The classes were examined, orally or in writing, in all the subjects of the programme. In general the pupils showed an intelligent understanding of the passages read, but the expression and articulation are defective. Certain prevailing faults appear to have grown up or at least to have become more pronounced through imitation. Apart from this, in the use of English, including grammar and composition, the results are encouraging and progress is good.

The school routine is followed with the utmost exactness, and the children are

under constant supervision, whether at work or recreation.

The dormitories, dining-room and the senior class-room are taxed to their full capacity with the present attendance. They are all fully equipped and furnished, though to a large extent with home-made furniture, which is in some instances not of the most convenient description.

The kitchen is large and is furnished most completely and conveniently.

I found the ventilation good throughout all the rooms, though as there is no self-regulating system, it is a matter of constant care to the staff.

The building has recently been much improved by painting, and some portions

have still to be painted.

An accurate record of receipts and expenditure has been kept. A debt incurred in connection with the enlargement of the building some two years ago is being steadily reduced. A substantial sum has been contributed by the parents of non-treaty pupils.

Throughout the inspection and the examination of classes, I had, as on many

former occasions, the valuable assistance of the agent, Mr. Sibbald.

### ONION LAKE (CHURCH OF ENGLAND) BOARDING SCHOOL.

The inspection of this school was made on February 6.

The school is still under the direction of Rev. J. R. Matheson, who has a staff of six assistants, including two ex-pupils. These are girls, the one acting as cook and the other as laundress, and they are performing their duties in a creditable way and rendering satisfactory service.

The admission and discharge of pupils since last inspection is shown as follows:-

Pupils enrolled April 1, 1907	15 14
Total	5
Deduct	6
Enrolled December 31, 1908	23

The greater part of the attendance is drawn from the bands included in the Saddle Lake agency.

There are also 36 non-treaty pupils in residence and one day pupil.

The entire attendance is graded as follows:—

		TREATY.		Non-Treaty.						
	Boys.	Girls.	Total.	Boys.	Girls.	Total.				
Standard I	13	3	16	18	- 8	26				
" II			<b>2</b>

_i_23										

Mr. D. H. Cameron, who had previously been employed at intervals as teacher here, is again in charge of the classes, and has the assistance of his sister, who is preparing for the work of teaching. Mr. Cameron is a teacher of good qualifications and of some experience, and his methods of presenting the subjects and lessons to his pupils are particularly well studied and adapted.

The classes were in a good condition of progress; the pupils showed interest in all their work; and a most satisfactory feature was that all the pupils were at all times

usefully occupied with work arranged for them by the teacher.

All the classes study and recite in one large class-room. The room is an unusually suitable one as to space, lighting and equipment; but the class is too large and unwieldy, and the help of the assistant teacher could be of greater value if even the same space were divided into two separate class-rooms.

In the interval since my former inspector, however, the class work suffered considerably from repeated changes of teacher. Moreover, it has not at all times been

found possible to secure a teacher properly trained for the work,

I found the various rooms and apartments in a clean and sanitary condition. The air-space in the class-room and dormitories is sufficient; and though there is no regular system for changing the air, yet I found the ventilation good at the time of inspection.

The school has been visited recently with measles and whooping-cough, but owing to the excellent care which the patients received, no fatalities resulted, nor any noticeable ill effects.

A hospital has been fitted up in connection with the mission for the benefit of the school and for the convenience of Dr. Matheson in connection with her work as medical attendant to the bands at this point.

### DUCK LAKE BOARDING SCHOOL.

On November 3 to 6 I inspected the Duck Lake boarding school.

Rev. O. Charlebois, O.M.I., continues in charge of the institution, and has five male assistants as guardians of the boys and instructors in different branches of farming and in carpentry, while thirteen reverend sisters of the Order of the Presentation have charge of the class work and domestic industries.

The authorized attendance is 100 pupils, from which number the actual attendance varies but little, as indicated by the following:—

Pupils enrolled October 1, 1907	101	
Admitted since	14	
Total		115
Discharged	9 5	
yî wî î		
Deduct	· _	14
Enrolled October 1, 1908		101

Of this attendance 60 pupils belong to Beardy's, One Arrow's and Petaquakey's bands, whose reserves are in this locality, while the remainder are drawn in small numbers from many other bands, being for the most part orphans. Little difficulty is found in securing the attendance of all children of school age from the nearest reserves whose condition of health is such as to render them eligible for admission.

There are two ample and well-furnished class-rooms in regular use, besides a room adjoining the junior class-room, which is partially equipped for school purposes, and is occupied by a primary class of about 20 pupils.

m-4-1

The grading of the pupils is as follows:-

		Boys.	Girls.	Total.
Standar	d I	15	10	25
" "	II	6	10	16
	III			
	IV			
	V			
		—	·	_
	Total	55	46	101

Sisters Mary Augustine and Mary of the Cross, in charge of the two regular divisions, are both teachers of good qualification and experience, devoting their whole time and attention to these duties. Sister Ste. Emerencie, who teaches the primary class, has no special training, but her work is done under the direction of Sister St. Basil, the superioress, and the other teachers.

The classes were examined in all the subjects included in the programme of studies. and the results of the examination were almost uniformly satisfactory. Much care has been taken to lead the pupils to think for themselves, to understand what they do and not to repeat or perform exercises in a merely mechanical way. The success of efforts in this direction are very marked in the more advanced classes. The interest that a number of the pupils of the fifth standard take in book-keeping, and the intelligence that they display in their work in this subject, are also noteworthy.

The industrial training for boys includes farming, gardening, the care of stock and assisting the mechanic in the repairing of buildings, and of a great variety of farm machinery.

An excellent example is constantly before the boys in the care of implements, which are housed securely and in good order when not in use.

The character of the training of the girls is most evident in the sewing-room, where the work is carefully graded according to the age and ability of the pupils, and the results are quite remarkable. On close examination, however, the training in all other branches of domestic economy is found to be equally systematic and thorough.

The most rigid cleanliness is observed throughout the institution, in respect to floors, walls, windows, bedding, clothing and the persons of the pupils. A small room detached from the school building is used specially for fumigating the clothing of pupils on entering and on returning from holidays abroad.

The former method of heating, namely, by means of hot-air furnaces and stoves. has been replaced by a very complete and efficient system of steam-heating, which proved equal to the test afforded by the unusual severity of the past winter.

Connected with the new system of heating, there has been installed a most thorough system of ventilation, extending to every part of the building and operating automatically. The provision for the removal of foul air and the supply of fresh air seems equally good, and it is confidently expected that the benefits of the improvement will presently be apparent in the health of the children.

The former means of ventilation will, of course, not be entirely discarded. Onthe contrary, school-room and dormitory windows and the 'Aeolian' ventilators on the roof will continue to be used freely, according as temperature and other weather conditions will permit.

The building consists of but two storeys above the basement, and the fire-esapes are of a character to meet any emergency. During the inspection the fire-alarm was sounded while the pupils were in classes. They marched out in good order, doublefile, and the time occupied in clearing the building was 1 minute and 10 seconds.

The finances of the institution show a steady improvement. There is a large revenue from farm and garden, live stock and dairy. In all branches of the manage-

 $27-i-23\frac{1}{2}$ 

ment a judicious economy is observed. Waste is as far as possible eliminated, and every article of food, clothing, or equipment, is made to serve its purpose to the best advantage.

An industry of no slight importance in the economy of the school, as well as in the training of the girls, is soap-making. The expense involved, solely for the purchase of lye, is but slight, while the product constitutes the entire supply of soap for laundry, kitchen and house-cleaning purposes, and in part for bath and lavatory use. The net profit from the industry is not less than \$300 per annum.

### LAC LA RONGE BOARDING SCHOOL.

The inspection of this school was made on August 3 and 4.

The school is situated on the west shore of Lac la Ronge, about 200 miles north by east from Prince Albert.

It was opened on January 1, 1907, and the average attendance of pupils since that date has been about 35.

The staff at the date of inspection included Rev. James Brown, as principal; Mrs. Brown, matron; Miss Annie Cunningham, teacher; Miss S. Haslett, boys' matron; William Bear, general assistant, and Samuel Abraham, labourer.

The examination of classes revealed no very marked progress, even for the brief period that has elapsed since the opening of the school. They have acquired a little English, however, and they are learning to sing, and are receiving a general training in habits and manners that is of some value.

The teacher, though not fully trained for the work, has shown both zeal and intelligence in the discharge of her duties in the class-room, but her attention has been divided with other duties to the serious disadvantage of the class work.

A larger staff is urgently needed, but it is difficult to secure help at this remote point.

The health of the pupils has been particularly good. Down to the date of inspection there had been no deaths nor any serious sickness among the pupils.

The diet of the children consists largely of fish. During the twelve months preceding the inspection, the school took no less than 21,000 fish from the lake, while 4,000 additional were purchased from the Indians. These were mostly whitefish, weighing from 3 to 4 pounds.

The site chosen for the school has proved most unfavourable, owing to the poor quality of the soil, for farming, gardening, and the keeping of stock. Hay is to be had only at a distance of ten miles, and has to be hauled in winter over the ice. The soil is too sandy to grow grain, but by degrees a plot is being brought into condition for the growing of roots and vegetables. There are other points around the lake where excellent land could have been secured.

The live stock kept by the school includes 2 horses, 5 head of cattle, 4 pigs and a few hens; and these are the only animals of this description within at least 100 miles, for which reason they are all the more useful. The pigs and hens live entirely on fish, as also the cattle, to a great extent, during winter.

The building, which was not yet completed, is a frame structure, 80 x 26 feet, and of two storeys. The principal, who is himself an expert carpenter, had done much, and aimed to do much more, in the way of completing and enlarging the building, which was designed to accommodate 50 pupils, but was not yet large enough for that number.

The maintenance of a school at a point so remote is in some respects an expensive matter. Supplies that have to be brought in from outside are, of necessity, very dear as compared with their original cost. For instance, the ordinary price of flour here is \$12 per sack of 100 pounds; smoked bacon costs 35 cents a pound, and sugar

30 cents. The school has for income the usual per capita grant from the department of \$72. In addition to this, the salary of the principal, \$600, and that of the matron, \$180 per annum, are contributed by the organizations of the Church of England, as are also numerous bales of useful clothing. This assistance, which is duly valued, comes in large measure through the Women's Auxiliary, whose secretary, Miss Halson, made a visit to the school shortly after its opening, and is consequently well informed as to its needs and the merits of its work.

### DAY SCHOOLS INSPECTED.

Day schools were inspected as follows:—at Montreal Lake on August 8, J. R. Settee, teacher; on Thunderchild's reserve December 22, J. Russell Edwards, teacher; Little Pine's, January 7, C. T. Desmarais, teacher; Poundmaker's, January 7, Miss Hilda Murphy, substitute teacher; John Smith's, March 9, Robert Bear, teacher; Fort à la Corne South, March 11, Mrs. Ada Godfrey, teacher; Fort à la Corne North, March 12, Robert Bear, ir., teacher.

The teachers of all these schools have been receiving a uniform salary of \$300 per annum from the department, supplemented in two instances by an allowance of \$60 for extra services, to which has usually been added by the Church of England \$100 per annum in recognition of services as missionary. In a few instances the salary has been more than earned through the untiring and unselfish efforts of the teachers; and it is gratifying to all interested in this work that by a recent departure the salaries of the day school teachers are not to continue uniform, but the more deserving are to receive recognition according to their merits.

Of the schools here referred to the one deserving most special mention is Fort à la Corne South. This school was opened six years ago, and Mrs. Godfrey has continued in charge from the beginning, a steady and satisfactory progress has been maintained. The pupils are not allowed to sit dull and vacant at their desks; but whether in class or otherwise their faculties are constantly stimulated to activity and kept usefully employed. The results of the work and influence of this school, as revealed in the manners, conduct and intelligence of the pupils, and as reflected in their homes, are increasingly apparent.

### OTHER DAY SCHOOLS.

The following day schools were also visited during the fall and winter and inspected, but not reported on fully: Mistawasis day school, Rev. C. W. Bryden, B.A., teacher; Ahtahkakoop's, Louis Ahenakew, teacher; Big River, George Crain, teacher; Sturgeon Lake, Edward Ahenakew, teacher; Wahpaton (Sioux Mission), J. Beverley, teacher; Red Pheasant's, Mrs. M. Jefferson, teacher; Stony Reserve, J. Isbister, teacher.

I have, &c.,

W. J. CHISHOLM, Inspector of Indian Agencies.

Province of Saskatchewan, South Saskatchewan Inspectorate, Balcarres, April 21, 1909.

FRANK PEDLEY, Esq.,
Deputy Sunt General of

Deputy Supt. General of Indian Affairs, Ottawa

SR,—I have the honour to submit herewith the following report on the different schools in the South Saskatchewan inspectorate:—

### ROUND LAKE BOARDING SCHOOL.

The Round Lake school, Presbyterian, situated in the Qu'Appelle valley, near the Crooked Lake agency, was inspected by me on May 29, 1908. This school is under the principalship of the Rev. Hugh McKay, and staff of four persons.

The main building is a frame structure, in which the girls and lady members of the staff live. The kitchen and dining-room are also in this building. The boys' dormitory, farm instructor's room and general class-room are in a detached building.

At the time of my visit there were 38 pupils in the institution. I found the children healthy, well fed and well clad. They are receiving a good training in all branches of housework, and were also well advanced in the class-room.

The water system that was installed in this institution some time ago, is not in working order, and requires a complete overhauling, in fact, some new system should be installed.

The school owns a fine herd of cattle and a considerable number of these are sold each year.

### COWESSESS BOARDING SCHOOL.

This school is sivated on the Cowessess reserve, in the Crooked Lake agency. It is under the auspices of the Roman Catholic Church, and the principalship of the Rev. Father Perrault, who has as his assistant, Brother Gauthier and a staff of six sisters.

I found the school in the usual good order. The building from top to bottom was scrupulously clean, and everything about the building was in good repair.

The class-room is far too small for the number of children it contains, viz., 45, and I advised the principal to take down a partition dividing this room from another.

The children in this school are all quite small. They all appeared to be healthy and are well clad.

The class-room work was well up and the girls in addition to their class work receive a good training in all branches of housework, and the boys in general farm work.

This school has a splendid system of waterworks installed by one of the staff, and the building is lighted with gas.

### MOOSE MOUNTAIN DAY SCHOOL.

This school is situated on the White Bear reserve, Moose Mountain agency. I visited this school twice during the year, once in June and again in December. At the time of my last inspection there were 16 children in attendance, 7 girls and 9 boys.

This school is under the auspices of the Presbyterian Church, and is taught by Miss Armstrong, who is doing good work.

I noticed a decided improvement in the class-room work since I last visited the school.

The number of children in attendance has increased and will increase as time goes on.

The Indians of the reserve are taking a great interest in the school.

### QU'APPELLE INDUSTRIAL SCHOOL.

This large institution is situated in the village of Lebret, on the Qu'Appelle lakes, near Fort Qu'Appelle, and is under the auspices of the Roman Catholic Church.

The Rev. J. Hugonard is principal and is assisted by the following staff:-

Rev. N. Ruell, assistant principal; Geo. Harrison, book-keeper; H. Leonard, teacher of senior boys; H. O'Connel, teacher of junior boys; John Brown, carpentry instructor; J. B. Richer, shoe-shop instructor; W. Peltier, farm instructor; J. Charbonneau, assistant farm instructor; J. LeFleur, baker instructor; E. Donnelly, tin-shop instructor; C. Hill, engineer and plumber; Rev. Sr. Goulet, matron; Sr. Lamontagne, assistant matron; Sr. St. Alfred, senior girls' teacher; Sr. McGuirk, junior girls' teacher; Sr. Lamotte, infirmarian; Sr. Baulne, cook; Sr. Marianna, laundress; Sr. Brabant, sewing-room.

I made my inspection in October, 1908, and there were 240 pupils in the school at that time. These children are divided into four different class-rooms, two for the boys and two for the girls. I am of the opinion that there should be five class-rooms for this number of children.

I found the children well dressed (all wearing a uniform), and healthy in appearance, and I am told there was very little sickness during the year.

The class-room work in the girls' department and junior boys, was all that could be desired, but there was room for improvement in the senior boys' room.

I visited all the shops in connection with the institution and found everything in business order. The boys who work in these shops work on the half-day system, that is, one half day in the workshop and the other half day in the class-room.

The school has a large farm in connection with it, from which quite a revenue is derived. Last year, however, the farm was not so profitable, owing to the severe frost which struck this district. While the oat and vegetable crop were fair, the wheat crop was an entire failure, and this was felt very much, as the flour (over 1,000 sacks), had to be bought, instead of being produced.

I found the school scrupulously clean. The building has been occupied for nearly three years, and a person going through it would think that it had just been used a month or so. The woodwork is gone over every second day and there is not a scratch to be seen.

The dormitories are all furnished with white iron bedsteads, and the bedding is in good condition, and presents a very tidy appearance.

This institution is a show place of the district, and is visited by a great many people during the year. Many tourists from the east stop off at Qu'Appelle and Indian Head and drive over to see the school.

### DAY STAR'S DAY SCHOOL.

This little school is situated on Day Star's reserve, in the Touchwood Hills agency, and is taught by Mrs. Smythe.

At the time of my inspection there were 8 boys and 8 girls present, and there were 17 names on the register. The attendance at this little school has been remarkably

good throughout the year, and the Indian parents take a great interest in it and see that their children attend regularly. In winter-time the homes are quite near the school, the farthest being perhaps a mile away, but in summer they are from 3 to 4 miles away. Notwithstanding this, the attendance is just as good, as the parents have an arrangement among themselves to furnish a team and wagon, and all are collected and driven to school by one of the larger boys.

A neat little frame detached building was built last year to replace the old log lean-to that was formerly used as a class-room. This school has been refurnished with modern desks, replacing the old wooden ones, which adds greatly to the appearance and comfort of the place.

I found the children well up in their studies, particularly in arithmetic, in which I believe they would compare favourably with white children in the same grades.

The children were neat and clean; soap and water are freely used and each girl dons a clean pinafore after entering the class-room in the morning.

The children were graded in their classes as follows:—

Standard I		 	. 5 pupils.	1
" II	· · · · · · · · · · · · · · · · · · ·	 	. 4 "	
" III		 	. 4 "	
4.5				
			17 "	

Mrs. Smythe, the teacher, had each child look after an individual garden plot and in the fall gave a prize for the best kept garden.

The school is under the auspices of the Church of England.

### FISHING LAKE DAY SCHOOL.

I visited the school in October. It is situated on Fishing Lake reserve, in the Touchwood Hills agency.

The school is a neat log structure, recently completed.

At the time of my inspection there were only five children in attendance—four boys and one girl. The children were very backward and this is partly due to the indifference of the parents in not sending them more regularly.

### MUSCOWEQUAN'S BOARDING SCHOOL.

This school, situated near Muscowequan's reserve, Touchwood Hills agency, is under the auspices of the Roman Catholic Church, and under the principalship of the Rev. Father Thibaudeau, who has for his assistants a lay brother and five sisters.

The school is doing good work in the class-room. The teacher, Sister Riarton, is well qualified, and the results of her efforts are plainly shown. The children were very clean and comfortably clad, and I am told there has been very little sickness in the institution.

There is a well-managed farm in connection with the school, and last year there were about 100 acres under crop. The oats and barley was a fair crop, but the wheat was almost a total failure owing to frost.

At the time of my inspection there were 36 children attending the school.

The boys are taught all branches of farm work and the girls receive a good training in general housework, sewing, knitting, &c.

The building is in need of a general overhauling, and I understand it is the intention of the church authorities to do this in the near future, as well as build a large addition to accommodate the girls.

### GORDON'S BOARDING SCHOOL.

This school is situated on Gordon's reserve, in the Touchwood Hills agency, and is under the auspices of the Church of England.

Since my last report there has been a complete change of staff. Mr. and Mrs. Williams, who were formerly in charge of the school, have again assumed the management of it.

I found the school in the very best of order from basement to garret.

At the time of my inspection there were 14 boys and 16 girls in the institution.

The children looked neat and tidy and were comfortably clad.

The discipline in this school could not be improved on, but I think the time has arrived when a teacher should be employed to look after the class-room. Mr. Williams has quite enough to do in attending to the numerous other matters in connection with the school.

This school has one of the best gardens in the country in connection with it, and at the time of my visit I found a root-house well filled with potatoes, carrots, onions, turnips. &c.

This school is doing good work.

### KEESEEKOUSE (ST. PHILIP'S) BOARDING SCHOOL.

This school is situated near the east boundary of Keeseekouse reserve, in the Pelly agency. It is under the auspices of the Roman Catholic Church, and under the principalship of the Rev. Father Decorby, who has for his assistants a lay teacher and four sisters.

At the time of my inspection there were 28 children in the institution, 12 boys and 16 girls.

There is room for improvement in the class-room work here, and the principal realizes this, and an effort is being made to improve matters.

I found the children clean and tidy, and they looked as if they were well cared for.

The building is a log structure, two storeys high. The interior is badly in need of paint and whitewash. The principal told me that he was going to have some renovating done at once.

There is a small farm in connection with the school and much of the work is done by the boys. The girls receive a training in general housework.

There was very little sickness in the school during the year.

### CROWSTAND BOARDING SCHOOL.

This institution is situated just off the south boundary of Cote reserve, in the Pelly agency.

It is under the auspices of the Presbyterian Church, and has the following staff: Rev. W. McWhinney, principal; Miss Gilmour, matron; Miss McLaren, teacher; Miss Dunbar, assistant matron; Miss Coté, seamstress.

At the time of my inspection there were 48 children in the institution.

I found the building thoroughly clean throughout.

I heard the children go through their class-room exercises and they seemed to be well advanced. Miss McLaren is a qualified teacher and is a hard worker.

The farm here paid well last year. The wheat averaged 30 bushels to the acre, or in other words 920 bushels off 30 acres. This crop was sold and brought the school 78 cents per bushel. It has been the aim of the principal to have an up-to-date farm and he has one.

I found the buildings throughout in a fair state of repair. Since my last report a special hospital building was completed, which will be very useful.

The general health of the children, I am told, has been remarkably good during the year.

### FILE HILLS BOARDING SCHOOL.

Since I last reported on this school there has been a complete change of staff. Miss Gillespie, who was principal for so many years, has been succeeded by Miss Cunningham, with the following staff: Miss K. Eastman, teacher; Miss McKenzie, matron; Miss Ross, cook; Mr. J. Gibson, farm instructor.

I inspected this school in March, 1909, and found everything in connection with it in good order. Miss Cunningham is very energetic and I have no doubt will make a success of her new work. She is ably assisted in her work by Miss McKenzie and Miss Eastman.

I was greatly pleased with the work in the class-room. The children are particularly bright and are making good progress.

The boys receive a good all round training in farm work, which fits them well for the life they are to follow after leaving school. The girls are also well trained in all branches of housework and sewing.

This institution has a farm in connection with it, which is well managed, but like all farms in this district, suffered severely from frost last year.

The main building, in which the living quarters are situated, is in bad repair. The floors throughout the building require renewing and the walls replastering.

At the time of my inspection there were 28 pupils enrolled—10 boys and 18 girls. They were healthy and well fed and clothed.

All of which is respectfully submitted.

I have, &c.,

W. M. GRAHAM, Inspector of Indian Agencies.

PROVINCE OF ALBERTA, BLOOD C. E. (St. Paul's) BOARDING SCHOOL, FORT MACLEOD, May 10, 1909.

FRANK PEDLEY, Esq.,
Deputy Supt. General of Indian Affairs,
Ottawa.

SIR,—I have the honour to present the following report of the Blood Church of England boarding school.

Location.—This school is situated some 14 miles southeast of Macleod, which is our mailing office. The school is opposite the agency headquarters, and is separated from it by the Belly river. Our property is not on the reserve, and is owned by the Church Missionary Society, London, England.

Land.—The land, which is prettily situated and well watered, comprises an area of 160 acres. Its natural features are very pronounced. On the north and east it is bounded by the Belly river; on the south and west it is surrounded by trees. The soil is a light loam and well suited for gardening and farming.

Buildings.—The buildings present a pleasing appearance. They are built around a square. At the northwest corner of its western side is the girls' home, a commodious building, affording accommodation for 30 girls. Immediately south stands the school chapel, a very neat structure, well lighted and ventilated. At the end of the west side

43.

is the horse-stable, with harness-room, granary and coach-house under the one roof. On the south side and at the west corner is the coal-house and carpenter-shop. To the right is the general storehouse, and then the boys' home, which is a similar building to the girls, but far less pretentious. At the east side and at the south end corner is the meat-house, while some 50 yards to the north is the hospital; this is a well-planned building containing two large wards, dispensary, bath-room, kitchen and back kitchen on the ground floor, and three good rooms upstairs. The rectory stands on the north side of the square, and although not as well planned as it might have been, is nevertheless roomy and comfortable.

Accommodation.—There is accommodation for 60 pupils and a staff of 9. Attendance.—The attendance has been very regular. The number on the roll is

Class-room Work.—The work done in the class-room is very gratifying.

Farm and Garden.—Last year we had 30 acres sown to oats, 6 acres sown to potatoes, 2 acres sown to sugar beets, and 3 acres for a general garden. Unfortunately a flood came in June and we lost everything. I estimate the loss at hundreds of dollars, which has been most keenly felt by us. I have now 5,000 trees under cultivation.

Industries Taught.—The boys learn farming and gardening; the girls are instructed in housekeeping, cooking, butter-making, dressmaking, darning and fancy work.

Moral and Religious Training.—The pupils receive definite church teaching. Matins and evensong are said daily.

Health and Sanitation.—The health of the school has suffered somewhat from the effects of the flood. Our buildings were inundated and consequently we have had damp, cold buildings. Many a day during the past winter we were unable to heat our house properly, and the loss of vegetables has been distinctly felt. Measles broke out among our younger children, but we were fortunate in having our hospital where they were quarantined. Everything is done from a sanitary standpoint. Pits are regularly disinfected and no refuse allowed to lie above the ground.

Water Supply.—We have four excellent wells.

Fire Protection.—We are better supplied with fire-appliances than we were a year ago, having received hand-grenades and fire-pails from the department. The exits from the several buildings are sufficient to ensure perfect safety to life.

Heating and Lighting.—The buildings are heated by hot-air furnaces and stoves, and lighted with coal-oil lamps.

Recreation.—Sports are encouraged. Physical drills are held regularly. Last Easter I financed the funds for a fife and drum band, which has more than fulfilled my expectations. I have 25 boys and girls in it, and membership depends upon good behaviour. It is needless to say that a keen interest is taken by all. It may be of interest to state that the pupils play by note and not by ear.

General Remarks.—Our land was greatly damaged by the flood, and many improvements made destroyed. We have, however, made good use of our time and carried out the improvements planned last year.

I have, &c.,

GERVASE EDWARD GALE,

Principal.

Province of Alberta,

Blood R.C. Boarding School,

Blood Reserve, Upper Agency, Stand-off, March 31, 1909.

FRANK PEDLEY, Esq.,

Deputy Supt. General of Indian Affairs, Ottawa.

Sir,—I have the honour to submit my annual report for the fiscal year ended March 31, 1909.

Location.—The school is situated about 20 miles south of Macleod, one mile from the upper agency, within a few yards of the Belly river, on the Blood reserve.

Land.—The land connected with the school belongs to the reserve buildings. The buildings are as follows: the main building, 36 x 36 feet, 3 storeys high, the said building being divided into an office, parlour, refectory, class-room, working-room, 2 recreation-rooms, on the ground floor; boys' and girls' dormitories, the chapel and private apartments for the staff, on the second floor.

There is also situated behind the main building and adjacent to it a 3-storey building,  $20 \times 20$  feet, comprising kitchen and pantries, and 2 large rooms used by the sisters as wardrobe and work-rooms. The other buildings are: a laundry,  $18 \times 14$  feet, a storehouse and a stable.

Accommodation.—There is accommodation for 50 pupils and a staff of eight.

Attendance.—There are 50 pupils on the roll, 25 boys and 25 girls.

Class-room Work.—The programme of studies prescribed by the department is followed as closely as possible. The progress is all that could be desired.

Farm and Garden.—There is no farming done at the school. About three acres were cultivated last year for gardening purposes. But, owing to the very heavy rains which we had last spring, the crop was under three feet of water for several days, and, on account of this, was entirely lost.

Industries Taught.—Gardening, stable work, milking, baking, grazing and sawing wood for the kitchen are the occupations of the boys. The girls are trained in all the branches of housework, baking, cooking, laundrying, sewing, knitting, dressmaking, &c. All the children's clothing is made in the school.

Moral and Religious Training.—Religious instruction is given almost every day,

and all the children attend very regularly at all the church services.

Health and Sanitation.—Three girls were discharged on account of tuberculosis. In December the school children were quarantined on account of measles. The recovery of the children that were sick is now as perfect as it could be desired. We must state, though, that the sanitary conditions are looked after very carefully.

Fire Protection.—Five fire-extinguishers, four hand-grenades, five fire-pails and four axes are distributed throughout the buildings. The instructions in regard to the fire-drill have been carried out.

Heating and Lighting.—The school is heated with two hot-air furnaces. At present the heating of the house is somewhat imperfect owing to the bad condition of the furnaces. They have been under water twice, once during the year 1901, and again last year.

Light is supplied by means of coal-oil lamps.

Water.—The water is supplied from a well near by.

Recreation.—Recreation is taken three times a day after each meal. The boys and girls have each their own playgrounds and are always under the supervision of an attendant.

I have, &c.,

J. M. SALAUN, Priest,
Principal.

PROVINCE OF ALBERTA,

BLUE QUILL'S BOARDING SCHOOL,

SACRED HEART P.O., March 31, 1909.

FRANK PEDLEY, Esq.,

Deputy Supt. General of Indian Affairs, Ottawa.

Sir,—I have the honour to submit the annual report of this school for the year ended March 31, 1909.

Location.—The school is situated on Blue Quill's reserve, about six miles southwest of Saddle lake, on the Edmonton road, about one mile north of the Saskatchewan river.

Buildings.—The school is a frame building,  $90 \times 30$  feet,  $2\frac{1}{2}$  storeys high. The former dimensions of the school were  $60 \times 30$  feet, but thanks to the kind assistance of the department, we were able, during the year, to erect an addition to the east end of the school, which comprises three flats,  $30 \times 30$  feet. It is occupied as follows: first floor, the girls' play-room; second floor: junior pupils' class-room; third floor, girls' dormitory.

Attendance.—The attendance is regular, owing to the fact that the pupils are all boarders at the institute.

Class-room Work.—The course of studies authorized by the department for Indian schools is successfully followed.

Garden.—The six acres under cultivation for garden purposes yield a sufficient supply of assorted vegetables.

Industries Taught.—The boys are kept occupied according to their age. They prepare the fuel, bake their own bread, and help in caring for the cattle. The girls strive to acquire proficiency in household duties.

Moral and Religious Training.—Special attention is given to this very important branch of Christian education.

Health and Sanitation.—This has been an exceptionally healthy year for the pupils, there being no sickness whatever, except a few cases of quinsy.

Water Supply.—The large well in which was placed the new horse-power sweep pump having failed to give a sufficient supply of water, we were obliged to dig another, which, to all appearances, is going to answer the purpose.

Fire Protection.—A fire-escape stairs has been made, leading from the top storey to the ground. Four chemical fire-extinguishers, ladders and pails are kept in readiness.

