have, &c.,

JOSEPH HALL,
Principal.

64 VICTORIA, A. 1901

BRITISH COLUMBIA,
KAMLOOPS INDUSTRIAL SCHOOL,
KAMLOOPS, July 17, 1900.

The Honourable
The Superintendent General of Indian Affairs,
Ottawa.

SIR,—I have the honour to forward my annual report for the fiscal year ended June 30, 1900.

Location.—The Kamloops industrial school is situated on the northern bank of the South Thompson river, about two miles east of Kamloops city, a station of the Canadian Pacific Railway.

Land.—In connection with the school an area of land of three hundred and twenty acres was surrendered to the school by the Indians of Kamloops reserve. It is a narrow strip of land, extending for about two miles along the river. The greater part of it is unfit for cultivation, owing to the sandy or gravelly nature of the soil or to the want of water for irrigation; it affords but scanty pasture to the few animals owned by the institution. There is no timber available for fuel; all the fire-wood has to be purchased.

Grounds.—The boys and girls have separate play-grounds, inclosed by picket fences. The grounds are kept as neatly as possible; but we are baffled every year in our efforts to improve them by the planting of shade trees; the scarcity of water and the high winds prevalent here are the causes of the failure.

Buildings.—The buildings are in good condition, and some of them have been repainted lately, inside and outside. They are as follows:—

1. The main buildings, 34 x 30 feet, with an extension 52 x 18 feet. The ground floor contains:

- (a.) The parlour, 12 feet 6 inches x 12 feet 6 inches.
- (b.) The office, 13 x 13 feet.
- (c.) A bed-room, 9 x 9 feet.
- (d.) The pantry, 10 x 6 feet.
- (e.) The kitchen, 16 x 16 feet.
- (f.) The laundry, 30 x 18 feet, with four bath-rooms and bake oven.

On the second floor are:

- (a.) The small girls' dormitory, 32 x 15 feet.
- (b.) The girls' school-rooms, 32 x 14 feet and 22 x 14 feet.
- (c.) The chapel, 30 x 17 feet.

2. The girls' home, 30 x 22 feet, with an addition in course of erection, 34 x 22 feet. On the first floor are:

- (a.) The girls' sewing-room, 21 x 15 feet.
- (b.) The sisters' dining-room, 13 x 12 feet.
- (c.) A bed-room, 9 x 9 feet.

On the second floor there are:

- (a.) The big girls' dormitory, 28 x 11 feet and 12 x 9 feet.
- (b.) The teacher's bed-room, 9 x 8 feet.

The new addition will contain on the first floor:

- (a.) The girls' recreation-room, 22 x 21 feet.
- (b.) A small parlour, 9 x 9 feet.
- (c.) A store-room, with stairs, 12 x 9 feet.

SESSIONAL PAPER No. 27

On the second floor will be a girls' dormitory, 34 x 22 feet.

3. The boys' home, 40 x 33 feet, with an addition, 30 x 18 feet.

The ground floor contains:

(a.) A bed-room for the instructor, 12 x 11 feet 6 inches.

(b.) A music-room, 12 x 12 feet.

(c.) A clothes-room, 13 feet 6 inches x 12 feet 6 inches.

(d.) A provision-room, 12 x 10 feet.

(e.) The boys' lavatory, 12 x 19 feet.

(f.) Two recreation-rooms, 18 x 12 feet and 30 x 17 feet.

On the second floor are:

(a.) The boys' dormitory, of irregular dimensions; part of it is 28 x 12 feet, and part of it 22 x 18 feet.

(b.) A sick-room, 12 x 12 feet.

(c.) The principal's bed-room, 12 x 9 feet.

(d.) The boys' school-room, 30 x 17 feet.

4. Carpenter and shoemaker shops, 60 x 20 feet.

5. Wood-shed, 30 x 10 feet.

6. Cow stable, 40 x 24 feet, with a root cellar, 24 x 10 feet.

7. Barn and horse stable, 40 x 20 feet, with two additions, each 20 x 10 feet, one for tool-shed and the other for hen-house.

8. Cellar, 24 x 16 feet.

9. Pump-house, about 18 x 8 feet.

10. Dairy and ice-house, 22 x 16 feet.

11. Three-roomed cottage for employees, 24 x 20 feet.

12. Girls' summer-house, 16 x 16 feet.

13. Windmill, near the garden.

14. Water tanks: one near the laundry, of a capacity of eighteen hundred gallons; another, of a capacity of twelve hundred gallons, has been erected this summer on a tower, about 34 feet high, situated between the main buildings and the boys' home. From the ground to the top of the vane surmounting the tank-house the height is about fifty feet. The whole presents a fine appearance.

Accommodation.—The school can accommodate sixty pupils and seven officers.

Attendance.—Twenty-five boys and twenty-five girls were on the roll this year; the average attendance was nearly fifty. Seven boys and five girls were discharged by the department; five girls and six boys were admitted.

Class-room Work.—The school hours for the boys were, in the morning, from 8.45 till 12 noon, and in the afternoon, from 4.45 till 6.15. The girls attended school from 2.00 till 5.00 in the afternoon, and had half an hour's study in the evening. The progress of the girls in their studies was very gratifying, whilst the boys have improved greatly, particularly in mental arithmetic. At the end of the year the pupils were graded as follows:—

Standard II.....	14
“ III.....	1
“ IV.....	20
“ V.....	5
“ VI.....	10

Farm and Garden.—Farming cannot be conducted on a large scale. There are about ten acres of good bottom land, but they are subject to the periodical overflows of the Thompson river. The garden, containing three acres, is the only part of that land which can be protected against the high water, and to do this, we had to build a dyke three hundred and fifty feet long, ten feet wide and from two to five feet high.

64 VICTORIA, A. 1901

The product of the garden last fall was not as good as usual; however, we had an ample supply of roots and vegetables for the institution. At this date the crops, comprising potatoes, pease, beans, beets, carrots, onions, corn, tomatoes, cabbages, look well, though they suffered somewhat from the cut-worms and potato bugs; the application of insecticides was found necessary and successful.

A field, containing two acres, on which was growing a very promising crop of wheat, was overflowed late in June, and the crop was destroyed.

One mile east of the buildings there is some good land, but water for irrigation cannot be brought on there without great expense. However, the alfalfa sown there a few years ago continues to turn out well.

All the boys do farm and garden work. The windmill is kept in good running order, but does not give a sufficient supply of water for irrigation; and we have trouble sometimes in getting water from the Indians' irrigation ditch.

Live Stock.—At the present time our stock consists of four horses and one mare which, I fear, is permanently injured; four milch cows, one heifer and three calves. We cannot keep a larger number.

Industries Taught.—*Carpentering*.—Eleven boys have received more or less instruction in this trade. They have built an addition to the girls' home, 34 x 22 feet, two stories high; they have made also a platform and desk for the girls' teacher, and two wash-stands.

Painting.—Four boys have been employed at painting in the spring and early summer. They painted the new building, repainted the boys' home, wood-shed and picket fence, the shops, the stable and part of the main building.

Shoemaking.—Four boys were engaged in this branch; they did creditably all the repairing, which is considerable.

Girls' Work.—The girls learn all kinds of housework, hand and machine sewing, plain and fancy needlework, crochet work and the making of lace. They make all their clothing and part of the boys' clothing.

Moral and Religious Training.—Religious instruction is given daily for half an hour. We keep constantly before the mind of the pupils the object which the government has in view in carrying on the industrial schools, which is to civilize the Indians and to make them good, useful and law-abiding members of society. A continuous supervision is exercised over them, and no infraction of the rules of morality and good manners is left without due correction.

Health and Sanitary Condition.—During the summer holidays of 1899, many pupils caught the measles while at home; some were unable to return at the time appointed, others returned in an enfeebled state, but they soon recovered at the school their usual good health. With the exception of two girls, who are a little delicate, the pupils have enjoyed excellent health during the whole year. The sanitary condition is satisfactory. A drain 350 feet long and 3 feet deep conveys the water from the kitchen and laundry to the river. Lye and phenole are used as disinfectants. Garbage and refuse matter are not permitted to remain on the premises. Ventilation is properly attended to.

Water Supply.—Water is supplied to the house from a well dug near the river. The pump is operated by horse-power, and the water is kept in a tank, placed near the laundry. The tank is lined inside with galvanized iron and covered all around with sawdust. Thus the water is kept fresh and pure from all pollution.

Fire Protection.—The fire-appliances on hand are as follows:—

1. Four chemical extinguishers, furnished by the department.
2. Two fireman's axes, also supplied by the department.
3. Three strong ladders, permanently attached to the buildings; three long ladders and a few smaller ones kept in proximity to the buildings, the small ones to be used inside the house in case of necessity.

SESSIONAL PAPER No. 27

4. One or two buckets full of water kept in the rooms wherever a stove is placed. Six fire buckets in the boys' building, besides a number of others which are also used for other purposes. In the laundry, a dozen buckets or more always on hand.

5. One water tank near the laundry, of a capacity of eighteen hundred gallons, with three taps, but as there is not sufficient pressure, hose cannot be used in connection with them, and the water would have to be carried off in buckets. It is to remedy this inconvenience that another tank of a capacity of about twelve hundred gallons has just been erected on a tower as high as the highest buildings. This tank is to be filled from the never-failing well near the river, and the water is to be used only in case of fire. The hose to be connected with this tank will be 1½ inch; it has been ordered, but has not come to hand yet, and we could not try the pressure.

