of section 27, township 21, range 28, west of the 4th meridian. The east half of section 26, township 20, range 27, and the north half of section 36, township 20, range 27, west of the 4th meridian, which is held as a hay reserve for the school, is situated twelve miles southeast.

All of the above land belongs to the government. That portion of the property known as the home farm, consists of good bottom and bench lands, which, excluding hills and ravines, is fairly well adapted for farming and gardening. The hay reserve is in a low-lying district, where there is a plentiful supply of prairie hay and good

pasturage.

Buildings.—There are two main buildings, one chiefly for the use of the boys, and the other for the girls. The boys' building contains the principal's room, reception room, office, play-rooms, lavatories, a small store-room, two class-rooms, the dormitories, the boys' infirmary and rooms for the staff. In the girls' school, of which the reverend sisters have charge, are the kitchen, dining-room, chapel, class-room, dormitory, sewing-room and generally the whole of the matron's department. The workshop, lumber-shed and bakery are west of the boys' building and in line with it. Behind the main buildings are the stables, granary, piggery, implement and carriage shed and slaughter-house. The hospital and engine-house are two detached buildings to the east of the girls' house, on the banks of High river. Viewed from the surrounding hills, the school is prettily situated, and has the appearance of a compact little village.

During the year a substantial cattle shed, 104 x 28 feet, was built in the rear of the steer-stable. A building 10 x 12 feet was erected for the gas-generator. The steer-stable was shingled, new sidewalks were laid between the main buildings, the floor and the ceiling of the dining-room were renewed, furniture was repaired, and old

fences, which were falling into decay, were pulled down and rebuilt.

Accommodation.—There is accommodation for one hundred and twenty-five pupils

and a staff of twelve.

Attendance.—The attendance for the year averaged eighty-one. Admissions,

seven; discharges, eight.

Class-room Work.—Amongst the older pupils, half of each work-day is devoted to class-room work, and half is spent in gaining a practical knowledge of some industry. The younger children attend class both forenoon and afternoon.

Regular class-room hours are observed, namely: from 9 a.m. to 12 o'clock, and from 1.30 to 4 p.m., with intermissions. The programme of studies authorized by the department is followed. I may say that the progress of the pupils has been satisfactory, on the whole. The children were graded at the June examination as follows:

	•		Pupns
Standar	d I		12
"	II		25
"	III		21
"	IV	• • •	15
"	V	• ••	9
"	VI		1

Farm and Garden.—We have 227 acres under cultivation. There are 99 acres of oats, 16 of wheat, 25 of barley, 28 of roots, and 59 of brome. Sixteen acres of land were broken this summer. The weather so far has been very favourable, and the prospects of a good harvest are promising.

Last year's crop yielded 2,012 bushels of oats, 100 bushels of barley, 50 bushels of wheat, 1,200 bushels of potatoes, and 8,000 bushels of turnips and mangolds; 500

tons of hay were put up.

Stock.—Our stock comprises thirty-four horses, two bulls, fifty-two cows, forty-three heifers, forty-seven steers, thirty-five calves, twelve pigs, and about two hundred poultry. The proceeds from live stock and farm produce sold during the year

amounted to \$2,663.28. We showed two steers at the Calgary fat stock show, and took first prize for stall-fed cattle.

Industries Taught.—Farming.—Knowing that most of our boys must make their living by farming, we regard this industry as a most important one, and particular attention is given to the care and management of stock. Most of the senior boys work at least half a day on the farm, and during the busy season of haying and harvesting, the whole day is devoted to outside work. The smaller boys help in weeding the roots and garden, feeding and doing other light work. All the older boys are taught how to milk.

Our hay, coal, lumber and other supplies are hauled by the farm teams in charge of the boys. These boys also handle the teams in cultivating the land, seeding, binding and mowing, thus gaining a practical knowledge of farming in all its branches.

Carpentry.—Five boys have been learning this trade. Directed by the instructor, these boys built the large cow-shed and the house for the gas-generator. They completed the large steer stable, laid down new sidewalks, and executed many other repairs and alterations to buildings and furniture. During the period of haying and harvesting the trade apprentices do their share of the work in the fields.

Needlework.—Supervised by the reverend sisters, the girls are taught sewing, knitting, repairing clothes and darning. They make almost all the clothing required by themselves, as well as a large portion of the boys' clothing. All are taught cooking, baking, dairy and laundry work.

Baking.—A baker is employed. He also does the butchering and assists in the work of the farm.

Shoemaking.—No regular instructor is engaged. A few of the bigger boys who have some knowledge of the trade, from time to time repair harness and shoes.

Moral and Religious Training.—Instruction is given in the doctrines of Christianity, and pupils are encouraged to make practical use of its teachings in their every-day lives. Catechism class is held regularly. Morning and evening prayers are said in common, and all attend church on Sundays and holidays. In general the conduct of the children has been good.

Health and Sanitation.—I am glad to say that the health of the children has been good.

The sanitary condition of the school is excellent.

Water Supply.—A large well, close to the river, furnishes the institution with an abundant supply of good water, which is pumped into the tanks by a steam engine.

Fire Protection.—Three tanks, with a capacity of fourteen hundred gallons each, are kept filled with water, which could be used in an emergency on any flat. One hundred feet of hose on each story are connected with these tanks. Fire-extinguishers and hand-grenades are placed in the different rooms, and fire-pails, full of water, are distributed in convenient places. We have eight fire-axes, eighteen fire-extinguishers, fifty-five hand-grenades and forty-seven fire-pails. Each of the dormitories is supplied with a large fire-escape.

Heating and Lighting.—Thirteen stoves heat the girls' building. The old hot-air furnaces, pipes and registers were removed from the boys' building during the past winter, and a complete steam-heating apparatus was installed. This new system is much more satisfactory than the old.

The institution is now lighted by acetylene gas.

Recreation.—Every day two and a half hours are set aside for recreation, and one-half day each week is devoted to healthful open-air games. The boys play base-ball and football. Their favourite winter sport is hockey. The girls amuse themselves during play-time at croquet, basket-ball and other exercises.

I have. &c..

A. NAESSENS, Principal. British Columbia,
Ahousaht Boarding School,
Ahousaht, July 1, 1905.

FRANK PEDLEY, Esq.,

Deputy Superintendent General of Indian Affairs, Ottawa.

S_{IR},—I have the honour to submit the annual report of the Ahousaht boarding school for the year ended June 30, 1905.

Location.—The school is situated on a tract of land adjoining Mahktosis reserve, on Flores island, off the west coast of Vancouver island. It has a beautiful location on a small bay and looks out across North arm, here about a mile and a half wide, and up Herbert arm. It has a fine view of the Cat-Face mountains and snow-capped peaks up North arm and Herbert arm. Some little distance to the rear there is a fresh water lake with an area of about fifteen acres.

fresh water lake with an area of about fifteen acres.

Land.—There are one hundred and forty acres belonging to the school, most of it heavily timbered. This land lies immediately south of Mahktosis reserve and touches North arm on one side and Matilda creek on the other. It is owned by the Presbyterian Church.

Buildings.—The school building, which was first occupied in October of last year, is a frame building, two stories, with basement and large attic. It is a comfortable, well-arranged building, 46 x 68 feet.

The basement contains separate play-rooms for boys and girls, laundry and drying-room and work-shop. On the first floor are two class-rooms, children's dining-room, kitchen, pantry, store-room, scullery, office and staff's dining and sitting rooms. On the second floor are two dormitories, two sick-rooms, three bath-rooms, sewing-room, two cloak-rooms and four private rooms. Third floor contains two large dormitories, one private room and four store-rooms. There are separate entrances and stairways for boys and girls throughout.

Accommodation.—The school building has accommodation for sixty pupils and five of a staff.

Attendance.—There are at present thirty-five pupils on the rolls: twenty boys and fifteen girls. Eleven pupils were admitted during the year and one girl died.

Class-room Work.—The progress in the school-room throughout the year has been very satisfactory. The progress in English has been especially marked. All pupils attend school both forenoon and afternoon. The programme of studies prescribed by the department is followed as closely as circumstances will admit of. The school-room work is carried on in two class-rooms, one for the younger and the other for the older pupils. The classification at the close of the year is as follows:—

		Pupils.
Standard	I	7
"	II	4
	ш	14
	IV	10

Industries Taught.—The boys take care of their sleeping-rooms, assist in the laundry, cut wood, do some carpentry-work and bake bread. The girls do housework, baking, sewing, &c. Twelve of the girls can make all their own clothing and are now learning to make boys' clothing. Several of the girls can knit and crochet.

Farm and Garden.—All the land belonging to the school is heavily timbered and none of it is yet in a condition to be cultivated.

Moral and Religious Training.—The children attend church service, Sabbath school and a song service every Sabbath. Family worship is held morning and evening, and there is also a weekly prayer-meeting carried on principally by the children themselves. The children seem much interested in all religious exercises. The conduct of the children has been good.

Health and Sanitation.—The health of the children has been good. There has been very little illness, and with the exception of one case none has been of a serious

nature.

Water Supply.—The water used is obtained from rainfall at present. There are three large tanks in the building, which, so far, have given a sufficient supply.

Fire Protection.—The protection against fire consists of a dozen buckets filled and conveniently placed and six chemical fire-extinguishers. There is a fire-escape at each end of the building.

Recreation.—A fine beach directly in front of the school provides a good playground where football and other games are played. All the children are fond of canoeing, sailing, surf-riding and swimming. In winter evenings they play various indoor games.

General Remarks.—The continued interest and assistance of Agent Neill have been much appreciated and the visits of Inspector Green are looked forward to with pleasure.

I have, &c.,

J. C. BUTCHART, B.A., Principal.

British Columbia,
Alberni Boarding School,
Alberni, June 30, 1905.

FRANK PEDLEY, Esq.,

Deputy Superintendent General of Indian Affairs, Ottawa.

Sir,—I have the honour to submit the annual report of the Alberni boarding school for the year ended June 30, 1905.

Location.—This school has a beautiful location, near the Sheshat village, over-looking the Somas river, and about two and a half miles from Alberni.

Land.—There are sixteen acres of land in connection with the school. These sixteen acres are part of lot 81, district of Alberni. The land is owned by the Presbyterian Church. It was originally heavily timbered, and is very expensive to clear; the soil, however, is very good and is well adapted for all farming purposes.

Buildings.—The new building erected towards the close of last year was com-

pleted. All buildings are kept in good repair.

Accommodation.—There is accommodation for sixty children and a staff of seven.

Attendance.—There are forty-five children on the roll, twenty-six boys and nineteen girls. Five boys and four girls were admitted during the year, and five boys and six girls were discharged.

Class-room Work.—The programme of studies authorized by the department is followed. Good progress has been made in the class-room. The following is the standing in classes at the close of the year:—

 $27-i-23\frac{1}{2}$

		•	Pupils
Standard	I		7
	II		7
"	III		
"	IV		6
"	V		9

Farm and Garden.—The stock consists of two horses and three head of cattle. Several of the boys have learned to milk. Some of the larger boys are good teamsters, they do all ploughing, harrowing, and work necessary for putting in the crop, and teaming for the school. Our large garden yielded well last fall.

Industries Taught.—Farming and gardening are taught, also plain carpentering, painting, shoe-repairing and baking. The girls are taught bread-making, the care of milk and butter, the canning of fruit; also cooking, sewing and music.

Moral and Religious Training.—The conduct of the pupils has been good; in

all their work they are faithful and obedient.

The pupils attend regular Sabbath services also Sabbath school and every day religious instruction is imparted to them.

Health and Sanitation.—The health of the pupils has been good; we had no serious illness during the year.

The sanitary condition of the school is good.

Water Supply.—The supply of water is obtained from a well and the rainfall. It is not satisfactory. Recently a new well was dug, which gives a large quantity.

Fire Protection.—Four 'Carr' and four 'Star' fire-extinguishers are distributed through the building. Twelve fire-buckets are kept full in convenient places. There is also one hundred and fifty feet of rubber hose.

Heating and Lighting.—The main building is heated by a furnace, the new addi-

tion by stoves. Coal-oil lamps are used for lighting.

Recreation.—The boys play football and baseball; the pupils are very fond of

swimming and canoeing. In the winter, indoor games are provided.

General Remarks.—Besides the usual visits of Agent Neill, the school was inspected by Inspector Green in January, and in April we had the pleasure of a visit from Superintendent Vowell.

I have, &c.,

JAS. R. MOTION, Principal.

British Columbia,
Alert Bay Girls' Home,
Alert Bay, July 14, 1905.

FRANK PEDLEY, Esq.,

Deputy Superintendent General of Indian Affairs, Ottawa.

Sir,—I have the honour to submit the following report of the Alert Bay girls' home for the year ended June 30, 1905.

Location.—The home is located on land belonging to the Church Missionary Society. A quarter of an acre is fenced for a vegetable garden at the side of the home and a flower garden facing seaward, gives it a pleasant and homelike appearance.

Buildings.—The building is of wood, 34 x 32 feet, and comprises dining-room, play-room, kitchen, laundry, and matron's sitting-room, dormitories, with suitable bedrooms upstairs.

Accommodation.—The building is capable of accommodating fifteen girls and two officers.

Attendance.—The average attendance was six.

Class-room Work.—The pupils were well taught by Mrs. Hall at the village school. The schedule prescribed by the department is followed.

Moral and Religious Instruction.—Bible lessons with prayers are given daily and

the girls' morals are zealously guarded by the matron.

Health and Sanitation.—The health of all the girls was very good. The sanitary arrangements of the home are quite satisfactory.

Water Supply.—There is a good supply of water obtained from a spring at the back of the home.

Fire Protection.—Two 'Star' fire-extinguishers, one axe, and six fire-buckets, all supplied by the department, are kept ready for use. A large tank is kept full of water. The fire-brigade is close to the home.

Heating and Lighting.—The heating is done by means of box stoves and lighting

by ordinary coal-oil lamps.

Industries Taught.—The industrial teaching consists of instruction in general housework, cooking and bread-making, sewing and knitting. Very good progress has been made by most of the pupils.

Recreation.—Regular hours are set apart each day for recreation. The girls take walks with the matron. Various indoor games are supplied. Gardening is encouraged. A play-room is well supplied with books, and an organ is a great attraction,

all the girls being musical.

General Remarks.—Miss R. L. Edwards left in October for England. Her position was filled by Mrs. Rochester, who, finding the work too much for her, resigned in six months. The position of matron was then filled by Miss Cargill.

I have, &c.,

A. W. CORKER,

Principal.

British Columbia,
Port Simpson Boys' Boarding School,
Port Simpson, August, 1905.

Frank Pedley, Esq.,
Deputy Superintendent General of Indian Affairs,
Ottawa.

SIR,—I have the honour to forward the annual report of the Port Simpson boys' boarding school for the year ended June 30, 1905.

Location.—The school is located three hundred and fifty yards from the ocean front, on a small elevation at the northeast of the Indian village, on the Tsimpshean reserve.

Land.—The land comprises a lot four rods by five rods, surrounding the institution. It was obtained from the Indians by the Methodist Missionary Society, and belongs to the society. It is slightly elevated on either side, with a ravine through the centre, which drains it thoroughly. It is well adapted for the raising of hay, small fruits and vegetables. Raspberries, gooseberries, red and black currants and strawberries grow plentifully. Rhubarb, turnips, carrots, beets, onions, celery, lettuce, parsley, savory, cabbage, cauliflower, &c., are easily raised in sufficient quantity to supply the needs of the institution.

Buildings.—A two-story building, 25 x 36 feet, with a good cellar, divided into three apartments for groceries, vegetables and a workshop respectively, is used for the staff.

A second building, 25 x 36 feet, situated at the south of building No. 1, is divided into a preparation-room, hall, lavatory, kitchen and store-room, on the first floor; and into a dormitory, hall, matron's-room, store-room, and four closets on the second floor.

A third building, 24 x 30 feet, connecting buildings Nos. 1 and 2, is used as a reception-room, and boys' dining-room with two dormitories and two closets above.

The reception-room, sewing-room and boys' preparation-room have been newly painted and all the rest of the house has had a fresh coat of alabastine.

A building, 16 x 25 feet, is used as a play-room for the children in rainy weather. The upstairs is used as a lumber-room.

A small barn is used to shelter one horse, two cows and a supply of hay.

Other small buildings consist of wood-shed, a hen-house, a tool-house, a drying-shed and closets.

Accommodation.—The buildings have accommodation for the principal, matron, teacher and twenty-seven pupils.

Attendance.—Twenty-four pupils were enrolled during the first half of the year and twenty-two pupils the last half year. Two pupils were discharged. The attendance has been excellent.

Class-room Work.—The work in the class-room has been very satisfactory.

Farm and Garden.—This is confined to a small garden in which sufficient small fruits and vegetables are raised to supply the institution.

Industries Taught.—These comprise carpentry, cobbling, general housework (bread-making, mending, washing, ironing, &c.) and gardening. We find that some of the pupils are more particularly adapted to the use of the saw and hammer, others take more to gardening, while still others become proficient at bread-making and the use of the needle.

Moral and Religious Training.—Moral and religious instruction is given daily with good practical results.

Health and Sanitation.—No epidemic or serious illness has affected the school during the year, with the exception of a light case of scarlet fever. The sanitary condition of the premises is good.

Water Supply.—The water-supply is not good. Water is brought to the house by means of a flume and rain-water is also caught from the eaves into barrels.

Heating and Lighting.—The heating is done with ordinary wood and coal stoves. Six are ready for use, but only in extreme cold weather are all going at once.

Lighting is done with the ordinary coal-oil lamps.

Recreation.—The playground is on an elevation overlooking the whole village and has a good view of the ocean. The boys amuse themselves with ball and bat, football and other outdoor games in fine weather, while carving, crokinole, checkers, ping-pong, &c., are favourite indoor amusements. Some devote considerable time to reading and music. The little ones are especially fond of picture-books and nursery rhymes.

I have, &c.,

CHAS. M. RICHARDS, Principal.

British Columbia,
Port Simpson (Crosby) Girls' Home.
Port Simpson, July 13, 1905.

FRANK PEDLEY, Esq.,

Deputy Superintendent General of Indian Affairs, Ottawa.

Sir,—I have the honour to submit the following report of the Port Simpson (Crosby) Girls' Home for the year ended June 30, 1905.

Location.—The school is located at Port Simpson, British Columbia, and is

situated just outside the limits of the Tsimpshean reserve.

Land.—The land lies in section 4, township 1, range 5, Coast district. It is owned by the Women's Missionary Society of the Methodist Church of Canada, and was acquired by purchase from Mr. Gordon Lockerby, Port Simpson. There is an area of two acres which is well fenced, but only about one-fourth of an acre is cultivated. The land lies on the slope of a hill, the greatest elevation being towards the south and east. With thorough draining the soil would be suitable for a garden and for raising small fruits.

Buildings.—The buildings consist of a house, three stories and a basement, a tank, chicken-house, wood-shed, a drying-shed and water-closets. Our verandah and steps were rebuilt during the year and the back platform repaired.

Accommodation.-We have good accommodation for forty-five pupils and four

teachers.

Attendance.—The average attendance is 44.53. The total enrolment is fifty-two. Six girls have been discharged; two are on leave of absence on account of their health and seven have been admitted during the year. The present number in attendance is forty-four.

Class-room Work.—The classes have made good progress, and one class of nine is ready for promotion to standard IV. The present classification is as follows:—

	•	Pupils.
Standar	d I	8
"	ĪI ,	
"	III	10
"	IV	15
"	V	3
"	abla T	1
	Total	52

The pupils speak English fluently, and those who have been admitted during the year are making good progress in English. Special progress in composition and arithmetic has been noticed. The subjects are reading, writing, arithmetic, spelling, dictation, grammar, composition, geography, history, hygiene, music, Bible history and doctrine, and the Methodist catechism.

Ten girls have taken lessons in instrumental music, and the whole school has had a lesson every week in vocal music. Some have made good progress and are

capable of acting as organists.

Garden.—A small vegetable and a flower garden are cultivated, as well as currant and gooseberry bushes, in all about one-eighth of an acre. We hope to be able to increase the area cultivated each year; the cost of labour for drainage and unfavourble condition of the soil, have hitherto prevented us from doing this.

Industries Taught.—The industrial teaching consists of instruction in general housework, laundrywork, cooking and bread-making, dressmaking, sewing, mending, darning and fancy-work.

Some of the older girls have taken a special course in cooking this year and some who have been discharged from the home have cut and made their own dresses very neatly. Very satisfactory progress has been made in every department and careful training and instruction has been given. Some who went to help the white ladies of the village gave good satisfaction with their work. The girls under the supervision of the matron and teachers performed satisfactorily all the work of the institution, including the kalsomining and house-cleaning.

Moral and Religious Training.—The pupils are carefully trained to be honest, respectful, truthful, obedient, industrious, kind and obliging. A Bible lesson is taught every day and a class for religious instruction by the Rev. J. Grenfell is held every week. We can see that the lessons taught are bringing forth in many lives the

fruits of right-living.

Health and Sanitation.—The sanitary condition is good, and steps have been taken to improve the drainage. While it is good on our own grounds, there is need of a more extended system to carry the sewerage to the beach. The general health has been very good. No deaths have occurred during the year and only one girl has an extended vacation on account of her health, and is not able to return to the home. All are in good health now.

Water Supply.—The water-supply is derived principally from a mountain stream at some distance from the house, and the water is conducted by a flume to a large tank holding 4,000 gallons. The rain-water from the roof also flows into the tank. The water passes through a filter before entering the tank and is distributed through the house by means of pipes. We have hot and cold water on two floors. Our water-supply is excellent and abundant.

Fire Protection.—We have fire-escapes furnishing means of escape from the two upper flats and from all the dormitories. Besides these fire-escapes, which we have tested and proved satisfactory, there are two stationary ladders on the roof and two from the ground to the roof. We have also two light movable ladders.

Buckets of water and of ashes are kept always in readiness on each flat and eighteen water-pails are available in case of fire. We have two chemical fire-engines and a fireman's axe. Mention may also be made of the village fire bridage within call on short notice.

We have an abundant water-supply.

Heating and Lighting.—The heating of the institution is accomplished by six stoves, one French range, one open grate and one coal-oil stove. We use soft coal and some wood. Coal-oil lamps are used for lighting, bracket and hanging lamps being used exclusively in the pupils' apartments. We have four large hanging lamps.

Recreation.—Regular hours are set apart for recreation each day. In wet weather they play in a play-room, where the air enters freely. This recreation consists of games, physical culture, such as club-swinging, drill and calisthenic exercises, walking, playing on the beach and general play. Exercise in the open air is encouraged and insisted upon when necessary.

Ex-Pupils.—This year we have had the highest average attendance in the history of the institution. Three girls were discharged last summer and fall. Two of them are now married and the third expects to be married in August, to one of the best young Indians in the village. All have behaved themselves well and we have heard good accounts of them.

On May 1 another girl was discharged who seems to be doing well, and another was married from the school on June 9. She keeps her house neat and clean and we think she will put in practice the lessons learned in the school.

Nearly all these girls have comfortable homes, and many of them will be in more danger from the vices introduced by bad white people than from the old Indian customs.

General Remarks.—Miss Carroll, matron, resigned last November, and her position has been ably and efficiently filled by Miss Clarke. Miss McIntyre came to take Miss Clarke's position as matron's assistant.

Last August through the kindness of the Georgetown Sawmill Company all the pupils were given an all-day excursion up Works' channel on the steamer 'Nell.' It was a great treat and was thoroughly enjoyed by all.

The girls have done their work cheerfully and well, and have greatly pleased those whom they have gone occasionly to help. Most of them are striving to build up true

Christian characters.

This year at Christmas we had a concert in a public hall. The programme, with the exception of a few selections, was rendered by the girls. The boys from the boys' home gave calisthenic exercises, with bells and club-swinging, which were very creditably rendered. The programme consisted of choruses, drills, with songs, calisthenic exercises, with bells by the smaller girls and club-swinging by the bigger girls. A doll's cantata was much admired. Then we invited all the parents and friends of the girls for an afternoon and gave them refreshments, prepared by the pupils.

The parents were much pleased with the progress of the children, and seem to appreciate the advantages of the institution more than formerly. We endeavour to make our institution as home-like as possible, and although firm and kind discipline is maintained, they have the advantages and privileges of a Christian home. We are striving every year to rise a little higher in character and attainments.

I have, &c.,

HANNAH M. PAUL,

Principal.

British Columbia, Squamish Boarding School, North Vancouver, July 8, 1905.

FRANK PEDLEY, Esq.,

Deputy Superintendent General of Indian Affairs, Ottawa.

Sir,—I have the honour to submit my annual report for the year ended June 30, 1905.

Location.—The Squamish boarding school is situated on the north shore of Burrard Inlet opposite the city of Vancouver and at a distance of about four miles therefrom.

Land.—The land attached to the school is the property of the Sisters of the Holy Infant Jesus, and consists of only fourteen acres, about seven acres having been sold for the benefit of the school, the half of the remainder is under cultivation and is divided into vegetable garden, orchard, flower beds, &c.

Buildings.—The wing added two years ago is large, well ventilated and well lighted, commodious and comfortable. It consists of: entrance hall, two reception-rooms, a large school-room and a work-room; on the second floor are the chapel and rooms for the different members of the staff; the upper story contains a large dormitory for the girls; on each floor are bath and toilet-rooms. In the old building, the ground floor comprises a small store-room, kitchen, two large dining-rooms and a large school-room. On the second story is the principal's room, two dormitories, the boys' and the girls' infirmary and also some bed-rooms for the teachers.

The outbuildings consist of wood-shed, laundry, storehouses, barn and hen-house.

Farming and Gardening.—Farming here cannot be conducted on a large scale, owing to the very small area of land fit for that purpose.

The pupils, both boys and girls, cultivate flowers in abundance and variety. All sorts of vegetables (though in small quantity) are raised for table purposes, such as potatoes, beans, pease, lettuce, onions, cabbage, turnips, carrots, &c. Strawberries,

currants, raspberries and gooseberries, are in abundance; the orchard yields a fair crop of apples, plums, pears, cherries, &c.

Girls' Industrial Work.—The girls receive a thorough training in all branches of domestic work, such as: baking, cooking, laundrying, knitting, darning, hand and machine sewing and the cutting and finishing of all kinds of wearing apparel; they also are taught crochet-work, torchon lace, drawn-work, embroidery, flower-making, &c. Most of our girls are small, but such tasks as are required of them, they perform willingly and cheerfully.

Attendance.—Sixty-two pupils have been in attendance during the year. The present attendance is fifty-eight, of whom twenty-six are boys and thirty-two girls.

Class-room Work.—The course of studies outlined by the department is followed as closely as possible; all pupils without exception have made gratifying progress; the Indian language has been eradicated, and English is spoken by all the children in the school. The pupils have four hours of class-room work and an hour for study. The branches of studies for the senior class are: arithmetic, grammar, geography, Roman Catholic catechism, composition, dictation, reading, writing, spelling and drawing. For the junior class: reading, spelling, writing, dictation, arithmetic and also drawing. At the end of the year the pupils were graded as follows:—

			- 4			* *	Pupils.
St	andar	d I			 		27
	"	II		·	 		6
	"	$ ext{III}$			 		$\dots 12$
	"	IV	·		 		—
	"	V		[.] .	 		11
	"	VΙ		•••••	 		2
		Total					58

Moral and Religious Training.—Great care and special attention is given to this part of education. No effort is spared to instruct our pupils thoroughly in principles of faith and religion. Morning and evening prayers, and regular services on Suudays are never omitted; a short religious instruction is daily given on some practical subject, such as: obedience, politeness, order, &c. Punishments are of rare occurrence.

Health and Sanitation.—The general health of the pupils has been good; we had two or three attacks of grippe, but there were no fatal results. Scrofula is the main ailment we have to contend with. The sanitary condition is all that can be desired; the building is well ventilated and kept clean.

Water Supply.—Since last spring we have obtained connection with the city water-supply and now the building is abundantly supplied with pure crystal water.

Fire Protection.—Two 'Stempel' fire-extinguishers, eight glass-lined chemical extinguishers, two dozen buckets, two hundred feet of hose, two axes and two ladders, are kept in readiness in case of emergency.

Heating and Lighting.—The heating is done by means of wood stoves; coal-oil

lamps are used for lighting.

Recreation.—The boys, in fine weather, enjoy football, baseball and lacrosse; they also practise swimming, canoeing and boating; the girls take a great deal of interest in physical drills, skipping, reading, and a walk almost daily attended by one or two members of the staff. We endeavour to make the children feel as happy as possible.

General Remarks.—The pupils have given two public entertainments, one at Vancouver, the other at North Vancouver. They received for that purpose special training in singing, drills and recitation, and I am glad to state that the performance was far beyond what we had expected. I must also mention the success obtained by the school children at the Provincial Exhibition of New Westminster, where a diploma and several first and second prizes were awarded to them.

In conclusion, I beg to tender my sincere thanks to Mr. A. W. Vowell, Indian superintendent, for his kindness and attention to all matters connected with the school. I beg also to acknowledge the courtesy of Mr. A. E. Green, our inspector, and of Mr. R. C. McDonald, our agent, in all our dealings with them, and to thank them for the interest they take in the school. I take great pleasure in mentioning the faithful work done by the different members of my staff.

I have, &c.,

SISTER MARY AMY.

Principal.

BRITISH COLUMBIA,
St. Mary's Mission Boarding School,
Mission City, July 15, 1905.

Frank Pedley, Esq.,
Deputy Superintendent General

Deputy Superintendent General of Indian Affairs, Ottawa.

Sin,—I have the honour to submit the annual report of this school for the year ended June 30, 1905.

Location.—The St. Mary's Mission boarding school is situated in the Fraser valley, forty-three miles east of the city of Vancouver. Standing on a charming plateau on the northern bank of the river, whose serpentine course can be followed thence for over twenty miles, our buildings face the prosperous Matsqui prairie, and command a beautiful view of the Sumas and Chean mountains, as well as of the picturesque Mount Baker across the boundary line. The neighbouring forests of fir and cedar combine with the fruit plantations and the manifold crops of cereals and hay, in making the scenery lovely and giving the air wholesomeness and fragrancy. Comfortable steamers plying daily between New Westminster and Chilliwack, also the nearness of the Canadian Pacific railway with a line branching off from Mission towards southern points, give our pupils and their parents every facility of access to the school.

Land.—Some three hundred acres of land are attached to the school. The larger part of it lies under heavy timber, so that the progress of the axe and the plough is slow and costly. However, every year, with the help of the bigger boys and some hired men when finances allow it, the forest is robbed of a few more acres, and our improved land proportionately increased. The farm is the property of the Oblates of Mary Immaculate. It lies in the Mission City district municipality, section 2, townships 3 and 4. The soil yields good crops of hay, roots and vegetables, but is perhaps best adapted for fruit-culture.

Buildings.—The boys' department consists of a main building, 75 x 33 feet, with a newly erected wing, 50 x 35 feet. The first floor contains: entrance-hall, parlour, chapel, school-room, recreation-room, kitchen and dining-rooms. On the second floor are the library, the infirmary and adjoining toilet and bath-rooms, the principal's bedroom and office, the teachers' private work-room and several bed-rooms for the male part of the staff and visitors. The third floor contains the dormitory and two toilet-rooms, besides another large room which can be made a comfortable dormitory.

This spring the building has been repaired throughout. Most of the floorings have been renewed, the walls and ceilings have been covered with a good layer of muralo or tastefully papered; the woodwork varnished or neatly painted, and in the most conspicuous halls and apartments skilfully grained in imitation of oak or ash.

Another building, 45 x 24 feet, attached to the main one, contains two class-rooms,

band-room, shoemaker and carpenter shops, and two bed-rooms.

The girls' house consists of a main building, 75 x 33 feet, with a wing, 45 x 24 feet, and includes entrance hall, parlours, class-rooms, sewing-room, chapel, dining-room and kitchen, recreation-room, dormitory, bath-room and toilet-rooms.

The outer buildings comprise a play-hall, laundry, store, wood-shed, stables and

barns.

Accommodation.—This can be provided for about ninety pupils and necessary staff.

Attendance.—There has been an average attendance of eighty-five pupils; forty-

two boys and forty-three girls.

Class-room Work.—The class-room work is ably and devotedly carried on by four Sisters of St. Ann, each having under her charge an average of from twenty to twentyfive pupils. The school hours are, in the morning from 8 to 11.45, with two fifteen minutes' intermissions, and in the afternoon from 4.30 to 6. The organ and band practices take place at 1 p.m. in the summer and at 8 p.m. in the winter. endeavour of the teachers not to depart from the official programme of studies prescribed for the Indians. However, reading, penmanship and arithmetic are given special attention, they being deemed of capital importance. That music trains the character is carefully borne in mind. Rev. Brother Collins is the leader of a disciplined and well-trained brass band, an object of frequent praise from inspectors, visitors and other guests. I will also mention the girls' and boys' choir, which, under the able guidance of Rev. Sister Mary Rogation, adds considerable enthusiasm and piety to the Sunday services, and occasionally enlivens our recreations with many a song.