Heating and Lighting.—The building is heated by wood stoves, and kerosene lamps are used for lighting purposes.

Recreation.—An hour's recreation is given after each meal. The girls greatly enjoy their mandolin orchestra. The boys are starting a brass band.

[ have, &c..

L. BALTER,

Principal.

# PROVINCE OF ALBERTA, CROWFOOT BOARDING SCHOOL, BLACKFOOT AGENCY, CLUNY, April 1, 1909.

FRANK PEDLEY, Esq.,

Deputy Supt. General of Indian Affairs, Ottawa.

Sir,—I have the honour to submit my annual report for the year ended March 31, 1909.

Location.—This school is situated  $2\frac{1}{2}$  miles from Cluny post office, near the Bow river.

Land.—There are about 25 acres under cultivation, for the use of the school. It is government land, being a part of the Indian reserve, and is fenced in with permission of the department and the consent of the Indians.

Buildings.—The main building, 36 x 36 feet, is three storeys high, the third storey of which is not yet completed.

There are two wings to the main building, two storeys high, 36 x 32 feet.

Behind the main building and adjacent to it, is a two-storey building 50 x 20 feet. The buildings are divided into an office, reception-room, refectory, kitchen, pantry, milk-house, storehouse, laundry, school-room, sewing and recreation-rooms on the ground floor; while upstairs are the dormitories, chapel, dining-room for the staff, and two rooms used for hospital purposes, in case of any contagious disease.

The outbuilding are two stables, an implement-shed and a root-house.

A well-kept picket-fence surrounds the main building, and there is an ordinary wire fence around the garden, pasture and field.

Accommodation.—Under present arrangements, there is accommodation for 60 pupils and a staff of eight.

Attendance.—There are 44 children on the roll, 27 boys and 17 girls, 14 of whom are maintained at our charge, being in excess of the number provided for by the government.

Class-room Work.—The programme of studies prescribed by the department is followed as closely as possible. The progress is very good, and encouraging.

The grading of the pupils is as follows:-

Stand	ard I	. 16 pupils.
"	II	. 9 "
"	III	. 4 "
	IV	12 "
"	V	. 3 "

Farm and Garden.—About 25 acres are under crop, 10 in oats, 10 in potatoes and 5 in garden. The larger boys do the ploughing, as well as the mowing when the hay season comes.

Industries Taught.—Farming and gardening, baking and dairy work, the care of horses and cattle, are taught the boys.

The girls are instructed in dressmaking, knitting, cooking and general housework. Moral and Religious Training.—Of course, great care and special attention is given to this most important part of education. Religious instruction is given to the pupils by the priest and the teacher each day, and it is encouraging to see the great efforts the children make in order to put into practice the lessons they are taught.

Health and Sanitation.—The general health has been very good, no deaths have occurred during the year. The sanitary conditions are looked after carefully and everything is kept clean around the house and the outbuildings.

Water Supply.—Our water-supply is drawn from a well close by.

Fire Protection.—Fire-extinguishers, hand-grenades, fire-pails and fire-axes are distributed throughout the halls and rooms.

Heating and Lighting.—The school is heated partly with stoves, partly with one

hot-air furnace, and light is supplied by coal-oil lamps.

Recreation.—Football, shooting with bows and arrows, fishing, swinging and skating are the favourite pastimes of the boys; the girls amuse themselves in playing ball and croquet, skipping, &c.

I have, &c.,

J. L. LEVERN, O.M.I., Principal.

Province of Alberta,

Ermineskin's Boarding School,

Hobbema, April 5, 1909.

FRANK PEDLEY, Esq.,
Deputy Supt. General of Indian Affairs,
Ottawa.

Sir,—I have the honour to submit my annual report for the fiscal year ended March 31, 1909.

Location.—The school is situated on the Ermineskin's reserve, a mile from the station of Hobbema. There is a post office.

Land.—About 40 acres of land are in use for the wants of the mission, five of which are taken up for the garden, five for the yards, and the remainder for pasturage.

Buildings.—The main building, 45 x 50 feet, has a school-room and refectory on the first floor; boys' dormitory, sewing-room and infirmary on the second floor; and girls' dormitory on the third floor. The kitchen and chapel comprise another building, 25 x 20 feet; this joins the main building to the sisters' building, which is  $30 \times 24$  feet. A laundry,  $40 \times 24$  feet, is situated a few yards from the house, and contains a lavatory, store-room, ice-house and three baths, on the first floor, while on the second floor there is a room for drying and ironing clothes, and a room used in case of contagious disease.

Accommodation.—There is accommodation for 75 children and 10 sisters.

Attendance.—The attendance was 56.

Class-room Work.—This year has been to them one of application, and we are happy to state that they have made marked progress in all the branches of the programme given by the department.

Farm and Garden.—Our garden has yielded 275 bushels of potatoes, 300 head of cabbages, 17 bushels of carrots, 7 bushels of onions, and a good quantity of other vegetables. We have in close proximity a large convenient pasture for the animals.

Industries Taught.—The boys spend each day a few hours in farming, and the girls are trained in all the branches of domestic work—sewing, knitting, &c.

Moral and Religious Training.—Religious instruction is regularly imparted to the pupils, to which they pay great attention. We are well satisfied with their behaviour.

Health and Sanitation.—The children enjoyed very good health during the year. Good ventilation and outdoor exercise are our means of sanitation.

Water Supply.—We are much favoured by the department, which provided our school with a good artesian well, a pump and a tread-power, by means of which we obtain water for the institution, the laundry and the stable.

Fire Protection.—Two fire-escapes, 12 dry dust extinguishers, 1 hose, 6 pails and 3 fire-axes are our means of protection against fire.

Heating and Lighting.—Our rooms are lighted by lamps and heated by wood stoves.

Recreation.—Baseball, football, skating and coasting are taken up repeatedly, but they always seem new to the boys.

General Remarks.—During the course of the year the children have given four entertainments, which consisted in drills and singing; they have also given several concerts. They have been asked to play in bazaars, and to give concerts in the neighbouring towns many times. Their talent is greatly appreciated.

I have, &c.,

R. L. DAUPHIN, O.M.I.,

Principal.

PROVINCE OF ALBERTA,
FORT CHIPEWYAN (HOLY ANGELS) BOARDING SCHOOL,
FORT CHIPEWYAN, VIA ATHABASKA LANDING, March 7, 1909.

Frank Pedley, Esq.,
Deputy Supt. General of Indian Affairs,
Ottawa.

SIR,—I take this opportunity of mailing my report for the fiscal year ended March 31, 1909, trusting that you will not disapprove of my sending it three weeks before the end of the fiscal year. Our mail system obliges me to take advantage of this packet, the last before open water, which will leave here in a few days.

Location.—The Holy Angels boarding school is built on the north shore of Athabaska lake. The view is good and location healthy. There are no reserves throughout this unorganized territory, neither is there a post office.

Land.—Our farm-land does not extend over 15 acres. The soil is hilly and barren and not much adapted for cultivation. The farm produce consists chiefly of a good crop of potatoes. A small garden fenced off from the potato field yields turnips, carrots, onions and cabbage. Though scanty, these products prove to be a substantial help.

Buildings.—Our school, the largest and apparently the most imposing, building in this remote part of the country, consists of the main building and two wings, which were added successively as the increasing number of pupils required more space. The boys' and girls' apartments, completely separated, consist of a dormitory, recreation-room, refectory and infirmary.

The attic in the main building was opened up and raised 12 feet, thus giving sufficient room to make a neat little chapel, which proves to be very attractive to the Indians and half-breeds, as well as to our white neighbours. The second floor is partitioned off into five rooms, for the exclusive use of the staff. On the ground floor are parlours and rooms for invalid old women, two of whom were taken in during the year; also, a dispensary, where medicine is given free year in and year out to everybody,

without distinction of colour or creed. We have a good-sized kitchen with adjoining pantries, two good cellars and a wash-house.

Accommodation.—There is ample accommodation for 60 pupils and 13 members of the staff.

Attendance.—As the children are all in residence the attendance is regular.

Class-room Work.—The subjects taught are reading, writing, grammar, composition, geography, and history. Vocal music, calisthenics, gymnastic exercises with wands and dumb-bells are given to the children, who take great interest in them. A competent teacher drills the boys. The military exercises with guns, which they are so proud to perform, make embryo soldiers of our little Indians.

With the exception of two, all our older pupils have been discharged during the past two years. The others are beginners, and the majority being under 10 years of age, progress is slow, yet quite satisfactory, when one considers the little chance these poor children have of being seconded in their studies by their surroundings. Nature affords them very little matter of observation, friends and relatives are of hardly any help, not to say, no help at all. The languages spoken at home are Chipewyan, Cree and French. When the children come to us, the English language is an altogether mysterious idiom to them, and as most of them understand French they are always more inclined to speak it. Nevertheless, with time and patience this great difficulty is overcome, and what seemed most impracticable during the first year, English conversation, becomes a pleasant pastime afterwards. In the class-room great stress is given to practical language lessons in order to stimulate the children and thus secure continuation and progress in this work. Medals and badges are awarded every month for proficiency, merit is also rewarded by little presents, which are always gratefully accepted.

Generally speaking, our children are contented and happy in this their new home, cheerfully performing their daily duties. Exciting events rarely disturb them. One, however, occurred last June, it was the very much appreciated visit, the first ever made, of a school inspector. Although his arrival was altogether unexpected, Mr. Inspector Martin received a hearty welcome and was immediately introduced to our pupils, who had just entered the class-room for the afternoon's work.

After a few moment's hesitation, and I must say, a few inquisitive glances at the gentleman's kind face, our little ones felt sure that they were in the presence of a sympathetic friend, and they were not mistaken, for after allowing them to go through the programme, he kindly questioned them himself, then last, but not least, he filled their hearts with joy by expressing his satisfaction with what he had heard and seen. Needless to say that he received a warm 'Thanks,' and the farewell was a 'Come again.'

Industries Taught.—The boys do the chores and some are taught a little carpentry and shoemaking.

The girls have daily lessons on household duties. The older ones who, as I have already said, are at the beginning of their teens, are able to run the sewing-machine. They cut out and make up their own clothes, and are learning just now to tailor men's suits. The smaller girls are taught to sew by hand; they are very fond of darning and knitting.

Moral and Religious Training.—Great care is taken in this part of the pupils' education. A half hour of religious instruction, given daily, teaches them their duties towards God and man.

Health and Sanitation.—This year has been very unhealthy, owing, I suppose, to an exceptionally hot summer, which was followed by a very disagreeable autumnal season, a prelude to the extra cold weather we have had all this winter. Sickness in the form of a malignant 'grippe,' also a few cases of meningitis, has visited every house in the neighbourhood. Over 50 deaths have occurred since last June; 11 of these, 9 adults and 2 children, were recorded since the month of January.

Full of gratitude towards the divine providence of God, who has watched over 27—i—24

our school, I am happy to state that all our children are in good health, although they, too, paid their tribute to the sickness already mentioned. With the exception of one little boy, who died of meningitis, all the others promptly recovered, and are at present full of blitheful life.

Water Supply.—The lake water is used for laundry purposes. A well, 35 feet deep, supplies us with good drinking water.

Fire Protection.—A force pump and hose, ladders, axes, buckets and three fire-escapes are the fire-appliances on hand.

Heating and Lighting.—A hot-air furnace and seven wood stoves are used to

heat the house. Coal oil is used for lighting.

Recreation.—The boys and girls have each their own playground, where they amuse themselves with balls, swings and other such games. The boys' chief sports are: football, in summer, skating, hunting and trapping in winter, while the girls find great enjoyment in coasting. In fair weather they take a long walk every morning before school and, as often as possible, after their evening meal.

General Remarks.—The amount contributed by the government under per capita

grant is for 40 pupils at \$72.

I have, &c.,

SR. M. McDOUGALL,

Principal.

PROVINCE OF ALBERTA,
LESSER SLAVE LAKE (St. BERNARD'S) R. C. BOARDING SCHOOL,
LESSER SLAVE LAKE, May 3, 1909.

FRANK PEDLEY, Esq.,
Deputy Supt. General of Indian Affairs,
Ottawa.

SR.—I have the honour to submit my annual report for the year ended March 31, 1909.

Location.—St. Bernard's R. C. boarding school is situated on the northeastern bank of Lesser Slave lake, on a beautiful hill which slopes towards the lake and commands a view of the surrounding country.

Buildings.—There are three buildings. The main structure is  $72 \times 28$  feet, three storeys high; the boys' house is  $60 \times 25$  feet, two storeys high; the third building, which has been set apart for a school-house, is  $30 \times 24$  feet. We also have a small laundry, a dairy and a warehouse.

Accommodation.—The buildings are large enough to provide good accommodation for 60 children and the staff necessary to carry on the work.

Attendance.—The attendance was very regular, as all the pupils are boarders.

Class-room Work.—The school hours are faithfully observed. The year has been one of application by the pupils, although young, they have improved wonderfully in all the branches prescribed by the department.

Farm and Garden.—Last year we had 1,400 bushels of potatoes and an abundant supply of vegetables, comprising turnips, carrots, beets, onions, cabbages, rhubarb, lettuce, &c.

Industries Taught.—Our children have special hours each day for manual work. The girls are taught plain sewing, sewing-machine, mending and knitting. The boys do the work around the house.

Moral and Religious Training.—Instruction in the Roman Catholic faith is imparted to the pupils; morning and evening prayers are said and half an hour each day is devoted to religious instruction. The character of each child is cultivated with care.

Health and Sanitation.—The health of the children has been good; they have as much outdoor exercise as is practicable. The dormitories and class-rooms are kept well ventilated.

Water Supply.—Our water-supply is taken from wells and a small river.

Fire Protection.—As fire-protection, we have outside stairs, ladders and buckets. Heating and Lighting.—The heating apparatus is a hot-air furnace, besides several stoves. Coal oil is used for lighting.

Recreation.—This consists of games, calisthenic exercises, walking, playing, &c. We endeavour to make the children as happy as possible.

Trusting this report will be satisfactory,

I have, &c.,

C. FALHER, O.M.I., Principal.

PROVINCE OF ALBERTA, St. John's Homes, Blackfoot Reserve, Gleichen, April 24, 1909.

Frank Pedley, Esq.,
Deputy Supt. General of Indian Affairs,
Ottawa.

SIR,—I have the honour to submit herewith a report of the St. John's Homes (the Old Sun's and White Eagle's boarding schools), on this reserve.

Location.—The homes are situated, the one at the north camp, and the other at the south camp, about 10 miles apart, and within a few yards of the Bow river in each case. That at the south camp still stands closed, pending the promised new building at the north camp, in view of the amalgamation of the two schools.

Buildings and Accommodation.—The Old Sun's boarding school comprises the boarding school proper, the school-house and two outbuildings. The handsome White Eagle's building was to have been removed to the north camp, but nothing has as yet been done.

Attendance.—The number of children on the school roll on the 31st ultimo, was 15 boys and 15 girls. The medical officer has not passed any children into our school for two years past.

Class-room Work.—The children continue to make steady progress, but a class-book or reader is needed more adapted to the needs of their future lives.

Industrial Work.—About 3 acres of land are under cultivation and are carefully worked by the boys, under the instructor's supervision. The yield has been more than sufficient for the needs of the institution. The ordinary farm work and the outside chores are done by the boys. The girls are instructed in all the familiar duties of the household. Some of them are excellent cooks and clever with their needle.

Moral and Religious Training.—This, as the principal branch of our work, has received every care and attention, and we trust and believe their bright and happy lives are assimilating the truths imparted.

Health and Sanitation.—The utmost care has been taken to provide for this in every way we can.

 $27-i-24\frac{1}{2}$ 

Water Supply.—Though the supply is abundant, it is not of good quality.

Fire Protection,—A number of fire-extinguishers and hand-grenades are conveniently placed throughout the building, and buckets and tubs of water are kept where they can be easily got at in time of need. Axes also are kept ready for use.

Fire-escapes outside the buildings are permanently connected with the dormitor-

ies and are easy of access.

Heating.—The boarding school and school-house are heated by stoves only; asbestos safes are used.

Recreation.—A considerable portion of their time is spent in various amusements in the open air, under supervision.

I have, &c.,

H. W. GIBBON STOCKEN.

Principal.

PROVINCE OF ALBERTA,

PEIGAN C. E. BOARDING SCHOOL,

PEIGAN RESERVE, BROCKET P.O., March 31, 1909.

FRANK PEDLEY, Esq.,

Deputy Supt. General of Indian Affairs,

Ottawa.

Sir,—I beg to submit my report on the above institution for the year ended March 31, 1909.

Location.—The school is situated on the banks of Pincher creek, on the northeast quarter of section 12, township 7, range 29, west of the fourth meridian and two miles from Brocket and the Peigan agency.

Land.—The school owns 40 acres of land, being legal subdivision 9 of the section

above mentioned, and is purchasing the remainder of 120 acres.

Buildings.—The buildings consist of a boarding school proper, a laundry, stable, workshop and other necessary buildings.

The boarding school proper is 78 x 32 feet over all.

It is built of wood on a stone foundation, and is lathed and plastered throughout. It contains kitchen, dining-room, play-rooms, dormitories and bath-rooms for the children, also rooms for the staff, as well as store-rooms.

Accommodation.—The school has accommodation for 40 pupils, viz.: 24 boys and 16 girls; also for a staff of six persons.

Attendance.—The attendance has been good.

Class-room Work.—Good progress has been made in all branches of study.

Farm and Garden.—Five acres were sown to fall wheat and two acres for garden, which gave excellent results. Two more acres are broken for a garden, and 10 acres are being broken for oats or wheat.

Industries Taught.—The boys are taught farming, gardening and the care of stock; also breadmaking, and do the work of their side of the school. The girls are taught sewing, mending, darning, knitting, washing, ironing, breadmaking, baking and general housework.

Religious Instruction.—Religious instruction is given daily, and one service

each Sunday is held in their own language.

Health and Sanitation.—The health of the pupils has been good. We have had no serious sickness during the year. The building is well ventilated throughout, and everywhere kept clean and free from rubbish.

Water Supply.—All water is taken from a drivewell, situated in the kitchen, from which we obtain a supply of good water.

Fire Protection.—There are 12 fire tubes distributed throughout the building.

Heating and Lighting.—The building is heated by two large Pease furnaces, which have been in use for 11 years, and give every satisfaction. The building is lighted with ordinary coal oil lamps.

Recreation.—The boys play football and other manly games, while the girls enjoy the quieter games suitable to them.

General Remarks.—The general work of the institution has been done mostly by the pupils. Three pupils were discharged during the year, and 10 admitted.

I have, &c.,

W. R. HAYNES,

Principal.

PROVINCE OF ALBERTA,
PEIGAN (SACRED HEART) R. C. BOARDING SCHOOL,
PEIGAN AGENCY, BROCKET, April 10, 1909.

FRANK PEDLEY, Esq.,

Deputy Supt. General of Indian Affairs, Ottawa.

SIR.—I beg to submit the following report of the Peigan (Sacred Heart) boarding school for the last fiscal year, ended March 31, 1909.

Location.—This school is situated on fine elevated ground on the north side of the Oldman's river, a very healthy location in the centre of the Peigan reserve, in close proximity to the old agency buildings. The post office address of this school is Sacred Heart boarding school, Brocket, Alta.

Land.—The land on which this school is built belongs to the reserve. About half an acre is fenced off for a vegetable garden, in which we raise a fair crop, if the season is not too dry. About 50 acres are fenced for a pasture.

Buildings.—The school building consists of a large house,  $102 \times 26$  feet, with an addition on the north side for a kitchen,  $19 \times 16$  feet, and a pantry,  $17 \times 14$  feet. The centre building is  $30 \times 30$  feet square, two storeys high; the attic is unfinished and unoccupied.

On the first storey are the refectories for the staff, the sewing-room and the parlour, a corridor leads from the front door to the kitchen. On the second storey is the room for the staff and a chapel of good size. On the west side there is, on the first floor, the class-room and the recreation-room for the boys; on the second floor the dormitory for boys,  $34 \times 26$  feet. On the west side, on the first floor, is situated the refectory for the pupils, and the recreation-room for the girls; on the second floor is the girls' dormitory. We have a small outbuilding,  $18 \times 17$  feet, used as a stable and chicken-house. Close to the kitchen is the laundry-house,  $30 \times 20$  feet; on the first floor of which is the wash-room,  $20 \times 20$  feet, and the coal-room,  $20 \times 10$  feet; in the upper storey is the drying-room. We have also a stable,  $28 \times 20$  feet.

Accommodation.—The building affords accommodation for 40 pupils and the staff.

Attendance.—The pupils of this institution are all boarders; therefore the attendance is regular. During the fiscal year 1908-9, we had 37 pupils in attendance. One girl, No. 024, was transferred to the Dunbow school. We recruited three new pupils, one girl and two boys.

Class-room Work.—We follow the programme of the department. The progress is generally fair and encouraging. The best pupil, a boy, No. 8, is now in standard **V** 

Farm and Garden.—We have not a regular farm, but we have a garden, in which

at special hours the pupils work.

Industries Taught.—Our pupils have special hours each day for manual work. The boys work in the garden, keep clean their rooms and dormitory, scrub the floors, help in the laundry-house and do the chores. The girls are kept busy at general housekeeping, help in the kitchen, knit, sew, mend and wash their clothes. The older girls cut and make their own dresses.

Moral and Religious Training.—Special attention is given to instruction of the pupils in moral and religious truths; prayers, Bible history and catechism are taught

half an hour each day by the reverend principal.

Health and Sanitation.—The health of the pupils has been generally good, except a few cases of scrofula. A boy, No. 22, who has been with his family for some time, seems to be better now, and another, No. 23, has been at the Blood reserve hospital for the last few months.

Water Supply.—We have a good well, a few feet from the kitchen, with sufficient water for the needs of the school.

Fire Protection.—We have three fire-axes and buckets of water are kept at convenient places; also several fire-extinguishers, distributed throughout the building.

Heating and Lighting.—We use common coal stoves for heating purposes. Proper care is taken against any danger from fire. Coal-oil lamps are used for light-

ing purposes.

Recreation.—We have two recreation-rooms, large and well ventilated; the larger for the boys, the other for the girls. We have a fence around the school buildings, inclosing two yards for the pupils. Besides, there is around the buildings a good piece of prairie, where they can play in good weather, under the supervision of some of the staff, and where the boys take a special delight in playing football or some other game.

I have, &c.,

L. DOUCET, O.M.I.,

Principal.

PROVINCE OF ALBERTA,
SARCEE BOARDING SCHOOL,
CALGARY, June 11, 1909.

FRANK PEDLEY, Esq.,

Deputy Supt. General of Indian Affairs, Ottawa.

SIR,—I have the honour to submit a report of the Sarcee boarding school for the fiscal year ended March 31, 1909.

Location.—The school is situated on the southeast corner of the Sarcee reserve, near the agency buildings.

Land.—About 10 acres are occupied for school purposes, including garden and small pasture.

Buildings.—The school consists of two wings for boys and girls respectively. They are connected with each other by a commodious dining-room and kitchen.

Accommodation.—There is accommodation for 20 boys and 10 girls, and for a staff of three.

Attendance.—Eighteen pupils have been in attendance during the year. Two girls were discharged and married from the school in the early part of the year. Four boys and one girl were admitted provisionally during the year.

Class-room Work.—This has been carried on as usual, the standing of the pupils at the close of the fiscal year being as follows:—

Standa	rd I	 		 	9 pupils.
"	II	 . ,	·	 	4 "
"	ш	 		 	1 "
"	IV	 		 	2 "
					·
	Total	 		 	16 "

Moral and Religious Training.—Every effort is made to inculcate religion and morality. The children attend prayers daily with Bible reading and instruction. The Lord's Prayer, Ten Commandments and church catechism are taught, and various portions of the Holy Scriptures are committed to memory by the pupils.

Farm and Garden.—No attempt has been made to do farming, the pupils all being transferred to the Calgary industrial school, whilst that institution was available. A fairly large garden is kept up, which yields a good supply of vegetables.

Health and Sanitation.—One pupil developed tubercular trouble, and was allowed out on sick leave at the beginning of the year.

Water Supply.—This is obtained from a good well and pumped into the house. Fire Protection.—Barrels, buckets and dry-dust fire-extinguishers are kept on hand at convenient places.

Heating and Lighting.—Coal and wood stoves are in use, and lighting is pro-

vided for by coal-oil lamps.

General Remarks.—The staff continue as in years past, and do valuable work. The ex-pupils, speaking generally, are doing well. The older girls, now married and bringing up young families, delight to spend a day occasionally at the school, and are in touch with the workers continually.

I have, &c.,

J. W. TIMS,

Principal.

### PROVINCE OF ALBERTA,

STURGEON LAKE BOARDING SCHOOL, St. Francis Xavier's Mission, Sturgeon Lake, April 4, 1909.

Frank Pedley, Esq.,

Deputy Supt. General of Indian Affairs, Ottawa.

SIR,—I have the honour to submit my first yearly report of the Sturgeon Lake (St. Francis Xavier's) boarding school for the year ended March 31, 1909.

Location.—The St. Francis Xavier's boarding school is pleasantly situated on the banks of Sturgeon lake, in the centre of the Sturgeon lake reserve. The location is very healthy, the mountains bordering the southern part of the lake and the beautiful sunsets make scenery which both teachers and pupils enjoy.

Land.—About 240 acres of land are in connection with the school; of this, 30 acres yield a good crop of vegetables, while the rest is in pasture or woodland.

Buildings.—The main building, a 3-storey structure, 40 x 27 feet, with a wing adjoining in the rear, 27 x 20 feet, two storeys, comprises: hall, parlour, dining-rooms, class-room, chapel, boys' and girls' dormitories, kitchen, store-room, and private apartments for the staff. It is well ventilated and comfortable. The outbuildings consist of a laundry, storehouse, barn and a stable. A new house is being constructed for class-rooms and recreation-halls; also a wing adjoining the kitchen, 24 x 18 feet.

Accommodation.—The building accommodates five sisters and 35 children.

Class-room Work.—The programme of studies is carefully followed. However, reading, English language, arithmetic and penmanship are given special attention, this being deemed very important. The children love their class-room work and are eager to learn.

Attendance.—All the children being kept in the house, the attendance has been

perfectly regular.

Moral and Religious Training.—Daily religious exercises and the teaching of the Roman Catholic doctrine are given to the children with the utmost care. No pains are spared to refine their character, elevate their sentiments and make of them good Christians.

Industries Taught.—The boys prepare wood for fuel, and sometimes help to carry in the water, and keep their playgrounds in perfect order. The heaviest part of the housework is now and then done by the boys, such as scrubbing, &c.

The girls are taught general housework, knitting, mending, laundry work, sew-

ing, and help in the kitchen.

Health and Sanitation.—The pupils' health has been very good throughout the year. No deaths occurred, and we had no case of severe illness.

Water Supply.—Plenty of pure, drinkable water is supplied from the lake near-by. Fire Protection.—Fire-pails and ladders are kept in readiness, and we shall soon proceed to build outside stairs and other accommodation.

Heating and Lighting.—Ordinary wood stoves are used for the purpose of heat-

ing. The lighting is done by means of coal-oil lamps.

Recreation.—The pupils take their recreation under the supervision of their teachers. Outdoor exercises are highly encouraged. The boys enjoy a variety of games, including baseball, football, racing, jumping, and shooting with bows and arrows. The girls take pleasure in dressing dolls, dancing and skipping; they also play with the same toys indoors as the boys, on alternate evenings.

I have, &c.,

J. CALAIS, O.M.I.

Principal.

PROVINCE OF ALBERTA,

St. Albert Boarding School, St. Albert, April 4, 1909.

FRANK PEDLEY, Esq.,

Deputy Supt. General of Indian Affairs, Ottawa.

Sm,—I have the honour to submit my annual report for the year ended March 31, 1909.

Location.—The St. Albert boarding school is not on a reserve. It is beautifully situated at a distance of a quarter of a mile north of the Canadian Northern rail-

way station, on an eminence overlooking the town of St. Albert and the Sturgeon River valley.

Land.—Some 335 acres of land are attached to the school. The soil is of excellent quality, and from 200 acres, large crops, consisting of hay, vegetables and cereals are produced. The remaining 130 acres are in pasture or woodland. The farm is the property of the Sisters of Charity. It lies in township 54, range 25.

Buildings.—The main building is a 4-storey frame structure,  $180 \times 35$  feet, with brick foundation and is occupied by the girls and members of the staff. The section,  $50 \times 30$  feet, in which the boys formerly took up their quarters, has been replaced by a 4-storey brick building. Six well equipped and commodious class-rooms are also situated in this section. These rooms, as well as all the others throughout this structure, are spacious and well ventilated. A new laundry has also been put in this building. A kitchen,  $40 \times 30$  feet, joins these two buildings. The outbuildings consist of bakery, barn, stables, hennery, implement-shed, repair shops and storehouses.

Accommodation.—The present buildings have accommodation for 300 persons.

Atendance.—There has been an average attendance of 65 Indian pupils during the year.

Class-room Work.—The progress in the school-room throughout the year has been very satisfactory. The public school programme of studies for the province is followed as closely as circumstances will permit. Most of the pupils have musical talent. The boys have a disciplined and well trained brass band. Fourteen of the girls have been learning the mandolin since May, 1907, and can master the instrument quite well now. Musicals are frequently given by these pupils and their proficiency noted.

Farm and Garden.—Last year the yield of grain was as follows: wheat, 850 bushels; oats, 3,254 bushels; barley, 2,326 bushels; potatoes, 1,440 bushels; vegetables, 390 bushels; hay, 200 tons. The wheat especially was greatly damaged by frost.

Industries Taught.—Both boys and girls have fixed hours for work, during which time they are trained in various trades and industries by competent teachers. The boys are thoroughly instructed in the different branches of farming and gardening, dairy work and rough carpentry. The girls are instructed in the culinary department, dairy, laundry, dressmaking, carding, spinning, knitting, machine sewing, fancy work, plain needlework and general housework, in which many of them excel, as is proved when they leave school and have homes of their own to look after.

Moral and Religious Training.—The pupils are thoroughly instructed in the principles of faith and religion. They are vigilantly trained to self-respect, truthfulness, and all Christian virtues. It is a pleasure to certify that good results are obtained. Punishments are of very rare occurrence.

Health and Sanitation.—The general health of the pupils has been good. Scrofula is the main ailment we have to contend with. The sanitary condition of the school is excellent.

Water Supply.—Three wells furnish the institution with an abundant supply of excellent water. The water of two of these wells is pumped into tanks by a hot-air engine; the third is pumped by a hand pump.

Fire Protection.—Water being distributed throughout the building affords a good defence. Easy access from every department to outside galleries and stairs; fire-escapes, 500 feet of hose, 13 chemical fire-extinguishers, six grenades, four fire-axes and several ladders placed about the building, all kept in readiness in case of emergency, constitute our fire-protection.

Heating and Lighting.—The main building is heated by three hot-air furnaces and several ordinary stoves; coal and wood are used as fuel. The new section is heated by two Economy water heaters. Light is satisfactorily supplied to the primary building by Siche gas; to the new one by ordinary lamps.

Recreation.—Every day two hours are set aside for recreation; when weather permits, the boys play baseball and football and other open-air healthful games. The girls amuse themselves at croquet, basketball, skipping, physical drills, &c.

