

SESSIONAL PAPER No. 27

WILLIAMS LAKE AGENCY.

Williams Lake Industrial School (Roman Catholic).

This school was inspected November, 1909. The staff consisted of the following: Rev. H. Boening, principal; J. J. Swain, carpenter; Thos. Schl, foreman; Sister Euphrasia, matron, and teacher; Sister Seraphim, teacher; Sister Gabriel, teacher; Sister Octavia, teacher; Sister Fabian, cook; Sister Eloid, assistant cook; Sister M. Assumption, seamstress.

There were fifty-two pupils enrolled and fifteen not yet formally enrolled. Some of the pupils come from Stewart lake, a distance of three hundred miles. Sixty-seven children were present at inspection, and were classified as follows:—

		Boys.	Girls.
Standard	I.	6	5
"	II.	2	2
"	III.	6	10
"	IV.	5	9
"	V.	2	7
"	VI.	6	7

I examined the classes in all the prescribed subjects, with very satisfactory results. The senior girls showed marked intelligence in their work. The new pupils were making a fair start and all appeared eager to learn. All classes were examined carefully and I found that most satisfactory and conscientious work had been done by the teachers.

There are five fine class-rooms well furnished with patent desks, well lighted, well heated and well ventilated.

All the land in connection with this school belongs to the corporation of O.M.I. Nearly five hundred acres are under cultivation, the rest being grazing, and timber lands. Last year's crop consisted of twenty tons of wheat, fifteen tons of oats, and three hundred tons of hay.

There is also a garden of about six acres, in which they raised twenty-five tons of potatoes, one ton of cabbages, about half a ton of carrots, also beans, pease, small fruits, &c.

There are thirty-five horses, three hundred and fifty cattle including calves, and thirty pigs. There is good accommodation for the stock. In summer they milked seventeen cows and made six hundred pounds of butter, which is all used at the institution. The boys attend to the cows, the separator, and the churning, while the girls make butter and cheese.

Three boys work constantly in the carpenter shop, others mend shoes, one does plumbing.

The girls receive practical instruction in all branches of domestic work.

In this school the pupils are exceptionally healthy. Their food is well prepared and in sufficient quantity. The meat here is always fresh, a beef being killed on an average of every tenth day.

The drainage and ventilation are good.

There was a great improvement in the heating system. Instead of sixteen stoves, two furnaces will now give the heat required to make all the rooms comfortable, besides removing the constant danger of fire. It was a very difficult task to excavate a basement underneath the school, as all the earth had to be taken out by buckets. All the pupils, even the girls helped in this great and necessary work.

Most of the ex-pupils are living on the reservation, working for the white settlers or teaming on the Cariboo road. Generally speaking, they are anxious to improve their position.

1 GEORGE V., A. 1911

The buildings were in good repair, but in great need of a coat of paint. A new warehouse, 48 x 24 feet, had been completed since former inspection. It had a lean-to on three sides for buggies, sleighs, &c.

From the school record, there being forty girls, but only twenty-seven boys, the Indians seem to be very anxious for their girls to attend school, but not their boys.

All the buildings were clean and orderly. Good management is manifest in the various departments. The staff is a strong one.

COWICHAN AGENCY.

Kuper Island Industrial School (Roman Catholic).

This school was inspected July, 1909. The staff consisted of Rev. P. Glaessen, principal; Rev. W. Lemmens, teacher; Rev. J. Lecromn, trade instructor; A. Ruault, asst. instructor; Rev. Sister Evariste, matron; Rev. Sister M. Albert, asst. matron; Rev. Sister M. Lydia, teacher; Rev. Sister M. Stanilas, cook.

Eighty-four pupils were enrolled, forty-eight boys and thirty-six girls. Seventy-three, forty boys and thirty-three girls, were present at inspection. They were classified as follows:—

		Boys.	Girls.
Standard	I.	11	10
"	II.	9	7
"	III.	9	5
"	IV.	3	0
"	V.	3	7
"	VI.	5	4

The reading of the senior boys and girls was very good, and by a little questioning I found they knew the meaning of all the words. Spelling, geography, history, arithmetic, and composition were fair. The new pupils had made a start, but knew little English, as they had only been a short time at the school.

Good progress had been made in all subjects since former inspection.

A few boys are taught carpentry, shoemaking and painting, and all are taught farming.

There is a farm in connection with the school, of about forty acres. Eight acres were planted in wheat, two acres in oats, five acres in potatoes, and four acres in carrots, beans, onions, &c.

The live stock consists of thirteen cows, four calves, one bull, three horses, three pigs, one hundred and twenty chickens, and thirty ducks. There is a new well built chicken-house and yard. The lumber was on hand to build a new barn.

The larger boys do the milking and all learn to take care of cattle.

The girls do the general housework, prepare meals, cook, bake, &c. They also learn to darn, sew, and make their own dresses. They also attend to the poultry yard, and take great interest in it.

If any of the pupils show signs of any kind of disease, they are removed from the school. The pupils had plenty of good food. Their clothing was neat and suitable.

For drinking and cooking purposes, water is provided from natural springs. For all other purposes creek water is used. The drainage has been improved since former inspection.

The ventilation was not very good, but the windows are kept open as much as possible.

The school is protected against fire, fire buckets, extinguishers, &c., are kept ready for immediate use. The children are drilled regularly according to regulations.

SESSIONAL PAPER No. 27

Since former inspection, eight pupils were admitted, and none discharged. Eight pupils are ready to be discharged at the end of this year. Among these three girls attracted special attention by their education, their skill at work, and their healthy condition.

Most of the ex-pupils are living on the neighbouring reserves. Three boys (brothers) are making a good living by logging on their own account, running their own steamer for this work. Two girls are teaching day schools on Vancouver Island.

There were some improvements since former inspection; a new drain has been built to carry the sewage further out on the beach; the fences around the buildings and farm have been repaired and appear more tidy than before.

Nanaimo Day School (Methodist).

Inspected January 11, 1910. Wm. J. Knott is the teacher. Of the twenty children of school age, fifteen were enrolled, with an average attendance of twelve. Thirteen were present at inspection. Pupils were graded as follows:—

Standard	I.	9
"	II.	2
"	III.	4

The pupils have made good progress during the year, doing very well when examined. The building was in good condition.

Somenos Day School (Roman Catholic).

Inspected January 12, 1910. The teacher was Miss Maud Lomas. There were ten children of school age, of whom seven were enrolled, with an average attendance of three for six months.

The pupils were classified as follows:—

Standard	I.	Pupils.
		5
"	II.	2

The teacher said the Indians took no interest in the school. I saw Mr. Agent Robertson and we met the Indians, putting the matter before them, and finally getting their promise that they would send their children more regularly. The teacher has since informed me that they are keeping their promise, and that the children attend much better. Hence I look for better results.

Quamichan Day School (Roman Catholic).

Inspected January 13, 1910. There were 24 children of school age, of whom 19 were enrolled, with an average attendance of 9. Eight were present at inspection. Magdalen Wilson, an ex-pupil of Kuper Island industrial school, is the teacher, and was doing very well. The day of my visit it was very stormy, and the tide so high that some of the children could not get to school. The reading, spelling, and counting were good for small children.

The old building is in fair repair.

Cowichan Day School (Methodist).

Inspected January, 1910. Number present at inspection, 14. Number on the roll, 16, and an average attendance of 10. The teacher is Miss Josephine Johnny, a graduate of the Kuper Island industrial school. She had only been teaching a short time, but was doing nicely. The pupils were graded as follows:—

1 GEORGE V., A. 1911

	Pupils.
Standard I.	13
“ II.	3

The building is in good repair.

Koksilah Day School (Methodist).

Inspected January 14, 1910. Seventeen children were present at inspection. Of the 25 children that should attend, 17 were enrolled, with an average attendance of 8. Chas. A. Dockstater is the teacher. The pupils were classified as follows:—

	Pupils.
Standard I.	12
“ II.	3
“ III.	2

These children are very bright and learn quickly. Their parents farm, so do not roam around as much as most Indians. Some of the pupils walk 2 miles to school and are quite regular. They are doing well with their studies.

Saanich Day School (Roman Catholic).

Daniel Dick, from the Kuper Island industrial school, is the teacher. Of the 20 children that should attend, 10 were enrolled, with an average attendance of 4. I found only one present. With the teacher I visited every house and told them that unless they sent their children, the school would have to be closed. As some of the men were absent from the village, I arranged for a meeting, when Mr. Agent Robertson would be present. The meeting was held and the Indians promised to see that their children attend more regularly.

Songhees Day School (Roman Catholic).

Inspected January 18, 1910. All the 13 children of school age are enrolled. Seven were present at inspection. There is an average attendance of 11. There was a great rain-storm at the time of my visit, so the smaller children could not attend. The children were classified thus:—

	Pupils.
Standard I.	2
“ II.	2
“ III.	6
“ IV.	1
“ V.	2

The pupils are well advanced, and did splendidly in all subjects. They are clever, well dressed, and well behaved. The teacher, Sister Mary Berchmans, is very capable, and is doing excellent work.

Tsartlip Day School.

The school has been without a teacher since Miss K. Needham resigned a year ago.

WEST COAST AGENCY.

Alberni Boarding School (Presbyterian).

This school was inspected in August, 1909. The staff consisted of Jas. R. Motion, principal; H. G. Motion, matron; O. E. Guillod, teacher; Jean Stevens, assistant matron.

SESSIONAL PAPER No. 27

Twenty-two boys and 24 girls were enrolled. Of these 6 boys and 11 girls were present at inspection, the others had gone with their parents during the holidays in July, and were at the Fraser river fishing. They were classified as follows:—

		Boys.	Girls.
Standard	I.	5	3
"	II.	6	7
"	III.	0	8
"	IV.	5	4
"	V.	6	2

The class-room work was good. The reading, spelling, and arithmetic were very good. Their copy-books were neatly kept and the drawing was good. Reasonable progress had been made. Miss Guillod, the teacher, has greatly improved in her methods of teaching.

The school material on hand was sufficient and in good order.

Although there are 106 acres in connection with this school, only about 6 acres are under cultivation. About 2 acres were laid out in oats, for feed, and about 1½ acres was in potatoes.

They grow a variety of small fruits and vegetables in the garden.

The live stock consisted of 4 head of cattle and about 40 hens.

The girls are instructed in all branches of housekeeping, and some do a great deal of fancy needle-work. All the children appeared healthy. Their food was good, their clothing suitable.

The water-supply has been improved. Both drainage and ventilation are good.

This school is well protected against fire, having appliances always ready in case of an emergency. Fire-drill is held regularly.

All the pupils are fond of swimming and canoeing, they also play football and baseball.

The principal was trying to arrange for a new class-room, as the old one was hardly worth repairing. The plumbing and sewers were to be removed shortly, which, with other repairs required, will help to improve the lavatory arrangements.

The discharges of two girls were to be asked for. Both were well forward in their studies and proficient in their work, and both returned to their parents' homes, which are fairly comfortable.

The Indians appear to appreciate the work of the school and are quite friendly to the staff.

Mr. and Mrs. Motion, principal and matron, respectively, for the past ten years, have resigned. Mr. Mondry, of Portage la Prairie, is the new principal.

This school has done good work, and, with a new class-room and improvements in the home, better work will be possible.

Clayoquot (Christie) Industrial School (Roman Catholic).

Inspected August, 1909. The staff consisted of the following: Rev. P. Maurus, O.S.B., principal and teacher; Sister M. Placide, matron and teacher; Sister M. Clara, cook; Sister M. Clotilde, seamstress; Sister M. Elizabeth, laundress; George Sturmer.

Sixty-nine children were enrolled, of whom fifty-eight were present at inspection. One boy and two girls were on sick leave; seven boys and one girl were working out for the summer by permission of the department.

The pupils were classified as follows:—

		Boys.	Girls.
Standard	I.	9	4
"	II.	4	6
"	III.	8	4
"	IV.	9	10
"	V.	2	6
"	VI.	5	2

1 GEORGE V., A. 1911

The pupils showed a distinct advance since last inspection. The spelling, arithmetic, composition, geography, &c., were good. Their reading was excellent, and they showed clearly they understood what they were reading.

Here there is the half-day system for the senior pupils, the younger ones attending twice a day. Their class-rooms are roomy, well ventilated, and well supplied with the necessary articles.

The industries taught are carpentry, shoemaking, painting, elementary plumbing, baking, dairying, net-making, and gardening.

There is a garden of two acres, where vegetables are grown with fair success.

The live stock consists of six cows, three calves, one yearling, one bull, and about one hundred hens. Three cows were being milked, butter being made by the pupils.

The girls learn housekeeping, cooking, baking, plain and fancy sewing, and laundrying.

With a few exceptions the general health has been good. Their food was well served, and plentiful. Their working clothing is suitable. On Sundays they look very neat in uniforms.

This school has a good supply of water for house use and splendid pressure for fire-protection.

The drains go out to sea, making the drainage good.

The school is well protected against fire. Fire-escapes are provided, and the necessary hose, axes, &c. I gave an alarm during my visit, after the pupils had retired. They were out in quick time and in good order.

The discipline is strict, yet kind, and the pupils are generally well behaved.

I visited a number of the ex-pupils where they worked during the year, and found them nearly all doing well.

I found the buildings in good repair. The laundry had been completed since my last inspection. There is a jewel eight-horse power engine, extractor, cylinder washer, sixteen horse-power boiler, which furnishes the steam to the engine, the washer, the dry-room, and to the hand tubs. The building is well and neatly built, also conveniently arranged for the purposes intended. Everything is chosen with the one object of practical utility. In the boiler and engine-room there is a concrete floor. The washer and extractor are also bedded on concrete. This concrete work was all done by the pupils and instructor. The dry-room is fitted with three steam coils and a fan. The whole plant is a perfect success. The washer has a capacity of one hundred and twenty-five shirts at one time, or ninety sheets. These are cleaned, rinsed and blued in forty minutes.

This school is doing satisfactory work. The deficit of former years is being gradually reduced.

Ahousaht Boarding School (Presbyterian).

Inspected in August, 1909. The staff consisted of the following: Rev. J. L. Miller, B.A., principal; Miss J. McNeill, matron; Miss E. McKay, teacher; Miss N. Perkins, assistant matron.

Forty-one children were enrolled, two were waiting for medical examination. All were present at inspection. They were classified as follows:—

		Boys.	Girls.
Standard	I.	4	6
"	II.	4	1
"	III.	4	3
"	IV.	3	1
"	V.	7	8

There had been a marked improvement in the examinations since former inspection. They showed an intelligent understanding of their studies. All the children manifest great interest in their work and are very industrious. School is in session

SESSIONAL PAPER No. 27

both afternoon and forenoon. Outside work hours are from 8 to 9 a.m. and from 4 to 6 p.m.

The class-rooms were satisfactorily equipped, and the material well taken care of. There is a farm of about seventeen acres of good loamy soil recovered by draining a small lake as recommended by the inspector five years ago. Last year three tons of hay were grown, also sufficient carrots, rhubarb, &c., for school use. An acre of cranberries was doing well. The potato crop was also fairly good. The land is becoming more productive each year. About two acres are used for gardening, where beets, pease, onions, &c., are grown.