Heating.—Only ordinary box stoves are used for this purpose.

Recreation.—The pupils have about half an hour in the morning, half an hour at noon, and from 6.30 p.m. till bedtime. The principal outdoor games are football and baseball; swimming in summer, skating and coasting in winter are much enjoyed by the pupils.

The girls indulge in the ordinary amusements suitable to their sex, swinging, skipping, &c. Some of them are fond of reading. The brass band provides for the boys another form of recreation.

General Remarks.—The pupils who were discharged at the beginning of the year, on the whole, are doing well. Some are working on farms and others on the railroad.

In closing this report, I wish to express my high appreciation of the interest taken in our school by Mr. Vowell, Indian Superintendent, who, in his official visits, examined the children and appeared well pleased with the progress made by them and with their healthy appearance. I would also acknowledge with pleasure the promptness of Agent Irwin in giving me every assistance.

I am, &c.,

A. M. CARION, O.M.I.

Principal

BRITISH COLUMBIA,

KOOTENAY INDUSTRIAL SCHOOL,

St. EUGENE P. O., July 2, 1900.

The Honourable

The Superintendent General of Indian Affairs,
Ottawa.

SIR,—I have the honour to submit my annual report for the year ended June 30, 1900.

Location.—The position of this school in the valley of the St. Mary's, is both pleasant and salubrious. The mountain breezes temper the heats of summer, and the giant expansion of foot-hills, protect it from the fierce gales of winter, elsewhere experienced. The bordering fields, and grassy bench-land, are in spring and summer dotted with a profusion of wild flowers that the Indian children love to gather to decorate school and shrine.

Buildings.—The main building is a neat dwelling of eight compartments, commodiously apportioned. Its appearance has been much beautified by the erection of a cupola, to serve as a receptacle for our bell lately received, and which rings out the call for rouse, prayer, meals, labour and rest. To the right is the girls' house, and to the left the boys'. Both are partitioned off into recreation-room, dining-room, dormitory, lavatory, and fine wardrobes are stationed in convenient places along the walls.

64 VICTORIA, A. 1901

Built on to the boys' recreation-room, is a large school-room, 25 x 30 feet. It is well lighted and ventilated. The upper story is the large boys' sleeping apartment. The girls' class-room is in the main building. The foreman's house, bakery, laundry, dairy, meat-house, barns, stables, and shoe-shop are in good repair, and answer fairly well their intended purposes. The ice-room between meat-house and dairy, is found most convenient, as it keeps those two compartments cool during summer, and insures safe storage of meat, butter, and other articles of food.

Grounds.—The dwellings are surrounded by spacious and well kept grounds, and in them flower beds are laid out and carefully attended to by the children.

Accommodation.—The enlargement of the recreation-rooms added greatly to the enjoyment of winter hours, as these apartments are now sufficiently large to admit of suitable indoor games. The boys' department could accommodate thirty-five pupils, and the girls' twenty-five.

Class-room Work.—So as to utilize every moment of the half-day school system, two teachers were engaged with the boys in the forenoon, and two with the girls in the afternoon; thus it could be ascertained that all were well occupied. After the recitation of lessons, according to government programme, as much time as could be spared was given to mental arithmetic and work on the blackboard. This was frequently varied with composition and general knowledge questions.

Most of the children applied their minds well to their studies, and evinced a real desire of advancing. A great stimulus to them was the reading out of their good marks at the beginning of each month. Knowing that attention is the criterion of the scholar, every effort was made to have lessons interesting and instructive, and the pains taken by the teachers, were in a large measure compensated by the visible progress made.

The grading of pupils is as follows :—

Standard I.	11
“ II.	4
“ III.	15
“ IV.	11
“ V.	10
“ VI.	4

The brass band continues to be a leading feature of interest to the school. The boys generally practised from one to two in the afternoon, and that hour was to them one of real enjoyment. I was requested to bring the members of the band to Moyie for the Queen's Birthday celebration. They played in the intervals between the different games, and by their excellent music contributed much to the pleasantness of the day. Their deportment during their absence was gentlemanly, and reflected honour on the school.

Visits.—During vacation Mr. Vowell, Indian Superintendent, paid us a visit, and although he took us by surprise, our pupils gave him quite a creditable entertainment. This gentleman seemed well pleased with everything in and about the school. Mr. Galbraith came frequently to see the children, and was always warmly received by them and the staff. Every year he makes our pupils a generous donation at Christmas, to be disposed of according to their pleasure. They generally make use of it to increase the volumes of their library.

Farm and Garden.—Our farm is in a flourishing condition. The fields are neatly fenced off with logs, and have strong well-made gates, that were put up by the boys and foreman.

Each year several acres of cleared land are added to our tillage. It is only bottom land that here requires much clearing, and this entails no small amount of labour, as the under-brush is very thick; but work once completed, we are amply repaid by the fertility of the soil, and the little irrigation required, as seepage from the creek and the St. Mary's river are almost sufficient.

SESSIONAL PAPER No. 27

Being convinced by experience that roots make excellent fodder for milch cows, we considerably augmented our garden acreage, which is sown in mangolds, turnips, carrots, beets, parsnips, onions, celery, sweet pease, &c.

Orchard.—We have about one hundred and fifty healthy-looking apple-trees, and fifteen, or thereabout, that have been bearing well for the last couple of years. We are also having splendid success with our small fruits.

Industries.—*Farming*.—The high land differs greatly from the bottom land, as its permeable soil absorbs moisture with great rapidity, and therefore necessitates daily irrigation during dry weather. This, together with hoeing potatoes, weeding garden, and clearing land, supplied the farmers with work after the crops were put in, until it was time for haying and harvesting. Taking out vegetables and cellaring them, took up a large portion of their time in autumn, after which they did the threshing and fall ploughing, and this was followed by work in the woods, felling trees and hauling them out. As from twelve to fifteen stoves were in use during our long cold winter, a great deal of fire-wood had to be got out, and preparing it for use gave the boys plenty of muscular exercise.

Carpentering.—Very little carpentering was done about the premises except the occasional making or repairing of some article of furniture, the putting up of a belfry, and a porch at the kitchen door.

Girls' Industries.—The girls are steadily acquiring a more thorough spirit of order and cleanliness, and like the slow current that glides silently along and never intermits its course, though its movement is almost imperceptible, they by habits of civilization constantly practised, are becoming more and more competent in the art of housekeeping. Every morning immediately after breakfast they went to their appointed work of putting the different apartments in order, helping in kitchen or bakery, according as they were told off. During this time the little ones cleaned the yard and watered the flower garden. At eight all were expected to be ready to begin sewing, except those employed in the bakery or the kitchen. Then under the surveillance of an able seamstress they were engaged at that occupation until eleven o'clock. They were taught to cut and fit dresses, and to make all kinds of underwear, to mend, darn, knit, and to do various kinds of fancy work.

Moral and Religious Training.—The pupils were at all times under the care of some one of the staff, whose aim was to train them to a love of duty, and a faithful discharge of their obligations to God and man, not through fear of punishment, but through a sense of moral rectitude, so that at the completion of their education their religious training shall have become part and parcel of their existence. No pains were spared to plant and develop principles of virtue, that render their education so profitable to them. It was most encouraging to witness with what attention they applied themselves to the study of Christian doctrines, thus to become thoroughly grounded in the truths of religion.

Water Supply.—A plentiful supply of water is obtained from two wells, one in the kitchen yard and the other in the boys' play-ground. Although this water is excellent for drinking and kitchen use, it is rather hard for laundry purposes, and difficult to be procured in case of fire. Our Indian agent has laid plans to have water brought from the creek, from a high point to supply all the wants of the house by gravitation.

Fire Protection.—Chemical fire-extinguishers are stationed at convenient places throughout the building. Saturday of each week is the day appointed in our institution, for drilling our pupils in the use of fire-extinguishing appliances. Then all available buckets and hose are called into action.

Heating.—Our houses are heated entirely by wood stoves.

Recreation.—Last summer both boys and girls had a pleasant outing during vacation, the former in the vicinity of North Star Mine, where they hunted, fished, picked

64 VICTORIA, A. 1901

berries, and spent a most enjoyable time. They brought home with them large quantities of berries that were prepared for keeping.

The girls spent a delightful time in the neighbourhood of Bull river, gathering gum, berrying, and otherwise amusing themselves among the spicy pines and cedars. During their stay, an agreeable recreation to them was to watch the grandeur of the Bull River canyon, as in its spray, glittering in the sunlight, gorgeous rainbows were reflected. A source of great amusement to our pupils is a phonograph, which enabled them to pass pleasantly many leisure hours.

I have, &c.,

N. COCCOLA,
Principal.

BRITISH COLUMBIA,
KUPER ISLAND INDUSTRIAL SCHOOL,
KUPER ISLAND P.O., July 2, 1900.

The Honourable
The Superintendent General of Indian Affairs,
Ottawa.

SIR,—I have the honour to transmit my annual report for the fiscal year ended June 30, 1900.

Location.—The Kuper Island industrial school is situated in Telegraph bay, on the southwest side of Kuper island, Stuart channel, about five miles from Chemainus station, Vancouver island. The surroundings of the school are most beautiful, the sea and evergreen forest adding to the pleasantness of the locality.

Land.—About seventy acres of land belong to the school. The quality of the soil is fair, and a considerable portion is covered with heavy timber.