I have, &c.,

SISTER M. A. CARROLL,

Principal.

PROVINCE OF ALBERTA,
WABISKAW (St. John's Mission) C.E. Boarding School,
WABISKAW LAKE, June 24, 1909.

FRANK PEDLEY, Esq.,

Deputy Supt. General of Indian Affairs, Ottawa.

SIR,—I have the honour to forward the annual report of the Wabiskaw (St. John's Mission) Church of England boarding school for the year ended March 31, 1909.

Location.—The school is situated on Lake Wabiskaw, on the north side of a small bay, at the south end of the lake. The post office is kept at the Hudson's Bay Company's store here, and is called Wabasca.

Land.—The land has never been surveyed or measured; it is a long narrow strip running back about three-quarters of a mile. It is situated between the trading posts of the Hudson's Bay Company and the Revillon Brothers, Limited. There is perhaps in the claim about 45 acres, about 12 acres of which are cleared. The land belongs to the Church Missionary Society of England, and was bought from an Indian who had cleared about an acre. The land is rich and slopes gently towards the south; potatoes, garden truck and most grains are grown with success. We rarely have either late or early frosts.

Buildings.—The boarding school is  $33 \times 24$  feet, with kitchen,  $22 \times 16$  feet,  $1\frac{1}{2}$  storeys high, and with Gothic windows. The mission house is two storeys high, 20 feet square, with kitchen,  $14 \times 13$  feet. The church is  $17 \times 22$  feet, with a chancel  $10 \times 12$  feet, in which school is taught during the week. There is also a storehouse,  $12 \times 14$  feet.

Repairs and Additions.—Horse stable built,  $18 \times 20$  feet; cow stable moved to rear of horse stable, and a new roof put on; storehouse built,  $16 \times 20$  feet; slight alterations made to a storehouse,  $12 \times 14$  feet, and turned into a workshop. All are log buildings.

Accommodation.—In the school building we have room for 15 girls and 12 boys; also for two ladies of the staff.

The mission-house has accommodation for the missionary's family, also for a teacher.

Attendance.—The majority of the scholars being boarders, their attendance is good. The children of the traders attend regularly. The average has been fairly high for the past year.

Class-room Work.—The teaching ranges from the very beginning to the fourth reader. The writing generally is very good; to the more advanced pupils geography and grammar are taught.

Farming and Gardening.—There is in this neighbourhood no real farming; cattle and horses are raised, and the missions, traders and a few Indians have good gardens.

i

Industries Taught.—The boys are taught the care of horses, stock, &c., gardening and fishing. The girls receive good training in all connected with housekeeping.

Moral and Religious Training.—Nothing is spared on the part of the teacher to give the pupils a sound moral and religious training, and to instil into their minds a true sense of their Christian duties.

Health and Sanitation.—The health of the children has been exceptionally good; every care is taken to keep them in good health.

Water Supply.—The water-supply is defective, as we are dependent on the lake. It is drawn to the school in barrels. At times, especially during high winds, the water is very dirty owing to the mud being stirred up. At all times all water used for household purposes is carefully strained.

Fire Protection.—We have no regular system. Ladders are hung to the peaks

of the buildings and a supply of water kept standing in barrels.

Heating and Lighting.—Heating is done by stoves; wood is the only fuel used. Lighting is done by means of oil lamps and candles

Recreation.—We have swings and teeters, sleighs and skates; also football and cricket.

I have, &c.,
W. F. BROADSTOCK,

Principal.

PROVINCE OF ALBERTA,
WABISKAW (St. MARTIN'S) R.C. BOARDING SCHOOL,
LAKE WABISKAW, June 30, 1909.

Frank Pedley, Esq.,
Deputy Supt. General of Indian Affairs,
Ottawa.

SIR,—I have the honour to forward the annual report of the Wabiskaw (St. Martin's) Roman Catholic boarding school for the fiscal year ended March 31, 1909.

Location.—The St. Martin's Mission is situated on a stony point on the northern shore of Lake Wabiskaw. A splendid view of the surrounding scenery can be had from the buildings.

Land.—The area of land in connection with the school consists of about 22 acres. Of this portion, about five acres are under cultivation. The remainder affords good posturage.

Buildings.—There are four buildings, the two largest of which stand in a horizontal line, and the church is just in the centre, but advanced toward the lake, so as to form an oblique line to the two houses. These buildings are of hewn logs, two of them being 42 x 32 feet, three storeys high. One is devoted to school purposes.

A wing on the west side is  $24 \times 20$  feet. On the first floor is the school-room, on the second, the boys' dormitory. Two outbuildings have been erected, one for a dairy and a safe storage for meats and other articles of food; the other house is used for a carpenter-shop. There are also two stables and a hen-house.

Accommodation.—There is room for about 50 pupils and a staff of seven members. The girls have their apartments in the main building, on the west side. Their rooms comprise a recreation-hall, a dormitory, refectory and a sewing-room. The other apartments are occupied by the members of the staff; these apartments and the children's refectory have been repaired and painted during the year.

Attendance.—There are 36 pupils, on an average, daily in attendance.

School-room Work.—The pupils have six hours of school a day. Their progress is generally encouraging.

Industries Taught.—The girls are taught sewing, knitting, washing, ironing and all that can contribute towards making them good housekeepers. The boys prepare the fuel and aid in the care of the stock and gardens.

Moral and Religious Training.—The moral and religious training is based on the pure and unsullied doctrine of the Holy Scriptures. The reverend father in charge instructs the children with great care and zeal, and we do our utmost towards making them understand and practise what they are taught.

Health and Sanitation.—One boy died from consumption, July 3, 1908. The rest of the children have all enjoyed good health during the year. We attribute this in a great measure to good ventilation and frequent outdoor exercise.

Water Supply.—A large supply of water is always kept on hand in case of fire. We are also provided with ladders and buckets. Other improvements are to be made.

Heating and Lighting.—All the houses are heated by stoves. Wood is the only fuel used. Coal oil is used for lighting, and proper care is taken against danger by fire.

Recreation.—Outdoor exercise and games are given as often as the weather permits. The boys have great sport in playing football, while the girls amuse themselves skipping, swinging, playing games and rolling hoops.

Trusting this report will meet with your approval,

I have, &c.,

SISTER MARY FLORE,

Principal.

DOS. LAFERRIERE,

Superintendent.

PROVINCE OF ALBERTA,
WHITEFISH LAKE (St. ANDREW'S MISSION) BOARDING SCHOOL,
LESSER SLAVE LAGE P.O., VIA ATHABASKA LANDING, April 26, 1909.

FRANK PEDLEY, Esq.,

Deputy Supt. General of Indian Affairs,

Ottawa.

Sir,—I have the honour to forward my annual report for the fiscal year ended March 31, 1909.

Location.—Whitefish lake lies 40 miles northeast of the town of Lesser Slave Lake.

The school faces southwest, lying back about 300 yards from the beautifully wooded shores of the smaller Whitefish lake, over which it looks. The lake is about 3½ miles long by 2 miles wide; in places it is deep and abounds with fish. It is joined to the big lake, which is about 3 miles distant, by a river of the same name.

Land.—The school is not situated on a reserve, but lies about half a mile from its north boundary. This land has not been surveyed, but we claim, and have marked out, a lake frontage of about 350 yards, running back into the bush a mile. This land was taken up and occupied by one of our missionaries in the year 1892, and is held in trust for the diocese of Rupert's Land (Church of England). When first settled it was thickly covered with trees and underbrush to the edge of the lake. Since then considerable clearing has been done. At the present time there are about nine

cleared acres. The land is slightly undulating; from the lake it rises gradually to a distance of about half a mile, and, with the exception of what has been cleared, it is all bush. Close to the lake, where the timber has been the heaviest, the soil though shallow, is rich, being a dark, sandy loam to a depth of about 4 inches, with a subsoil of sand, and when manured produces a good garden. One hundred yards from the edge of the lake, the rise is greater; here the soil turns into a clay loam, with a hard clay subsoil.

Buildings.—The home is a log building; its dimensions are  $28 \times 24$  feet, with a boys' dormitory above, also a wing,  $16 \times 14$  feet, used as a kitchen, with girls' dormitory above. A store for home provisions was erected last year,  $14 \times 16$  feet; also two separate closets for school use; a stable, carpenter's and fish-house combined; besides these there is the house of the missionary in charge, his storehouse and the church.

Accommodation.—There is room for 24 pupils and three of a staff.

Attendance.—For the two quarters ended December and March we had a daily school average of 15 and 20 respectively. During the three quarters past we had 35 on the roll.

Class-room Work.—English, reading, writing, arithmetic, geography, general knowledge, ethics, recitation, vocal music, cooking and religious instruction are the subjects taught.

Farm and Garden.—Last year we had a garden of about an acre and a half, well stocked with potatoes and vegetables of various kinds. The soil is well suited for the growth of potatoes, carrots, onions and peas. This year we hope to break up an additional three-quarters of an acre of land, to increase our potato patch.

Industries Taught.—The boys help in all garden work and the care of the cattle and horses kept at the mission; also do the general work and gardening.

Moral and Religious Training.—This is conducted along Church Missionary Society lines.

Health and Sanitation.—We have two closets, one for boys and one for girls, about 40 yards from the home building. The health of the children, as a whole, has been good this winter; so far we have had no epidemic. On New Year's Day one of the girls, aged nine, went with her father to visit, this being the custom among them. As she was not feeling very well, they kept her against our wish, and in three weeks she died of consumption at her own home. She had been delicate from infancy, and had been three winters in the home, and from the first we had taken special care of her. The dormitories are healthy rooms, being high and airy, with no ceiling, open to the roof. The home is whitewashed, both inside and outside, once a year, and kept thoroughly clean.

Water Supply.—During summer and most of the winter, the boys carry water from the lake in buckets; the latter part of the winter we use snow.

Fire Protection.—A ladder is attached to the roof of the kitchen, one on the roof of that building, and another on the home. We have axes, buckets and a big barrel inside the house for holding water.

Heating and Lighting.—All the buildings are heated by box stoves, wood being the fuel used.

The home is lighted with coal-oil lamps.

Recreation.—Football, bows and arrows, swings and dog sleighs used as toboggans form their principal amusements.

General Remarks.—About 16 acres of the mission land is inclosed within a rail fence, five rails high, about nine acres of which is cleared.

All outside help is done by the natives, and as they are not able to do as much work as a white man, it makes the work more expensive.

I have, &c.,

C. D. WHITE.

Principal.

### PROVINCE OF ALBERTA,

RED DEER INDUSTRIAL SCHOOL, RED DEER, April 7, 1909.

Frank Pedley, Esq.,
Deputy Supt. General of Indian Affairs,
Ottawa.

SR,—I have the honour to submit my report for the fiscal year ended March 31, 1909.

Location.—The school is situated on the north bank of the Red Deer river, about three miles in a direct line from the town of Red Deer, but on account of the windings of the river, the actual distance is about four and one-half miles. We have a beautiful location and a very fine view of the surrounding country, a rolling prairie varied by river, creek and bush. The school is not situated on a reserve, the nearest being about 40 miles to the north.

Land.—There are three quarter sections of land where the buildings are situated, being part of section 14, township 38, range 28, west of the fourth meridian; also some 14 acres of section 11, which lies between the original school property and a deep gully to the southwest and was later added by gift of the government. In addition, we have half each of sections 16 and 20, hay-land. The whole acreage thus under control of the school amounts to 1,140 acres, and is the property of the Department of Indian Affairs. The three quarter-sections of 14 consist of the best black loam soil, and are admirably adapted for mixed farming and gardening.

Buildings.—The main building is of gray stone, quarried from the river bank immediately below. It contains the dormitories for the girls, as well as all the boys under 10 years of age, private rooms for lady members of the staff, staff dining-room and sitting-room, general dining-room, kitchen, laundry, store-rooms, sewing-room and principal's office.

A three-storey brick building accommodates the bigger boys. The ground floor of this building has been slightly changed this year by adding a gymnasium. The second storey is the dormitory, and the third storey forms the school-room, which is also used for chapel purposes.

In addition to these larger buildings, there is a neat and commodious residence for the principal, three cottages for married members of the staff, a blacksmith and carpenter's shop, ice-house and refrigerator combined, pig-house, horse-stable, cowstable, hen-house, dairy, engine-house, implement-shed, well-house, granary, private stable and three closets.

Accommodation.—There is accommodation for 75 pupils and a staff of 10.

Attendance.—The year began with 59 names on the roll and 50 in actual attendance. The record of the year is as follows:—

Number on roll	
Total	64
Died	3 6
Dropped	7
Total	16
Total number on roll	48
Total number in attendance	43

Class-room Work.—The half-time system is carefully followed, and another very successful year has been spent in this department. Mr. W. B. Shaw, who holds a first-class professional New Brunswick certificate, has proved himself quite equal to the task of carrying on the splendid work he started in the class-room last year. The progress of many pupils is very marked. At the close of the year the grading of the pupils is as follows:—

Standar	rd I	8	pupils.
"	II	10	"
"	III	12	"
"	IV		"
"	V	3	"
"	VI	2	"
	Total	43	"

Farm and Garden.—Last season we had about 220 acres of land under cultivation as follows:—

follows:—	20200	01 100	a dilac- carare	
	Acr	eage.	Yield.	
Fall wheat		15	700 bushe	ls.
Oats		<b>10</b> 0	5,500 "

We have live stock as follows:				
13 horses, valued at			\$1,840 00	
26 cows, valued at \$35 each			910 00	
17 steers, valued at \$30 each			510 00	
33 young cattle, valued at \$25 each			825 00	
m . 100			A 4 0 0 4 0 0	
Total 89		*	\$4,085 00	

Industries Taught.—Farming and cattle-raising are the chief industries in which the boys are trained. This is quite appropriate, for all our pupils come from good agricultural districts. Messrs. T. A. McMahon and Charles Hives have been in charge of this department. Very good work has been done and pains have been taken to instruct the boys in the science of farming, so that they would more intelligently do the tasks assigned them.

We cannot profess to teach any trades in this institution at present owing to various conditions: 1st, small attendance; 2nd, lack of convenience; 3rd, the fact that no work is allowed away from the institution; however, when there are improvements being made the boys are instructed in carpentry, painting, paper-hanging, &c., by Messrs. T. H. Lockhart and J. S. Kendell, who are professional men at their trades.

The instruction among the girls has been carried on by the same competent staff of ladies whose names were reported last year, with very encouraging results, viz.: Miss Cummings, matron; Miss F. Oldford, kitchen; Miss A. Culham, laundry, and Miss S. Slack, sewing-room.

Moral and Religious Training.—The interest in this department has increased. The regular services have been conducted morning and evening, each Sabbath, with

a well organized and up-to-date Sabbath school in the afternoon weekly. Two of our senior boys represented this work in a very able manner at a recent Sunday school convention. Daily prayers and the voluntary classes have been in full swing. At a recent sacramental service, 15 of the pupils took an intelligent and reverent part.

Health and Sanitation.—Throughout the year the general health of the pupils has been excellent. Three of the pupils died at their homes during the year. The last report of the inspector states, 'the buildings are kept neat and clean, great care being given to the question of sanitation.'

Water Supply.—An abundant supply of pure spring water is pumped through the two main buildings by steam pump, and stored in tanks. Also a second well is in working order, with hand pump, and in close proximity to the buildings.

Fire Protection.—We have the water tanks and 36 dry-dust fire-extinguishers.

We are also installing two modern fire-escapes.

Heating and Lighting.—Two Smead-Dowd and two Pease furnaces have kept the main building and the principal's house comfortable during the past winter. The cottages are heated with wood stoves. Coal oil is used for lighting throughout.

Recreation.—The girls have found ample recreation all winter on the skating

rink. In the summer they walked and played outdoor games.

The boys have spent a good season in skating and playing hockey; all the summer games are played in season. A regular evening has been reserved during the winter for a mixed social gathering.

The libraries have been very well patronized.

General Remarks.—(a) General Repairs.—We have been keeping an eye on the general comfort of staff and pupils by carrying out some improvements to the buildings. A new galvanized iron roof has been put on the boys' building. Metallic ceiling and painted walls add much to the appearance of the general dining-room. A cement floor has been laid in the laundry. The residences have been papered and painted throughout. A closet system is being installed, to be supplied by water from the large tank.

- (b) The Effort to secure Puvils.—Feeling convinced that nothing less than a thouse o-house visitation for the purpose of an educational campaign among the adult Indians would ever bring the tide towards this institute, the writer has spent about half of the fall and winter in the work, and this visitation is completed on the following reserves: White Whale Lake, Saddle Lake, Whitefish and Goodfish and Battle River. The situation on the Morley reserve has also been thoroughly canvassed. In every individual case the following points have been dealt with: the workings of the institute, with a description of the buildings, provision for pupils, &c., the changing conditions of the circumstances of the Indian people making a modern education absolutely necessary for the children. The duty of the Indian parent to change the nature of his love for his children and instead of loving them as a toy to be played with, he should love them as a charge to be developed and improved; thus he would be willing to sacrifice himself for the higher interests of the children. Whether the plan reads success for this institute from a statistical point of view or not, I am convinced it is the only way permanently to improve the attitude of the adult Indians towards the subject of modern education.
- (c) The Efforts and Influence of the Staff.—In the meantime, a different condition has to be met in the school itself. While the Indians are studying this question, the attendance of the school is slowly but surely on the wane. This means a feeling of hopelessness on the part of the pupils, for while there is no inflow of new pupils to create inspiration, the responsibility of keeping up the spirit of the school devolves entirely upon the members of the staff. I am glad to be able to state that the workers here have proved equal to the occasion, and too much praise cannot be given to those who have had to face the rountine work for the spirit of buoyancy and enthusiasm they have sustained in the lives of the boys and girls. Further, as

it is now recognized that the personality of the teacher is a very important factor in the education of children, it is gratifying to note the working of this law under the conditions faced by the staff of this institute.

In conclusion, I beg to acknowledge the uniform courtesy of government officers and missionaries on the reserves, also the kindness and sympathy accorded by the officials of the Missionary Society and the Indian Department at Winnipeg and Ottawa.

I have, &c.,
ARTHUR BARNER,
Principal.

PROVINCE OF ALBERTA,
St. JOSEPH'S INDUSTRIAL SCHOOL,
DAVISBURG, April 20, 1909.

Frank Pedley, Esq.,
Deputy Supt. General of Indian Affairs,
Ottawa.

Sir,—I have the honour to submit my annual report for the year ended March 31, 1909.

Location.—The school is situated on the west bank of High river, about three-quarters of a mile from its mouth. It is built in a valley and surrounded by hills, which in winter afford excellent shelter, and in summer add much to the picturesque attractiveness of the place. The school is four miles from Davisburg post office and 11 miles from DeWinton station, our nearest railroad station. The school is not on a reserve.

Land.—There are 1,870 acres of land in connection with the school. The home farm consists of 1,063 acres, as follows: the east half of section 22, township 21, range 28; half of the southwest quarter of section 26, township 21, range 28; 30 acres of section 15, township 21, range 28; and 633 acres of section 27, township 21, range 28, west of the 4th meridian. The east half of section 26, township 20, range 27, and three-quarters of section 36, township 20, range 27, west of the 4th meridian are held as a hay reserve, and are situated about 12 miles southeast.

All this land belongs to the government. The home farm comprises first-class bottom and bench land, and has very little waste. The hay reserve land is situated in a low-lying district, which is admirably suited for hay and grass.

Buildings.—There are two main buildings, one for the boys and the other for the girls.

The boys' building contains dormitories, class-rooms, lavatories, recreation halls, infirmary, office and rooms for the principal and the male members of the staff.

The girls' building contains dormitories, class-room, sewing-room, chapel, kitchen, refectory, infirmary, layatories and rooms for the female members of the staff.

To the west of the main buildings are situated the workshops, bakery and lumber sheds. On the east are the pump-house, laundry and hospital. In the rear of the girls' building are coal-sheds, store and hen-house, while further back are the farm buildings, wagon-sheds, implement-sheds, corrals, slaughter-house and piggery.

The general lay-out of the buildings is good.

During the year a new flour-store, 30 x 18 feet, was built, also an engine-house, 12 x 18 feet. A new floor was laid in the girls' recreation-room, and a new stairs 27—i—25

leading to same was put in. About 500 feet of ceiling was put on in different parts of the house, also 2,500 feet of ceiling was put on in the boys' dormitory.

A cellar was dug under the girls' building, and a new stone foundation was put under it also. Numerous other repairs were made to buildings, furniture and side-

Accommodation.—There is accommodation for 125 pupils and the necessary staff. Attendance.—There was an attendance of 67 pupils.

Class-room Work.—The half-day system is in vogue for the older pupils. Half of the day is spent in the school-room and the other half is spent at their trade.

Regular school hours are observed. The school hours are 9 a.m. to 12 noon, and 1.30 to 4 p.m.

The junior pupils attend school forenoon and afternoon. The authorized programme of studies is adhered to as closely as possible. I have much pleasure in adding that the progress of the pupils during the year has been very satisfactory.

Farm and Garden.—We had about 200 acres under cultivation, and had excellent returns. We had about 10,000 bushels of grain, 1,500 bushels of roots, and put up over 1,000, tons of hay. We grow all our own vegetables. Both boys and girls are taught gardening in all its forms, with the end in view that when they have homes of their own they can supply their own wants in that line, and be an example to the others less fortunate.

Industries Taught.—Farming.—This is the principal industry taught. We make it our aim to familiarize the pupil with farming and stock-raising in its different branches. The pupils, under the instruction of a capable farm instructor, do all the work: and are thus able to gain a practical knowledge of the work.

We also attach much importance to stock-raising. We teach the pupils the different breeds of animals; the qualities which make each breed desirable, and the care and attention which is necessary to keep good animals up to their standard. The boys take a remarkable interest in the work. We had the satisfaction at the Provincial Fat Stock Show in Calgary of taking first prize for a carload of beef cattle, first prize for a grade steer, and first prize for best dressed carcass of beef.

This speaks well for the pupils, and was a good encouragement for them.

All the boys and girls learn to milk.

Carpentry.—The boys, under the instruction of the school carpenter, did all the

repairs and building during the year.

Needle-work.—Under the direction of the reverend sisters the girls are taught sewing, dressmaking, knitting, machine-sewing, fancy and plain needle-work. Many of the girls excel in this work, and took several prizes for their work at the Dominion fair in Calgary.

The girls also took first prize at the Dominion fair for best display of industrial school work.

The girls make all their own clothes, and also the clothes for the boys.

Housekeeping.—The girls are thoroughly instructed in the art of housekeeping and cooking, and the homes of the female ex-pupils give every testimony that they have profited much by their instruction.

Moral and Religious Training.—The pupils are well grounded in the principles and doctrines of their religion, and are encouraged to regulate their daily lives by the lessons learned. Half an hour each day is devoted specially to religious instruction.

The pupils are well instructed in the principles of good citizenship, and are specially encouraged to be honest, sober, truthful and upright.

The discipline is mild but firm.

Health and Sanitation.—The health of the pupils during the year has been good. We had no epidemics or outbreaks of contagious diseases.

The sanitary condition of the school is good. The premises are kept neat and clean.

Water Supply.—An abundant supply of good water is obtained from the High river. The water is first filtered into a well and then pumped up into tanks in the main buildings.

Fire Protection.—The buildings are well supplied with stairs and fire-escapes. There are two water tanks in the boys' building, and one in the girls' building, each with a capacity of 1,400 gallons. About 50 feet of hose on each flat is connected with these tanks. Besides this there are 18 fire-extinguishers, 48 hand-grenades, 40 fire-pails and 8 fire-axes.

Heating and Lighting.—The two main buildings are heated by steam. Each building has its own plant. Both give excellent satisfaction. The buildings are lighted by acetylene gas.

Recreation.—Hockey is the favourite game. Last winter the boys won the championship of their league. Football and baseball are also popular with the boys.

The girls play basketball, skip, swing, coast, and take long walks when the weather is fine.

Both boys and girls have large recreation-rooms, where in bad weather they spend their recreation in games, drills and chest exercises.

I have, &c.,

J. RIOU.

Principal.

PROVINCE OF ALBERTA,
ALBERTA INSPECTORATE,
RED DEER, April 22, 1909.

FRANK PEDLEY, Esq.,

Deputy Supt. General of Indian Affairs, Ottawa.

Sir,—I have the honour to submit my annual report on the inspection of Indian schools for the year ended March 31, 1909.

### CALGARY INDUSTRIAL SCHOOL.

This institution was closed during the early part of January, 1908, and during the summer months all the house effects, tools, implements, stock, &c., were distributed to other schools, to hospitals and to Indians.

### ST. ALBERT BOARDING SCHOOL.

This institution is under the auspices of the Roman Catholic Church and with the Rev. Sister Brassard as principal.

This school is not strictly an Indian one. Over 200 pupils of various nationalities are usually in attendance here. Sixty-seven pupils are classed as Indian, and for which \$72 per annum was paid for board, clothing and tuition.

The classification of the 67 pupils referred to was:-

:	Standa	rd I		 	 	 	 		 	23	pupils.
	"	п	٠	 	 :.	 	 		 	28	"
	"	III	٠	 	 	 	 		 	11	"
	"	ıv		 	 	 	 	• •	 	5	"
27—i	-251	•									

Farming operations had been carried on just as extensively as heretofore. The pupils are taught all manner of farming, gardening, housekeping, &c., agreeable to their age and sex.

The building throughout was spotlessly clean and the methods of management so systematized that all the work was carried on quietly and without confusion.

A new four-storey brick addition was in course of erection when I made the inspection during August last. The cost of this new addition would be little short of \$40,000.

### CROWFOOT BOARDING SCHOOL.

This school, under the auspices of the Roman Catholic Church, is located on the Blackfoot reserve and operated under the per capita grant of \$72 per annum.

The Rev. Father LeVern is principal, and five reverend sisters directly manage the institution.

When I inspected this school on October 22, there were 26 boys and 14 girls enrolled. The Rev. Sister Anthelm still holds the position of teacher in this school.

The classification was:-

Sta	ndar	d I		 	 			٠.	 	 • '•	16	pupils.
	"	$\Pi$ .:		 	 ٠.		 		 	 	5	"
	"	$\Pi I$	٠	 	 ٠.		 		 	 	7	"
		IV										
	"	v		 	 ٠.	• •	 		 	 	3	"

Sister Anthelm holds a second-class certificate and has been a success in this school. The children exhibited proficiency in all branches of the work taken up.

The dormitories were clean and well furnished.

The health of the pupils had been very satisfactory.

The eldest boys in attendance do gardening, care for the stock and do most of the choring, whilst the elder girls assist at the cooking, baking, knitting, sewing, mending, &c.

### OLD SUN'S BOARDING SCHOOL.

This school is located on the Blackfoot reserve, and is under the auspices of the Church of England.

The Rev. Canon Stocken holds the position of honourable principal of this institution, and there were five others on the staff when the inspection was made last October.

There were then enrolled 15 boys and 14 girls, and the classification of these 29 children was:—

Standard I					 									 8	pupils.	
"	п													 	 6	"
"	ш				 							٠.		 ·	 10	"
	IV															

This school was in a very unsettled state when I made the inspection. A few weeks before orders had been received to close the school and discharge the pupils. This order had been withdrawn, but not until the teacher had been discharged and had left. The Rev. Stanley J. Stocken, assistant principal, had undertaken this branch of the work. During the autumn of 1907 this school was closed for several weeks, and when it was re-opened the class-room building was set apart for a boys' dormitory and a small building, known as the memorial, was utilized for class work. This class-room was entirely too small properly to carry on tuition work, and, moreover, very poorly furnished.

A number of improvements had recently been made to the interior of the home building, viz., the walls of the refectory had been papered and burlapped, the burlap, the woodwork, and the floor had been nicely painted and every other room within this home building had either been whitewashed and painted or was then undergoing such renovation.

Boys of advanced age assist at gardening, the care of stock, &c., and the girls are instructed along most of the lines of general housekeeping.

#### PEIGAN R. C. BOARDING SCHOOL.

This school is known by the Roman Catholic Church authorities as the Sacred Heart boarding school, but as there are other schools carrying the same name, it is better defined under the headline name.

It is located on the north side of the Oldman's river and within the Peigan reserve.

The inspection was made on November 20 last, and there were then 36 pupils enrolled and classified as follows:—

Standard	1 I	 		 			 	 	 	17	pupils.
. "	II	 	 	 			 	 	 	6	"
. "	III	 	 	 			 	 	 	7	"
"	IV	 	 	 	٠.	٠.	 	 	 	5	"
	$\mathbf{v}$										

Rev. Sister Mary of the Eucharist holds a first-class teacher's certificate, which was acquired in the province of Quebec during 1900.

There are, in all, seven sisters engaged in the work here.

Fair progress had been made by the pupils in class work during the period between this and the previous inspection.

Boys and girls have separate, clean and well furnished dormitories, but it is questionable whether there is the air space in either of them now demanded for each occupant.

The wing in which the class work was carried on had been enlarged, and this change had provided a larger class-room and an enlarged boys' dormitory as well.

#### ERMINESKIN'S BOARDING SCHOOL.

This school is located on the Ermineskin reserve, near the Hobbema siding, on the C. and E. branch of the Canadian Pacific railway.

It is under the auspices of the Roman Catholic Church and with the Rev. Father Dauphin as principal, and the Rev. Sister St. Jean de la Croix as superioress. These are nine additional sisters engaged in the work at this school, and the Rev. Sister St. Ludgarde still holds the position of head teacher. This sister holds a second-class teacher's certificate.

This school was inspected during January and there were then 22 boys and 28 girls enrolled, classified as follows:—

Standar	d I	 	 	 	 14 pupils.
"	II	 	 	 	 6 "
"	III	 	 	 	 . 5 "
"	IV	 	 	 	 <b>12</b> "

The programme of studies is closely followed in this school, and I do not think that it is an exaggeration to say that the class work will compare favourably with the class work of rural white schools.

A good well of water was provided at this school two years ago, and during January last the water from this was placed throughout the main building and in the laundry building, by a system of piping and a tread horse-power.

Separate dormitories are in use by boys and by the girls, and both are well fur-

nished and comfortable.

The industrial work carried on here is along the same lines as at other boarding schools.

## ST. JOSEPH'S INDUSTRIAL SCHOOL.

This school is located on the High river, and near where this river joins the Bow river.

It is under the auspices of the Roman Catholic Church, and the Rev. Father Riou is now the principal, and the Rev. Sister Kelly the matron.

In addition to the principal and the matron, there are 11 others on the staff.

The per capita allowance for this institution is \$130 per annum.

Mr. S. J. McDonald has charge of the boys' class work and holds a second-class teacher's certificate. The Rev. Sister Provencher had charge of the girls' classes.

At the end of the quarter, December 31, last, there were 59 grant-earning pupils—35 boys and 24 girls. In addition, there were 15 non-earning pupils in the institution.

The classification of the 59 pupils referred to was:—

Standar	d I	 7 pupils.
"	<b>I</b> 1	 7 "
"	III	 5 "
"	IV	 17 "
	V	
"	VI	 7 . "

The senior pupils follow the half-day system, i.e., they spend either the fore or the afternoon in the class-room, or at some manner of work.

The senior boys do their share of the farm work and the care and the feeding of the stock. The senior girls take their share of the housework, do sewing, mending, &c.