Only one cow is kept. When more feed is grown, it will permit the school having more cattle. As this was the first milking cow here, a great interest was manifested in the milking, both by the pupils and by the Indians of the village. Fifty hens are also kept.

Six boys were learning carpentry. Others learn elementary blacksmithing, plumbing, painting, boat-building, &c. Several boats were well built and look quite equal to bought ones.

The girls learn to bake, sew, and do general housework. They are good workers. All the pupils were in good health, well fed, and suitably clothed.

The water-supply is here obtained both from a well and from rain-water. The new tanks were satisfactory. A large drain carries away all sewage into deep water.

The windows of the dormitories are on the sunny side of the building and can be kept open all the year round, which is a great advantage, and gives splendid ventilation.

Appliances for protection against fire are kept ready, and by means of a large force pump water can be thrown to any part of the building. Fire-drill is held.

The pupils were very orderly and obedient, showing that discipline is well maintained.

I visited some of the ex-pupils at their homes, they were working and respectable.

All the buildings were in good repair. Some improvements had been made since the former inspection, the main school building had been repainted; the new workshop, 18 x 25 x 12, had been completed. It is well fitted up, all the material being of the best.

The Indians are now all very friendly to the school. The pupils are above the average of those in schools, they appear so willing to work, and do everything so cheerfully. They are a credit both to the school and to their teachers.

The principal is a genius for work. He is a good carpenter, plumber, painter, and boat-builder, and is well liked by both the Indians and the pupils. I regret to report that he has to resign the management of the school, on account of ill health.

The day schools in this agency were closed at the time of my visit, it being summer holidays and the Indians away from home.

KWAWKEWLTH AGENCY.

Alert Bay Industrial School (Anglican).

Inspected October 18, 19 and 20, 1909. The staff consisted of the following:— A. W. Corker, principal; Mrs. Corker, matron; Miss Warrenner, assistant principal; George Luther, teacher; Eli Hunt, trade instructor; Lee, cook.

There were thirty-five boys enrolled and all were present at inspection. They were graded as follows:—

		Pupils.
Standard	I.	9
"	II.	9
"	III.	4
"	IV.	5
"	V.	6
"	VI.	2

1 GEORGE V., A. 1911

The reading, spelling, writing, were very good. The arithmetic in the senior classes was excellent; the geography, good; grammar, fair. Satisfactory progress had been made.

There are about four hundred and ten acres of land in connection with this school, but only about five acres are partially under cultivation. This year they raised one ton of good potatoes, one ton of hay, and a supply of vegetables and small fruits.

The live stock consists of two cows and thirty-seven hens.

Twelve boys were working at carpentry, others work in the garden.

The general health of the boys was good. Their food was wholesome, their clothing warm.

The drainage system was fair, wooden drains carry on all waste to deep water.

In fitting up the new dormitory, care was taken to improve greatly the ventilation, which is now quite satisfactory.

In case of fire, axes, fire buckets, &c., were on hand. A new iron fire-escape had been put up since last inspection. Fire-drill is held occasionally.

The buildings were in fairly good repair, but need a coat of paint. An upper bedroom had been nicely arranged as a dormitory, plastered, &c., and will hold twenty beds.

Quite a number of the furnishings and utensils were worn out. I pointed out to the principal that these required to be renewed. With better equipment, better results can be expected. The staff is working hard to benefit the pupils.

Alert Bay Day School (Anglican).

Inspected September 13, 1909. The fifteen children that should attend were all enrolled, with an average attendance of eight. Twelve were present at inspection. Children were graded as follows:—

	Pupils.
Standard I.	7
“ II.	7
“ III.	1

The pupils are small, but are making some progress. Reading, arithmetic, &c., were fair. Louisa Harris, a bright native girl, educated in this school, is the teacher. She was doing very well.

Gwayasdums Day School (Anglican).

Inspected October 15, 1909. All the twenty-four children who should attend were enrolled, with an average of eight. Thirteen were present at inspection. They were classified as follows:—

	Pupils.
Standard I.	10
“ II.	6
“ III.	2
“ IV.	1
Ungraded.	5

Nine of the children did very well in reading, spelling, &c. The children's parents have only a veneer of civilization, and value the school but little. The building is in fair repair, except that the flood of a year ago lifted it up and moved it out of plum. The teacher, F. Cromley, is doing his best in a difficult school.

Cape Mudge Day School (Methodist).

Inspected January 25, 1910. J. E. Rendle is the teacher. Of the seventeen children of school age, fifteen were enrolled, and ten were present at inspection. There was an average of eleven for three months. The pupils were graded as follows:—

SESSIONAL PAPER No. 27

	Pupils.
Standard I.	5
“ II.	7
“ III.	3

A little progress had been made, but only a very little. Five pupils could read, spell and count fairly well, the others were beginners.

The school-house is in fair repair, but needs a coat of paint.

NASS AGENCY.

Crosby Girls' Boarding School (Methodist).

Inspected in September, 1909. The staff consisted of the following: Miss F. Hudson, principal and matron; Miss L. Deacon, assistant matron; Miss S. E. Schobfield, sewing teacher; Miss C. J. Manson, school teacher.

Forty-two girls were enrolled, and thirty-nine were present at inspection.

The pupils were examined in all their subjects, and the results were quite satisfactory. The older girls have also been carefully instructed in vocal and instrumental music, and show a creditable degree of proficiency in this department.

The pupils were graded as follows:—

	Pupils.
Standard I.	8
“ II.	6
“ III.	7
“ IV.	12
“ V.	9

The school-room is well lighted and comfortably seated with good desks. Black-board space is limited. There was a good supply of the necessary school material, all in good condition.

The girls are instructed in all branches of housekeeping, mending, cooking, fancy-work, and basket-weaving.

There is a very small garden for flowers and vegetables. Some forty hens are kept.

Generally speaking, the health has been good. Some have had enlarged glands, and have had to have the doctor's attention, but all were improving.

There was plenty of nutritious food, and all were comfortably dressed.

The water-supply is good and abundant, except for a month or more in winter when the pipes often freeze. The new drain works well and carries all sewage to the sea. The ventilation is fairly good.

In case of fire, fire-escapes, ladders, and fire-extinguishers are in readiness. The girls quickly responded to an alarm given by me at the time of my inspection.

Of the nineteen pupils who have been discharged from this school in the past four years, thirteen have turned out satisfactorily. Seven of them are married. I visited ten of them in their homes.

The buildings were in good repair. A new fence had been put around the playground since former inspection, and most of the interior of the building had been painted.

This school was honoured by a visit from His Excellency Earl Grey, on August 20, who inspected every part, and heard the pupils sing their songs. The high estimate placed upon the management and work of this institution by His Excellency at a public reception, increased the feeling of pride and friendliness of the Port Simpson Indians particularly.

At present the kitchen and laundry are in the basement; but, as the whole of the basement is required for the laundry, the kitchen should be on the first floor.

1 GEORGE V., A. 1911

Miss Paul, who had been a member of the staff for some fourteen years, doing good work, resigned, and Miss F. Hudson has taken her place. She is very energetic and capable and will, I believe, improve the home even more.

The inspection was satisfactory.

Port Simpson Boys' Boarding School (Methodist).

Inspected September, 1909. The staff was as follows: Rev. J. H. Raley, principal (honorary); Mr. L. Dineen, vice-principal; Mrs. L. Dineen, matron; Miss M. A. Dineen, asst. matron; Miss M. E. Dineen, asst. to vice-principal.

Twenty-two were enrolled, fourteen were present at inspection.

Some had not returned from summer holidays; three were home by the doctor's advice.

They were classified as follows:—

		Pupils.
Standard	I.	9
"	II.	5
"	III.	4
"	IV.	3
"	V.	1

The boys have improved in reading and writing. Arithmetic was fair, writing, good; singing, very good. Very fair progress has been made since former inspection.

About a quarter of an acre is laid out in garden, where they grow cabbages, turnips, carrots, &c.

Their live stock consists of one horse and ten chickens.

The boys are taught carving and painting. One boat had been built.

Except those absent on account of ill health, the general health of the boys was good.

The sanitary arrangements are not of the best, but they are being improved.

The food and clothing of pupils is sufficient. Here the water-supply is sufficient for household purposes, except during severe weather in winter. They expect to connect with the larger town supply before winter.

The buildings are in better condition, having all been re-shingled. There is great need of other improvements being made as soon as possible.

The pupils of the boarding school, along with the pupils of the day school, are taught by the vice-principal. While being satisfactory to the boarding school, it hardly does justice to the day pupils, for they are often absent; thus falling behind the others in their studies, they are ashamed to come back, so often do not attend when they should.

Kincolith Day School (Anglican).

Inspected September 16, 1909. The fifty-two children of school age are all enrolled, with an average attendance of twenty-five. Twenty-six were present at inspection. Those present were graded as follows:—

		Pupils.
Standard	I.	8
"	II.	8
"	III.	3
"	IV.	6

The reading, spelling, &c., were very good. The children were quick at figures. I noticed a general improvement since former inspection. Miss Emily Collison takes great interest in her pupils, visiting them in their homes. A new school-house is urgently needed.

SESSIONAL PAPER No. 27

Lach-kalsap Day School (Anglican).

I visited this school September 17, 1909, but the new teacher, Mr. Albert Smeath, was the only person in the village. Unusual high water in the Nass river had prevented the Indians from returning home as they had expected. Mr. Smeath intended to open school as soon as they arrived.

The building is a very old and poor one.

Aiyansh and Kitlachdamax day schools (Anglican), were closed, and the Indians had not returned on account of the high water in the river. I saw them camped at the mouth of the Nass river.

Port Simpson Day School (Methodist).

L. S. C. Dincen is the teacher. There are one hundred and fifty children of school age on the reserve, of whom one hundred and four are enrolled. Only fourteen were present at inspection. They were graded as follows:—

	Pupils.
Standard I.	8
“ II.	3
“ III.	3

The reading, spelling and writing were very good. The pupils seemed backward in arithmetic. The teacher had charge of the boys' boarding school. This appears to be a disadvantage, as it takes so much of his time. If he were relieved from his 'home' duties, he could give all his time to the large number of village children, who should attend day school at least for the winter season.

Metlakatla Day School (Anglican).

Visited in September, 1909. There were twenty-four pupils present, and all were making very satisfactory progress. Miss Jackson is a very successful teacher, and the school has improved. The new building was in good repair.

New Town Day School, Kitseias (Methodist).

When I visited the village, the teacher, B. S. Tait, was away getting supplies. The children are improving in English, and the Indians expressed a great desire to have the school continued.

QUEEN CHARLOTTE AGENCY.

Skidegate and Masset Day Schools.

These schools were closed for holidays when I was there, as the Indians were absent from the villages.

1 GEORGE V., A. 1911

THE REPORT OF INSPECTOR W. M. GRAHAM ON THE EX-PUPIL COLONY AT FILE HILLS FOR THE YEAR ENDED MARCH 31, 1910.

In accordance with instructions contained in letter of February 5, 1910, I beg to submit the following report on the Colony for ex-pupils, situated on Peepee-
wehis reserve, at File Hills.

This special reserve was set aside in 1901 and contains a total area of nineteen thousand acres, subdivided into 80-acre lots. At the time this subdivision was made it was thought that farms of 80 acres would be quite large enough on which to start the young Indians, but it was not long before it was discovered that 80 acres was not enough, and the plan of settling the beginners on the alternate lots was adopted. In a number of cases 160 acres have proved to be inadequate for the more progressive young men, as there are a number to-day who have over two hundred acres under cultivation, and one or two who have over three hundred acres.

At the present time there are twenty-five heads of families residing on the colony, farming, and the total resident population is about 80 souls.

These young Indians have acquired, since starting up, a great many valuable horses and a full line of machinery, which has been paid for by themselves. It may be interesting to the department to know that they own 30 teams of horses, which at a low valuation are worth \$350 a team. They have also 14 yoke of cattle, which were loaned by the department originally, and in many cases paid for already. They own 22 wagons, 42 ploughs, 13 binders, 10 seeders, and a great deal of other farm machinery, which has all been paid for out of proceeds of crop sold from time to time. The financial standing of most of these young men could not be better, as many of them do not owe anything on the plant they have.

In 1907 and 1908 these Indians suffered a great loss, in fact, their crops were almost a total failure, and it was with difficulty that they pulled through, although I must say their condition was not as bad as that of many a white settler who was just beginning in those years, as the Indians had the advantage of a reserve where there was plenty of wood and hay, which they could sell during the winter to help them out. However, they were not daunted by these failures, and in 1909 they put in a larger crop than ever, which yielded them the magnificent return of fifty-one thousand and five hundred and ninety-one bushels of grain, of which sixteen thousand bushels was wheat, which they sold for 80 and 90 cents a bushel, and the balance was oats. In addition to this crop nearly every farmer had a good garden, which supplied him with vegetables during the summer and throughout the winter. There is hardly a farmer who does not keep pigs and poultry, and what with the milk and eggs they get, one can readily understand that they live in a very comfortable way.

These young Indians have built very good houses, which, with one or two exceptions, are uniform in style. The houses are built of hewed logs, size about 18 x 24 feet, with lean-to kitchens. The main buildings are one and a half storeys high, all covered with shingled roofs, which are usually painted a dark red, and the effect with the whitewashed walls, is very good.

There are a great many good barns on this colony, built of logs, with lofts, and frame roofs, which are, in a number of cases, painted.

There are over forty neat frame granaries, having a capacity of from 1,500 to 3,000 bushels each. It is the intention to have all these granaries painted in the near future.

The buildings on this colony have been placed with care, and they are facing the surveyed roads on the square. The colony is laid out so that there are roads running north and south every half mile, and roads running east and west every mile.

SESSIONAL PAPER No. 27

Up to the present time the Indians have planted about 3 miles of trees, which are now quite a size, and I should like very much to see the work extended.

Three or four years ago the Indians employed a well-borer, who sunk 19 wells in the settlement, and it is from these wells that the Indian farmers get their water. As a rule the old Indian prefers slough water to well water.

Most of the young men of this colony are married to girl graduates of schools, and, in many cases, these young women make good house-wives, although there are a few who require constant supervision. In nearly every house you will find in the sitting-room, clocks, sewing-machines, chairs, tables with covers on, mats on the floor, and often lace curtains on the windows and pictures on the walls. The kitchens are all as well furnished as the average white farmer's kitchen.

It would, perhaps, be interesting to you to follow the progress of some of these graduates, individually.

I shall first take the case of Fred. Deiter, who joined the colony in 1901, and note the advancement made. His first crop was in 1902, which yielded 824 bushels; in 1903, 1,994 bushels; in 1904, 1,275 bushels (this was a very dry season); in 1905, 2,400 bushels; in 1906, 4,076 bushels; in 1907, 1,960 bushels (frozen); in 1908, 2,811 bushels (frozen); in 1909, 8,362 bushels; a total of 23,702 bushels in 8 years, notwithstanding the fact that three of these years were poor ones, and he had only half crops. Deiter has a very fine house, size about 18 x 40 feet, lathed and plastered inside and out, nicely whitewashed, and with painted roof. He has a nice barn, capable of holding 12 head of horses, a full line of farm machinery: 1 binder, 1 seeder, 1 set harrows, 2 wagons, 1 sleigh, 3 ploughs and other small machinery. He owns 8 heavy horses and 2 colts. This man has a good wife and she keeps a very clean house, and looks after a fine vegetable and flower garden. Deiter has 320 acres under cultivation, and intends bringing this up to 350 acres this fall. He has five frame granaries and other small buildings.