Farm and Garden.—This season thirty acres are sown in oats, and a splendid crop is expected. About the same extent is under hay; it is promising well. The orchard is extensive and yields annually a large quantity of fruit. The cherry crop in particular has been this year extraordinarily rich. As regards the apple and pear trees I must say that they are not as healthy as desirable; we are advised to do away

with them and put in instead a new and vigorous plantation.

Industries Taught.—This being only a boarding school, it is impracticable to do much as regards trades. However, the bigger boys manifesting frequently a strong desire to learn a trade of some kind, it has always been the aim of the management to initiate them into at least the rudiments of carpentering and shoe-making. I may be allowed to state here that Denis Chehalis, discharged from this school about a year

ago, earned his living last winter chiefly by making and repairing shoes.

All the boys are thoroughly instructed in the different branches of farming and gardening. They are taught dairywork, shown how to take care of the live stock; they help in putting in the crop and in the harvest-time render valuable assistance to the employees. As a matter of fact, most of our ex-pupils are farmers whose skill and prosperity are much above that of their tribesmen who have not enjoyed the benefit of education. I shall only make reference to Aleck Tommy, of Chilliwack, who is the owner and manager of a ranch, with a goodly herd of cattle, which many white men might envy.

The girls are instructed by the reverend sisters in the culinary department, dressmaking, knitting and general housework. Hand and machine-sewing, fancy and specially plain needle-work are their frequent occupation. It is highly gratifying to the reverend sisters to notice that their former pupils wear and dress their children with garments cut out and sewn with their own hands.

Moral and Religious Training.—To maintain a high moral tone in the school is the object of our constant efforts. By daily religious exercises and the teaching

of the Roman Catholic doctrine, illustrated with examples from profane and sacred history, the children are persuaded to listen to the voice of their conscience. They are vigilantly trained to self-respect, truthfulness and other Christian virtues. In fine, no pains are spared to refine their character, elevate their sentiments, and make of them good Christains and useful citizens. It is my pleasure to certify that good results are obtained.

Health and Sanitation.—This year one girl had to be discharged on account of being tuberculous. Three boys have had diphtheria, the disease being mysteriously brought in from some neighbour. One has been sick with typhoid fever, and there have been two cases of pneumonia. The fact that they have all completely recovered—the tuberculous case naturally excepted—speaks well for the care bestowed on the children.

All possible material comfort is provided. Our sanitary system has been pronounced perfect by the local physician whom we had called to inspect the institution and advise us in hygienic matters. The ceilings are high, the rooms brightly lighted and well ventilated. Thanks to the reverend sisters, the children's clothes are clean, and the house is kept exquisitely neat and cheerful.

Water Supply.—The St. Mary's creek flows through our property, affording the school a healthy and abundant supply of water, which is carried in pipes through the

entire buildings.

Fire Protection.—The fire-fighting appliances consist of eight chemical fire-extinguishers, four fireman's axes and forty-eight pails constantly filled with water and placed in convenient positions in the several flats of the buildings. While the younger pupils are taught how to seek safety by means of the fire-escapes, the bigger ones are regularly drilled in the use of the fire-appliances. It may be proper to say here that the children themselves saved out buildings last winter when, on a dry and windy day, the roof of the girls' house caught fire in several places. The flames made a large opening through the shingles; a number of rafters were badly damaged, a few being even cut through by the action of fire. As soon as the alarm was given, the girls bravely and resolutely secured buckets, fire-extinguishers and axes, hurried to the garret and over the roof, and before the help of Brother Collins with his boys could be obtained, the fire was under control.

Heating and Lighting.—The buildings are heated with stoves. There is a large quantity of fir, birch and other wood to be had in the vicinity. Light is supplied by

means of coal-oil lamps.

Recreation.—The attractiveness of the school is powerfully increased by the passionate interest our pupils manifest in the various games and sports in which they are encouraged to indulge. The playgrounds are extensive, well situated and cleanly kept. When outdoor exercises are impracticable, the children are kept busy inside with all sorts of games, singing and band practising.

General Remarks.—I take pleasure in saying that we breathe here an air of peace and harmony. The example of charity and sympathy set by the staff is reflected

in the doings of the whole community.

Before closing I beg leave to express my feelings of gratitude to Mr. R. C. Mc-Donald, our Indian agent, who is so prompt and courteous in his correspondence, and whose cheerful visits never fail to bring us a sunny day; to Mr. Green, inspector of Indian schools, who takes a keen interest in our institution, and to the superintendent, Mr. A. W. Vowell, who, not being satisfied with kind words, gives us a substantial and never flinching support.

I have, &c.,

J. TAVERNIER, O.M.I.,

Principal.

British Columbia, Yale (All Hallows') Boarding School, Yale, July 7, 1905.

Frank Pedley, Esq.,

Deputy Superintendent General of Indian Affairs, Ottawa.

Sir,—I have the honour to submit herewith my annual report for the year ended June 30, 1905.

Location.—This school is situated about a quarter of a mile from the Canadian Pacific Railway station of Yale, B.C. It stands on the right bank of the Fraser river, about a mile below the mouth of the Fraser canyon. The school is not built on a reserve.

Land.—The school buildings stand on well laid out grounds of about seven acres in extent. This land was bought by friends of the school aided by a government grant of \$500, and is held in trust for the school.

Buildings.—These consist of a large school building, a small school, chapel and a

house for the staff and visitors.

Accommodation.—One large airy dormitory and several small rooms provide sleeping accommodation for thirty-eight pupils; besides these, there is a large school-room, a living-room, wash-room, clothing-room, kitchen and several commodious closets, store-rooms and bath-rooms.

All the pupils are boarders, and only a small number of them leave the school for holidays of three weeks' duration, during the summer, with sanction from the depart-

ment.

Class-room Work.—The school-room is under the charge of a fully qualified teacher, Miss Kelley, B.A., of Trinity University, Toronto, assisted by an English teacher with special musical qualifications. Pupils sent in for the Royal Drawing Society's examination last year passed very well in the first and second grades, three girls passed with distinction. This year nearly twenty pupils were entered for the first four grades in drawing, the results will not be known until August.

One pupil entered for the Associated Board B.A.M., and B.C.M., lower school

examinations in violin and passed very creditably this June.

A sister takes classes in religious subjects and elocution, the matron teaches

needlework, cutting-out and dressmaking.

Health and Sanitation.—The health of the children has been excellent during the past year. There have been no serious cases of illness, and the doctor was only called in once, to attend a case of severe inflammation. The drainage system is quite satisfactory and the sanitary condition of the school excellent.

Water Supply.—There is an abundant supply of excellent water close at hand,

the school obtaining fifteen inches of water from a mountain stream nearby.

Heating and Lighting.—All the buildings are warmed with stoves burning wood and coal, the pipes passing through brick chimneys. They are lighted by means of oil lamps attached to the walls or suspended from the ceiling.

Recreation.—An hour's walk is taken daily in suitable weather. The girls have a large playground with swing and summer-house, and a tiny garden for each child

to dig and plant in.

During the winter or on rainy days, games, fancy-work, and reading are in vogue

in the large play-room or on the balcony or verandah.

Garden.—Half an acre of fruit-trees, provides fresh fruit and a good supply of jam for the school during the entire year. Vegetables are also grown, but the soil is too light to grow heavy root crops.

Industries Taught.—The girls are thoroughly instructed in all departments of domestic service, and the older ones in cooking, bread-making and laundrywork.

Ex-Pupils.—The girls who have gone out to service receive good wages and are very highly spoken of by their several mistresses, while some of those who married have already sent their little daughters to be brought up and educated in the old school which sheltered the childhood and girlhood of these young mothers.

I have, &c.,

AMY, SISTER SUPERIOR, C.A.H.,

Principal.

BRITISH COLUMBIA,

ALERT BAY INDUSTRIAL SCHOOL, ALERT BAY, July 14, 1905.

FRANK PEDLEY, Esq.,

Deputy Superintendent General of Indian Affairs, Ottawa.

Sir,—I have the honour to submit my annual report of the Alert Bay industrial school for the year ended June 30, 1905.

Location.—The school is healthily situated on the Alert Bay industrial school reserve, and is erected on rising ground at the west end of Alert bay, commands a pleasant view to sea, and is sheltered from northerly winds. The post office address is Alert Bay, British Columbia.

Land.—There are 410 acres of land connected with the school. The soil is mostly gravel and is thickly covered with bush. It is best adapted for pasture land, but is only cleared with difficulty. Potatoes do well for the first and second years.

Buildings.—The school building is of wood, strongly and tastefully erected with plastered walls and light airy rooms. Size, 60 x 40 feet. Attached to the main building is a wing, 54 x 18 feet, comprising class-room and workshop. The outer buildings comprise: trades-instructor's house, laundry, cow-shed, hen-house, root-house, cloak-room, tank-house and wood-shed.

Accommodation.—There is ample room for thirty-five boys and three officers.

Attendance.—The average attendance was twenty-one pupils.

Class-room Work.—The work done in the class-room has been most satisfactory and pleasing. The pupils without exception have been anxious to learn and have made good progress, especially in English. The boys were taught by the principal, assisted by the Rev. A. J. Hall.

The pupils were graded as follows :-

		rupus.
Standard	I	. 0
	II	. 5
"	III	10
"	IV	5
"		
'"	VI	1

Industries Taught.—All the smaller boys have had definite and systematic training in the general housework of the institution. The bigger boys have had regular instruction in the carpenter-shop under Mr. R. Willard, who has also given them lessons in painting and paper-hanging. The institution has been painted inside and outside by the boys and now presents a much nicer appearance. The boys took a

special pride in this part of the industrial work. The laundry work was all done by the boys, under the able management of Miss L. Humphreys.

Farm and Garden.—The flower garden has been tended by the matron and small boys and has produced good results. The vegetable garden has yielded enough fruit and vegetables to supply the school. A good crop of potatoes was raised.

Water Supply.—The water is supplied to the house from a well nearby. It is pumped up by the pupils into a large tank, which is always kept clean. The water is

pure.

Fire Protection.—Four chemical fire-extinguishers, two fireman's axes and twenty-four buckets are kept in places of convenient access.

A fire hose, 100 feet, is kept ready for use. Fire drill is practised in accordance

with the instructions of the department.

Moral and Religious Training.—The pupils are continually taught the necessity and advantage of purity of mind and body. Morning and evening prayers are said in the dining-room and a Bible lesson is given daily to each class. The pupils attend divine service morning and evening on Sundays, and Sunday school in the afternoon.

Health and Sanitation.—The health of the boys this year has been excellent. The sanitary arrangements are satisfactory. A wooden drain carries the water from the

kitchen, bath-room and wash-house to the sea.

Cleanlines is strictly enforced and disinfectants used freely. Ventilation is carefully attended to.

Conduct.—The conduct of the boys has been most satisfactory.

Heating and Lighting.—The school is heated by means of ordinary box-stoves. The kitchen range is still in good repair. It has done excellent service. Coal-oil lamps are all hung from the ceiling.

Recreation.—The secret of success with boys is to give them lots of fun when they are not at work or school. Football has still retained its place as the most popular sport, and they have played with vigour the year round. They have had the added interest of emulation this year, as they have played against other tribes visiting Alert Bay. Rounders is getting more popular. The small boys have been taught croquet and are great enthusiasts. The brass band has been a great source of amusement to the boys, also to visitors to the school. They have given good music and take pains in learning new pieces supplied them. An ample supply of suitable indoor games is kept for wet evenings, for the smaller boys. All the pupils are regularly drilled.

General Remarks.—There is a marked improvement in the general appearance of the school since it was painted and I have to thank the department for supplying the materials. We were pleased to welcome Mr. Green, the inspector sent by the department, and will look forward with pleasure to his next visit. It is always very gratifying to both teacher and taught to be examined by one keenly interested.

I have to again thank Mr. Hall for his kind assistance in the class-room.

I have, &c.,

A. W. CORKER,

Principal.

British Columbia, CLAYOQUOT (CHRISTIE) INDUSTRIAL SCHOOL, KAKAWIS, CLAYOQUOT SOUND, VANCOUVER, ID., June 30, 1905.

FRANK PEDLEY, Esq.,

Deputy Superintendent General of Indian Affairs, Ottawa.

Sir,-I have the honour to submit my annual report for the year ended June 30, 1905.

Location.—The Clayoquot (Christie) industrial school is situated on St. Mary's bay, a cozy cove of Clayoquot sound, on the west coast of Vancouver island. The location is an ideal one, central from the coast, secluded from the nearest Indian reserve, Opitsat, and the Clayoquot trading post, and well sheltered from cold winds. Mail reaches the school by private mail bag direct from Victoria post office.

Land.—The school owns one hundred and seventy-five acres of land, which is covered partly with heavy timber, partly with dense brush; elevated portions of it are rocky, low places are swampy. When cleared, and thoroughly drained, some parts will be quite serviceable for gardens and pasture. Clearing, however, entails heavy expenses, two hundred dollars an acre being a low figure. About two acres are under cultivation. Five acres have been slashed this year by the boys.

Buildings.—Extensive building operations were carried on during the past year. Both ends of the original building, of 40×60 feet, were extended 10 feet each for new entrance halls and staircases; at right angles with each extension, a wing of 32 x 46 feet, was added, one for boys' and one for girls' quarters. These additions have basements with concrete walls, but otherwise correspond in height and style to the old building. The entire frontage is 144 feet, and the depth 52 feet. On the first floor are officers', boys' and girls' entrance halls, parlour, office, Indian-room, kitchen, pantries, store-room, pupils' and officers' dining-rooms, senior and junior class-rooms, separate boys' and girls' recreation-rooms, sewing-rooms, and separate boys' and girls' toilet-rooms. The second floor contains girls' dormitory with adjacent toilet and lavatory, two infirmaries for boys and girls separately, with bath-rooms attached, principal's room, eight bed-rooms and chapel and vestry. In the attic on the third floor are the boys' dormitory, and lavatory with toilet, and two clothesrooms. In the basements are planned gymnasiums and shower-baths.

In the rear of the main building stands the laundry, 14 x 32 feet, and back of it is the wood-shed, 36 x 50 feet, with carpenter-shop and shoe-shop under the same roof. The storehouse, 12 x 18 feet, is a little distance away. There is also a small temporary barn on the premises.

For the use of the industrial instructor and his family a cottage, 24 x 30 feet, has been built. It contains two bed-rooms, kitchen and sitting-room.

Accommodation.—The institution has accommodation for seventy-five pupils and

a staff of eight.

Attendance.—The average attendance for the year was sixty-one, twenty-eight boys and thirty-three girls. Five boys received their discharge; one girl was sent home on account of ill health, one died; four boys and seven girls were admitted during the year. The present attendance is sixty-five, twenty-nine boys and thirtysix girls.

Class-room Work.—This, carried on according to the prescribed programme of studies, has been most satisfactory to teachers and inspectors as well as most creditable to the pupils. Their progress over previous years in the correct use of English, in clear enunciation, in distinct articulation, is very marked. New-comers learn to

27-i-24

speak English in a remarkably short time. Of painstaking application and of lively interest in their studies our pupils seem never to grow weary.

Classification.—At the end of the term the pupils were graded as follows:—

		Boys.	Girls.	Total.
Standard	I	3	. 8	11
"	II		10.	12
. "	III	4	5	9
**	IV	10	5	15
"	V	6	3	9
"	VI	4	5	9
	-			
	Total	29	36	65

Farm and Garden.—Some new ground was broken this spring by the boys and we have about two acres planted and seeded in potatoes, cabbage, cauliflower, carrots, turnips, onions, pease, beans and other vegetables, and small berries. Both junior and senior boys are instructed in gardening. The gardens look well this year. The front lawn is kept tidy and attractive by the sister matron and her helpers. All feed for our stock has to be imported, as we have no meadows as yet, nor fields nor pastures.

Industires—Baking.—Eight boys, in sets of two, kneaded the dough during the year, and eight girls, likewise in turns, baked the bread in the kitchen range.

Carpentering.—Six boys worked at the carpenter's trade this year, some of them having made splendid progress. With their instructor, Mr. J. J. Swain, they put on all the sheeting on the new buildings, did all the rustic work, and shingled the roofs; finishing the interior of the girls' wing is all their work; they also made all the alterations in the old building, removing the old stairs, cutting the partitioning off corridors on all the floors, hanging and fitting doors. Some neat pieces of furniture are also to be credited to their skill. They replaced the rail-fences around the garden, by board and wire fences, put up the tank and flume in connection with the new water service, and kept boats and canoes in good repair.

Dairying.—Three boys were taught milking, and attended to the feeding of our

two cows.

Fishing.—Fishing being the chief source of livelihood of the West Coast Indians, the senior boys are responsible for keeping the institution supplied with fish. They caught canoe-loads of herring this spring.

Laundrying.—The boys are taught to wash their own clothing and they do the heavier work of all the washing; the girls, however, are instructed in all the details

of laundrying.

Net-making.—Instruction in this industry was imparted to the boys by Mr. Swain, they made a seventy-five fathom drift-net since last report.

Painting.—All the painting, staining, and varnishing in the new building was

done, and neatly done, by three boys.

Plumbing.—The work required was attended to by the two apprentices of this trade.

Shoemaking.—In the absence of a competent instructor, work in the shoe-shop was limited to half-soling and mending.

Girls' Industrial Work.—All the girls are trained and assigned tasks, according to advancement and ability, in the different branches of domestic work. An expert cook has a number of girls in constant training. Each and every girl has to pass through regular courses in plain sewing, hemming, darning, plain and fancy knitting, mending, machine sewing, cutting, fitting, and finishing dresses, in crocheting, lacemaking, carpet-weaving, and embroidery. Some girls have done exquisite work in crocheting, which was an object of marvel to visitors. All the girls' clothing and most of the boys' clothing was made at the school.

Moral and Religious Training.—No other feature of our education receives more

conscientious attention than the moral and religious training of the pupils. The discipline is mild, but firm. The pupils are under constant supervision and their conduct is watched most carefully. Religious persuasion is the most effectual means of correction with these children; only once during the year, in fact, for the first time in five years, was corporal punishment resorted to. Religious instruction is given daily for an hour.

Health and Sanitation.—The health of the pupils has been very satisfactory throughout the year. In spring a mild form of grippe passed through the school. One young girl died of consumption and another had to be sent home on account of the same disease. Sewerage is perfect. All precautions are used to insure the health of the children and there is no lack of attention to the perfect sanitary condition of the institution.

Water Supply.—The school enjoys, thanks to the aid of the department, an excellent water service of the purest spring water in abundance.

Fire Protection.—Ten chemical extinguishers, twelve fire-pails, two fireman's axes and one hundred feet of two-inch hose are placed at convenient points throughout the buildings, and the pupils are drilled monthly in their use. Outside fire-escapes provide for safe exit from the dormitories in case of fire.

Heating and lighting.—Heating is done by means of wood stoves. It is the intention of the management to install a hot-water heating plant. Coal-oil lamps are used for lighting.

Recreation.—For all kinds of outdoor exercises and games the sandy beach offers the pupils a splendid playground. The boys enjoy football, handball, jumping, vaulting, foot-racing, marbles, boating and canoeing. The girls have swings, skipping ropes, croquet and ten pins. For the rainy season both boys and girls are provided with a large selection of favourite indoor games. They also have drills and calisthenic exercises.

General Remarks.—In closing, I wish to express my gratitude to Superintendent A. W. Vowell, to Mr. Neill, our energetic agent, and to Inspector Green, for their kind attention to the wants and the interests of the school.

I have, &c.,

P. MAURUS, O.S.B., Principal.

British Columbia, Coqualeetza Industrial Institute, Chilliwack, Sardis P.O., July 31, 1905.

FRANK PEDLEY, Esq.,

Deputy Superintendent General of Indian Affairs, Ottawa.

Sir,—I have the honour to present my annual report for the year ended June 30, 1905.

Location.—This institute is situated on the south side of the Fraser river about four miles from the Chilliwack steamboat landing. Steamers ply daily, except Sunday, between Chilliwack and New Westminster. The institute may also be reached by the Canadian Pacific railway, via Harrison Mills station, where a small steamer connects with the south side of the Fraser, and thence by stage to Chilliwack. Coqualeetza institute is not situated on a reserve.

Land.—The Missionary Society of the Methodist Church holds the land (consisting of ninety acres) in fee simple, for which the institute pays a rental of \$390 per 27—i—24%

annum. The soil is of excellent quality, and large crops are produced consisting of hay, roots and cereals. The farm comprises parts of lots 38 and 297, group 2, in the district of New Westminster, and is within the Chilliwack municipality. Dairying and mixed farming constitute the main occupation of the people of this district.

Buildings.—These are: (1) the main building, containing kitchen, dining-rooms, dormitories, parlours, office, school-rooms, lavatories, laundry, recreation-rooms, clothes-rooms, furnace-rooms and dairy; (2) the primary school building where also the band instruments are kept and band practices are held; (3) the residence of the farm instructor; (4) a long frame building, which includes shoe and carpentershops, wood-shed, root-cellar, a flour-room and a drying-room; (5) three large barns; (6) a granary; (7) a wagon and implement-shed; (8) a bake-house. (9) a hen-house and pig-pens; (10) a water-tank house and windmill; (11) a root-cellar. A beginning had been made to a very much needed residence for the principal; we are exceedingly gratified to learn that the government has responded to our urgent representations and made a grant which will enable us to proceed with this building and bring it to early completion. This will relieve the congested condition of the main building and admit of the work of the institute being carried on much more satisfactorily.

Accommodation.—The main building will accommodate one hundred pupils, and a staff of eight teachers, and now that the principal's residence is about to be completed there will be a couple of rooms for pupil-patients, without which no industrial institution is complete.

Attendance.—One hundred and seven pupils have been in attendance during the year; the average has been seventy-seven plus; seventeen have been admitted and twenty-one discharged. Present enrolment, eighty-six; fifty-five boys and thirty-one girls.

Class-room Work.—The hours of study and recreation in the school-room are from 9 a.m. to 12 noon, and from 1 to 4 p.m. The diligence and progress of the pupils have been highly satisfactory. In proof of this we have pleasure in referring to the fact that three of our pupils offered themselves as candidates at the entrance examinations for admission to the high schools of the province last midsummer, and that two passed. At the Chilliwack Centre examination where our three pupils applied there were forty-one candidates representing twelve schools; out of these only five passed, two of whom were our pupils. More than this: of the two hundred and eighty-three successful candidates in the whole province, only twenty-one of these had higher marks than our best pupil. This fact may indicate the capacity of cur pupils, and the ability of our teachers as instructors. The grading of our pupils for the past year is as follows:—

		Pupils.
Standard	I	13
"	II	10
"	III	19
"	IV	24
"	V	17
"	VI	24
	·	
	Total	107

Twelve girls and two boys are receiving music lessons regularly. Eight of these are sufficiently instructed to take their turns in leading our services of song at the organ.

Farm and Garden.—The yield of farm and garden for the past year was quite satisfactory. Some of the principal items of production were as follows:—oats, nineteen and three fourths tons; pease, six and one-half tons; pease and oats, mixed crop, two and one-eighth tons; potatoes, thirteen and one-half tons; turnips, seventy-

five tons; mangolds, fifty tons; cabbage, two and one-fourth tons; beets, thirteen hundred pounds; onions, two thousand seven hundred and sixty pounds; apples, three tons and fifty-three pounds; small fruit in abundance; produce of the dairy of twelve cows, \$711.83; live stock sold, including cows and hogs, \$773.64.

Industries Taught.—We first aim to make our pupils expert in ordinary general work, and then instruct them along special lines. Especial attention is paid to farm work and particularly dairying, an industry which is growing to large proportions in British Columbia. Five boys have received instruction in carpenter-work during the past year, and four in blacksmithing. Only the very strongest boys can stand the blacksmithing work. Besides these trades, several of the boys are trained in painting; some in tinsmithing and plumbing. Several of the boys are set apart to learn baking, at which they attain creditable proficiency. No less than nineteen boys have been employed in milking and the care of cows during the year; and ten boys have been appointed to the care and handling of horses. In the laundry the boys are taught to wash their own clothing; the girls also on their own special days do their own washing and ironing. The girls do the mending of clothing as it comes up from the laundry from week to week; they also make such garments for the use of the pupils as they are able. Their work in this respect is limited by the claims of other duties, and their limited numbers.

Moral and Religious Training.—Our care in this department is to impress upon the pupils a sense of the supreme importance of the moral and religious character. All the duties of religion must be conscientiously observed. On no account (sickness excepted) may absence from prayers or religious services be excused. Prayers on rising and retiring; family prayers morning and evening with singing and reading of scriptures; Sabbath school, Sabbath a.m.; preaching services Sabbath p.m. and evening; religious classes Monday evening; weekly meeting for prayer on Thursday evening; such are the means used to keep alive in the minds of the pupils a sense of our dependence upon God and the duties we owe to Him. We sedulously inculcate that for the formation of right character with its outcome of a right life, the institution chiefly exists; that right living is more important than mathematices or geography or history. We are happy in the pleasing evidences which the lives of most of the pupils supply that the faithful training they receive is blessed of God to the production of a true spiritual life.

Health and Sanitation.—The health of the pupils for the early part of the year was exceptionally good, and we hoped that it would continue so. But after the new year we were visited with an epidemic of grippe which proved very severe, entailing heavy outlay for medical skill, and special help for nursing. Happily every case of sickness recovered. A serious accident occurred in which one of our biggest boys cut himself with the pocket-knife with which he was whittling a fishing-rod. The knife severed the main artery of his left leg, from which the bright arterial blood flowed in life-wasting spurts. The accident must soon have terminated fatally but that the boys standing by had studied their physiology to good purpose. They knew what to do, and had courage and presence of mind to do it. They improvised a tourniquet, pressing into service the handkerchiefs and shirts, and twisting them into knots above the wound by the aid of a stick, checked the hemorrhage, and so saved the life of their fellow-pupil. They carried him to the house, and the surgeon was summoned who declared that he must have bled to death on the spot but for wise and prompt action. Though a traumatic aneurism ensued which required a serious operation and hospital treatment and a lingering trouble from which the patient has not yet entirely recovered, this does not at all detract from the credit to which the boys are entitled for their skill and promptness at a time when but for their well directed efforts the life of Jasper would have been numbered by minutes.

Water Supply.—The Luc-uc-uck river flows through the farm, affording an abundant supply of good water for the stock, and an inexhaustible supply for house use and for fire-protection.

Fire Protection.—This is afforded in the following conditions: a brick building, hot-air furnace, with the main flues built of brick, the furnaces in the basement and the heating stoves in the laundry are on floors of cement; the baking is done in a detached bake-house. The means of extinguishing incipient fires consist of a good supply of water in the tanks, available by taps on the different floors; water kept in barrels and buckets in the halls; a well, furnished with force-pump and an attachable hose; a supply of water buckets kept at easily accessible points; 'Carr' and 'Patton' chemical engines supplied by the department, and a fire company organized and drilled with a view to effectiveness in case of fire. The building is provided with fire-escapes from the dormitories, in the plan of the building, exit is made easy by halls and means of transit from one portion of the building to another. Besides these there are fireman's axes, supplied by the department, placed in the care of the teachers at points where they might be of most need. Older pupils are appointed to the care of the different dormitories, whose duty it is to remove the smaller children from the building on the very first alarm of fire.

Heating and Lighting.—The building is heated by means of the 'Smead-Dowd' system of hot-air furnaces, of which we have two in use. Our building is now lighted with acetylene gas, which proves very satisfactory. We are glad to have been able to

dispense with coal oil as a means of lighting.

Recreation.—Amusements have their seasons in the favour of the boys. Even such homely and quiet ones as marbles, tops, stilts, and kite-flying have their day. But of all seasons in our climate and sustained power to gratify, the football holds highest place. Other forms of recreation may please for a time, but always the return is to football. The band, too, affords entertainment for many an hour when the boys confess subjection to music's charms. The girls delight in croquet and basket-ball. Occasional picnic parties in the hot weather a few miles from home constitute an agreeable variation from the hum-drum and monotony of school life. As long as a spirit of contentment reigns, as it happily does, it is not hard to provide delightful diversion in simple pleasures that always please.

General Remarks.—Another busy year has closed; a year of mercies and successes, in which a considerable number of new pupils has been received under our care, and during which many have been sent forth to prove the value of the instruction which they have received. From many quarters there have come to us very gratifying testimonies of appreciation of our efforts; pleasing tidings too, of what our expupils are doing. One in a busy life finds time and has the desire to engage in efforts to do good to his people by preaching to them the gospel of the Son of God; another teaches a mission school, who last year passed the entrance examination to the high schools of the province. Still another has accepted invitations to conduct preaching services, which he did with great acceptance. We are rejoiced to know, from all we learn of our ex-pupils, who number two hundred and sixty-six, that most of them are doing well. May all at last hear the words of approval from the lips of the Great Master: 'Well Done.'

I have, &c.,

JOSEPH HALL, Principal.

BRITISH COLUMBIA,
KAMLOOPS INDUSTRIAL SCHOOL,
KAMLOOPS, July 14, 1905.

FRANK PEDLEY, Esq.,

Deputy Superintendent General of Indian Affairs, Ottawa.

Sir,—I have the honour to forward my annual report for the year ended June 30, 1905.

Location.—The Kamloops industrial school is situated at the foot of St. Paul's mountain, on the northern bank of the South Thompson river. It is in the immediate vicinity of the Kamloops reserve, and about two miles from the town of Kamloops, which is a divisional point of the Canadian Pacific railway.

Land.—The area of land belonging to the school comprises three hundred and twenty acres, surrendered by the Indians of the Kamloops reserve for the purposes of the industrial school. Of this land, about fifteen acres are under cultivation in fields, garden and orchard; the remainder consists of sandy hills and broken land suitable, only for grazing, and of low-lying land, which in the spring is transformed by the overflow of the river into a beautiful sheet of water. There is no natural grass to be cut for hay, nor is there any timber available for fuel.

Buildings.—The main building contains on the ground floor the parlour, office, dining-room for the boys, kitchen, pantry, and the laundry with four bath-rooms and the bake-oven. The second story contains the girls' class-room and the chapel. To the right is the girls' house, containing sewing and recreation rooms, dining-rooms for the sisters and girls, and dormitories. To the north, about one hundred feet from the main building, is the boys' home, which contains store-rooms, recreation-room, lavatory and dormitory. The boys' class-room is a separate building, about fifty feet from the boys' home.

The outbuildings consist of the carpenter and shoe-shops, two stables and barn, cellar, hen-house, ice-house, three-room cottage, at present unoccupied, girls' summer-house, windmill and tank-tower. The buildings are in good repair, though some need repairing, which will be done next fall.

Accommodation.—The school can accommodate sixty pupils and the necessary staff.

Attendance.—At the end of the year, twenty-eight boys and twenty-eight girls were in attendance. One boy and six girls were regularly discharged; one boy was temporarily discharged, owing to bad state of health. Four boys and eight girls were admitted, the average attendance was about fifty-six. Many applications for admission were made during the year, but could not be entertained.

Class-room Work.—The school hours for the boys were in the morning from a quarter to nine till twelve o'clock, every week-day, except Saturday; and in the afternoon of every week-day, from a quarter to five till a quarter past six. The progress of the boys has been highly satisfactory this year, owing to the efficient teaching of Sister M. Paula. The school hours for the girls were from two to five o'clock in the afternoon, with half an hour's study in the evening.

At the end of the year the pupils were graded as follows:-

		¥ - 1	Ü	•	Pupils.
Standard	I				 13
"	II				 6
"	III				 8
"	IV				 15
"	v				 5
"	VI				 9
	Total				 56

Farm and Garden.—We have about four acres of land, protected by a dyke against the overflows of the Thompson river. They yield a sufficient supply of roots and vegetables for the institution. Kamloops being situated in the dry belt of British Columbia, the work of irrigation usually takes up a great deal of time; but this spring, the circumstances have been still worse than usual. The fall of snow was very light in the winter, and there was hardly any rain in the spring. The creeks and lakes from which the Kamloops Indians get their irrigation water were nearly dry, so that we could not get any water from their ditch. We removed the gasoline engine and centrifugal pump from the upper field to the garden, but we could not use it till late in the spring, owing to the water being extremely low in the river. We removed also the horse-power pump from the garden to the orchard, but the pond was nearly dry. However, all these difficulties were overcome at last, and at the present time we obtain all the water we need by means of the engine and horse-power pumps. The crops look well in the garden; but the oats and wheat, sowed for hay, failed to grow, and even the alfalfa was very light. The fruit-trees have also suffered from the drought. All the boys work in the fields and garden; they milk the cows and attend to the stable work in turn, outside of the regular work-hours, which are from 1 to 4 o'clock p.m.