Nearly 200 acres of land is under cultivation at this school, and about 1,000 tons of hay is annually put up. There were 300 head of cattle, feeding for beef purposes, when I made the inspection. As all of the farm work, the care and feeding of the stock, &c., is carried on by the boys, under the supervision of Brother John Morkin, it is evident that the boys at this institution are deriving a practical knowledge of farming and stock-raising.

There are 1,070 acres of land directly attached to this school, and besides, it controls over 1,600 more acres under lease or other provisions.

The buildings of this institution are steam-heated and lighted with a Siche gas generator.

# RED DEER INDUSTRIAL SCHOOL.

This school is under the auspices of the Methodist Church, and the Rev. A. Barner is the principal.

The per capita grant is \$130 per annum.

The staff comprises nine persons, besides the principal, and the teacher, Mr. W. B. Shaw, holds a first-class professional certificate.

There are 43 pupils enrolled and classified as follows:—Standard I......

Standa	rd I	"•'• <b>"•</b>	 	 	••••	• .•	 	8	pupus.
"	II.		 	 			 	10	. 66
66	III.		 	 			 	12	66.
"	· IV		 	 			 	8	"
	٧								
	VΙ								

The half-day system is followed and the class-room work is thought to be highly satisfactory. There are, unquestionably, some very bright pupils at this school, and an encouraging feature is that these pupils now exhibit a desire for knowledge and a desire for a higher plane of living than the one they were reared under.

A school of this kind cannot be maintained, however, with so few pupils and with an earning power of only \$130 per annum. The Methodist Missionary Society has been called upon year after year to supplement the per capita and other earnings, to the extent of four or five thousand dollars annually, to keep the institution in operation. The Indians for whom this institution was first started, now seem to take less interest in its welfare than they did years ago. Unless there is a marked change in the attitude of the Indians towards this school in the near future, I do not see many reasons for keeping it in operation.

There are 1,140 acres of land in connection with this school and of this there are about 200 under cultivation.

Over 6,000 bushels of grain was threshed last autumn and, besides, a portion of the grain was fed unthreshed.

A number of improvements were made to the buildings since the last inspection and a number more should be made to carry on the work advantageously. At least double the number of children should be enrolled before any further outlay of money would be justified in behalf of the children of Indians who should now be supporting this school by their attendance.

#### MCDOUGALL ORPHANAGE BOARDING SCHOOL.

This school was closed about the beginning of the winter and the children then in attendance were transferred to the Red Deer industrial school, because all the parents of these children were absent from their homes and the children had to be cared for until their return, which was about Christmas. A day school has since been started on the reserve, Stony, and the attendance so far is reported to be large and regular.

#### GENERAL REMARKS.

Three boarding and three day schools were not inspected during the year owing to the press of other work in connection with this inspectorate.

I have, &c.,

J. A. MARKLE,

Inspector

NORTHWEST TERRITORIES,

MACKENZIE RIVER DISTRICT,

St. PETER'S MISSION BOARDING SCHOOL,

HAY RIVER P.O., VIA EDMONTON, Dec., 1908.

FRANK PEDLLY, Esq.,
Deputy Supt. General of Indian Affairs,
Ottawa.

SIR,—I have the honour to report that the above named boarding school in connection with the Church of England in Canada, of which I am in charge, is located at the mouth of the Hay river, on its east bank, on the southwest shore of Great Slave

lake, within the limits of Indian Treaty No. 8. It is not on a reserve, but in the unorganized territory of Mackenzie River, under the supervision of the Royal Northwest Mounted Police.

Land.—We have under cultivation about 8 acres of Crown lands adjoining the village of Hay River. The soil in the immediate vicinity is flat alluvial deposit on a bed of sand, and is adapted for agriculture. A varied growth of timber, consisting of spruce, poplar, tamarack and willows, extends all round us. The land has been acquired through settler's possession and is the property of the Mission.

Buildings.—We have the following buildings:—

- (1) A large dwelling-house used as our boarding school, composed of 3 parts consecutively erected, the last being 2½ storeys high. The whole is constructed of logs and boards and contains 18 rooms.
- (2) A new dwelling-house,  $25 \times 23$  feet,  $2\frac{1}{2}$  storeys high, with a storey and a half lean-to attached,  $25 \times 15$  feet. We are at present using the whole of this, part as a storehouse and part as a dwelling for some of the staff.

(3) A workshop, fitted up for carpentering and blacksmithing; it also has a pit for the hand-sawing of logs into boards.

(4) A storehouse, in which we keep some of our clothing, provisions, and general supplies.

(5) A woodshed.

(6) A small house for cleaning fish.

- (7) Cattle byre, accommodates 6 head and has 2 box stalls for calves.
- (8) Small dwelling-house for hired help, 14 x 16 feet, new in 1907.

(9) Small dwelling for our interpreter, 14 x 16 feet.

(10) Our church, still unfinished, but we hope to be able to complete it this coming summer.

We have logs and lumber hauled home for a new warehouse, which we hope to erect next spring.

The church, school and large dwelling-house are all roofed with metallic shingles. We have sufficient of these to roof our prospective warehouse also.

Accommodation.—Our institution is a mission home and school; the ages of our pupils range from 4 to 20 years; though we occasionally receive widows and others as mission helpers under instruction. We have one with us at present; she is very eager to learn to read and write. We have room for about 60 persons; this includes staff and married helpers. During the year ended June 30, 1907, we have had as many as 45 persons, including our staff.

Attendance.—The attendance of pupils during the year was: girls 18, boys 14, making a total of 32 regulation boarding pupils. Besides these we have one native (female) helper under instruction in general housework. In addition to the above, we have three day pupils. These, however, are not very regular in their attendance.

Class-room Work.—The subjects taught are: reading in English and two native languages, writing, arithmetic, composition, geography, dictation and Holy Scripture. The pupils are making good progress in their studies.

Class Hours.—From 9.30 a.m. to 12, and from 1.30 to 3.30 p.m. We find too close confinement tends to impair the health of the children, especially in the short winter days.

Farm and Garden.—We planted all of our available ground in potatoes this year, and although we have but a short season, we secure a fair harvest. This year we took up about 800 bushels of potatoes.

The garden is a small plot of ground between the school and river. It is separated from the other by a fence. In this garden we grow cabbage, cauliflower, carrots, onions, parsnips, turnips, beets, beans, peas, radishes, lettuce, and also some flowers to beautify the place. These vegetables are used chiefly by the staff and hired help. The school children help in the care of the garden; the boys, with myself,

took up all our potatoes this year. Our hay-supply is derived solely from the natural grass found along the river banks and sloughs near by. There is a large amount of goose grass amongst it; this we find is very hard on our cattle. We have 2 milk cows, 1 bull, 1 heifer and 1 calf. We train our cows to work, and use them with the bull to haul and plough. We have to keep two or three teams of dogs (four dogs to a team); this necessitates securing food for them the whole year round.

Industries Taught.—We have no stated industries, but we teach each boy and girl, as far as we can, to be practical and useful. The boys learn the outdoor work, including use of tools and building. The girls are instructed in every branch of housework and plain sewing.

Moral and Religious Training.—We try to teach our children to be obedient, diligent, straightforward and honest. We seek to develop in them the essential principles of faith and trust in God, and obedience to His will, as revealed in the Old and New Testaments. All of our training is under the control and inspection of the Bishop of the Diocese.

Health and Sanitation.—I am very happy to report that not one of our pupils has been obliged to lose one day's schooling through illness during the year. There have been a few deaths in the village, but not many. We take all the sanitary precautions we can. Our closets are removed each year, no cesspools are allowed near the house, the yard is kept free from every kind of rubbish, so as to avoid any infection.

Water Supply.—We obtain all our water from the river flowing by the school. It is, generally speaking, good all the year round.

Fire Protection.—We keep barrels of water constantly on hand and have ladders conveniently placed. A good supply of axes are placed around and kept for fire protection puposes only. Water buckets for fire purposes only, are placed in each dormitory for immediate use. A system of fire-drill is now practised throughout the year. By means of this, our children can be roused from sleep, partially dressed, and out of the building in three minutes.

Heating and Lighting.—Our school building (1) is heated with seven wood stoves and the new dwelling-house (2) with two stoves. Our fuel is chiefly spruce grown near by. The institute is lighted with paraffine candles. The staff use coal-oil lamps.

Recreation.—We encourage the pupils to play all healthful outdoor games, such as football, baseball, running, jumping, skating, skipping and swinging. All our children are frequently taken for long walks. The boys in summer go boating and in winter set snares near by the school. Indoor games also are provided and a good library of books is kept for them.

Food Supply.—By far the greater part of our food supply is derived from the river and lake, by setting nets in them nearly all the year round. We are seldom without fish on the table. These, with the potatoes we raise, form the staple articles of our diet. We occasionally get a little meat from the natives, but not very often. All other articles must be imported from Edmonton or Winnipeg, and cost from 8 to 9 cents a pound to be brought in to us.

Clothing.—The school children are clothed principally out of the mission bales of the Women's Auxiliary of the Church of England throughout the eastern part of Canada. These bales are voluntarily contributed.

Mail Service.—The Hudson's Bay Company now carry, under contract with the government, two mails a year, one in winter and one in summer. We, however, are not able to answer by the return mail, as the sleds return from Resolution when others start towards us. Thus we are obliged to wait for the next packet to send out our answers to the incoming mails. Hence a great delay is unavoidable at present.

Finance.—In this connection I must explain we are only beginning to use the cash system here, but it is gradually gaining ground. The skin system has been and is still the more general mode of exchange. All native help is paid in goods. These

goods are bought in Winnipeg and paid for by the Bishop of the Diocese and sent on to us to be used to pay our help. Some of the clothing and gifts sent in the bales from the Women's auxiliary are used for this purpose. All mission freight charges, as well as travelling expenses of the children, are paid by the Bishop of the Diocese. All missionary helpers are hired and paid by the Bishop from his headquarters. It will be seen at once, from the above, that I am not able to render a financial statement.

I have, &c.,

ALF. J. VALE,

Principal.

NORTHWEST TERRITORIES,
PROVIDENCE MISSION (SACRED HEART) BOARDING SCHOOL,
FORT PROVIDENCE, MACKENZIE RIVER, September 15, 1908.

FRANK PEDLEY, Esq.,

Deputy Supt. General of Indian Affairs, Ottawa.

Sir.—I have the honour to submit my annual report for the fiscal year ended March 31, 1908.

Location.—This school is built near Fort Providence, on the right bank of the Mackenzie river, and belongs to the Roman Catholic mission.

There is no post office, neither are we on a reserve.

Land.—The area of land in connection with the school is about four acres, two of which are under cultivation. This belongs to the Oblate Fathers.

Buildings.—The buildings are as follows: the main building, 60 x 30 feet, three storeys high, containing the school-room, sewing-room and a small chapel, is occupied by the staff and the girls.

A second building,  $30 \times 20$  feet, contains the boys' hall and refectory. Their dormitory is on the upper floor of the reverend father's house. Last spring we put up a laundry,  $30 \times 20$  feet.

Accommodation.—Accommodation can be provided for about 60 pupils and 12 sisters.

Attendance.—The pupils being all boarders, the attendance is very regular.

Class-room Work.—The pupils attend school from 8.30 to 11 a.m., and from 1 to 3 p.m. Besides this they have two hours each week of vocal music lessons. The children, in general, are quite intelligent and improve very well.

Farm and Garden.—All the children able to work help with the seeding and reaping and weed the garden.

Industries Taught.—Before and after school the children are kept busy. The girls are trained in housekeeping, and are gradually taught sewing, mending, darning, knitting, cutting and making of their clothes, bead-work, embroidery, cooking, baking, washing and ironing. The boys provide water, saw and chop the wood for fuel, and keep the yard clean.

Moral and Religious Training.—Great attention is paid to these important matters; the conduct of the children is most satisfactory.

Health.—With the exception of four, all the children enjoyed very good health during the year.

Water Supply.—We get very good water from the Mackenzie river, which passes a short distance from the house.

Fire Protection.—A fire-escape, buckets, and the Mackenzie river passing by the house, are our protection against fire.

Heating and Lighting.—Wood stoves are used for heating and coal-oil lamps for lighting.

Recreation.—Regular hours are set apart for recreation each day. The boys and girls have a playground leading from their respective departments, where they enjoy themselves at the different sports common to their age. They generally take a walk at least once a day. To ramble in the woods around is one of their greatest pleasures. The Roman Catholic mission possessing a small steamboat, the children are occasionally favoured with an excursion.

I have, &c., SISTERS OF CHARITY.

# BRITISH COLUMBIA,

AHOUSAHT BOARDING SCHOOL, AHOUSAHT, March 31, 1909.

FRANK PEDLEY, Esq.,

Deputy Supt. General of Indian Affairs, Ottawa.

SIR,—I have the honour of submitting the annual report of the Ahousaht boarding school for the fiscal year ended March 31, 1909.

Location.—The school is situated on a tract of land adjoining Maktosis' reserve, on the inner side of Flores island. The situation affords a good view of the picturesque Herbert arm and North channel.

Land.—The school lot consists of 140 acres, chiefly covered with timber. About 16 acres of loamy soil, ready for cultivation, has been recovered from the drainage of a small lake. The land is the property of the Presbyterian Church.

Building.—The building is a frame structure, 68 x 48 feet, with 2 storeys, basement and attic. During the year a barn, 26 x 18 feet, was erected for holding the crop and stabling stock; also a hen-house, 17 x 15 feet. There is a wood-shed in connection with the school building, 40 x 18 feet.

Accommodation.—The school building can accommodate 60 pupils and 5 of a staff.

Attendance.—The enrolment during the year has been 48. Of these, 4 were discharged during the year, having reached school age, 2 were discharged on account of health not being satisfactory for school life, 1 girl died from complications following a severe attack of measles and 1 boy died from tubercular disease. The present attendance is 40 pupils, 23 boys and 17 girls.

Class-room Work.—The course of study prescribed by the department is followed. The pupils attend forenoon and afternoon sessions of school. Two qualified teachers impart instruction. The inspector reported in his recent visit that the progress made in all branches was very satisfactory. In addition to the regular course of study, 17 pupils have received lessons daily in instrumental music. Many of them have good aptitude for this study and have made excellent progress.

The pupils are graded as follows:-

Standar	d I 1	3 pupils.
66	II	4 "
"	III	7 "
	IV	
"	V	.0 "

Industries Taught.—In addition to the general duties of wood-cutting, making firs, house-cleaning and caring for dormitories, in which all the boys take part, the larger ones are given special instruction in gardening, carpentry, shoemaking, painting, baking, plumbing and blacksmithing. During the summer a new launch was built by the school, a new barn and a hen-house were constructed also during the year by the larger boys. Several rooms of the school were painted.

The girls receive instruction in cooking, making and repairing clothing, baking and laundry work, knitting and varieties of fancy work.

Farm and Garden.—About 16 acres of loamy soil have been recovered from draining a small fresh water lake. A considerable crop of hay and vegetables was obtained from it last summer. The action of sun and air is improving the fertility of the land each year. About an acre of cranberries was set out last year and are doing well. The strawberry and raspberry patches are also doing well. We require the use of fertilizer to secure good results. A few quarts of berries were obtained from the first season's crop.

Moral and Religious Training.—The central aim of all of our efforts is directed to this end. In addition to regular morning and evening worship and Sabbath service and Sunday school, the Bible is used in the senior class as a daily reading. Wednesday evening is set apart for mission band classes. Every effort is directed to the development of a strong moral and religious character.

Health and Sanitation.—The health of the school for the greater part of the year has been satisfactory. Following the epidemic of measles at the close of last year one girl died from complications resulting from the disease and one boy from tubercular trouble. Two were dismissed on account of health being unsatisfactory for school life. Cleanliness and ventilation are well attended to. A room is provided for isolation in cases of sickness. The drainage of the school is good.

Water Supply.—The water-supply is chiefly obtained from rainfall. The tanks in which it is stored are cleaned at times so as to keep the water pure. In case of prolonged drought in summer a well supplements any shortage in the tanks.

Fire Protection.—Seven chemical fire-extinguishers are distributed throughout the different parts of the building. Filled buckets are kept in the dormitories and 8 fire-buckets are kept in reserve. Ladders for fire-escapes are placed at each end of the building. By means of a large force pump and 100 feet of hose, water can be thrown on the roof, or to any part of the building. We have an occasional drill for training the children to come quickly and in an orderly manner out of their rooms at the sound of the fire alarm and to familiarize the boys with the use of the fire-fighting appliances.

Heating and Lighting.—The school is heated by a large hot-air furnace, but its capacity is not sufficient for the whole building in cold weather. A new chimney was built and a stove placed in the school-room, which adds very much to the comfort of the room. Coal-oil lamps are used for lighting.

Recreation.—Various outdoor games are played in favourable weather; when otherwise, suitable recreation is provided within.

General Remarks.—The year has been a favourable one in the history of our school. The relations between school and reserve are very friendly. A larger number than usual of bright, healthy, young children have been signed into the school.

The benefits of the school are being more fully appreciated. Helpful and encouraging visits have been made by the inspector and agent during the year.

I have, &c.,

J. L. MILLAR, B.A.,

Principal.

# BRITISH COLUMBIA.

ALBERNI BOARDING SCHOOL, ALBERNI, April 5, 1909.

Frank Pedley, Esq.,
Deputy Supt. General of Indian Affairs,
Ottawa.

Sir,—I have the honour to submit the annual report of this school for the year ended March 31, 1909.

Location.—This school has a beautiful location. It is built on a plateau about sixty feet above the level of the garden, which it overlooks; at the back of the school the country rises to a higher level, and is heavily timbered, giving abundant shelter from the prevailing winds. In front of the school, about 200 yards away, flows the beautiful Somas river, and from the school grounds we obtain a splendid view of the river, with Alberni 2½ miles distant. On the same plateau across the road which divides this property from the reserve, is the Shesaht village; and one mile down the river on the opposite side is the Opitchesaht village.

Land.—There is 156 acres in connection with the school, which is known as part lot 81, district of Alberni. The land is owned by the Presbyterian Church. The land is heavily timbered, is very expensive to clear; the soil, however, is very good. The soil is well adapted for all farming purposes, after land has been cleared.

Buildings.—The buildings consist of main building, 38 x 43 feet, 3 storeys high, with wing, 32 x 46 feet, 2 storeys high. The old school building is used for laundry, bake-shop and carpenter-shop. Other buildings are class-room, wood-shed, driving-shed, root-house, stable and hen-house.

Accommodation.—There is accommodation for 60 children and a staff of 7.

Attendance.—There are 47 pupils on the roll, 23 boys and 24 girls. Four pupils (boys) were admitted during the year. Two pupils received their discharge, one boy and one girl. Four girls died during the year, 2 from tubercular meningitis, the other 2 from pulmonary trouble.

Class-room Work.—Fair progress has been made during the year. The programme of studies authorized by the department is followed.

Farm and Garden.—The stock consists of one horse and 4 head of cattle. Several of the boys have learned to milk. The larger boys do the ploughing, and teaming for the school. The garden yielded a fair crop, and a great deal of fruit was preserved.

Industries Taught.—Farming and gardening are taught, also plain carpentering, painting, shoe-repairing and baking. The larger boys are also expert fishermen. During the winter some of the boys and girls have been engaged making a new net. During the year a stable was built, 20 x 36 feet, most of the work being done by the boys.

The girls are taught thoroughly in all departments of housework. Their training includes cooking, laundry, breadmaking, dressmaking, the care of milk and butter, the canning of fruit; also sewing and music. All mending of clothing and darning of stockings is done by the girls. One evening of each week is given to sewing (fancy work), for which the girls show much aptitude.

At the local show held at Alberni the pupils took first and second prizes for pencil drawing, first and second for map by child under 15 years of age, first for collection of cakes and 10 other prizes for needle and fancy work.

Moral and Religious Training.—The conduct of the pupils has been very good. The pupils attend regular Sabbath services, also Sabbath school, and every day religious instruction is imparted to them.

Health and Sanitation.—The health of the pupils has been fair; two sisters dying of tubercular meningitis, within a short time of one another, was the saddest in our experience. One girl had cold ulcers on her legs, and was allowed home on sick leave; while there her lungs became affected and she died 4 months later. One other girl died of consumption.

For sanitation our location is excellent, the W. F. M. S. of the Presbyterian Church has made a grant of \$250 to overhaul the plumbing and waste-water pipes.

Water Supply.—Our chief water-supply is from a large tank on a higher level, 250 yards behind the school. Owing to the extremely cold winter the water-pipes of our water-supply were frozen and some of the pipes burst; repairs have been completed. There are also 2 wells.

Fire Protection.—We have 4 Keystone fire-extingishers, 6 Haverhill Eclipse and 12 fire-buckets, distributed through the building. A large tank, mentioned in the water-supply is used for fire-protection purposes.

Heating and Lighting.—The main building is heated by hot-air furnace, the new addition by stoves. Coal-oil lamps are used for lighting.

Recreation.—The boys play football and baseball and other games; the pupils are very fond of swimming and conceing. In the winter indoor games are provided.

General Remarks.—The school is visited monthly by Agent Neill, and was inspected in June and February by Inspector Green.

I have, &c.,

JAS. R. MOTION,

Principal.

BRITISH COLUMBIA,
PORT SIMPSON BOYS' BOARDING SCHOOL,
PORT SIMPSON, March 31, 1909.

Frank Pedley, Esq.,
Deputy Supt. General of Indian Affairs,
Ottawa.

Sir,—I have the honour to forward the annual report of the boys' boarding school, Port Simpson, for the year ended March 31, 1909.

Location.—The school is situated about 350 yards distant from the ocean and the same distance from the Port Simpson post office, on a slight elevation at the northeast of the Indian village on the Tsimpshean reserve.

Land.—The school is built on a lot of land, 2 chains by 4 chains, and belongs to the Missionary Society of the Methodist Church. It was acquired several years ago from the Port Simpson Indian council. Through the centre of the lot there runs a small ravine which serves as a drain for the land, while this part of the country is naturally mossy and bog-like, but when drained and cultivated is well adapted for floriculture and horticulture.

Buildings.—The main building is a large 2 storey frame structure, with cellar, old and inadequate. It is impossible to make it an attractive school or residence for boxs

The outbuildings consist of wood-shed, drying-shed, stable, and play-shed, the last being used for boat-building. The buildings are kept in a fair state of repair, all of them having been re-shingled during the year.

Accommodation.—The building has space for 25 pupils with a staff of 3 or 4.

Attendance.—A good average attendance has been sustained during the year.

Class-room Work.—The school-room is bright and comfortable and the inspector on his last visit was pleased with the progress the boys had made.

Classified, the standing is as follows:—

Standard	I	13	pupils.
"	II ,	1	- "
KE	III	4	"
	IV		"
"	V		"

Farming and Gardening.-No farming is attempted, owing to climate conditions and nature of the soil. Farming as an industry would be of very little use to these Indian boys. Gardening has proved successful; the small fruits bear well, and vegetables are a satisfactory crop.

Industries Taught.—These consist of general carpentry, carving in wood, boat building, gardening, general housework, including baking, mending, washing, &c.

Moral and Religious Training.—This comprises class instruction daily, prayers morning and evening, regular attendance at the church services, Sunday school and week-night service included, and friendly talks on moral and religious themes.

Health and Sanitation.—The health of the boys has been generally good, there has been no epidemic. The premises are in good sanitary condition, though old, they have been kept very clean throughout the year.

Water Supply.—The water-supply is generally plentiful, but the past winter being unusually severe, for some weeks water for all purposes had to be carried, the pipes conducting the water from the main being frozen.

Fire Protection.—This consists of a large tank placed at the rear of the building. a quantity of hose, 12 chemical fire-extinguishers and 12 buckets filled with water in the corridors.

Heating and Lighting.—The main building is heated by means of coal and wood stoves, and lighted with coal-oil lamps.

Recreation.—The premises contain a playground, not adequate in size nor sufficiently level, to prove a satisfactory ball-ground. The boys are provided with indoor games, and in the winter when there is snow they find healthy amusement in coasting.

General Remarks.—Our work amongst the boys is retarded through lack of suitable plant. Port Simpson and the surrounding villages have large numbers of boys, who ought to be receiving regular instruction at some boarding school or institute, and Port Simpson itself is sufficiently attractive to draw them were there a modern. well-equipped institution, in keeping with the rest of the mission buildings.

I have, &c.,

GEO. H. RALEY.

Principal.

# British Columbia, Port Simpson (Crosby) Girls' Home Boarding School, Port Simpson, March 31, 1909.

FRANK PEDLEY, Esq.,

Deputy Supt. General of Indian Affairs, Ottawa.

SIR,—I have the honour to submit the following report of the Port Simpson (Crosby) Girls' Home boarding school for the year ended March 31, 1909.

Location.—The school is located at Port Simpson, British Columbia, and is situated just outside the limits of the Tsimpshean reserve.

Land.—The land lies in section 4, township 1, range 5, coast district. It is owned by the Women's Missionary Society of the Methodist Church of Canada, and was acquired by purchase from Mr. Gordon Lockerby, Port Simpson, B.C.

We have an area of two acres which is fenced, but only about one-eighth of an acre is cultivated. We have a place for a playground for the girls. The land lies on the slope of a hill, the greatest elevation being towards the south and east. With thorough draining the soil would be suitable for raising vegetables and small fruits.

Buildings.—The buildings consist of a house, three storeys and a basement, a tank-house, chicken-house, wood-shed, drying-shed and play-room. The roof has been covered with tar paper, re-shingled and painted during the year.

Accommodation.—We have good accommodation for 45 girls and 4 teachers.

Attendance.—The average attendance was 41.48, with a total enrolment of 47. The number of pupils discharged was 3 and the number admitted 6. The present number in attendance is 43, with 1 pupil on an extended vacation, making a total of 44 at present on the roll.

Class-room Work.—The classes have made good progress, and have gained in general knowledge, as well as knowledge of their text-books. Nature study has been encouraged. They have also had some special lessons in drawing and music. They speak English fluently, and are fond of reading.

Five have been promoted to standard II, 5 to standard III, 5 to standard IV, and 7 to standard V. We are pursuing the same course of study as that used in the public schools of British Columbia.

The subjects taught are: reading, writing, arithmetic, spelling, dictation, grammar, composition, geography, drawing, history, hygiene, music, Bible history and catechism. Twelve girls have taken music lessons on the organ and the whole school has had lessons in vocal music. Two girls act as organist, in turn, for the school and one of them plays the organ for Sunday school.

Classification.—The pupils are classified as follows:—

Sta	andai	d I	 	 	 	 	5	pupils.
	"	ΙΙ	 	 	 	 	13	a
	"	III.	 	 	 	 	9	"
	"	IV`	 	 	 	 	11	"

Garden.—A small vegetable and flower garden is cultivated, as well as some currant bushes, raspberries and rhubarb.

Industries Taught.—The industrial teaching consists of instruction and training in general housework, laundrywork, cooking, bread-making, dressmaking, sewing, mending, darning, knitting and fancy-work. They are also taught to raise chickens

and care for hens. This year 2 classes in cooking and domestic science were organized and regular lessons given by Miss Deacon, after the most approved school of domestic science. The larger girls are taught to cut and fit their own dresses.

Little girls of 12 and 13 are making dresses for the smaller girls. Very satisfactory progress has been made in each department and even the smallest can patch and darn stockings neatly.

The girls under the supervision of their teachers have performed satisfactorily all the work of the institution, including kalsomining, house-cleaning, oiling floors and feeding and caring for chickens.

The out-pupils who have gone into domestic service have given excellent satisfac-

tion as general servants.

Moral and Religious Training.—The pupils are carefully trained to be honest, truthful, obedient, industrious, kind and obliging. A Bible lesson is taught each day, so they are carefully instructed in Bible history and doctrine. The exceptional cases of lying and stealing are dealt with in such a way as to correct the tendency. The girls are slowly improving and nearly all the ex-pupils are doing well and keeping good homes.

Health and Sanitation.—The general health has been good. One girl died May 30, 1908, of meningitis and another is with her mother, because of lung trouble; we will have the doctor report on her condition. The girls are all in good health at present. We had an attack of tonsilitis during the cold weather, but all have recovered. The sanitary condition is good.

Water Supply.—The water-supply is derived principally from a mountain stream at some distance from the house. It is conducted by a wooden pipe, connecting the reservoir with our tank, which has a capacity of 4,000 gallons.

Pipes also bring the rain water from the roof to the tank. The water is carried through the house by means of pipes, so we have hot and cold water on two flours. The water is good and abundant, except for a month or more of cold weather, when we bring it from an unfailing spring.

Fire Protection.—We have large canvas sack fire-escapes from each dormitory. The pupils can all get out of the building in 10 minutes after the alarm is sounded. Fire-drill has been practised about nine times this year, but we intend having it regularly each month after this. We have two stationary ladders from the ground to the roof, two on the roof, besides one movable ladder with hooks, and there are also two other ladders. Buckets of water and ashes are kept in readiness on each flat, and 12 pails are available in case of fire. We have two chemical fire-engines, a fireman's axe and three hatchets. Mention may also be made of the village fire brigade within call, and a hydrant a few rods away in connection with the village waterworks.

We should be well protected if we had a force pump and some hose.

Heating and Lighting.—The heating of the institution is accomplished by a furnace, a French range, a range in the laundry, a heater in the sewing-room and stoves in the teachers' rooms, that are used part of the time. We have also one grate. The building, except the kitchen, was comfortable during the severe winter just passed. We use soft coal and wood as fuel. Coal-oil lamps are used for lighting, bracket and hanging lamps being used exclusively for the pupils' apartments.

Recreation.—Regular hours are set apart for recreation each day. In wet weather they play in the play-room. The recreation consists of games, playing ball, swinging, walking, playing on the beach and general play. They have had regular physical culture exercises and club-swinging. Exercise in the open air is encouraged and insisted upon, if necessary. They had many pleasant picnics, and went camping for a month at a saw-mill about 12 miles away. Through the kindness of Mr. Flewin and family this was rendered possible and enjoyable.

General Remarks.—There were only three girls discharged this year. The first was a little girl who entered November 10, 1907, and who only remained in the school five months. Not being well, she was granted a vacation in April, by the doctor's advice. While with her mother, she developed meningitis, and died May 30 last. The second had completed her term, being 18 years of age. She was a capable girl, and is with her mother on the Nass. The last we heard from her she was doing well. The third, Lucy Green, was discharged February 15, 1909, and is at service with Mrs. Kergin, who speaks very highly both of her work and conduct. All the ex-pupils who were married or are at home with their parents, are continuing to do well. We had a re-union of ex-pupils at our Christmas gathering.

Last Easter Monday a very pleasing Easter and missionary programme was rendered by the pupils at a concert in the hall, and on Christmas we had a good entertainment in our home for the parents and ex-pupils. Even Santa Claus consented to be present and gave the parents gifts.

The children were all given books at Christmas, and the best pupils were given the finest books. Their stockings were filled with dolls, toys, collars for the larger pupils, besides nuts and candy.

At the exhibition held October 22, the girls obtained the first prize for a white quilt, on every block of which a flower or spray of flowers was outlined in blue. They obtained prizes for bread, buns and cookies, as well as writing.

The only change in the staff was that of our esteemed and capable matron, Miss Clarke, who went on a furlough February 1, her place being ably filled by Miss Hudson, formerly of the Coqualeetza Institute.

With some exceptions, the pupils are growing mentally and morally.