Frank Dumont is another young man who has done exceedingly well. His first crop was in 1902, when he had 482 bushels; in 1903, 969 bushels; in 1904, 1,630 bushels; in 1905, 2,540 bushels, in 1906, 3,239 bushels; in 1907, 1,447 bushels (this crop was badly frozen); in 1908, 2,126 bushels (frozen); and in 1909 he had 4,937 bushels; a total of 16,878 since beginning to farm. This young man owns 9 large work horses and 2 colts, which are to-day worth, at a low valuation, \$2,000; he has a full line of farm machinery, including 2 binders, 2 seeders, 2 wagons, and other small machinery. He has a very nice house, neatly painted and whitewashed, a good barn and three frame granaries. He has under cultivation 280 acres. I might add that this young man does not owe a cent, and all he had was earned by his own work, without any financial assistance from the department.

John Bellegarde. This man had his first crop in 1903, which yielded 805 bushels; in 1904, 1,295 bushels; in 1905, 2,175 bushels; in 1906, 2,160 bushels; in 1907, failure owing to frost, 800 bushels; in 1908, 1,525 bushels; and in 1909, 3,081 bushels; total 11,841 bushels. Bellegarde owns a full line of farm machinery, and 9 good horses, which are worth at least \$1,800. He has no debts, has never had financial aid of any kind from the department. His farm is a model of neatness.

Ben. Stonechild started in 1901, and while his advancement has not been as rapid as others, still he has made good progress. His first crop in 1902 yielded 1,019 bus.; 1903, 2,389 bus.; 1904, 1,150 bus.; 1905, 1,925 bus.; 1906, 1,856 bus.; in 1907, crop was frozen and yield reduced to 1,225 bus., in 1908, 1,125 bus., and in 1909, 4,309 bus. Total, 15,000 bushels. This man has fine buildings and owns a full line of farm machinery and four good horses.

J. Ironquill only started to farm four years ago and in that time he has produced 6,675 bushels. He owns a complete line of farm machinery, 10 horses, very fair buildings and will in a few years be very well off. He has 256 acres under cultivation already and will by the end of the season have 300 acres.

1 GEORGE V., A. 1911

I could cite half a dozen cases where the progress has been equally as satisfactory, but sufficient has been said to show what these young Indians are capable of doing in the way of farming.

The foregoing is an account of Indians who have been farming for a very short time. Of course there have been failures, some few doing little better than those Indians who have never been at school, but those who belong to that class are few, I am glad to say, and the proportion of those who have not done well is no greater than it would be among so many white settlers under similar conditions.

The system of putting one-third of the cultivation under summer-fallow every year is carefully followed, and I think if reference were made to the Minister of Agriculture; or the deputy minister, they would repeat what they have said to me of this colony, that the farming is first-class.

There is a thoroughbred Clyde stallion on the colony and at nearly every farm there are to be seen from one to four colts. I might say there are no ponies on the colony.

It was found that one steam threshing outfit could not thresh all the grain at File Hills last year, about 80,000 bushels, so the members of the colony bought a second outfit costing \$3,500, on which they paid \$2,000 last year, and the balance, viz., \$1,500 will be wiped off this fall.

The Minister of Agriculture visits this colony regularly, and has held several institute meetings, which have been well attended.

This colony has had the honour of two visits from His Excellency the Governor General of Canada, who was deeply interested in the work that was going on, and on the occasion of his last visit, 1906, he donated a beautiful shield, which was to be held for annual competition for the best average yield from field of grain 50 acres or more. This has been held by Fred. Deiter, who last year shipped 3 carloads of grain besides selling a great deal by the load.

The colony presents the appearance of a thrifty settlement, with the straight roads, whitewashed houses and painted roofs. It is looked upon as a valuable asset to the country in which it is situated.

THE REPORT OF REV. R. ASHTON, PRINCIPAL OF THE MOHAWK INSTITUTE, BRANTFORD, ONT., FOR THE YEAR ENDED MARCH 31, 1910.

The Mohawk Institute was established by the 'Company for the Propagation of the Gospel in New England and parts adjacent thereto'; established 1649; chartered 1661; called briefly the 'New England Company' in the year 1831.

Location.—The school is situated in the township of Brantford, about 1½ miles from the market square of the city of Brantford.

Land.—The land comprises 380 acres, as follows: lot No. 5, Eagle's Nest, township of Brantford, 10 acres; Crown grant—on this are the buildings, and 194 acres by license of occupation; Mohawk Glebe lot, city, 176 acres.

Buildings.—The building is in the form of a letter 'H,' built of red brick, with cut-stone basement; roofed with shingles laid on asbestos paper. The main building is 70 x 42 feet, and has two wings, 60 x 36½ feet each. The building is two stories high, with basement and attic.

The Main Building.—In the basement are the stores, including insulated cold store, officers' dining-rooms, boiler-room, girls' clothing rooms and lavatory. On the first floor are offices, sewing-room, and female officers' rooms. The second floor contains the superintendent's residence and two sick-rooms

SESSIONAL PAPER No. 27

North Wing.—In the basement are the dining-halls and kitchen on the first floor, class-room, master's room and farm men's rooms; on the second floor is the boys' dormitory.

South Wing.—The basement comprises the girls' play-room, boot-room, and flush water-closets. On the first floor is the class and assembly room; the second floor is the girls' dormitory; on the third floor a large dormitory has been finished to accommodate 16 beds. Each dormitory has an iron fire-escape and door opening into the main building.

Other Buildings.—Boys' play-house, 74 x 20 feet, 2½ stories; laundry, 30 x 20.3 feet, 2 stories; dairy, 18 x 13 feet; a small hospital; barn and cow stables, 97 x 35 feet; silo (cement), 30 x 16 feet; hog-pens, 72 x 30 feet and 60 x 13.4 feet; horse and cattle stables, 82.8 x 22.5 feet, with room for 16 horses and 16 cattle; carpenter's shop; implement-house, drive-house, wagon-shed, poultry-house, 2 greenhouses, ice-house, and a cement frost-proof fruit-house.

Accommodation.—Accommodation is provided for 120 pupils and a staff of 12, including 3 farm-hands and a gardener.

Attendance.—The returns for the quarter ending March 31 show 124 pupils, classified as follows:—

		Pupils.
Standard	I.	12
"	II.	10
"	III.	14
"	IV.	35
"	V.	22
"	VI.	31

The average attendance for the year was 121.

Class-room Work.—This covers the full course prescribed by the department and the first year of high school work. Two pupils passed the entrance examination—Mary Latham and Frances Bartram; the former is continuing her studies at the Collegiate Institute. Susanna Latham completed her course at the Collegiate, passing her examination for a 2nd class certificate; she has been appointed assistant teacher here.

The school hours are from 8.30 to 12 a.m., and from 1.30 to 4 p.m. in summer; and in winter from 8.45 to 12 a.m., and from 1.30 to 4 p.m., and from 7 to 8 p.m.

All pupils in standards IV, V, VI have private study from 8.30 to 9.30 p.m.

Pupils from two divisions, 'A' and 'B'; one week 'A' division attends school in the morning and 'B' division in the afternoon; the next week the order is reversed.

The pupils in standards I and II are in school full time throughout the year.

Farm and Garden.—The work of this department was satisfactory. Cash sales, \$3,888.84, and supplies to the institution, \$1,427.34.

Industries Taught: Boys Work.—Farming, gardening and the care of green-houses form the principal occupations of the boys, and include the management of a dairy of over 35 cows, and the raising of pigs, also the cultivation of plants and flowers for market.

Girl's Work.—The girls are trained for domestic work, including sewing, knitting, dressmaking, cooking, baking, laundrying and butter-making. They make all their own clothes, also those of the boys, with the exception of the best tweed uniform, an issue of which is purchased every other year.

Moral and Religious Training.—Morning and evening prayers are conducted for the whole school daily, and divine service at His Majesty's chapel of the Mohawks at 11 a.m. on Sundays. Religious instruction is given daily in the schools and on Sunday from 9 to 10 a.m., 2.30 to 3.30 p.m., and 7 to 8 p.m.

1 GEORGE V., A. 1911

The boys are organized into a cadet corps, No. 161, for which the Militia Department has supplied arms.

The boys are divided into four sections, under senior boys, who are responsible for the cleanliness and order of their respective sections. Four section monitresses exercise similar supervision over the girls.

Health and Sanitation.—The health of the pupils has been excellent, no serious sickness of any kind; we had, however, to discharge one girl with sore eyes, and three with scrofulous glands.

The sanitation is good, the drainage being connected with the city sewers.

Water Supply.—The water-supply is from the city waterworks.

Fire Protection.—The fire-protection has been installed in connection with the fire department of the city; 4 hydrants with supply of hose, 2 stand pipes with hose connections on all floors, 4 chemical fire-extinguishers, and 2 dozen blaze-killer tubes, placed in the various buildings, axes and extension ladders. A new branch fire-hall has been erected in the immediate neighbourhood, towards which we contribute \$60 a year.

Heating and Lighting.—Both wings occupied by pupils have coal and gas furnaces of large capacity, estimated to change the air in school-rooms and dormitories every hour. The main building is heated with hot water, the sewing-room having a radiator constantly supplied with fresh air from the outside. The kitchen, laundry and dairy use only natural gas.

All buildings, including horse and cow stables, are lighted by electricity.

Recreation.—The recreation hours are 1 hour at noon, 2 hours in the evening in summer, and 1 hour in the winter, and for school divisions throughout the year from 4 to 5 p.m. Also one half holiday each week.

There is no school from July 16 to August 21. During this time the teachers take their vacation; each pupil has half a day holiday, and the industrial work of the institution goes on as usual.

The boys are furnished in their playgrounds with swings and horizontal bars. They have a field where they play lacrosse, baseball and football; they also have a bugle band, in which they are much interested, and both girls and boys have good toboggan slides. The girls are provided with swings, footballs, croquet, skipping ropes, balls, &c. Those who prefer to read are furnished with magazines and books from the school library.

Ex-pupils.—Thirty-one pupils left during the year, 20 being girls. One, with a second-class certificate, has become teacher of the junior department here; 2 are attending the business college in the city; 1 is taking lessons in a dressmaking establishment; Ida Maracle was discharged by the department and given to a woman who promised to send her to school; 1 married, 1 died, 1 is required at home, there being a large family. With the exception of the scrofulous children, all are in good situations as domestic servants, earning from \$9 to \$15 a month. The girls trained here are in great demand.

Of the 11 boys, 1, who passed his entrance examination here, is continuing his studies at Carlisle institution and working as a printer; another is typewriter and timekeeper for a contractor at Waterdown, N.Y., earning \$60 a month; 1 who had passed his entrance and studied stenography, works in the office of a factory in the city. The remainder, with one exception who has not been heard from, are working as farm-hands.

SESSIONAL PAPER No. 27

THE REPORT OF REV. S. R. McVITTY, PRINCIPAL OF THE MOUNT ELGIN INSTITUTE, MUNCEY, ONT., FOR THE YEAR ENDED MARCH 31, 1910.

Location.—This school is pleasantly situated on the west bank of the Thames river, in the township of Caradoc, county of Middlesex, province of Ontario, and about 15 miles northwest of the city of St. Thomas.

Land.—The farm connected with the school contains 225 acres, forming part of the Chippewa reservation, Caradoc township, and is well suited for institute purposes.

Buildings.—The main building was erected in 1895 and has four stories of brick on a stone foundation. It contains office, principal's residence, officers' rooms, chapel, sewing-room, dining-rooms, dormitories, kitchen, girls' play-room and store-rooms.

All rooms are large and well lighted. The old building, situated about 100 feet to the east, furnishes dwellings for the two officers and their families, two school-rooms, a four-cot hospital and a dairy cellar. The laundry is a brick building with a vegetable cellar in the basement.

The boys' lavatory and gymnasium were burned November 20, 1907, and have not been rebuilt.

The outbuildings comprise: carpenter shop, implement shed, carriage shed, poultry house, sheep pen, pig pens, cow stable, horse stable, stocker barn, and large grain barn, all on brick or cement foundations.

Accommodation.—The main building furnishes room for about 100 pupils and a staff of eight officers. Separate residences are supplied for four officers and their families.

Attendance.—The number of pupils authorized by the department for the institute is 100, and the average attendance is 101.

Class-room Work.—The half day system is followed in case of senior pupils. One week division I is in school in forenoon and division II in the afternoon; the following week the order is reversed.

Division III, composed of about 50 junior pupils, is in school full time. Hours: 9 a.m. to 11.45 a.m., and from 1 to 3.30 p.m. The authorized course of study is followed, and the results are quite satisfactory. The pupils are graded as follows:—

Standard	Pupils.
I.	22
“ II.	29
“ III.	30
“ IV.	17
“ V.	9

Farm and Garden.—We harvested during the year 30 acres of wheat, 90 acres of oats, 60 acres of corn, 2 acres of buckwheat, 3 acres of potatoes, 6 acres roots, and in the garden all vegetables necessary for our own use.

Industrial Work.—The boys are carefully instructed in all branches of agricultural work, including care and management of horses, cows, pigs, poultry and bees; also carpentering, fencing and cement work. The girls are taught housekeeping, baking, cooking, laundry and dairy work, also cutting and making of garments, quilting, knitting and fancy needlework.

Moral and Religious Training.—A morning and evening worship, including the reading of the scripture, is observed daily. On Sabbath morning the pupils, in charge

1 GEORGE V., A. 1911

of a lady and gentleman officer, attend divine worship at the Colborne church on the Muncey Mission. Sabbath school is conducted under the superintendence of the principal, in the chapel of the institute, each Sabbath afternoon. The school is divided into three classes. Each member of the staff is connected with some branch of the Christian Church, and all are seeking by precept and example to teach the principles of the Christian religion.

Health and Sanitation.—The health of the pupils and staff has been splendid. We have not found it necessary to call a physician during the year. We attribute this largely to an abundance of good food, fresh air, and plenty of outdoor exercise. One boy received treatment at the General hospital, London, for weak eyes. The building is kept clean. The plumbing and ventilation are in a satisfactory condition.

Water Supply.—An abundant supply of good spring water is furnished by hydraulic pumps; being forced to tanks in upper attic, from which it is piped to all parts of the building.

Fire Protection.—There are two large water tanks situated in the main attic. Pipes convey the water from these tanks to 18 hose, distributed throughout the building. A diamond fire-extinguisher, an axe and two water pails are placed in each of the main halls.

Heating and Lighting.—Three coal furnaces and a hot-water system furnish heat to the main building and school-rooms. Oil lamps, mostly in hangers, furnish light throughout the building.