Our stock consists of four horses, six milch cows, one heifer, one bull and six calves.

Industries Taught.—Carpentering.—Eleven boys received instruction in this trade. They built a staircase for the new dormitory, an addition to the wood-shed, a shed for the engine and a large windmill. They made furniture, such as a press for musical instruments, a desk for the boys' teacher, a portable black-board, a cabinet for gramophone records, and they attended to all repairs of machines, tools, &c.

Shoemaking.—Six boys were employed in the shoe-shop; their work consisted in

repairing shoes and harness.

Painting.—Some of the boys painted the new staircase and the porch of the new class-room, and also the office.

Baking.—Nine boys were employed in turn in doing the heavier part of the

work, and the rest was done by the girls.

Girls' Work.—The girls do the cooking and washing, and learn all the branches of housekeeping. Besides the help they give for the general baking, they are made to go through the whole process of making bread on a small scale in the kitchen stove-cven. They are taught hand and machine sewing and the making of lace. They make all their dresses and underwear, and also shirts, drawers and trousers for the boys. The girls are clean, tidy and industrious, and great credit is due to the Sisters of Ste. Anne. who have them in charge.

Moral and Religious Training.—We keep constantly before the mind of the pupils the object which the government has in view in carrying on the industrial schools, which is to civilize the Indians and to make them good, useful and law-abiding members of society. A continuous supervision is exercised over them, and no infraction of the rules of morality and good manners is left without due correction. On the whole, the conduct of the pupils has been very good during the year. Religious instruction is given almost daily for half an hour, and for a longer time on Sundays.

Health and Sanitation.—The general health of the pupils has been very good. Four boys had a slight attack of influenza in the winter. The only serious case was that of a boy who showed some symptoms of consumption, after having recovered from the influenza. He was temporarily discharged upon the doctor's advice. The sanitary condition of the school is very good.

Water Supply.—Good water is supplied to the house from the river. The pump is operated by a three-horse power gasoline engine, and the water is kept in a tank placed near the kitchen. The tank is lined inside with galvanized iron and covered all around with saw-dust, thus the water is kept fresh and pure from all pollution.

Fire Protection.—The fire-appliances on hand are as follows:—1. Three chemical extinguishers and two fireman's axes. 2. Three strong ladders, permanently attached to the principal buildings and a few smaller ones kept in proximity to the buildings. 3. About two dozen buckets. 4. Two tanks; one of a capacity of eighteen hundred gallons, with three taps, and the other of a capacity of about twelve hundred gallons, placed on a tower, thirty feet high. There are one hundred feet of rubber hose, which can be attached to any of the three hydrants placed at convenient points, so that a stream of water may be directed to any part of the building. These tanks can be filled in less than an hour's time by means of a bull-dozer pump, which is operated with a three-horse power gasoline engine.

Heating and Lighting.—Ordinary box stoves are used for the purpose of heating, and all the fire-wood has to be purchased and brought down from Shuswap, distant thirty miles from Kamloops. Coal oil is the only means of lighting, but tallow candles are used, when it is necessary to move the light from one room to another.

Recreation.—The pupils have half an hour of recreation in the morning, half an hour after dinner, and in the evening, from half-past six till bed-time. On Sundays and holidays, they enjoy a quiet walk or a drive in the wagons. They indulge in the ordinary amusements suitable to their age and sex. Some are fond of reading story-books, but all seem never to tire of listening to the gramophone or the phonograph. The boys have taken up again the practice of instrumental music, and they have made very good progress under the direction of the foreman.

General Remarks.—We had during the year the honour and pleasure of a visit from the Indian Superintendent, and the Right Reverend Bishop of New Westminster; several other distinguished persons visited the school also, and all expressed their satisfaction with the progress and general appearance of the pupils.

In closing this report, I wish to express again my high appreciation of the interest taken in our school by Superintendent Vowell, and to tender my sincere thanks to Mr. A. Irwin, our worthy agent, for his kindness and promptness in attending to all matters connected with the institution.

I have, &c.,
ALPH. M. CARION, O.M.I.,
Principal.

British Columbia, Kootenay Industrial School, St. Eugene P.O., June 30, 1905.

Frank Pedley, Esq.,
Deputy Superintendent General of Indian Affairs,
Ottawa.

Sir,—In accordance with circular dated May, 1905, I beg respectfully to submit my annual report of the Kootenay industrial school for the fiscal year ended June 30, 1905.

Location.—This school is situated near the south bank of the St. Mary's river, adjoining the reserve, and is about five miles from the town of Cranbrook. The location commands a good view of the surrounding hills and mountains and is both pleasant and healthful.

Land.—The land in connection with the school consists of twenty acres laid out as follows: two acres vegetable garden, two acres orchard, two acres potatoes, five acres grain-field, five acres meadow, four acres for buildings and playgrounds. This land, the property of the Oblate Fathers, was surrendered to the department to be used for school purposes. Besides, one hundred and sixty-eight acres are rented from

the Sisters of Charity for the benefit of the school. This is mostly pasturage and hay-land. The soil is not very fertile, but with the proper amount of irrigation, excel-

lent crops can be raised.

Buildings.—Three separate frame buildings are used for school purposes. The main building is occupied by the staff and contains parlour, office, dining-rooms, kitchen, pantry, bed-rooms and chapel. The girls' and the boys' houses to the right and left of the main building, are of the same size and laid out in a similar manner. Each has on the first floor, school-room, recreation and sewing-room, refectory, ward-robes, bath and toilet-rooms. The second floor is occupied by the dormitories, toilets and wardrobes. The installation of the waterworks caused many repairs to be made about the dormitories. The baths and toilets are fitted up according to the most improved method. The outbuildings are: laundry and bakery, storehouse, foreman's residence, carpenter-shop, barn, stables, hen-house, pig-pen and woodshed.

Accommodation.—The buildings are large enough to provide good accommodation

for sixty-five children and the staff necessary to carry on the work.

Attendance.—The attendance was very regular, as all the pupils are boarders. The

average number on the school roll was fifty-one.

Class-room Work.—This was carried on by three teachers in separate rooms. The school hours for the boys were in the morning from 8 to 11.15, with an hour's study in the evening. The girls attend school from 1 p.m. to 4 p.m. every day, and study an hour each evening. The progress has been most satisfactory, the pupils, with few exceptions, show a great desire to learn and the advancement has surpassed that of former years. The subjects taught are those prescribed by the department, viz.: reading, writing, spelling, arithmetic, geography, grammar, composition, history, calisthenics and singing. The boys are given half an hour's practice daily in band music. At the close of the year the pupils were graded as follows:—

			Pupils
Standard	l I	 	 3
"	II	 	 8
. "	ш	 	 21
	Ι∇	 	 5
. "	V	 	 11
. "	V1	 	 2

Farm and Garden.—All the boys receive instruction in farming; the younger ones doing the lighter work and working only half time. The crop of last fall consisted of seventy-five tons of hay, eight tons of oats, nine tons of potatoes, and vegetables of all varieties, sufficient to supply the school for a whole year. Our garden is now in a flourishing condition owing to the abundant rains and excellent irrigation system. The orchard contains about one hundred and seventy fruit-trees, mostly apple. Several of these are old enough to bear and yield a prolific supply of fruit. The small fruit consists of some fourteen hundred strawberry plants, forty raspberry bushes, and forty-eight gooseberry and currant bushes.

Industries Taught.—The boys are given a practical knowledge of agriculture in its different branches, such as ploughing harrowing, seeding, transplanting, irrigating, and harvesting. They are also taught to care for the stock and manage the horses. Under the direction of the foreman or carpenter, they build the fences, renew the sidewalks, and do whatever glazing, painting or repairing is needed about the

place.

Girls' Industrial Work.—The girls attain great proficiency in the use of the needle and sewing-machine. They are first taught plain sewing, darning and knitting, after which they are taught to cut, fit and make their own clothing. Three hours each day are very profitably devoted to this industry, and several dozens of dresses, aprons, skirts, shirts and numerous other articles of clothing are made yearly. Besides this, the girls mend their own and a part of the boys' clothing and knit many pairs of stock-

ings. Under the direction of a sister, they attend to the general housework, each taking her turn at kitchen, laundry, bakery and dairy. Gardening is carried on by them, but on a small scale. A portion of the garden attached to their playground has been set apart for this purpose and in it they raise vegetables and small fruits.

Moral and Religious Training.—Special attention is given to this most important branch of education. Half an hour each day is devoted to the study and explanation of Christian doctrine. The pupils are continually under the surveillance of a member of the staff and every opportunity is taken to instil into their minds the

necessity of leading virtuous and useful lives.

Health and Sanitation.—The health of the pupils during the term just closed was decidedly good, in fact better than in preceding years. No sickness of any amount prevailed amongst them. This is no doubt due to the good ventilation of the buildings

and the excellent sewer system laid in connection with the water-works.

Water Supply.—Aided by a generous grant from the department, we were enabled to instal a good system of water-works. The water is brought in pipes from a creek about six hundred yards distant. These pipes are laid between five and six feet under ground, which, to a great extent, removes the danger of freezing. So far, this has been a complete success, we have always on hand an abundant supply of good water, which lightens the housework, by doing away with pumping, hauling and heating the water.

Fire Protection.—Chemical fire-extinguishers, buckets, ladders, and axes are stationed at convenient places throughout the buildings. There are two stand pipes, connected with the main pipe, to which a hose can be attached in case of fire.

Heating and Lighting.—All the heating is done by means of wood stoves. The boys haul, saw, and split all the wood used by the school. The lighting is done by

means of coal-oil lamps.

Recreation.—In fair weather, the children spend the greater part of their recreation hours outdoors. The boys' favourite games are football, baseball and marbles. They are often given walks and are allowed to go hunting, fishing and swimming in season. During the winter months, they amuse themselves with hockey, coasting, skating and numerous indoor games, of which they never seem to tire. They are especially fond of the gramaphone or the magic lantern, and many evenings are spent with picture and story books. They were greatly interested in reading the accounts of the late war, which our agent, Mr. Galbraith, kindly sent to them. Nine pupils, boys and girls, are now regular subscribers to children's papers.

General Remarks.—It is a pleasure for me to state that this has been in every respect a most successful year. The pupils have been healthy, cheerful and very happy in school.

Last March, our inspector, Mr. Green, favoured us with his first visit. He remained two days visiting the different apartments and examining the children in their studies. On leaving, he expressed himself as being well pleased with the general condition and progress of the school.

In conclusion, I wish to tender my sincere thanks to the department for the generous grant given us for the water-works; also to our superintendent, inspector and agent for their faithful co-operation in all that regards the interest and welfare of the school.

I have, &c.,

N. COCCOLA,

Principal.

British Columbia, Kuper Island Industrial School, Kuper Island P.O., July 3, 1905.

FRANK PEDLEY, Esq.,

Deputy Superintendent General of Indian Affairs, Ottawa.

SIR,—I have the honour to submit my annual report for the year ended June 30, 1905.

Location.—The Kuper Island industrial school is situated on Telegraph bay, on the southwest side of Kuper island, about five miles from Chemainus station on Vancouver island. The surroundings of the school are magnificent, the sea and evergreen forest adding to the attractiveness of the locality.

Land.—The seventy acres in connection with the school were surrendered by the Penelekut Indians and form part of the Kuper Island reserve. The land is good and suitable for mixed farming. Several fields have been cleared of stumps and drained

with tiles.

Buildings.—All the buildings, which are eighteen in number, are kept in good re-

pairs. The boys and the girls occupy separate buildings.

The main building contains, on the ground floor, parlour, office, boys' dining-room, kitchen, pantry and girls' dining-room. On the second floor are the girls' school room, the music-hall, the chapel and two guests' rooms. The girls' home comprises, on the lower floor: sewing-room, infirmary for girls, store-room, recreation-room and parlour for matron; on the upper floor, girls' dormitories, linen and bath-rooms and bed-rooms for the female members of the staff. The boys' home is divided on the ground floor as follows: boys' infirmary, teachers' room, store-room, band-room, lavatory and bath-rooms, boys' play-hall and school-room. On the second floor, are linen-room, boys' dormitory and bed-rooms for the male members of the staff.

The outbuildings consist of a cottage for the foreman, a gymnasium with root house underneath, laundry and dry-room, bakery, barns, hen-house, boat-houses, shops for carpenter and shoemaker, wood-sheds, house for hydraulic ram and elevated tank.

Since my last report the foreman and his apprentices built an addition 23 feet wide by 16 feet long and 18 feet high to the girls' home, containing on the ground floor parlour, 15 x 12 feet high; dining-room, 13 x 9 feet, for the sisters; on the second floor are two rooms, 10 x 8 feet, and one 13 x 8 feet, used by the teacher, assistant matron and cook. The girls' play-room and dormitory were also enlarged to the extent of 22 x 16 feet.

Accommodation.—There is room at the school to accommodate seventy-five pupils

and a staff of eight officers.

Attendance.—During the year sixty-eight pupils were inscribed on the roll. The average attendance has been over fifty-nine; nineteen were admitted, and thirteen received their discharge. At the end of the year sixty-three pupils were in attendance, of whom thirty-three are boys and thirty are girls.

Class-room Work.—The school hours for the pupils were from 8.45 a.m. to 12 noon, in the afternoon from 5 to 5.45 p.m., with one hour study in the evening. The

progress made in the class-room was very satisfactory.

$\mathbf{A}t$	the end of	the year the	pupil	ls wei	e gr	aded	as f	ollow	78 :	-

													٠.	
		Total												63

Farm and Garden.—All the senior male pupils are taught farming, whilst the younger boys take care of the flower and vegetable gardens. This year we have about forty acres under cultivation and all the crops look very promising.

Our live stock consists of one span of horses, twelve cows, one bull, three calves,

three pigs and about one hundred and thirty fowls.

Boys, Industrial Work.—Carpentry.—Mr. Engelbert Schnee is our new instructor in carpentry and, with his four apprentices, finished the new addition to the girls' home, built a lean-to to the barn and made considerable new furniture, besides attending to all repairs.

Shoemaking.—The six pupils who learn this trade take a deep interest in their work, their instructor, Mr. J. M. Read, is well satisfied with their progress. They supplied all the pupils with substantial footwear and did a considerable amount of work for the neighbours.

Painting.—Two boys had charge of all the painting and three boys looked after the whitewashing.

Baking.—This branch is under the supervision of two boys, who are assisted in preparing the dough by four senior boys.

Dairying.—Two boys superintend this department, they work the cream-separator morning and evening, attend to the churning and have made excellent butter. The milking is done by five other boys.

Laundrying.—The senior boys and girls under the supervision of the matron attend to all the work.

Girls' Industrial Work.—The girls have made wonderful progress in the sewingroom, they are very attentive to their work and are quite expert in hand and machine sewing, dressmaking, crocheting, knitting, mending and darning. Their fancy work, of which they have quite a collection, always elicits great praise from the many visitors who have called at the school. In turn, they receive instruction in general house and kitchen work.

Moral and Religious Training.—Half an hour's religious instruction is daily imparted and the strictest attention is paid to the morality of the pupils. I am pleased to state that their behaviour throughout the year has been very satisfactory.

Health and Sanitation.—The general health of the pupils has been very good. No deaths occurred during the year, however, a few children suffered from scrofula and two from incipient tuberculosis. The sanitary condition of the school is excellent and the buildings are properly ventilated.

Water Supply.—There is at all times an abundance of pure fresh water, supplied from natural springs. By means of an hydraulic ram the water is forced into a large

tank, from which it is conveyed throughout the buildings.

Fire Protection.—The pupils are regularly drilled in the handling of ladders, hose and fire-buckets, as well as in the operating of the fifteen 'Star' chemical fire-engines. There are permanent fire ladders on the roofs of the buildings and small hydrants inside and outside the buildings.

Heating and Lighting.—All the heating is done by common box-stoves. Lighting is supplied from an acetylene plant, which was installed last winter. There are forty jets and the cost of material and installing the same was two hundred dollars. The light is all that can be desired and so far the plant has given entire satisfaction.

Recreation.—Amongst the great varieties of games in which the boys indulge, football and baseball, marble-playing, swimming, fishing and boating during the summer, and coasting, chess and checkers during the winter, are the principal ones; but the most attractive of all the amusements of the boys is our brass band. The girls in their own playground enjoy themselves at swinging, skipping and playing ball; club-swinging and calisthenic sports take place in our gymnasium.

Remarks.—In the month of January, Mr. Henry Butsch resigned his position as trades-instructor and leader of the brass band. He has been succeeded by Mr. E.

Schnee, who is a skilful mechanic and a competent musician.

In closing my report I take much pleasure in thanking Superintendent A. W. Vowell, Agent Robertson and Inspector A. E. Green for the courtesy and assistance which they have, on many occasions, tendered us.

I have, &c.,

G. DONCKELE,

Principal.

BRITISH COLUMBIA,
LYTTON (St. George's) INDUSTRIAL SCHOOL,
LYTTON, July 17, 1905.

FRANK PEDLEY, Esq.,

Deputy Superintendent General of Indian Affairs, Ottawa.

Sm,—I have the honour to submit my annual report for the fiscal year ended June 30, 1905.

Location.—The school is situated two and a half miles from Lytton, which is on the main line of the Canadian Pacific railway, and is on the east of the Fraser river, about half a mile from the river and two hundred and fifty feet above. The Lytton-Lillooet road passes close by the building.

Land.—We have about six hundred acres of land, lots eleven and twelve, and forty-seven, group one, Yale district, and the rest Dominion government lands, and have applied for one hundred and sixty acres more, on which latter we have placed

our large dairy barn.

The soil is sand, sandy loam and clay, well suited for mixed farming and gardening. We have this year an additional seven-acre plot on which we have fine crops of potatoes, barley, corn and melons, and a triangular plot of three acres near the school, well fenced and in oats. All properties are owned by the New England Company.

Buildings.—The school building is in good repair. Since last report we have laid down cedar drains to down-spouts. The blacksmith-shop is finished and well provided with tools, and we have found it of especial service in repairing machinery and farm implements, &c. The building is 18 x 24 x 10 feet. We have added two more pig-sties also to our list of buildings, 12 x 15 x 6 feet.

The boys have been building a house for poultry, made all of hewn timbers,

framed, and by themselves without help from the carpenter.

The buildings comprise the school building, which contains two class-rooms, dining, hat and cloak-room, kitchen, pantries, chapel, dormitories, bath-room, lavatories, stores, carpenter's and shoemaker's shops, furnace-rooms, laundry and private apartments for staff.

There are three barns, hose-stable, cattle-sheds, pig-sties, poultry-houses, farm-house, blacksmith-shop, log houses for carpenter and Indian farm-hands, and root-houses and stone dairy.

Accommodation.—There is accommodation for forty boys and a staff of four.

Attendance.—We have at present twenty-three boys; two are absent on account of scrofulous sores and two have been discharged, one as physically unfit and one as untractable.

Class-room Work.—The school hours are from 9 a.m. till 12 noon, and from 7.30 to 8.30 in the evening.

The subjects taught are reading, writing and arithmetic, singing, grammar, geography, and English and Canadian history.

Farm and Garden.—I am again able to report a great advance in these. Everything is in abundance, garden stuff being very fine. It has taken hard and constant work to have everything in such good condition; the season has been favourable and my boys are clever.

Industries Taught.—Farming, gardening, fruit-growing, blacksmithing and carp-

entering are our chief industries.

Moral and Religious Training.—Besides our daily prayers in chapel, we have instruction in scripture history, two services on Sundays, and an hour for church catechism in the afternoon. We are well supplied with books,—a grant from the Society for Promoting Christian Knowledge. The children always follow attentively the daily readings of the scriptures, and I have found this to be also of the greatest assistance in general reading and in their short compositions and letter-writing.

Health and Sanitation.—The health in general has been good, but we had a troublesome attack of sore eyes which we found difficult to get rid of. Our sanitary

arrangements have given no trouble.

Water Supply.—Water is obtained by gravity from Botanie creek, and from a spring, and is laid on to the school from a tank, 23 x 12 x 7 feet, placed one hundred

and twenty-five feet above the base of the building.

Fire Protection.—An inch and a half pipe, perforated every six inches, runs round the peaks of the roof, two fire-escapes are placed at the north and south dormitories, four wire-bound rubber hose and taps wormed for these are near each room, and buckets and axes are always on hand.

Heating and Lighting.—The heating is by hot-air furnaces, and lighting by coal oil, mostly angle lamps well placed, and only lanterns are carried about the build-

ings.

Recreation.—The children are provided with footballs, and others, and play very hard at many of their own games. For winter evenings we have a good supply of chess, dominoes, and draughts. They get a little fishing in Botanie creek, and an occasional outing with guns in the season.

I have, &c.,

GEO. DITCHMAN,

Principal.

British Columbia, Metlakatla Industrial School, Metlakatla, September 12, 1905.

FRANK PEDLEY, Esq.,

Deputy Superintendent General of Indian Affairs, Ottawa.

SR,—I have the honour to submit the following report for the year ended June 30, 1905.

Location.—The school is situated in the village of Metlakatla, on the west side of the Tsimpsean peninsula, near to Kaien island, the probable terminus of the Grand Trunk Pacific railway. The view from the buildings on all sides is extensive and pleasantly diversified.

Land.—The area is only six acres, but that, though small compared with what belongs to other kindred institutions, is more, situated as this school is, than can be utilized without an outlay which would not be likely to bring any adequate return. The land requires much labour to bring it into a state fit for cultivation.

Buildings.—These are as follows: The main building of the boys' division. It contains on the lower floor a parlour, office, infirmary, kitchen, sewing and storerooms. On the upper floor, the principals' bed-room and eight small dormitories, all of which are used by the boys and supervising staff.

The main building of the girls' division, occupied by the girls, the matron and two assistants, is a substantial and commodious wooden structure, plastered inside. The rooms on the first floor are: reception, class, dining and cloak-rooms; also pantry, lavatory, kitchen and store-rooms. On the second floor are: the matron and her assistants' rooms, two large dormitories, a room used as an infirmary, and one for clothing. Above these is a half story with attics. In the basement there is a large room. There is also a laundry attached to the main building.

The other buildings are: a school-house in which the different classes are taught; a building divided into laundry and store, carpenter and shoe-maker's shops; also a

small stable, a house for poultry, one for coal, a woodshed and closets.

Accommodation.—The accommodation in the boys' division was scarcely sufficient. The number in residence having increased to thirty, the room formerly reserved for hospital use had to be used as a dormitory.

Attendance.—The government grant for the year ended June 30, 1903, made provision for the maintenance of fifty pupils. Last year (1904) the grant was for sixty;

thirty boys, and an equal number of girls.

During the June quarter, thirty-one boys and thirty-three girls were in attendance, and an average of about sixty-two was maintained for the year, except during the fishing season, when most of the boys went out to assist their parents at the canneries.

Class-room Work.—The boys were taught by the principal, and the girls by Miss Jackson, a lady missionary.

The subjects of instruction were reading, arithmetic, geography, grammar, history, composition, drawing and religious knowledge. Fair progress was made.

The classification at the end of the year was as follows:-

		*	Pupils.
Standard	I		. 5
	П		
	IV		21
"	V		16

Industrial work.—Fourteen boys received instruction in carpentry and painting. They were employed under the direction of Mr. P. Haldane, making repairs and alterations in buildings, and strengthening foundation work, erecting fences, repairing furniture, making new steps to school, painting buildings and fences; and also extending our garden by grubbing, trenching, levelling and clearing new land.

Two of the pupils did the shoe-mending. All the boys were at times employed at

gardening.

Girls' Work.—The girls were taught housework, baking and cooking, laundry and needlework, dressmaking and crocheting. The elder ones show considerable profi-

ciency in cutting and making the children's dresses.

Garden.—This year a small garden for the use of the girls' division was fenced in and cultivated. The garden connected with the boys' school has been considerably enlarged, and well fenced in. Everything in it, excepting fruit-trees, grows remarkably well.

Moral and Religious Training.—The employees of the school try to impress upon the pupils the importance of being civil and obedient, kind and obliging, truthful and honest. Religious instruction is given daily, and all the pupils attend the church services and school on Sundays.

Once a week in each of the school-rooms, the Reverend J. H. Keen, took the teacher's place, during the time set apart for Bible lessons.

Health and Sanitation.—The health of the pupils up to the end of February was good; but since then it has not been so. One girl died of meningitis, and one boy, who had pleurisy, was taken out by his mother, and about two months afterwards died at home. That, however, was the only death among the boys during a period of six

Three or four of the children showed scrofulous symptoms, and a few others had minor troubles. The buildings are well ventilated; and the drainage is in fair condition.

Water Supply.—The rain which falls on the buildings is conveyed into seven large tanks, the aggregate capacity of which is nearly ten thousand gallons. tanks are often cleaned out. This summer, during the long continued dry weather, the water supply was insufficient.

Fire Protection.—The Metlakatla Indians have a good pump and hose, kept in a small building near this school, and whenever there is any alarm of fire, they and the pupils of this institution, render each other every assistance. The school too, has sixteen chemical fire-extinguishers, two fireman's axes, and three ladders; and the boys through frequent practice can handle these appliances quickly and efficiently.

The main buildings are covered with metal shingles, and the chimneys are fre-

quently swept.

Heating and Lighting.—The rooms are heated by means of coal and wood stoves, and lighted with coal oil.

Recreation.—Archery, swimming, boating and fishing, with foot and base ball, are the principal pastimes of the boys. Out of doors the girls amuse and exercise themselves, skipping and swinging. They are also every day, weather permitting, taken out for a good walk. Indoors they, and the boys also, employ their spare time, reading, singing, or playing some game, such as lotto, dominous or crokinole.

The Rev. J. H. Keen assisted both the boys and girls to pass a pleasant evening in each week, by exhibiting views with a magic lantern, and by giving a short popular

At times, Mrs. Keen kindly read for the entertainment of the boys.

General Remarks.—Reports received show that the conduct of ex-pupils, with few

exceptions, has been satisfactory.

The extension of the Grand Trunk Pacific railway to this coast will I have no doubt open up for many ex-pupils suitable sources of employment. The knowledge of English which they acquire and their general training in this school will help them greatly to make themselves useful.

Teaching in the Sunday school was carried on under the efficient superintendence of Miss West and other ladies. Miss R. M. Davies has for more than three years kindly devoted her time to the care and management of the girls without any salary.

I have, &c.,

JNO. R. SCOTT.

Principal.

BRITISH COLUMBIA.

WILLIAMS LAKE INDUSTRIAL SCHOOL, 150 MILE HOUSE P.O., July 20, 1905.

Frank Pedley, Esq.,

Deputy Superintendent General of Indian Affairs, Ottawa.

Sir,—I have the honour to submit my annual report for the year ended June 30, 1905.

Location.—This institution is beautifully situated in a fertile valley, along the San José creek, one hundred and thirty-five miles from Ashcroft, a station on the 27—i—25

Canadian Pacific railway line, and four miles from Sugar Cane, the nearest Indian reserve.

Land.—All the land in connection with the school is the property of the corporation of the Oblates of Mary Immaculate. It is, for the greater part, only pasture land.

Buildings.—These consist of the main building, the boys' and the girls' homes, and a fourth building containing kitchen and dining-rooms. The main building is mostly occupied by the reverend principal and the other fathers. The boys' home comprises on the lower floor, school-room, bed-room, parlour, play-room and lavatory; on the second floor: dormitory, store-room, sick-room, bed-room for the foreman; in the attic are located the boys' wardrobes.

The girls' home has on the lower floor: a school-room, a store-room, two parlours, a sewing and a play-room; the upper floor contains a dormitory, a bed-room, chapel, bed-rooms for the staff and music-room; in the attic are the girls' wardrobes and a second store-room.

The outbuildings are: meat-house, granary, harness, carpenter and blacksmith shops, three cellars, hen-house, stable, barn and machine-shed.

Accommodation.—The school can easily accommodate ninety pupils with the

Attendance.—At the end of the year fifty-one pupils were in attendance; twenty boys and thirty-one girls. One little boy was discharged owing to disease. One boy and six girls were admitted; eight girls and one boy regularly discharged.

Class-room Work.—The school hours for the boys were in the morning from 8.15 to 10 a.m. every week day; and in the afternoon from 4 to 5.15 p.m., except Saturday. The school hours for the girls were in the morning from 10 to 11.45 a.m. every week-day, except Monday, and in the afternoon from 4.15 to 6 p.m., except Monday. The examinations made periodically showed good and steady progress in both the boys' and girls' departments. At the end of the year the pupils were graded as follows:—

		Pupils.
Standard	I	7
"	II	9
	III	
"	IV	
"	VI	6

Farm and Garden.—Our large farm is in a flourishing condition. Farming being the most useful industry for our boys, we try to give them a thorough and practical knowledge of this branch. We had an abundant supply of vegetables, such as cabbage, turnips, carrots, beets, onions, lettuce, pease, beans, &c. Hay, oats and potatoes did exceedingly well. Wheat was a complete failure, hence we were obliged to buy flour. Six boys attend to the dairy and three boys were at certain times employed in the carpenter-shop, under the supervision of the principal.

The girls attain great proficiency in housekeeping, knitting, mending, hand and machine sewing, dressmaking, crocheting, embroidery and lace-making. Under the direction of a sister they, in turn, attend to the cooking, baking, butter and cheesemaking. The aim ever kept in mind is to prepare each girl to become an all-round, practical housekeeper.

Moral and Religious Training.—This being the most important part of education, particular care is taken by all members of the staff in training the chlidren to be obedient, truthful, honest, kind and obliging. To the children's credit, it must be said, our efforts in this direction meet with splendid success. Religious instruction is given daily by the principal; morning and evening prayers are said in common and on Sundays and holydays the children do all the singing in the church often in two and three parts.

Health and Sanitation.—All the pupils enjoy excellent health; no death is to be recorded. Most of the boys and all the girls, suffered from a light attack of influenza and one girl was sick for a few weeks from bronchitis. The drainage is good and cleanliness strictly enforced.

Water Supply.—The water-supply is still in an unsatisfactory condition, especially in winter, when lakes and creeks are frozen and the danger from fire is so great.

Fire Protection.—All fire-appliances are always kept ready at hand. Ladders are laid on all the roofs, the chimneys are made of terra-cotta pipes and frequently cleaned; there are also two glass-lined fire-extinguishers and a good supply of fire-pails. But without an abundant supply of water, well secured against frost, the danger from fire is still very great.

Heating and Lighting.—The lighting is by coal-oil lamps and the heating by ordinary box stoyes.

Recreation.—All kinds of outside games are heartily encouraged, for which the

large and well-kept playgrounds offer the best opportunity.

General Remarks.—During the year, the children gave several concerts to their friends and parents. At the end of the year, a large gathering of Indians took place at Sugar Cane, when the children again gave a lengthy entertainment to the surprise and admiration of Indians and whites, who had come there from far and near.

In concluding my report, I beg to tender my most sincere thanks to our inspector of schools, Mr. A. E. Green, for his long visit last May. His words of praise and counsel to the pupils will, I trust, not soon be forgotten. My thanks are also due to our superintendent, Mr. A. W. Vowell, and our worthy agent, Mr. E. Bell, for the unremitting attention paid to the school.

I have, &c.,

· H. BOENING,

Principal.

MANITOBA SUPERINTENDENCY, LAKE MANITOBA INSPECTORATE, PORTAGE LA PRAIRIE, September 30, 1905.

FRANK PEDLEY, Esq.,
Deputy Superintendent General of Indian Affairs,
Ottawa.

Sir,—I have the honour to submit the following report of my inspection of industrial, boarding and day schools of my inspectorate for the last year.

BRANDON INDUSTRIAL SCHOOL (METHODIST).

Inspected, March, 1905; number of pupils in attendance, ninety-nine; boys, forty-three; girls, fifty-six.

Standard	I	38
"	II	11
"	III	25
"	IV	22
. "	V	3

Staff.—Principal, Rev. T. Ferrier; assistant principal, A. H. Wheaton; farmer, J. G. Milne; gardener and fireman, H. Goodland; carpenter, Joseph Jones; matron, Miss H. Sutherland; assistant matron, Miss E. Routledge; senior teacher, Miss C. 27—i—25½

Wigle: junior teacher. Miss M. Howard; cook, Mrs. A. Brown; laundress, Mrs. M. Musser; seamstress, Miss C. Trumbell; nurse, Miss E. Brundridge.