Fruit Trees.—Besides the numerous shade trees, such as maples, lindens, elms, acacias, walnuts, wild chestnuts, jumpers, hollies and mountain ash, which surround the buildings and play-grounds, about one hundred and eighty fruit trees have been planted, and are in a thriving condition. Our grape-vines are already yielding abundant crops.

Buildings.—The buildings, which stand in two rows and command a magnificent view from the sea, are kept in excellent condition. Since my last report all the buildings have been repainted inside and outside. The general appearance of the school looks like a compact village, composed of sixteen separate buildings, whose dimensions are as follows :—

Lower row, left side.—1. Bakery, 25 x 16 feet, with modern brick oven, 8 x 6 feet.

2. Wood-shed, for bakery and laundry, 19 x 10 feet.

3. Laundry, 40 x 20 feet, containing one furnace and two boilers, also closets for soap, soiled and clean linen.

4. Girls' home, 40 x 32 feet, the ground floor of which is used for a sewing-room, infirmary for girls and store-room ; the upper flat contains dormitory for senior girls, 40 x 32 feet, linen and bath rooms, with a room for the matron.

5. A building, 24 x 22 feet, used as recreation and sitting rooms on the first floor, and sleeping-rooms for teacher, cook and assistant matron, with dormitory, 24 x 18 feet, for junior girls, on the second floor.

6. Main buildings, 32 x 30 feet, and an extension, 48 x 18 feet. The ground floor contains parlour, office, boys' dining-room, kitchen, pantry and girls' dining-room, with a cellar under the boys' dining-room. The second floor is used for girls' school-room,

SESSIONAL PAPER No. 27

music-hall, chapel and two spare rooms. These last three buildings are connected by a corridor.

7. Dairy, with modern improvements, 20 x 14 feet.

8. Wood-shed, for kitchen and house, 60 x 20 feet, with tool and oil compartments.

9. Boys' home, 87 x 33 feet. On the lower floor are the boys' infirmary, the store-room for provisions and clothing, the band and shoemaker's room, the lavatory, the boys' play-hall and school-room. The upper floor is used for boys' dormitory, 78 x 33 feet, linen-room, as well as for the principal's, teacher's and foreman's bed-rooms.

10. Boat-house, which is located alongside the wharf, is 30 x 20 feet, and shelters four boats.

11. Gymnasium, 50 x 20 feet. This building is also used for concerts and entertainments.

12. Water-tank. On the hill at the rear of the boys' home there is a twelve-hundred-gallon tank; the hydraulic ram-house is built on the beach.

13. Carpenter and shoemaker shops, 40 x 20 feet.

14. Lumber-shed, 30 x 10 feet.

15. Stables, pig-sty and hen-house, 36 x 20 feet.

16. Barn and implement shed, 52 x 22 feet, with a lean-to, 82 x 10 feet.

Accommodation.—The school can accommodate seventy-five pupils and a staff of eight officers.

Attendance.—The average attendance during the year was over sixty-three.

Class-room Work.—The boys who are learning a trade have half a day at school and half a day at work. The junior pupils have six hours at school a day. Gratifying progress was made in the school-room. The boys and girls have separate class-rooms, with a teacher for each school. In order to stimulate emulation, general examinations are held.

At the end of the fiscal year the pupils were graded as follows :—

Standard I.....	9
“ II.....	3
“ III.....	15
“ IV.....	18
“ V.....	15
“ VI.....	9

Total number of pupils (consisting of 39 boys and 30 girls) . . 69

Farm and Garden.—Nearly all the male pupils take lessons in gardening ; the smaller ones have charge of the flower gardens. All the senior boys, when not engaged in the shops, work on the farm. This summer our crops have a promising appearance, with the exception, however, of our late potatoes, which have been damaged by the wet season. At the present time our stock consists of twenty head of cattle.

Boys' Industrial Work.—*Carpentry*.—The foreman, with his six apprentices, finished the boys' new school-room, reconstructed the lavatory and bath-rooms, renewed the sewerage drains, built new water-closets, a dairy, a new boat, a bridge, and made a considerable amount of furniture.

Shoemaking.—The six apprentices have worked very faithfully, and have supplied all the pupils with new shoes ; besides attending to the repairing. Several of the boys are sufficiently advanced to make new shoes without the assistance of their instructor.

Painting.—Four boys have repainted all the buildings, and have done it well.

Baking.—All the senior boys and girls have learned the art of baking, and have supplied the house with wholesome bread.

Besides these industrial branches, lessons in milking, butter-making and laundrying have been imparted to all the senior boys.

Girls' Industrial Work.—The girls have been taught all kinds of housework, hand and machine sewing, cutting and finishing dresses, and other wearing apparel. They have also done a great deal of fancy work, for which they manifest considerable skill and aptitude.

Moral and Religious Training.—Religious instruction is daily given to the pupils during half an hour, their morning and evening prayers are said in common, and on Sundays all attend divine service in the village church.

Conduct.—The conduct of all the pupils has been exceptionally good.

Health and Sanitary Condition.—On the whole, the health of the pupils has been good. This year the sanitary condition of the school has again been improved, four new patent Philadelphia hoppers were placed on the upper and lower floors, with a regular sewerage drain of vitrified pipes, to the sea. The spacious dormitories and school-rooms are carefully ventilated.

Water Supply.—A never-failing stream of fresh water, flowing between the two main buildings supplies the institution with an abundance of water. A hydraulic ram, with a twelve hundred-gallon tank, conveys the water through the buildings.

Fire Protection.—The pupils are regularly trained in the working of the fire hose, the handling of ladders and fire buckets, as well as in the operating of the four Star chemical fire-engines; we have water taps to which the hose can be attached in all the principal apartments.

Heating.—The heating of the institution is done by ordinary box stoves.

Recreation.—The boys have a great variety of games, such as football and baseball, marble-playing, swimming, fishing and boating during the summer, and coasting, chess and checkers during the winter. The girls in their own play-ground amuse themselves at swinging, skipping and playing with balls. Athletic and calisthenic sports take place in our gymnasium, but the centre of all amusements and attractions is our brass band. This summer our band boys were again invited by the committee of the Queen's Birthday celebration to play in the city of Victoria, and I am glad to say were favourably commented upon.

General Remarks.—In concluding my report, I have much pleasure in thanking Superintendent Vowell for the kind assistance given during the year, and for his words of encouragement spoken at the time of his official visit.

I have, &c.,

G. DONCKELE,
Principal.

SESSIONAL PAPER No. 27

BRITISH COLUMBIA,
 METLAKAHTLA INDUSTRIAL SCHOOL,
 METLAKAHTLA, August 18, 1900.

The Honourable
 The Superintendent General of Indian Affairs,
 Ottawa.

SIR,—I have the honour to submit my annual report for the fiscal year ended June 30, 1900.

Location.—This school is pleasantly situated in the village of Metlakahltla, on the western side of the Tsimpsean peninsula.

Buildings and Accommodation.—The buildings with their divisions and dimensions are as follows :—

Boys' division—1. The main building, a two-story frame structure, with a frontage of 90 x 60 feet deep, and having sufficient residential accommodation for thirty-five pupils and necessary staff.

2. A comfortable, but rather poorly furnished school-house, 42 x 25 feet, in which the classes are taught.

3. A building, 70 x 22 feet, divided into wood-shed, shoemaker and carpenter's shops, laundry and bath-room.

4. Blacksmith's shop and coal-house, 24 x 18 feet.

5. Stable, 22 x 10 feet.

6. Fowl-house, 20 x 8 feet.

Girls' division—7. A two-story frame building, 54 x 36 feet, with a wing, 18 x 18 feet, and a one-story annex, 18 x 16 feet. It contains the rooms occupied by the matron and her assistants, the girls' dormitories, a dining and store-rooms and a kitchen.

8. A meat-house, and wood and coal-sheds, 67 x 10 feet.

9. A school-house, 36 x 18 feet.

All buildings in the boys' division are on land surrendered by the Indians for the use of the school and is government property. The accommodation is good and sufficient.

The girls' division stands on land leased by the Indians to the Right Reverend the Bishop of Caledonia. The dormitories of that division are too small for the number of pupils that occupy them. It is, however, the intention, if means can be provided, to build on to the laundry another story, to be used as a dormitory, and that when finished should give the necessary sleeping accommodation.

The building in which the girls receive class instruction is on the church reserve, and is suitable for the purpose for which it is used.

All the buildings are kept in good repair, and so far without asking the Indian Department for any grant with which to purchase the materials required to make from time to time the necessary repairs.

Garden and Grounds.—Two small gardens are planted with fruit trees, gooseberry, currant and raspberry bushes; and in one of these various vegetables are also grown. The fruit trees have only been planted as an experiment, for very little success has attended the attempts made by any one to grow apples, pears or plums, so far north in the province. But nearly all kinds of small fruit, such as grow on bushes, do remarkably well, the quality under favourable conditions being good and the yield abundant.

64 VICTORIA, A. 1901

All the boys work occasionally at gardening. Through the pressure of other work but little has been done for the improvement of the grounds in front of the school, beyond digging out stumps, forming roads and a few small flower-beds.

Attendance.—The average attendance, except during the salmon-fishing season, was about sixty—twenty-five boys and thirty-five girls. Ten of these girls were maintained by Miss Tyte, the matron, and Miss Jackson, the teacher of the girls' school.