Recreation.—In winter, outdoor walking, skating, tobogganing and sleigh-riding. Indoor, fort, crokinole, checkers, bean-bags, and other parlour games are provided. In summer, swinging, basket and baseball, also hunting and fishing, in season.

Ex-pupils.—Two pupils were discharged at the request of their parents and are living at home. Four graduated from the school during the year. One of these is studying shorthand and book-keeping, another is receiving three dollars a week as a domestic; the third, four dollars a week as cook in a private home; and the fourth, a salary of \$300 per annum teaching school.

All four are a credit to the institution and their future is full of promise.

General Remarks.—During the year some necessary repairs have been done to the outbuildings, and a new poultry-house is at present in course of erection. It will provide accommodation for 200 fowls, and will be one of the most up-to-date in the country.

We are also installing a small steam plant in our laundry, and hope in this way to lighten the labour in this department, whilst we retain a number of tubs, which afford ample opportunity for training the girls in domestic laundry work.

The conduct of the pupils, with one or two exceptions, has been excellent; their interest in the different departments of work, is growing. Punishment is our 'strange work,' and the atmosphere of the place is home-like.

The officers are efficient and faithful in their work, and seeking to promote the best interests of the school.

THE REPORT OF REV. BENJAMIN P. FULLER, PRINCIPAL OF THE
SHINGWAUK HOME, SAULT STE. MARIE, ONT., FOR THE YEAR
ENDED MARCH 31, 1910.

Location.—The Shingwauk and Wawanosh homes are situated on the north bank of the St. Mary's river, one and a half miles east of the business portion, yet within the town limits of Sault Ste. Marie, in the province of Ontario.

SESSIONAL PAPER No. 27

Land.—The area of land in connection therewith is 93 acres, comprising park lots 1 and 2, in Tarentorus township, which was acquired by purchase by the Church of England authorities. The property is held in trust by His Lordship the Bishop of Algoma. Originally forest, the land is now nearly all cleared. Some has gone back to a growth of timber, but by clearing and draining, the same land will become valuable as farm-land, and by a system of intensive farming will become most beautiful and profitable.

Buildings.—The buildings are beautifully situated fronting the river, and consist of:—

1. The Shingwauk and Wawanosh homes: main block, 185 x 137 feet, with various wings, and principal's residence adjoining, in which are the offices of the institution, kitchens, visitors' entrance, staff-room, furnace-rooms, lavatories and dormitories.

2. A little to the east in line with the main block is a large two-story frame building, 60 x 30 feet, the ground floor of which is used as a drill-hall and play-room for the boys. On the upper floor is a large senior school-room.

3. A little to the front of this building stands a most beautiful chapel, the Bishop Fauquier Memorial Chapel, erected in 1882, with funds subscribed by anonymous friends in England and Canada as a tangible, enduring and useful memorial to Algoma's first revered bishop.

4. Hospital with attendant's cottage adjoining.

5. Farmer's cottage, 20 x 20 feet, with laundry building adjoining, 20 x 40 feet.

6. Carpenter's cottage.

7. The factory, where is a gasoline engine and machines for doing carpenter work, a sawing-machine for cutting fire-wood for the institution.

8. Good horse stable, barn and cow stable.

Accommodation.—There is accommodation for 100 pupils, *i.e.*, 60 boys and 40 girls, and 12 members of staff.

Attendance.—The number of pupils enrolled at the beginning of our term of office, September 1, was 37, namely, 26 boys and 11 girls; 2 boys have been admitted and 1 girl; 1 boy discharged; 2 girls are in the Free Hospital for consumptives, who were there when we came. We have had no serious illness, and only 1 or 2 show any sign of tuberculosis, and to these particular attention is given in regard to food and sleep.

Class-room Work.—The school is taught in two divisions, by one teacher in one large school room. The curriculum adopted is similar to that of the public schools in Ontario. The hours of attendance are from 8.30 to 12 noon, and 1.30 to 5 p.m., with 15 minutes, and a portion of the evenings are taken up in instruction and music.

Very good progress was made in the last part of the term, and 9 boys and 3 girls were promoted into higher classes. The present standing is as follows:—

Standard	I.	11
"	II.	7
"	III.	7
"	IV.	8

Industries.—The boys are taught building-repair and carpentry work, farming and gardening; also draining and clearing land.

Girls are taught sewing, laundry and domestic work. All the general work of the institution is performed by the pupils.

Carpentry.—In the factory, which is a two-story frame building and contains one 12 h.p. gasoline engine, and some useful tools. The boys have done some work such as repairing articles of furniture, making sleigh, sleigh-box, ladder, &c.; also re-shingling part of home roof.

1 GEORGE V., A. 1911

Shoe-repairing.—One of the office-rooms has been fitted up as a shoe-repair shop, and one of the boys, who is lame, has become proficient in the art of repairing shoes, thus effecting a great saving in the outlay for shoes.

The Farm.—This being our first season we cannot report on what can be done. Last season being generally a poor one, the land produced but little hay and only some 45 bags of potatoes.

It would seem that little or no system has been exercised on the land in regard to cultivation, and so the hay-land is entirely run out, and covered with water in many places.

We are, with the help of the Home boys and a man as farmer to guide them, now busy draining the land, moving what seems to be two or three years' stable manure.

Forty loads of manure were procured from the dairy situated about 1½ miles east of the homes, and hauled home and put out on the field.

We are just now reclaiming about 10 acres of good land by ditching and pulling small growth of timber (useless timber).

By the close of seeding-time we hope to have 20 acres seeded, and the remainder of meadow-land has a good spreading of manure.

Having very little hay and no roots to feed the stock, one old horse was disposed of and other stock sold, realizing \$382.

Moral and Religious Training.—The religious training is that of the Church of England.

Pupils and staff attend service in the Shingwauk Memorial chapel every Sunday afternoon at 3.30. Prayers are conducted in the school-room morning and evening daily, and Sunday school Sunday morning at 10.30.

Punishment is administered only after fair warning, or for repeated disobedience.

Health and Sanitation.—The sanitary condition of the school is good. Care and precaution are exercised. Everything is kept properly clean, this being quite possible and easy on account of having city water.

Water.—Water is supplied through a private 3-inch galvanized iron pipe connected with the city water mains.

Fire Protection.—Our main protection lies in a 3-inch pipe connected with the city water-works, to which 2-inch hydrants, placed inside and outside of the main building, have connection, as well as 2 fire-tanks on the upper flats, having a combined capacity of 1,925 gallons, and which are kept filled in case of emergency. A pressure of 50 pounds is maintained at the school.

The main building is also supplied with fireman's axes, and water pails are kept always handy.

Heating.—The main building is heated throughout by a hot-water system. All detached buildings, including the chapel, are heated by stoves.

Lighting.—Coal-oil lamps are used for lighting, and every possible care exercised in the using of them.

Recreation.—The principal forms of recreation are football and basketball, but there are many other games more quiet, and some that can be played indoors.

Music.—Twice each week an evening after prayers is taken up in singing, either by the boys alone or by the girls alone. There is an organ in the school-room, and the whole school sing at evening prayers.

Ex-pupils.—Only one boy has been discharged in our term so far, and a situation was secured for him in Ottawa, and when last heard from he was progressing nicely. Occasionally an ex-pupil will call to see us, but they are always those who have been away from the Home for some years; and on inquiring we find some of them are doing very well, indeed, and conduct themselves in a very respectable manner.

General Remarks.—Under the present order of management we find that having placed each boy or girl on their own honour, and letting them see that they are trusted,

SESSIONAL PAPER No. 27

is having the desired effect. Scholars are shown that the time spent in the homes is of great value to them, that the homes are for them and that they must care for them, and now already we have been rewarded by finding that some are beginning to form some idea of the object of all that is being done for them both by the Department of Indian Affairs and also by the many friends of the homes.

Some of the older boys have lately expressed the desire to take up some special course of study in connection with their school work.

THE REPORT OF REV. CHAS. BELANGER, S.J., PRINCIPAL OF THE INDUSTRIAL SCHOOL, WIKWEMIKONG, ONT., FOR THE YEAR ENDED MARCH 31, 1910.

Location.—The Wikwemikong industrial school is situated on the unceded portion of Manitoulin island, 10 miles north of the Manitowaning agency, in the village of Wikwemikong, on the west shore of Smith bay.

Land.—The land comprises about 200 acres, 80 of which are under cultivation, the rest being used as pasture. This land was granted by the Indians for the use of the missionaries, and is held in trust by them for the combined purposes of the mission and the school.

Buildings.—The boys and girls are accommodated in two separate institutions, about 200 yards apart, which are managed by two separate staffs, under the supervision of the principal.

The boys have their study and class-rooms, wardrobe and play-hall in a two-story frame building, 50 x 90 feet.

The sick ward, the kitchen and the dormitory are in the missionaries' residence, a three-story stone building, 112 x 90 feet, where also the staff has its quarters.

The refectory, the bakery and the shoemaker shop are located in an old mission stone building, 43 x 33 feet, connected with the main building by a passageway.

The girls and their staff are housed in two three-story frame buildings connected by a passageway, which are 132 x 46 feet, respectively, and situated farther up the hill. Their class-rooms, recreation hall and dormitory are spacious and airy.

A few yards to the southwest stands a two-story frame structure, 40 x 50 feet, used for a wash-room and its various appurtenances, also for a store-room, bakery, &c.

Towards the shore of the bay are located the blacksmith and paint shops, combined in one building.

Closer to the shore is a little saw and planing mill, and the carpenter shop.

There are yet to be mentioned, in connection with the farm, three barns, one 80 x 40 feet, another 110 x 40 feet, and a third 75 x 35 feet. Each barn has a spacious stable in its basement. Mention should also be made of piggeries, henneries, sheds for agricultural implements and various vehicles, woodsheds and ice-house.

Accommodation.—There is ample room to accommodate 90 boys and 70 girls, with their respective staffs.

Attendance.—The boys were 71 in number, with 2 teachers and 13 different officers; the girls were 66 with 2 teachers and 11 officers. The day-pupils are not comprised in these figures.

Class-room Work.—This is governed by the official programme of studies for Indian schools. The time appointed for it is from 9 to 11.45 a.m., and from 1.30 to 4 p.m., with short recess in the middle of each session. Besides, the boys have one hour and a quarter for study every day; on Saturdays they have twice as much; on

1 GEORGE V., A. 1911

Sundays they have exactly 2 hours. A library is attached to the institution; supplementary reading is fostered, so is letter-writing. The girls devote one hour to study every day.

The pupils are divided into four sections, two for the boys and two for the girls, and are under the tuition of four different teachers; the pupils of the lower grades being taught in the same room in connection with the day-pupils.

The pupils are graded as follows:—

Standard		Pupils.
I.	42
“	II.	34
“	III.	20
“	IV.	21
“	V.	19
“	VI.	1

Farm and Garden.—Farming being eventually the common occupation of our children when they return home, the boys of the institution are habitually spending some time at this work, even the smallest; every one, of course, according to his capacity.

Industries Taught.—The most common industry of the larger boys is farming; some others are taught carpentry; three are learning shoemaking.

Besides this special training, all the pupils are employed about two hours daily each, according to sex and ability, at various kinds of labour, such as sweeping, scrubbing, sawing and splitting fire-wood, dairying, gardening, feeding stock, helping in the kitchen and on the farm. The laundry work is done at the girls' school with the help of Indian women. The more advanced girls receive special training in sewing by hand and machine, dressmaking, knitting and cooking. The pupils generally take well to these kinds of labour. The girls in particular show that they appreciate the zeal of their teachers; for, after they have left school, the village girls still come regularly once a week to receive lessons in fancy sewing, crocheting, &c.

Moral and Religious Training.—The main object of this institution being the forming of religious men fit for the everlasting ends of our existence, the pupils are taught not to dissociate their studies and their manual labours from religious views. Every day, therefore, there is the memorizing of some lesson of catechism or of Bible history; and several times a week explanations are given, adapted to the capacity of the different classes. The pupils attend all the religious services of the parish church. On Sunday evenings, the senior boys and girls are called upon to write a report of the sermon preached that day.

No corporal chastisement is administered, save in cases of gross insubordination or misbehaviour.

Health and Sanitation.—The sanitary condition of the school is good, I think. We improve it every year. Thus we gradually replace the old soft-wood flooring by hardwood, in order to substitute the damp mop for the broom.

The general health of the pupils has been good, save three cases of pneumonia which (three) terminated by a rapid and perfect recovery. Two died, one boy and one girl, the former having been ill for years.

The sanitary conditions are good, the rooms are well ventilated, and every care is taken as to cleanliness.

As long as the weather permits, the pupils bathe frequently in the bay; and, during the summer heat, daily. The boys' dormitory is supplied with a bath-room.

Water Supply.—A windmill, and a tank holding 15,000 gallons, supply excellent water from the bay for all purposes, galvanized-iron pipes conducting it to all parts of the institution.

Fire Protection.—Hydrants in connection with the tank and supplied with 2-inch hose on every floor of the main buildings, constitute our main protection against fire,

SESSIONAL PAPER No. 27

besides some fire-extinguishers, fireman's axes and buckets. Both schools are supplied with an excellent fire-escape.

Heating and Lighting.—The boys' school is heated by box-stoves and is kept comfortable. The other buildings are heated by hot-water apparatus. Light is furnished by acetylene. The boys' play-yard, though, is lighted in winter by a 1,000 candle-power lamp (Pitner system).

Recreation.—Two hours daily, besides Saturday afternoons, are given exclusively to recreation. The first Tuesday of each month is a free day for every boy who has given satisfaction throughout the month. The first Wednesday is for the girls. Both schools have playgrounds furnished with suitable games and gymnastic appliances, and play-halls for bad weather and evening recreation in winter. The boys' playground is divided into two parts, one of which is reserved for the small boys and the other for the senior boys.

General Remarks.—I may say confidently that the school is contributing largely to the elevation of the moral tone, and development of habits of thrift and industry, the enlightenment of the mind generally, and the improvement of physique among our Indians. Our present pupils appreciate more their training and rise to a higher level than our former ones. They take more interest in reading, and develop to a certain extent an intellectual life. A few of our former Iroquois boys have gone to college in Quebec, and a few of our present boys intend doing the same thing upon leaving school. Another proof of the gradual improvement over their predecessors is the fact of their being fonder of study; some will earnestly ask for more time for study.

The pupils are taught vocal music and reformed Gregorian chant, to the double benefit of voice and taste.

THE REPORT OF THE REV. ERNEST O. DUKE, PRINCIPAL OF THE BOARDING SCHOOL, MOOSE FORT, JAMES BAY, ONT., FOR THE YEAR ENDED MARCH 31, 1910.

Location.—The Bishop's school is situated on Moose island, a very short distance from the bank of the great Moose river, which joins the salt water of the bay 9 miles from this place. The school is located on land leased from the Hudson's Bay Company, and is in the unorganized district of Algoma.

The school is designated by the name of 'The Bishop's School.' The post office address is 'Moose Factory, James Bay, Ont., via Cochrane.'

Land.—In area our land embraces ten acres. The soil is of a sandy loam texture, well suited for potato-growing, also for hay. The season here is too short to mature grain crops.