I have, &c.,

HANNAH M. PAUL, Principal.

## British Columbia,

SECHELT BOARDING SCHOOL, SECHELT, April 6, 1909.

FRANK PEDLEY, Esq.,

Deputy Supt. General of Indian Affairs, Ottawa.

SR.—I have the honour of submitting the annual report of the Sechelt boarding school for the year ended March 31, 1909.

Location.—The Sechelt school is admirably situated on a plateau, a quarter of a mile from the shore of Trail bay, on Sechelt reserve.

Land.—About 3 acres of land have been cleared and are used as kitchen garden, orchards, flower gardens and playgrounds.

Buildings.—The school-house is very comfortable. It comprises the main building, 83 x 36 feet, and a wing, 30 x 28 feet, in rear. Both are of wooden structure with stone foundation.

The former contains: on the first floor, entrance hall, girls' parlour, girls' school-room, sewing-room, sitting-room, dining-room, children's dining-room and boys' parlour; on the second floor, boys' school-room, boys' lavatory, girls' infirmary and lavatory, a dormitory and a private room; on the third floor, 2 dormitories, 2 bath-rooms, 2 toilet and one room for the boys' guardian.

The first floor of the latter is taken up by a dining-room, a pantry and a large kitchen; on the second floor are the boys' infirmary and several rooms to accommodate the staff; the chapel occupies the third floor.

Under the direction of Brother Smith, 2 buildings have been erected by the boys

during the past year.

The first, 65 x 25 feet, is divided as follows: basement, 2 cellars, 2 wood-sheds and a workshop; first floor, 2 play-rooms and a laundry furnished with 18 wash tubs and supplied with cold and hot water. Three-fourths of the second floor are used for drying purposes; the remainder now used as a store-room, can be utilized as an isolating room in case of contagion.

The second building, a stable, 30 x 22 feet, is divided so as to house 8 cows and shelter 300 hens with sufficient room on the second floor for the winter supply of feed.

Accommodation.—There is ample accommodation for 60 pupils and the necessary staff.

Attendance.—The attendance has been perfect.

Class-room Work.—The programme of the department is followed as closely as possible, and, as a rule, the children give satisfaction in their studies. By quarterly examinations and the giving of rewards for deportment and excellence in class work, emulation has been kept up and good results have been attained.

The pupils are classified as follows:-

Standar	d I	٠,٠	 	 	 	 	 	٠.	 	18	pupils
	$\Pi$										
"	III		 		 	 	 	• •	 	9	"
66	IV		 	 	 	 ٠.	 ٠.		 	5	"
	$\mathbf{v}$										
	Total		 	 	 	 	 		 	45	

Farm and Garden.—The boys and the girls do all the gardening and seem to enjoy the work. The girls take special interest in cultivating flower gardens for themselves.

Industries Taught.—Remarkable progress has been made in this department. The girls' branch includes: kitchen and laundry work, mending, darning, hand and machine sewing, knitting, crocheting, dressmaking, fancy needlework, &c. In summer they spend the afternoon in the open air, making Indian baskets and cradles, which are sold to visitors as novelties and souvenirs.

During the erection of the above mentioned buildings, the boys have learned many lessons in carpentry, painting, glazing, plumbing and the mixing of cement. These lessons together with their knowledge of shoe-repairing, gardening and miniature boat-making, contribute, by varying their daily occupations, to increase the interest they take in their work.

After the evening recess, the senior pupils remain up for one hour performing some manual task and listening to some interesting story read by one of their companions.

Moral and Religious Training.—Much care and special attention are given to this most important part of education and no pains are spared to instruct our pupils in moral and religious subjects.

Health and Sanitation.—One girl died in May of pulmonary hemorrhages. From April, 1908, to February, 1909, all the children enjoyed very good health, but since then, grippe has visited them frequently and 2 boys have not yet recovered.

Every precaution is taken to keep the buildings and the premises in a sanitary condition.

During the summer the children bathe daily in the sea and in winter frequent baths are taken.

27—i—26½

Under this heading I beg to convey my most sincere thanks to the department for having appointed Doctor Bryden-Jack to visit our school; his medical treatment and good advice have proved invaluable.

Water Supply.—The water-supply is exceptionally good in winter, but during the summer months (when most needed) is far from giving satisfaction. It will be so,

until the part of the old flume still remaining is replaced by pipes.

Fire Protection.—Six fire-extinguishers, 24 buckets, 200 feet of hose and one ladder are always kept ready in convenient places in case of fire. Fire-drill is held regularly, but the lack of water during the summer season, renders useless the fire-appliances.

Heating and Lighting.—The buildings are heated by stoves and lighted with coal-

oil and gasoline lamps.

Recreation.—Outside exercises are heartily encouraged. Besides many recesses after the school hours, the children take an hour's walk each day when the weather permits.

Baseball, football, lacrosse and marbles are the games in favour amongst the boys, while the girls amuse themselves in skipping, swinging, sleigh-riding, &c. Both the boys and the girls enjoy greatly their new play-rooms where games of different kinds are played in the evenings and on rainy days.

General Remarks.—Special mention must be made of our Christmas entertainment, which was a treat for both the children and the spectators. All those who came

to see the performance were delighted with the work of the Indian children.

Before concluding this report I desire particularly to express my appreciation of the warm interest taken in the school by Mr. A. W. Vowell, superintendent, Mr. A. E. Green, inspector, and Mr. R. C. McDonald, our agent, during their different visits to Sechelt.

I have, &c.,

SISTER THERESINE,

Principal.

British Columbia, Squamish Boarding School, North Vancouver, March 31, 1909.

FRANK PEDLEY, Esq.,
Deputy Supt. General

Deputy Supt. General of Indian Affairs,

Ottawa.

Sir,—I have the honour to forward the annual report of the Squamish Mission boarding school for the year ended March 31, 1909.

Location.—This school has a beautiful location; it is built on the north shore of Burrard inlet, opposite the thriving city of Vancouver, and about four miles therefrom. It is not on a reserve.

Land.—The land connected with the school is the property of the Sisters of the Holy Infant Jesus, in charge of the school, and consists of about 14 acres, of which four only are under cultivation; the remainder is covered with stumps and brushwood.

Buildings.—The new building consists of an entrance hall, two parlours, a large school-room and sewing-room, used also as recreation-room for the girls on rainy days. On the second floor are the chapel, vestry, several private rooms for the members of the staff. The third floor is taken up by a large dormitory and lavatory for the girls; on each floor are bath and toilet-rooms. The old building, which was

improved last summer, consists of a recreation-room and parlour, large school-room, two dining-rooms, kitchen, pantry and store-room; on the second floor are two dormitories for the boys, lavatories, bath-rooms, bed-rooms for the teachers, the principal's room and the boys' and girls' infirmary. The roofs have been tarred, and the whole

building was painted anew.

The outbuildings consist of: wood-shed, meat-house, hen-house, stable, barn and laundry; this last building comprises wash-room, provided with 12 wash-tubs, each having a tap for hot and cold water, also a waste tap; boiler-room, with two large boilers and heater; the drying-room, with everything convenient to dry the clothes during winter.

Accommodation.—Under present arrangements, there is accommodation for 70

pupils and the necessary staff.

Class-room Work.—School is open from 8.30 to 11.45 a.m., and from 2 to 4 p.m., with the usual intermission. The programme of studies laid down by the department is faithfully followed. The class-room work is done neatly; the pupils seem to be interested in it. Very satisfactory progress has been noticed in reading, spelling, writing, arithmentic, drawing, &c. Half an hour each day is given to singing; the pupils form the church choir; they sing in English, Latin, and also in their own language. The present classification of pupils is as follows:—

Standar	rd I	 	 	24	pupils.
"	II	 	 	14	"
"					
"					
"					
"					
		•		70	"

Our pupils speak good English; even the new-comers are making good progress

Farm and Garden.—There is no farm connected with the school; about four acres of land are laid out in vegetable garden, orchard and flower beds. We have had this year a good supply of cabbages, turnips, carrots, beets, lentils, peas, beans, &c. Our fruit-trees, which were pruned and sprayed according to the government fruit regulations, yielded a good crop.

Industries Taught.—The boys are taught gardening, also plain carpentering, painting, shoe-repairing, glazing, &c. The larger boys are also expert fishermen,

providing the school with fish during the fishing season.

The girls are instructed in all the branches of housework, cooking, washing, ironing, sewing, darning, &c. Several of the large girls have proved their ability in fancy needlework at the exhibition of North Vancouver, which was held last fall; they obtained quite a number of first prizes.

Moral and Religious Training.—Needless to say that more care and attention is paid to this branch of education than to all others. Every effort is used to instil morality and righteousness into the hearts of the children. Respect and obedience for all authority is continually insisted upon. Besides their morning and evening prayer said in common, there is half an hour each day for the teaching of the doctrines of the Roman Catholic Church, to which they belong. The conduct of the pupils has been very satisfactory. Discipline was efficiently maintained without employing severe measures.

Health and Sanitation.—In general the health of the pupils is good, though we lost one girl last February. She, at first, had a slight attack of pneumonia, which developed into consumption, and after a few weeks' illness died at home.

The sanitary system has been much improved this last year; new drains have been opened and the old water-closets were torn down and replaced by new ones, up to date.

Water Supply.—The building, being connected with the city water-supply, is abundantly supplied with pure crystal water.

Fire Protection.—Two Stempel fire-extinguishers, 8 glass-lined chemical extinguishers,  $1\frac{1}{2}$  dozen fire-buckets, 250 feet rubber hose, 2 axes and 2 ladders are kept in readiness, in case of emergency. Our proximity to the town, with a telephone in the building, strengthens our fire-protection, as we could make use of the town fire-brigade.

Heating and Lighting.—The heating of both buildings is done by means of 2 McClary M. F. G. C. hot-air furnaces, which were installed last summer. The lighting is done by means of electric lamps.

Recreation.—Outdoor games are allowed as often as the weather permits. The boys enjoy football, baseball and other sports, while the girls enjoy skipping, walking, reading. &c.

General Remarks.—In conclusion, I desire to state that this year, on the whole, has been one of progress. The pupils seem to appreciate the benefit of education; they are healthy and contented, performing their task with cheerfulness, evincing in their whole behaviour the good effect of the moral training inculcated at school. At Christmas they had their usual Christmas tree. On St. Partick's day, the pupils gave a concert and dramatic entertainment in aid of the new Roman Catholic church of North Vancouver. One and all performed their respective roles with considerable credit. The programme consisted of 'The Bogus School Inspector,' a novel and comic operetta in three acts, 'The Marble Maiden,' 'the Spiritual Tree,' 'the Japanese Fan,' Kissing papa through the telephone,' and the national anthem. Over 200 people were present and enjoyed both the play and the music.

Before ending my annual report, I gratefully acknowledge the kindness of the department in supplying us with school material. I feel also much indebted to our inspector, Mr. A. E. Green, our agent, Mr. R. C. McDonald, and Mr. A. W. Vowell, superintendent, for their earnest co-operation in all matters connected with the school. I also wish to express my gratitude to the members of my staff, who have so much at heart the education of the children and who endeavour to make them feel happy and contented.

I have, &c.,

SISTER MARY AMY,

Principal.

British Columbia, St. Mary's Mission Boarding School, P. O. Box 188, Mission City, March 31, 1909.

Frank Pedley, Esq.,
Deputy Supt. General of Indian Affairs,
Ottawa.

Sir,—I have the honour to submit the annual report in connection with this school for the fiscal year ended March 31, 1909.

Location.—The St. Mary's boarding school is beautifully located on the north bank of the Fraser river, 40 miles east of the city of Vancouver. The buildings stand on an elevated plateau and command a picturesque view of the Fraser valley,

with the Sumas and Cheam mountains forming a background that terminates in the everlasting snows of Mount Baker, in the state of Washington.

The proximity of the Canadian Pacific railway and the double service of comfortable steamers which ply daily between New Westminster and Chilliwack, make access to the school easy for the pupils, and our many interested friends who call to visit the institution.

Land.—About 310 acres, the property of the Oblates of Mary Immaculate, is attached to the school, of which 200 acres is still under heavy timber. The remainder of our land under cultivation is most productive, and the hay, grain and root crops raised yearly are all that could be desired. Fruit yields well, especially apples, pears, plums and the different kinds of small bush fruits.

The farm lies in the Mission City district municipality, section 2, townships 3 and 4.

Buildings.—The main buildings for the boys' and girls' schools measure 75 x 35 feet in extent, with two additional wings, one on each building, and contain the necessary apartments for comfort and accommodation of both pupils and teaching staff.

The only additional building erected this year was a small power-house,  $15 \times 18$  feet, for our new electric light plant.

Accommodation.—There is ample accommodation for 90 pupils and the necessary staff.

Attendance.—On an average 85 children, 39 boys and 46 girls, have been in attendance during the past year.

Class-room Work.—The secular education of the children is attended to by 4 zealous and devoted nuns of the Order of St. Ann. The schedule of class hours is from 8 a.m. to 12 noon, with one recess intervening; and from 4.30 to 6.15 p.m. in winter; in summer outdoor work continues till 6 p.m.

The hours of music and band practice are from 7 to 8.30 p.m. The official programme of studies prescribed by the department is followed as faithfully as possible.

Owing to the fact that our children, for the greater part are quite young, more time and attention must be given to elementary work.

Music in our school is not neglected. Rev. Brother Collins, our devoted disciplinarian, is untiring in his efforts to sustain the long standing and well merited reputation of the Mission City Indian boys' band. The boys' and girls' separate choirs, heard not only at our parish church services on Sundays and holidays, but also at the numerous musical recitals and entertainments given by the school children during the course of the year, sufficiently prove that the Rev. Sisters Mary Benedict and Mary Rogation spare no efforts in the line of music.

Farm and Garden.—The land under cultivation is well worked and planted under the direction of our farm instructor, who has taken the greatest possible interest in our farm for nearly 20 years.

Abundant crops of hay, grains of different kinds, and roots are raised successfully each year. In our garden, vegetables and small fruits sufficient for the use of both schools, are cultivated.

Our fruit trees, over 200 in number, were pruned and sprayed according to the instructions of our worthy inspector, Mr. Thomas Wilson, who was kind enough to spend two afternoons with us.

Industries Taught.—The rudiments of carpentering and painting are the only trades taught the boys, several of whom have made fairly good progress during the past year. As our boys are supposed to work a few hours in the afternoon of each day except Saturday, they have sufficient opportunity to learn the different branches of farming and gardening. The care of live stock and the work of the dairy are taught them by an experienced instructor.

The boys render valuable service in the seeding and harvesting of our crops.

Since the installation of our new water-power system, a few of our most reliable pupils have been instructed in the care and running of power, saw and electric lighting machinery.

The reverend sisters instruct the girls in the culinary department, dressmaking,

knitting and general needlework.

Several of the larger girls have proved their ability in fancy needlework. At the local exhibition last fall our girls obtained quite a number of prizes, 11 of which were first prizes.

Moral and Religious Training.—The moral and religious training of the children is carefully and strictly attended to. Besides their daily religious exercises, morning and evening, they are instructed in the teaching and doctrine of the Roman Catholic belief. No efforts are spared to elevate the minds of the pupils to the highest standard of morality and righteousness.

Health and Sanitation.—Owing to the special attention given to the perfecting of the sanitary system of both schools, and the devoted care of two sisters of our teaching staff, who are trained nurses, the health of the pupils has been exceptionally good during the past year.

The children are obliged to take baths frequently, and their clothes are kept scrupulously clean and neat, thanks to the efforts of the reverend sisters in charge.

Water Supply.—This comes to us through pipes running from St. Mary's creek, which has its source in the mountains in the rear of our property, and empties into the Fraser river. The supply is good and abundant. The new pipe system installed by the government last year has proved very successful.

Fire Protection.—Our fire appliances consist of six chemical extinguishers, four fireman's axes, and 48 pails, kept in constant readiness in case of fire. The fire alarm is rung from time to time to remind the children of the admonitions given them to seek safety in case of fire. The larger pupils are taught the use of the fire appliances. Added to this, we have additional protection from the new water system, and necessary hose appliances, 140 feet of which has been placed for the service of each school. There is a pressure from each of the stand-pipes of about 60 pounds, sufficient to force the water over either of the buildings.

Heating and Lighting.—Stoves are used to heat both buildings, and as wood is still quite plentiful, on our property, the apartments can be kept quite comfortable without entailing any considerable expense.

During the past year an electric plant has been installed at our personal expense so that both schools are well lighted by electricity, as are also the outer buildings, viz., workshop, stables and barns. Needless to say this is a most convenient improvement to our schools.

Recreation.—Strict attention is given to the recreation of our children, as we are well aware that it is a conducive agent both in their mental and physical development. Outdoor games, weather permitting, are much indulged in by our children in their large and well kept playgrounds. With their respective disciplinarians they are allowed to spend their half holidays in selected picnic ground in the neighbouring woods. Songs and band recitals, together with the different indoor games, make their recreations cheerful and pleasant.

General Remarks.—Thanks to the untiring efforts of our staff the work done in both the schools during the past year has been very efficient. To the department we are much indebted for the assistance rendered in helping to secure and improve our lighting system, which, though entailing considerable personal expense in the installment, must necessarily prove itself an economy as well as a great comfort to both schools.

The interest taken in our schools by our worthy agent, Mr. R. C. McDonald, has been manifested in many ways during the past year; to him we are most grateful.

Inspection of the school was made regularly by our kind and devoted inspector, Mr. Green; to him also we owe a debt of gratitude for the encouragement and practical advice he generously gives to both pupils and staff.

In conclusion I beg to voice the sincere thanks of the staff and pupils of St. Mary's Mission school to the entire department for the constant interest shown in the first and oldest Indian boarding school in British Columbia.

I have, &c.,

J. P. O'NEILL, O.M.I.,

Principal.

BRITISH COLUMBIA,
YALE (ALL HALLOWS) BOARDING SCHOOL,
YALE, March 31, 1909.

FRANK PEDLEY, Esq.,

Deputy Supt. General of Indian Affairs, Ottawa.

SR,—I have the honour to submit our annual report to March 31, 1909.

Location.—This school is situated about half a mile west of the Canadian Pacific Railway station of Yale, B.C.

It stands on the right bank of the Fraser river, about a mile below the mouth of the famous Fraser canyon.

The school is not built on a reserve.

Land.—The school buildings stand in prettily laid out grounds, about 4 acres in extent, in the township of Yale.

This land was bought by friends of the school authorities, aided by a government grant of \$500, and is held in trust for the school. The property is bounded on one side by a narrow ravine, through which rushes a rapid mountain torrent; in front, below a high bank, flows the Fraser river, only separated from the school land by the Canadian Pacific railway line, and the government road; at the rear of the buildings a high spur of the Cascade mountains rises abruptly.

Buildings.—These consist of a large Indian school building, a small school chapel, and a house for teachers and visitors.

The buildings were all painted outside, and thoroughly repaired throughout in the summer of 1908, the Indian school building was also shingled, and had new sills put in at the back. By order of the department the doors were altered, and made to open outwards.

Accommodation.—Accommodation is provided for 30 pupils and 6 teachers.

Attendance.—All the pupils are boarders and the attendance is therefore regular. Class-room Work.—This is under the direction of the head mistress, who holds a first-class teacher's certificate, and who is assisted by a pupil teacher. Religious instruction is given by the Sisters of the Community.

Farm and Garden.—About half an acre of land is devoted solely to the cultivation of vegetables and fruit, and furnishes an abundant supply of both. Although not specially adapted to growing heavy root crops, yet some fine carrots took a second prize at the provincial exhibition at New Westminster in 1908; abundance of these were raised, with other vegetables, for winter use. Cherries are a noted feature in the orchard, many hundreds of pounds being gathered annually. The elder girls bottle some hundreds of pounds for use during the year.

Flower beds and lawns are laid out nearer the buildings.

Industries Taught.—Housework, cooking, and bread-making are systematically taught. Needlework is practically taught in all its branches, all the girls learning to make and mend their own clothes. Those who are old enough learn simple dressmak-

ing. The elder girls are taught lace-making by one of the sisters. Many of the younger ones form a class for basket-making, taught by an experienced basket-maker of their own tribe.

Moral and Religious Training.—Religious instruction is imparted carefully by the sisters and chaplain. The children attend a short service morning and evening in the school chapel, and go to the village church on Sunday mornings. They attend a choir practice once a week, that they may learn to take their part in the services of the church. The chaplain catechises them on Sundays, and gives them an additional address in the week.

The moral virtues of cleanliness, obedience, order and thrift are continually inculcated, and practically taught.

Health and Sanitation.—The health of the pupils, with 5 exceptions, has been on the whole very good throughout the year, in spite of the severe winter. This is very greatly owing to the abundance of fresh air in the sleeping apartments, where windows and ventilators are kept wide open night and day. Parents are much struck with the change in their children after some stay at the school, where they soon grow strong and robust.

Three or four pupils had chicken-pox slightly last summer, and several were attacked by a light form of German measles this spring.

Of the 5 who have been away on sick leave, 3 were suffering from the after effects of measles in 1907, and 2, who have had enlarged glands, have just been discharged with leave from the department.

Water Supply.—The school owns large water-rights on two mountain streams. A new high-pressure water system was put in last autumn, by order of the department, but the water was not turned on till February. There is an abundance of excellent water on both storeys of the school building, as well as in four stand-pipes outside. There is also another pipe, put in by the school, for irrigating the orchard.

Fire Protection.—There are three stand-pipes at the rear of the building, and one in front; also one in the upper storey of the school building. The department has likewise furnished three lengths of fire-hose, with which any part of the building can be reached, and a good stream of water can easily be sent over the roof of the highest building. There are also 15 fire-extinguishers in various parts of the school, as well as a fire-axe, 16 fire-buckets and three triangles for sounding the alarm for fire-drills.

There is a staircase at each end of the large dormitory, and there are several long ladders on the premises.

Heating and Lighting.—The school building is heated with coal stoves, mostly base burners. The teacher's house is heated with both coal and wood stoves, and open fireplaces.

All stove-pipes pass through brick chimneys. The school is lighted with coal-oil lamps in all the children's apartments; these are affixed to the walls or ceilings. Candles are also used in the chapel and by the sisters.

Recreation.—An hour's walk is taken daily in suitable weather, and Saturday evenings are given to games and music.

There is a large playground, with a swing, see-saw and summer-house; also plenty of grass and shady trees, with a garden for each child, where many happy hours are spent in spring and summer.

Tea is generally taken out of doors in the hot weather, and this is much enjoyed. Picnics and expeditions to pick berries for jam also take place during the summer.

In the winter indoor games are played, unless the weather is suitable for playing in the snow and coasting.

General Remarks.—The annual prize-giving took place last year on June 30. A number of friends from the village were present. The room was prettily decorated

by the girls with ferns and flowers, and a good programme of songs, recitations and musical drill was carried out.

I have, &c.,
CONSTANCE, SISTER SUPERIOR, C.A.H.,

Principal.

BRITISH COLUMBIA,
ALERT BAY INDUSTRIAL SCHOOL,
ALERT BAY, April 3, 1909.

FRANK PEDLEY, Esq.,

Deputy Supt. General of Indian Affairs, Ottawa.

SIR,—I have the honour to submit my annual report for the fiscal year ended March 31, 1909.

Location.—This school is healthily situated on the Alert Bay industrial school reserve. It is protected from the north wind, has a southern aspect, and commands a pleasant view to sea.

The post office address is Alert Bay, British Columbia.

Land.—There are 410 acres of land connected with the school, five of which have been cleared and fenced. The soil is mostly gravel, and is thickly covered with brush. It is best adapted for pasture. It is very difficult to clear. Potatoes do well for the first and second years.

Buildings.—The school building is of wood, 60 x 40 feet, strongly and tastefully erected, with plastered walls and light, airy rooms. Attached to the main building is a wing 54 x 18 feet, comprising class-room and workshop. The outer buildings comprise trades instructor's house, root-house, wood-shed, cow-house and tool-shed.

During the year the loft at the top of the school has been converted into a beautiful dormitory. The walls and ceiling have been plastered, five new windows put in, and a glass door leading to iron fire-escape in rear of building, all the work having been done by the trades instructor and pupils. It is by far the best room in the school, there being ample room in it for 20 beds.

Accommodation.—There is accommodation for 35 boys and 3 officers,

Attendance.—The average attendance was 25.

Class-room Work.—The work in class has been encouraging. The principal has taught all the year, ably assisted by George M. Luther, who was educated in this institution.

The programme of studies authorized by the department is followed.

The pupils were graded as follows:—

Standa	rd I	4 pupils.
66.	II	4 "
"	ш	6 "
"	IV	6 . "
. "	V	4 "
"	VI	1 "

Industries Taught.—All the smaller boys have had definite and systematic teaching in the general housework of the institution. The older boys have had regular instruction in the carpenter's shop under Mr. Carter, until May. I much regret Mr. Carter was forced to resign on account of ill health of his children. Mr. G. Green was appointed in his place.

Laundry Work.—Miss Warrener has been indefatigable in teaching this branch of the work and the boys have attained a higher degree of excellence than ever before. A new copper was supplied by the department, which greatly lessens the work. More apparatus, however, is needed to constitute an efficient laundry.

Farm and Garden.—The flower garden was tended by the matron, and Miss Warrener and smaller boys. The vegetable garden yielded a fairly good crop of vegetables and small fruit. A fair crop of potatoes was raised.

Moral and Religious Training.—The moral and religious welfare is strictly and conscientiously looked after. The moral atmosphere of the school is good, and tells for good in the lives of the boys. The pupils are continually taught the necessity and advantage of purety of mind and body. This is done by daily prayer, Bible readings, as well as talks with individual boys on suitable occasions by the principal and the staff.

The boys attend divine service morning and evening on Sunday, and Sunday school in the afternoon.

Health and Sanitation.—The general health of the pupils has been excellent. The sanitary arrangements are good. A wooden drain carries the water from the kitchen, bath-room, and wash-house to the sea. Cleanliness is enforced and disinfectants used freely. Ventilation is carefully attended to.

Water Supply.—The watter is supplied to the house from a well near by. The water is pumped up by the boys into a wooden tank, which is always kept clean. This pumping takes a great deal of time, which might be used in other ways to more advantage to the pupils. The water is pure.

Fire Protection.—Four chemical fire-extinguishers, 2 fireman's axes, and 6 fire-buckets are kept in places of easy access. An iron fire-escape has been erected to the upper bed-room. There is also a pump and 184 feet of hose. Fire-drill is practised, in accordance with the department's instructions, both day and night, and the pupils are prepared for an emergency.

Heating and Lighting.—The school is heated by ordinary box stoves. Coal-oil lamps are used, and are hung from the ceiling.

Recreation.—Football still retains its place as the most popular sport. The pupils never tire of it. Indoor games, draughts, parlour-croquet and crokinole are played during the winter evenings.

General Remarks.—We thank the department for the grant made for new bedsteads and mattresses, also for the material to make the new dormitory. These wants were very real; the kindness of the department is, therefore, much appreciated by the staff.

We much enjoy the visits of the inspector, the Rev. A. E. Green, as he always enters so heartily into the work of the institution.

I thank Mr. Comley for his valuable assistance in superintending the mixing of the mortar, and plastering the dormitory.

I have, &c.,

A. W. CORKER,

Principal.

# British Columbia. CLAYOQUOT (CHRISTIE) INDUSTRIAL SCHOOL, KAKAWIS, WEST COAST, March 31, 1909.

Frank Pedley, Esq.,

Deputy Supt. General of Indian Affairs. Ottawa.

SIR,-I have the honour to submit my annual report for the fiscal year ended March 31, 1909.

Location.—The Clayoquot (Christie) industrial school is situated in a cozy cove of Deception channel, Clayoquot sound, on the west coast of Vancouver island. location is ideal for a school of its kind, central on the coast, secluded from the nearest Indian reserve, Opitsat, and the white settlements, and well sheltered from prevailing and cold winds. Mail reaches the school by private mail bag direct from the Victoria post office.

Land.—The institution owns 175 acres of land, the title being vested in the Abbot of St. Benedict's Abbey. The land is heavily timbered and offers great difficulties to cultivation; beyond a small amount of garden produce it yields no material advantage.

Buildings.—The main building is a commodious, substantial, frame structure of two and a half storeys with basement of concrete walls, and has a frontage of 144 feet and a depth of 52 feet. In the basement are 2 gymnasiums, the furnace-room, cellars, cold storage, paint and plumber shops. The first floor includes officers', boys' and girls' entrance halls, parlour, sitting-room, Indian room, kitchen, pantries, storeroom, pupils' and officers' dining-rooms, senior and junior class-rooms, boys' and girls' recreation-rooms, 2 sewing-rooms, and 2 toilet-rooms. On the second floor are located the girls' dormitory and lavatory, 2 infirmaries with bath-rooms, office, 8 bed-rooms, 2 officers' bath-rooms, and chapel, 32 x 48 feet, and vestry. The boys' dormitory and toilet, one bed-room, 2 clothes-rooms, and one trunk-room, occupy the third floor, or the attic.

In the rear of the main building stands the laundry, 14 x 32 feet, and the woodshed, 36 x 50 feet, which has a carpenter-shop and a shoe-shop under the roof. The instructor has for himself and family a cottage, 24 x 30 feet, containing 2 bed-rooms, kitchen, and sitting-room, and also has a wood-shed adjoining. At some little distance from these buildings is the storehouse, 12 x 28 feet. For our cows we have still only a temporary stable.

A new laundry has been put up, 26 x 60 feet, with the help of the department, but at date of report is not finished, the interior remaining to be completed. It will have an engine and boiler-room, wash-room, and ironing-room, and will be equipped with cylinder washer, extractor, hand tubs, dry-room, and steam boiler and engine.

Accommodation.—The institution has comfortable accommodation for 75 pupils and a staff of 10 members.

Attendance.—The average attendance for the year was 61, boys 31, girls 30; the highest attendance was 65, the lowest 55; discharged were 4 boys and 6 girls; admitted 7 boys and 9 girls. The present enrolment is 64 pupils, 32 boys and 32 girls.

Class-room Work.—Class and study hours are from 8 a.m. to 12, and from 2 to 4 All pupils attend from 8 a.m. to 10 a.m. While the seniors are in school from 10 a.m. to noon, the juniors pursue their industries. The time of the afternoon is devoted to industries, the juniors, however, have the rest of their classes from 2 to 4 o'clock. The subjects taught are reading, writing, arithmetic, spelling, dictation, letter-writing, composition, geography, history of the province and of Canada, cate-

chism, Bible history, hygiene, drawing, vocal and instrumental music. Every month written and oral examinations are held alternately. The pupils' progress this year has been rather above the average, especially in reading, arithmetic and composition.

Classification.—At the end of the term the pupils were graded as follows:—

												Boys.	Girls.	Total.
Standard	Ι		 						 			5	7.	12 '
"	Π		 			٠.	•	 	 			3	2	5
"	III		 									8	4	12
"	IV	٠.	 			٠.		 •.		•		9	10	19
. "	V		 									3	7	10
"	VI		 				•	 				4	<b>2</b>	6
											-			
			$\mathbf{T}$	ota	1			 			•	32	32	64

Farm and Garden.—The school is at a great disadvantage from having no farming lands, no fields, no pastures. But we have a small garden, in patches, wherever some ground is available. A new piece of ground, nearly an acre, was cleared and drained last summer and will be planted in vegetables this spring. The gardens yielded a fair amount of vegetables, such as potatoes, carrots, turnips, parsnips, lettuce, cabbage, cauliflower, peas, beans, green tomatoes, and small fruits, but do not at all, as yet, furnish enough supplies for the institution. Tons of potatoes and boxes of fruit have to be bought in the Victoria market. The feed for the stock also has to be imported. All the boys are taught gardening.