Class-room Work.—The boys and girls are taught in buildings separate from each other. Miss Jackson taught the girls until about the middle of April, and Miss Northen since. Both have considerable experience in teaching. The boys were taught by the principal. The subjects of study and instruction were reading, writing, arithmetic, geography, grammar, composition, history, drawing, singing and religious knowledge.

Fair progress has been made. The standing of pupils on the roll for the last quarter was as follows :—

Standard	I.	4
"	II.	13
"	III.	10
"	IV.	5
"	V.	17
"	VI.	2

The ten girls maintained by Miss Tyte and Miss Jackson are not included in the above classification.

Industrial Work.—Nine boys received instruction from Mr. Herbert Clifton in carpentry and painting. They were chiefly employed repairing buildings and furniture, papering and remodelling rooms, painting, erecting fences, building wood and coal sheds and making furniture.

The girls were taught according to their age and strength, cooking, laundry, needle and housework.

Moral and Religious Training.—Religious instruction is given daily, except on Saturdays. We have morning and evening prayers. On Sundays the pupils attend divine service twice a day, they also attend Sunday school. By these means and by daily teaching the importance of doing what is right, we endeavour to improve and build up the moral character of our pupils.

Conduct.—The conduct of the pupils was good.

Health and Sanitary Condition.—Two girls suffering from consumption were discharged to their friends, and I regret to say died shortly afterwards; with these exceptions there was very little sickness in the school. Underground drains carry off the water from the kitchens and laundries, and disinfectants are used wherever necessary. The ventilation is good and the premises are kept clean.

Water Supply.—The rain-fall on the buildings is conveyed into tanks having a capacity of about six thousand gallons. For domestic purposes that quantity is nearly sufficient. The tanks are frequently cleaned out and the water is good.

Fire Protection.—The boys' department is supplied with chemical fire-extinguishers and fireman's axes, and these with ladders and buckets are kept in convenient places in readiness for use should any necessity arise. The elder pupils, particularly the carpenters, are expert at climbing and handling buckets and ladders.

In the village there is also a fire brigade.

In summer and during frosty weather the water supply runs low. Two or three more tanks and a small force-pump would very much improve our means of extinguishing a fire.

Heating.—The rooms on the lower floors are all heated by stoves, but in the dormitories there are no heating appliances.

SESSIONAL PAPER No. 27

Recreation.—The boys play according to the season at different kinds of games ; but most frequently at rounders, cricket, base and football. The girls amuse themselves with sea-saw and skipping.

General Remarks.—Miss Tyte, the matron, is away on furlough, and her place in the meantime is filled by Miss Jackson. Miss H. A. Northen has been appointed teacher of the girls.

Miss Carroll, the seamstress, resigned and is now matron of another industrial school.

Indian Agent Todd made several visits during the year.

The Sunday school is kindly conducted by Miss West, and other ladies connected with the Church Missionary Society.

I have, &c.,

JNO. H. SCOTT,

Principal.

BRITISH COLUMBIA,
WILLIAMS LAKE INDUSTRIAL SCHOOL,

WILLIAMS LAKE, July 5, 1900.

The Honourable

The Superintendent General of Indian Affairs,
Ottawa.

SIR,—I have the honour to submit the following report for the year ended June 30, 1900.

Location.—The Williams Lake industrial school is situated in the Lac la Hache valley, on the bank of the San Jose river, Cariboo district.

Buildings.—The boys' building, 66 x 38 feet, two stories and a half high, and the girls', 135 x 50 feet, two stories and a half high, are considered the finest and largest in this district, and could afford accommodation for one hundred pupils. The harness shop, 39 x 21 feet, is also a very fine building. The first floor contains a large shop and a store ; the upper floor gives good accommodation to the instructor and family.

During the year a fourth building, 75 x 35 feet, of very fine appearance has been erected, containing a kitchen, 25 x 25 feet and five refectories. These apartments are thirteen feet high.

Land.—The grounds near the buildings are well kept. The front parts are reserved for flower and vegetable gardens. The mission owns here over one thousand acres of land, so that we are in a good position to teach the pupils all they must know to be able hereafter to manage a farm.

Attendance and Class-room Work.—The class-room attendance is, of course, regular, the pupils being all boarders. The progress of the children has been satisfactory ; some have done remarkably well. Music, both vocal and instrumental, is becoming rapidly a source of pleasure and refinement to boys and girls. Our worthy Indian Superintendent, A. W. Vowell, and E. Bell, Indian agent, are very regular in visiting and examining our pupils, and they certainly must be thanked for their efforts in helping both teachers and pupils.

64 VICTORIA, A. 1901

The pupils were graded at the end of the year as follows:—

	Pupils.
Standard I.....	10
“ II.....	4
“ III.....	9
“ IV.....	10
“ V.....	17

Industries.—Mr. Horan, our instructor in saddle and harness-making, reports as follows:—‘During the seven months which have elapsed since I took charge of the harness department as trade instructor, I beg to report that the four boys that are learning the trade are doing well and making great progress, particularly in saddle-making, for which they take a great liking.’ The shoemaking department, which is now being operated on a small scale, promises to be a good feature, and will be a source of great benefit to the pupils in after-life.

We have also a carpenter’s shop, under the management of an able carpenter. Three boys are learning the trade regularly, but other pupils are also employed occasionally. I must say that the three aforesaid pupils have made considerable progress in their trade.

All the boys learn farming, working in the fields and garden, especially during haying, seeding and harvesting. They also milk fifteen cows.

The girls, under the attentive care of four sisters, are taught to do housework, cook, bake, sew, knit, crochet work, lace-making, &c. They will be able to send many articles of fancy work to the provincial exhibition in New Westminster next fall.

Moral and Religious Training.—Religious instruction is given daily for half an hour. The conduct, both moral or otherwise, of the pupils may be described as good. Teachers and overseers unanimously proclaim a great improvement since last year. But truth compels me to say that politeness is not what it should be.

Health of the Pupils.—The health of the children has given us more anxiety than usual. Two boys were sick for a month. One of them was sent home on the advice of the doctor on account of his seriously impaired sight. The other was discharged also on the advice of the doctor, and died two months after. I am sorry to add that a girl, twelve years old, will probably have to be discharged on account of her consumptive state. The other pupils have enjoyed good health.

Sanitary Condition.—The sanitary condition is satisfactory, but will be still improved as soon as our means permit.

Water Supply.—We get our water supply from the San José river, through a ditch which passes above the establishments. This fall, water will be carried to the three buildings and gardens by metal pipes, at a great expense, from a spring more than a mile away. We are obliged to incur this expense on account of the alkaline quality of the water throughout the district.

Fire Protection.—Two men are specially charged with watching the chimney flues, which they frequently sweep. We have chemical extinguishers, sent by the department, and buckets always ready at hand, and a ladder is permanently attached to each building.

Heating.—The heating is by wood stoves.

Recreation.—Our pupils have beautiful play-grounds, and inside large halls are provided for that purpose. The San José river, just a few rods from the buildings, and beautiful ponds afford great pleasure and refreshing baths to our little fishermen and hunters.

I have, &c.,

EDM. PEYTAVIN,
Principal.

PART II.

38	Tyendinaga.....	On the bay of Quinte—The southern part of the township of Tyendinaga.	Mohawks of the bay of Quinte.	18,600	The reserve consisted originally of 92,700 acres granted under letters patent from the Crown in 1793, all of

39	Golden Lake.....	At the southern end of Golden lake, in the county of Peterborough.	Algonquins of Golden lake.	1,560	which, except the present reserve, has been surrendered and sold and the proceeds applied for the benefit of the Indians. Salmon island and marshes were added by O. C. November 13, 1900. F. 78,703. Purchased by the Dominion Government from the Provincial Government of Ontario in 1870 as a reserve for these Indians.
40	Tuscarora.....	The township of Tuscarora and parts of the townships of Oneida and Onondaga.	The Six Nations, consisting of the Mohawks, Oneidas, Onondagas, Tuscaroras, Cayugas, Senecas and Delawares.	49,696	A tract six miles wide on each side of the Grand river, was granted to the Six Nations in 1784 by Sir F. Haldimand, containing about 694,910 acres. This grant was confirmed to them by letters patent in 1793 by Governor Simcoe. All of the tract, except the present reserve, has been surrendered in portions from time to time and sold for the benefit of the Indians. In 1847 the Six Nations invited the Mississaugas of the Credit to settle on their reserve, and offered them a free grant of 6,000 acres for the purpose. A number accepted, who now reside in the southwest corner of the reserve.
41	Oneida.....	In the township of Delaware, county of Middlesex.	Oneidas of the Thames.	4,620	Purchased for these Indians by the Government in 1840 with their own money which they brought with them from the United States.
42	Caradoc.....	In the township of Caradoc, county of Middlesex.	Chippewas of the Thames and Munsees.	10,800	Reserved by the Chippewas in the cession made by them of the 'Longwood Tract' in 1819. A small portion of the reservation was surrendered in 1834 and sold for the benefit of the Indians.
43	Stony Point or Aux Sables	In the township of Bosanquet, county of Lambton.	Chippewas of Chenail, Ecarté and St. Clair.	2,555	Reserved by these Indians in the cession of a large tract in the London and Western districts made by them in 1827.
44	Kettle Point.....	"	"	2,224	"
45	Sarnia.....	In the township of Sarnia, county of Lambton.	"	4,943	"
46	Walpole Island.....	At the head of Lake St. Clair.....	Chippewas and Pottawattamies of Walpole Island.	40,480	The Chippewas settled on the island in 1831 by order of the Government. The island appears to have been then set apart by the Government as a Crown reserve to be used for the purpose of settling Indians thereon. The Pottawattamies came from the United States in 1841, and, on petition, were permitted by the Government to settle on the island.
47	Orford.....	In the township of Orford, county of Kent.	Moravians of the Thames	3,010	The reserve originally consisted of 51,160 acres situated in the townships of Zone and Orford, and was set apart by Order in Council in 1793. All the reservation, except the present reserve, has been surrendered and sold for the benefit of the Indians.
48	Michipicoten.....	On the Michipicoten river, about one mile from its mouth.	Ojibbewas of Lake Superior.	178	Surveyed in 1885 for the Indians who resided on the land. This reserve has not been confirmed by the Provincial Government.