The land is almost all cleared, and was, as already said, obtained by lease from the Hudson's Bay Company.

Buildings.—Under this heading we would mention first the boarding school, a fine large building erected as the Bishop's residence, but since converted into a boarding school. There are ten rooms in the building, besides a fine large attic which has not as yet been fitted up for use.

The next building worthy of note is the day school, situated a few rods from the door of the Bishop's boarding school. This is a fine large building capable of accommodating sixty children or more.

In addition there are the necessary outbuildings, woodshed, lavatories, store-room, stable, and also a wash-house.

1 GEORGE V., A. 1911

Accommodation.—Under the present condition we should not be justified in taking in more than twenty-five children, and at the same time provide accommodation for the staff of the school.

Attendance.—

Quarter.	No. of Pupils. Enrolled.	No. of Days in Quarter.	Aggregate Attendance
1st.	25	91	1,825
2nd.	17	92	914
3rd.	18	92	1,635
4th.	19	90	1,527
Total aggregate.			5,901

Average attendance per day, 16.16.

Class-room Work.—The children in the boarding school receive tuition in the English day school. Here the work has been very satisfactory indeed. The children advance rapidly, and as this is the second year I have taught here, I can readily see the rapid progress the children as a whole have made. Six beginners are in standard I, while the remainder, who began one year ago last October, are well advanced in standard II, and by the close of the present quarter each pupil will be promoted to standard III. I find that under the methods used in teaching these children acquire knowledge just as readily as the white children of the outside world, and as I have taught in the public schools of Canada five years, I have some knowledge of the advance in the white schools. I have had them pass the entrance examination to the high school at twelve years of age in the outside, and I believe some of our pupils here would acquire knowledge just as rapidly. For instance, one girl, Elizabeth Chens, by name, of Cree parents, came to us last fall, she knew no letters, nor numbers. To-day, seven months later, she is reading in Part II reader, can add quickly and accurately, and read numbers as high as the millions, and also write in Roman numerals any number that can be so written.

Farm and Garden.—The seasons are rather short here to make farming and gardening profitable. At present we grow sufficient potatoes for ourselves, but beyond the potato crop, with a few early vegetables, we cannot count on obtaining much results from farm or garden. The boys are trained to cut wood and assist with garden and potato crop.

Industries Taught.—The boys are instructed in all outside work pertaining to the farm and garden, while the girls are taught household work.

Moral and Religious Training.—The children are instructed for one-half hour each day upon lessons from the Bible. They attend at least two church services each Sunday, one in their own tongue, the Cree, and one in English, receiving instruction also, each Sunday, in the Sunday school. Prayers are held in the house each morning and evening with reading of the scripture. At all times the children are taught lessons in truthfulness, purity, sobriety, industry, and all other virtues. And all the encouragement that can be given to inculcate these virtues in the lives of these children, is given.

Health and Sanitation.—Last year we had no sickness in our Home. This year we have to report three deaths, and two others of our children have gone to their parents sick, and they are not expected to get better. Tuberculosis, that dread disease, was the sickness that infested the Home. We have no medical doctor here; and so were thrust entirely upon our own resources. All we could do was done. The rooms were kept spotlessly clean and disinfectants were used, care being taken like wise with the outhouses and surroundings.

Water Supply.—All the water used in the school is carried in buckets from the river.

SESSIONAL PAPER No. 27

Fire Protection.—Two ladders extend from the roof, one at each side of the building. There are also two stairways leading from the second story—one at the front and the other at the back. Buckets, and water in barrels, are always on hand, ready for use.

Heating and Lighting.—The school throughout is heated by three wood-stoves and lighted by coal-oil lamps.

Recreation.—The Cree children, like children the world over, are very fond of play. The boys delight especially to shoot birds with the bows and arrows provided by their fathers, or manufactured by themselves. Every boy has a bow and arrow, and their aim is true, so many a poor little bird is carried home in triumph 'after the hunt.' Football, skating, running, jumping, and fishing are their chief delights.

THE REPORT OF REV. P. R. SOANES, PRINCIPAL OF THE BOARDING SCHOOL, CHAPLEAU, ONT., FOR THE YEAR ENDED MARCH 31, 1910.

Location.—The school is situated on lot 2, section 6, township of Chapleau, about half a mile from the town, and separated from it by a wide river. It lies midway between the Ojibeway and Cree reserves.

Land.—There are 150 acres in connection with the school, most of which is rocky or muskeg and only useful for pasture. About 15 acres are cleared and under cultivation for farm and garden, in which are grown sufficient vegetables for the children.

Buildings.—There are two main buildings, the large building used for dining-room, kitchen and dormitories, the other as a school-house for teaching, drilling and recreation on stormy days. The latter was fitted up last fall in order to accommodate the extra number of pupils. It is 22 x 44 feet, with a 10-foot ceiling, making an ideal class-room, well lighted and ventilated.

Accommodation.—We have only accommodation for 26 scholars and three of a staff. We could have 75 pupils if there were room for them, as some applicants had to be refused last year.

Attendance.—There were 21 scholars at the beginning of the term, but since the first of the year there have been 26.

Class-room Work.—All the pupils are in their first or second year at school, having come to us with no knowledge of English. They are, therefore, all in the first standard. They are taught English, general knowledge, writing, arithmetic, ethics, reading, recitation, singing, drills, and religious instruction.

Farm and Garden.—There was a good crop of hay and oats last year, and there was an abundance of potatoes and other vegetables.

Industries.—The boys are taught to saw and split wood, and everything pertaining to garden. The girls are taught all kinds of housework. They are also taught needlework and the science of cooking.

Moral and Religious Training.—The children have learnt the Lord's Prayer, the Apostles' Creed, the General Confession, the twenty-third Psalm, the first six Commandments, several texts and hymns. They attend the church services in town on Sundays as well as their own morning and evening prayers. The first half hour of each day is used for religious instruction.

Health and Sanitation.—The past year has been one of exceptionally good health. There was an outbreak of chicken-pox in the winter, but otherwise all have been very well. We are very grateful to the department for the supply of drugs just received.

Water Supply.—Last fall we were able to furnish our first supply of pure water in abundance on the grounds. It is some distance from the house, but is very pure. With little expense the town water could be brought across, which is really needed for fire-protection also.

Heating and Lighting.—The main building is heated with wood stoves and the school-house with a coal stove. We are still dependent on oil lamps for lighting, though we are looking forward to having electric light over from the town plant.

Recreation.—The girls enjoy skipping, round games and skating. The boys enjoy bows and arrows, football, tops, sleighing, skating, vaulting and amateur carpentering.

A gymnasium would be a great boon to the boys, and drilling appliances are really needed for boys and girls.

THE REPORT OF THE REV. SISTERS OF ST. JOSEPH ON THE INDIAN ORPHANAGE, FORT WILLIAM, ONT., FOR THE YEAR ENDED MARCH 31, 1910.

Location.—The St. Joseph's boarding school is situated on the northwest corner of Franklin and Arthur streets, facing Franklin street, in the city of Fort William.

Land.—There are 3½ acres of land, which cost \$3,500, and belongs to the school. It is divided into boys' playground, girls' playground, vegetable garden and flower garden. The land produces fine vegetables.

Buildings.—The school is a three-story, solid brick building. Its dimensions are 78 x 40 feet, with an addition at the back of 33 x 22 feet, with an excellent basement and attic. The ground floor contains entrance hall, two class-rooms, boys' and girls' dormitory, community-room, clothes-room and toilet-rooms. On the third floor are girls' work-room, dormitory, clothes-room, rooms for the staff, and toilet-rooms. The attic makes a fine dormitory for boys. In the basement are the boys' play-room, girls' play-room, store-room, bake-room, man's room, laundry, furnace and coal rooms.

Accommodation.—There is ample accommodation for eighty pupils, and a staff of ten.

Attendance.—There are seventy pupils registered. During the year forty were admitted and twenty-six discharged. The attendance is regular, and there has been a marked improvement in general application and proficiency during the year.

Class Work.—The programme of studies prescribed by the department is followed as closely as possible. The subjects taught are religious instruction, drawing, spelling, arithmetic, history and geography, and special care is given to reading and writing. The progress is good and encouraging.

Farm and Garden.—There is no farm in connection with the house. We have a large garden well cultivated, and the boys take great interest in planting the seeds and keeping the garden free from weeds.

Industries Taught.—The girls are trained in domestic work, including baking, cooking, sewing, knitting, darning, dressmaking and laundry work, and under careful supervision have made rapid progress. The boys are taught to keep their charges neat and clean, to help in the garden and to attend to wood and water.

Moral and Religious Training.—The moral and religious training of the children receives special care. Respect for authority and obedience is continually inculcated and insisted upon. A course of religious instruction is given to the whole school each day; apart from this they attend morning and evening prayers in the chapel.

SESSIONAL PAPER No. 27

Health and Sanitation.—We are pleased to report an exceptionally healthy year for the pupils. By dressing the children warmly, giving them plenty of wholesome food and daily outdoor exercise even in the coldest days in winter, we were not troubled with any disease during the year. A skilled infirmarian has with nature's remedies so successfully combatted the tendency to scrofula, so common amongst the Indians, that the children present a remarkably healthy appearance. With this state of improved health we notice an amelioration in the instincts of the children. Ventilation and cleanliness are our chief preventives against disease.

Water Supply.—The building is connected with the city water-supply and thus we are abundantly supplied with water.

Fire Protection.—There is a splendid fire-escape of wrought iron pipe from first to second floor, and from second to ground floor. The pupils are drilled at frequent intervals in speedily vacating the building, day and night. There are one hundred feet of hose in each flat connected with the street water-supply.

Heating and Lighting.—The building is heated throughout by hot water system and lighted by electricity.

Recreation.—Outdoor games are very popular. Long walks in suitable weather are much enjoyed. In summer picnics are given to the delight of the pupils.

Ex-pupils.—One pupil, Antoinette Jaganash, left the school last September to take a place as cook in St. Joseph's hospital, Port Arthur. She is doing well and gets \$20 a month and is giving good satisfaction.

General Remarks.—On Christmas the children were beside themselves with joy on receiving a very entertaining visit from Santa Claus. After two hours of a very pleasant entertainment of hymns, recitations and songs, Santa gave them a most agreeable surprise by appearing in their midst distributing his many simple gifts prepared by their teachers. The children appeared most grateful and happy.

Dr. Bruce Smith made his official visit last May. He said he was well pleased with everything regarding the order and regulations of the orphanage.

THE REPORT OF REV. L. CARRIERE, PRINCIPAL OF THE BOARDING SCHOOL, FORT ALBANY, JAMES BAY, ONT., FOR THE YEAR ENDED MARCH 31, 1910.

Location.—Our school is situated at the mouth of Albany river, about six miles from the sea. There is no Indian reserve nor post office in Albany.

Land.—The school ground belongs to the Hudson's Bay Company. A perpetual grant has been made by that company on condition that the missionaries pay an annual rent.

Buildings.—The school and six other buildings, erected by the missionaries, are also their property.

Accommodation.—There is sufficient room for the 32 pupils that are enrolled; also a staff of five or six members.

Attendance.—The attendance in class is good. Death, sickness and work are the only causes of absence.

Class-room Work.—Pupils of the first year are taught writing, reading, spelling and translation. Those of the second and third year besides those subjects mentioned above, receive instruction in grammar, history and geography.

Farm and Garden.—The climate of the country being so intense, winter so long and summer so short, agriculture is practicable only to a limited extent. A few bags of potatoes are about the only product. The raising of wheat and barley is not known here.

1 GEORGE V., A. 1911

Industries Taught.—Although this is a boarding school and its principal object is the intellectual and moral development, the girls are taught between school hours, sewing, knitting, washing and cooking.

Moral and Religious Training.—A religious lecture is given to them every day; moreover an hour of religious teaching is also given in their own language. During the study hours they take notes in a special copy-book, of this religious instruction; this we think, is the best way of keeping in mind what has been taught. These notes are very handy to them for the instruction of their mother, father, brothers and sisters, when out of the school.

Health and Sanitation.—Indians are naturally weak in constitution. The white people's diet is fatal to them. Fresh fish and game is the only food fit to keep them in good health. Now, it often happens that in our school it is not possible to have these; it follows that sickness and death are often the result. Salted meats, pork, beef, &c., are given to them in abundance; this is what causes scurvy and other diseases. It is very seldom we pass a scholastic year without any death.

Water Supply.—Water is brought into the house with buckets. Other means would surely be more convenient, but it seems impossible to try the use of pumps or other kind of machines. The first reason is that the earth freezes in winter about five or six feet deep; the next one, the ice in spring-time carries everything found on the river and often beyond the banks.

Fire Protection.—Two ladders fixed at each end of the building are the only means for fire-protection.

Heating and Lighting.—Seven stoves, the cooking stove included, constitute the heating system. Notwithstanding the intensely cold climate, the interior of the building is very comfortable.

Lighting is provided by coal-oil lamps and candles. Gas and electricity are unknown in Albany.

Recreation.—About four hours each day are spent in recess. Thursday and Sunday excepted. Boys take their recess outside, playing, cutting wood, bringing it into the school and carrying water from the river. Our idea in giving them work is not for the sake of saving a few dollars, but to form the good habit of working; the Indian is by nature lazy.

The girls go outside about one hour every day. Thursday afternoon is a holiday; they spend it in taking a walk in the woods or canoeing on the river.

General Remarks.—It would be difficult to give a financial statement, as the two houses, school and missionaries' house, have the same purse. Moreover, the work and the expenses which are done for the school would certainly not be paid by the allowance granted by the Indian Department. Three priests, two brothers and five sisters are engaged. Some are teaching, others cut the wood and repair the school; some make the clothing and oversee the children. One teacher out of these receives a salary from the government.

THE REPORT OF MR. A. E. WILSON, PRINCIPAL OF THE INDUSTRIAL SCHOOL, ELKHORN, MAN., FOR THE YEAR ENDED MARCH 31, 1910.

Location.—The building which we have now occupied since September 7, 1899, is situated about a quarter of a mile from the town of Elkhorn and stands in the centre of what was formerly known as the 'Gore'; a level piece of turf some forty-two acres in extent, bounded on the north by the Canadian Pacific railway main line, and on the south by a fence running along the public road allowance. West of this

SESSIONAL PAPER No. 27

and immediately adjoining it lies our farm of about 320 acres, being the southwest quarter of section 4, and the southeast quarter of section 5, township 12, range 28, which contains excellent pasturage and wheat-land, though the latter is rather cut up by sloughs, in addition to which the department purchased 20 acres of good hay-land adjacent to the 'Gore,' all of which is owned by the Dominion government.

Buildings.—These comprise the main building, the principal's residence, the laundry, the gymnasium (the last-named containing the carpenter's shop and the paint shop, together with the band-room), horse and cow stables, root-house, granary, implement shed, boys' and girls' outhouses, coal shed and chicken-house, the last an annex to the east side of the cow shed, together with a stone dairy on the northeast corner of the main building, and a small brick veneer building in the southwest angle of the school. All these buildings are in good repair except as regards external painting, which is much needed, and the whole institution is clean and in good order inside and out.