Industries.—Baking.—Eight boys learned to prepare the bread-dough, but the girls bake the bread in the kitchen range, they also do the small baking of bread and pastry.

Boat-building.—The boys apprenticed to this trade built a skiff, 16 feet long by 4½ feet beam, and did a large amount of repair work on old boats, also made new paddles and oars.

Carpentering.—Twelve boys received instruction in this trade. They with their instructor erected a new laundry, 26 x 60 feet, moved the wood-shed further back and set it on new sills, made fences around a new piece of garden, installed ventilators from the boys' dormitory and from 2 bath-rooms, partitioned off the girls' attic to 3 rooms, built a boat slip, made some elegant pieces of furniture and polished same, and attended to very many repairs in and around the buildings.

Dairying.—Four boys learned to milk the cows and to feed and take care of stock. Girls received instruction in butter-making.

Fishing.—Our boys supplied the institution with a liberal amount of fish, cod, herring, halibut and salmon. Fishing is done by means of net, trolling, trawl-line and the old-fashioned herring rake.

Laundrying.—The boys are taught to wash their own clothing; they assist the girls with heavy laundry work; the girls, however, receive instruction in all the details of laundrying.

Masonry.—Three boys were taught how to mix and work concrete, and they made the foundations of the new laundry.

Net-making.—The boys were shown how to attach sinkers and floats to a net made a year ago.

Painting.—The boys' dormitory, the girls' recreation-room, and the 2 sewing-rooms were painted by 3 apprentices of this industry.

Plumbing.—Three boys were charged with attending to the necessary repairs of the many plumbing fixtures in the house, making alterations in water pipe, threading and fitting pipe, soldering, &c.

Shoemaking.—Five boys worked in the shoe-shop, giving good satisfaction.

Girls' Industrial Work.—The girls are taught and assigned tasks, according to ability and proficiency, in the different branches of domestic work. They take their turns in the kitchen, cooking, baking and preparing of food, in having charge of rooms, in feeding and caring of poultry. Each girl has to pass through specified courses in plain sewing, hemming, darning, plain and fancy knitting, mending, sewing by machine, hemstitching, cutting, fitting, and finishing of dresses; in crocheting, lace-making, and embroidery. All of the girls' garments and most of the boys' clothing were made at the school by the girls. A good deal of work was done for outsiders.

Moral and Religious Training.—Our earnest efforts are directed to teaching the children to know clearly and comprehensively Roman Catholic doctrine and to training them to practise correctly and intelligently Catholicity, so they learn not only to think, but also to act as practical Catholics at all times and in all places and in all conditions of life. The conduct of our children is excellent. They receive religious instruction daily.

Health and Sanitation.—The general state of health of the pupils, with the exception of a few cases of colds this spring, has been very good. Sewerage and sanitation are perfect.

Water Supply.—This is excellent, and is obtained from a small mountain stream, having its source on the southern slope of Lone Cone. At a head of about 150 feet, the water is conducted by a flume to a wooden tank of 8,000 gallons, and thence piped to the school by 3 and 2-inch galvanized iron pipe, for a distance of nearly 1,200 yards. The water is pure and abundant.

Fire Protection.—Ten chemical extinguishers, 24 fire-pails, 2 fireman's axes, and 200 feet of two-inch rubber lined web hose are kept in readiness for an emergency, in easily accessible places. The pupils have occasional drills, both day and night, in speedily vacating the building and in the use of the fire-fighting appliances. Outside fire-escapes provide for safe exit in case of fire. The pressure from the water main is about 60 pounds.

Heating and Lighting.—The heating plant is a direct two-pipe open tank hotwater system, which gives perfect satisfaction and, besides, is very economical in the consumption of fuel.

For lighting we use coal-oil lamps.

Recreation.—The pupils have on the sandy beach, right in front of the school, an ideal playground for all kinds of outdoor sport and games, and they are encouraged to make good use of it, too, playing football, jumping, vaulting, racing. The girls have swings, skipping-ropes, croquet and ten-pins. For the rainy seasons they are amply supplied with suitable indoor games. They also have drills and calisthenic exercises.

General Remarks.—The school has had many visitors during the past year, as most of the transient travellers of the west coast take advantage of the nearness of the school to get a glimpse of Indians and of the educational work being done among them. All visitors without exception show great surprise that our pupils speak English so well, are so apt in their studies and work, and are so polite.

It affords me pleasure to bear testimony to the good work done by the members of the staff. This tends to help in accomplishing the great work of teaching, training and uplifting the Indian to the plane in which, we confidently trust, he will stand in future years.

In closing I wish to express my high appreciation of the courtesy and assistance rendered us by our inspector, Rev. A. E. Green, and the efficient co-operation of our sterling agent, Mr. A. W. Neill.

I have, &c.,

P. MAURUS, O.S.B., Principal.

# BRITISH COLUMBIA, COQUALEETZA INDUSTRIAL SCHOOL, SARDIS P.O., March 31, 1909.

FRANK PEDLEY, Esq.,

Deputy Supt. General of Indian Affairs, Ottawa.

Sm,-I have the honour to submit my annual report for the year ended March 31, 1909.

Situation.—The Coqualectza industrial school is situated on the south side of the Fraser river, and is about 4 miles from the steamboat landing. Boats ply daily between Chilliwack and New Westminster, a distance of 50 miles. Connection is made with the C.P.R. at Harrison, station, which is on the north side of the Fraser river. The school is 3 miles from the city of Chilliwack. It is not located on a reserve.

Land.—There are 90 acres of excellent land in connection with the school. The farm comprises parts of lots 38 and 297, group 2, in the district of New Westminster, and is within the municipality of Chilliwack. The land is all cleared and under cultivation. A fine stream of spring water runs through it, making it an ideal farm for dairy purposes. The missionary society of the Methodist Church owns the property.

Buildings.—These are: (1) the main building, containing kitchen, dormitories, lavatories, laundry, recreation-rooms, school-rooms, dining-rooms, clothes-rooms, furnace-rooms, and dairy; (2) the residence of the principal; (3) the residence of the farm instructor; (4) 3 large barns; (5) a granary; (6) a wagon and implement shed; (7) a wood-shed; (8) a bake-house; (9) a hen-house; (10) a root-cellar; (11) a hot-house.

Accommodation.—The main building will accommodate 90 pupils and a staff of 8 or 10 teachers.

Attendance.—One hundred and ten pupils have been in attendance during the year. Of these 85 are now in the school, 15 have been discharged, 8 are away on holiday, and 2 have died. The average attendance has been a small fraction over 80. There were 26 new pupils admitted to the school.

Class-room Work.—The hours of study in the school-room are from 9 to 12 a.m., and from 1 to 4 p.m. Each pupil is in the school-room one-half of each day, attending in the forenoon one month and in the afternoon the following month. The regular course of study of the schools of the province of British Columbia is followed. Good faithful work has been done and the standing of the school is excellent. Two of the pupils will try the examination for entrance to a high school in June. The parents are delighted to receive the monthly letter sent by each child. For only one reason is a pupil kept from the class-room and that is illness. Many of the pupils make rapid progress in the class-room. At the end of the year the pupils were graded as follows:

Standard	I	23 pupils.
"	II	12 "
"	Ш	16 "
"	IV	
"	∇	
"	VI	5 "

Seventeen of the girls have taken music lessons. Both boys and girls are fond of music and are making progress. I have not been able to get a band instructor since Mr. Marshall gave it up on account of the pressure of business over a year ago.

The reading-room is well patronized, the boys being particularly eager to read the daily papers.

Farm and Garden.—The farm yielded well last year. The apple crop was smaller There was an abundant crop of berries; after using all that was needed than usual. for the pupils and staff, some \$40 worth was sold. One thousand tomato plants produced 3 tons of fruit, but on account of early frost only 2 tons ripened. There were produced on the farm and garden 25 tons of grain, 600 sacks of potatoes, 40 tons of hay, 350 boxes of apples, 4,000 heads of cabbage and cauliflowers, 60 tons of turnips, besides quantities of onions, beets, carrots and rhubarb. The live stock consists of 10

cows. 7 heifers, 6 horses, 1 Jersey bull, and a number of pigs and hens.

Industries Taught.—The aim is to give the boys and girls a practical training which will fit them to fight successfully the battle of life. They are taught by both precept and example the dignity of all honest labour. Both boys and girls are taught to cook by an experienced teacher. Many of them become quite proficient. The girls take turns in the laundry, sewing-room, and the kitchen. The boys learn by practical experience how to manage cattle, horses and crops, or become handy with the tools of a carpenter. There is no better place than the farm to develop the powers of a boy. He learns the necessity of initiative if he is to be a success. Four or five boys each year learn to bake bread. One ton of flour each month is turned into bread. We erected a hothouse during the winter and are now prepared to supply the whole community with plants of all kinds. It calls for tact, push and patience to develop the latent powers of these Indian children. However, it can be done, and the money spent in its accomplishment is a splendid investment for both church and state.

Moral and Religious Training.—The instruction, spiritual, moral, and intellectual, is in the hands of a thoroughly efficient staff. No part of our work is more carefully and faithfully done than this. Its importance is appreciated. The pupils are taught politeness, obedience, purity, honesty, and Christian manliness. The character of the pupil is unconsciously moulded by the moral atmosphere that is breathed in a school. The Sunday school lessons are carefully taught; the commandments are repeated once a week; selected portions of the Bible are memorized; and every effort is made to store the mind with the very best thought of the best book in the world. Both pupils and staff assemble for prayers morning and evening. In the afternoon of each Sabbath the pupils attend service in the Indian church on the reserve, and a very bright and helpful service is held in the institute each Sabbath evening. No pains are spared to make Sunday a bright and happy day for the pupils.

Health and Sanitation.—On the whole the health of the pupils has been good during the year. Early in the year one boy complained of ear trouble. It did not respond to treatment, and he was sent home. There he had treatment in the hospital. and died of consumption in January. Another boy died of tuberculosis of the bowels. These are the only deaths we have had among the 110 pupils enrolled this year. Marked attention is given to the health of the pupils. Every possible care is exercised in regard to ventilation. Every child receives an abundant supply of good wholesome food. All drains are regularly and carefully flushed. Every thing around the building is kept clean.

Water Supply.—There is an abundant supply of excellent water for domestic The Elk Creek Water Company has extended its system and it passes the school. It is a 4-inch pipe, but on account of the number drawing from it, the pressure is not sufficient to make it valuable for fire-protection.

Fire Protection.—This is afforded by the following conditions: a brick building, the furnaces in the basement, and the stove in the laundry on cement floors, the baking is done in a brick oven in a building detached from the main building, there is a barrel of water in each of the halls on the upper flat. There is a limited supply of water on the first and second floors from the taps. The means of egress are numerous. There are 4 stairways leading from the second floor and 3 from the third floor.

27—i—27

There are fire-escapes from the dormitories. All doors leading from the school-rooms, dormitories, dining-room, and from the halls open out. Fire-drill is held at intervals.

Heating and Lighting.—The building is heated throughout by the Smead-Dowd system of hot-air furnaces. Since my last report all our buildings have been wired and the electric light system installed. This is a great improvement.

Recreation.—There is nothing better for the health of the child than hearty joyous play. Saturday afternoon is a holiday. At intervals every day, time is given for play. Our pupils play football, baseball, basketball and all kinds of games that are usually indulged in by active girls and boys. The larger boys have organized a club, and when they don their suits they present a pleasing appearance. They occasionally run round the block, a distance of 4 miles.

General Remarks.—The year that has just closed has been pleasant. The staff has been faithful and devoted. The officials of the Indian Department have been kind and courteous. The officials of the church have been sympathetic and appreciative to a marked degree.

I have, &c., R. H. CAIRNS, Principal.

BRITISH COLUMBIA,
KAMLOOPS INDUSTRIAL SCHOOL,
KAMLOOPS, April 20, 1909.

Frank Pedley, Esq.,
Deputy Supt. General of Indian Affairs,
Ottawa.

SIR,—I have the honour to submit my annual report for the fiscal year ended March 31, 1909.

Location.—The Kamloops industrial school is situated at the foot of St. Paul's mountain, on the northern bank of the South Thompson river. It is in the immediate vicinity of the Kamloops reserve, and about 2 miles from the town of Kamloops, which is on the other side of the river and is a divisional point of the Canadian Pacific Railway.

Land.—Three hundred and twenty acres of land were surrendered by the Indians of Kamloops for the purposes of the industrial school; but in reality less than 200 acres belong to the school, for a public road cuts the school reserve in two parts and the land situated north of the road has been lately fenced in by the Indians as a part of their reserve. Of the 200 acres left, about 40 could be cultivated; but owing to the difficulty of obtaining water for irrigation, only 15 acres are laid out in fields, garden and orchard. The remainder consists of sandy hills and broken land, suitable only for grazing, and of low-lying land which in the spring is transformed by the overflow of the river into a beautiful sheet of water. There is no natural grass to be cut for hay, nor is there any timber available for fuel.

Buildings.—The main building contains on the ground floor: the parlour, office, dining-room for the boys, kitchen, pantry and the laundry, with four bath-rooms and bake-oven. The second storey comprises the chapel and dormitory for the little girls. To the right is the girls' house, containing sewing and recreation-room, dining-rooms for the teachers and girls, and dormitories. To the north, about 100 feet from the main building, is the boys' home, which contains store-rooms, recrea-

tion-room, lavatory and dormitory. There are also two rooms for the accommodation of the staff. The boys' and girls' school-rooms are two separate buildings, only one storey high and distant 50 feet from their respective homes.

The outbuildings consist of the carpenter and shoe shops, two stables and barn, two cellars, hen-house, ice-house, three-room cottage, girls' summer-house and tank-

Accommodation.—There is sufficient accommodation for 60 pupils and the necessary staff.

Attendance.—During the year 29 boys and 34 girls were on the roll. Five boys and one girl were discharged; nine boys and 2 girls were admitted.

Class-room Work.—The school hours for the boys were in the morning from 8.45 till 12 o'clock every week-day, except Saturday; and in the afternoon of every week-day, from 4.45 till 6.15 o'clock. The school hours for the girls were from 2 to 5 o'clock in the afternoon, with half an hour's study in the evening. The course of studies required by the department was followed as nearly as possible, and the pupils have made satisfactory progress.

At this date the pupils are graded as follows:-

Standard	I	13	pupils.
	II		"
"	III	8	""
"	IV	11	"
	V		
	VI		
	Total	62	"

Farm and Garden.—With the exception of potatoes, the crops were almost a complete failure last year. The grasshoppers destroyed all the young plants in May; and though a second sowing was made, it was too late, and the result was not satisfactory.

The fruit trees, winter-killed in 1907, were replaced in the spring of 1908; but the young trees have made very little growth.

The alfalfa crop was very good, where the land could be irrigated by means of the windmill supplied by the department, but the rest of the field yielded very light crops.

All the boys are employed at farm and garden work. They milk the cows and attend to the stable work in turn, outside of the regular work hours, which are from 1.30 to 4.30 p.m.

Our stock consists of 4 horses, 5 cows, 1 heifer, 5 calves and about 40 fowls.

Industries Taught.—Carpentering.—Under the direction of Mr. L. Viel, who is an excellent carpenter and plumber, 13 boys have made all the repairs needed about the buildings and water-works.

Shoe Repairing.—Four boys have repaired the shoes for all the pupils as well as the harness used on the farm.

Baking.—Eight boys were employed in turn in doing the heavier part of the work and the girls did the rest. They have always succeeded in turning out first-class bread.

Girls' Work.—The girls do the cooking and washing, and are taught all the branches of housekeeping. Besides the help they give for the general baking, they are made to go through the whole process of making bread on a small scale in the kitchen stove oven. They are taught also hand and machine sewing, knitting, mending and darning. They make all their dresses and other articles of clothing.

Moral and Religious Training.—Every possible attention is paid to this most important branch of education. Religious instruction is given almost daily for half

27—i—27½

an hour, and constant supervision is exercised over the pupils in order that they may acquire more easily the habit of fulfilling all the duties they owe to God, to their neighbour and to themselves. Morning and evening prayers are said in common. On Sunday the pupils assemble three times in the chapel, and besides, one hour is devoted to the learning of sacred hymns and to the explanation of the Gospel.

Health and Sanitation.—One boy, suffering from diarrhea, was sent home and died there in June. There were during the year two cases of pneumonia and several cases of minor ailments; otherwise the general health of the pupils was good.

The sanitary condition is good. The water from the kitchen and laundry is carried to the river by an underground drain. Garbage and refuse matter are not allowed around the buildings; chloride of lime and lye are used as disinfectants. Ventilation is carefully attended to, and the pupils are often reminded of the importance of securing a constant supply of fresh air.

Water Supply.—Good water is obtained from the South Thompson river by means of a bull-dozer pump and gasoline engine. The tank in which it is kept, is lined inside with galvanized iron and covered all around with sawdust. In the beginning of January, all the pipes and pump were put out of working order by the unprecedented cold which prevailed here; but the trouble was soon overcome, owing to the skill and hard work of the foreman.

Fire Protection.—The fire-appliances are as follows:—3 Carr chemical fire-engines and 4 Eclipse dry dust extinguishers; 2 fireman's axes; 3 heavy ladders, permanently attached to the buildings and some smaller ones; about 2 dozen buckets; one large stair outside of the boys' dormitory for fire-escape; 2 tanks, one of a capacity of 1,800 gallons with 3 taps, and the other of a capacity of 1,200 gallons, placed on a tower 30 feet high. It is to be regretted that we have not been able as yet to find the means to protect this tank against frost in the winter. There are also on hand 100 feet of rubber hose.

Heating and Lighting.—Ordinary box stoves are used for the purpose of heating the rooms, and for lighting we have only coal-oil lamps, though we use tallow candles when it is necessary to move the light from one room to another.

Recreation.—The pupils are allowed ample time for recreation during the week-days, and on Sundays and holidays they usually take a long walk through the country. They indulge in the ordinary amusements suitable to their age and sex. The girls are fond of reading, but the boys prefer outdoor exercises. The foreman is anxious to revive the brass band, but only a few boys care to practise.

General Remarks.—Owing to disease and other circumstances beyond the control of the management, frequent changes have occurred in the staff during the year. The Sisters of St. Ann are still in charge of the girls; but the services of Mr. T. Maddock have been secured as teacher of the boys, with the approval of the inspector of Indian schools.

It is gratifying to note again that since my last report, two more couples of expupils have been united in the bonds of holy wedlock. The ex-pupils who marry other ex-pupils are better able to retain the habits of civilized life, which they acquired at the school.

The visit of Superintendent Vowell, accompanied by Agent Irwin, was very much appreciated, as were also the regular visits of Mr. A. E. Green.

I have, &c.,

ALPH. M. CARION, O.M.I.,

Principal.

# British Columbia.

KOOTENAY INDUSTRIAL SCHOOL, St. EUGENE P.O., April 5, 1909.

Frank Pedley, Esq.,
Deputy Supt. General of Indian Affairs,
Ottawa.

SIR,— I have the honour to submit my report for the year ended March 31, 1909. Location.—The Kootenay industrial school is located in the St. Eugene Indian village, at the bottom of the picturesque valley of the St. Mary's river, about 5 miles from Cranbrook, the nearest station, with which it is connected by a fine road and a telephone line. It is in close vicinity to the reserve of the St. Mary's band, from which it is reached by a new bridge across the river. To the east of the valley, a beautiful view is enjoyed of the snow-capped Rocky mountains.

Land.—The land belonging to the school comprises 33 acres, donated by the Oblates of Mary Immaculate for that purpose, and 120 acres, the property of the Sisters of Charity. The whole is laid out in garden, orchard, clover and timothy meadows and pasture. The land is all fenced, level and productive. It is cultivated principally for the purpose of giving the boys a proper training in farming.

Buildings.—Three separate buildings are used for the accommodation of staff and pupils. Both schools are one storeyed. The boys' house, 32 x 62 feet, is to the east. On the ground floor are the class-room, recreation-room, dining-room and a toilet with bath. Their dormitory with a bed-room for 2 sisters is in the attic. The girls' house is to the west, and of the same dimensions. These two buildings are 20 feet from the centre building, which contains the kitchen, a dining-room and two parlours on the first floor and chapel and dormitory on the second. No improvements have been made in these buildings for the last two years, as they are old and damaged beyond repair. The outbuildings are bakery with laundry and supply store, foreman's house, henhouse, shoe and carpenter shop; the cellars, barns, stables and cow-sheds are warm and comfortable.

Attendance.—From 65 to 70 children have been in attendance during the year, but 50 pupils only are allowed the per capita grant; 12 pupils have been regularly discharged and 12 others admitted. About one-fifth of the children belong to the Shuswap-Kinbasket band from the Windermere lake. In origin, manners and language they are entirely different from the Kootenays. The characteristic of the latter is tenacity and of the former pliability. Yet in spite of this contrast the greatest harmony reigns amongst them.

Class-room Work.—The official programme of studies prescribed by the department has been faithfully followed. The subjects taught were reading, writing, spelling, grammar, arithmetic, geography and history, besides these, catechism, Bible history and calisthenics. Lessons were given in music, both vocal and instrumental. The pupils that left school keep up the singing of English hymns in their respective churches, and soon some will be able to accompany the singing with the organ. Only the missionary acquainted with the old, incorrigible way the old people sing, is able to appreciate what great improvement this will be. The Kootenay industrial school band, under training of the Cranbrook city band-master, has gained a well deserved reputation. The children showed good will in learning and their progress has been very satisfactory. They are classified as follows:—

Standar	d I		32 pupils.
"	II		8 "
"	III	·	14 "
"	V		4. "

Farm and Garden.—The land under cultivation was planted in hay, oats and potatoes. A creek running through it furnishes plenty of water to a naturally well adapted soil. The crops of hay and oats have been the best we have ever seen. The ploughing, harrowing, seeding, rolling, irrigating, the mowing and reaping, have been all the boys' own work, under the supervision of a foreman. They are shown the secrets of all the different farm implements, even of the hay-press, threshing-machine and stump-puller. A 2-acre garden extends in front of the buildings. It produces all kinds of vegetables for kitchen use and stock. Also strawberries, gooseberries and raspberries were ripened in it. Along the public road runs a large orchard. The abundant crop of fruit is not exhausted yet. The trees were loaded down with apples of the best quality, the sight of which excited the admiration of the visitors and many a photo was taken by amateurs. Especially to be mentioned was the visit of His Excellency Earl Grey, Governor General of Canada. Garden and orchard demand a great deal of time and care which has been given to them mostly by the boys of the junior class. They are trained in the art of seeding, hoeing, transplanting, weeding, watering, pruning, spraying, and some do their work with real skill.

Industries Taught.—Boys' Industrial Work.—Besides the important branch of agricultural industry, the stronger boys are taught the carpenter trade. They kept the doors, windows, gates and fences of the surroundings in good order. A few also continue the shoemaking trade, and do useful repairing in that line. They looked after the feeding of the stock during the winter and do the stable work, the milking, dairying and butchering, all the year round.

Girls' Industrial Work.—The girls, especially the larger ones, receive a complete training in everything necessary and useful for their future life. They attend to the cooking and baking every day, one sack full of flour into bread, in which art they give great satisfaction. Every Monday they do the general laundry work, and every Saturday they give a more thorough washing and cleaning to their quarters. They are not less trained in needle-work and in the use of the sewing-machine. Their neat, tasty and well-fitting dresses, cut out and made by themselves, speak of the girls' ability in the art of dressmaking. They work under the supervision of one or the other of the sisters. They love their work and show very good will.

Moral and Religious Training.—The religious and moral training of the children has been very carefully attended to. Each day they attend morning and evening prayer in the house chapel, and on Sundays and holy days at the services in the public church, together with their people. The principles which shall lead them to love and respect God and government are impressed upon them by means of the Roman Catholic catechism, which they are taught daily, but more particularly every Thursday by the principal himself. Bible history, with the life of our Lord, is put before them as an example to follow. The children are under continual supervision. Due correction is given when required.

Health and Sanitation.—As to food, air, exercise, cleanliness, nothing has been neglected on the part of the staff to keep the children in good health. Yet I am sorry to say that five children died, one was discharged on account of poor health, and some others suffered from the uncomfortable conditions of the quarters.

Water Supply.—The supply of water is abundant, and it is wholesome. It is brought from a creek near by in wooden pipes to all the buildings and stables. Last winter's frost froze up the pipes at a depth of five feet. The foreman, with some of the larger boys, by means of pick-axe and shovel, fire-wood and boiling water, after three weeks' digging, finally succeeded in thawing them out.

Fire Protection.—The fire-appliances consist of six chemical extinguishers, 12 buckets, 3 ladders and 3 fireman's axes, stationed at convenient places throughout the buildings. Two hose are kept ready to be connected with the waterworks in case of alarm. This is occasionally rung to give the children a practical lesson of self-protection in case of danger.

Heating and Lighting.—The heating is done with wood by means of box-stoves. And because a great quantity of wood is required to keep the shrunken buildings warm, during weeks of 40 degrees below zero, the greatest part of the winter is spent in hauling the fuel down from the neighbouring hills. The larger boys do the hauling, and in the sawing, splitting and piling all hands are busy. It is most interesting to see a dozen boys at the sawing of a log, with what ability they run their saws to and fro, and how each couple tries to outrun the other, or to see them at the splitting of a block, with what axemanship they divide it into pieces.

The necessary light is supplied by coal-oil lamps.

Recreation.—The usually dry and sunny weather allowed the children to take their recreation in the pure outdoor air of the roomy playgrounds. They indulge in the ordinary amusements most suitable to their age and sex, according to the seasons. They are body and soul in games as well as work, and the surrounding hills reverberate their joyous shouts and laughter during recreation. The boys' favourite pastimes—a swim in the close by St. Mary's river, a pony ride across the prairies, or a rabbit chase through the underwoods of the valley—have been several times granted to them as a special favour.

A great relaxation to our children is the visits of their parents. These take place annually, on Christmas, Easter, Corpus Christi in June, and on All Saints day in November, when all the tribes of the Kootenay agency gather together at the St. Eugene village; rightly do the Indians call this place their home, for here they see each other and see their children growing up; here they hear them singing and praying, assist at the plundering of their Christmas tree and enjoy their band pieces. They become convinced that their children are well educated and looked after, and are glad to bring them to school as soon as they are of age.

In closing, I beg to tender my sentiments of gratitude to the officers of the department, particularly to our agent, Mr. R. L. T. Galbraith, for his interest in the welfare of our institution.

I have, &c., J. WAGNER, O.M.I.,

Principal.

BRITISH COLUMBIA,

KUPER ISLAND INDUSTRIAL SCHOOL,

KUPER ISLAND, April 1, 1909.

Frank Pedley, Esq.,
Deputy Supt. General of Indian Affairs,
Ottawa.

SR,—I have the honour to submit my annual report of the Kuper Island industrial school for the year ended March 31, 1909.

Location.—This school is situated on Telegraph bay, on the southwest side of Kuper island, about 5 miles from Chemainus station, on Vancouver island. The scenery of the bay, sheltered on three sides, widening southward into Stuart channel, with a blue mountain range for background, is truly magnificent.

Land.—The land in connection with the school was surrendered by the Penelakut Indians, and forms part of the Kuper Island reserve. It extends over an almost square area of 70 acres. Most of it is under cultivation. The soil is good and suitable for mixed farming.

Buildings.—The buildings, 20 in number, are scattered in a very disorderly way, at the southern corner of the school property. The profusion and irregularity of so many small buildings on different levels cause great inconvenience and discomfort to pupils and staff.

Most of the buildings are old and some damaged beyond repair, by long use and weather.

The main group of buildings, 4 in number, comprises on the ground floor, parlour, office, boys' dining-room, kitchen, girls' dining-room, recreation-hall, parlour for matron, store-room and sewing-room. On the upper floor are 2 bed-rooms, girls' class-room, girls' and sisters' dormitories, with linen and bath-room adjoining.

The boys' home is divided on the ground floor as follows: boys' infirmary, a guest-room, store-room, sitting-room, bath-room and lavatory, play-hall and a school-room. On the upper floor are the linen-room, dormitory and bed-rooms for teacher and foreman.

The outbuildings consist of a cottage, now used to accommodate visiting Indians, gymnasium, laundry and dry-room, bakery, barns, hen-house, boat-house, shops for carpenter, shoemaker and blacksmith, wood-shed, house for hydraulic ram and elevated tank.

Accommodation.—The institution can and does accommodate 80 pupils.

Attendance.—During the year 89 different pupils were in attendance. The average attendance was 75. Two pupils were discharged with the consent of Superintendant Vowell. Eight new pupils were admitted. One girl, 12 years old, died at the school from meningitis, and one boy, sent home on account of tubercular symptoms, died lately.

Class-room Work.—The school hours were from 8.45 to 12 noon, and from 5 to 5.45 p.m., with one hour for study at night for the boys, and study from 4 to 4.45 p.m. for the girls. Our devoted teachers worked very successfully. At the end of the year the pupils were graded as follows:—

Standard	I	. 26 pupils.
""	<b>II</b>	. 17 "
. "	III	. 8 "
"	IV	
"	∇	. 13 "
"	VI	

Farm and Garden.—All the boys receive instruction in farming and gardening. The orchard and garden yielded a very good crop. The crop of vegetables was not so good on account of the very dry summer. About 7 acres of land were cleared of stumps.

Our live stock consists of 3 horses, 10 cows, 1 bull, 3 heifers, 4 calves, 5 pigs, and about 100 fowls.

Boys' Industrial Work.—Carpentry.—Five boys received special instruction this year. The incessant repairing of old buildings, fences and boats kept the instructor and his apprentices very busy.

Shoemaking.—Four boys worked at the shop and have attended to all the repairing under the supervision of their instructor.

Painting.—The painting is done by the carpenters. They repainted the row-boats and launches and did also some inside work.

Baking.—One of the senior pupils does the baking. The older boys prepare the dough.

Dairying.—All the boys are trained in milking. Two boys operate the cream separator and make the butter.

Laundrying.—This work is done by both boys and girls under supervision of the laundress.

Girls' Industrial Work.—The girls receive instruction in all kinds of general housework, such as cooking, washing, baking bread and pastry, &c. They show great skill in hand and machine-sewing, cutting and finishing dresses, as well as in crochet and fancy-work.

Moral and Religious Training.—Religious instruction is given half an our daily to all the pupils. Their morning and evening prayers are said in common.

Health and Sanitation.—The health of the children was very good. We had a mild and short-lived epidemic of whooping-cough last summer, and of itch this winter. The sanitary condition of the buildings, although attended to with great care, is yet wanting in many respects, on account of defective old buildings and their location.

Water Supply.—A creek supplies the school with plenty of water, conveyed to the different buildings by means of an hydraulic ram. Some natural springs provide fresh and pure water for drinking and kitchen use.

Fire Protection.—The pupils are trained in the way of escaping according to the last regulations and 3 triangles are used for that purpose. All the boys have also been trained in fire-fighting and the use of ladders, buckets, fire-axes and chemical extinguishers.