SCHEDULE of Indian Reserves in the Dominion—*Continued.*ONTARIO—*Concluded.*

No.	Name.	Where situated.	Tribe or Band.	Area, Acres.	Remarks.
49	Gros Cap..	On the north shore of Lake Superior, about a mile west of Michipicoten river.	Ojibbèwas of Lake Superior.	10,180	Set apart in accordance with the provisions of the Robinson Superior Treaty.
50	Pic River.	On the Pic river, near its mouth.	"	800	Surveyed in 1885 for the Indians who resided on the land. These reserves have not been confirmed by the Provincial Government.
51	Pays Plat.	At Pays Plat, north shore of Lake Superior.	"	605	"
52	Fort William.	Near the west end of Lake Superior.	"	21,260	Set apart under the provisions of the Robinson Superior Treaty.
53	Red Rock.	On Nipigon river.	"	468	Surveyed in 1885 for the Indians who resided on the land. Not confirmed by the Provincial Government.
54	McIntyre Bay.	On the south shore of Lake Nipigon.	"	585	Surveyed in 1885 for the Indians of Lake Nipigon. Not confirmed by the Provincial Government.
55	Gull River.	At the mouth of Gull river, on the west shore of Lake Nipigon.	"	9,825	Set apart under the provisions of the Robinson Superior Treaty. Surveyed in 1887. Not confirmed by the Provincial Government.
56	Island Point.	On the west shore of Lake Nipigon.	"	135½	Surveyed in 1885 for the Indians of Lake Nipigon. These reserves have not been confirmed by the Provincial Government.
57	Jackfish Island.	A small island near the west shore of Lake Nipigon.	"	Not surveyed.	"
58	Long Lake.	At the north end of Long lake.	"	612	Surveyed in 1886 for the Indians residing on the land. Not confirmed by the Provincial Government.
59	Cornwall Island.	In the River St. Lawrence near the boundary between Ontario and Quebec.	Iroquois of St. Regis.	2,050	This and adjacent islands form part of the reserve of these Indians held by them from the time French rule began in this country.
60	Saugeen Indians' Hunting Ground	Lots 11 to 20, inclusive, in concessions III and IV; lots 11 to 18 and lot 20 in concessions I and II, all east of the Bury road, township of St. Edmund, county of Bruce.	Saugeen and Cape Croker Bands.	3,800	Set apart by Order in Council of November 16, 1896. Lots 11, 12, 13, 14, 15, 16, 17, 18 and 20 in concessions I and II, E. B. R., are set apart for the Saugeen reserve Indians, and lots 11 to 20, inclusive, in concessions III and IV, E. B. R., for the Cape Croker band.

Attendance Returns at Boarding Schools asked for.

(NOTE.—For beginning of this correspondence see Auditor General's Report 1897-98, page G—160.)

AUDIT OFFICE, OTTAWA, November 14, 1899.

SIR,—I beg to draw your attention to your letter No. 150000 of December 16, 1898, in which you informed me that certain returns which were asked for in view of the change in your vouchers for grants to boarding and industrial schools would be sent me to enable me to audit that expenditure. Up to the present I have received no returns, and the vouchers continue to be made out by a clerk in your office, and other than her certificate they bear no evidence of having been checked by any person in a position to know whether the services paid for have been performed. This system of paying the grants, together with the neglect of your department to supply this office with the necessary data for checking the payments cannot but cause loss to the Government, and should be changed at once to some more satisfactory system of making the payments. I should like to discuss this matter verbally with you.

I am, sir, your obedient servant,

The Secretary, Department of Indian Affairs,

J. L. McDOUGALL, A.G.

DEPT. OF INDIAN AFFAIRS, OTTAWA, November 16, 1899.

SIR,—I have to acknowledge the receipt of your letter of the 14th instant relative to returns from boarding and industrial schools required by you for purposes of audit; and in reply I beg to say that the returns in question, covering the year ended June 30 last will be sent you without delay. With reference to your remark as to the neglect of this department to furnish you with this data, I beg to call your attention to official letter of December 16 last, in which it was promised that the returns in question would be furnished you when required, and to remind you that this is the first request that has been made for them. I shall be happy to discuss the matter of the checking of boarding and industrial school returns with you verbally, at your convenience.

I am, sir, your obedient servant.

The Auditor General.

J. D. McLEAN, Secretary.

AUDIT OFFICE, OTTAWA, November 28, 1899.

SIR,—With regard to the returns of the various schools, I would be pleased to have them for not only the year ended June 30 last, but for any payments which have been made since that time.

I am, sir, your obedient servant,

The Secretary, Department of Indian Affairs.

J. L. McDOUGALL, A.G.

AUDIT OFFICE, OTTAWA, March 17, 1900.

SIR,—I beg to acknowledge the receipt of your letter No. 150000-1a of December 2, 1899, with inclosures as stated with the exception of Calgary industrial school, the returns for which were not inclosed. Upon examination I find the following errors in the payments to the various schools for the year 1898-99:—

Sarcee Boarding School:—June quarter. Pupil No. 25 was admitted on May 10, and was in attendance for 51 days, but was paid for the whole quarter, making an overpayment of \$7.20.

Duck Lake Boarding School:—December quarter. The addition of the returns shows \$1,978.33, and the school was only paid \$1,958.33, or an underpayment of \$20.

McDougall Orphanage:—September quarter. The addition of the return shows \$651.60, and the school was paid \$674.60, or an overpayment of \$22.80.

Elkhorn Industrial School:—June quarter. The addition of the return shows \$1,996.46, and the school was paid \$1,996.49, or an overpayment of three cents.

Red Deer Industrial School:—December quarter. The addition of the returns shows \$2,363.82, and the school was paid \$2,348.66, or an underpayment of \$15.16.

Qu'Appelle Industrial School:—June quarter. The addition of the return shows \$6,246.11, and the school was paid \$6,245.93, or an underpayment of 18 cents.

Please have the errors adjusted in the next payments to the various schools. I return the returns herewith, with the exception of those pertaining to payments during the current fiscal year.

I am, sir, your obedient servant,

The Secretary, Department of Indian Affairs.

J. L. McDOUGALL, A.G.

AUDIT OFFICE, OTTAWA, April 7, 1900.

SIR,—I beg to acknowledge your letter No. 150000 of the 28th ultimo with inclosures as stated. I am returning herewith all the statements received from your department for the September quarter, 1899, and in doing so I would draw your attention to the following errors:—

Blue Quills:—Pupil No. 033 returned to the school on September 11, and was consequently only in attendance during the balance of the quarter, but the school has been paid for the full quarter, or an overpayment of \$13.20.

File Hills:—The addition of this return appears to be \$222, but the school has only been paid \$218, or an underpayment of \$4.

I have received no reply to my letter of March 17, with reference to errors in the statements of the year ended June 30, 1899, and I would ask what arrangement has been made to adjust the various errors.

I am, sir, your obedient servant,

The Secretary, Department of Indian Affairs.

J. L. McDOUGALL, A.G.

DEPT. OF INDIAN AFFAIRS, OTTAWA, April 9, 1900.

SIR,—I have to acknowledge the receipt of your letter of the 7th instant forwarding returns of attendance of pupils at industrial and boarding schools for September quarter last, sent you for audit; and in reply I beg to say that arrangements have been made to rectify the errors referred to therein, as well as those mentioned in your letter of March 17 last.

I am, sir, your obedient servant,

The Auditor General.

J. D. McLEAN, *Secretary*.

AUDIT OFFICE, OTTAWA, June 26, 1900.

SIR,—I beg to call your attention to an error in the returns for Portage la Prairie boarding school for December quarter, 1899. Pupil No. 012 was in attendance 56 days only, but the school was paid for the full quarter, or an overpayment of \$6. Please have this overpayment deducted from the next payment you make to the school.

I am, sir, your obedient servant,

The Secretary, Department of Indian Affairs.

J. L. McDOUGALL, A.G.

SESSIONAL PAPER No. 1

AUDIT OFFICE, OTTAWA, June 29, 1900.

SIR,—I beg to draw your attention to what appears to be an overpayment of \$13 to the Red Deer industrial school. In the return for the quarter ended December 31, 1899, pupil No. 9, Enoch Bull, is reported as having been only 53 days in attendance, having been absent without leave. In spite of this the full amount of \$32.50 has been allowed for this pupil, instead of \$19.50, the amount payable for 53 days' attendance. Kindly have the overpayment adjusted at the earliest opportunity.

I am, sir, your obedient servant,

The Secretary, Department of Indian Affairs.