Accommodation.—There is accommodation for 100 pupils, and a staff of 15.

Attendance.—The attendance was 67 last year, and the average for this year has been 64.

Class-room Work.—Our standard in class-room work is excellent, as was shown by the marking at the annual examinations last June, when the work throughout was even better than last year's results.

Silver medals (one instituted by the late Mrs. Wilson and one presented by myself) were respectively awarded to O. 163, Ida Favell, in standard VI, and to O. 161, Lily Favell, in standard V.

Two pupils, Emily Donald and David Cook, entered for and passed the high school entrance examinations.

The department kindly presented for competition four books, which were awarded to successful pupils as follows, viz.: Emily Donald and Lizzie Favell, in standard VI, and Sophia Lathlin and Walter Blackbird, in standard V.

Under the industrial school system each pupil works half a day in the class-room (the other half-day being devoted to industrial training), the hours running from 9 a.m. to 12, noon, and from 1.30 p.m. till 4. In winter, however, school in the morning begins at 9.30, during which period evening classes are held from 8 till 8.45 in the dining-hall.

Farm and Garden.—Agriculture is the special pursuit for which the Indian is adapted, and particular stress is laid on this part of the industrial training, the pupils being instructed thoroughly and systematically in the whole routine of the farm work.

Our grain crop was fully up to our usual high standard, our wheat going rather over 22 bushels to the acre in a very dry fall, while the full returns were:—

	Bushels.
Wheat.	950
Oats.	1,236
Barley.	196
Potatoes.	500
Turnips.	30
Carrots.	15

Our live stock consists of 1 bull, with 14 cows and 3 heifers, 6 horses and 1 sow with 8 pigs.

Our dairy has kept us supplied with butter and milk throughout the year.

The flower garden was very fine this year, and all exhibits at the various shows took first prizes, without exception.

Moral and Religious Training.—I think that I may say that more attention is paid to this part of our pupils' education than any other, and the results show that

1 GEORGE V., A. 1911

we are not working in vain. The teaching, the examples around them, and the inculcation of high standards of morality, all exercise an influence for good among our children, and while I naturally do not look for perfection, still I feel well satisfied with the general tone of the school. I may add that punishment is of rare occurrence.

Industries Taught.—In addition to that given in farm work, instruction is also given in the carpenter's trade, which covers all the work in this line around the building, including wood-working, painting, plumbing, &c., and the pupils in this department take turns, under supervision, in running the gasoline engine, and also in looking after the acetylene plant and the drainage system.

Several of the larger boys are learning trades in the town with splendid results, in the blacksmith's shop, the printing office and the harness shop.

The smaller boys are fully occupied with the chores around the school, and also work in the smaller gardens and grounds, and keep their own part of the building tidy and clean.

The girls are employed in the main building, the laundry, and the principal's house, and are taught general housework, including cooking, baking, dairying and laundering, and also receive instruction in dressmaking and sewing, all clothing except the boys' working suits and uniforms being made in the latter department.

Health and Sanitation.—Our bill of health has been exceptionally good, though we had unfortunately one death from tuberculosis and a very severe attack of pneumonia, from which, however, the pupils recovered entirely.

In a recent report of the medical officer the statement was made and verified that there has never been a death in this school except from tubercular trouble.

Thorough ventilation, especially at night, is insisted on, and to this, accompanied by a free use of disinfectants together with a careful daily disposal or destruction of garbage must be attributed our immunity from sickness.

Waste liquid matter runs by gravitation into an underground tank, whence it is pumped out and away to a considerable distance on the prairie. Improvements in this latter connection are under consideration by the department.

Water Supply.—We have now seemingly an inexhaustible supply of the finest of water. Our well recently ran almost dry and was promptly dug down 6 feet deeper, and then after considerable boring a new water-supply was tapped, since which the level is practically unaffected by pumping, which is done by a 2 horse power gasoline engine to large tanks in the top storey of the main building.

Fire Protection.—Our fire-appliances consist of a McRobie engine in the basement with an 80-gallon tank supplemented by 2 Babcocks, 5 Stempels and 20 Eclipse dry dust tubes.

Fire-drills are held frequently and intermittent alarms given without intimation. Perfect silence and order are insisted on.

Heating and Lighting.—The building is warmed by a large tubular hot water boiler heated with tamarack wood supplying all floors very efficiently and is lighted by an acetylene gas plant of 100 light capacity, which is also working satisfactorily.

The boiler tubes, however, which have now been in use for some time will need replacing before next winter.

Recreation.—In an institution for Indian children recreation is an especially important feature and is here always encouraged as much as possible consistent with the proper carrying out of the industrial training.

Our football team is one of the best in this part of the country and at hockey and baseball we do almost equally well, while our band keeps up its reputation, its services being in great demand during the summer, though we cannot accept more than a few of the engagements.

For the girls there are handball, tennis and other games, and also skating, for which latter we have our own rink. They also frequently go for walks in summer accompanied by one or more of the ladies on the staff.

SESSIONAL PAPER No. 27

Ex-pupils.—It is a difficult matter to keep track of the ex-pupils after they leave the school, and my experience has been that the most successful way of doing this is by frequently visiting the reserves and I have been unable to do this during the past few years. I should judge, however, from the correspondence and reports I frequently receive that most of the ex-pupils are doing well and are profiting by the training and education received whilst at the school.

Samuel Pratt, an ex-pupil, writing from Stettler, Alta., states that he has made profitable investments in Strathcona, and that he is now foreman of a staff of eight in the printing establishment at the former place. Roderick Cameron, who has been engaged for some time on the staff of a survey party of the Grand Trunk Pacific at Kenora, when last visiting the school, showed a bank book with a substantial balance to his credit, and he spoke in glowing terms of his work. John Cook, who was married to an ex-pupil of this school, is following the trade of carpentering at Selkirk and is doing well and has a comfortable home of his own. John Bunn, Harry Cook, James Stevenson, and others are also following this trade successfully at other points. Alfred Brydges and Josiah Anderson, who learnt blacksmithing, are doing well at this trade, on their respective reserves. Hector Flett is employed with a farmer near Kirkella, where he is giving entire satisfaction. Other pupils are also following this occupation on their respective reserves and are doing well. Charlie Wolf Plume (Blood reserve, Macleod, Alta.) from whom I frequently receive letters, writes encouragingly of the progress he is making and also of the success of other pupils of that district who were formerly at this school. Francis Daniels, Cedar lake, Sask., wrote recently stating that he expected to get a school in that district and that he hoped eventually to enter the ministry.

None of our pupils have as yet joined the colony at File Hills, but there are several here who are well qualified to do so and are desirous of going there.

Nellie Mahpiyaska, an ex-pupils, is married to John Hunter, who is an ex-pupil of the Regina school. They have a large farm of their own on the Pipestone reserve, and are doing exceedingly well. A number of our girls have at various times been employed as domestics in the city of Winnipeg, and I have usually when visiting there managed to see them, and have been gratified with the excellent reports I have always heard.

When visiting the coast, after the death of my wife in July, 1908, I met three of our ex-pupils, Isabella Slater, Abigail Anthony and Sarah Pratt, and was pleased to find that they were all doing well. The two former are married and have comfortable homes of their own, and my two daughters stayed several days with Mrs. Tomlin (formerly Abbey Anthony), and enjoyed her hospitality immensely.

Mrs. White, proprietress of the Balmoral hotel, Victoria, where I was staying, spoke to me about these ex-pupils and said they were a credit to our institution, and that we should justly feel proud of them.

One often hears adverse criticism as to the so-termed useless expense of educating and advancing the Indian race, but no one can deny that education is the keynote of civilization and true citizenship, and none have a better right to this privilege than the wards of our country, whether they take advantage of it in its entirety or not.

General Remarks.—There has been little during the past year that calls for comment.

We had our annual camping out in August in a beautiful location about 14 miles west, when the girls for two and the boys for one week spent a most enjoyable time under the supervision of myself and some of my staff. The weather was ideal, and I really think that nothing could be better for the pupils than such a holiday in the open air.

We had many visitors during the year, amongst others the Honourable David Laird, who, unfortunately, could only spare a day.

1 GEORGE V., A. 1911

On May 23, the Archbishop of Rupert's Land visited Elkhorn and confirmed 45, of whom 14 were from this school. He later paid us a visit and before leaving wrote as follows in our visitors' register:—

'I have never seen as fine a class of children in the school. I confirmed 14 of the pupils yesterday in St. Mark's Church. They were among the brightest and most devout of the candidates. This school continues to do a most useful work and has my most cordial support and sympathy.'

We also had visits from Rev. Canon Murray, of Winnipeg; Rev. Rural Dean Reeve, of Brandon, and from Mr. Puttee, ex-M.P., Winnipeg, who also placed themselves on record in equally favourable terms.

THE REPORT OF REV. T. FERRIER, PRINCIPAL OF THE INDUSTRIAL SCHOOL, BRANDON, MAN., FOR THE YEAR ENDED MARCH 31, 1910.

Location.—The school, which is not on a reservation, is very beautifully situated about 3 miles northwest of the city of Brandon, about the centre of the hill that once formed the north bank of the Assiniboine river. It commands a fine view of the valley, the experimental farm, Brandon city, and the country lying to the south.

Land.—The farm connected with the school contains 320 acres of land, being the east half of section 28, township 10, range 19. About 240 acres lie in the valley, and is most excellent land for agriculture and gardening. That portion of the hillside is used for the buildings, playgrounds and pasture.

Buildings.—The main building, with 97 feet frontage, brick-veneered, originally T-shaped, is 3 stories high, with basement, and with a two-story addition extending to the west across the rear. It contains offices, officers' rooms, dormitories, school-rooms, dining-rooms, sewing-room, kitchen, laundry, play-rooms, store-rooms, sick-room, &c. The other buildings are, residences for the principal, assistant principal and farmer, barn, stables, piggery, hennery, carpenter's shop, ice-house, and 2 root-houses. One of the root-houses has been lengthened by 15 feet and steel and concrete roof put on it, and a cement floor laid on, giving splendid accommodation for potatoes and vegetables of all kinds.

Accommodation.—There is accommodation for 125 pupils and staff.

Attendance.—The average attendance for the year has been 97.

Class-room Work.—The half-day system is followed, except in the case of some of the smaller pupils, who usually attend all day, especially during winter. The authorized programme of studies is followed, and the results in this department have been very satisfactory. The pupils are graded as follows:—

		Boys.	Girls.	Total.
Standard	I.	17	17	34
"	II.	1	14	15
"	III.	3	6	9
"	IV.	12	12	24
"	V.	7	2	9
"	VI.	11	5	16
		—	—	—
	Total.	51	56	107

Farm and Garden.—Special attention is given to these two departments, which are in charge of competent instructors, as we believe that the Indian of the future must make his living from the soil and stock-raising. We have about 170 acres under crop, as follows: wheat, 30 acres; oats, 40 acres; barley, 15 acres; potatoes.

SESSIONAL PAPER No. 27

10½ acres; fruit, 2¾ acres; hay, 25 acres; the remainder in corn and root-crops. The piggery and hennery have yielded splendid results, and by introducing Holsteins into our herd we have increased the output of the dairy, which produced in the 12 months 1,600 pounds of butter.

Industries Taught.—The boys are taught farming and gardening, care of stock and poultry, carpenter work, and the other duties required to keep the institution in good repair. The girls are taught cooking, laundry work, dairy work, sewing, and general housework. Thoroughness is required in every department; quality being aimed at rather than quantity.

Moral and Religious Training.—Sabbath morning the boys, and many of the girls, attend divine service in the city of Brandon. Sabbath school is held every Sunday afternoon, the classes being taken by members of the staff. A preaching service is conducted every Sunday evening in the institute, prayer service every morning and evening during the week.

Health and Sanitation.—The health of the children has been remarkably good. A trained nurse has been in the building for the whole of the year attending to the light ailments common to children. There has been no serious case of sickness, and no death. The building is kept scrupulously clean in every part; the ventilation and plumbing are excellent.

Water Supply.—This consists of good spring water from a well in the hillside, pumped by a windmill into a large tank at the top of the building, and conveyed by pipes to all parts of the institution. This supply is supplemented by another well which is pumped by electric power.

Fire Protection.—A large McRobie engine is installed, with sufficient hose on each flat to reach any part of the same. The water in the tank is also pumped with hose to every flat. We have fire-escapes from all the large dormitories.

Heating and Lighting.—The main building is heated by hot air from 3 large wood and 2 coal furnaces. All these are so installed that a large volume of pure, fresh air is constantly flowing into the building, while 3 large shafts provide for the exit of the foul air, thus keeping the air pure and fresh. The main building, principal's and farmers' homes, and barn, are all lighted by electricity derived from Brandon.

Recreation.—The favourite outdoor sports are running, jumping, football, cricket, baseball, marbles, skating, coasting, swinging, skipping, &c. An effort is made to keep the pupils well supplied with indoor games. Our boys have won several silver trophies in the inter-collegiate contests. During the summer months the boys and girls are trained in physical and military drill.

General Remarks.—During the year 6 pupils have been discharged and 16 admitted. All the departments are doing good work. The pupils are contented and cheerful, cleanly in their personal habits, and willingly perform the tasks assigned them. They are well clothed, and have plenty of good nourishing food. We aim to make our institution homelike, and to help the pupils in the development of Christian character, intelligence and habits of industry, as a foundation for success in after-life. From the reports received from our graduates, we are led to believe that nearly all of them are doing well.

In conclusion I wish to express my appreciation of the faithful service rendered by all the members of the staff.

1 GEORGE V., A. 1911

THE REPORT OF REV. W. W. McLAREN, PRINCIPAL OF THE BOARDING SCHOOL, BIRTLE, MAN., FOR THE YEAR ENDED MARCH 31, 1910.

Location.—The school is situated on the north bank of the Birdtail river ravine, within the limits of the town of Birtle, and 12 miles from the nearest reserve.

Land.—The school owns 30 acres and rents 30 acres in 6, 7, 26, within the municipality of Birtle. Half of this is cultivated. The remainder is a wooded ravine used for pasture. Within the same municipality, the school farm is situated, 2 miles away on southwest quarter 16, 17, 26. It is a good stock farm, having 100 acres of arable land, 50 of which have been broken, wood water and hay.

Buildings.—The school is a two and a half story structure in good repair, save for painting. During the year, the attic dormitories were altered, giving us room for eight more pupils. Additional rooms have been painted. The barn is a first-class frame structure with stone and concrete stables and root-house beneath. It requires painting also. There is also a large frame hen-house and log ice-house. All buildings are in fair repair.

Accommodation.—With the hospital available for sick children, the school itself will accommodate 64 pupils, and a staff of 8.

Attendance.—The year began with 49 enrolled, and closed with 51; 7 were admitted, 4 were honourably discharged, and 1 died. The number of grant-earners is 50.

Class-room Work.—The pupils are making steady progress in all four standards. Miss Macgregor, the teacher, was away on furlough for the winter months, and Miss Susette Blackbird did admirably as a substitute.