This institution continues to do excellent work. Mr. Ferrier is a model principal, having the confidence of his staff and the respect of his pupils. I was a little disappointed in the class-room work. It was hardly up to former inspections. Frequent changes in the teaching staff are accountable for this.

Outside of the class-rooms the inspection was most gratifying. The boys are receiving an excellent training in their several departments, and the girls under the close and capable supervision of Miss Sutherland are receiving a training that should

be most useful to them in after-life.

Particular attention is paid to farming and stock-raising. The farm is a model one in every respect. It is adjacent to the Dominion Experimental Farm, and has the benefits of the best results from that institution. I may state that the farm showed

an apparent profit of \$1,463.82 for the year ended February 28, 1905.

The buildings are in fair repair. A new residence for the gardener was completed last fall, and a carpenter's shop, to take the place of the one that was burned, was under construction at the time of my visit. All buildings are lighted by electricity. The plumbing contract is completed and giving good satisfaction. The fireappliances are in good condition.

The general health at the institution has been good, and needless to say, the moral

and religious training of the inmates is considered of first importance.

The school is almost if not quite maintained by the departmental grant. I may state that I paid a short visit to the school on June 29. I inspected the gardens and crcps and can say without hesitation that I have never seen better crops or better kept They were a picture and an object lesson to all visitors, gardens in this province. showing what can be done by careful cultivation and good management.

ELKHORN INDUSTRIAL SCHOOL (UNDENOMINATIONAL).

This school is operated entirely by the department. I inspected this school in May, 1905, and there were in attendance at that time forty-seven pupils: boys, thirtyone; girls, sixteen.

Standard	I	6
. "	II	9
"	III	0
"	IV	1.4
	V	
"	VI	4

The average attendance for the year ended March 31, 1905, was fifty-seven and

a half, as compared with sixty-nine for the previous year.

Staff.—Principal, A. E. Wilson; assistant principal, Mrs. A. E. Wilson; farmer, T. T. Smith; supervisor, Louis Ingram; carpenter, Mr. Gooding; teacher, Miss Marks. The remainder of the staff was disorganized, those on duty being temporarily employed.

A very considerable addition has recently been made to the number of pupils by

the admittance of a number of recruits from the Pas agency.

The class-room work is excellent and reflects great credit on the teacher, Miss The pupils receive the usual industrial training in other agricultural schools. Particular attention is given to the boys' training in agricultural pursuits.

I am pleased to report that the health of the institution has been remarkably good. I have never seen a lot of Indian children more healthy or more free from disease. I understand that there have been only two deaths in the past four years.

I found the buildings in fairly good repair. The heating plant was defective, but I understand a new system has recently been installed, which I trust will be satisfactory. The fire-appliances were in good order. I have made some recommendations to increase their effectiveness.

The products of the farm from the crops of 1904, were as follows:—one thousand one hundred and seventy-seven bushels of wheat, four hundred and fifteen bushels of oats, three hundred and fifteen bushels of barley, besides a large quantity of potatoes and other vegetables.

Owing to the small number of pupils in attendance, the per capita grant was rather high; this year a very considerable reduction is expected, as the attendance will be largely increased.

BIRTLE BOARDING SCHOOL (PRESBYTERIAN).

Inspected, February, 1905. Paid brief visits to the school, April 26 and July 18, 1905.

Staff at time of inspection—Principal, H. E. Crawford; since succeeded by Rev. W. W. McLaren; matron, Miss A. McLaren; assistant-matron, Miss T. McLeod; teacher, Miss McGregor.

Enrolment, fifty: boys, nineteen, girls, thirty-one. These are graded as follows:—

Standard	I	18
"	II	8
. "	III	7
"	IV	12
Ungraded	l,	5

I am pleased to report that very considerable progress has been made in classroom work since my last report. The pupils speak up well and have a good grasp of their work. The order is excellent. Miss McGregor is a capable teacher.

Miss McLaren, as matron, and Miss McLeod, as assistant-matron, are enthusiastic in their positions, working together for the general good of the institution Miss McLaren has been connected with the school from its inception. She keeps a close supervision of the ex-pupils, and her advice and counsel is always well received by them, much to their profit.

Rev. Mr. McLaren, who has succeeded Mr. Crawford as principal, is new to the

work, but from appearances will make a capable manager.

I found the buildings in a fair state of repair, some minor repairs were necessary, but I understand that these have since been made. The heating plant was defective. I have made recommendations to have a new system installed. The fire-fighting appliances consist of hose connections on each floor supplied with water from a tank in the attic. Besides this there are fire-buckets and axes placed conveniently about the building. The building is lighted by acetylene gas, supplied by the municipal plant.

There is no farming done in connection with the school, as there is no land for that purpose. There are, however, large gardens which supply all the vegetables used in the school. Besides this they grow a few acres of turnips, mangolds, oats and fodder-corn for the stock.

The moral and religious training of the pupils is such as to make them good, useful citizens in after-life. The ex-pupils of this school as a rule reflect great credit on the institution. To sum up: it is worthy of the generous support of the department, and of the church under whose auspices it is conducted.

PORTAGE LA PRAIRIE BOARDING SCHOOL (PRESBYTERIAN).

Inspected February, 1905. Pupils enrolled, twenty-two: boys nine, girls thirteen. They are graded as follows:—

Standard	Ι.								_	_								1						
"	II.			 			٠.			·	٠.	•					•	 •	•	•	•	•	•	
* 46	II	Ε								Ì						٠.					•		·	
"	IV	•						٠.		٠.	٠.		Ĭ.	 ٠.	•			•	. '	•	_	•		
"	V.																							

The staff consists of: principal and teacher, W. A. Hendry; matron, Mrs. Hendry; assistant matron, Miss Hendry.

This school has a per capita grant of \$72 per annum each, for twenty-five pupils. It is situated within the corporation limits of this town. It has the benefit of the town fire and police protection.

I am pleased to report the continued success of this institution. The department grant pays the running expenses, except the salaries and part of the clothing, which is provided by the Foreign Missionary Society of the church.

At the close of the last fiscal year the school had the sum of \$42.70 to its credit

with all accounts paid.

Mr. Hendry is a capable and painstaking teacher and the class-room work com-

pares favourably with that of other similar institutions.

Mrs. and Miss Hendry continue to perform their duties in a satisfactory manner. Mrs. Hendry is a graduate trained nurse, which is of considerable assistance and benefit to her in her work.

I consider this an excellent school for girls and small boys. The girls get a more suitable training than in the larger institutions in domestic work. It is conducted more on the lines of a private home, consequently the girls get a more practical training than in the industrial schools.

It is hardly suitable for bigger boys, as there is very little opportunity for them to learn much outside of the class-room.

There are two acres of land belonging to the school, one acre of which is used for gardens, the remainder as boys' and girls' playgrounds, &c.

The building is frame on stone foundation, and is heated in a comfortable way by hot-air furnaces and lighted by electricity. It is in fairly good repair.

The general health of the institution has been good.

PINE CREEK BOARDING SCHOOL (ROMAN CATHOLIC).

Inspected August 9, 1905. Pupils present, seventy-six: boys, twenty-seven; girls, forty-nine. Twelve of this number are day-school pupils belonging to the day school that is connected with the boarding school.

Rev. Father Chaumont, O.M.I., is principal, assisted by an ample staff of clericals of both sexes.

This institution continues to do excellent work, and will stand comparison favourably with the industrial schools. The class-room work is without exception superior to any other school in this inspectorate. The industrial training is much the same as in the industrial schools.

The land in connection with the school is not adapted to growing grain, and consequently this branch of training has to be overlooked, but in garden work, stock-raising, carpentry, operating saw and planing mill, &c., the boys are receiving a very useful education.

The girls are instructed, and many are proficient, in domestic work, cutting and fitting of clothing, needle and dairywork, and in fact all branches of industrial training connected with successful housekeeping.

The institution is a hive of industry and the Reverend Father in charge is much

to be congratulated on the general proficiency of his institution.

It fills in nearly every respect the writer's idea of the proper system of Indian education.

The main building is a large stone structure, capable of accommodating one hundred pupils. It is heated by steam, protected against fire by hose on each floor and provided with three fire-escapes.

At the time of my visit a new stable and barn was under construction, 50×118 feet, with solid stone basement stable under a portion of it. When completed it will

be one of the largest and most complete buildings of its kind in the province.

They have sixty-eight head of cattle and raise all their own beef, pork and poultry. A saw and planing mill is operated in connection with the institution, and they make all their own lumber, besides manufacturing considerable for sale. It is the policy of the management to produce within the institution any commodity, at all possible, that is necessary to its welfare. This means a saving of expense and an extensive training for the pupils.

The receipts covered expenditure up to the end of the last fiscal year.

SANDY BAY BOARDING SCHOOL (ROMAN CATHOLIC).

Inspected July 25, 1905. This is a new school and had not received its pupils up to the time of my visit. The principal informed me that he would open on Angust 1, with an enrolment of thirty-five pupils. The school is situated on Sandy Bay reserve on the west shore of Lake Manitoba in the Manitowapah agency.

Rev. G. Leonard, O.M.I., is principal. The other members of the staff had not

vet reported for duty.

The building is frame, on a solid stone foundation, 40 x 70 feet. The basement contains vegetables and dairy-rooms and laundry. In an annex to the basement is the acetylene gas plant and the gasoline engine used for pumping water, cutting wood, &c.

The ground floor contains the boys' class-room, the girls' class-room, sitting-room,

chapel, dispensary, stock-room and boys' play-room.

First floor contains the boys' infirmary, the girls' infirmary, the sisters' dormitory, staff sitting-room, sewing-room and the girls' recreation-room.

The second floor contains boys' and girls' dormitories, with attendant's room in suite.

The attic contains two large water tanks for fire-protection and general purposes in connection with the plumbing system. The building throughout is well supplied with bath-rooms, lavatories, &c. This is a thoroughly up-to-date building, well constructed, admirably planned, and apparently a model for a school of this kind.

The water-supply was reoprted ample. It is taken from a well fifty feet deep. It

is clear and apparently pure and wholesome.

The usual precautions have been taken against fire, there is hose connection on each floor with the tank in the attic. The means of entrance and exit are well planned and ample.

I look forward to this being a successful school. There will be no trouble in find-

ing recruits for it and with good management a bright future awaits it.

PORTAGE LA PRAIRIE AGENCY DAY SCHOOLS.

SWAN LAKE (PRESBYTERIAN).

Inspected July 7, 1905. K. M. Garrioch, teacher and missionary. Three pupils were in attendance. Average attendance for the year, seven, which is somewhat in advance of last year.

I cannot report any progress. Mr. Garrioch is an excellent interpreter and has considerable influence with the Indians of the band and in this way may be of benefit, but as a teacher he is a failure.

The building is a frame one and in good repair. Supplies, ample.

ROSEAU RAPIDS DAY SCHOOL (UNDENOMINATIONAL).

Teacher, Miss McMahon. Enrolment, twenty-three: boys, ten; girls, thirteen. Present at inspection, seventeen.

Pupils are backward owing to frequent change of teachers. Miss McMahon is an energetic teacher and should succeed. She has only been a short time in this school. The school is a frame building in good repair.

BIRTLE AGENCY.

OKANASE DAY SCHOOL (PRESBYTERIAN).

This school is situated on Riding Mountain reserve. Inspected July 15, 1905. Rev. Jas. McAlaster, teacher and missionary. Enrolment, thirteen; boys, seven;

girls, six. Average attendance for last fiscal year, seven and a half.

The pupils are making a little progress, but owing to irregular attendance are backward in their work. Mr. McAlaster should be a good teacher. As a missionary he is popular with the band.

The school is a frame building in good repair.

OAK RIVER DAY SCHOOL, SIOUX (CHURCH OF ENGLAND).

Inspected January 20, 1905. Mr. C. D. L. Harris, teacher. This school was reopened on January 2, after being closed for a number of years.

Enrolment ten; boys, four; girls, six.

At inspection there were three pupils present. As the school had only been open for a few days, the pupils were all in the most primary stage. Mr. Harris is quite a young man, and appears enthusiastic, but I doubt very much the wisdom of opening the school. Most of the pupils reside at a considerable distance, which will keep them away in rough weather. There are two industrial schools within a short distance that should take care of all the children of school age belonging to the band.

The school is a frame building in good repair.

MANITOWAPAH AGENCY.

LAKE MANITOBA DAY SCHOOL (ROMAN CATHOLIC).

Visited July 27, 1905. Mr. L. E. Martel, teacher. I regret to say that the school had been closed for some time owing to the illness of Mr. Martel, so I was unable to make an inspection.

The returns for the past fiscal year show an average attendance of ten. Log school building, in good repair.

EBB AND FLOW LAKE DAY SCHOOL (ROMAN CATHOLIC).

At the time of my visit, July 28, 1905, the school was closed for lack of a teacher. The average attendance at this school is generally good, considering the small number of the band. Log school building in good condition.

UPPER FAIRFORD DAY SCHOOL (CHURCH OF ENGLAND).

Did not visit this school, as it was without a teacher at the time I passed, August 3, 1905.

LOWER FAIRFORD DAY SCHOOL (CHURCH OF ENGLAND).

Inspected, August 3, 1905. Chas. H. Fryar, teacher. Boys present, eleven; girls, eight; total, nineteen.

Average attendance for past fiscal year, sixteen.

Mr. Fryar had just assumed his duties here, having been removed from the Lake

St. Martin school, succeeding Mr. Robert Bruce, deceased.

The pupils made a very poor showing at the inspection. This may be accounted for by the fact of their having a strange teacher, and the excitement attending the annuity payments.

LITTLE SASKATCHEWAN DAY SCHOOL (CHURCH OF ENGLAND).

Inspected, August 1, 1905. There were present, five boys and eight girls, making a total of thirteen, which is the total enrolment.

Teacher, Jno. E. Favell. Grading of Pupils—

Standard I	6
" II	2
" III	
Ungraded	1

This school continues to do fair work. The roving habits of the parents interfere very much with the progress of the pupils. Mr. Favell is a conscientious teacher, has the confidence of the Indians and is a very useful man on the reserve. He has been twenty years in this kind of work.

Log school building in good condition.

LAKE ST. MARTIN DAY SCHOOL (CHURCH OF ENGLAND).

Teacher, Louis Leclaire.

Mr. Leclaire had just arrived, succeeding Mr. Fryar, removed to Fairford. He had not yet opened the school, so I was unable to make an inspection. I was rather favourably impressed with Mr. Leclaire's appearance. He is a native of the country, young, married, and speaks the Indian language fluently. He should be a useful man on the reserve outside of the school.

A new school building is in course of construction and will be completed this fall. The members of this band take considerable interest in the education of their children, and in the past it has been one of the best schools in the agency.

WATERHEN DAY SCHOOL (ROMAN CATHOLIC).

Inspected, August 7, 1905.

Teacher, Lucian Guillot, B.A.

Eight is the total enrolment of this school, of which three are boys and five are girls. All were present at inspection. There are only nine children of school age on the reserve.

Average attendance for the last fiscal year, six and three-quarters.

They are graded as follows:—

Mr. Guillot is a Frenchman. His expression of English is very imperfect. Notwithstanding this I was pleased with the inspection. It showed that he had been attentive to his duties, and was doing his best under very adverse circumstances.

The school building and the teacher's residence are in excellent repair.

SHOAL RIVER DAY SCHOOL (CHURCH OF ENGLAND).

Inspected, August 11, 1905.

Teacher and missionary, T. H. Dobbs. The enrolment is twenty-one, of which six are boys and fifteen are girls. There were twenty present at inspection. They are all graded as standard I pupils.

Mr. Dobbs has been here one year, succeeding Rev. Mr. Norquay. Since he came the attendance has largely increased. Though the grading shows all to be in the first standard, I consider Mr. Dobbs to have done excellent work, considering that he had to start all from the beginning. Mr. Dobbs is an Englishman. He is proficient in the Indian language. His work outside of the school is valuable, as he has the confidence and respect of the Indians. In short, he is amongst the best of our day-school teachers.

The school building is in good condition.

PAS AGENCY.

GRAND RAPIDS DAY SCHOOL (CHURCH OF ENGLAND).

Inspected August 14, 1905.

Teacher and missionary, Rev. M. Brown.

Total enrolment is twenty-five, of which eleven are boys and fourteen girls. There were eighteen present at inspection: boys eight, girls ten.

Teachers' grading :-

Standard	I		 9
"	II	· · · · · · · · ·	 3
"	ш		 3
"	IV		 2
Ungradeo	l		 8

Mr. Brown has been in charge of this school for one year. The result of the inspection was satisfactory, a decided improvement over all previous inspections. Mr. Brown is an Indian, well educated and enthusiastic in his work. His influence should be of great benefit, both temporal and spiritual, to the band.

The Indians of this band understand and speak more English than the other bands of the agency, which makes the school of more practical benefit to the pupils. The school building is not in very good repair, but the band promised to put it in good repair for the winter.

CHEMAWAWIN DAY SCHOOL (CHURCH OF ENGLAND).

Inspected August 17, 1905.

Teacher, Mr. F. Barker.

Total enrolment is twenty-five, of which fourteen are boys and eleven are girls.

The average attendance for the year was ten. Present at inspection, twenty.

Mr. Barker has been here one year. Fair progress is shown. Four of the pupils are advanced to the third standard. The attendance is irregular. The band are hunters and go away for long periods, taking their children with them, and this interferes very much with their progress at school. Mr. Barker is doing honest, conscientious work, and has considerable influence with the band.

The school building is in rather poor repair.

MOOSE LAKE DAY SCHOOL (CHURCH OF ENGLAND).

Teacher, Walter Charles Lundie. Inspected August 19, 1905.

The enrolment is twenty-three, of which nine are boys and fourteen girls. The average attendance for the last fiscal year was fifteen and one-half. There were present at inspection twenty-five children.

They are graded as follows:—

Standard	Ι΄	 ٠.	 	20						
"	TT									3

A really live teacher might do good work here, as the attendance is fairly regular. The building used for school purposes is rented from the Church Missionary Society It is in rather poor repair and is said to be cold in winter.

THE PAS DAY SCHOOL (CHURCH OF ENGLAND).

Inspected September 9, 1905. Teacher, R. A. McDougall.

The enrolment is forty-two, of which twenty-three are boys and nineteen are girls.

They are graded as follows :-

Standard	I	21
	II	
"	III	6
	IV	
"	V	_

The average attendance for the last fiscal year was twenty-six, as compared with twenty for the previous year. There were present at the inspection thirty-four children. This school continues to be the best day school in my inspectorate. Mr. McDougall has the gift of imparting knowledge to Indian children to a degree that I have not found elsewhere. He keeps his pupils interested from morning till night. Of the thirty-four children present at examination, twenty had a fair grasp of the English language. A number of half-breed children are in attendance. The class-room was in excellent condition, clean, bright and comfortable.

BIG EDDY DAY SCHOOL (CHURCH OF ENGLAND).

Inspected September 11, 1905. Teacher, Wm. H. Trickett. The enrolment is twenty-four, of which ten are boys and fourteen girls. The average attendance for the last fiscal year was eight. They are graded as follows:—

Standard	I	14
	II	
	III	
Ungradeo	d	5

There were nineteen present at examination. Mr. Trickett had only been teaching two months, succeeding Mr. Smith, resigned. I was favourably impressed with Mr. Trickett's methods of teaching, but regret that he gave me to understand that he intended to resign. There is no residence for the teacher at the Eddy, and to walk to and fro twice a day from the Pas (4½ miles) proved more than he was able to stand. The pupils evidently had made no advancement under Mr. Smith. Mr. Trickett found them in a very backward condition, but was doing his best to advance them. The school building is of log and in rather poor repair. It should be replastered and whitewashed.

CUMBERLAND DAY SCHOOL (CHURCH OF ENGLAND).

Inspected September 2, 1905. Edward Jones, teacher. The enrolment is thirtyone; fifteen boys and sixteen girls. The average attendance for the year was nine. There were present at examination, ten. The pupils are very backward, there being only one present that could read at all, and that only the most simple words. Mr. Jones has been teaching since May 1 last, succeeding Mr. Seymour, resigned. I was favourably impressed with Mr. Jones, although his pupils made so poor a showing. The attendance is very irregular. The band is generally scattered over a large area in their hunting expeditions, and the only opportunity that the teacher has is when they come in for a few weeks now and again throughout the year. The building used for school purposes is rented from the Church Missionary Society. It is in a state of collapse and may tumble down at any time. It will not answer for another year. A suitable building will have to be erected or some other arrangements made very soon.

SHOAL LAKE DAY SCHOOL (CHURCH OF ENGLAND).

Visited September 6, 1905.

I did not hold examinations of pupils, through lack of time to do so.

Teacher, Louis Cochrane. Average attendance for the year was seven. Mr. Cochrane is an Indian. He has been teaching in this agency for a number of years. I have examined his work on several occasions. Considering his limited qualifications, he does very good work. Outside of the class-room in the reserve he does much to help and instruct the band. His services are valuable in this respect. The building used for a school is rented from the Church Missionary Society. It is in fair repair.

RED EARTH DAY SCHOOL (CHURCH OF ENGLAND).

Inspected September 7, 1905. John George Kennedy is teacher. He is an English half-breed, educated at St. Peter's. He succeeded George Crane on July 4 last.

The enrolment is twenty-one, of which thirteen are boys and eight are girls. There were twenty present at examination. The pupils are very backward, none being higher than standard I. Mr. Kennedy appears energetic and may, after a little experience in teaching, do fairly well. He should be a useful man on the reserve. The school-house, which is rented from the Church Missionary Society, is in fairly good condition.

GENERAL REMARKS.

The most intelligent and thoughtful of the Indians are clamorous for boarding schools situated within a reasonable distance of the reserve. They realize the shortcomings of the day school and want a change. They are quite satisfied that the day schools should be closed. In my opinion the greatest benefit of the day school teacher is outside the class-room. If he understands the Indian language and has the confidence of the band he is labouring with, he can do much to advise and inspire them along the proper lines of advancement. They are also useful for dispensing medicine and issuing provisions to destitute, and attending to various matters connected with departmental requirements. In this respect they are very useful in this inspectorate, where they are generally the only officials on the reserves.

Of the boarding schools of my inspectorate I have nothing but words of commendation. They are all doing excellent work. There is little or no trouble in recruit-

ing for them. They are popular with the Indians.

In short, they come the nearest to my ideal for the training of our Indian youths. I do not intend to disparage the industrial school if properly maintained and equipped for real industrial training, especially as an advanced training institution for the brightest and most apt boys from the boarding schools.

I have, &c.,

S. R. MARLATT, Inspector of Indian Agencies.

Manitoba Superintendency,
Lake Winnipeg and Rat Portage Inspectorate,
Stonewall, June 30, 1905.

FRANK PEDLEY, Esq.,

Deputy Superintendent General of Indian Affairs, Ottawa.

Sir,-I have the honour to transmit a report showing the state of the schools

which I have visited and examined since my appointment in April last.

I have not been able to see all the schools because of the pressure of other duties. Under direction of the Indian Commissioner I accompanied the newly appointed Agent, J. O. Lewis, on his tour for the purpose of making the yearly payments in the Clandeboye agency. Immediately thereafter I was directed to pay the annuities in the Norway House agency, so that my time was fully occupied for three months.

CLANDEBOYE AGENCY.

ST. PETERS SOUTH SCHOOL (CHURCH OF ENGLAND).

Miss Ridgeway is the present teacher.

The school was inspected in September, and there were present at the time of my visit twelve boys and six girls. The number of pupils on the roll was twenty-one, graded as follows:—

		Pupils.
Standard	I	10
	II	
"	III	4
"	IV	1
"	V	1

Punctuality has been fair; classes well organized; material well cared for; the school-house clean; the pupils' faces and hands were clean, and the conduct of the pupils was good, both in and out of school.

Miss Ridgeway is a duly qualified teacher, has a second-class provincial certificate, takes great interest in her work and has the confidence of her pupils. I predict for this school much success.

ST. PETERS EAST SCHOOL (ROMAN CATHOLIC).

This school was examined in September, the inspector being accompanied by the Rev. Mr. Galway. The teacher is Miss Mary Fitzgerald.

The number of children present were, three boys and nine girls, and the number on the roll was thirty-one; classified as follows:—

	•	Pupiis
Standard I		18
" II		
" III		3

There has been a great falling off in attendance of late. As some of the children come across the river every morning to reach school, it follows that in stormy times they cannot be in their places. Duck-hunting and chicken-shooting have taken away the fathers and the children stay at home. Any excuse seems good enough to warrant the mothers in detaining their children.

Those who were present were respectably dressed and of tidy appearance. The school and furniture, as well as the school material, were in good condition.

The conduct of the pupils was reported good, both in and out of school.

The progress of the scholars is unsatisfactory owing to the intermittent nature of the attendance. The teacher is very faithful in the performance of her duties, but feels sorry that she cannot have more of the children's time.

ST. PETERS EAST SCHOOL (CHURCH OF ENGLAND).

This school was inspected in September and the inspector was accompanied on his visit by the Rev. Mr. Galway.

There were present two boys and three girls and the whole number on the roll was fifteen. These were graded as follows:—

	_	-	4	Pupils.
Standard	I		 	12
.66	TIT		 	1

The teacher is Peter Harper, a native, and a graduate of an industrial school. He takes great interest in his work and is quite successful. The attendance has not picked up satisfactorily since the holidays and I cannot report much progress. These children seem to forget in the vacation what they learn in the term previous. Small wonder that teachers feel discouraged.

The order and conduct was good and the school was clean.

MUCKLES CREEK SCHOOL (CHURCH OF ENGLAND).

Inspection was made in September. The teacher is the Rev. B. McKenzie. There were found at the time of my visit three boys and eight girls. The whole number on the roll was twelve, six of whom were treaty children and the remainder non-treaty.

The treaty children were classified as follows:-

~ .	_	/			Pupils.
Standard	I		 	 	4
"	II		 	 	9.

The attendance is very irregular for various reasons, the average attendance being four for the past year.

There is no progress to report.

The conduct of some of the children out of school was reoprted to be bad and measures were taken to correct this. I had no fault to find with the cleanliness of the pupils, and the buildings were tidy and in good repair.

ST. PETERS NORTH SCHOOL (CHURCH OF ENGLAND).

This school was visited in September, the inspector being accompanied by the Rev. Mr. Galway.

The number of pupils present at time of inspection was eight boys and two girls, and the number on the roll, sixteen. They were classed as follows:—

		Pupils.
Standard	I	11
"	II	3
"	Ш	2 .

The attendance at this school is very unsatisfactory and no amount of remonstrance moves the parents and guardians of these children.

The average for six months is between three and four. The progress is nil.

The newly appointed teacher is Reginald Aston. He has no certificate, but has a good general education and is anxious to succeed, but circumstances are decidedly unfavourable to the success of any teacher. The building is in good repair and the school material ample.

BROKENHEAD RIVER SCHOOL (CHURCH OF ENGLAND),

The number of scholars present on the day of inspection was six, and the number on the roll sixteen.

The teacher was Mr. Bruce.

The general condition of this school was not satisfactory. The teacher lives at a great distance and finds it impossible to be promptly on time. He does his best, but has no special qualification for his work.

The attendance is irregular and the progress is very slow. Certain suggestions have been made which may help the parents to support the teacher more than they have done. I shall hope for great improvement in this school at my next inspection.

FORT ALEXANDER DAY SCHOOL (CHURCH OF ENGLAND).

Inspection was made in September. I was accompanied by the agent, Mr. J. O. Lewis.

Miss Sophie Spence, a graduate of the Middlechurch industrial school, is in charge. She has had eleven years of training and is well able to teach, but for some reason the attendance has very greatly fallen off.

-	The number on the roll is thirty-one, classified as follows:—	
	The number on the form is the same	Pupils.
	Standard I	 24
	" TT	 . 7

The ability of the children to read and write was in no way remarkable. Doubtless the best scholars were not present. The building is a good one. The stock of school material was ample, the books were well kept, the condition of the room was orderly and the behaviour of the pupils good.

A broad river must be crossed by some of the children every morning, and this

makes the attendance irregular.

FORT ALEXANDER BOARDING SCHOOL (ROMAN CATHOLIC).

Inspection was made September 15, in company with the agent, J. O. Lewis and S. J. Jackson, M.P.

The principal is the Rev. Father Valis, the priest in charge of the parish.

The teacher is Miss Rosanna Thibault, a well qualified and enthusiastic person,

who has excellent command of her pupils.

The assistants are French ladies, recently arrived from their native land, and they have the responsibility of managing the house and caring for the children after and before school hours.

The principal was assisted at the time of my visit by the Rev. Father Dorais.

Children present numbered forty-five, of whom twenty-four were boys and twenty-one girls. The school exercises were interesting and suggestive of speedy ad-

vancement. They are sure to make rapid progress under Miss Thibault.

The nunils we	re classified as follows:—		
ZIIO Pup-u-		Boys.	Girls.
Standard	I	20	12
"	II		5
- "	III	0	4
"	IV	1	0
"	V	1	0

The school building is a model of excellence, having three stories above the basement. The girls and boys occupy opposite ends of the building, play-rooms, dormitories and modern accommodations being entirely separate. The children meet together at table and in the class-room and also in the chapel.

Plain but substantial food is provided in plenty for the pupils. The staff take their meals separately. The heating is most excellent. The building is lighted by acetylene gas, a machine for the manufacture of which is situate in the basement.

The drainage is perfect and the ventilation good. A plentiful supply of good water is pumped from the Winnipeg river by a gasoline motor situate at some distance from the school and forced to large tanks under the roof. From this supply the whole house is served by means of properly arranged pipes and taps.

An admirable system of fire-hose has been provided and a peculiarly arranged apparatus provides for the turning of multitudinous jets of water over the mansard roof in case of fire. This can be done by turning a handle in the first story. I have never seen a more complete arrangement.

More applications for entrance to this school are being made than the reverend principal can accept. Lack of room is already felt. The fifty pupils allowed have room in plenty, but there is no extra room provided for would-be scholars.

Ample playgrounds have been provided and are beautifully situated on the riverbank. No more handsome building can be found, and the situation is equally excellent.

20

SESSIONAL PAPER No. 27

Games and pastimes have been provided for the children on rainy days and in the evening hours, so that time shall not be heavy on their hands. I much admire the wise provision that has been made for the safety, the support, the education and the entertainment of the pupils of this school, and I predict for it a prosperous future.

NORWAY HOUSE AGENCY.

BLACK RIVER BOARDING SCHOOL (CHURCH OF ENGLAND).

The teacher is Mr. Slater.

The school was closed at the time of the annuity payments, the only opportunity I have had for visiting it. The average attendance at this school is five, and the children are irregular in attendance. There is a good school-house and the equipment is first-class.

HOLLOWWATER RIVER SCHOOL (CHURCH OF ENGLAND).

The teacher of this school is Mr. John Sinclair, an old and faithful servant of his church, and a staunch friend of his people.

The number of children on the roll is eighteen, graded as follows:—

		Pupils.
Standard I	 	. 9
" II	 	. 3
" III	 	. 2
" IV	 	. 4
Total		19

The average attendance for the year is five.

Everything about this school is in excellent order and there is distinct progress.

BLOODVEIN RIVER SCHOOL (METHODIST).

This school has been taught during the year by Jeremiah Rundle, a native from the Fisher River band, but the attendance was so small that he lost interest in his work and was withdrawn and the school closed. The people here are pagan and migratory. They care little for the advantages of an education. The older people have never been to school and can hardly be expected to appreciate the benefits which might be enjoyed by their children. The average attendance was two pupils.

FISHER RIVER SCHOOL (METHODIST).

This school was inspected on July 20.

Mrs. E. R. Steinhauer was in charge, the wife of the missionary stationed at this place.

The inspector was accompanied by P. H. Sutherland, clerk of the treaty payments for this year.

We found eighteen children present; twelve girls and six boys.

The number on the roll was fifty, graded as follows:-

tandard	~																			Pupils.
tandard	1		• •	• •	٠.															31
"	ш																			
"	$\underline{\mathbf{m}}$	• • • •	• •	• •	٠.	٠.		•	٠.											6
**	IV	• • • •				٠.	•	•	• •	•			•							6
	_	_																	•	_
വര്	Tot	al			•		•	٠.			•		•	•	•		•		•	5 0

The average for the year was twenty.

This school compares favourably with our white schools. Everything was in order, the school was clean, conduct was reported good and the teacher was so fond of her charge that she could not help but succeed.

The building is in good repair and the supplies of school material sufficient.

As I have visited this school many times before, I am in a position to record evident progress.