Heating and Lighting.—The heating is done with ordinary heaters and boxstoves, but, on account of so many scattered buildings, is not very satisfactory. All the rooms are well lighted by an acetylene gas plant.

Recreation.—Special attention is given to this important branch of education to overcome the naturally indolent nature of the Indian and the consequences of idleness. Very nice playgrounds have been selected for boys and girls. The boys enjoy mostly football and baseball, with boating and swimming in the warm season. Our brass band has greatly improved and has given us many enjoyable concerts. The girls amuse themselves skipping, playing ball, boating and bathing in the summer. They also enjoy cultivating flowers during their leisure hours.

General Remarks.—The number of applications for admission is a proof that education is more and more appreciated by the Indians of the district. We have already some children of ex-pupils attending.

In closing my report, I wish to thank the officers of the department for their courtesy. Our agent, Mr. Robertson, and our inspector, Mr. Green, have by their visits and kind direction, greatly encouraged and assisted the staff in their arduous work.

I have, &c.,
P. CLAESSEN,
Principal.

British Columbia, Lytton (St. George's) Industrial School, Lytton, April 10, 1909.

FRANK PEDLEY, Esq.,

Deputy Supt. General of Indian Affairs, Ottawa.

Sir,—I have the honour to submit the annual report of the above named industrial school, for the fiscal year ended March 31, 1909.

Location.—The school is  $2\frac{1}{2}$  miles from Lytton, north, on the left bank of the Fraser river, and the Lytton-Lillooet wagon road runs along the east side of it, the whole length of the cultivated lands.

Land.—The land comprises some 600 acres and is sandy, sandy loam and a little alkali. We broke up 20 acres in the autumn and have sown spring wheat.

The land is owned by the New England Company.

Buildings.—The school building is in good repair and other buildings are all in

use for their special purposes.

We have added an ice-house and cold storage, ice-house, 12 x 12 feet, cold storage attached, 8 x 8 x 10 feet; school buildings, laundry, poultry houses, root cellar, carpenter's shop, blacksmith's shop, horse stable, cow-shed, smoke-house, 3 houses for the workmen, wood-shed, ice-house and cold storage, chapel also at the north end of the farm; farmhouse, cattle-sheds, barn, dairy, pig-house and log tool-house.

Accommodation.—The school was built for the accommodation of 35 pupils and a staff of 4, but we could easily house more, owing to all our industrial work having been moved to separate buildings.

Attendance.—There are 32 on the register, but only 25 at school; one will be

returning on Thursday next, the 15th.

Class-room Work.—School hours are from 9 a.m. to 12 noon, and from 7.30 to 3.30 p.m.

The subjects taught are reading, writing, arithmetic, singing, history, grammar,

geography, and geometry.

Farm and Garden.—We had a bad year for farm and garden; cut worms and drought together did much damage, the fruit only being good. Apples, pears and peaches were plentiful and excellent; melons and tomatoes a complete failure.

Industries Taught.—Carpentry, blacksmithing, farming, gardening, and a good deal of painting are the industries taught. All the housework is done by the boys, except the cooking and washing. They do a large amount of the mending of the clothing.

Moral and Religious Training.—Being tied so closely to the work, and being very isolated, comparisons are difficult, and one sometimes concludes that Indian boys are a tough proposition, but remembering my own school days in England, I conclude that these children respond to and benefit from the moral and religious training, which is the same in both cases to as great an extent as other boys. I find their memories developed most wonderfully since they first began to cultivate them.

Health and Sanitation.—The health has been good, the winter very trying; one

boy died at home from heart trouble.

The sanitation is good, all sewage being carried well away from school building, and the ventilation is well arranged.

Water Supply.—The water-supply is plentiful the year round, and by gravitation.

Fire Protection.—Two fire-escapes are built to the school from the dormitories, a perforated pipe is along the ridge, a good supply of axes, buckets and hose are at hand.

Heating and Lighting.—Heating is by hot-air furnaces and piping, lighting by coal-oil lamps.

Recreation.—Football, rounders and hockey are the principal games. The coasting was bad last winter, the snow being soft and deep, and taken altogether the children had a most trying winter. Play began again as soon as a few feet under a tree on the playground was clear of the snow.

I have, &c.,

GEO. DITCHAM,

Principal.

BRITISH COLUMBIA,
WILLIAMS LAKE INDUSTRIAL SCHOOL,
WILLIAMS LAKE P. O., April 17, 1909.

FRANK PEDLEY, Esq.,

Deputy Supt. General of Indian Affairs, Ottawa.

Sir,—I have the honour to submit my annual report for the year ended March 31, 1909.

Location.—This institution is beautifully situated in a fertile valley along the San Jose creek, 135 miles from Ashcroft, a station on the Canadian Pacific railway, and four miles from Sugar Cane, the nearest Indian reserve. The post office is Williams Lake.

Land.—All the land in connection with the school is the property of the corporation of the Oblates of Mary Immaculate. It is, for the greater part, only pasture land.

Buildings.—These consist of the main building, the boys' and girls' homes and a fourth building containing kitchen and dining-rooms. The main building is mostly occupied by the reverend principal and the other fathers. The boys' home comprises on the lower floor: school-room, play-room, shoemaker-shop, bath-room and lavatory; on the second floor: dormitory, store-room, sick-room, office and bed-room for the foreman; in the attic are located the boys' wardrobes.

The girls' home has on the lower floor: a school-room, a store-room, two parlours, bath-room and lavatory, a sewing and a play-room; the upper floor contains a dormitory for the bigger girls with a bed-room for members of the staff, chapel and vestry, bed-rooms for the teachers, and a second dormitory for the smaller girls; in the attic are the girls' wardrobes and another store-room.

The outbuildings are: granary, meat-house, carpenter and blacksmith shops, 3 cellars, hen-house, stable, barn and machine-shed. A new stable that was begun last year has been finished and a new warehouse was built. The dimensions of the latter are 48 x 24 feet, with a lean-to on 3 sides, for buggy, wagons and sleighs.

Accommodation.—The school can easily accommodate 90 pupils with the necessary staff.

Attendance.—At the time of writing this report 59 pupils are in attendance; 53 of these are on the roll. During the year 5 were admitted and 8 were discharged: 5 boys and 3 girls.

Class-room Work.—Very good progress was made this year by all the pupils. The schools hours for the boys are in the forenoon from 8.30 to 10, every week day, and in

the forenoon, from 10 to 12, every week day, except Monday forenoon, and in the afternoon from 4.15 to 6 except Saturday. The subjects taught are those prescribed by the department. The pupils are at present graded as follows:—

Standard	I	6	pupils.
u,	II	6	"
"	III	23	"

Farm and Garden.—Our large farm is one of the best in the country. All the crops did well this year. In the garden we raised an abundant supply of vegetables such as beets, cabbage, cauliflower, turnips, carrots, onions, lettuce, peas, beans, celery, radish, &c. Since a couple of years, we are also experimenting with fruit trees and some of them are beginning to bear fairly well. A few well chosen species of bush fruit, such as currants, raspberries, gooseberries, do very well nearly every year.

Industries Taught.—Farming.—Farming being in this part of the province the best and most lucrative occupation for our Indians, we try to give our boys a thorough and practical knowledge of this branch. Nearly all the senior boys attended regularly to all the work in the garden, while occasionally even all were employed there. At haying time all spent the afternoons in the meadows. During winter they saw and split all the fire-wood.

Carpentry.—Mr. J. J. Swain is a very efficient instructor in carpentry. His two apprentices have made great progress the past year. They have finished the new stable and built the large warehouse mentioned above besides attending to the repair work in and around the premises.

Blacksmithing.—Whenever any light work is to be done, the carpenter and his apprentices work also in the blacksmith-shop.

Shoemaking.—In the absence of a competent shoemaker, work in this shop is limited to half-soling and mending that is neatly done by one of the boys, who is now able to teach it to the other boys.

Dairying.—Six boys attended to the separator during the season every day at noon and in the evening. They also did the churning, while the girls attended to the lighter work of butter-making. About 800 pounds of butter were put up.

Painting.—Last summer 4 boys painted the floors of the chapel, the school-rooms, the dining-rooms, the dormitories and some smaller rooms.

Girls' Industrial Work.—The girls attain great proficiency in housekeeping; in knitting, mending, hand and machine sewing, dressmaking, crocheting, embroidery and lace-making. Except their underwear for winter, they made all their own clothing and the greater part of the boys' suits. Under the direction of a sister, also, they in turn attend to the laundrying, to the cooking, baking, butter and cheese-making. The aim ever kept in mind is to prepare each girl to become an all-round practical housekeeper. How well the good sisters succeed in this is shown by the many inquiries from white people for girls to help in the housework and by the Indians being very anxious to send their girls to school, so that they may learn well, cooking, knitting and mending.

Moral and Religious Training.—This being the most important part of education particular care is taken by all members of the staff in training the children to be obedient, truthful, honest, kind and obliging. Religious instruction is given daily by the principal, morning and evening prayers are said in common, and on Sundays and holy days the children do all the singing in the church, often in 2 and 3, sometimes even in 4 parts.

Health and Sanitation.—As in former reports I am again happy to state that the school has kept up its record in regard to the excellent health enjoyed by the children. No contagious disease, no serious case of any kind, no death is to be deplored. The drainage is good and cleanliness strictly enforced.

Water Supply.—This comes to us through pipes from an artificial lake, into which runs part of the San Jose creek. It has taken a great deal of the Oblate Order's private funds in order to get the water system in such good working order, even in the coldest winter, as we have had this year, when the thermometer registered 54 degrees below zero, and would have marked yet more, if it had been graduated lower.

Fire Protection.—With a change in the heating system the fire-protection also will become much more efficacious. At present, each chimney can be reached by fixed ladders; pails and axes are also ready at hand.

Heating and Lighting.—The heating so far has been by ordinary box stoves. But, this besides being a continual danger of fire, has never given good satisfaction. We have begun to replace the many small stoves by furnaces of hot air. Last fall we installed a furnace in the boys' school and it has given entire satisfaction in even such a severe winter as we passed through this year. All the buildings are lighted by acetylene gas, which continues to give complete satisfaction.

Recreation.—Boys and girls have large and well-kept playgrounds where they enjoy all kinds of outside games nearly the whole year. The girls have one part of their playground fenced off, where nearly every one has her little flower garden to which they attend with the greatest zeal and delight.

General Remarks.—Our ex-pupils, on the whole, continue to be a credit to the school.

Before closing my report it gives me great pleasure to state that this has been in every respect a successful year, thanks to the painstaking and zealous co-operation of my staff. I also gratefully acknowledge the kindness of the department in supplying the girls' school with new desks that were badly needed. My thanks are due also to Superintendent A. W. Vowell, and our inspector, A. E. Green, whose visits are much appreciated. Death has taken away rather suddenly a few days ago our worthy agent, Mr. E. Bell. May he here receive my tribute of gratitude for his unremitting kindness and devotedness to our institution.

I have, &c.,

H. BOENING,

Principal.

British Columbia Inspectorate, 1076 Pender Street, Vancouver, April 10, 1909.

FRANK PEDLEY, Esq.,

Deputy Supt. General of Indian Affairs,

Ottawa.

SR,—I have the honour to submit my fourth annual report on the schools inspected by me during the year closing March 31, 1909.

#### BABINE AGENCY.

MEANSHINISHT DAY SCHOOL (CHURCH OF ENGLAND.)

This school, which is situated about 60 miles below Hazelton, I visited on May 6, and again in November. Miss Kemp, who taught at the time of my first inspection,

resigned, and Miss Day was teaching at the last inspection. Of the 20 pupils enrolled, 12 were present, and the average attendance was 18. The classes were graded thus:

Standard	Ι		 	٠.	 	 · .	 	٠.	٠	 	7	pupils.
"	II	٠.	 	٠.	 	 ٠.	 	٠.		 	6	"
" ]												

The pupils were clean and nicely clad and did very well in all subjects. Miss Day is energetic, and the children attend regularly and are making satisfactory progess.

### GITWINGAK DAY SCHOOL (CHURCH OF ENGLAND).

I visited this village in May and again in October. Miss Florence B. Kemp is the teacher and is painstaking and faithful in her work.

There were 21 pupils enrolled, graded as follows:-

Standard	Ι	 	٠.	 	 ٠.	 	 ٠.	٠.	 	16 pupils.
"										

The average attendance is 14. The people are away half the year. Fair progress is made by the children.

# ANDIMAUL DAY SCHOOL (SALVATION ARMY).

I inspected this school on May 7 and on October 12, and found 22 pupils enrolled, with an average attendance of 8, and 13 present at inspection. They are graded thus:

Standard I	 	11 pupils.
" II	 	5 "
" III	 	3 "
Ungraded		

D. Rankin is the teacher and a little progress had been made since the former inspection.

#### KITSEGUKLA DAY SCHOOL (METHODIST).

I visited this school on May 4, and again in October. Miss Hannah Edgar is the teacher. Eighteen pupils were enrolled, and of these six were present at inspection. They were graded as follows:—

Standard	1 I	 ٠,	. :	 ٠.	 	 		 	 3	pupils.
"	II	 		 	 	 ٠.	٠.	 	 2	"
66									1	66

The average attendance is seven. Some of the children still live in the old village, nine miles from the school, a fact which accounts for the average attendance being so small.

#### KISHPIAX DAY SCHOOL (METHODIST).

This school, which is situated nine miles above Hazelton, I visited on May 9, and again on October 13. Fifty-six pupils were enrolled, with 23 present at inspection. The children are graded thus:—

Standar	rd I	 	 	 46 pupils.
"	II	 	 	 6 ~ ~
. "	· III	 	 	 3 "
"	IV	 	 	 1 "

An Indian building, very inconvenient, is used for school purposes.

Miss Klippert did very well with this school, but her health failing, she left in May, and Rev. W. H. Pierce is teaching till another teacher can be secured. Not only the children, but their parents as well, are all anxious to be taught to read and write.

# GLEN VOWELL DAY SCHOOL (SALVATION ARMY).

I inspected this school on May 11, and again on October 14. The teacher is Mr. J. P. Thorkildson. Twenty-four pupils were enrolled, with an average attendance of 17, and of these nine were present at inspection. Fair progress has been made since the former inspection. The pupils were graded thus:—

Standar	d I		٠. ـ	 	 		 	8 pupils.
								11 "
								4 "
"	IV	٠		 	 	·	 	1 "

#### HAZELTON DAY SCHOOL (CHURCH OF ENGLAND).

I inspected this school on May 11, and on October 13. Miss E. J. Soal is the teacher, and 40 children were enrolled, with an average attendance of 18. Twenty-four were present at inspection. The children are graded as follows:—

Standar	rd I	 	 	16 pupils.
"	II	 	 	7 "
"	III	 	 	5 "

Miss Soal is an experienced and excellent teacher, and the progress of her pupils is very satisfactory.

#### FRASER AGENCY.

#### SQUAMISH BOARDING SCHOOL (ROMAN CATHOLIC).

I inspected this school on June 9, and again on December 23. The staff consisted of Sister Mary Amy, principal; Sister M. Eugene, matron; Sister M. Felician, teacher; Sister M. Jerome, teacher; Sister M. Anatolie, cook; J. Vanier, gardener.

Seventy-one pupils were enrolled, with 70 present at inspection. They were graded in the following manner:—

0. 1.17	Boys.	Girls.
Standard I	14	16
" II	2	5
" III	7	3
" IV	0	9
" V	5	5
" VI	2	. 3
	-	
	30	41

The examinations proved very satisfactory, the pupils answering most of the questions put to them in grammar, arithmetic, geography, &c. They also did well in drawing, writing, spelling and singing.

The school is in a prosperous condition, the pupils being well taught and doing good work, and the school material is well cared for.

Two acres are laid out in vegetable garden, orchard and flower garden, producing fine fruits and vegetables.

The boys are taught painting, glazing, gardening and shoe-repairing, and the

girls learn housekeeping in all its branches, and dressmaking.

The children enjoy the best of health. The food, though plain, is plentiful and wholesome, while the clothing is neat and suitable, and, as the building is connected with the city waterworks, they are supplied with pure water.

The boys and girls are occasionally drilled for fire-protection and appliances are

on hand for any emergency.

At the North Vancouver exhibition the pupils won several prizes with their handiwork. The children are polite, and show they are well trained. The buildings are all in good repair, the sisters are great workers, and the Sister Superior is a good manager.

Satisfactory progress has been made in all branches of study during the year.

# SECHELT BOARDING SCHOOL (ROMAN CATHOLIC).

I inspected this school on June 10 and 11, 1908, and again on January 6 and 7, 1909. The staff comprised the following: Sister Theresine, principal; Sister St. Ouen, matron; Sister Victorien, teacher; Sister Stephanus, teacher; Sister St. Denis, teacher; Sister Amelia, cook.

Forty-five pupils were enrolled and two not formally enrolled, and all were present at inspection. They were graded as follows:—

	Boys.	Girls.	
Standard I	7	11	
" II	4	6	
" III	4	- 5	
" IV	5	0	
" V	0	3	
•		· <u> </u>	
	20	25	

The pupils did very well in reading, spelling, geography, and writing, while in arithmetic and history they did fairly well. They appear to pay great attention to their lessons and progress is noticeable in all branches taught. The school-room is well equipped and the material in good order.

They have an acre and a half cultivated as a vegetable garden, orchard and flower garden. Both boys and girls take an active part in the gardening. In the

orchard the trees are doing splendidly.

For a year, the boys have been instructed by Mr. Smith, in carpentry, painting, plumbing, and the mixing of cement, &c. Under his supervision they put up a 3 storey building, comprising cellars, workshop, laundry, 2 play-rooms, a store-room and a large drying-room. They also built a large stable and the work is all well done.

The girls are taught all kinds of housework, and make their own clothing, and

mend that of the boys.

The health of the pupils has been remarkably good this year. The food is good and well prepared and the clothing warm and suitable.

The school is in very good repair and all departments are kept scrupulously clean. The outbuildings have been added to and the work done in a creditable manner. The children have made wonderful progress since the school was opened and all of them now speak English well. The sisters in charge are doing excellent work.

# COQUALEETZA INDUSTRIAL INSTITUTE (METHODIST).

I inspected this school twice during the year, on June 16, 17 and 18, and again in December 29 and 30.

The staff consisted of R. H. Cairns, principal; Miss F. M. Kinley, matron; Miss H. E. Young, assistant matron; Miss M. Pittman, school teacher; Miss L. Peregrine, school teacher; Miss E. S. Pike, cooking teacher; Miss A. E. Chamberlain, laundry teacher; Miss M. E. Jefferis, sewing teacher; Charles Reid, farmer; L. V. Masters, carpenter.

Ninety-eight pupils were enrolled and 77 were present at inspection.

The pupils were graded in the following manner:—

		Boys.	Girls.
Standard	I	25	6
"	II	6	12
44	Ш,	10	9
	IV		11
"	V	5	1
"	VI	3	1
	•		
		<b>5</b> 8	40

The pupils are taking the full course as prescribed for the public schools of British Columbia. They use English fluently and intelligently, and progress is being made in all school work. The reading, spelling, geography, arithmetic, and history have evidently been well taught in the senior grade. In the junior grade, excellent work is being done, and the pupils are always on the alert. The teacher has learned the secret of gaining and keeping the attention of her pupils.

The half-day system is in vogue with the older pupils, while the younger children

are in the class-room, both morning and afternoon.

The farm products during the past season were very good, as the following will show,—35 tons of hay, 20 tons of grain, 25 tons of potatoes, 60 tons of turnips and 4 tons of carrots.

They have a very fine garden in which large quantities of fruit and vegetables were grown, viz.: 200 boxes of very fine apples, 2 tons of berries, 3 tons of tomatoes, 4,000 head of cabbage and cauliflower, besides large crops of onions, parsnips, rhubarb, celery, squash, vegetable-marrow, &c.

There are 11 cows, 7 heifers, and 1 pedigreed Jersey bull, all looking well. They have also 6 horses (2 of which were getting old and would soon need to be replaced), and 12 hogs, just enough to eat the refuse and rough grain.

The cows afford an abundance of milk for the use of the institution and during the past season large quantities were sent to the creamery.

The milking is done by the boys. Some 8 or 10 of the boys have been learning the use of tools during the past season. One is learning blacksmithing at Sardis and is doing well. Others are good teamsters.

In the sewing-room, laundry and kitchen, the girls are being well trained and do creditable work. They have 4 sewing-machines in use and make and mend their own clothing and some of that for the boys.

The ventilation of the buildings is good, the Smead-Dowd system being almost perfect, when worked intelligently.

The dormitories are provided with fire-escapes, and buckets, fire-axes, and barrels of water are placed in convenient positions in the upper halls. The building is so arranged that there are 4 means of exit by stairway, from the second floors.

There is a very homelike atmosphere about this school and the pupils seem to be contented and eager to learn. The school is in a very satisfactory condition.

YALE (ALL HALLOWS) BOARDING SCHOOL (CHURCH OF ENGLAND).

I inspected this school on June 29, 1908, and again on January 29, 1909. The staff consists of Sister Constance, principal; Sister Althea, C.A.H., vice principal;

Sister Marion, teacher; Miss L. Harris, teacher; Mrs. Dickson, matron; Mrs. Shaw and Miss marmer, instructors in industrial work.

Twenty-nine pupils were enrolled and 27 were present at the inspection. The children were graded as follows:—

Standard	Ι	 	 	 	 	 	 . 2	pupils.
. 44	$\Pi$ .	 	 	 	 	 	 . 5	"
.66	III.	 	 	 	 	 	 . 5	"
"	IV.	 	 	 	 	 	 . 1	"
66	$\mathbf{v}$ .	 	 	 	 	 	 . 3	"
. "								

In reading, spelling, arithmetic, geography, and history the pupils did well, while their writing and drawing were very good.

The time-table is well arranged and the programme of studies prescribed by the department, is generally followed. The class-rooms are well supplied with maps, blackboards, slates and all necessary books and other school material.

The 4 acres of land attached to the school are laid out as a garden, in which vegetables are grown for the school in large quantities, as well as great crops of cherries and small fruits. These latter, the pupils canned for winter use.

The girls are taught all kinds of housework. They cut out and make their own garments and are also accomplished in fancy work. The pupils are taught basket-making, an old Indian woman who is a noted expert having taught them the peculiar stitch of the tribe.

The girls at present in the school are in excellent health. The food is well cooked and of good quality, and the clothing neat and clean.

The buildings have been improved and are now in a fair state of repair.

The girls are very intelligent and some of them remarkably clever, and they are all well behaved.

#### ST. MARY'S BOARDING SCHOOL (ROMAN CATHOLIC).

At this school, which I inspected on September 4, the staff consisted of: Rev. J. P. O'Neill, O.M.I., principal; Rev. P. J. Collins, farm instructor and band master; Sister M. Benedict, matron; Sister M. Rogation, boys' teacher; Sister M. Monica, assistant boys' teacher; Sister M. Romuald, girls' teacher; Sister M. Veronica, assistant girls' teacher; Sister M. Pauline, cook in boys' school, and Sister M. Ovide, cook in girls' school.

There were 68 pupils enrolled, of whom 66 were present at inspection. They were graded in the following manner:—

	Boys.	Girls.
Standard I	. 5	1
" II	. 8	4
" III		13
" IV		12
" V	. 4	6
	32	36

The reading, spelling, arithmetic, grammar, and history were good, while writing and composition were very good.

General farming, gardening, dairy work, elementary carpentery, and painting are taught the boys; while in the girls' department, sewing, cooking, fancy-work, and general housework are taught.

The farm contains about 300 acres, nearly 100 of which are under cultivation; 5 acres being in garden and orchard.

All kinds of roots necessary for table use and stock feeding are raised, and of grains, they have oats, wheat, peas; and hay. In addition to the vegetables grown in the garden, they have also fruit in abundance, all of which is kept for the use of the school.

There are 38 head of stock, viz., 7 horses, 6 pigs, 15 milch cows, and 10 steers and small calves. The accommodation for these is fairly good, several of the stables having been rebuilt this year.

The school buildings are comfortable and in fairly good condition. Several of the rooms were painted during the year. Since they light the school by electricity there is not so much danger of fire. The new water system installed by the department works well and is a great improvement.

The school is well managed and all members of the staff are doing their best.

# KAMLOOPS-OKANAGAN AGENCY.

# LYTTON INDUSTRIAL SCHOOL (CHURCH OF ENGLAND).

I inspected this school on September 9, 10 and 11, 1908. The staff comprised Rev. Geo. Ditcham, principal; Thos. E. Smith, carpenter; Jessie May Dyer, matron; Sing, cook; and Lung, laundryman.

Thirty-two pupils were enrolled—all boys, 28 being present at the examination. The classes are graded as follows:—

Sta	ndaı	rd ${f I}$	 	 	 	٠.		 	 			- 8	boys.
	"	II	 	 	 			 	 			0	**
	"	III. .	 	 	 		٠	 	 			O	"
	"	IV	 	 	 ٠.			 ٠.	 	٠.	٠	10	"
	"	V	 	 	 			 	 		٠.	14	"
												32	

The pupils speak English intelligently and read, spell and write very well. They do well also in history. The half-day system is followed.

All necessary material, desks, maps, blackboards and slates, are sufficient and in good order.

They have 140 acres of cultivated land and raised this year, 80 tons of hay, 20 tons of grain, 18 tons of roots, and 4 tons of fruit. Seven acres are in garden, roots, small fruits and tree fruits being grown in abundance. They picked several hundred boxes of very fine peaches, but the melon and tomato vines were destroyed by the wire worms.

The stock consisted of 41 cattle, 23 sheep, 4 horses, and 30 hogs. All of these are well cared for and are extra fine stock.

Four of the boys are doing carpentry work, building barns, and repairing generally.

The general health of the children is good, all of them appearing strong and well. The water-supply, food and clothing are very good.

In this beautiful climate the boys are able to play out-of-doors the year round.

All of the buildings were in good repair and were neat and clean.

A new bath-room has been built, and a stable with accommodation for 6 horses, and room for 12 tons of hay overhead, has been completed during the year.

The boys are becoming quite bright and learn rapidly. They have greatly improved in their use of English since the former inspection.

The New England Society is very generous to this school, which is well equipped in every way.

The principal is a very energetic manager. The boys know how to handle the irrigating ditches, and gather and box the fruit in a very workmanlike manner.

# LYTTON DAY SCHOOL (CHURCH OF ENGLAND).

The teacher at this school is Miss Lily Blachford. She has 33 pupils enrolled, with an average attendance of 16, and 7 were present at my inspection on September 11, 1908. At the time of my visit, many of the children had gone with their parents to the hop-fields. They are all in the first standard. Miss Blachford is a good teacher, and good progress has been made with the raw material.

# KAMLOOPS INDUSTRIAL SCHOOL (ROMAN CATHOLIC).

I inspected this school on September 16, 17 and 18, 1908. The staff consisted of Rev. A. M. Carion, principal; L. Viel, carpenter; Sister M. Paula, girls' teacher; Sister M. Amelia, boys' teacher; Sister M. Rose, seamstress; and Sister M. Michael, cook.

Twenty-nine boys and 34 girls were enrolled, all of whom were present at the examination. They were graded thus:—

	Boys.	Girls.
Standard I	 9	10
" II	 9	5
" III	 3	0
" IV	 6	11
" V	 . 2	5
" VI	 0	3
	29	34

I examined the pupils in reading, writing, spelling, arithmetic, geography, grammar and Canadian history. The older pupils did well in all studies, using English intelligently, and being able to give from memory a good synopsis of the stories read. Very satisfactory progress had been made during the year and 11 new pupils had received a good start in the primary department.

The land is so poor that only about 15 acres can be cultivated, and for this they are obliged to pump water from the Thompson river for irrigating purposes. Alfalfa is the only crop raised. They had some good potatoes, but the other vegetables were partly destroyed by the grasshoppers and wire worms.

The live stock consists of four horses, one bull, six cows and four calves.

The elder boys attend to the repairing of the buildings, and during the year repaired the stone wall around the garden, and the bake-oven, making a very good job of it. Four of the boys mend the shoes for the children.

The girls are taught cooking, baking, sewing, knitting and all ordinary house-keeping. They cut out and make their own dresses, besides making many garments for the boys. The pupils were all neatly clothed, the girls particularly so, and all were very clean.

I saw the pupils at their meals and noticed that the food was good, well cooked and abundant.

The water for the house is good, being pumped by gasoline engines from the Thompson river, and the drains are in a satisfactory condition.

The buildings are in a fair state of repair, are clean, with everything in good order, and the school is doing satisfactory work.

### WILLIAMS LAKE AGENCY.

WILLIAMS LAKE INDUSTRIAL SCHOOL (ROMAN CATHOLIC).

I visited this school in November and inspected from the 24th to the 29th inclusive. The staff comprised the following: Rev. H. Boening, principal; Rev. J. D. Chiappini, instructor in agriculture; J. J. Swain, carpenter; Sister Euphrasia, matron and teacher of large boys; Sister Seraphim, teacher of small boys; Sister Gabriel, teacher of large girls; Sister Octavia, teacher of small girls; Sister Fabian, cook; Sister Eloid, assistant cook; and Sister M. Assumption, seamstress.

Fifty-eight pupils were enrolled and five not yet formally enrolled, making 63 in all, and of these 53 were present. The pupils were graded in the following manner:---

		Girls.
Standard I		<b>2</b>
" II	4	<b>2</b>
" III	7	19
" IV	5	7
" V		7
$\mathcal{L}_{i}$ and $\mathcal{L}_{i}$ and $\mathcal{L}_{i}$ and $\mathcal{L}_{i}$ and $\mathcal{L}_{i}$	26	37

On examining the children in reading, spelling, grammar, arithmetic, geography, history and drawing, I found they had made satisfactory progress. Answers to all questions were given intelligently and with animation. I would particularly mention the eight children from Stuart's Lake. Their progress is really marvellous.

The programme of studies prescribed by the department is strictly adhered to, and the children spend four hours daily at study and four hours at work, equally divided between the forenoon and afternoon.

The floors in the school-rooms in both boys' and girls' departments have been rainted during the year. They are now completely up-to-date, clean, well ventilated. well heated and furnished with all necessary material.

All the land connected with this school belongs to the corporation of O. M. I. in all about 4,300 acres, of which 500 are under cultivation, the rest being grazing, timber and and wild lands. The crops raised last season consisted of 12 tons of wheat. 10 tons of oats, 1 ton of barley, and 400 tons of hay. About 6 acres are in garden, in which they raised 30 tons of potatoes, 1 ton of carrots, 1 of cabbages, also onions. pease, beans and other vegetables in various quantities.

Small fruits, such as strawberries, raspberries, black and red currants, are extensively grown. For 3 or 4 years, apple trees have been planted and are very promising.

The live stock consists of 30 horses, 418 cattle, including calves, and 25 pigs. The accommodation for these is very good.

A number of boys are being taught carpentry, and like it. One who comes from Stuart's Lake, about 300 miles distant, where no school exists as yet, shows great ability in learning the trade.

He also attends to the mending of the footwear of the boys and girls, doing it in a very creditable manner. Four of the other boys, during the months of August, September and October, painted all of the most important floors in the boys' and girls' departments, and of the different dining-rooms.

The girls receive training in all branches of domestic work, and nearly all of the clothing used at this institution is made by them. The health of the children at this school is exceptionally good. I noticed when they were at their meals that the food was plentiful and well served. A beef is killed every ninth or tenth day, so that the meat is always fresh, while the vegetables are plentiful and excellent.