Farm and Garden.—We had 65 acres in crops, and broke 15 acres more during the summer. Our garden and field crops were fairly good, but severe hailstorms destroyed our grain. As a result we had to expend \$300 for seed and feed, a most heavy drain on our limited income. About 90 acres will be under crop this year. A seeder, an implement shed, a gang plough, and a driving team were added to our farm equipment.

Industries Taught.—The girls are instructed in the following phases of housework: cooking, laundrying and sewing. They are taught also gardening, the care of poultry, dairying, and are trained in elementary nursing and sanitation. The boys chop, haul, saw and split most of our fuel, care for all the stock, work the farm, and assist in making all the necessary repairs about the fences and buildings.

Moral and Religious Training.—All the children attend the Sabbath morning and afternoon services of the Birtle Presbyterian church. The older ones go to the Sabbath evening and week and special services also. The younger children have Bible study at home Sabbath evenings. Daily, prayers are conducted by the principal, each morning and evening. A half hour of each day in the class-room is also given to Biblical and moral instruction.

Health and Sanitation.—The temporary experimental establishment of the Birtle agency tent hospital in connection with the school, under the charge of a resident nurse and a physician visiting daily, has been a great aid in maintaining splendid health among the pupils. All troubled with scrofula and tuberculosis have been cured, two lives have been saved and delicate pupils safeguarded against any decline in vitality. One of our little girls died at St. Boniface hospital following a delicate operation for an aural abscess, an after effect of measles. Only one pupil shows any evidence of the recurrence of scrofula. A slight operation will be necessary in her case. Our high and dry location, the possession of a full plumbing system issuing into a septic tank, makes our sanitary conditions of the best.

SESSIONAL PAPER No. 27

Water Supply.—For house use, water is obtained from a large well some two hundred yards from the school, being syphoned by underground frost-proof piping into a 25-barrel tank in the basement, whence it is elevated by means of a force pump and gasoline engine to a 40-barrel tank in the attic, whence it is distributed by pipes to the bath-rooms, wash basins, lavatories, laundry, sick-rooms and kitchen. We also have a reserve well for fire purposes, and another for the use of the hospital. The river is also a reserve source of supply. We have also storage capacity for 100 barrels of soft water.

Fire Protection.—We have our own system and our own fire-brigade. Hose can be laid to the scene of the fire and the children got out of the building within two minutes after the alarm is given. Fire-drill, conducted by means of electric bells ringing simultaneously in every part of the building, is occasionally conducted. Connected with the stand-pipe from the attic storage tank, there is on each flat sufficient hose to reach any part of the floor. This is kept folded on swinging racks. Fire pails and axes are conveniently placed throughout the building. An iron fire-escape, plank walks on the roof, and an extension ladder make exit safe and easy.

Heating and Lighting.—Three large wood furnaces and a coal hot-water heater keep the building comfortable, save on exceptionally windy days combined with low temperatures. A safe, satisfactory and economical light is provided by the Birtle acetylene plant.

Recreation.—Coasting, hockey, skating and trapping in winter, and tennis, football, baseball, bathing, fishing, and an occasional tramp over the hills in summer, are the chief outdoor amusements. Fresh air exercise is rigidly enforced, save in the most inclement weather. The usual household games are indulged in under a member of the staff.

Ex-pupils.—Until some six years ago all the older pupils were usually transferred to Regina industrial school. Since then, our pupils have been graduated from here. Some 16 have been honourably discharged. Three have since died from tuberculosis. All of these lived a strictly moral and Christian life up to their death. Of the remaining 13, 3 are boys and 10 are girls; 5 of the girls have married school boys, 4 are giving good satisfaction as servants in white houses, and 1 lives an honourable life with her own people. Two of the boys have made a good start at farming, and one is a patient, with good hopes of recovery, in our tent hospital. On the whole, we have been greatly encouraged by the conduct and success of our graduates.

THE REPORT OF REV. PH. VALES, O.M.I., PRINCIPAL OF THE BOARDING SCHOOL, FORT ALEXANDER, MAN., FOR THE YEAR ENDED MARCH 31, 1910.

Location.—The school is finely situated on the west bank of the Winnipeg river, about a mile from its mouth, where it empties into Lake Winnipeg. The river, where the school stands, is about half a mile wide.

Land.—The lot on which the school is situated is No. 60 according to the survey made by J. Lestock Reid, D.L.S., on the west side of the mission property. It has 8 chains frontage, and runs back of the survey road 9 chains.

Some of this land was purchased from the Indians.

Building and Accommodation.—The school building is 70 x 40 feet, with fine basement and three stories above. In the basement are situated the kitchen, laundry, two dining-rooms, pantries, store-room for vegetables, and furnace-room. On the first floor is the chapel, the parlour being now for teacher's room, and a play-room for the

1 GEORGE V., A. 1911

boys. On the second floor are two infirmaries, one for boys and the other for girls, the girls' play-room, sewing-room and the apartments for the reverend sisters. The third is taken up for dormitories and rooms for necessary guardians. A door opens from every floor to a fire-escape on the outside of the building.

Over the third floor are placed three tanks, each of which contains 600 gallons of water, which is pumped from the river with a gasoline engine, this water is used throughout the house, and there is no better water in this country.

The first school building is used as a store now.

Attendance.—The average attendance is 60 pupils, all being boarders, the application and progress in school are good.

Class-room Work.—School is open from 9 to 11.45 a.m., with recess of 15 minutes in morning, and from 1.45 to 4 p.m., with a recess as in the morning, one hour of study from 5 to 6 p.m. The pupils are divided into two classes with two teachers, the only language taught and spoken is English. The grading of the pupils is as follows:—

		Girls.	Boys.	Total.
Standard	I.	2	3	5
"	II.	9	8	17
"	III.	10	7	17
"	IV.	5	6	11
"	V.	5	5	10
		—	—	—
Total.	31	29	60

Industries Taught.—The big girls are taught washing, ironing, sewing, knitting, and other household work. The boys work in the garden, and others work outside such as carrying wood and cleaning up premises.

Moral Training.—Great care is given in the children's instruction. Religious instruction is given very often by the principal.

We teach the pupils the truth of religion in different lessons of catechism with explanations according to their capacity. The conduct of the children is generally very good.

Health and Sanitation.—The general health of the pupils has been good.

Heating and Lighting.—The building is steam-heated throughout, which system is giving good satisfaction; our system of light by gas is satisfactory.

Recreation.—Recreation-rooms for the boys and girls are badly needed. A frame building added to each side of the main building 50 x 25 feet, would answer the purpose. It is hard for the pupils to be shut up in cold or rainy weather. This addition would not cost much, and is a necessity.

THE REPORT OF THE REV. M. KALMES, O.M.I., PRINCIPAL OF THE BOARDING SCHOOL AT FORT FRANCES, ONT., FOR THE YEAR ENDED MARCH 31, 1910.

Location.—The school is situated on the southwest of Rainy lake.

Land.—The area of land belonging to the school comprises 65 acres; 50 acres will be under cultivation next year.

Buildings.—The main edifice is a three-story building, 40 x 70 feet; an ice-house, 20 x 30 feet; a little building, 18 x 30 feet, used as a workshop; and the principal's office.

Accommodation.—There is accommodation for 50 pupils.

SESSIONAL PAPER No. 27

Attendance.—The attendance is very good and progress is made.

Farm and Garden.—There are about 30 acres under crop.

Industries Taught.—The boys are taught farming, gardening, dairying. The girls have their special amusements.

Health.—General health was good, except last summer.

Water Supply.—The water is supplied by a gasoline engine from the lake.

Fire Protection.—There are two fire-escapes, one on each side of the building. All other articles given by the department in case of fire are on hand.

Heating and Lighting.—Steam at low pressure is used for heating purposes. Acetylene gas is used for lighting.

Recreation.—Football and baseball are the amusements of the boys in summer; girls have their special games.

THE REPORT OF REV. A. CHAUMONT, PRINCIPAL OF THE BOARDING SCHOOL, PINE CREEK, MAN., FOR THE YEAR ENDED MARCH 31, 1910.

The Pine Creek boarding school is on the shore of Lake Winnipegosis, near the Pine Creek reserve. Camperville is the name of the post office. One hundred and sixty acres of land, a private property, viz.: section 1, township 35, range 19, west of 1st meridian, are connected with it. The south part of section 34, township 34, range 20, west of 1st meridian, is used as hay-land.

Buildings.—The school-house is a stone building, 115 feet long inside by 45 feet wide inside. It is divided as follows: in the basement are the kitchen, 22 x 16 ft.; the refectory, 46 x 22 ft.; the wash-room, 30 x 29 ft.; the store-room, 30 x 22 ft.; the dairy, 20 x 13 ft.; the cellar, 34 x 22 ft.; the boiler-room, 26 x 20 ft.; the pantry, 10 x 10 ft.; the bake-room, 22 x 16 ft.; the refectory of the female staff, 16 x 16 ft.

On the first floor are two class-rooms, one for the boys and one for the girls, 23 x 22; two recreation halls, 23 x 22; and seven private rooms and a parlour.

On the second floor are the infirmaries, one for the boys and one for the girls, 17 x 15 ft.; the sewing-room, 22 x 15 ft.; five for the female staff and a chapel.

In the attic are two dormitories, one for the boys and one for the girls, 49 x 45 ft., and two rooms for the night guardians, 15 x 14 ft.

There is one stable, 100 x 59 ft.; one saw-mill, 26 x 26 ft.; one blacksmith shop, 30 x 30 ft.; one carpenter shop, 24 x 32 ft.; and one shed, 115 x 18; also an ice-house, 20 x 16 ft.

The attendance is very good.

Class-room Work.—Most of the pupils are anxious to learn and do all in their power to meet the wishes of their teacher.

Farm and Garden.—Ten acres are under cultivation. Vegetables are the principal products.

Industries Taught.—The boys are taught light housework, the care of horses and cattle and farming; the girls learn housekeeping, sewing, knitting, cooking, baking, dairy and poultry.

Moral and Religious Training.—Every day one-half hour is given to moral and religious training.

Health and Sanitation.—Most of the pupils have enjoyed good health. The house is large and well aired. Exercise is never wanting.

Water Supply.—A windmill draws the water from the river.

Fire Protection.—There are two iron stairs outside as fire-escapes. There are besides two axes on each floor. The old hose and pails are worn out.

1 GEORGE V., A. 1911

THE REPORT OF REV. G. LEONARD, O.M.I., PRINCIPAL OF THE BOARDING SCHOOL, SANDY BAY, MAN., FOR THE YEAR ENDED MARCH 31, 1910.

Location.—The Sandy Bay school is situated in the centre of the Sandy Bay reserve, on the west shore of Lake Manitoba.

Land.—The land, comprising 100 acres, on section 16, township 18, range 9, has been given by the Sandy Bay band.

Buildings.—The school-house is a three-story frame building, 70 x 40, on a stone foundation. The basement contains the refectories, kitchen, pantry, baking-room, and lavatory. On the first floor is the entry, the chapel, boys' play-room, class-room, principal's room and office. On the second floor are two infirmaries, sewing-room, nuns' quarters, and girls' play-room. The third floor contains two large dormitories. There is an annex, 20 x 50 feet, containing the gasoline engine, the gas plant. It is also used as carpenter's shop. During the year a new stable, 100 x 30 feet, has been erected. Although already in use, it is not yet completed. The ice-house is 14 x 16 feet.

Accommodation.—We have accommodation for 60 pupils and the necessary staff.

Attendance.—The attendance has been good.

Class-room Work.—The programme of studies prescribed is closely followed.

Farm and Garden.—We have 40 acres under cultivation. Our garden yielded a good crop of fine vegetables.

Industries Taught.—The boys are taught farming as well as the care of horses and cattle. The girls learn all the branches of housekeeping.

Moral and Religious Training.—Morning and evening prayers are held in the chapel. The conduct of our pupils is most satisfactory.

Health and Sanitation.—Since the opening of this school, in 1905, only one death occurred, three years ago. All our pupils enjoyed perfect health throughout the year. The school-house is well ventilated.

Water Supply.—A good well and soft water cistern supply the house with plenty of water.

Fire Protection.—There are two fire-escapes from the dormitories, and hose connections on each floor with tanks in the attic. We also have 10 fire-extinguishers throughout the building.

Heating and Lighting.—The school is heated by steam and lighted by acetylene gas.

Recreation.—During the summer, football, shooting with bows and arrows, fishing, and in winter, skating and hunting around the school are the chief amusements of our boys. The girls enjoy walks in suitable weather. Crokinole, parchesi, skipping-ropes and doll-dressing are also favourite pastimes.

THE REPORT OF THE REV. J. A. LOUSLEY, PRINCIPAL OF THE BOARDING SCHOOL AT NORWAY HOUSE, N.W.T., FOR THE YEAR ENDED MARCH 31, 1910.

Location.—The school is situated on a point projecting into Little Playgreen lake, through which the east branch of the Nelson river flows, about 25 miles from the point where it leaves Lake Winnipeg

SESSIONAL PAPER No. 27

Land.—The school has a nominal claim to a strip of land, partly on the reserve and partly in Rossville village. About two acres are under cultivation.

Buildings.—The main building is 40 x 100 feet, is frame throughout, also two separate class-rooms and three closets and woodshed, of frame. Stable, root-house, storehouse, boat-house, ice-house, are built of logs.

Accommodation.—There is accommodation for 50 pupils and a staff of 6.

Attendance.—The attendance has been fairly good all year.

Class-room Work.—The course prescribed by the department has been adhered to and fair progress made.

Farm and Garden.—There is not sufficient land available for farming, but we have a good garden each year.

Industries Taught.—The girls are taught all household duties, and alternate regularly in the following departments: sewing-room, kitchen, laundry, dining-room, and general housework. The boys get a little training in gardening and the care of cattle.

Moral and Religious Training.—This consists of morning and evening worship at which scripture is read and commented upon, hymns sung and prayer offered. The regular weekly prayer meeting and two preaching services of the mission are attended regularly in a body. Sabbath school and one special class each week, besides personal talks by members of the staff, constitute the main features of training.

Health and Sanitation.—The health of the pupils this year has been fairly good. The government hospital, erected last fall, has been a great help in preventing spread of sickness as well as in restoring the affected ones.

Water Supply.—Abundance of good water is obtained from Little Playgreen lake.

Fire Protection.—Four tubes of Eclipse fire-extinguishing dust are hung in convenient parts of the building. Three barrels are kept full of water in the kitchen, one in each play-room, and buckets and axes are always handy.

Heating and Lighting.—Lighting has been done entirely by oil lamps, heating by means of two furnaces and box stoves.

Recreation.—Every child has at least five periods of recreation each day. Rowing, baseball, football, skating, coasting, pitching quoits, and other games are freely indulged in.

Ex-pupils.—These have mostly all married young people from the reserve, and are making a very creditable showing in every way. Homes are better kept, children more properly clothed, sickness more sanely attended to, and in many other ways the graduates show that their training has been of real value to them.

THE REPORT OF REV. J. L. MILLAR, PRINCIPAL OF THE BOARDING SCHOOL, PORTAGE LA PRAIRIE, FOR THE YEAR ENDED MARCH 31, 1910.

Location.—The school is situated at the eastern side of the limits of the town of Portage la Prairie and is not on a reserve.