JACKHEAD RIVER SCHOOL (CHURCH OF ENGLAND).

This school was closed for holidays on July 24, but from the teacher, Mr. Le Ronde, I was informed that it would be opened immediately and continued through the year. The day of treaty-payment is not a good day to collect the children, as there is too much excitement, so I had not the privilege of inspection.

The building is neat, warm and good, and the material quite plentiful and well

cared for.

The teacher is a divinity student. After college closes he takes up this work and when college opens again he provides a supply for the winter. He says that the attendance is fair and the conduct of the children good.

BERENS RIVER SCHOOL (METHODIST).

This school was opened on August 1 by Miss Louise Showler, a new teacher from Ontario. Her teaching has aroused interest and the attendance has run up to a higher figure than usual.

The supply of material was insufficient at this school, and owing to the increased attendance the supply of biscuits allowed will be insufficient. Steps have been taken

to meet these wants.

As the school had only just been opened at the date of my visit, I made no formal inspection. The building is a good one and is kept in perfect order.

POPLAR RIVER SCHOOL (METHODIST).

This school was closed for holidays at the time of my visit. Mr. Blackford, the teacher, having been called away through the illness of his wife who is visiting at her home. He returned in time to meet me and was to open school immediately. He spoke regretfully of the inattention of the pupils and the lack of interest on the part of the parents, but said that in spite of all the school was succeeding.

NORWAY HOUSE BOARDING SCHOOL (METHODIST).

This school was inspected by me on August 1. I found the mechanics at work enlarging the rear part of the school, and when this is completed it will relieve the lack of room which has been such a hindrance to the staff for years past.

The building is framed, two stories high, having ten rooms on the first floor and

four on the second floor, and four or five new rooms will shortly be added.

The situation commands a beautiful view, but owing to the nature of the land about it, it is found to be in a pocket, so that drainage is a serious difficulty. In all other respects I found the equipment of the school perfect and the rooms clean and well provided with all essentials. The foundation is insecure.

The children of the school commanded a good deal of attention from the visitors at treaty time, owing to the fine uniform worn, their behaviour, their orderly march-

ing to church and their respectful replies when addressed.

The principal, the Rev. J. A. Lousley, does not now live in the building as formerly. His family has been removed to the Methodist parsonage. This takes him

away a good deal, but he is ably supported by Mrs. Messer, an excellent matron, who is equal to the task of keeping good order at all times.

His staff was much broken at the time of our visit, several of them having retired from the work and their successors had not yet arrived, but were daily expected.

There were fifty children in attendance at the time of our visit and all were in

the best of health. Some who had been out for holidays had not yet returned.

Owing to the absence of a teacher classes were not being held but would

Owing to the absence of a teacher, classes were not being held, but would be resumed as soon as necessary help arrived.

NORWAY HOUSE DAY SCHOOL (METHODIST).

This school was closed when I was there, and Miss Lousley, the excellent teacher, who has been in charge for some years, had resigned her duties. She will be much missed by all and especially by her pupils, who were very much attached to her and profited greatly by her tuition. This was the best school of the kind in this agency.

CROSS LAKE SCHOOL (METHODIST).

This school was not open at the time of our visit. The Rev. Mr. McNeill, an old teacher, with an Ontario certificate, is about to take vigorous hold of this work, and we may expect the best results to follow.

LITTLE GRAND RAPIDS SCHOOL (METHODIST).

This school is in charge of the Rev. Mr. Ivans, who has a large attendance. Unfortunately the Hudson's Bay Company has determined not to allow him to continue teaching in the building used since the inception of the work. This will make it necessary for him to seek other quarters. As there is not another house in the vicinity, it occasions much inconvenience. However, the teacher has pluckily gone to work to build a house, and the band has loyally staid with him, and before the summer has past, a place of meeting will doubtless be provided.

This is a summer school, taught only during the four months of the summer, but it is much appreciated, and I believe that Little Grand Rapids and Pekangekum together, could fill a boarding school, for there are all together of school age, nearly one hundred children. Better than this, the parents would be disposed to send them.

CROSS LAKE DAY SCHOOL (ROMAN CATHOLIC).

I regret that by an unaccountable oversight, I neglected to make a visit to this school. The fathers in charge were all with me at the treaty ground and their children were off on holiday, and I forgot to ask them to gather the pupils into the school until it was too late and my boat was leaving.

I believe they are dong a good work. The chief and his councillors appear to be well pleased.

GENERAL REMARKS.

This closes the list of schools in the two agencies which I have so far been directed to inspect.

I have, &c.,

JOHN SEMMENS.

Inspector of Indian Agencies.

Province of Saskatchewan, Battleford Inspectorate, Prince Albert, September 27, 1905.

FRANK PEDLEY, Esq.,

Deputy Superintendent General of Indian Affairs,

Sir,—I have the honour to submit my annual report on the inspection of Indian schools for the year ended June 30, 1905.

BATTLEFORD INDUSTRIAL SCHOOL.

This institution was inspected in September last, and was again briefly visited in June.

The staff, which has undergone several changes during the year, is at present composed as follows: Rev. E. K. Matheson, principal; Mr. Wilson, assistant principal; Mr. Allen, teacher of boys' division; Mr. Scott, farmer; Mr. McLellan, carpenter; Mr. Townsend, night-watchman; Miss Hayes, matron; Mrs Townsend, assistant matron and nurse; Miss Hulme, teacher of girls' division; Mrs. Budden, seamstress; Miss Chisholm, cook; Miss Taylor, laundress; Mrs. Scott, baker.

The attendance is latterly drawn almost entirely from the seven reserves of the Battleford agency, as Emmanuel College serves the requirements of the reserves lying farther to the east, while the Onion Lake boarding school supplies the needs of those farther west, so far as the Protestant population is concerned. The facilities for recruiting are further reduced owing to the fact that day schools are maintained on five of the seven reserves. In consequence the attendance shows a further decrease, and now consists of eighty-five pupils regularly admitted, and fifteen who are not regularly enrolled and for whom no grant is drawn.

In classwork the boys and girls constitute separate divisions, and are graded as follows:—

•	Boys.	Girls.	Total.
Standard I	\dots 2	4	6
" II		8	12
" III	10	17	27
" IV		9	21
" V	8	7	15
" VI	4	• • *	4
A.			
Total	40	45	85

In both divisions the tone of the work is greatly improved, and very satisfactory progress is being made. The improvement in the girls' reading under Miss Hulme's training is most marked. For several months twenty minutes daily was devoted to vocal music and breathing exercises under competent instruction and with excellent results.

The desks and black-board are in even worse condition than at last inspection, and both require renewing in the worst way. In other respects the equipment is complete.

Miss Hayes, who has been employed for several years in the institution as seamstress, has recently been appointed matron. She is thoroughly acquainted with her duties, and all departments of the domestic affairs are carefully supervised.

The farming industry is not extensive, the entire area under cultivation amounting to only fifty-two acres. The number of bigger boys capable of doing farm work and receiving training in that industry is but small; and besides the area of land on the school premises which can be worked profitably is little more than that in use. But the cultivation is thorough, and notwithstanding that the soil of the locality consists for the most part of a mere bed of sand, yet the product is satisfactory as to both quantity and quality. The garden especially is a model in every respect, and a great credit to the institution, as well as an important source of revenue.

The live stock, which consists of four work horses, one Ayrshire bull, fourteen cows, and a varying number of pigs and poultry, is all managed with a view to its economic value in connection with the maintenance of the school. The keeping of hogs has been attended with less profit than usual during the past year owing to the high value of feed whether it be purchased or produced on the premises. In order to reduce the cost during the summer months, a plan is being adopted which might profitably have been resorted to long since. Two acres of land prepared last season has this year been sowed with a suitable mixture of green crops and is being used as a pasture for the herd of pigs, a portion only being used at any one time while the rest is allowed to grow and become renewed.

Considerable repairs and improvements have been made upon the buildings, and as all are of lumber some portions are of necessity always requiring to be renewed. This work, together with the making and repairing of cupboards, tables, benches, and other plain furniture, affords constant work of sufficient variety for the training

of the boys in carpentry.

A building once used as a bakery, but for some time past unoccupied, has been enlarged and fitted up as a laundry, to supply the place of the building destroyed by fire some time ago. In this way a large part of the cost of a new building has been saved.

The grounds have been further improved and beautified by the planting of a large number of young maples grown on the premises from seed, as well as a number of interesting shrubs and flowers obtained from the Central Experimental Farm.

EMMANUEL COLLEGE (PRINCE ALBERT).

This school was inspected in December. At that time the staff included Rev. James Taylor, as principal; A. L. Elliott, teacher; Walter Anderson, instructor in boys' industries; Miss Dora Roy, matron; Miss V. Hounsell, assistant matron; Miss C. Sutherland, cook.

The principal claims as the undisputed constituency of the school, five large bands in the district of which Prince Albert is the centre, while several reserves are regarded as a recruiting ground for this school in common with others. However, on all these reserves day schools are maintained, which are attended in some instances by more than half the children of school age. The authorized attendance is fifty-two. The enrolment in December was fifty-one pupils, of whom nineteen are contributed by Ahtakhakoop's band and thirteen by John Smith's.

The examination of the classes showed very satisfactory results. In all the standards the pupils are brought on with much uniformity; and there is no marked distinction between bright and dull pupils. Four pupils in standard V, were preparing for the public school leaving examination with fair prospect of success; and the two boys in standard VII, against great difficulties prepared the work for the second class teachers' certificate, and wrote successfully at the examination in July.

The conduct of the pupils is everywhere good, in school, at work, at meals, and at recreation, and that without any apparent measures of severe restraint on the part of the officers, but largely through the diligence and tact of the teacher and

the matron, upon whom rests the main responsibility for the discipline.

The class-room is well equipped, and the condition of the furniture and stationery reflects the greatest credit upon the pupils and the control that is exercised over them.

The dining-room and kitchen are suitable rooms and properly equipped. The chief need in connection with the buildings is better dormitory accommodation for both sexes and a separate laundry building.

The farm and garden have been fairly successful and contributed during the year upwards of \$700 towards the main tenance of the school.

DUCK LAKE BOARDING SCHOOL.

This institution, though nominally a boarding school, is semi-industrial in its character, as all the girls' industries are taught systematically, and all the usual boys' industries with the exception of carpentry. It was inspected in February.

The staff was composed as follows: Rev. O. Charlebois, principal; J. A. Demers, assistant principal; Paul Grezaud, boys' guardian; Charles Schmitt, farmer; Claude Pollard, baker; and the following reverend sisters: Sister St. Basil, directress and secretary; Sister Mary of the Trinity, teacher of the senior division; Sister Mary of the Cross, teacher of the junior division; Sister St. Hyacinthe, girls' matron and nurse; Sister Rose de Marie has care of dormitories; Sister Ste. Emerencine, girls' seamstress; Sister Marie Isidora, boys' seamstress; Sisters Martha and Veronique have charge of kitchen and dining-room; Sisters Valerie and Bernardine have charge of laundry, dairying and poultry; Sister Honore supervises general housework. The expenditure on salaries runs slightly under \$20 per head per annum for the number of pupils in attendance, which is a very moderate outlay for the maintenance of a large and efficient staff.

The attendance is drawn from ten reserves, some of which are very remote; but of a total enrolment of one hundred and five pupils, seventy-one are from the three nearest reserves, namely, Beardy's, adjacent to the school; One Arrow's, fifteen miles to the east; and Petaquakey's, thirty-two miles to the north, while sixteen are non-treaty children.

The teachers are both well qualified, by training, experience and natural aptitude. The senior teacher holds a certificate from the Regina Normal School.

The pupils present at examination were graded as follows:—

		Boys.	Girls.	Total.
Standard	I	11	11	22
"	II	15	8	23
"	III	14	12	. 26
"	IV	4	5	9
"	V	10	8	-18

	Total	54	44	98

Through the efforts of the teachers, life and interest are well sustained in the work of the class-rooms, and good progress is being made throughout all the standards. Systematically arranged time-tables are in use in both divisions. In addition to the ordinary programme, agriculture is taught in a very useful way to the highest forms, and it was intended during the spring and summer to review such portions of this work as can be illustrated by the farming and gardening operations of the season.

The industries of the school are being turned to account more and more toward a reduction of the running expenses. Under the direction of the sisters, the sewing, knitting and mending, are done so systematically and so skilfully that outlay upon clothing is kept at a minimum. A substantial portion of the food-supply is now produced in connection with the farm, garden and dairy.

A quarter section of land, including the school grain-fields, has been fenced during the past year, a pasture of similar area having been already fenced. The farm products for the season of 1904 include nine hundred bushels of wheat, eleven hundred bushels of oats and three hundred bushels of barley, besides a large quantity of roots and vegetables. Products of other industries connected with the farm are three thousand pounds of beef, three hundred and twenty-five pounds of pork, three hundred dozen of eggs, and twelve hundred pounds of butter.

Three wells on the premises furnish an abundant supply of water, wholesome for use, but hard and of little value for washing. Soft-water cisterns are urgently

needed.

The main building affords excellent accommodation for residence and instruction except as regards dormitory space and recreation-room, for the boys, both of which are insufficient for the utmost healthfulness and convenience.

All the buildings in connection with the school continue to be lighted by acetylene gas. The light is satisfactory, and the cost extremely low, totalling for the year only \$60.08, including an item of \$7.60 for repairs.

BLUE QUILL'S BOARDING SCHOOL.

This school was inspected in April.

The staff consisted of Rev. Leon Balter, principal, and seven reverend sisters, namely: Sister Leveille, superioress; Sisters Mayrand and Laverty, teachers; Sisters Nignette, Lagoff and Coulombe, who supervise sewing and housework, and Sister Celina, cook.

The attendance is derived mainly from Blue Quill's and James Seenum's bands, and is accounted for as follows:—

Enrolled March 31, 1904	
Total	46
Discharged	
Deduct	11
Enrolled March 31, 1905	35

The pupils displayed a lively interest in their work, and for the most part auswered creditably. One boy, in the sixth standard, showed particular brightness and intelligence, but he is unfortunately of a delicate frame. Written work of every description was extremely well done.

In connection with the discipline and training of the children, rewards play a prominent part. At examination several of the pupils, both boys and girls, wore badges of different kinds,—medals, buttons, or ribbons. These are given for special merit in general application to duty, for obedience, politeness and piety, as well as for proficiency in certain subjects, such as arithmetic and writing.

The school-rooms are sufficiently large for the present attendance, and are well lighted, well ventilated and properly equipped. The dormitories have been improved by enlarging the accommodation for boys, who are considerably in the majority. The dining-room and kitchen are in a perfect state of order and cleanliness, and the building throughout and surroundings are in a thoroughly sanitary condition.

The girls are trained in every kind of housework with the greatest care; but the agricultural industries are only a moderate success and contribute but little toward the revenue of the school.

ONION LAKE ROMAN CATHOLIC BOARDING SCHOOL.

This school was inspected on May 11 and 12.

The staff has remained unchanged since last inspection, and consists of Rev. E. J. Cunningham, O.M.I., assisted by nine reverend sisters of the Order of the As-

The attendance register is kept with care, and from it the following abstract is taken :-

Pupils enrolled April 1, 1904	43 11
Total	<u>54</u>
Discharged on completion of studies	2
Died	2
Deduct	10
Enrolled, May 12, 1905	44

The entire attendance is derived from the bands of the Onion Lake agency, thirty-four being Crees and ten Chipewyans. There are also seven non-treaty children in residence.

Sister St. Patrick, who has had charge of the senior class-room since the opening of the school some thirteen years ago, was obliged to discontinue her duties for nearly five months during the year on account of ill health. Her absence and the rearrangement of duties which it involved have somewhat impaired the efficiency of the work, and some subjects have been temporarily neglected. The weak points revealed in the examination were diffidence in answering and defective pronunciation. The fifth and sixth standards have not the acquaintance with the classification and relation of words, phrases and clauses that might be expected. In other subjects, however, good progress is shown.

There is one spacious class-room, well lighted and well equipped. The junior division is still taught with much inconvenience and disadvantage in the dining-

room, which is large enough but by no means suitably equipped.

The dormitories are in good order, properly furnished, clean, and well ventilated. The boys' dormitory affords three hundred cubic feet of air-space per pupil for all the boys now in attendance inclusive of those authorized, while the girls' dormitory affords four hundred and sixty cubic feet for each of the present occupants. The means of exit from the latter in case of such an emergency as a serious fire, were still quite inadequate, but an efficient fire-escape was about to be constructed.

The drainage of the school premises is good, the grounds sloping to the front and to the rear from the site of the main building, and the sanitary conditions throughout are favourable.

The three deaths already referred to were all from consumption, and cannot be attributed to any unhealthful conditions or surroundings, apart from the fact that all confinement tends to further rather than to check the progress of this disease. Within limited hours, however, the pupils are given all possible facilities for recreation out of doors.

ONION LAKE CHURCH OF ENGLAND BOARDING SCHOOL.

This school is located on Makaoo's reserve, between the agency headquarters and the Roman Catholic boarding school, and about a quarter of a mile from each.

With the exception of the principal, the staff is changed throughout since last inspection, and now consists of Rev. J. R. Matheson, principal; Mrs. E. B. Matheson, M.D., assistant principal; Miss Bennett, teacher and girls' matron; Miss Ida Collins, boys' matron; Miss Marion Still, seamstress and laundress; Miss Minnie Painter. cook.

Of the nineteen Indian children enrolled, several have been absent for a considerable time and may be regarded as discharged. At the date of inspection, May 16, there were thirteen in attendance. Of these, eight belong to the Cree band of the

Onion Lake agency and five to Saddle Lake.

There are also in residence thirty non-treaty children, for whom no grant is drawn. These come from various parts of the surrounding country, and from farther west, from St. Paul de Metis, Moose lake, Victoria, Edmonton, Wetaskiwin and Beaver lake.

The whole attendance constitutes a heavy charge for one teacher, and the presence of the white and more numerous half-breed children, though in some respects beneficial, has in other ways been a hindrance to the progress of the Indian pupils, especially as the latter, some of whom have been in attendance for many years, are

now decidedly the more advanced.

In the examination of the class I was, as on former occasions, assisted by Agent Sibbald, whose attention to both the boarding schools in all matters is in strict accordance with his duties. The pupils manifested a fair interest in the exercises, but no enthusiasm or eagerness. Fair progress has been made in general, and there is a decided improvement in the form and legibility of written work. Several sets of kindergarten 'gifts' have been donated to the school, and these serve for the diversion as well as the improvement of all the younger pupils.

The class-room has a bare and unattractive appearance from the fact that the woodwork is still unfinished, but it is large, well lighted with eleven windows, comfortably heated with two large stoves, and equipped with all necessary school furniture and appliances, with the exception of blackboard space, which is entirely inadequate.

Some new fencing of a good description has been done, and the arrangement and order of the grounds and premises have been further distinctly improved.

THUNDERCHILD'S BOARDING SCHOOL.

At the date of inspection, June 30, the staff of this school was as follows:—Rev. H. Delmas, O.M.I., principal; Sister St. Stanislaus, superioress; Sister St. Omer, teacher and musician; Sister Ste. Prisque, seamstress; Sister St. Vincent Ferrier, girls' matron; Sister Ste. Octavie, boys' matron; Sister Ste. Caroline, cook,

Five pupils have been admitted and five discharged during the year, and the enrolled attendance continues at the authorized number of twenty, namely, twelve

boys and eight girls.

There were no absentees, but a few of the parents had been promised leave to take their children home for a short holiday after examination day, which fell opportunely on the last day of June, and they did not delay to come for them. A few weeks spent under tent at this season of the year is usually found to have a very beneficial effect upon the health of the children.

In their class work the pupils are graded as follows:—

		Boys.	Girls.	Total.
Standard	I	7	5	12
	И	3		3
"	III	1	2	3
. "	IV	1	1	2
Total		12	8	20

The examination was very satisfactory. Interest and attention on the part of the pupils could scarcely be improved, and the general tone of the work is good. Sufficient progress has been made and for their age the pupils are well advanced. One little boy, David Jimmy, in the fourth standard, is particularly bright and at fifteen may be expected to have attained a good standing in his studies.

The class-room is small, affording only one hundred and fifty cubic feet of air-space per pupil; but by opening a folding partition it can be enlarged by about fifty per cent. There are nine double desks, home-made, but comfortable and in good repair. There is forty-five square feet of slated cloth blackboard, in good order and serviceable; but this is not enough. The school material is protected and handled with care, and is for the most part sufficient.

The buildings are still new and in good repair. The recreation grounds are ample, smooth, and dry. A farm and garden of a combined area of fifty acres is now under cultivation, which is expected to contribute largely toward the maintenance.

INSPECTION OF DAY SCHOOLS.

MISTAWASIS DAY SCHOOL.

I inspected this school on November 10. Mrs. J. W. Moore, wife of the missionary on the reserve, has been in charge of the school for some years and was still in charge at this date, but has since resigned, her husband having taken a charge elsewhere.

There were sixteen children of school age on the reserve, fifteen enrolled at school, twelve present at inspection, and an average attendance of nearly eight pupils daily.

There were in addition non-treaty children in attendance to the number of nine, all of whom were present at examination. These are nearly all white children.

The pupils are graded as follows:—

		Treaty.	Non-treaty.	Total.
Standard	I	10	1	11
"	II	4 (2	6
"	IV	1	2	3
. "	VI	• •	4	4
		-	_	
	Total	15	9	24

Mrs. Moore has had training and experience in the art of teaching, and her time in the school-room is well and usefully employed. The non-treaty pupils occupy a large share of her attention, but the loss to the treaty section is largely made up by the advantage they enjoy of reciting and mingling at play-time with white children, and especially with white children of most exemplary manners and conduct.

The attendance is largely maintained by keeping in a 'home' in connection with the mission a few of the children who live farthest from the school. Toward the support of these children the mission board of the Presbyterian Church contributes \$150 per annum.

AHTAHKAKOOP'S DAY SCHOOL.

I visited this school on October 24, and again on November 21. The school is in charge of Mr. Louis Ahenakew, who resumed his duties here after an absence of two years, during which time he had charge of the school at Big river.

There are on the reserve thirty children of school age; fifteen in the vicinity of the school; fourteen present on the occasion of my first visit, and nine at the second; and the average attendance for ten months to October 31, was nine pupils.

This school has gone seriously back within the last few years. The condition of the classes, as well as of the building, the furniture, and the school material, bespeak neglect. Mr. Ahenakew, though an Indian and a man who seldom reads a book or even a newspaper, has very fair intellectual capacity. He formerly did very good work in this school and may succeed in restoring it to its former condition.

While the condition of the building and its surroundings shows neglect, the structure in itself is one of the best, and it occupies a clear, dry, and healthful location.

BIG RIVER DAY SCHOOL.

Inspected October 20. Children of school age on the reserve, twelve; in the vicinity of the school, eight; enrolled, nine; present at inspection, six; daily average for twelve months ended September 30, six and a half.

Four of the pupils enrolled are in standard I, and five in standard II.

William Bear, an ex-pupil of the Battleford industrial school, had taken charge here at the beginning of the month. He is a young man of fair intelligence, ability and zeal, and an exceptionally good example among the people of his race. But like most of our day school teachers, he has not attained the qualifications of a public school teacher, nor had any special training for his work.

The school has now been in operation for five years and the results are as yet very

insignificant. However, there are prospects of at least some improvement.

I visited the reserve again recently. It was vacation-time and the school was not in session; but I observed in connection with it a thrifty garden, securely fenced and well cultivated, one of the evidences of the interest which the teacher takes in his work and in things associated with it.

STURGEON LAKE DAY SCHOOL.

Inspected October 28. Children of school age who should attend, fourteen; actually enrolled, nine; present at inspection, six; average for nine months from January 1 to September 30, six.

Of those enrolled, seven are in standard I, and two in standard II.

The teacher, Robert Bear, is a man of sufficient intellectual capacity, but lacking training for his work; and although he has had years of experience he has failed to profit by it, perhaps owing to lack of interest.

The school was moved in January, 1904, to its present site at the Narrows, and as these children had never previously been in school, no great advancement can as yet be looked for.

The building, a new log structure, is of suitable description, but was liable to be cold owing to the shrinking of the logs. Provision has since been made for lathing and plastering. A comfortable teacher's dwelling convenient to the school has been provided by the Church of England.

SIOUX MISSION (WAHSPATON) DAY SCHOOL.

This school is situated on the Wahspaton reserve, sometimes known as Makoche Washte, nine miles northwest of Prince Albert, in the Carlton agency.

It was inspected on November 4. Miss L. M. Baker, the missionary of the Presbyterian Church on the reserve, is the teacher.

There are on the reserve seven children of school age; enrolled, the same number; present at inspection, four; and the daily average attendance for ten months to October 31, was five.

One pupil is in standard I, five are in standard III, and one is in standard IV. They are bright, and are making fair progress, particularly in speaking and reading English, though their hours in school are very irregular, as they frequently come only when sent for, and are dismissed also at various hours. It is evident, however,

that in school their time is well occupied with a range of useful instruction not limited to their text-books or to the ordinary programme. In recitation they display interest and animation, and no diffidence whatever.

The sum of \$50 had been spent a short time before on the school-house, but it

was still only moderately comfortable and convenient.

JOHN SMITH'S DAY SCHOOL.

Date of inspection, January 13. Children of school age on the reserve, eighteen, all of whom were enrolled; present at inspection, five; days of school in 1904, one hundred and seventy-eight; average attendance, seven.

Thirteen pupils are in standard II, three in standard III, and two in standard III. Miss E. Shipman has had charge of the school for four years past. She lives abroad from the reserve, and has had little intercourse with the parents of the children, and consequently little influence. She holds no regular teacher's qualification, and her work is but a very indifferent success. A well qualified and energetic teacher living on the reserve should do good work here, as the conditions are much the same as those obtaining in a white community.

The furniture gave evidence of but poor care; some of the desks and benches were damaged, the lesson cards were almost used up, and the wall maps were in bad repair. For this state of things the teacher was not entirely accountable, as the school was for a time used for services on Sundays, and the care of the interior was

to some extent beyond the teacher's control.

The building was in good repair, and is one of the best on our reserves, bright, comfortable, and suitable in every way.

JAMES SMITH'S DAY SCHOOL.

This school is located on the north end of James Smith's reserve at Fort à la Corne. It was inspected on January 18.

There are thirty-two children of school age on this part of the reserve, and the same number enrolled. There were twenty present at inspection. School was open for two hundred and eleven days during 1904, and the daily average attendance for that time was nine and one-third.

Thirty of these pupils are graded in standard I, and two in standard II.

Mr. D. McDonald has conducted the work of this school now for nearly five years. The school population, as is indicated above, is large, and the children's homes are all within a mile and a half, and most of them within a mile, of the school, so that the opportunities for a flourishing school are exceptionally good. That the attendance should continue so irregular, and that only two pupils should be advanced as far as the second standard, is extremely disappointing. The teacher has good control over his school, and in obedience and manners the pupils are properly disciplined; but in connection with the actual work of instruction there is a signal lack of thought and interest.

SOUTH FORTE A LA CORNE OR BIGHEAD'S DAY SCHOOL.

Situated on the south end of James Smith's reserve. Inspected January 16. There are twenty-one children of school age in this part of the reserve, all enrolled as in attendance at some time during the year. There were seventeen present at examination. There were two hundred and twenty-six days of school during the twelve months ended December 31, and the average attendance was thirteen pupils.

All are in standard I, ten being in the senior division and seven in the junior. The teacher, Mrs. Ada A. Godfrey, had been in charge for a little over a year, and prior to that time none of these children had attended school. The senior division has made fair progress in reading, writing, numbers and English; and the junior

division has made a good beginning in similar work. Both teacher and pupils engage in their work with enthusiasm and with evident enjoyment. Sewing is taught, as also the knitting of socks, mitts and mufflers. Singing is taught with good effect. The majority of the pupils are able to strike accurately the various notes of the octave from a given key, and almost all are able to join in the singing of familiar hymns in English.

Mrs. Godfrey commands the confidence of the parents and the attendance of their children at school through her earnestness and deep interest in the work, and her success should be an example for others engaged in similar duties. It is by personal effort that she has secured the attendance of four girls between fourteen and eighteen years of age, who were present at the examination, and who are receiving much benefit, taking part in the exercises without any 'gaucherie' or shamefacedness.

The school is well located on a small elevation and convenient to the homes of all the children except one or two. It is rather small for the present attendance, and the equipment was incomplete, a matter which, however, was receiving attention.

WHITEFISH LAKE DAY SCHOOL.

Located toward the north end of Whitefish Lake reserve, in the Saddle Lake

agency. Date of inspection, April 7.

Twenty-three children were enrolled, which is all that are of school age in this part of the reserve. Present at inspection, twelve. School was open during the twelve months ended March 31, one hundred and seventy-nine days, and the daily average attendance was eight pupils.

Walter J. Chappell, a boy of seventeen years, was in charge of the school, acting as substitute for Miss Batty, who was on leave of absence at the time and after-

wards resigned her position as teacher.

All the pupils were in the first standard, and were arranged in three classes. The teacher, inexperienced as he was, had had no instructions as to his duties or how best to perform them, and the work was going badly. In fact, there was but little to show for the work of the entire year.

The school material was in the worst confusion, and did not correspond with the return as to quantities on hand. A careful inventory was taken, the stationery put in order, and the teacher directed as to his duty in this regard.

GOODFISH LAKE DAY SCHOOL.

This school is situated in the southern portion of the Whitefish Lake reserve. It was inspected on April 7.

There were enrolled nineteen children, of whom twelve were present at examination. School was held two hundred and twenty-two days in the twelve months, ended March 31, and the average attendance was ten and a half.

Mrs. Smith continues to conduct the school, but with only moderate success, and less than formerly. Interest appears to be lacking, which accounts in part for the fact that the bigger pupils do not attend with any degree of regularity. Of those in attendance fourteen are in standard I, and five in standard II.

STONY (EAGLE HILLS) DAY SCHOOL.

Inspected June 16. Pupils enrolled, six; present, two; of school age on the reserve, six; average attendance for past year, four and a half. In addition to these two young men who are above school age attend at times. At the time of inspection the two at school were the only children on the reserve, the rest being with their parents camped abroad for one reason or another, a few visiting across the line, but for the most part engaged at work near the town.

The present teacher, Mr. Leffler, has had charge since August last, and whatever results of school work there are to be seen have been accomplished during this period, though the school had been in operation for three years previously. The pupils are still all in the first standard, and the progress is certainly nothing remarkable; but the beginning of school work here is even more tedious than among Crees, and yet signs of success are not altogether wanting. Mr. Leffler is proving a particularly useful man here, and the Indians like him for the interest he manifests in their welfare.

RED PHEASANT'S DAY SCHOOL.

Inspected June 15. Children of school age on the reserve, fourteen; enrolled, eleven; present, nine; average for past year, six.

Mrs. Jefferson has been in charge of this school for ten years, and the success of the work during that period has been rather good and uniform, especially in view of the fact that the school is constantly drained of its best material in order to recruit the attendance of the industrial school.

Eight pupils are in standard I, two in standard II, and one in standard III. Some of these are, it is true, not as well advanced as might be expected from the time they have been in school. The use of English should be better since the work of the school is aided by the frequent use of the language on the reserve.

POUNDMAKER'S DAY SCHOOL.

Inspected June 20. There are nine children of school age on the reserve, and the same number enrolled at school; six present at inspection; and a daily average of four and a half for the past twelve months.

Miss Jennie Warden has been teacher since October 1 last, and the work has been continued in much the same way as formerly. The pupils are all in standard I, all the more advanced having been removed for the past few years to Thunderchild's boarding school. Miss Warden considered her appointment as but temporary, but in the meantime she was punctual in the discharge of her duties, and was meeting with some success.

LITTLE PINE'S DAY SCHOOL.

Inspected June 20. Children of school age on the reserve, fourteen; enrolled at school, eleven; present at inspection, six; average for the past year, eight and a half.

Mr. C. T. Desmarais has been teacher here for the past nine years. Very few of his pupils have ever left to attend the industrial school, and yet none have ever been advanced beyond the second standard. At the present time ten are in standard I, and one is in standard II. The attendance could be improved, but even as it is, it affords an opportunity for valuable work. The progress in the ordinary studies is but slight, nor are these supplemented by any special training such as is found where teachers are alert and interested in their work. It must be said, however, that the condition of the work shows slightly better than in the past, which gives hope for further improvement.

THUNDERCHILD'S DAY SCHOOL.

Date of inspection, June 29. There were five pupils enrolled, two present at inspection, and the daily average for the past year was one and a half. On fifty-five school days no pupils attended.