J. L. McDOUGALL, A.G.

AUDIT OFFICE, OTTAWA, June 29, 1900.

SIR,—I notice an error of \$100 in the addition of the return of the Qu'Appelle industrial school for the quarter ended March 31, 1900, the correct total being \$6,177.46, instead of \$6,277.46. Kindly have this overpayment adjusted in paying the school for the June quarter.

I am, sir, your obedient servant,

The Secretary, Department of Indian Affairs.

J. L. McDOUGALL, A.G.

Payment of Deficit at Elkhorn Industrial School.

AUDIT OFFICE, OTTAWA, October 13, 1900.

SIR,—I am in receipt of a statement of accounts amounting to \$7,942.92 against the Elkhorn industrial school, paid by the Indian Commissioner in August, 1900, out of an accountable cheque received by him and charged to that school for the year 1899-1900. As no details of the accounts are furnished, but they appear to be on account of maintenance, I would ask upon what authority the payments have been made, and if they are not properly chargeable against the per capita grant allowed the school.

I am, sir, your obedient servant,

The Secretary, Department of Indian Affairs.

J. L. McDOUGALL, A.G.

DEPT. OF INDIAN AFFAIRS, OTTAWA, October 24, 1900.

SIR,—With reference to your letter of the 13th instant, I beg to inform you that the sum of \$7,942.92 therein mentioned represented the deficit up to March 31 last, at the Elkhorn industrial school, which was settled by the department out of the accountable cheque to which you refer. The amount of the deficit was arrived at after a careful audit of all the accounts of the school by Mr. Inspector A. McGibbon, and payment of the liabilities in question was made through the Indian Commissioner to insure perfect correctness and general satisfaction.

I may add that the Government has assumed control of the school and all outlay in connection therewith.

I am, sir, your obedient servant,

The Auditor General.

S. STEWART, *Asst. Secretary.***Claim of R. Boez as Instructor at Qu'Appelle Industrial School.**

AUDIT OFFICE, OTTAWA, October 12, 1900.

SIR,—Cheque No. 6425 is for a payment of \$330 drawn in favour of Hon. Mr. Laird in full payment for all claims by R. Boez against your department. No voucher in support of this payment has reached this office. Kindly give me the particulars of Mr. Boez's claim, and also explain why the cheque was drawn in favour of Hon. Mr. Laird.

I am, sir, your obedient servant,

The Secretary, Department of Indian Affairs.

J. L. McDOUGALL, A.G.

DEPT. OF INDIAN AFFAIRS, OTTAWA, October 23, 1900.

SIR,—With reference to your letter of the 12th instant, in which you ask for the particulars regarding Mr. Boez's claim, &c., for arrears of wages as instructor at the Qu'Appelle industrial school, I beg to inform you that Mr. Boez brought an action against the principal of the school. His Honour Judge Richardson, before whom the case was tried, dismissed the action on the ground that the Rev. Father Hugonnard, the principal, had not incurred a personal liability, but was acting as the

agent of the Crown in the agreement which he made with Mr. Boez. It was pointed out that Father Hugonnard, before employing Boez to start the felt industry, submitted the matter to the department, and that when the felt industry was started at the Qu'Appelle school, Boez was employed with the authority of the department, and that the intervention of the department justified Boez in believing Father Hugonnard was acting as agent of the department, and that the department was responsible for carrying out the terms of the agreement. The Indian Commissioner was requested to go carefully into the matter, in the light of the judgment referred to, and to advise the department whether he considered Boez had an equitable claim, and if so, to what amount. The commissioner recommended that the department, on behalf of the school, should offer Boez the sum of \$330 in full settlement of all his claim, stating at the same time that he (the commissioner) considered that Boez would then be liberally dealt with from an equitable point of view. In arriving at the amount stated, the commissioner included the costs Boez was put to in his suit against Rev. Father Hugonnard (which amounted to \$85). Mr. Boez never made any claim on the department previous to entering suit against the principal, and his first claim against that officer was only \$343, although he sued the principal for \$1,033, and afterwards claimed \$1,444.90. The department had to pay over \$170 for defending the principal, and if Boez had brought an action against it (which his solicitors threatened to do), it would have been put to additional cost, His Honour Judge Richardson (as above stated) apparently holding that the department was liable for the carrying out of the agreement with Boez. It being therefore considered that in equity Boez was entitled to compensation, and also that it would be cheaper in the end to arrive at a settlement with him than to go to law again, the department offered him, through the Indian Commissioner, the sum of \$330 on the distinct understanding that this amount was in full settlement of all his claims. It was thought advisable to draw the cheque in the commissioner's favour, in order that he might see Mr. Boez and personally attend to the matter, which would have been difficult to arrange by correspondence. The matter was adjusted, Mr. Boez accepting the amount in question, for which he gave a receipt in full of his claim, which receipt I transmit herewith.

I am, sir, your obedient servant,

The Auditor General.

S. STEWART, *Asst. Secretary.*

Advance to A. A. Derrick not accounted for.

AUDIT OFFICE, OTTAWA, October 31, 1900

SIR,—In the expenditure on account of Indian surveys, Manitoba and North-west Territories, for the year 1898-99, I find that on November 12, 1898, A. A. Derrick was advanced \$50 on account of travelling expenses. I have never received any statement of his expenses in support of this advance. Please forward his account at once.

I am, sir, your obedient servant,

The Secretary, Department of Indian Affairs.

J. L. McDOUGALL, *A.G.*

DEPT. OF INDIAN AFFAIRS, OTTAWA, November 5, 1900.

SIR,—I beg to acknowledge the receipt of your letter of the 31st ultimo, relative to the \$50 advanced to Mr. A. A. Derrick on November 12, 1898, on account of travelling expenses; and in reply I beg to say that Mr. Derrick submitted the following statement of outlay which he incurred, viz :—

Ticket—Winnipeg to Merrickville.....	\$ 35 30
Berths	8 00
Meals.....	4 50
Baggage transfer to Winnipeg.....	0 25
Total.....	\$ 48 05

Mr. Derrick also intimated that in addition to the above, he incurred expenses to the amount of \$11.40, which presumably covered his travelling outlay from Qu'Appelle station to Winnipeg, and he claimed that the department was indebted to him. He was asked for a detailed statement of the amount which he claimed to be due, but he has not again been heard from.

I am, sir, your obedient servant,

The Auditor General.

J. D. McLEAN, *Secretary.*

SESSIONAL PAPER No. 1

Payment of a Substitute Teacher at Lake Manitoba School.

AUDIT OFFICE, OTTAWA, October 5, 1900.

SIR.—Cheque No. 3732 is for a payment of \$75 to Maxime Goulet, teacher at Lake Manitoba, Manitowapah agency, being full salary for quarter ended December 31, 1899. Cheque No. 3733 is for a payment of \$50 to Edward Berkmeier, teacher at the same school, for services as substitute during the absence of the regular teacher for quarter ended December 31, 1899. Kindly explain the cause of Mr. Goulet's absence, and give me your reasons for paying him during the two month absence.

I am, sir, your obedient servant

The Secretary, Department of Indian Affairs.

J. L. McDOUGALL, A.G.

DEPT. OF INDIAN AFFAIRS, OTTAWA, October 16, 1900.

SIR.—I have to acknowledge the receipt of your letter of the 5th instant, asking for explanations in regard to the payment of Mr. Edward Berkmeier, who was acting teacher of the Lake Manitoba Indian school during the absence of Mr. Maxime Goulet, the regular teacher, and in reply I beg to say that Mr. Goulet was granted two months' leave of absence by the Superintendent General, and Mr. Berkmeier was engaged to carry on the school during his absence.

I am, sir, your obedient servant,

The Auditor General.

S. STEWART, *Asst. Secretary.*

AUDIT OFFICE, OTTAWA, October 23, 1900.

SIR.—I am in receipt of your letter No. 116768-3 of the 16th instant, with reference to the payment of a substitute teacher at Lake Manitoba Indian school, and in reply beg to ask your authority for granting leave of absence with pay to the regular teacher.

I am, sir, your obedient servant,

The Secretary, Department of Indian Affairs.

J. L. McDOUGALL, A.G.

DEPT. OF INDIAN AFFAIRS, OTTAWA, October 27, 1900.

SIR.—I have the honour to acknowledge the receipt of your letter of the 23rd instant, in further reference to the payment of a substitute teacher at Lake Manitoba Indian school during the absence of the regular teacher; and in reply to your inquiry as to the authority for granting leave of absence with pay to the regular teacher, I beg to say that such leave was granted by the authority of the Superintendent General of Indian Affairs, as you were informed in official letter of the 16th instant.

I am, sir, your obedient servant,

The Auditor General.

J. D. McLEAN, *Secretary.***Delay in Receiving Returns from Schools.**

AUDIT OFFICE, OTTAWA, October 3, 1900.

SIR.—I find that during the past fiscal year the following payments were made to the schools in Beren's River agency:—

Cheques Nos. 2346 and 2411 for \$75 each to Rossville school for the quarters ending December 31, 1896, and March 31, 1897; cheque No. 2343 for \$75 to Beren's River school for quarter ending December 31, 1896; cheque No. 2344 for \$27.27 to Beren's River school for 24 days during quarter ending September 30, 1897. Kindly inform me why there has been such a long delay in making these payments.

I am, sir, your obedient servant,

The Secretary, Department of Indian Affairs.