Both boys and girls wear good, clean, and warm clothing. I examined the stores on hand, and found a good supply of everything, and of good quality. The drainage, water-supply and ventilation were good.

The buildings I found in good repair, the dormitories, school-rooms, kitchen, and dining-rooms, &c., being all very clean. During the period of inspection, the pupils gave a programme of action songs and exercises, all of which they rendered in good form.

The whole staff is very energetic and I consider that the school is doing excellent work, and deserves to be congratulated and encouraged.

#### KOOTENAY AGENCY.

# KOOTENAY INDUSTRIAL SCHOOL (ROMAN CATHOLIC).

This school, which is situated at St. Eugene Mission, near St. Mary's reserve, was inspected on December 14 and 15, 1908. The members of the efficient staff were:—Rev. J. Wagner, O.M.I., principal; Sister Mary Dolores, superior; Sister Justinian, girls' matron and seamstress; Sister Philomena, assistant seamstress; Sister Gervais, boys' matron and seamstress; Sister Angelica, girls' teacher; Sister Theophane, boys' teacher; Sister Foucault, cook; Mr. A. Findlay, farm instructor and carpenter; and Mr. P. E. Corrison, band master.

Fifty pupils were enrolled and were all present at the examination as well as 13 who were not yet formally enrolled, making 63 in all. They were graded thus:—

Sta	ndaı	rd I	 	 	 		 	• •	 	 	14	pupils.
	"	$\Pi$	 	 	 ٠.		 		 	 	8	"
	"	III.`.	 	 	 		 		 	 	16	"
	"	IV	 	 	 		 		 	 	8	"
	"	$\nabla$	 	 	 	٠.	 		 	 	4	"
											_	
											50	

The 13 children, not enrolled, who are awaiting admission, are in standard I. The reading, spelling, arithmetic, writing, geography and drawing were very satisfactory, much progress having been made during the year.

The hundred and eighty-four acres of land under cultivation are divided as follows:—2 in vegetable garden, 2 in orchard, 2 in potato garden, 7 acres of grain field, 5 acres in meadow, 116 acres of pasture land and 50 acres of hay land. The crops this year were 112 tons of hay, 12 tons of potatoes, 300 bushels of oats, 10 tons of mangel wurzel, a great quantity of small fruit and 500 bushels of apples. The farm is in good condition. In the garden they raised an abundant supply of vegetables, such as cabbage, turnips, carrots, beets, onions, lettuce, radish, celery, &c.

They have 7 horses, 14 milch cows, 85 head of cattle, and 15 pigs, all of which are properly accommodated.

The boys do the milking, but the girls attend to the dairy work. Butter is made during the entire year, and none is sold, all being consumed in the institution.

The boys repair their own shoes and occasionally mend the harness.

Under the supervision of a sister, the girls in turn, attend to the sewing, cooking, baking, butter-making and laundrying, some of them attaining great proficiency in these departments.

The food is plentiful and wholesome and their clothing neat and suitable. The water works are very satisfactory, but the ventilation is not very good, as the buildings are low and poor.

For protection against fire, ladders, axes and hose are kept in convenient places and drill is occasionally held.

I visited some of the ex-pupils, who show that they have profited by the education and training received. The boys are mostly engaged in farming, and nearly all have enough knowledge of carpentry to build their own houses and keep their places in repair.

The girls keep their homes neat and their children are clean and tidy. They are a great improvement over the village girls who have not been to school. I was well satisfied with the school. They have an excellent staff, and I found everything, except the buildings, in a prosperous condition and they do the best they can with these.

# WEST COAST AGENCY.

# ALBERNI BOARDING SCHOOL (PRESBYTERIAN).

This school was inspected twice during the year, on June 23, 24 and 25, 1908, and on February 19 and 20, 1909. Jas. R. Motion is the principal, other members of the staff being, H. G. Motion, matron; C. E. Guillod, teacher; Jean Stevens, assistant matron.

Lily Haslam (ex-pupil No. 024) who held the position of laundress, retired in July and is now married to Hamilton George (ex-pupil No. 26).

There are 23 boys and 25 girls enrolled, making a total of 48, of whom 47 were present at the examinations. The children were graded as follows:—

													Boys.	Girls.
Standard	Ι	 • •	 										7	5
"	II	 	 										4	5
. "	III	 	 			 	•.	•			 		0	8
"	IV	 	 										5	5
"	$\nabla$	 	 										7	<b>2</b>
												-	<del></del>	
													23	25

The reading, spelling, arithmetic, geography and writing were very good. Intelligent answers to questions asked, proved that they understood the lessons read. Their drawing was also good, and their written examinations very creditable. Their knowledge of English has increased considerably, and in all branches reasonable and satisfactory progress has been made during the year.

Miss Guillod, daughter of the late agent, is the teacher and takes a keen interest in the work of the school.

The half-day system is followed, and the equipment of the class-room is good and sufficient.

There are 156 acres in connection with the school, 6 acres being under cultivation. A pasture field adjoining, is rented. A small piece of land was in oats, and yielded about 2 tons, while the rest of the cultivated land was planted in potatoes and vegetables, the potatoes yielding about 10 or 12 tons. In the garden, all kinds of vegetables are grown, as well as a variety of small fruits, and some tree fruits.

The school possesses 3 cows and a calf. A good frame stable has been built, measuring 20 x 36 feet, with a large loft, which will give splendid accommodation for live stock for some time to come.

Under the supervision of the principal, the boys attend to the repairs about the premises, as well as assisting in the building of the stable. They have the care of the stock, and help in the kitchen.

The girls are taught cooking and general housework, which includes laundry work, and the care of the dormitories and bed-rooms.

Sewing in its different branches is also taught; the girls attending to the repairing of the clothing for both boys and girls.

The food is of good quality and sufficient, and the children are well clothed. A grant of \$250 has been given by the church to renew the plumbing and sewers; an action which will make a great improvement in the sanitary arrangements.

The water is good, but owing to the heavy frost, the pipes from the large tank were frozen, some of the piping being also split.

The drainage is good, and as the dormitories and dining-rooms have large windows and high ceilings, the ventilation is well attended to.

With the exception of the class-room, the buildings are in good repair. A new class-room is urgently needed, the building being altogether too cold during the winter, and uncomfortable alike for pupils and teacher.

The pupils appear to be happy and contented in the school, evincing a willingness to study, so that the staff have much to encourage them in their work.

# AHOUSAHT BOARDING SCHOOL (PRESBYTERIAN).

I inspected this school on February 22, 23 and 24, 1909. The staff consisted of Rev. J. L. Millar, B.A., principal; Miss D. C. McKay, teacher; Miss J. McNeil, matron; Miss N. Perkins, assistant matron. Forty pupils were enrolled, 39 being present at the examinations.

The children were graded in the following manner:

															Boys.	$G_{ir}$	ls.
Standard	Ι	 												•	9	4	
"	II	 				٠	,		 ٠.						3	1	
- 66	III	 							 ٠.						1	2	;
"	IV	 								,					9	6	;
166	V	 	٠.												<b>2</b>	3	;
														-			
															24	16	;

In both oral and written examinations the results were very satisfactory. The children show an increasing knowledge of English and the examinations proved that progress had been made in all branches during the year. There are 2 sessions of school daily, with about 45 minutes of preparation in the evening. The class-rooms are supplied with all necessary material.

The acreage reclaimed through the draining of the lake during the past 2 years, yielded about 4 tons of hay, oats and corn last season. In the 4 acre garden, all the ordinary vegetables are grown.

Nine boys are learning carpentry. The principal is a genius with tools and can do nearly every kind of mechanical work. Under his direction, the boys built a first-class, 22½ foot launch with cabin, and equipped with a 3 H.P. International gasoline engine for the convenience of the school in travelling and towing. They also erected a barn, 18 x 26 feet, and a hen-house, 16 x 17 feet, all the work being done in a creditable manner.

The boys also do the shoe-repairing, plumbing, and blacksmithing.

The girls assist in the cooking, baking and laundry, and do fancy-work and house-work in general. They are cheerful at their work and diligent.

The food is good, sufficient, and that it was properly served I could see for myself. The clothing is suitable and neat.

The dormitories are on the sheltered side of the building, thus permitting the windows to be kept open, continually admitting abundance of fresh air.

There have been two Christian marriages from among the ex-pupils during the year and they have established nice little homes on the reserve.

The buildings are in good condition, but a workshop is very much needed.

The children are obedient and willing to be taught, and the staff are working harmoniously to realize the best results for them. As it had been about a year since

I last visited the school, I observed a marked advancement among the pupils present then.

The relations between the rancherie and the school are very friendly, having greatly improved from what they were two years ago.

# CLAYOOUOT INDUSTRIAL SCHOOL (ROMAN CATHOLIC).

This school, which I inspected on February 25 and 26, 1909, has an efficient staff in Rev. P. Maurus, O.S.B., principal; Mr. Geo. Sturmer, trade instructor; Sister M. Placide, teacher; Sister M. Clara, cook; Sister M. Clotilde, seamstress; Sister M. Elizabeth, laundress.

Thirty-two boys and 33 girls were enrolled, all being present at the inspection. They were graded as follows:-

Standar	d I	 	••••	 	 	18	pupils.
"	Π	 		 	 	10	"
"	III	 	'	 	 	10	"
"							
"	٧	 		 	 	5	"
						65	. "

I examined the children in reading, spelling, history, arithmetic, geography and penmanship, in all of which they did well. I noticed a marked improvement in their reading and speaking of English. In arithmetic they solved a number of problems in fractions and measurements in a most satisfactory manner. Their writing is excellent.

The time-table is well arranged, and all necessary school supplies are on hand

and properly taken care of.

The land belonging to the school consists of 175 acres, very heavily timbered. About one acre has been cleared during the year, which represents a great amount of manual labour. So there are about three or four acres, in the different patches, now under cultivation.

They have six milk cows, one bull and one calf. The accommodation for these

is fairly good, but is only temporary. They have also about 75 fowls.

Twelve boys, under the supervision of the trades instructor, had, during the year, moved the large wood-shed, built a new boat, ceiled the attic rooms, besides attending to all the repairs. At the time of my visit they were completing a new laundry, 60 x 26 feet. The work in progress and that completed were done in a creditable manner.

The girls are taught cooking and baking in all its different branches, and are employed in the laundry and sewing-room. For themselves and the boys they had made 249 garments, as well as a great amount of underwear.

The health of the pupils has been exceptionally good during the year. The clothing is neat and appropriate to the different seasons, and the food is of good quality and sufficient.

The water is pure and plentiful, and the frost, though severe, did no damage. The drainage is very good, as is also the ventilation.

For protection against fire, they have 10 fire-extinguishers, two dozen fire-pails, two axes, and 200 feet of 2-inch hose.

Fire-escapes are provided outside, and there is a good water pressure.

The buildings are in good repair, many noticeable improvements having been made during the year.

The pupils are well behaved and eager to learn, and I considered that reasonable and satisfactory advancement had been made in every department.

The school is well managed, and all members of the staff are devoted to their work.

# CLAYOQUOT DAY SCHOOL (ROMAN CATHOLIC).

I inspected this school on February 26. Rev. Chas. Moser is the teacher. Twenty pupils are enrolled, with an average attendance of eight. Twelve were present at inspection. The children are attending a little better, but there is still room for improvement.

Considering the irregularity of attendance, fair progress has been made. The appearance of the school-room has been greatly improved. The pupils are graded in the following manner:—

Standard I	 	 16 <del>p</del> upils.
" II	 	 0 "
" III	 	 3 "
Ungraded	 	 . 3 "
		20

#### KWAWKEWLTH AGENCY.

## ALERT BAY INDUSTRIAL SCHOOL (CHURCH OF ENGLAND).

I visited this institution twice during the year, on August 21 and 22, 1908, and again on February 3, 4 and 5, 1909. On the latter occasion I was accompanied by Agent Halliday.

A. W. Corker is the principal, the other members of the staff being Mrs. Corker, honorary matron; Miss Warrener, assistant matron; George Green, trade instructor; George Luther, teacher; and Ah David, cook.

Thirty boys were enrolled and 22 were present at the time of my inspection. Six had not returned since the summer holidays.

They were graded as follows:-

Standa	rd I			 		 	٠.	 	 	 	<b>2</b>	pupils.
	$\Pi$ .											
"	$\mathbf{III}$	, .	٠.	 		 		 	 	 	3	"
. "	IV											
"	V			 		 		 	 	 	4	"
"	$\nabla I$		٠.	 	٠.	 		 	 	 	1	Ĩ.
											22	

In their examinations, the progress they had made during the year was evident. Their oral work was fair, and in arithmetic, the first and second grades did very well. In their use of English, they have all improved remarkably.

The class-room is very small, when the full number of boys are in residence.

About 3 acres are cultivated and used for pasturage, and about 2 tons of hay were harvested last season. Enough vegetables are grown for the use of the school, with the exception of potatoes, of which there were just 1½ tons. Half an acre is in small fruits.

Two cows are kept for the use of the school.

Ten boys are learning carpentry, taking turns, 4 at a time in working with the trades instructor.

The food is of good quality and sufficient and is well prepared and served. The health of the boys is good and their clothing suitable. Their Sunday clothes are very good, but the every-day clothing was getting rather shabby; at the time of inspection new ones were being made by the staff.

The water-supply is good, but a new force-pump is necessary. The drainage is fair. The ventilation of the building is well attended to.

The pupils are not only willing, but anxious to be taught. They take a keen interest in all the class-room studies and the results are very encouraging to the staff.

The grant of \$500 has been wisely expended on material for the dormitory—bedsteads, blankets, &c., and new copper and bricks that were greatly needed.

The principal and his staff are working harmoniously and with zeal, for the good of the Indian children committed to their charge.

#### ALERT BAY DAY SCHOOL (CHURCH OF ENGLAND).

This school was inspected on August 21, 1908, and again on February 5, 1909, Frank Nelson, an educated native, is the teacher, and so far has done well.

Twenty-six pupils were enrolled with an average attendance of 7, and 21 were present at the time of inspection.

They are graded thus:—

Standar	d I	 ٠.	 	 			 	 ٠.	٠.	 20	pupils.
"	$\Pi$	 	 	 	٠.	٠	 	 		 4	. "
"	III	 	 	 			 	 		 2	"
. •										26	

Considering the irregular attendance, these children have made reasonable progress.

# GWAYASDUMS DAY SCHOOL (CHURCH OF ENGLAND).

This school was inspected on August 21, 1908, and on February 5, 1909. Mr. F. Comby teaches this school, and has 27 pupils enrolled, with an average attendance of 7. Ten were present at inspection.

The children were graded in the following manner:-

Standar	$d I \dots$	 	 	 	٠.			 	 10	pupils.
"	II	 	 	 			٠.	 	 6	"
. "	III	 	 	 				 	 4	"
u	IV	 	 	 				 ٠.	 1	"
	ed									
						,			_	
									27	

Considering that they are away from the village so much, the children have made satisfactory progress. The school-house is poor.

#### CAPE MUDGE DAY SCHOOL (METHODIST).

I visited this school in February, 1909. Eight children were present, out of 14 enrolled. The average attendance is 7.

Mr. J. E. Rendle is the teacher and missionary. The nice little school-house is well situated.

Two pupils could read fairly well. The people move about so much that but little progress is made. They were graded as follows:—

Standard I	 	6 pupils.
" II	 	5 . "
" III	 	2 "
Ungraded		
	* -,	14

#### COWICHAN AGENCY.

# KUPER ISLAND INDUSTRIAL SCHOOL (ROMAN CATHOLIC).

On August 25 and 26, 1908, I visited this school on a tour of inspection. The members of the staff were: Rev. P. Claessen, principal; Rev. W. Lemmens, teacher; Rev. Father Lachance, assistant teacher; J. Lecrom, trades' instructor; A. Ronault, assistant instructor; Sister M. Evariste, matron; Sister M. Albert, assistant matron; Sister M. Cornelius, teacher; and Sister M. Emiliana, cook.

Eighty-two pupils were enrolled and 75 were present at inspection.

The pupils were graded in the following manner:-

${\bf Standard}$	I	10	pupils.
"	II	15	"
"	III	10	"
"	IV	16	"
"	V		
"	VI	15	"
	and the second of the second o		
	•	75	

The programme of studies advised by the department is followed. The girls' class-room is bright, cheerful and well equipped with material, with the exception of the desks, which are very poor.

The boys' class-room is very poor, but is fairly well equipped with all necessary material.

The crops were good, although they suffered slightly from lack of rain. The pupils were threshing grain at the time I arrived at the school. The boys are all taught to do farm work and appear very happy at it, especially when working with the horses or caring for the cattle.

There is a very fine garden in which all vegetables needed for the school's use are grown, as well as a large amount of fruit.

Just previous to my visit they had harvested 30 sacks of oats, 50 sacks of wheat, and 30 tons of timothy hay.

There were 3 horses, 11 cows, 1 bull, 1 young steer, and 7 pigs, all of which looked well. They have also 100 chickens.

The boys do the milking and attend to the dairy work, and 6 of them have regular instruction in carpentry.

The girls are taught hand and machine sewing and general housework. Each girl has a little flower garden of her own.

The children all looked strong and healthy. I saw them at their meals and noticed that the food was plentiful and good.

The water-supply is good, but the ventilation is very poor, although as good as can be expected in these old buildings. The windows are kept open at all times.

For fighting fire, there are ladders, axes, fire-buckets, hose, and chemical extinguishers.

The large deficit at this school has been caused by their taking 30 pupils over and above the 50 authorized by the department, the grant being for only 50 children.

The buildings are in poor condition and the foundations are decaying. Inside they are clean, but new buildings with better sanitary arrangements are needed.

# NANAIMO DAY SCHOOL (METHODIST).

I inspected this school on June 26, 1908, and found 22 children enrolled, with an average attendance of 15. Fourteen were present the day I arrived. Mr. W. J. Knott is the teacher, and the children have made great progress during the year. They attend regularly. I visited the village again in January, 1909, but found the school closed on account of small-pox on the reserve. The children were graded as follows:

Standard	I	 	 	 		 		٠	 	12	pupils.
"	п	 	 	 	٠.	 			 	4	"
"	III	 	 	 		 	٠.		 	6	"
									-		
										22	

# SONGHEES DAY SCHOOL (ROMAN CATHOLIC).

Sister Mary Berchmans is the teacher at this school, which I visited on October 22, 1908. Nineteen pupils were enrolled and the average attendance was 8. At the inspection 16 were present. The grading of the pupils was as follows:—

Standard	I.		 			 ·			٠			6	pupils.
"	П.		 			 		 	٠.			3	"
"	III.	 	 			 	 	 		٠.		3	. "
"	IV.	 	 	 		 	 	 				2	"
"	$\mathbf{v}$	 	 			 	 	 				2	"
Ungraded	l <b></b> .	 	 	 	 	 	 	 			,	3	"
												_	
												19	".

The school-house is clean and neat, flowers and pictures making it bright and attractive. The children did exceedingly well in all subjects. The teacher does excellent work. The children are clean, well dressed and would compare favourably with white children in any public school.

#### GENERAL REMARKS.

Tsartlip, Somenos, Quamichan and Saanich day schools were closed at the time I visited the reserves.

#### NORTHWEST COAST AGENCY.

# PORT ESSINGTON DAY SCHOOL (METHODIST).

I inspected this school on October 16, 1908. Miss K. Tranter has taught this school for 19 years and is a successful teacher, doing excellent work.

There are 30 children of school age on the reserve, all of whom are enrolled, with an average attendance of 15. Nine pupils, all of whom were home at the time of my visit, were present at the inspection. The children had just gone with their parents to a fishing camp for a few days. Those present did well in all branches. They were graded thus:—

Standard	I		 	 		14 pupils.
44	II		 	 		6 "
						8 ":
"	IV	,	 	 		1 "
"						
					<del>-</del>	
						30

#### PORT SIMPSON DAY SCHOOL (METHODIST).

I inspected this school on November 2, 1908, and again in March, 1909. One hundred and twelve pupils are enrolled with an average attendance of 26. Thirty-three were present at the inspection.

Mr. Lionel Dineen is the teacher. Only fair progress is being made. There is great room for improvement and the teacher is working hard to secure better results. The pupils are graded as follows:—

Standard	I	 		27 pupils.
"				
"	ш	 		3 "
,66	ΙV	 		4 "
Ungraded		 		66 "
			- :	·
			•	112

### PORT SIMPSON BOYS BOARDING SCHOOL (METHODIST).

This school I visited in November, 1908, and inspected again on March 17 and 18, 1909. The staff comprises:—Rev. G. H. Raley, principal; L. Dineen, vice-principal; Miss A. Honeywell, matron; Miss Dallimore, assistant matron.

Twenty-six pupils were enrolled, and 20 were present at the time of my visit.

They were graded as follows:—

Sta	andaı	rd I	. 16	pupils.
		II		
	"	III	. 4	",
-	"	IV	. 2	"
	66	V	. 1	"
			_	•
			26	

The school-room is fairly well equipped, but the boys seem to be hard on material. The boys do the general repairing about the school building, and are learning boat-building; they also do Indian carving. Reasonable and satisfactory progress had been made during the year.

The buildings have been re-shingled and are much improved. All parts of the building were clean.

#### PORT SIMPSON (CROSBY) GIRLS' HOME BOARDING SCHOOL (METHODIST).

At this school, which I visited on November 3 and 4, 1908, and again on March 15, 16 and 19, 1909, the staff consists of Miss Hannah M. Paul, principal and teacher; Miss Frances E. Hudson, matron; Miss Sarah E. Scholefield, sewing teacher; and Lottie M. Deacon, assistant matron. Miss Ida M. Clarke held the position of matron until February, but has gone on furlough, and Miss F. E. Hudson is taking her place.

Forty-four girls were enrolled, of whom 43 were present at inspection. pupils were graded in the following manner:-

Standa	rd I	5 8	zirls.
"			
"	III		
"	IV		
" "	V		
		_	
		43	"

The children did well in the following subjects, viz., reading, spelling, arithmetic, geography, grammar, nature study and English literature. The smaller girls are taught by the phonic method.

The pupils are also taught music and drawing. During the inspection they all

took part in a musical programme, which was well rendered.

In addition to the class-room work, the girls are taught sewing, baking, dressmaking, laundry work, and have the care of the dormitories, &c. A cooking class for the larger girls is being conducted by Miss Deacon every Friday afternoon, according to the best methods used in the schools of domestic science. I was present at this class, and noticed that the food was prepared and cooked by the girls in a very creditable manner.

The sanitation at this school has been much improved, and with a few exceptions the health of the girls has been good.

The food is sufficient, of excellent quality and well prepared, while the clothing is suitable, warm and neat.

The water is good, except in times of severe frost. On account of the exceptionally extreme cold this winter they had to carry water for about two months.

The drainage is good, and all sewage is carried to the beach. The rooms are well ventilated by the fresh air from the furnace, open windows, and the ventilators in the attic.

I consider that an iron fire-escape is very necessary, as there is only one stairway to this three-storey building, and in case of fire near the stairs, escape from the top storey might be impossible.

The discipline is firm but kind, and the rules of the school well observed. The buildings are in good repair, and I am informed that a larger play-room is to be built this summer. From dormitory to basement everything was perfectly clean.

The pupils are bright, and appear willing to be taught, and the results are encouraging to the staff, as every year the girls are growing in intelligence, interest, and in general knowledge.

The various members of the staff are very energetic in the discharge of their duties, and good work is being done.

## KINCOLITH DAY SCHOOL (CHURCH OF ENGLAND).

This school, which is on the Nass river, I inspected in November, 1908, and again on March 22, 1909. The teacher is Miss Emily C. Collison.

There are 55 children of school age on the reserve, all of whom are enrolled, the average attendance for 3 months being 39.

Seventeen children were present at the inspection. The Indians were out fishing for oulachons and many of the children had accompanied them. Those present did well in all the usual subjects, and have made good progress. Miss Collison is doing well in the school, but a better building is required. The material is well taken care of.

$\mathbf{The}$	pupils	are	graded	as	follows:—

	_

#### METLAKATLA DAY SCHOOL (CHURCH OF ENGLAND).

On November 6, 1908, and on March 28, 1909, I visited this school, finding 45 children of school age on the reserve, 43 of them being enrolled, with an average attendance of 25. The 2 who were of school age, not on the register, were ill.

The pupils were graded as follows:-

Sta														pupils.
	"	$\mathbf{II}$ .	 				٠.		 	 	 		12	"
		III												"
	"	IV	 					٠.	 	 	 		4	.66
	"	V												"
	"	VI	 	٠.	٠.				 	 	 	• •	2	"
						٠.							-	
													43	

The new school-house and furniture is well looked after, and the children are bright and clean. Reading, spelling, arithmetic, geography, history and writing, were very good. The school is a credit to Miss Jackson, the energetic teacher, and has improved greatly during the year. The Rev. Mr. Keen takes great interest in assisting the school.

# KITKATLA DAY SCHOOL (CHURCH OF ENGLAND).

Miss Marguerite Temple Gurd, is the teacher at this school, which I visited on March 25, 1909. Forty-one children were enrolled, graded as follows:—

Sta	ndar	d I.	 ٠	-,-	 		 		٠.	 	 	8	pupils.
	"	П.	 		 		 	٠.	٠.	 	 	10	"
		III.											
4.	"	IV.	 		 	٠.	 			 	 	5	"
		ν.											
													4.4
												41	

An old mission house is being used for the school, but a better building and some furniture is required. The pupils do very well in writing, reading, arithmetic, spelling and geography. They sing nicely and are making satisfactory progress.

The children are clean, obedient, and well behaved.

#### BELLA BELLA DAY SCHOOL (METHODIST).

I inspected this school on November 10 and 11, and found 31 pupils present—21 boys and 10 girls. Sixty pupils were enrolled, with an average attendance of 26. The pupils were graded as follows:—

Standar	d I	26 pupils.
"	П	16 "
"	III	13 "
. "	IV	5 "

Miss Carrie S. Rush is an excellent teacher, and the school-house is kept bright, clean, and attractive. The children are quick to learn, but so many are away from the village all summer and the irregularity of the pupils makes the work difficult. They did fairly well in reading, spelling, arithmetic, geography and writing. In drawing and singing, they were very good.

Five of the most advanced pupils had gone to the Coqualeetza industrial school.

# MASSETT DAY SCHOOL (CHURCH OF ENGLAND).

This school is on the Queen Charlotte Islands, and was inspected on March 27, 1909. There were 57 children of school age on the reserve, 54 of whom were enrolled, with an average attendance of 26. The pupils were graded as follows:—

Standard I	• • • • •	 		24 p	oupils.
" II		 		14	66
" II	• • • •	 	• • • • • •	10	"
" IV				. 6	u · · ·
				-	
		 		52	

The children are punctual, and the furniture and material are well cared for. The fine new school-house is kept nice and clean.

Henry Edenshaw, a native, is the teacher, and is assisted by his daughter. The children are making some progress.

The Rev. Wm. Collison superintends and directs the work.

alani kara bahipa masaka mbili rawawah ra mbi

#### SKIDEGATE DAY SCHOOL (METHODIST).

This school, which is on the Queen Charlotte Islands, I visited on March 29, 1909. There are 32 children of school age on the reserve, 15 boys and 17 girls. Twenty-seven are enrolled, with an average attendance of 14. On the day of inspection, 18 were present. Ten who formerly attended this school are now in an industrial school.

Peter Kelly, an ex-pupil of Coqualeetza industrial school, is the teacher, and has a high school entrance certificate. He makes a good teacher, and takes great interest in his work.

The children did very well in reading, spelling, writing, arithmetic and geography. A very old house is used as a school building, and a new school-house is badly needed. The children speak out distinctly and have a good grasp of their lessons, and the work of the school is very satisfactory.

# ATLIN DAY SCHOOL (ROMAN CATHOLIC).

I inspected this school on July 17, 1908, and found 14 beys and 10 girls enrolled, all of whom were of school age.

The Rev. Father Allard is the teacher, and is doing excellent work. This is a new school, having been opened but a year, and for the time they had attended, the children had made remarkable progress.

I heard them read, spell and count, and saw their writing. They were beginning to understand quite a little English, and were very well-behaved. The school was held in a rented house. The Indians here appear very anxious that their children should attend school.

CARCROSS BOARDING SCHOOL, YUKON TERRITORY (CHURCH OF ENGLAND).

I also visited the Carcross boarding school, Yukon Territory, on July 16, 1908, and found 18 pupils, 10 boys and 8 girls enrolled, all of whom were present at inspection. The staff consisted of Rev. Mr. Hawksly, principal; Miss Ellis, matron; Miss Hutchison, teacher; and Miss Thompson, teacher.

The pupils were in the first, second and third standards. Very satisfactory progress had been made in reading, writing, arithmetic, geography and spelling, and by questioning I found they were becoming very well acquainted with the English language, considering that the majority of the pupils have only been two years at the school.

Two sessions are held daily, and the programme of studies prescribed by the department is followed.

The present equipment of the class-room is totally inadequate, as they have only rough tables and poor accommodation generally.

Books, slates, blackboards, maps, as well as general school furniture, are needed. There is no farming, but a little gardening is done. The boys cut wood, fish, and do the general chores about the building, while the girls are taught such domestic duties as sewing, cooking, bread-making, washing, &c.

In the garden, potatoes, turnips, carrots, lettuce and radishes, &c., are grown and were doing well at the time of my visit.

The health of the children is very good, the excellent climate evidently having a most beneficial effect upon the natives. Beef, mutton, moose, caribou and fish are largely used, in addition to other good and wholesome foods, and the children all looked well nourished.

The clothing was neat and suitable to the climate. The water-supply, which is plentiful and good, is obtained from Lake Bennett.

Ventilation is very good and the drainage fair, sanitary precautions being taken to preserve health. For protection against fire, barrels are kept filled with water, and ladders kept in position to afford an exit from the dormitories.

The present buildings are far too small and unsuitable. Larger and better buildings are urgently required. Those they have are in fairly good repair, but unfitted for school purposes, not having been built originally for a school. This appears to be a good site for a fair-sized school, and with larger and more convenient buildings, and suitable equipment, much good work can be done for the Indians of the Yukon.

#### GENERAL REMARKS.

Looking over the schools as a whole, considerable progress has been made, and the Indians are appreciating the value of them more than ever before, and the pupils are more contented.

Much of my time during the year was taken up with special work, as directed by the department—the month of April in closing up the Metlakatla industrial school; July and August, with Superintendent Vowell visiting the Indians of the Yukon Territory; and visiting the Thompson river tribes in September. Reports on all these have already been forwarded to the department. Notwithstanding this extra labour, with two or three exceptions, I have visited every school in the inspectorate.

I have, &c.,

A. E. GREEN,

Inspector.

#### General Remarks.

The land sold during the year amounted to 64,924 21 acres, which realized \$462,682. The quantity of surrendered land in the hands of the department was approximatively 229,010 acres. The principal outstanding, on account of Indian lands sold, amounted to \$911,641.19, a considerable portion of which has not yet become due.

#### CENSUS RETURN.

CENSUS RETURN of Resident and Nomadic Indians, Denominations to which they belong, with approximate number belonging to each Denomination, as well as the number of Pagans in the Dominion of Canada, by Provinces, for the year ended March 31, 1909.