Mr. G. F. Gibbs is the teacher, and although holding excellent qualifications he has no influence whatever with the Indians, and without it he can have little success. Of the five pupils enrolled, four are in standard I, and one is in standard II. There is no progress, and cannot be without a better attendance.

i

SESSIONAL PAPER No. 27

The school-room was in bad condition. Scrubbing was neglected, and sweeping and dusting done only once a week. On the day of inspection the room was dirty and the furniture unfit to touch.

MONTREAL LAKE DAY SCHOOL.

This school was inspected at the time of the recent annuity payments, or rather as I was returning from the payments farther north, on August 23.

There were forty-nine pupils enrolled, thirty-seven present at inspection, and an average attendance of nineteen for the past year, including two hundred and fifty-seven days of school.

Thirty-nine pupils were in standard I, nine in standard II, and one in standard III.

The teacher is Mr. J. R. Settee, a married man of twenty-seven years of age, and an ex-pupil of Emmanuel college, though not in treaty. Mr. Settee acts as overseer of the band as well as teacher; and it is doubtful if on the whole a better man could be secured for the combined duties. His qualifications as teacher are barely sufficient, as he has had no special training for the work, but his example and in fluence are good both in the school and elsewhere.

The attendance is necessarily irregular, as a large percentage of the pupils have no opportunity of attending except when they accompany their parents to the treaty payments at this point and camp with them here for a few weeks. Considering this the progress is satisfactory. The pupils are bright, read audibly, and speak out freely what they know.

By authority of the department I made arrangements for the erection of a new school building of a description very much improved on the one in use up to the present, which, never a suitable school building, is now no longer fit for occupation.

OTHER DAY SCHOOLS.

The day school at Little Hills, near Lac la Ronge, was not inspected, as it was vacation-time when I visited that part, and the children were camped at different places. This at any rate is only nominally a school, and will probably be closed on the opening of a boarding school, which it is proposed to build on the shore of the lake, about ten miles distant.

The day school on the Moose Woods reserve was not inspected during the year, as I did not have an opportunity of visiting that reserve.

I have, &c.,

W. J. CHISHOLM, Inspector of Indian Agencies.

Qu'Appelle Inspectorate,
Balcarres, Sask.,
October 4, 1905.

Frank Pedley, Esq.,
Deputy Superintendent General of Indian Affairs,
Ottawa.

? Sm,—I have the honour to submit the following report of my inspection of the industrial, boarding and day schools of the Qu'Appelle inspectorate.

QU'APPELLE INDUSTRIAL SCHOOL (ROMAN CATHOLIC).

My inspection of this school commenced on July 17 and terminated on July 29. Staff.—The staff at this school is as follows:—

Rev. J. Hugonard, principal; Rev. Father Geelan, assistant principal; M. H. Lynch, book-keeper; E. R. Paneuf, teacher, junior division; Wm. Crossley, carpenter-instructor; D. McDonald, blacksmith; Jas. Z. Lafleur, baker; J. B. Richer, shoemaker; H. Poirier, tinsmith; J. Watson, assistant farmer; Sister Goulet, matron; Sisters Bergeron and McMillan, assistant matrons; Sister St. Arnold, infirmarian; St. Agnes, teacher senior division, girls; Sister Mariani, teacher junior division, girls; Sister Lamontange, laundry; Sister Bauen, cook.

Since the disastrous fire of January, 1904, the school has been kept running under great difficulties. The girls used the mission church, a quarter of a mile away, for sleeping quarters for some months, until a temporary building was erected. The boys are quartered in a temporary building erected near the site of the burnt school. The reverend sisters are using one of the buildings saved from the fire as sleeping quarters, and another building is used as a dining-room and kitchen. A temporary building has been put up as a hospital.

Classes.—Standards I and II, girls, are taught by the Rev. Sister Mariani, in a room that was formerly used as a paint-shop. There were thirty-nine girls in standard I and I and ten in standard II. Many of the children were quite young, in fact, they

were just beginning to pick up English. Sister Mariani has the faculty of making them speak out. The discipline was good and the children were clean and tidy.

Standards III, IV and V, girls, were taught by Rev. Sister Agnes, in a room of a building that was formerly used a a junior boys' class-room. There were seventy-four girls in this room, thirty-six in standard III, twenty-three in standard IV, and fifteen in standard V. I found many of the children well advanced in their different

studies, particularly in arithmetic and writing.

Standards I, II, III, IV and V, boys. Mr. E. P. Paneuf, the junior teacher, had charge of all these classes until a successor was appointed to Mr. M. H. Lynch, who had been transferred to the position of book-keeper. The class-room is situated on the ground-floor of a temporary building that was erected for the boys. I found many of the boys quite smart in answering the questions put to them in reviewing the work. The discipline was good and the teacher had complete control over the boys. The room was well ventilated and the boys were neat and clean.

Carpenter-shop.—Mr. Wm. Crossley, the carpenter-instructor, is a first-class workman, and he is giving the boys a good training. Several of the boys were out earning \$2.50 per day, at the time of my inspection. The boys spend half the day in class-room, the other half in the shop. There were nine benches in the shop and these are usually well occupied. I had the boys from this institution build two houses and a large barn for the Qu'Appelle agency, and I am perfectly satisfied with the workmanship.

Blacksmith-shop.—Very little is being done in this line in the way of teaching the boys. It is almost an absolute necessity to have a shop of this kind in connection with a big school like this. Two boys were in the shop at the time of my

inspection.

Tin-shop.—This shop is kept up more for the convenience of the school than for the benefit to the boys. Two or three boys assist the tinsmith, who seems to have a good deal to do.

Boot-shop.—I found four boys at work in this shop. They were all quite expert at the work and always busy. About fifty pairs of boots are mended in a week.

Bake-shop.—About twelve hundred loaves of bread are turned out of this shop each month. Four boys are kept at the work in the morning and four in the afternoon. I found everything in connection with the shop clean and tidy.

Laundry.—The laundry is in a separate building and the work is carried on under

the supervision of a sister. There are two wash days a week. One day the work is done by the boys washing their own clothes and one day by the girls.

Milking Class.—Cows are driven into a yard by the boys, night and morning, and the girls are detailed off, under a sister, to do the milking. I consider this a splendid idea. Since the fire a small dairy has been built and the girls bring the milk from the yard to this building and look after it.

Garden.—The school has a beautiful garden and people come from all parts of the district to see what is being done at the school in this line. The children get a thorough training in gardening under direct supervision of the principal.

Stables.—I visited the stables early in the morning and late at night and I found

everything in good order. The animals are properly cared for.

Farm.—The farm was visited and I am satisfied that the boys get a proper training in this line. The land was well tilled and the grain was well sown. I saw some breaking here that was equal to any I have ever seen. Three boys were ploughing on the summer-fallow when I was at the farm. Six or eight boys are detailed off each day for farm work.

CROWSTAND BOARDING SCHOOL (PRESBYTERIAN).

I inspected this school on September 5, and found forty-eight pupils enrolled. The school is under the auspices of the Presbyterian Church.

The staff of this school is as follows:-

Rev. Mr. McWhinney, principal; Miss Gilmour, matron; Miss Dunbar assistant matron; Miss McLaren, teacher; Miss McLeod, seamstress; Mr. W. J. Brigham, instructor.

The children were just returning from their midsummer holidays and looked strong and healthy.

I was well pleased with the manner in which the children went through the different exercises in the class-room.

The building is in good repair and is heated by a furnace. The premises were neat and tidy.

I found the basement from cellar to garret scrupulously clean.

The farm in connection with this school is a model one, and some of the best grain in the country was produced here.

The stables were found to be in first-class condition and the farm stock was

looking fine.

I examined the books and found that they had been neatly kept and in a business

like way.

The department and the Presbyterian Church are fortunate in having a man of Mr. McWhinney's stamp to conduct this school. The children are receiving an excellent training.

KEYS DAY SCHOOL (CHURCH OF ENGLAND).

While at Pelly, I inspected the day school taught by the Rev. Owen Owens. The children were heard, going through their different exercises and were quite right. The building was well ventilated and the children were neat and clean.

FILE HILLS BOARDING SCHOOL (PRESBYTERIAN).

This school was inspected on January 31, 1905.

The staff of the school is as follows:—

Miss Kate Gillespie, principal; Miss Janet Gillespie, matron; Miss Tims, assistant matron; Mr. Wm. Gordon, teacher and farmer.

There were seventeen children enrolled at the time of my visit; fourteen were in the class-room and three on the sick list.

27—i—27

The children were neat and clean and were comfortably clad, and I was told that the health of the children had been fairly good throughout the year.

They were examined in their different class work and were very bright.

The dormitories were scrupulously clean and well ventilated, in fact, the whole building was clean.

The premises surrounding the school were very tidy indeed. The boys of this institution receive a thorough training in the care of stock and general farm work. The girls are taught all branches of household work.

REGINA INDUSTRIAL SCHOOL (PRESBYTERIAN).

Having received word of the death of Rev. J. A. Sinclair, I was instructed to proceed to Regina and install Mr. R. B. Heron as acting principal and at the same

time to make an inspection.

The staff is as follows: R. B. Heron, acting principal; J. Quigley, senior teacher and accountant; G. D. McEacheran, assistant principal; A. Tripp, carpenter; Miss Sarah McKenzie, matron; Miss A. A. Chappelle, teacher; Miss M. Cowan, seamstress; Miss M. McKenzie, cook; Mrs. Herman, laundress; John Matheson, carpenter; E. Goforth, furnace-man.

I made a complete audit of the books in the office and found that the work had been well done by Mr. Quigley. Balance sheets were made out and forwarded to the

department.

Junior Class-room.—Miss Chappelle is the teacher. There were seven children in standard II and twenty-one in standard I. I heard the children go through their different exercises and had only one fault to find, and that was, that they did not speak out so that they could be heard easily. I found the class-room clean and well ventilated and the children were also clean.

Senior Class-room.—Mr. J. Quigley, teacher. The following is the grading of the classes in this room: standard III, seventen; standard IV, twenty; standard V, seven, and standard VI, seven. The children in this room were found to be well

advanced in their studies, particularly in arithmetic and writing.

There is a sewing-room in connection with this school and girls are detailed off

each morning for instruction in this branch of the work.

I examined the farm stock and found there were twenty-four head of horned stock, twelve horses and sixty-five pigs. Some of the horses were well advanced in years and are of little use.

There is quite a nice-sized farm in connection with this school, and I have no doubt good work will be done on the farm in the future under Mr. Heron's super-

vision.

The school building is very much in need of repairs. A report on this matter is now in the hands of the department.

A new heating plant was being installed in the school at the time I was making

my inspection.

Dr. Graham, of Regina, is the medical officer, and I understand there had been very little sickness during the year.

COWESSESS BOARDING SCHOOL (ROMAN CATHOLIC).

I inspected this school on March 13. The staff consists of a principal, Rev. Father Parault; an instructor, Bro. Fafard, and five sisters of the Grey Nuns Order.

I found the school scrupulously clean and the children healthy and warmly clad. I examined the children in their different classes and was very much pleased at the way in which they went through their different exercises.

The school has a nice little farm in connection with it and the boys receive an

excellent training in this branch of the work.

I examined the books of the institution and found the school in good standing.

ROUND LAKE BOARDING SCHOOL (PRESBYTERIAN).

The staff of this school consists of the following:—Rev. H. McKay, principal; Mrs. McKay, matron; Miss Salmack, teacher.

The building is a frame structure heated by a furnace and has a water system. I found the buildings from cellar to garret scrupulously clean. The basement is divided into a laundry and Indians' waiting-room.

The class-room is situated in a building separated from the school. I found fifteen boys and fourteen girls enrolled, graded as follows: standard I, eleven; standard II, eight; standard III, six; standard IV, one, and standard V, three.

I had the children go through their classes and found them exceedingly bright. The school has quite a nice little farm and the boys receive a good training in this line.

I have, &c.,

W. M. GRAHAM, Inspector of Indian Agencies.

Alberta Inspectorate, Gleichen, August 28, 1905.

FRANK PEDLEY, Esq.,

Deputy Superintendent General of Indian Affairs, Ottawa.

Sir,—I have the honour to submit the following report on the inspection of day, boarding and industrial schools for the year ended June 30, 1905.

ST. ALBERT BOARDING SCHOOL.

This institution is under the auspices of the Roman Catholic Church and is located on a pretty elevation on the north side of the Sturgeon river and overlooking the village of St. Albert.

Besides the Rev. Sister Dandurand, who is not only principal of this institution, but Mother Vicar of the Episcopal district of St. Albert, there are fourteen sisters filling positions on the staff, one brother in charge of the boys, and bandmaster as well, and four brothers in charge of the farm, stock and gardens. These four brothers also instruct the boys in all details of farm work.

There were thirty-six Indian boys and a like number of Indian girls enrolled when I visited the school on August 5, last. They were classified as follows:—

		Labite
Standard	I I	43
	II	
"	III	16
"	IV	5
	Total	72

In addition to the seventy-two Indian children, there were about a like number of children of mixed blood in attendance. From the fact that I visited the school during the summer vacation, I was unable to hear and see the children at work in the class-room.

The Sisters of Charity own about three hundred and thirty acres of land at this point and it is used for the benefit of this school. Over two hundred acres were then $27-i-27\frac{1}{2}$

under crop and a large piece of new land had recently been ploughed for the first time.

The crop looked magnificent and the well-kept garden contained all the principal varieties of vegetables and small fruits.

There was owned at this institution, one hundred and twenty-five head of cattle,

eighteen horses, six colts and about two hundred fowls.

The boys are here given practical instruction in almost all work appertaining to diversified farming and gardening, and the girls are taught sewing, mending garments, cutting and making new clothes, pastry-baking, cooking, laundry work of all kinds, carding and spinning wool, fancy-work, and in general, all manner of housework.

The main building is 180×35 feet with a wing 30×50 feet and both building and wing have four floors and basements. The principal outbuildings are: laundry, repairshop, bakery, ice and meat-house, granary, implement-shed and cattle and horse stables.

The main building was in perfect order, inside and out, and in front there was a nicely treed lawn with well kept walks and beds of flowers. All outbuildings were

in a good state of repair.

A well 115 feet deep, furnishes an ample supply of good water. The motive power used to operate the pump is a hot-air engine. The pump discharges into a large tank in the attic and from this tank water is distributed to all parts of the building. In addition to the water-supply, there were twenty fire-grenades, four extinguishers and other appliances to fight a fire.

The four bath and six toilet-rooms were very conveniently located.

Dr. Tierney visits the school whenever requested to do so, and in addition, there is a neatly arranged dispensary under the charge of the Rev. Sister Wagner, who fills the position of health surveyor at this institution. There was no one ill, however, at the time of my visit and I was informed the pupils had enjoyed good health for a long period. The natural drainage, located as this school is, should be almost perfect.

ST. JOSEPH'S DAY SCHOOL (ROMAN CATHOLIC).

This school was inspected on July 29, 1904. Miss DeCazes, teacher, enrolment, twenty-three. The average attendance for the fiscal year before the inspection was six. Two boys and one girl arrived at 10.30 a.m. Miss DeCazes is reported to be anxious and willing to do all in her power to secure a regular attendance of the children of this reserve to the school. She has so far, unfortunately, failed.

One child had passed to standard II, the others, when present, were trying to master the alphabet. The school is a log building with a shingle roof, the inside walls are wainscotted for about four feet above the floor. The building is in fair condition but a few minor repairs are required to fit it for use during the cold weather.

WHITE WHALE LAKE DAY SCHOOL (METHODIST).

Visited this school on Saturday, July 30.

Mr. W. G. Brewett had assumed charge of this school a few weeks before. Twenty-five children of school age were reported to be on the (Paul's) reserve. Of this number twenty-two were enrolled. The average attendance was three and one-half. Although this school has been in operation for a number of years the twenty-two pupils were all classified under standard I. The Indians agreed to send their children to school on the Saturday that I was there, but failed to fulfil the promise. I did not, therefore, hear or see the children in the class-room.

The school building was not in good repair. The sills were considerably decayed and the walls had settled. The floor was several inches higher in the centre than

along the walls. The Rev. Mr. Hopkins and Mr. Brewett offered to make the necessary repairs, gratis, if the material was placed on the ground.

Mr. Brewett holds a second-class Ontario certificate.

The St. Albert boarding and St. Joseph and White Whale Lake day schools are within the Edmonton agency.

ERMINESKIN'S BOARDING SCHOOL (ROMAN CATHOLIC).

This school is located on the Ermineskin reserve, Hobbema agency, and within one mile of the Calgary and Edmonton branch of the Canadian Pacific railway.

I inspected this school on September 27, 1904.

The staff then comprised: Rev. Sister St. Jean de la Croix, superioress; Sister Lutgarde, teacher; Sister Elzear, assistant teacher; Sister St. Flani, boys' seamstress, Sister St. Ferdinand, girls' seamstress; Sister St. Helen, laundress; Sister St. Sylvere, baker; Sister St. Clemener, cook; and Sister St. Eusebe, assistant cook.

There were twenty-seven boys and twenty three girls present, classified as follows:

Standar	d I	 	:	 24
"	II	 		 4
"	III	 		 11
"	IV			
"	VI	 		 3
	Total	 		 50

The pupils were clean, well dressed, under the complete control of the teachers and recited their lessons very correctly and in audible tones. An examination of this kind would satisfy any one, I think, that Sisters St. Lutgarde and St. Elzear were proficient teachers and that Indian children can be induced to speak and read in an audible tone.

About twenty-two acres of land is inclosed with a post and wire fence. The buildings in connection with the institution are within this inclosure, so is the garden. The remainder is used for pasture grounds. The buildings are located on an elevated piece of ground. The natural drainage should, therefore, be good.

The building is frame, three stories with a basement. The main building is 40 x

50 feet and the annex about 20 x 25 feet.

The first floor of the main building contains the large class-room and the refectory. The class-room had twenty-eight patent desks, four black-boards, one box stove, an organ and the usual minor appliances that are required in such a room. The refectory contained four tables and other articles generally used in such rooms. The kitchen is adjoining and in the annex that I have referred to.

The dormitories are on the second and third floors. The one used by the boys had twenty-five iron bedsteads, with ample clean bedding, fifteen wash-basins on a long stand and apartments for the individual clothing of the boys. The girls' dormitory, on the third floor, contained twenty-seven bedsteads, five iron and twenty-two wood, on which there was plenty of clean bedding. Wardrobes, wash-basins and towels were here, too.

In the sewing-room, on the second floor, were observed samples of knitting and sewing that was done by the girls, and the work was excellent.

New floors of maple had recently been laid in the refectory, class-room, hall, kitchen and private apartments of the staff.

There is a good frame stable and five cows furnish sufficient milk for the staff and pupils, as well as a supply of butter for the staff. There were eight other head of cattle, two horses and a reasonable number of fowls.

There was not one case of sickness and I was informed that the health of the pupils had been satisfactory for a long period before.

There was an old building in use for a laundry. With this exception all the buildings were in good condition and meet the requirements. The building is heated with eleven stoves. Wood is fairly plentiful here and the cost is moderate. I noticed a great deal of horizontal pipe in connection with these eleven stoves. Soot is liable to lodge in horizontal pipe, catch fire, and the fire risk is, therefore, much greater.

The business affairs seemed to have been conducted on principles of economy. The receipts for the fiscal year 1903-04, were seventy-one dollars and one cent greater

than the disbursements.

Sufficient garden stuff and roots were grown for the use of the institution. The industrial training of the boys is limited to the care of the stock, gardening and chores. The girls assist at cooking, baking and general housework, in addition to sewing, knitting and some fancy needle-work.

The pupils in attendance were drafted from the following points:

Ermineskin's reserve, Hobbema agency	18
Samson's reserve, Hobbema agency	8
Louis Bull's reserve, Hobbema agency,	2
Enoch's reserve, Edmonton agency	15
Alexander's reserve, Edmonton agency	1
Michel's reserve, Edmonton agency	5
Non-treaty	1

LOUIS BULL'S DAY SCHOOL (METHODIST).

This school is located on the northwest portion of Ermineskin's reserve, Hobbema agency. Louis Bull is the nominal chief of about seventy-eight Indians and the school has been named after him.

Mr. A. A. Goodhand, teacher.

I visited this school on September 27. There were three boys and four girls present. They were all in standard I, and had not made much headway even in this standard. The average attendance was about three. The attendance at this school has not been satisfactory either with regard to numbers or regularity. The teacher reports eleven children living in the vicinity of the school, six on the register and an average attendance during the fiscal year of 1904-05, of about four and one-quarter.

SAMSON'S DAY SCHOOL (METHODIST).

This school, too, is within the Hobbema agency and on Samson's reserve.

The teacher, Miss Klippart, holds a third-class normal certificate. •

Thirty pupils are reported to be living within a reasonable distance of this school and twenty-eight have attended when it suited their notion to do so. The average attendance for the past fiscal year was four and a fraction.

I visited the school on September 26, and there were seven Indian children present. There were, too, twelve white children present. The latter belonged to the agent, clerk, interpreter and resident missionary. The white children have attended this school regularly and the example they have set the Indians in this particular has, unquestionably, been a good one. Moreover the attendance of the whites referred to, has encouraged the teacher in many ways.

One pupil is now reported to be in standard II, the others have not passed from

Miss Klippart seemed to be very much interested in the work and is a capable teacher. It is a great pity that the Indians will not send their children regularly to this school. The location of the school is centrad, the teacher is efficient and anxious to secure a large and regular attendance, but the parents, for petty reasons, have not encouraged her with a regular attendance of their children.

PEIGAN R.C. (SACRED HEART) BOARDING SCHOOL.

This school is located on the Peigan reserve and is under the auspices of the Roman Catholic Church.

The Rev. Father Doucet is the principal. Five sisters assist in the work.

I inspected this school on November 28, 1904. There were fourteen boys and twelve girls present, classified as follows:—

		rupns.
Standard	I,	 13
	II	
"	~~~	O.
•••	111	 U

The children read audibly and on the whole they seemed to be progressing in a satisfactory manner at all their studies.

There was a good supply of books and material to carry on the work. The

children were clean, well clothed and obedient.

The site for the institution was very well chosen. It is near the Old Man's river, affording good drainage, yet not likely to be affected if this river overflows its banks, as it has been known to do on several occasions. The soil here, however, is very light and liable to shift with the high winds which frequent the valley in which this school is placed. The poor soil and high winds are not conducive to the growing of vegetables and there is, therefore, very little garden stuff grown here.

The main building is two and one-half stories, with an annex kitchen. To the rear of the kitchen is a building used for a laundry and the storage of coal. There

is a well near the laundry door which supplies abundance of good water.

The buildings throughout were clean, and so were the premises. The dormitories contained a sufficient number of single iron bedsteads for the use of pupils and on each were spring mattresses, wool palliasses, sheets, blankets, quilts and a pillow. The bedding was clean and rooms well ventilated. There were individual washbasins and towels in both the boys' and girls' dormitories.

There is not a great deal of opportunity here to train the boys at industrial work. Ranching is the chief industry on the reserve, but the school would hardly be justified in operating a ranch. The work is confined to the care of the garden, the two cows that are kept for mileh purposes, and odd chores.

The girls are taught sewing, knitting, darning and general housework.

On the whole this school was very well managed.

PEIGAN C.E. (VICTORIA HOME) BOARDING SCHOOL.

This school is under the auspices of the English Church, and located near the western boundary of the Peigan reserve, within the valley of Pincher creek and about a mile from the Old Man's river. Brockett, a station on the Crowsnest branch of the Canadian Pacific railway, is about two miles distant from the institution.

The location for this school is a poor one. The Pincher creek overflowed its

banks three times within six years and surrounded the building.

The school was inspected on November 29 and 30.

The Rev. W. R. Haynes is principal; Mrs. Haynes, matron; Miss McWilliams, teacher; Miss Edwards, girls' matron; Mr. Ravensberg, assistant principal.

There were nineteen pupils in attendance, classified as follows:—

		•	 Fupits
Standard	I		 14
"	ш		 3
"	III		 2

These pupils read in such a low tone of voice that it was impossible to hear them a few feet away. The attention of both the principal and the teacher was directed

to this fact and a promise was given to try and provide a remedy. With this exception the tuition seems to have been carefully looked after.

Everything, inside and outside of the building, was tidily kept and the old motto, 'A place for everything and everything in its place,' apparently is the rule that is followed here.

The dormitories are roomy and well arranged for ventilation. The class-room has sixteen home-made desks therein that are not very well suited for the work. In other respects it was well supplied with maps, blackboard and other necessary material.

The buildings meet the requirements very well and are in good condition. With the exception of the class-room, which is heated by a large stove, the building is heated by two large furnaces. Coal-oil lamps are used for lighting purposes.

The dormitories contained all that was necessary for the comfort of the pupils. The live stock at this institution consisted of two ponies, three cows, two heifer calves, two pigs and sixteen fowls.

About all the industrial work that can be given to the boys is the care of the stock, gardening and chores. The girls are trained at hand-sewing, knitting, darning, patching and general housework.

SARCEE BOARDING SCHOOL.

This school is under the auspices of the English Church and located on the Sarcee reserve.

I inspected this school on December 16 and 21. Principal, Ven. Archdeacon Tims; assistant principal, Mr. P. E. Stocken; matron, Mrs. Stocken; assistant matron, Miss Crawford.

The ten boys and six girls were classified as follows:

		Pupils.
Standard	<u>I.</u>	6
"	III	4
"	IV	4
"	V	

The children read audibly and very well and gave, too, definitions of the principal words in the lesson, which indicated a knowledge of the subject under consideration. The pupils in standards III, IV and V exhibited a fair knowledge in other subjects. The class organization, decorum and conduct generally compared favourably with most of the schools that I had visited.

Mr. Stocken holds no certificate of standing as a teacher. It was his opinion that he could qualify, on most subjects, for a second-class certificate.

The main building is in two parts, each one and a half story, and these two parts are connected with a building one story in height. It appeared to me to be a poorly constructed building and difficult to heat properly during cold and widly weather. It is heated by stoves and lighted with oil lamps.

Three cows are kept, to supply milk for the institution, and about twenty-five fowls.

The girls are taught sewing, mending, knitting, darning, baking and general housework. The boys do gardening, in season, and the chores. About half an acre of land is under cultivation. A hail-storm destroyed the entire crop of 1904.

The school is located on high banks of the Fish creek. The natural drainage is, therefore, good.

BLOOD C.E. (ST. PAUL'S) BOARDING SCHOOL.

This school is under the auspices of the English Church and is located near the Blood reserve.

The school was inspected on January 25 and 26.

The staff was constituted as follows:—Rev. G. S. Gale, principal; Miss Wells, teacher; Miss Underwood, girls' matron; Miss Smith, assistant girls' matron; Miss VanBuskert, boys' matron; Mr. Yeomans, farm instructor; Mr. Gallway, assistant farm instructor.

There were nineteen boys and twenty-one girls enrolled, who were classified as follows:—

		Pupils.
Standar	l I	. 10
"	П.,	. 10
46	III,	
***	V	. 7
Not clas	sified	. 2

The two that were not classified had only recently been admitted.

Miss Wells holds a second-class certificate and is apparently an efficient teacher. The pupils were well clothed, clean and recited very well, but not as audibly as I should like them to do. I was informed that they usually spoke in a higher tone of voice.

All subjects of the programme are taught and the children appeared to have a fair knowledge of the topics under review.

The pupils of standard V recited the whole of that beautiful poem 'The Prairies,'—author, William Cullen Bryant. I am impressed with the idea that it is repugnant to a majority of the Indian youths to be compelled to commit a long poem to memory. Indian children have a comparatively short school life and to my mind, these short periods should be used to lay a foundation of knowledge that is most likely to be of practical benefit when they return to their reserves, to be either farmers or farmers' wives, and not to burden their minds with long poems that will in no way assist them to provide bread and butter for themselves.

The buildings here are neatly located around a square of about two acres. The square is used as a playground. With the exception of the building used by the boys for a play-room and dormitory, all other buildings were in good condition and fairly meet the requirements. The building used for the classes is about 24 x 52 feet, with a high ceiling. In it were eleven patent and twenty-two home-made desks, several blackboards, teacher's table, chairs and an organ. This building is used for the regular Sabbath and weekly night services.

A hospital was at one time operated here. The building is not large, but it was in fairly good condition. It was not in use at the time of my visit. The matron had resigned a few months before, and no one had been appointed to take charge of the work.

All buildings have brick chimneys and are lighted with oil lamps.

There is a furnace under the building used by the boys, all other buildings are heated by stoves.

Ten cows are kept, to provide milk and butter for the institution, and about four hundred chickens were raised during the summer of 1904.

Ten acres of new land was broken and fifteen acres had been under oats. In addition there were about ten acres under roots and garden stuffs. The oats were cut when green for fodder and the roots yielded poorly owing to the drought.

The yield was reported to be: potatoes, three hundred bushels; turnips, one hundred bushels; carrots, ten bushels; green and ripe tomatoes, twenty bushels, and seven hundred heads of cabbage.

Boys over fourteen years of age assist at the farm-work, gardening and care of the stock. The girls of like age help at the house-work, do sewing, knitting, darning and mending clothing.

The buildings throughout were neat and clean and so were the premises and lands surrounding the buildings.

The quarter section of land on which these buildings are, is owned by the church. A new building is much needed here for boys' quarters. The one in use is dark and dismal and unfit for habitation.

BLOOD R.C. (IMMACULATE CONCEPTION) BOARDING SCHOOL.

Inspected on January 30. It is under the auspices of the Roman Catholic

Church, and located on the Blood reserve.

The staff consisted of Rev. Father Levern, O.M.I., as principal, and the reverend sisters; Sister Girard, superioress; Sister St. Patrick, teacher; Sister St. Marie Debonsecours, seamstress; Sister St. Majorique, boys' matron; Sister St. Terese, girls' matron, and Sister St. Joseph, cook.

The building is a balloon frame. The central portion is thirty-six feet square, three stories in height. There are wings on the three sides. The rear wing is 20×30 feet, three stories, and the two side wings 32×36 feet, each. A cupola covers a bell on the front of the central portion of the building. The building is in good condition and the perspective pleasing to the eye.

There are large playgrounds, neatly inclosed with a post and picket fence.

Separate grounds are allotted for boys and girls.

The building is heated by two furnaces and oil lamps, are used for lighting

purposes.

The girls' dormitory contained seventeen single iron bedsteads, on which there were wool mattresses, sheets, blankets, quilt, pillow and a white spread, on each. There was a stand between the rows of beds and on this stand were individual wash-basins, towels and soap. The boys' dormitory was likewise furnished, only that there were twenty-one iron bedsteads.

Ventilation of the dormitories was secured by opening the windows.

There were four hand fire-extinguishers and twenty-four grenades at various parts of the building.

With the exception of the play-rooms, the walls of all rooms are lathed and plastered.

The Belly river is a few hundred feet to the west of this school. This river over-flowed its banks during June of 1902 and covered the land around and about the school.

About two and one-half acres of land is cultivated, but the rainfall during the season of 1904, was very meagre and in consequence there was a very light crop.

The boys assist at the garden work, milk, do the bread-making and the chores. The girls assist at cooking and general housework, sewing, knitting, darning and dressmaking.

There is a good well of water for domestic use. River water is used for laundry

purposes.

The earning power of the school was limited to thirty pupils. There were thirty-eight pupils enrolled, classified as follows:—

•	P	upils.
Standard	I	26
	II	
"	III	8

I was informed that three of the most advanced pupils had been transferred to the St. Joseph's industrial school, Dunbow, a few months before. The pupils seemed to be a little timid. They, however, read fairly well, but in too low a tone. The writing books were on the whole clean and the penmanship legible and in some instances very creditable.

The children were well clothed and clean and the building and premises tidily kept.

The class-room contained twelve patent forms, two benches, one desk, two blackboards, four maps and a supply of books and other material. Seven more forms are required for the children then in attendance.

BULL HORN DAY SCHOOL.

This school is located nearer the southern portion of the Blood reserve than is the Immaculate Conception boarding school. It is under the auspices of the Church of England.

Mr. C. H. Collinson was the teacher and misisonary in charge.

I visited this school on February 1, 1905. There were no pupils present. It was a very cold day for children to turn out, but on looking over the register, and from information received from Mr. Collinson and others, I concluded that it was not on the extremely cold days only that the attendance was 'nil.'

I understand this school has since been closed, and in my opinion that was the

best course to adopt.

ST. JOSEPH'S INDUSTRIAL SCHOOL.

This school is also known as the High River school from the fact that it is located on the High river. It is under the auspices of the Roman Catholic Church.

I arrived at this institution on March 25, and left it on April 3.