J. L. McDOUGALL, A.G.

DEPT. OF INDIAN AFFAIRS, OTTAWA, October 10, 1900.

SIR.—I have to acknowledge the receipt of your letter of the 3rd instant, inquiring why there has been such a long delay in making payments to certain schools in the Beren's River agency. In reply I beg to say that the schools to which you refer are conducted under the auspices of the Methodist Missionary Society, which receives the grant, the cheques being made payable to the order of

the Hon. J. C. Aikins and Rev. Dr. Sutherland upon receipt of the quarterly returns, which, in the cases referred to, were only sent in when payment was made. Dr. Sutherland, the general secretary of the Methodist Missionary Society, has, however, been written to and requested to have all the returns for the Indian schools conducted by his society sent to the department as soon after the close of each quarter as possible in order to prevent such delays as you complain of.

The Auditor General.

I am, sir, your obedient servant,
S STEWART, *Asst. Secretary.*

Accounts charged to the wrong Agencies, British Columbia.

AUDIT OFFICE, OTTAWA, October 3, 1900.

SIR,—I beg to call your attention to the inclosed list of vouchers for payments on account of Indians of British Columbia during the year 1899-1900, which have been charged to agencies other than those to which they are properly chargeable. I do not see why so many transfers should be necessary, as most of the vouchers plainly show the agency to which they belong, and all of them bear evidence of the agency to which they are chargeable. Please have the transfers made and advise me when done.

I am, sir, your obedient servant,

The Secretary, Department of Indian Affairs.

SESSIONAL PAPER No. 1

DEPT. OF INDIAN AFFAIRS, OTTAWA, October 24, 1900.

SIR,—I beg to acknowledge the receipt of your letter of the 3rd instant, with inclosures, regarding vouchers for payments on account of Indians in British Columbia; and in reply I have the honour to inform you that the transfers referred to have been made. In many instances the vouchers were posted to the credit of the agencies, as shown by the agents who forwarded them to the department. It was not deemed necessary to charge the outlay on account of insane Indians to the respective agencies, but this will be done in future, and care will be taken to post all the vouchers to the agencies to which they properly belong.

I am, sir, your obedient servant.

The Auditor General.

S. STEWART, *Asst. Secretary.***Accounts Charged to wrong Appropriations.**

AUDIT OFFICE, OTTAWA, September 28, 1900.

SIR,—Cheque 1609 for \$6.85, Indians of Nova Scotia, and cheque 2483 for \$5.63, Indians of New Brunswick, cover payments for school material supplied to Shubenacadie and Tobique Indian schools for the year 1899-1900. These items should be charged to the vote for schools, Ontario, Quebec and Maritime Provinces, but as the books are now closed and a transfer cannot be made, I would draw your attention to the items to avoid mistakes in the future.

I am, sir, your obedient servant.

The Secretary, Department of Indian Affairs.

J. L. McDougall, *A.G.***Insufficient Certificate to Account for Medical Attendance.**

AUDIT OFFICE, OTTAWA, June 5, 1900.

SIR,—Nova Scotia cheque No. 1638 is for a payment of \$92.35 to Dr. Albert A. Schaffner for professional services and medicine rendered to the wife of Stephen Luxie (Indian), of Paradise, Annapolis County, N.S. This account is not certified by the Indian agent for the district, nor by any other person, except Dr. Schaffner himself. It is not necessary for me to point out that the certificate of the person asking payment of an account is of little or no value in such cases. Kindly obtain the certificate of the agent to this account. I return the account herewith.

I am, sir, your obedient servant,

The Secretary, Department of Indian Affairs.

J. L. McDougall, *A.G.*

DEPT. OF INDIAN AFFAIRS, OTTAWA, June 11, 1900.

SIR.—In reply to your letter of the 5th instant, regarding the account from Dr. Albert A. Schaffner for attendance on the wife of Stephen Luxie (Indian), I have to inform you that the department considered the absence of an agent's certificate before the account was paid.

The attendance was rendered somewhat irregular by the fact that the Indian belonged to Annapolis County, and the service was rendered in Halifax County. The department directly authorized the doctor to attend to this case, as it was located a long distance from the regular attendant for the county. Under the circumstances, it is not thought necessary or even advisable to request the agent for Halifax County to approve the account.

I beg to return herewith the account, and trust that this explanation will be satisfactory.

I am, sir, your obedient servant,

The Auditor General.

S. STEWART, *Asst. Secretary.***Details of Voucher not supplied.**

AUDIT OFFICE, OTTAWA, July 25, 1900.

SIR.—Indian Trust Fund cheque No. 3578, issued in June last, is for a payment of \$33.33 to F. X. Fafard, D.L.S., for "claim for the advance made to the Indians in the way of outfit and supplies in connection with the re-survey of the Restigouche Indian reserve." The voucher is insufficient in that it does not give in detail the supplies furnished by Mr. Fafard. I would like a detailed account from Mr. Fafard, together with a statement of the circumstances under which this payment was made.

I am, sir, your obedient servant,

The Secretary, Department of Indian Affairs.

J. L. McDougall, *A.G.*

DEPT. OF INDIAN AFFAIRS, OTTAWA, August 7, 1900.

SIR,—In reply to your letter of the 25th ultimo, I inclose herewith a statement of the supplies furnished by Mr. F. X. Fafard, D.L.S., to certain Indians, amounting to \$33 33, and have to inform you that the department employed Mr. Fafard to re-survey the Restigouche Indian reserve, with the expectation that the Indians would give him all necessary assistance, but when he reached the ground he found it necessary to supply these articles in order to get the Indians to work, or else return without accomplishing it.

I am, sir, your obedient servant,

The Auditor General.

J. D. McLEAN, *Secretary*.

Account erroneously charged to School Account.

AUDIT OFFICE, OTTAWA, October 3, 1900.

SIR,—Indian cheque No. 699, charged against the vote for schools in Ontario and the Maritime Provinces, is for a payment of \$1.75 to J. B. Canadien for crying at the church door concerning vaccination and concerning the closing of the common. These evidently are not a charge against this vote, and should, I think, have been charged against the moneys held in trust for the Caughnawaga Indians. It can be adjusted now only by drawing a cheque against the trust fund and crediting it to casual revenue.

I am, sir, your obedient servant,

The Secretary, Department of Indian Affairs.

J. L. McDUGALL, *A.G.*

DEPT. OF INDIAN AFFAIRS, OTTAWA, October 12, 1900.

SIR,—I have noted the contents of your letter of the 3rd instant, and in reply I have the honour to inform you that in compliance with your suggestion the sum of \$1.75, paid to J. B. Canadien for crying at the church door concerning vaccination, &c., has been credited to casual revenue, a cheque for the amount in question having been drawn against the trust fund.

I am, sir, your obedient servant,

The Auditor General.

S. STEWART, *Asst. Secretary*.

Claim against International Paper Company for cost of exploring Timber Limits.

AUDIT OFFICE, OTTAWA, July 23, 1900.

SIR,—Indian trust fund cheque No. 3486, issued in May last, is for a payment of \$120 to A. McAuley for forty days' services exploring the limits of timber license No. 61½, Batchewana Bay, for timber cut under 9 inches and for balsam cut by the International Paper Company. On the voucher the agent, Mr. Van Abbott, states that he informed the International Paper Company that this would be charged against them in the settling up. I find from Agent Van Abbott's cash book for May that he collected \$5,506.18 from this company, being double dues on 6151.33 cords of pulpwood and single dues on 130,519 pine logs cut under license No. 61½, but I find no trace of the \$120 in question having been collected. Kindly inform me if this amount has been collected, and if not, why?

I am, sir, your obedient servant,

The Secretary, Department of Indian Affairs.

J. L. McDUGALL, *A.G.*

DEPT. OF INDIAN AFFAIRS, OTTAWA, July 27, 1900.

SIR,—I beg to acknowledge the receipt of your letter of the 23rd instant, respecting Indian trust fund cheque No. 3486, issued in May last for a payment of \$120 to A. McAuley for forty days' services exploring the limits of timber license No. 61½, Batchewana Bay, and asking to be informed if this amount has been collected from the licensees, &c. In reply I have to inform you that the amount stands at the debit of the licensees, and will be collected with a further claim, not yet fully determined. It is thought the department is fully secured by the collection made of double dues on pulpwood.

I am, sir, your obedient servant,

The Auditor General.

J. D. McLEAN, *Secretary*.

SESSIONAL PAPER No. 1

Dating back increase of Salary to Agent C. L. D. Sims.

AUDIT OFFICE, OTTAWA, May 22, 1900.

SIR,—Indian Trust Fund cheque No. 2637, issued in March last, is for a payment of \$216.66 to Mr. C. L. D. Sims, Indian agent at Manitowaning, being arrears of salary from February 1, 1899, to March 1, 1900. Mr. Sims was appointed agent at a salary of \$800 a year on February 1, 1899. On March 2, 1900, an Order in Council was passed increasing his salary from \$800 to \$1,000. No date, however, is mentioned in the order for beginning the increase, which should therefore in accordance with an Order in Council of July 29, 1871, "count from the first day of the month next succeeding the date of the order," i.e. in the present case, from April 1, 1900. Even if the order had stated that the increase was to date from Mr. Sims' appointment, I do not think the Governor in Council has power to make an increase of salary retroactive.

I am, sir, your obedient servant,

J. L. McDOUGALL, A.G.

The Secretary, Department of Indian Affairs.

DEPT. OF INDIAN AFFAIRS, OTTAWA, May 29, 1900.

SIR,—I have the honour to acknowledge the receipt of your letter of the 22nd instant, relative to official cheque issued in March last for \$216.66 in favour of Mr. C. L. D. Sims, Indian agent at Manitowaning, in payment of arrears of salary from February 1, 1899, to March 1, 1900; and in reply I beg to inform you that upon reading the Order in Council of March 2 last (to which you refer, and by which Mr. Sims' salary is increased from \$800 to \$1,000 per annum) in connection with the Superintendent General's memorandum to Council, it was construed to mean payment should be made to Mr. Sims from the date of his appointment. If, however, you are of opinion that the Order in Council in question will not bear this construction the department will obtain an amending Order in Council.

I am, sir, your obedient servant,

J. D. McLEAN, Secretary.

The Auditor General.

AUDIT OFFICE, OTTAWA, June 2, 1900.

SIR,—I beg to acknowledge receipt of your letter of the 29th ultimo in reply to mine of the 22nd ultimo, relative to a payment of \$216.66 to Indian Agent C. L. D. Sims for arrears of salary. The Order in Council of July 29, 1871, referred to in my previous letter, is sufficiently explicit in stating that "unless some other date is specially named in the Order in Council, all changes in salary shall be held to count from the first day of the month next succeeding the date of such order." I can find no date specially named in the order increasing Mr. Sims' salary. In my opinion, however, an amending Order in Council cannot legalize any increase prior to the date of the Order in Council, unless indeed it can be shown that there has been a material addition to the class or kind of duties performed by the appointee, the addition having been made at the time from which the increase is to count. In the case before me, the appointment of Mr. Sims as Indian agent at Manitowaning virtually amounts to a contract entered into between him and the Government, he on his part contracting to perform the duties of Indian agent, while the Government contracted to pay him a certain salary for his services. Unless the Government altered the terms of the contract by requiring a new kind of duties from him, it cannot in my opinion legally increase the salary which has already been paid him. Of course at any time they can enter upon a new contract or arrangement under which the salary may be greater than before, but such increase cannot be made retroactive.

I am, sir, your obedient servant,

J. L. McDOUGALL, A.G.

The Secretary, Department of Indian Affairs.

AUDIT OFFICE, OTTAWA, July 25, 1900.

SIR,—I have a copy of an Order in Council of the 19th instant, amending the order of March 2 last by making the increase in the salary of Indian agent C. L. D. Sims date from February 1, 1899, the date of his appointment. In a conversation with you some time ago, I understood from you that Mr. Sims expected a salary of \$1,000 from the 1st, and that the salary of \$800 was accepted more or less under protest. If this is the case, it would remove any objection of mine to the increase. I have accordingly to request you to let me have this in writing.

I am, sir, your obedient servant,

J. L. McDOUGALL, A.G.

The Secretary, Department of Indian Affairs.

DEPT. OF INDIAN AFFAIRS, OTTAWA, July 26, 1900.

SIR,—In reply to your letter of the 25th instant regarding the increase to Mr. Sims' salary, I beg to state that Mr. Sims understood at the time of his appointment that the salary would be fixed at \$1,000 per annum, and he has since urged to have it increased to that rate. The memo. to Council set forth the whole matter very fully, but I find that the order—a copy of which has been sent you—simply authorizes the increase from \$800 to \$1,000, to take effect from the date of his appointment, namely, February 1, 1899.

I am, sir, your obedient servant,

The Auditor General.

J. D. McLEAN, *Secretary*

Insufficient information in J. A. Macrae's account for Travelling Expenses.

AUDIT OFFICE, OTTAWA, April 3, 1900.

SIR,—I beg to call your attention to the following items which occur in the travelling expenses of Mr. J. A. Macrae, between July 4 and December 16, 1898:—

July 4, repairs to valise	\$ 0 50
August 29, straps for valise	0 50
September 8, 9½ weeks' rent of valise at 25c.	2 37
July 30, repairing clothes	0 50
August 29, cleaning coat	1 10
August 6, holdall for brushes, &c.	0 50
Baths at various times—32 at 25c	8 00
Blacking boots—31 times at 10c	3 10
9½ weeks' contingencies to September 8, not otherwise accounted, at \$1.50. .	14 25
Actual expenditure disallowed in former accounts for unaccounted contingencies	36 25
December 13, felt driving socks	0 75
Incidental expenses not accounted between October 10 and December 16. . . .	3 00
Total	\$70 82

In my opinion these items should not have been allowed by your department, and I would ask that Mr. Macrae be asked to refund the amount overpaid.

I am, sir, your obedient servant,

The Secretary, Department of Indian Affairs.

J. L. McDOUGALL, A.G.

DEPT. OF INDIAN AFFAIRS, OTTAWA, April 10, 1900.

SIR,—In reply to your letter of the 3rd instant in regard to the payment by this department of certain items of Mr. J. A. Macrae's travelling expenses, I beg to state that the items for rent and repair to valise were allowed, for the reason that only one valise was furnished with his outfit, and a second was required. The holdall for brushes, &c., was also a necessity. With regard to the purchase of the driving-socks and the items for cleaning and repairing clothing, I may say that Mr. Macrae, while on his trips, is frequently obliged to drive over bad roads in all sorts of weather, and his clothing consequently suffers far beyond the ordinary wear and tear. The department therefore felt justified in allowing these items, as it did also in the case of the baths and blacking of boots, these being expenses which it has always allowed its officers. As to the three items of contingent expenditure, although Mr. Macrae was unable to furnish details, he certified that the expenditure was legitimate, and that it was incurred wholly on government business. The department, considering these explanations sufficient, therefore passed the items.

I am, sir, your obedient servant,

The Auditor General.

J. D. McLEAN, *Secretary*.

AUDIT OFFICE, OTTAWA, November 7, 1900.

SIR,—Referring to your letter of April 10 last (No. 169780-1a) with regard to certain items in the travelling expenses of Mr. J. A. Macrae, I beg to say that the explanation given in support of the charges for contingent expenses, for which no details are given, amounting to \$53.50, is not satisfactory. No item should be allowed in any account for expenses for which full particulars with dates cannot be given. With regard to the items for repairing clothing, &c., items of this nature are not usually charged, nor should they, in my opinion, be allowed. I am sorry that your letter has escaped my notice so long.

I am, sir, your obedient servant.

The Secretary, Department of Indian Affairs.

J. L. McDOUGALL, A.G.

SESSIONAL PAPER No. 1

Collection of Overdue Rents at St. Regis.

AUDIT OFFICE, OTTAWA, June 26, 1900.

SIR.—Rent receipt No. C 4344, issued February 3 last by George Long, Indian Agent at St. Regis, is in acknowledgment of the receipt from Mrs. James Y. Cameron of the rent from January 1, 1886 to January 1, 1889, on $\frac{1}{2}$ lot 31, range 1; $\frac{1}{2}$ lot 32, range 1, and gores 33 and 25, ranges 1 and 2. Kindly inform me why rent is now being collected that was apparently due some eleven years ago.

I am, sir, your obedient servant,

J. L. McDougall, *A.G.*

The Secretary, Department of Indian Affairs.

DEPARTMENT OF INDIAN AFFAIRS, OTTAWA, June 28, 1900.

SIR.—In reply to your letter of the 26th instant, in regard to the payment of rent by Mrs. James G. Cameron for land in the Township of Dundee, County of Huntingdon, I beg to state that in the year 1819 and subsequent years, leases were granted by the St. Regis Indians for terms of 99 and 999 years at a fixed annual rental. Owing to difficulties having arisen between the Indians and the White tenants, a commission was appointed in 1887 to inquire into the matter and in accordance with a report made by the commissioners, the lands in Dundee were surrendered by the Indians to be disposed of to the White settlers at a rate subsequently agreed upon of \$2.50 per acre. In January 1889, the Municipality of Dundee advanced on behalf of the White settlers in the township, the sum of \$50,000, payment in full for the land. It was afterwards arranged to have letters patent issued to the individual lessees, upon their proving title and paying up all arrears of rental under the old Indian leases to January 1, 1889, the date of payment of the purchase price of the land.

According as titles are investigated and arrears of rent paid, letters patent are issued and the department is, therefore, in a position to withhold patent in any case until all arrears of rental are paid.

I am, sir, your obedient servant,

J. D. McLEAN, *Secretary.*

The Auditor General.

SESSIONAL PAPER No. 1

Re Arrears.

DEPARTMENT OF INDIAN AFFAIRS, OTTAWA, October 24, 1900.

SIR,—I beg to acknowledge the receipt of your letter of the 6th ultimo, asking for the customary statement of arrears due on June 30 last by collecting officers, by disbursing officers and by all others, whether Government officers or not, and in reply to say that the following is the information desired :—

1. The arrears due by collecting officers are the same as reported last year, viz :—	
Charles B. Savage, Gore Bay.....	\$ 3,542 11
A. B. Lebel, Rivière du Loup.....	638 78
Total.....	\$ 4,180 89

2. There are no arrears due by disbursing officers

3. As regard arrears due by other persons, a statement is inclosed herewith showing the principal outstanding on account of sales of Indian lands on June 30 last by agencies and at headquarters.

This statement has been prepared on the same basis as that furnished you last year, including not only principal in arrears, but principal not yet due.

Your obedient servant,

S. STEWART, *Asst. Secretary.*

The Auditor General.