The staff comprised: Rev. Father Naessens, principal; Messrs. H. F. Dennehy, assistant principal; Charles Gilchrist, senior teacher; F. W. Dennehy, junior teacher; Brother John Morkin, engineer, &c.; Brother Thomas Morkin, farmer; A. C. Smith, baker and butcher; the reverend sisters: Sister Dubord, superioress; Sister St. Mathurin, assistant matron; Sister Mongrain, girls' teacher; Sister Adele, laundress; Sister Leblanc, cook; Sister Gertrude, assistant cook; and Sister St. Gregorie, seamstress.

The Rev. Sister Weeks was at this institution at that time for the purpose of giving the girls instructions in the art of nursing. This sister is not, however, a regular member of the staff.

Mr. Gilchrist holds a second-class non-professional, and Mr. Dennehy a second-class certificate. Sister Mongrain has no certificate of standing as a teacher.

There were sixty-one boys and twenty-two girls on the grant-earning roll and nine non-earning pupils of mixed blood.

Five pupils from the Blood reserve arrived while I was at the school. The other seventy-eight were classified as follows:—

	P	upils.
Standard	<u> </u>	16
- "	<u>II.</u>	18
"	III	22
	IV	
"	V	
"	VI	

Since the last inspection, June, 1903, there were twelve pupils discharged, seventeen admitted and three died.

Class work is carried on each Saturday forenoon in lieu of the afternoon of each Wednesday.

During the whole year the pupils of the senior division follow the half-day system, i.e., they attend class during either the fore or afternoon, and work on the farm, or about the stables, during the other half of each week day. This system, of course, does not tend to advance them in class work. It is, however, considered, by those who have had opportunities to study the Indian question, that the youths of the present

Indian generation are likely to be better citizens if they can be taught how to work and imbued with a willingness to do it, in preference to gaining their livelihood by leaning on others, than to start out on life's journey with a literary education.

The class-rooms were equipped with all necessary furniture, material and appli-

ances generally to carry on the work.

All subjects of the programme are carefully taught and the pupils appeared to

be interested and gaining knowledge in a satisfactory manner.

There are over sixteen hundred acres of land in connection with this institution. Of this area about one hundred and seventy acres are under cultivation. The acreage and yields were:—

73 acres of oats, yielding 2,012 bushels; 4 acres of wheat, yielding 50 bushels; 13 acres of barley, yielding 100 bushels; 22 acres of roots, yielding 8,000 bushels turnips, 1,200 bushels potatoes; 6 acres of brome grass, yielding 40 tons.

A sufficient quantity of vegetables was grown in the garden for home use, and

besides, five hundred tons of prairie hay were put up for the stock.

Eighteen acres of new land was broken and fifty acres summer-fallowed.

The estimated value of the live stock on hand was six thousand three hundred and thirty-two dollars. Besides, there were then fifty head of steers in the stable feeding. These steers were ownd by Messrs. P. Burns & Co. During the winter of 1903-4, forty-four head were fattened for the same firm, and the school in this way converted some of the roots, hay and labour into nine hundred and forty dollars. It was my opinion that about thirteen hundred dollars would be gained in a similar manner from the stock-feeding operations that were in progress at the time I was at the school.

The work of caring for these cattle was principally done by the Indian boys.

Surplus potatoes to the value of four hundred dollars were sold at the beginning

of April

Within the last two years there has been erected a stable covering 32 x 128 feet. There is a loft over this stable for the storage of hay. This building is used for stabling the animals when fattening. A cow shed, 104 x 28 feet, has also been erected.

The following improvements have also been made: engine-room ceiled; metallic ceiling placed on the dining-room and on a portion of the senior boys' class-room; a complete steam heating plant placed in the boys' home, and an acetylene gas plant for lighting both boys' and girls' homes.

I was informed that the new heating appliances gave splendid satisfaction. Less attention is needed than the discarded hot-air furnaces required, and there is a smaller consumption of fuel and abundance of heat during the very coldest weather.

The accommodation supplied for the pupils and staff at this institution is good. There are ample beds, bedding, recreation-rooms within the buildings and playgrounds for both sexes. Buildings and grounds were clean and tidily kept.

The drainage appeared to be first-class and the children were enjoying good

health.

The children were well clothed and got three good meals every day.

The location of this institution is a very good one. About the only objectionable feature is, that it is twelve miles from the nearest railway station—DeWinton.

The department provided the land, erected the buildings, has kept them in repair, paid for the heating and gas plants and a good deal of the furnishings within the buildings and pays a per capita grant of one hundred and thirty dollars to meet the operating expenses.

The institution is now in a good financial standing, carefully managed by a com-

petent staff and doing good work.

RED DEER INDUSTRIAL SCHOOL.

This school is located on the north bank of the Red Deer river and about five miles from the town of the same name.

It is under the auspices of the Methodist Church, and the per capita grant is one hundred and thirty dollars per annum.

The inspection was made during the month of May.

The location, from some standpoints, is a pretty one. It is, however, not as convenient as it might have been when the selection was made and land then could have been purchased for a much less sum per acre than it costs now, to free the school land of small timber and scrub.

Two years ago there were seventy-five acres of the school land under cultivation. Since then one hundred and fifty acres have been cleared, and is now under crop, at an expense of about three thousand dollars.

There are two hundred and twenty-five acres now under cultivation.

The staff of the institution was as follows :-

Rev. J. P. Rice, principal; T. H. Lockhart, assistant principal; W. W. Foster, carpenter; J. B. Griffith, farmer; T. A. McMahon, assistant farmer; Miss Kingston, matron and nurse; Miss Pearce, teacher of senior division; Miss D. Young, teacher of junior division; Miss L. Young, seamstress; Miss Eyre, laundress and assistantmatron, and Mrs. Stein, cook.

There were eighty-one pupils enrolled and classified as follows:-

		Pupils.
Standard	[I,, ,	. 35
***	П	
"	Ш	
"	IV	
"	V	

Fifty-four pupils attended the senior division and twenty-seven the junior division-rooms.

The half-day system is followed here, i.e., about one-half of the pupils of the senior classes devote either the fore or the afternoons to industrial work.

Miss Pearce, holds a second, and Miss Young, a third-class certificate.

The discipline, in and outside of the class-rooms, seems to be well maintained.

The senior class-room is located on the third floor of a brick building that was put up at a later period than the first structure. It is roomy and commands a good view over the farm and over the bottom-lands and hills to the south of the river.

The junior class-room is on the third floor of the original building. It is entirely too small for a class-room. The sewing-room, on the same floor and in the same building, is much the larger of the two rooms, and although it is not well adapted for a class-room, it was, in my opinion, the best of the two, and I advised the reverend principal to change the uses of the two rooms.

The examination of the senior division would have been much more satisfactory, if the pupils had spoken in a louder tone. A majority of the schools seem to be likewise unsatisfactory. There are a few, I am pleased to note some exceptions, where this is not the case and the question naturally arises, is it the fault of the teachers?

The full programme is followed and the pupils apparently were making fair progress, notwithstanding their timidity.

The smaller pupils, junior division, did better in respect to speaking audibly than the senior division.

This institution now has an abundant supply of good water. A well was sunk a few hundred yards northerly from the buildings and a horse-power is used to lift the water therefrom and force it into the stable, school buildings and the principal's residence.

A number of changes are required in these buildings to adapt them for the aecommodation of eighty pupils and a portion of the staff. The original building is of sandstone and it is a substantial structure. It was, however, divided for the accommodation of about fifty pupils and with a laundry in the basement.

The Smead-Dowd system of heating was installed and afterwards it apparently was partially abandoned. The interior, in my opinion, requires a general overhauling and a number of changes made, particularly the removal of the laundry from the basement, as the steam and odour from it permeates the dining-room, kitchen and other apartments.

The brick building used for boys' dormitory, play-room, senior classes and other

purposes is heated by a hot-air furnace.

Oil lamps are used for lighting purposes.

The Missionary Society contributed fourteen hundred and fifty-four dollars towards the support of this school during the fiscal year of 1902-03, and during the following year three thousand eight hundred and fifty-four dollars. A considerable portion of the last-named sum was expended on land improvements that may eventually recoup the society, at least check further inroads into its treasury, by placing the institution in a position partially to sustain the school from the sale of grain grown on the additional land that was cleared and the growing of all the roots and vegetables that are required for home use. It was expected that the earnings from the department would meet practically all operating expenses during the fiscal year recently closed.

The children were clean and comfortably dressed, but I observed a number of wants in the way of new furniture, and that some outlay would soon be necessary towards providing new bedding and odds and ends here and there, throughout the entire institution. The crop this season, which I hear is very promising, will, I hope,

place this school in a good financial position.

Live stock having an approximate value of four thousand two hundred and

eighty-two dollars, was held here on March 31, last.

The area of land in connection with this institution is about eleven hundred and thirty-four acres. A section of this land (640 acres) is about two miles distant from the home farn.

It was set apart for the use of the institution for hay and pasturage purposes. The distance of this section of land from the headquarters of the school, practically precludes its use for the pasturage of work horses and milch cows and necessitates the hauling of hay for the distance stated herein.

The senior boys assist at all branches of the farm work, care of stock, gardening and chores. The senior girls are taught general housekeeping, sewing, mending,

darning and laundry work.

CALGARY INDUSTRIAL SCHOOL.

This institution is located about three miles from the city of Calgary and on the Bow river. There are about two hundred and eighty acres of land in connection.

The department assumes the total cost of maintenance of the school.

I inspected this institution during the month of July, and the staff then comprised: Rev. G. H. Hogbin, principal; Chas. King, teacher; R. H. Young, farmer, Mrs. Hogbin, matron; Mrs. Marriott, cook; Miss Dunlop, housekeeper, and J. D. Lafferty, M.D., medical officer.

Mr. King holds a second-class non-professional teacher's certificate.

There were twenty-seven boys enrolled, classified as follows:—

		Pupils.
Standard	l I	. 2
"	II	. 10
"	III	. 6
"	IV	. 4
"	V	. 5

Thirteen pupils have since been discharged, which will leave fourteen pupils in the institution.

Those discharged have homes at the following named reserves: Blood, Peigan, Sarcee and Blackfoot.

The classes were examined on July 8. The majority of the pupils write legibly and neatly, read audibly and well, and from the definitions they gave of the principal words in the text, I concluded they fairly understood the subject under review. Mr. King apparently is interested in the progress of the boys and was doing his utmost to advance them.

The pupils have enjoyed excellent health during the past year.

This school was opened during December, 1896, or has been nearly nine years in operation. Since that date ninety-four boys have been enrolled, fourteen are reported as dead, which will leave eighty graduates and pupils. Of the number enrolled, sixteen have been trained in carpentry, but four of this number are reported to be dead.

The main building is of sandstone, and the appearance on the outside is fairly pleasing to the eye. Something, however, is radically wrong with the building or heating appliances, or both, for the cost of heating it is too excessive, and then I was informed that the cold was almost unbearable within it during the cold weather.

The outbuildings, their uses and conditions are: a frame carpenter-shop, in good condition; ice, meat and dairy building, in good condition; frame stable, in good condition; open shed, built of logs, placed upright, with a shingle roof, in good condition; frame laundry and bakery, in good condition; this house is now occupied by the principal for living quarters.

In addition there is an open shed, partially constructed of logs, placed upright, 24 x 60 feet, that is intended for the storage of implements when completed. It yet requires a roof.

The dwelling occupied by Farmer Young, is in a dilapidated condition and it is questionable whether it would be wise to make any expenditure on it.

The fire-appliances appear to be ample. They consist of: a McRobie chemical installation, located in the basement, with a hose on each floor, a stand-pipe from the bottom of the tank, which is located in the attic, to the basement and a hose connection on each floor. A dozen fire-pails, too, are within the reach of the staff when required, together with four fire-axes.

The boys work on the farm, in the garden, milk, bake, feed and care for the stock and do the general chores.

There is no carpenter-instructor employed at the present time.

The farming operations during the season of 1904, comprised and yielded: twenty-two acres of oats, yielding 200 bushels; six acres of barley, frozen; four acres of potatoes, yielding 250 bushels; and eight acres of carrots, parsnips, beets, turnips and garden stuff, yielded 4,000 pounds.

This season about forty-nine acres are under crop.

Grubs did a great deal of damage to the turnips and garden vegetables and sweet grass has taken possession of a considerable portion of the cultivated land.

Eight cows, on an average, were milked during the past fiscal year, and besides supplying the table with milk, there were four hundred and twenty-five pounds of butter made.

Two small blocks of land, lying between the buildings, have been planted with young trees. They are thriving, and from present appearances I think the greater number will grow.

MCDOUGALL ORPHANAGE.

This institution is also known as the Morley boarding school. It is located on the north side of the Bow river and about eight miles from a railway station, on the main line of the Canadian Pacific railway, of the same name. This school is in close proximity to the northeastern limit of the Stony reserve and is under the auspices of the Methodist Church.

I visited this institution near the beginning of the present month, and found six boys and nine girls present. There were, however, forty-two pupils enrolled and classified, at the expiration of the fiscal year, as follows:—

			Pupils.
Standard	l I	 	 20
"	II		3
"	III	 	 12
"	IV	 	 7

Mr. J. W. Niddrie was the principal of this school for several years, and only resigned the position at the expiration of the past fiscal year. Mr. C. B. Oakley assumed the principalship about the end of July. The staff, as now composed, is as follows: Mr. C. B. Oakley, principal; Miss Jull, matron; Miss Rowles, cook; Miss Gibson, laundress; and Mrs. Ralstone, seamstress.

Owing to the absence of the twenty-eight pupils referred to herein, the examination was not a satisfactory one. Those present read fairly well and in a moderately loud tone. The penmanship of both the pupils that were present and those who were absent, was evidence to me that the teacher had been very successful in advan-

cing the pupils in this direction.

I was informed that the parents secured their children about the end of the fiscal year and on the promise that they would return them to the school within three weeks' time. I was also told that it has been the custom at this institution, since its inauguration, to allow the parents to take their children home during every vacation and return them, presumably, at various times and under various conditions. This lax management of this school is neither to the advantage of the pupils nor their parents and it seems to me to be placing the teacher at a great disadvantage, as a great deal of control and general advance is lost when the children are allowed to be away for weeks at a time.

There are over eleven hundred acres of land in connection with this school. This land is well adapted for pasturage, but not for farming, owing to liability of summer frosts. No farming is now carried on, in fact I failed to locate any garden

stuff growing. About forty head of cattle are now owned by the institution.

The main building is heated by two hot-air furnaces and lighted by oil lamps. The furnaces were recently overhauled and they probably will now give better satisfaction than they have done for some time previous to the time they were repaired.

The basement is divided into three parts and for the following uses: girls' play-room, boys' wash and bath-room and girls' bath and wash-room. The two fur-

naces are located in these rooms.

The girls' play-room was in a fair state of repair and the girls' bath and wash-room, too, was in fair order, considering it had a rough board floor therein. The boys' bath and wash-room was in a bad state of repair and unfit for any kind of use. It was, to my mind, a discredit to the institution. The upper portions of the building were in fair condition, but an application of some sort of wall preparation on most of the rooms would improve both the appearance and healthfulness. Annexed to the main building is a log one, that is used for laundry, and to this is attached a poor construction that was in use for a dairy, at least one portion of it, the other portion apparently had been used for meat or vegetable storage. The roof, however, had fallen in and this portion of the structure was not in use. The dairy portion appeared to be kept as clean as it was possible to keep it.

A log-walled building, a few yards from the main building, is divided into two parts. One portion was in use for the storage of groceries, the other portion seems to have been used for the cutting and storage of fuel. The latter portion did not bear evidences of having been cleaned for a considerable period. I particularly refer to the untidiness of some portions of this school's premises for the reason that, if there is one point more than another that the Indians and their children require tuition

on, it is cleanliness and tidiness, and I know that precept counts for little with an Indian if it is not backed up by example.

The class-room is a separate building some distance from the main one. It was found to be in good condition and order, with the exception of the forms, which are home-made and not secured to the floor.

Within the past year a water system was put in at this institution. There was a flowing spring on the hillside about a third of a mile distant from the school. This spring was connected to the school with pipes, placed below the frost level, and now there is an abundance of good water within the main building.

I trust that Mr. Oakley may be successful in placing this school in a better position than it now holds. I am persuaded that he will make an honest attempt to do so any way.

OLD SUN'S BOARDING SCHOOL.

This school is located on the western portion of the Blackfoot reserve and is under the auspices of the English Church.

About four years ago this church was operating two boarding schools on this reserve, one known as the White Eagle, and located within a few miles of the old Blackfoot crossing, and the present Old Sun school. The White Eagle institution was used exclusively for boys and the Old Sun's entirely for girls. There were only about thirty pupils enrolled at the two institutions and the expense of maintaining two staffs, heating both buildings and in other ways almost duplicating the expense, was thought to be a waste of energy and money. The two schools were then amalgamated and since that time the work has been entirely carried on at the Old Sun's building.

This institution was inspected on August 21.

There are fourteen girls and twenty-one boys on the grant-earning list, and there are, besides, four Indian children in attendance who are too young to be so placed under the school regulations. They are aged three, four and five years.

Four of the earning pupils were ill and not in the class-room. They are classified under standard IV.

Those actually in attendance on the day of inspection were classified as follows:

Standard	I	 	 	 				 		. 9
"	II	 	 	 		 			·	. 7
"	ш	 	 	 		 		 		. 5
"	IV	 	 	 				 		. 10
					,					_
	*		٠,							

Standard I.—Pupils read audibly, but there was a tendency to drawl; spelling correct; definitions of words in lesson, sufficiently correct to satisfy one that they understood the substance of the subject.

Standard II.—Pupils read audibly, but lacked in emphasis; spelling, correct; definitions of principal works in lesson, fairly correct, but slow in replying.

Standard III and IV used third reader. This class speak and read in an audible tone of voice; spell correctly; gave fairly good definitions of words in lesson and did better as regards emphasizing.

The arithmetic classes did ont exhibit any marked degree of cleverness. There was room for improvement in penmanship and tidiness of their writing-books. The compositions were fairly creditable and so was the work in other branches.

When Miss Wanless accepted the position of teacher at this school, about two years ago, the children could not be induced to speak above a whisper, now they read and answer questions in a tone that can be heard from one end of the class-room to the other.

27-i-28

Miss Wanless holds a second-class American teacher's certificate.

The class-room is a separate building from the home. It is roomy with a high ceiling and meets the requirements fairly well during moderately cold and warm weather. When it is cold and windy, however, it cannot be kept warm and free from draughts. The old home-made forms, which should have been discarded years ago, are still in use in the class-room. The blackboards require one or more coats of black to make them suitable for the uses they are required for. There was a fair supply of material on hand. A requisition had gone forward for some articles that were required.

The home in which the pupils and staff reside is unfit for use. It is located on a low flat piece of land and with little natural drainage. The ceilings are low and the foundation timbers are partially in the earth and without proper foundations of stone. The sanitary condition of the building is not good. The dormitories are small

with low ceilings and, in my opinion, not fit for use.

There are a sufficient number of single iron beds for all the children and a sufficiency of bedding.

There is a small piece of land under cultivation. In it are potatoes, turnips and

garden vegetables.

The bigger boys do the gardening, care for the stock and do chores. The girls are taught sewing, mending, knitting and general housework of one kind or another.

The staff is constituted as follows: Rev. Canon Stocken, principal; Rev. Stanley Stocken, assistant principal; Mrs. Stanley Stocken, matron; Mrs. Joule, girls' matron; Miss Tranter, cook; Miss Wanless, teacher, and Mr. A. R. Griffin, gardener

and general worker.

The health of the pupils has not been good. Four are now ill and during the last fiscal year, I notice from the hospital returns, seventeen have been, on an average, treated for one ailment or another, during the entire year. I attribute the cause to the unsanitary condition of the school and unsanitary location.

CROWFOOT BOARDING SCHOOL.

This institution is located on the Blackfoot reserve and within a few miles of the old Blackfoot crossing over the Bow river.

This school is under the direct guidance of the Roman Catholic Church.

The location of this institution is a very good one. It is within a few yards of the edge of a bank that is about thirty feet higher than the Bow river bottom-lands. The natural drainage is, therefore, good and with possibilities to carry out easily any artificial drainage that at any time may be considered advantageous. It is within three miles of Cluny station.

This school was inspected on August 24, and the staff as then constituted was as follows: Rev. Father Riou, O.M.I., as principal; and the reverend sisters; Sister Clarissa, superioress; Sister Antheline, teacher; Sister Louis Lenon, girls' matron; Sister Mary, boys' matron; Sister Louis Albut, cook, and Miss Rush seamstress.

There are eleven girls and nineteen boys enrolled and classified as follows:-

	Pupi	us.
Standard	I	-
"	II	2
"	III	L
"	IV	3.

I question whether there is a more efficient teacher within this inspectorate than the Rev. Sister Antheline. She has complete control of the pupils and they are neither timid nor bold.

All the children read and speak in audible tones and there is, therefore, no good ground for complaining on this score with the pupils, or the teacher either, at this institution.

The pupils in the advanced classes not only read in an audible tone, but emphasized and noted the punctuation as well.

The programme of studies is followed and the pupils are well up in all branches

of the work.

There are nine home-made desks in use, which are too few for the number of the pupils enrolled, and, moreover, they are not well adapted for use in a modern classroom. With this exception the class-room is fairly well supplied with the necessary material to carry on the work.

There is ample accommodation within this institution for at least forty pupils. The main portion is two and one-half stories high and thirty-six feet square with two wings two stories in height, each 32 x 36 feet. In addition there is an annex

two stories, 20 x 50 feet.

Both girls' and boys' dormitories are large and well furnished with sufficient single iron bedsteads and plenty of good and clean bedding.

There are separate playgrounds for the boys and girls, and both were tidily kept. There is a garden in connection, in which there were about two acres under poto-

toes and three-quarters of an acre under vegetables of one sort or another.

The boys do gardening, care for the four cows and help to put up a sufficient quantity of hay for the cows, four head of young cattle and for the four horses which are kept for work about the institution.

The girls are taught in all branches of cooking, sewing, darning and mending

clothes.

The building is heated with one furnace and a number of stoves and is lighted by oil lamps.

The health of the pupils has been remarkably good for a long period.

GENERAL REMARKS.

There are no Indian schools within this inspectorate that are not referred to within this report.

I have, &c.,

J. A. MARKLE, Inspector.

BRITISH COLUMBIA, INSPECTORATE OF INDIAN SCHOOLS, 1076 PENDER STREET,

ablaancouver, September 21, 1905.

FRANK PEDLEY, Esq.,

Deputy Superintendent General of Indian Affairs, Ottawa.

Sir,-I have the honour to submit the first annual report of my inspection of industrial, boarding and day schools in this inspectorate, from October, 1904, to June 30, 1905.

SQUAMISH INDIAN BOARDING SCHOOL (ROMAN CATHOLIC).

This school is at North Vancouver, Fraser River agency. It was inspected on November 9, 1904. The staff consists of: Sister Mary Amy, principal; Sister M. Eugene, matron; Sister M. Felician, girls' teacher; Sister M. Jerome, boys' teacher; Sister M. Anatolie, cook; R. F. Richard, O.M.I., chaplain.

 $27-i-28\frac{1}{2}$

Enrolment.—The number of pupils enrolled was fifty-nine: thirty-two girls and twenty-seven boys.

Attendance.—The fifty-nine pupils were all present. They were recruited from

Squamish, Howe Sound, and villages in the Fraser River agency.

Classification.—The pupils, both boys and girls, were divided into six classes, ranging from the first primer to the sixth reader. The number in each grade is as follows:—

								Pupils.
Standard	I		 	 	 			 31
	П		 	 	 	• • •,		 14
66 A	Ш		 	 	 			 5
	TV . "		 	 	 			 0
"	V		 	 	 		·	 7
"	VI		 	 	 	• •		 . 2
	т	1						 . 59

Results of Examination.—The examination was most satisfactory. The pupils not only read well, but showed they knew the meaning of the words.

The writing and spelling were neat and good. The arithmetic both on slate and

blackboard was well done.

General Condition of School Work.—The general condition is good. An excellent tone prevails; the entire staff are much interested in their duties, and all work in harmony for the common good.

Equipment.—The class-rooms are clean and well equipped with all that is neces-

sary for successful work, and all was in good order.

Industries.—Garden.—Between three and four acres are worked for vegetables and flowers, and are well kept. There were very good crops of potatoes, cabbage, turnips, peas, &c.

Buildings.—I examined all the buildings, dormitories, dining-room, kitchen, and

store-rooms, and found all clean and in perfect order.

I was pleased with the general condition of this school, and with the very satisfactory training both girls and boys are receiving. I also inspected this school on March 17. Staff was the same as on my former visit, also the number of pupils. Satisfactory progress had been made during the interval, and the children were all well behaved.

ST. MARY'S MISSION BOARDING SCHOOL (ROMAN CATHOLIC).

This school is situated just east of Mission Junction and in the Fraser River agency. It was inspected on December 12. The staff comprised: Rev. J. Tavernier, principal; Rev. J. P. Collins, band master; Mr. J. O'Neil, farm instructor; Rev. Sister M. Stanislas, matron; Sister M. Rogation, teacher of big boys; Sister M. Monica, teacher of small boys; Sister M. Martha, teacher of big girls; Sister M. Conception, teacher of small girls; Sister M. Prosper, cook, boys' department, and Sister M. Michael, cook, girls' department.

Enrolment.—Pupils enrolled, eighty-five; present at inspection, eighty-three;

two were absent, one sick and one visiting friends by permission.

Classification of pupils :—	Bovs.	Girls.	Total.
Standard I		7	12
" II		8	15
" III		12	27
" IV	 . 13	10	23
" V		4	6
" VI	_	2	2
			
Total	 . 42	43	85

Results of Examination.—The pupils read well, the higher grades especially, loud and distinctly. The spelling was particularly correct and without hesitation. The writing good. Copy and exercise books were found neat, clean and nicely ornamented with small coloured maps and drawings made by the pupils. The children were questioned about geography. They readily named and pointed out on the map the provinces of the Dominion of Canada and their respective capital cities, the most important lakes and rivers of the country, as well as the principal mountain ranges and the highest peaks thereof. The arithmetic, oral, written and blackboard was very good. The girls were most advanced.

General Condition of School Work.—The school was found to be in a prosperous condition, the classes well conducted and doing good work. The school hours were: in the morning from 8 to 12; in the afternoon, 1.15 to 2; band practice; 2 to 6 p.m. school time.

Equipment of Class-room.—The supply of reading-books, slates, copy-books, maps and blackboards is suitable and sufficient. The teacher had already asked for some books, dictionaries, histories of Canada and geographies.

Sanitary Condition.—The children looked healthy; only one boy was sick and

he was recovering.

Buildings.—All were inspected and found to be in good order, the dormitories and school-rooms lofty, brightly lighted and hygienic in every respect; every part of the school buildings was very clean and all was satisfactory.

Inspected again on May 8. The staff was the same as at time of last visit. Sixteen pupils had been discharged, but their places had been filled by new pupils, making

the enrolment the same. Present at inspection, eighty-three, absent, two.

Very fair progress had been made since former visit. I found all to be in a satisfactory condition. The boys' building had been freshly painted and looked very well. This school does good work, and the large farm and garden are well kept. The principal and staff deserve great credit.

ALL HALLOWS BOARDING SCHOOL FOR GIRLS, YALE (CHURCH OF ENGLAND)

The school was inspected on November 15. The staff consists of Sister Amy, superior, principal; Miss Kelly, B.A., Miss B. Moody, Mrs. Woodward, Sister Agatha, C.A.H., teachers: Miss Main, matron.

C.A.H., teachers; Miss Main, matron. Enrolment.—Thirty-one, present at inspection, twenty-eight. Three absent

visiting friends by permission.

				T	ot.	al.				 						8	1

Results of Examination.—The reading was clear, distinct and good. Spelling and geography very fair. History good. Singing and reciting excellent. Questions were answerd quickly and correctly. Miss Kelly is very devoted to her work, hence the good results. The girls were clean, bright and clever. The class work was above the average. The school was well supplied with reading and copy-books and other material; also fully equipped with desks, blackboards and maps.

Gardening.—In the large garden all kinds of vegetables are grown. The girls

assist in the garden.

Discipline.—The children are well behaved and little punishment is required.

The staff is efficient and painstaking, and the whole institution is in a good condition. I was highly pleased with my visit.

Inspected this school again on May 10. There were no changes in the staff. Present at inspection, thirty-three. Five children had been admitted and one discharged since my last visit. These girls were very bright and had made favourable progress. Everything was clean from kitchen to attic. The discipline was excellent.

COQUALEETZA INDUSTRIAL SCHOOL (METHODIST).

This school is situated at Chilliwack, Fraser River agency.

Inspected December 13. The staff consists of: Rev. Joseph Hall, principal; Miss Sarah Sprott, matron; Miss H. E. Young, cooking teacher; Miss Ella Toop, assistent-matron; John A. Martin, farm instructor; George A. Horel, carpenter; Jane Toop, sewing teacher; Frances M. Kinley, school teacher; Louise Peregrine, primary teacher; Robt. Marshall, band instructor; Annie Johnson, laundry teacher.

Enrolment.—Number on roll, eighty-three. Present at inspection, seventy-six.

Absent, seven.

I examined the children in reading, spelling, arithmetic and geography. They answered remarkably well. The writing was good. At this school the kindergarten work was especially excellent.

General Condition.—The general condition of the school is excellent.

teachers all appear to be devoted to their work.

Equipment of Class-rooms.—The class-rooms are suitable, and blackboards, maps, books, slates and all school material sufficient.

Industries.—The boys are taught all kinds of housework; farming, including care of stock, ploughing, sowing, cultivating, teaming, reaping, dairying; feeding for dairying and for fattening cattle; blacksmithing, baking and bread-making.

The girls are taught all kinds of housework, including care of rooms, laundry-

work, cooking, sewing, darning, fancy-work and music.

Farming.—Land under cultivation, ninety acres. Good crops were raised last season.

Live Stock.—Horses, six; milk cows, eleven; heifers, seven; beef cattle, two: calves, seven; pigs, seventy-two; poultry, two dozen fowls.

Dairy.—Value of cream sold to creamery and used in institute for eight months

ended December 31, 1904, approximately \$296.60.

Carpentry.—The foreman has had a number of boys working on the new building for the principal's residence. All the work so far has been done by the pupils and the instructor.

Fire Protection.—The building is provided with fire-escapes, a force-pump, buckets, fireman's axes, fire-extinguishers, and has taps on all the floors connected with water-tanks, and hose always ready.

Admissions and Discharges.—Since July 1, six pupils had been admitted and twelve discharged. Strict discipline is enforced without much trouble, and moral suasion is generally sufficient.

Buildings.—Size of main building, 39 x 105 feet. The extreme width including the kitchen annex at the rear and the tower at the front is 63 feet. There are three flats and a basement, occupying the entire area under the building.

Three barns, a kindergarten or primary school building, a frame one-story cottage, 26 x 34 feet, for the farm instructor's family; a frame building, 20 x 75 feet, containing in its different sections flour-room, vegetable-room, shoe-shop drying-room, wood-shed and carpenter-shop. Also a poultry-house, one root-cellar, a granary, wagon-house, a bake-house, a tank-house connected with the windmill, and a pig-pen.

A principal's residence is sorely needed and is under construction. When this is

completed, there will be sufficient accommodation for the staff.

At this school a class of three was prepared for the entrance examination to the high schools of the province. All of these passed. In all departments the school is doing excellent work.

SECHELT BOARDING SCHOOL (ROMAN CATHOLIC).

This school is in the Fraser River agency.

Inspected on December 27 and 28. This is a new school and was only opened in July. The staff is constituted as follows:—

Sister Teresine, principal; Sister St. Owen and Sister St. Denis, boys' teachers; Sister Victorien and Sister Stephanus, girls' teachers. Sister Mary Colombe, teacher; Sister Amelia, cook.

Enrolment.—Pupils enrolled, forty-six; present at inspection, forty-four. Recruited at Sechelt.

	1 8	28	46

When the school was opened in July, none of these children (except three who had attended Squamish boarding school) knew the letters. The progress that they have made is remarkable, and I cannot speak too highly of the advancement made by the pupils in their studies. The children present a good appearance and are well instructed as regards manners and conduct. The band played very nicely, and boys and girls recited in good style, and for so short a time at school, showed considerable ability.

The Indian parents on this reserve are very much interested in the education of their children, and they themselves undertook to build the school. The original estimate was to put up a building to cost \$6,000, and they would by hand-logging pay for this. When they commenced they were getting \$7.50 per thousand for the logs. But before they got their logs ready for market, the price went down to \$4. This was a very great disappointment to the Indians. They have paid over \$4,000 on the building. The fact that they should pay off \$4,000, shows how they value education.

Equipment of Class-rooms.—Material is sufficient and all in good order.

Industries.—The children are all taught household work, &c. The land is not yet prepared for gardening.

Buildings.—The building is frame, with stone foundation, three stories high and dormer roof, the plan of same being in the form of a 'T'; dimensions of main building 60 x 36 feet, and back wing 30 x 28 feet. At each extremity of the main building there is an 18 x 12 feet wing, containing stairways, lavatories, bath-rooms, &c. Exclusive of these latter, there are twenty rooms and a number of closets, clothes' presses, &c. The building is lathed and plastered throughout, with 4-feet wainscotting in school-rooms, stairways, passages, &c.

The general condition of the school is good and the staff are doing splendid work.

KUPER ISLAND INDUSTRIAL SCHOOL (ROMAN CATHOLIC).

This school is in the Cowichan agency. Inspected on November 22 and 23 and again on March 21 and 22.

The staff consisted of: Rev. G. Donckele, principal; Rev. J. A. VanNevel, teacher; E. Schnee, carpenter; J. M. Reiard, shoemaker; Sr. Mary Albert, matron; Sr. Mary Zenaude, teacher; Sr. Mary Evariste, assistant matron; Sr. Mary Victor, cook.

There were sixty-three pupils enrolled; present at inspection, thirty-two boys and twenty-eight girls; three absent by leave. Recruited from Fraser River and Cowichan agencies.

Desile and alegaifed on follows:

The reading, spelling, arithmetic, writing, geography, map-drawing and Canadian history were very good. On my second visit I was pleased with the progress made since the first inspection. The general condition of school work is very good. Regular hours for school from 9.30 a.m. to 12, and from 1.30 p.m. to 3 p.m., and 5 p.m. to 5.45 p.m. for boys, except the trades apprentices, who work either morning or afternoon; for the girls, class-hours are from 9 a.m. to 12, and from 4 p.m. to 4.50 p.m. There is sufficient material and all in good condition

Industries.—Of farm land there is about seventy acres under fence; about thirty-

five under cultivation. All the boys help at the farm work.

There are ten milk cows, one heifer, three yearlings, one bull, two horses, two sows, one boar; and sixteen sucking pigs sold lately. All the stock is well cared for. Of poultry there are one hundred and twenty-five hens and fifteen large geese.

In the girls' industrial department there are nine sewing-machines in use.

The senior pupils make the girls' clothing and part of the boys.' they are proficient also in fancy-work, lace-work, lace-making and embroidery. The junior girls attend to the darning. Rewards are occasionally given.

Since my first visit three new pupils were admitted and four discharged with

the consent of Superintendent Vowell.

The new addition to the girls' home was finished and is a great improvement. The school is doing excellent work. The principal and his staff work in harmony and with great zeal to make the school the success it is.

DAY SCHOOLS OF COWICHAN AGENCY.

QUAMICHAN SCHOOL (METHODIST).

Inspected March 23. Present at inspection, seventeen boys and four girls; total, twenty-one. On roll, forty-two from this reserve—sixteen from adjacent reserves, total, fifty-eight.

Classification	is as follows :-	-		1	
Classification	15 00 201-0 11.0		/		Pupils.
Standard	I	. .			21
"	II				18

	v				

Teacher.—Miss Mary C. Drury. The school is held in the church, and if the children continue to attend they will soon improve. Miss Drury takes great interest in the Indians, and visits the parents in their homes. She is very enthusiastic.

QUAMICHAN SCHOOL (ROMAN CATHOLIC).

Inspected November 24. Number of pupils present, five boys; on roll, fourteen. Teacher, Rev. Father Durren. Inspected again on March 23. Teacher, Miss C. Ordano. All pupils are beginners; but as the school is now near the village, it should do better. The children would get on if they would only attend regularly.

SOMENOS SCHOOL (ROMAN CATHOLIC).

I inspected this school on November 24. Pupils present, two boys. Pupils enrolled, fifteen. Teacher, Rev. E. M. Scheelan. The families live close to the school and should send their children. Inspected again on March 23. Present, four boys and four girls. The school had improved a little since former visit.

SONGHEES DAY SCHOOL (ROMAN CATHOLIC).

Inspected November 30, 1904. Present, four boys and four girls. Number on roll, eight, with an average attendance of seven. Also inspected on March 27. Present boys, four, girls six, on roll, ten, average attendance for three months being nine. There are only eleven of school age on the resrve. The school is doing well. The teacher in charge is Rev. Sister M. Berchmans. Pupils are classified as follows:

		Pupiis
Standard	I	 . 3
	II	
"	III	 . 0
"	IV	 3

SAANICH DAY SCHOOL (ROMAN CATHOLIC).

Inspected December 1, present nine boys. Inspected again on March 28; pupils

present, twelve; on roll, sixteen. Wm. Thompson is the teacher.

The children often go away with their parents; I told the chief that they should send the children more regularly. He replied that they would if they had a younger teacher. The school was very clean and looked nice. The pupils were classified as follows:—

			Pupiis
Standar	d I	 	7
	II		
"	III	 	1
	IV		

TSARTLIP DAY SCHOOL (ROMAN CATHOLIC).

Inspected December 1. Pupils present, six boys, four girls; total, ten. Number enrolled, seventeen; average attendance, five. Inspected again on March 28; present, nine boys and five girls; on roll, eighteen, with an average of seven.

The children had made fair progress since former visit. The building was well kept, and pictures and lesson cards made it very attractive. Miss Virginia Hagan is the teacher. She is the daughter of a farmer of that locality, and being brought up there, is well acquainted with the Indians, and is a success in the school.

Teacher, Mr. Wallace J. Knott. He is very devoted to his work, and assists the Indians generally on the reserve. The children did very well, but it is a pity they are away so often.

LYTTON INDUSTRIAL SCHOOL (CHURCH OF ENGLAND).

This school is in the Kamloops-Okanagan agency. Inspected December 16, 1904. The staff comprises: Rev. Geo. Ditcham, principal; Oscar B. Braddick, teacher; Mrs. S. Haynes, matron; Thos. E. Smith, carpenter.

Pupils present at inspection, twenty-five, absent two, total twenty-seven. These were recruited at Ashcroft, Nicola, and Lytton. The children are classified in first, second and third standards. The pupils are bright and for beginners are making a good start.

Of farm land there are one hundred and twenty-five acres under cultivation; hay, roots and grain are raised. Five acres are used in garden, yielding vegetables, melons and small fruits. The live stock is in good condition. There are twenty-seven cattle, Shorthorn and grade; twenty-four sheep, Oxford and Dorset; six horses, Clydes and scrubs; hogs, twelve Berkshire; and in addition, there are forty varieties of poultry.

Building and repairing are done by the boys. This school has only been opened two years; it is laying a good foundation, and with this splendid equipment, will, no doubt, do good work.

For fire-protection there is plenty of water; hose and perforated pipe on ridge;

axes and escapes at each end of the building.

The building is a frame house on a stone foundation, two stories high, with a fine basement. It could accommodate forty boys. I inspected every part of the house, and the food and clothing, and found everything sufficient and suitable.

KAMLOOPS INDUSTRIAL SCHOOL (ROMAN CATHOLIC).

This school is in the Kamloops-Okanagan agency. Inspected on December 19 and 20, 1904. The staff consists of Rev. A. M. Carion, principal; L. Viel, foreman and carpenter; Mary Joachim, matron; Sister Mary Paula, teacher, Sister Mary Inez, teacher; Sister Mary Hippolite, cook.

There were fifty-seven pupils enrolled. Present at inspection, twenty-nine boys, twenty-eight girls; total, fifty-seven. Recruited in the Kamlooks-Okanagan agency.

Classified as follows:—

		Boys.	Girls.	Total.

	· ·	29	28	59

The reading, spelling, arithmetic, writing, geography, map-drawing, singing, Canadian history, &c., were very good. The pupils are making satisfactory progress. School-rooms are well equipped and all material is in good condition. About two hundred and fifty acres are under fence, mostly poor pasture land; about fifteen acres under cultivation. About sixteen tons of alfalfa, oats, hay and timothy were raised, also thirteen and one-half tons of potatoes, on one and one-half acre. On two acres in garden, they raised five tons carrots, three tons turnips, five hundred pounds beans, other vegetables, small fruits, currants, raspberries; there is also flower garden and some pretty shade tress.

Of live stock they have six milk cows, one bull calf, one heifer calf, and other calves butchered lately.

There are four horses, all in good condition. Two good stables in which the stock are well cared for. There are also fifty fowls.

Eleven boys receive instruction in carpentry; at present they are repairing furniture and tools. Six boys work at shoemaking, repairing, &c. The boys made three pairs of boots lately. Nine boys, three each month, take turns in preparing the dough; the girls do the rest. In the girls' department there are three sewing machines. They make their own and part of the boys' clothing. Fancy-work, knitting and darning are done by the younger girls.

I examined the books and found them correct and well kept. The buildings are in a good state of repair, with sufficient accommodation for the pupils and staff, and all very clean. The pupils are well looked after by the principal and staff, who are all devoted to the work.

ALBERNI BOARDING SCHOOL (PRESBYTERIAN).

This school is situated in the West Coast agency. Inspected January 9, 10 and 11, 1905. The staff consisted of Jas. R. Motion, principal; H. G. Motion, matron; Kate Cameron, teacher; F. A. L. Stevens, assistant matron; M. L. Ferguson, laundress and seamstress. Pupils enrolled, fifty; present at inspection, twenty-five boys and eighteen girls; total, forty-three. The pupils were classified as follows:—

	•	Boys.	Girls.	Total.

"	II	- 3	2	5
"	III	12	6 .	18
	IV		3	6
	V	5	4	9
			—	
		27	23	50

The reading, writing, spelling, arithmetic and geography were good. The reciting of scripture very good.

There are about six acres under cultivation, the cattle and horses being pastured in an adjoining property, which is rented during the summer. The crops raised were three tons hay, five tons potatoes, about one acre is used for garden purposes, where all kinds of vegetables and small fruits are grown.

The live stock consists of one horse, two cows and one calf. One horse belonging

to one of the Indians is also kept and is used for farm work.

Under a capable instructor the boys built a large addition to the main building, 52 x 47 feet, one and a half stories high, this summer. They also do all the repairing. The girls are taught cooking, making of bread and butter, and all kinds of general housework. Some of the older girls make their own dresses, and they do all repairing of boys' and girls' clothing. A few of the older girls are very proficient in silk

embroidery and crocheting.

The water-supply needs improving. I inspected the books; they were correct and well kept. The main building is 38 x 43 feet, with an addition built this summer of 32 x 47 feet. Another building close to the main building, is used for laundry, bakeshop and carpenter-shop. Other buildings are: class-room, driving-shed, wood-shed and root-house. A new school-room will soon be required. The main building is heated by furnace; other buildings by stoves. Coal-oil lamps are used for lighting. The dormitories are clean and comfortable, and the kitchen, dining and store rooms are neat and tidy.

The principal and his staff are devoted to their work; they visit the Indians in

their homes and take great interest in their general welfare.

AHOUSAHT BOARDING SCHOOL (PRESBYTERIAN).

This school, in the West Coast agency, was inspected January 12 and 13, 1905. The staff comprises J. C. Butchart, B.A., principal; Emily B. Butchart, matron; Miss E. C. Mackay, assistant-matron; Miss J. McNeil, assistant teacher. Pupils enrolled, thirtytwo; present at inspection, thirty-one; recruited from Ahousaht and Ehatishat bands. Pupils are classified as follows :-

*		Boys.	Girls.	Total.
Standard	I	2	2	4
"	II	4	2	6
"	Ш	9	11	20
. "	<u>IV</u>	1	1	2
		16	16	32

For beginners, the children were very fair. Spelling and reading good.

Pupils are divided into two class-rooms and all the children have four hours a day in school work. Desks, blackboards and all school material in good order and sufficient.

Pupils are taught housework, laundry, baking, sewing, cutting wood, &c. There is no land under cultivation at present. Food and clothing are good and sufficient.

The staff is a strong one; every member appears to be quite devoted to the work,

and they have the confidence of the Indians.

Also inspected on June 9 and 10, 1905. No change in staff. On roll thirty-five, present at inspection thirty-five. The pupils had made satisfactory progress. Questions asked them, were answered readily and correctly. The children all looked well. The new building had been improved by having some partitions put in, and painting done since my first visit. A sidewalk was also laid to the bench. The Indians appear to be pleased with the school.

CLAYOQUOT (CHRISTIE) INDUSTRIAL SCHOOL (ROMAN CATHOLIC).

This school is situated near Clayoquot, West Coast agency.

Inspected January 13 and 14, 1905. The staff consists of Rev. P. Maurus, O.S.B., principal and teacher; Mr. J. J. Swain, industrial instructor; Sr. Mary Placide, O.S.B., matron and teacher; Sr. Mary Clara, O.S.B., cook; Sr. Mary Clotilde, O.S.B., seamstress; Sr. Mary Lucy, O.S.B., laundress.

i

Enrolment.—The number of pupils enrolled was sixty-four; one girl absent on account of ill health. The pupils were recruited in the West Coast agency.

The pupils did well in reading, spelling, arithmetic and geography. Writing and singing were excellent. The children were clean, well-behaved, and kept good order. I consider this school above the average of such schools. The regular school hours are observed.

Six boys receive instruction in carpentry; they took part in the erection of the additions, and with their instructor attended to the finishing of the interior. I inspected work being done by the pupils. It was very well done indeed.

All the girls are taught mending, and darning is the every-day occupation of the junior girls when they are not employed in other plain sewing. The older girls make their own dresses; also the overalls, shirts and underwear for the boys. Hosiery and stockings for the pupils are made mostly in the institution.

The old building was 40×60 feet, three stories high. At each end there has been built a new wing 32×46 feet, with a hall and staircase between, 10×40 . The whole frontage is now 144 feet and the depth 52 feet. A nice cottage had just been completed for the industrial instructor and family to live in.

Also inspected on June 14 and 15. Sister Mary Elizabeth had replaced Sister M. Lucy, on the staff; other members of staff remaining as before.

On roll, sixty-five pupils; present, sixty-three. The pupils had made good progress since my former visit. They spoke out distinctly and the blackboard work was excellent. A number of nice new desks for the school-room were made by the pupils, and looked equal to the bought ones. The flower garden looked very pretty.

The principal and his staff are well adapted for the work they are engaged in, and I cannot sueak too highly of the result of their labours. I was very much pleased with my visit.

CLAYOQUOT DAY SCHOOL (ROMAN CATHOLIC).

This school is in the West Coast agency. It was inspected on June 12. Pupils enrolled, sixteen; present, five; boys, two; girls, three. Average attendance, six. They are just beginners and could read and spell very easy words. Tacher, Rev. Chas. Moser.

ALERT BAY INDUSTRIAL SCHOOL (CHURCH OF ENGLAND).

This school is in the Kwawkewlth agency. Inspected February 22 and 23, and again on June 21 and 22.

The staff comprises the following: Arthur W. Corker, principal; Mrs. A. W. Corker, matron; Miss L. Humphreys, assistant-matron; R. Willard, trades instructor; David Ah. cook.

Pupils enrolled, twenty-seven; present at inspection, twenty-one; the rest absent on sick leave. Recruited from Kwawkewlth and northern agencies. Pupils classified as follows:—

	${f P}$	upils.
Standard	II	7
"	III	7
	IV	5
"	V	
"	VI	1
		21

'The programme of studies prepared by the department is adhered to. Reading, spelling, arithmetic and geography were good. Boys looked well, were cheerful and obedient and did all work well.

They have a piece of land 340×700 feet cleared and under cultivation; a potato plot, 158×170 feet from which there was a very good crop last year. The garden measures 73×109 feet. I saw cabbages, winter greens and brussels sprouts growing. About 100 small fruit-trees yield well. The raspberries are very fine. There is a small lawn and also a flower garden.

Eleven boys receive regular instruction in carpentry. A grave fence had just been completed. Mantlepieces and cabin trunks were under construction. All work was done by the boys under instructions. Three boys are given extra lessons in plans for work and cardboard modelling by the principal. Six pupils with the instructor had just finished painting the outside of the school. The principal and staff are very energetic and are working hard in the face of many difficulties, and are doing successful work.

ALERT BAY GIRLS' HOME (CHURCH OF ENGLAND).

This school is situated in the Kwawkewlth agency. Inspected February 23, 1905. The staff consists of the following: Arthur W. Corker, principal (position held with that of industrial school); Mrs. E. Rochester, matron.

Pupils enrolled, eight; present at inspection, six. Two absent on sick leave. Recruited from Kwawkewlth agency.

Classification of pupils:—

The girls are taught in the day school by Mrs. Hall, and showed marked progress. The examination in school work was most satisfactory. Girls are taught all kinds of needle-work.

There is accommodation for fifteen girls. The building is very poor and has no bath-room. The matron and principal stated that they experienced great difficulty in getting girls to enter the school, although there are a number of girls that should attend.

Inspected also on June 22. Mrs. Rochester, matron, resigned on account of ill health since first inspection, and Miss Cargill was appointed as matron. Enrolment same as at former visit.

CAPE MUDGE DAY SCHOOL (METHODIST).

This school, in the Kwawkewlth agency, was inspected February 20, 1905. Mr. J. E. Rendle, teacher. Enrolment, seventeen; present at inspection, seventeen. Average attendance for three months, ten. Pupils are graded as follows:—

The pupils read with fair understanding, and engaged in the class exercises with zeal. They were clean and well behaved.

The frame school-house is in good repair. The teacher takes great interest in assisting the Indians in the village and they spoke highly of his services.

GWAYASDUMS DAY SCHOOL (CHURCH OF ENGLAND).

This school is in the Kwawkewlth agency; inspected February 23, 1905. The teacher of this school is Mr. Herbert Pearson. There are thirty-eight pupils enrolled; present at inspection, eleven boys and ten girls; total, twenty-one.

Mr. Pearson had taught only a little over two months. The school had been closed for some time previous. He is energetic and I look for improvement. The children were dirty and some came to school wrapped in blankets. The school-house is a frame building, without ceiling, cold and uncomfortable. For beginners, the children read fairly well and could spell and count a little.

PORT SIMPSON (CROSBY) GIRLS' HOME (METHODIST).

This school is situated near the Tsimpshean village and reserve, Northwest Coast agency. It was inspected on April 4 and 21.

The staff is constituted as follows: Hannah M. Paul, principal and teacher; Ida M. Clark, matron; Margaret E. Baker, sewing teacher; Emma S. McIntyre, matron's assistant.

Girls enrolled, forty-six, present at inspection, forty-three. One girl helping Mrs. Richards at the boys' school was quarantined there on account of scarlet fever in the house. Two were granted an extended holiday on account of their health. The pupils were classified as follows:—

01	'Pu	pils
Standard	I	6
"	<u>II.</u>	14.
66 :	Ш	10
"	TV	IU
. "	IV	L3
	V	3

Reading, writing, arithmetic, spelling, and geography were very good, answers to questions being ready and correct. The pupils would compare favourably with many white children in the public schools. The bigger girls take turns in baking the bread, cake and buns, they also do the other cooking. The laundry work is done by the girls. They are taught all kinds of general housekeeping, especially the keeping of the rooms clean, orderly and tidy. They cut out and make their own dresses, and do all the mending and darning under the supervision of the teacher.

The water-supply is good, except when there is sharp frost. It comes from a mountain stream and is conducted to the tank by means of a flume, and then distribuated through the house by pipes. It would be an improvement if water-pipes

were laid under ground.

The dormitories are well supplied with fresh air, and all kept very clean. For fire-protection there are two extinguishers on the two upper flats, and buckets of water and ashes are also kept in readiness on each flat. They have fire-buckets and an axe. There are fire-escapes in each dormitory; fire-ladders are in position and two movable ladders are kept near at hand.

The buildings consist of a three story house, with a basement, wood-shed, chickenhouse, drying shed, water-closets and tank. They were all in good state of repair.

The sewerage needs improving.

The principal and staff are very energetic and are so earnest in their efforts to make the school a success that I cannot speak too highly of the good work they are doing. I found the food and clothing of a suitable quality, and all parts of the building, upstairs and down, were neat and clean. I examined the books and found them correct.

PORT SIMPSON BOYS' HOME (METHODIST).

This school was quarantined owing to slight cases of scarlet fever in the house.

PORT SIMPSON DAY SCHOOL (METHODIST).

This school was also closed for the same cause as the boys' home.

METLAKATLA INDUSTRIAL SCHOOL (CHURCH OF ENGLAND).

This school, in the Northwest Coast agency, was inspected on April 6, 7 and 8, 1905. The staff consisted of: J. H. Scott, principal and teacher; Miss Rose M. Davies, matron; Miss Helena Jackson, teacher; Miss E. Collison, assistant-matron; Mr. Peter Haldane, native helper; Mrs. E. Dougall, housekeeper; Wang Len, cook for boys' department.

Pupils enrolled, sixty-four; boys, thirty, girls, thirty-four. Present at inspection, sixty-four. These were recruited in the Northwest Coast and Babine agencies.

The pupils did well in reading, writing, spelling, geography and drawing. The reading and comprehension of what was read, also the spelling, and arithmetic, mental and written, of the boys deserve special mention. I was very much pleased with the way in which they acquitted themselves. The children in both schools were clean, orderly and attentive. The regular school hours are observed.

The desks and seats are not of the latest and most approved patterns, but they are fairly suitable. All school material is sufficient. The boys are taught gardening. At the time of my visit they were fencing and adding to the garden. This year they intended planting half an acre with potatoes, carrots, parsnips, lettuce and radishes, &c., from all of which good returns were expected. I noticed gooseberry, raspberry and currant bushes, and also some fruit-trees; and was informed that the bushes bear abundantly; but that so far the trees have only cumbered the ground.

A good trades' instructor should be added to the staff. There should be more work for the boys to do. Some years ago, I understand, such an instructor was on the staff, and I saw the result of his labour in two good carpenters who learned the trade in the school at that time. All girls over thirteen years of age learn to bake bread. Those a little older also learn to bake plain cakes, and their seniors, different kinds of cakes and pastry. All girls over fourteen years of age attend a class on Wednesday afternoons, at which they are taught to cut out and make their own dresses, and also learn to use sewing-machines. All the girls learn all kinds of fancywork, and this is their favourite occupation in spare moments. The girls according to their age and ability, do more or less of the housework.

On the dates of my inspection, a boy was confined to bed through an attack of acute bronchitis; and a girl had died about a month previously of tubercular meningitis. One boy and one girl showed signs of scrofula; but with these exceptions the health of the children was good. The food was good and sufficient, and the children were well clad. The pupils were all clean and well behaved. The girls' building is in splendid condition, all clean and well kept.

Miss Davies, the matron, has given her services for a few years without any salary. Her work was excellent.

METLAKATLA DAY SCHOOL (CHURCH OF ENGLAND).

This school, in the Northwest Coast agency, was inspected on April 6. Helena Jackson, teacher, and Miss Sarah Legaic, assistant teacher. Pupils enrolled, seventy; present at inspection, fifty; boys, eight and girls, forty-two. Twenty-seven of the girls belong to the industrial school and are so reported. The village children are classified as follows:-

Standard	l <u>I.</u>	
"	II	
"	IV	
"	V	
		43

Miss Jackson is doing good work. The girls from the home were well advanced. The village children are so often away and are much behind. The school building is a temporary one, very poor, and the rain came through the roof at time of inspection.

KOOTENAY INDUSTRIAL SCHOOL (ROMAN CATHOLIC).

This school is situated in St. Eugene mission, adjoining St. Mary's reserve, Kootenay agency.

It was inspected on March 9 and 10, 1905. The staff comprises: Rev. N. Coccola, principal; Sister Cassilda, superior; Sister M. Jacob, teacher; Sister Justision, matron and seamstress; Sisters Angelica and Hermyle, teachers; Sister Gervais, matron and seamstress; Sister Cyr, assistant-matron and seamstress; Sister Fou-

27—i—29

cault, cook; Mr. Meacham, foreman, Mr. Bissette, carpenter, and Mr. McDonald, farmer.

Fifty pupils were enrolled, all of whom were present at inspection (twenty-seven boys and twenty-three girls); recruited from Kootenay agency.

Classification of Pupils:—

		Boys.	Girls.	Total.

Besides those classified, there were present thirteen pupils not yet enrolled, making a total of sixty-three children. I examined them in reading, spelling, writing arithmetic, geography, grammar and dictation, in all of which they showed good progress. Reading and spelling were particularly good. On the eve of the examination, a programme of songs, drills and band music was rendered most creditably by the pupils.

The school grounds consist of twenty acres. Of this four acres are occupied by the buildings and playgrounds. Sixteen acres are under cultivation as follows: two acres, vegetable garden; two in orchard; two potato plot; five grain-fields, and five in meadow. Besides this they had one hundred and twelve acres of pasture-land and fifty acres of hay-land. the orchard contains one hundred and thirty fruit-trees, mostly apples.

The live stock consists of ten cows, one Jersey bull, eight calves, eleven steers, three horses and three pigs.

The bigger boys are given a practical knowledge of carpentry and make the ordinary repairs about the place. In passing through the village, I saw several neat dwelling-houses, built by ex-pupils of the school. Four ex-pupils, Baptist, Ignatius, Francis and Peter spend most of their time working at carpentry. The two last-named are now employed by a contractor at Cranbrook.

The clothing required by the children is made in the different sewing-rooms. Five machines are in daily use. The girls looked very neat in a blue uniform, cut and made by themselves. The boys' suits were also made at the school. The health is generally good. No sickness of any moment occurred. The food is sufficient and of good quality. The water-supply is excellent. The pipe-line laid last fall with the aid of a grant from the department proved a complete success. The pipes are five feet under ground, which, to a great extent, removes all danger of freezing.

Discipline was good, corporal punishment being seldom resorted to. No complaints of any kind were made against the children. An excellent tone prevails among the staff. The agent, principal, and all connected with the school, work in harmony for the common good.

The school registers and account-books were neat and well-kept. The buildings, nine in number, are mostly of frame construction. The three occupied by the pupils and staff, stand in a row about thirty feet apart and are in a good state of repair. Both school-rooms were built at the expense of the staff, and are large and commodious. The upper of each is used as a dormitory. The old school-room, which were small and inconvenient, are now used as dining-room and bed-room. The dormitories were cheerful and clean. The beds are of iron; each is well and comfortably furnished; the wash-rooms and bath-rooms were clean and suitable. At the time of my inspection a carpenter was at work making repairs on these.

The principal is a good manager and is assisted by a strong staff. The children looked healthy and took great interest in their school.

WILLIAMS LAKE INDUSTRIAL SCHOOL (ROMAN CATHOLIC).

Situated near the 150-Mile House, Williams Lake agency.

Inspected on May 23 to 27 inclusive. Staff consisted of: Rev. H. Boening, O.M.I., principal; Mr. M. Walsh, farm instructor; Sr. Euphrasia, matron and head teacher; Sr. J. Gabriel, assistant teacher; Sr. Seraphim, teacher of small boys; Sr. Octavia, teacher of small girls; Sr. Fabian, cook; Sr. Eloid, assistant cook; Sr. Joannes, seamstress and supervisor in laundry.

Number enrolled, fifty-two; present at inspection, forty-eight; boys, seventeen, and girls thirty-one. One boy was absent on sick leave and three boys without leave.

Classification of pupils:—

		Pupils.

T.	Cotal	 $\dots 52$

Recruited from Shuswap in Williams Lake agency. The reading, spelling, arithmetic, geography, writing and drawing were all good. In these subjects the girls were especially bright. Blackboards and all school material, up to date and sufficient.

All land in connection with the school, is the property of the corporation of O.M.I. Total area 2,763 acres; under cultivation about 300 acres, remainder, grazing, timber and wild land.

The crops of last season consisted of: hay, three hundred tons; oats, twenty tons (the worst for a long time); peas, about one thousand pounds; potatoes, twenty-five tons; turnips, one thousand pounds; cabbage, three tons; beets, one thousand pounds. Small fruits in large quantities are raised. There were twenty-five acres of wheat, but it all got frozen at the beginning of August.

Of live stock there are twenty-five horses, including colts; sixteen milk cows; four hundred and thirty-four head of cattle; fifteen large pigs and fifteen small pigs; all stock is in good condition, well housed and well fed.

There is a large carpentry-shop, in which from three to five of the bigger boys are constantly employed. Since October these had been under the instruction of the principal and had finished several pieces of work, which were well done. One of the boys is very clever at the lathe. The girls learn every branch of housework. Fifteen girls use the sewing-machine and about the same number make bread with flour produced on the farm. Soap is also made.

All the children looked well, except a little girl who suffered from inflammation of the glands. All the rooms were airy, and high. During my stay of six days at the institution I took my meals in the same dining-room as the boys, where I could see that the food was plentiful and good. Meat is served twice a day, a beef being killed every ten days. Clothing is suitable to the season and sufficient. I did not see a child with a patched article of clothing. I also saw the children in their Sunday suits—the girls in a neat blue sailor suit, and the boys in a suit of the same material. Their whole behaviour showed that great attention is paid to all the rules and manners and politeness. The principal and staff are working in great harmony and are painstaking and faithful in their work. The girls' home has on the lower floor: a school-room, store-room, two parlours, sewing and play-rooms; the upper floor contains a dormitory, bed-room, chapel, bed-rooms for the staff, and music room; in the attic there are the wardrobes and a general store-room. The boys' home has on the lower floor: a

i

school-room, bed-room, parlour, play-room and lavatory; on the second floor: dormitory, store-room, sick-room and bed-room for the foreman.

A new root-house and a stone meat-house had been added lately. All buildings were in good repair but needed a coat of paint.

This is one of the best farms in the country. I drove all around the fields and saw the crops, which gave promise of a good yield. They had many stacks of hay on hand.

The dormitories were well kept and perfectly clean.

GENERAL REMARKS.

It is rather discouraging work teaching the day schools, as the Indians leave their villages for months at a time, taking their families with them. I notice that the teachers who take a general interest in the Indians on the reserves and visit the parents, have the best success in the schools. The pupils of the boarding and industrial schools are doing well. Many of them are quite clever.

I am satisfied that the best results of Indian education are obtained from the boarding schools. In travelling, I meet with ex-pupils who are a credit to these institutions.

The remainder of the day schools in this province were either closed at the time of my visit, or were not reached by me during the year.

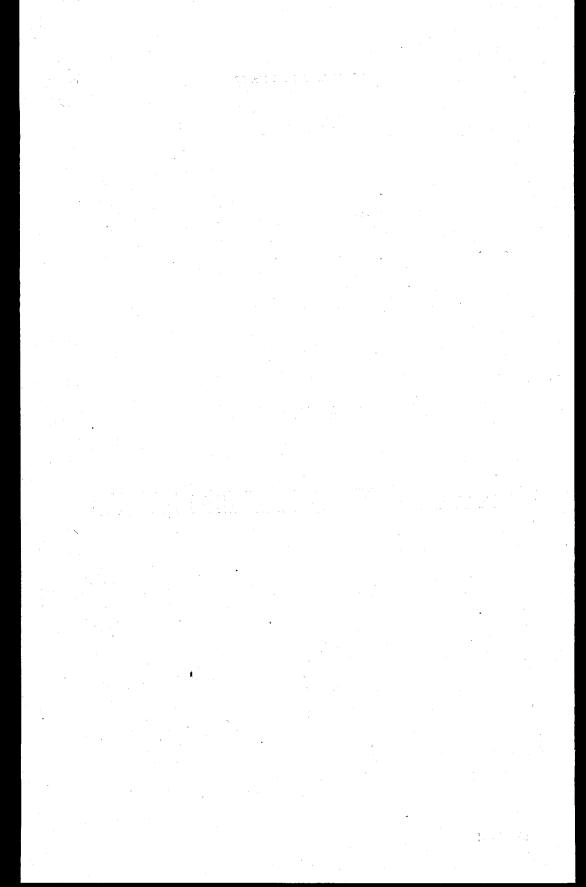

I have, &c.,

A. E. GREEN,

Inspector.

General Remarks.

The land sold during the year amounted to 33,840 33 acres, which realized \$56,980.96. The quantity of surrendered land in the hands of the department was, approximately, 275,482.50 acres. The principal outstanding, on account of Indian lands sold, amounted to \$376,759.47, a considerable portion of which has not yet become due.

CENSUS RETURN.

CENSUS RETURN of Resident and Nomadic Indians; Denominations to which they belong, with approximate number belonging to each Denomination, as well as the number of Pagans in the Dominion of Canada, by Provinces, for the Year ended June 30, 1905.