Land.—There are about two acres of land in connection with the school. It is within the limits of the town of Portage la Prairie, and is owned by the Presbyterian Church. It is well adapted for gardening.

Buildings.—The main building is frame, with an adjoining wing, which is used for laundry and school-room. Besides these buildings, there is a good stable and poultry-house.

Accommodation.—The school can accommodate 35 pupils and a staff of 4.

1 GEORGE V., A. 1911

Attendance.—The attendance is increasing. The present enrolment is 32.

Class-room Work.—School is held during forenoon and afternoon. The programme prescribed is followed. Progress has been good. One pupil passed the third-class departmental examination. Lessons in instrumental music are given the larger pupils. They are making good progress.

The grading is as follows:—

Standard	I.	20
"	II.	5
"	III.	6
"	IV.	7
"	V.	4

Farm and Garden.—About an acre is used for gardening. A good supply of vegetables and roots was grown for use of the school and stock.

Industries Taught.—The boys are taught gardening, caring for stock and poultry, wood-cutting and general repairing.

The girls are taught cooking, laundry work, some dairy work, sewing and general housework.

Moral and Religious Training.—There is daily morning and evening worship in school. Children attend worship in Knox Church on Sabbath morning and Sabbath school in the afternoon. On Sabbath evening a children's service is conducted in the school.

Health and Sanitation.—The health of the children has been good. Cleanliness and ventilation are well attended to.

Water Supply.—With the growth of the school the water-supply is becoming insufficient. The well frequently goes dry. The tank capacity for rain-water is only about twenty barrels.

Fire Protection.—Fire-extinguishers are placed at all convenient places throughout the building. By means of a telephone or fire alarm the city fire-brigade is available.

Heating and Lighting.—The new hot-air coal furnace installed by the department has supplied adequate heating. The building is lighted throughout by electricity.

Recreation.—The girls have a variety of games in summer, and skating in winter. The boys have football, baseball, skating and other sports.

THE REPORT OF REV. F. T. DODDS, PRINCIPAL OF THE BOARDING SCHOOL (CECILIA JEFFREY), SHOAL LAKE, ONT., FOR THE YEAR ENDED MARCH 31, 1910.

Location.—The Cecilia Jeffrey school is situated in western Ontario, near the boundary of Manitoba, at the west end of Shoal lake, 45 miles in a southwesterly direction from Kenora.

Land.—For the use of the school a peninsula containing 210 acres and registered as D 492 was granted by the Ontario government to the Presbyterian Church. The greater part is composed of rocky ridges with low land intervening, all of which is covered with timber, willow and scrub. Some parts, if cleared, would make garden plots, but farming to any extent is impracticable.

Buildings.—The main building is 66 x 38 feet, with a wing 22 x 30 feet, two-story frame on stone basement. On the first floor are the class-room, reception-room, dining-rooms, girls' recreation-room, kitchen, store-room and pantry. On the second

SESSIONAL PAPER No. 27

floor are the dormitories, bed-rooms, and bath-rooms for staff and girls. There is a frame stable, 36 x 24 feet, an ice-house, 12 x 8 feet, and a residence for the principal, 36 x 24 feet.

Accommodation.—There is accommodation for forty pupils and six members of staff.

Class-room Work.—The regular programme of studies prescribed by the department has been followed. Hours 9 to 12 a.m., and 1.30 to 4 p.m. The older pupils are half the day in the class-room, and the other half receive industrial training. Good progress has been made in all branches.

Farm and Garden.—We produce no grain owing to the limited area of arable land and to the lack of facilities to prepare it for market. From our garden we had an ample supply of potatoes and all kinds of roots and vegetables. The live stock consists of two horses, two pigs and ten head of cattle.

Industries Taught.—The boys are taught feeding and care of stock, milking, driving and management of horses while working, work on the steamboat, fishing and gardening. The girls receive instruction in all kinds of housework, including baking, cooking, knitting, sewing and mending, washing, ironing, &c.

Moral and Religious Training.—We have singing, Bible-reading and prayer, morning and evening, and also as opening exercises in the class-room. On Sunday we have religious services morning and evening, and Sunday school in the afternoon. The teachers in all the departments are required to inculcate by precept and example the sound moral principles which are recognized as essential to good citizenship.

Health and Sanitation.—The pupils with two exceptions have enjoyed excellent health during the year. No epidemic or contagious disease has appeared in the school. Every precaution is taken to keep the school in a clean and sanitary condition. The pupils are encouraged to take plenty of outdoor exercise. The sewer discharges into a bay on the opposite side of the peninsula to that from which the water-supply is obtained. The rooms are ventilated by openings in the ceiling. The windows are also kept open winter and summer except in stormy weather.

Water Supply.—An abundant supply of good water is obtained from the lake. It is pumped by a windmill into tanks in the attic, whence it flows through pipes to other parts of the building. A boiler connected with the kitchen range furnishes hot water for kitchen and lavatories. There is a large tank in the laundry for rain water which can also be filled from the lake by the windmill pump.

Fire Protection.—The above mentioned tanks would furnish an ample supply of water in case of fire. There are fire-hose connected with the water system on each floor. Fire buckets, axes and ladders are kept in readiness. A fire-escape leads from the boys' dormitory to the ground. Twelve dry-dust fire-extinguishers are hung in convenient places in the building and the doors are hung to swing outwards.

Heating and Lighting.—The main building is heated by two large hot-air furnaces, and the wing by the kitchen stove, and a small box heater upstairs. Coal oil lamps are used mainly for lighting. Wax candles and lanterns are also used for carrying.

Recreation.—Boating and swimming are favourite recreations. Baseball and football are also practised by the boys and basket-ball and swinging by the girls. Hockey, skating and coasting are the principal outdoor amusements in winter.

Ex-pupils.—Nineteen pupils have been discharged besides four or five non-treaty pupils who attended for a time but who are all out now. Of the nineteen seven have been married, one of whom, Mable Mandamin, died in January, 1910. Of the twelve unmarried, four are working for white people, and the rest are with their parents or friends on the reserves. All are doing well. I have not heard of any charge of misconduct being made against any of them.

General Remarks.—Amongst the Indians there is an increasing appreciation of the work being done by the school and the advantages that education gives to their

1 GEORGE V., A. 1911

children. There is no need of recruiting, as there are many more children offering than we can accommodate. Some have even asked for places in the school for their children from six months to two years ahead, so that they may not be disappointed in getting them in when the children are old enough to enter.

THE REPORT OF REV. P. BOUSQUET, O.M.I., PRINCIPAL OF THE
BOARDING SCHOOL, KENORA, ONT., FOR THE YEAR ENDED
MARCH 31, 1910.

Location.—The school is situated about 2 miles from the town of Kenora, on a high place, commanding a beautiful view on the Lake of the Woods.

Land.—There are about 50 acres of land in connection with the school, the property of the Roman Catholic Church, and registered as subdivision 1—8, township of Jaffary.

Much of the land is rock, but fertile strips stretch out here and there and furnish sufficient soil for gardening purposes.

Buildings.—The Kenora school has received, during the past summer, an addition 36 x 40 feet, three-stories high. This addition affords much needed accommodation, and adds considerably to the general appearance of the building. It has now a frontage of 112 feet.

The two buildings are of frame construction, with brick veneer, on a very good stone foundation.

The old building is occupied by the girls and the reverend sisters who take care of them. The first flat contains a class-room, dining-room for children, a dining-room for the reverend principal, a kitchen, a pantry, and a dining-room for the reverend sisters.

The second flat contains a dormitory for small girls, a recreation-room, a sewing-room, a sick-room, and two rooms for the reverend sisters.

In the attic is the dormitory for the big girls and a bed-room.

The old building has been painted anew outside and inside during the summer.

The new addition is set apart for the use of the boys and male staff. On the first floor: office and room for the reverend principal, a recreation-room for boys. Second floor: sick-room for boys, chapel and bed-room. In the attic is the dormitory for boys and a bed-room.

The full length of the school has a basement, used for dairy, and a root-cellar and two furnaces. The other buildings are: an old residence of the reverend principal, 20 x 16 feet, on a stone foundation; a laundry-house, a storehouse and a carpenter shop (under one roof), on a stone foundation, 46 x 18 feet; a buggy-shed; a granary and a stable (under one roof), 46 x 18 feet; a hen-house, 20 x 40 feet; a woodshed and ice-house, 24 x 14 feet; a boat-house, 24 x 18 feet; a machine shop, 20 x 22 feet, with stone foundation, frame wall and shingle roof. The machine shop contains a 6-horsepower gasoline engine, a Meyers' pump and two air-compression tanks, of capacity of a thousand gallons each.

During summer, two necessary outhouses have been built: one for boys, of frame, 7 x 18 feet; another for girls and staff, 7 x 18 feet, both over deep pits.

Accommodation.—With the new addition, we have now plenty of room for 55 children and staff.

Attendance.—All the children being boarders, the attendance was regular.

Class-room Work.—The half-day system is in vogue for older pupils; half of the day is spent in the school-room and the other half is spent in their trades. The

SESSIONAL PAPER No. 27

juniors attend class forenoon and afternoon. I have much pleasure in adding that the progress was very satisfactory.

Farm and Garden.—The school is at a great disadvantage from having no farm-land for crop and pasture. We are obliged to import all the feed for stock, and we pay \$13 and \$14 for a ton of wild hay; although we have about 10 acres of land under cultivation, in which we raise the potatoes and other vegetables necessary for the use of our school.

Industries.—The boys are employed in cutting wood, gardening, farming and any other work which they are able to do. The girls are taught housework, cooking, baking, sewing, &c.

Moral and Religious Training.—Every day one hour is devoted to moral and religious training.

Water Supply.—Our water-supply is taken from the Lake of the Woods, about 300 feet from the shore. The water is good, but perhaps it would be better if our intake pipe were 600 feet longer.

Fire Protection.—We have three outside fire-escapes running from all the dormitories; 20 extinguishers, 6 fire pails and fire axes hanging in convenient places.

Heating.—The old building is heated by two hot-air furnaces and two box-stoves. For lack of funds a modern heating apparatus could not be introduced in the addition made last summer. So it was necessary to fall back on the old fashion of putting stoves here and there through the building, which is certainly a great drawback and disadvantage in a large institution. We are using coal-oil lamps.

Recreation.—In the winter, the principal outdoor amusements for boys are sleigh sliding, skating, and hockey games. In summer they play baseball, football, &c.

The girls amuse themselves by swinging, sleighing, doll-dressing, &c.

THE REPORT OF REV. E. MATHESON, PRINCIPAL OF THE INDUSTRIAL SCHOOL, BATTLEFORD, SASK., FOR THE YEAR ENDED MARCH 31, 1910.

Location.—The school is located on the high south bank of the Battle river, about 2 miles west of where this river falls into the north branch of the Saskatchewan river, and about 2 miles south of the town of Battleford, which is our post office. This place is beautiful for situation, overlooking, towards the north, the two towns of Battleford and North Battleford (the latter a divisional point of the Canadian Northern railway), and the rivers already mentioned, with their picturesque valleys, to the south the Eagle Hill range, and a vast extent of country in all directions.

The school buildings are erected on land specially reserved by the Dominion government for the use of this school. The main building, with certain changes and additions rendered necessary for the work of the school, is the same that was used as the official residence of the Honourable David Laird, the present Indian Commissioner, when he was, the first Lieutenant Governor of the then Northwest Territories; it was also used as the council chamber for the meetings of the Northwest Council of those days.

Land.—In the immediate vicinity of the buildings we have a reserve of 566 acres, and one of 376 acres 3 miles east of the school. The former is where all our farming land is; the latter is mainly a hay swamp, where we get our supply of hay each year. The land is in township 43, range 16, west of the third principal meridian, and embraces portions of sections 15, 17, 18, 19 and 20.

Buildings.—These consist of the main building, in which the pupils and most of the members of the staff reside, the principal's residence, two cottages, carpenter

1 GEORGE V., A. 1911

shop, blacksmith shop, store-room, stable, well-house, pig pen, warehouse, root-house, laundry, granary, and the usual small outbuildings, besides carriage and implement sheds. Some of the buildings were reshingled, some new floors laid, alterations in class-rooms, new wall and inner roof on root-house, and considerable minor repairs done in various places during the year.

Accommodation.—We have accommodation for about 120 pupils, if we could get that number, and for the staff that would be required to instruct and care for them.

Attendance.—Our death-rate has been unusually heavy this year, three boys and two girls. Four pupils were discharged, and nine admitted. We enter on the incoming year with an enrolment of 77.

Class-room Work.—The course of studies required by the department is followed, and the pupils are graded from the alphabet up to standard VI. Several of our ex-pupils, of whom two are now ordained missionaries, are engaged in the work of teaching in connection with the Indian schools in Manitoba, Saskatchewan and Alberta.

Farm and Garden.—We have 70 acres cultivated, about 6 of this being worked as a vegetable garden and potato patch, the rest for grain.

Industries Taught.—Farming and gardening, the care of horses, cattle, pigs and poultry, carpentering, kalsomining, painting, glazing, &c., baking, dairy work, laundry work, sewing, knitting, making and mending clothes, cooking and general house-work.

Moral and Religious Training.—To this we give careful attention as being the only foundation on which to build up worthy characters and true citizenship. We have the regular Sunday services of the church, the Sunday school, a shortened form of morning and evening prayer, with the reading of Holy Scriptures each day, and a mid-week service each Wednesday evening. A circle of the 'King's Daughters' among the girls, and the 'King's Sons' among the boys; and a branch of the 'Daily Scripture Reading Union,' to which both boys and girls belong, have been carried on for several years with manifestly good results. These organizations are officered by the pupils, and are carried on under staff supervision.

Health and Sanitation.—An epidemic of whooping-cough visited the school in the earlier part of the year, and carried away some of the pupils. Apart from this, however, there has been good general health. The ventilation of the building is good, a constant supply of fresh air passing through the building, and the sanitary arrangements are attended to carefully.

Water Supply.—We have a good supply of water of the best quality in our wells.

Fire Protection.—We have a number of hand grenades, Babcock and dry-dust fire extinguishers, also axes, and pails of water placed in different parts of the building. There are four tanks in which a fresh supply of water is always kept. Iron pipes connect with the two upper tanks, and lead down to the lower floors, where rubber hose connect with them. A McRobie fire-apparatus is also located in the centre of the main building, having pipes and hose extending from it to each story. There are fire-escapes from the dormitories, and a supply of ladders is always kept near at hand. The boys are told off to different stations in the main building for water supply.

Heating.—This is done by hot-air furnaces and ordinary stoves, wood being the only fuel used.

Lighting.—Ordinary lamps with coal oil are all we have for this purpose.

Recreation.—Swings, football, and other games, with plenty of other outdoor exercise. We also instruct the boys in the use of the buck-saw on the wood-pile. We find this the most useful, and best paying, of all the games.

Ex-pupils.—Of those who have returned to their reserves, some have not done as well as one could wish; in many cases their environment is very much against them. But these are not all; there are others of them who have their own portion of land

SESSIONAL PAPER No. 27

cultivated, their own houses, animals and other property, and are doing very well. Others again there are who have not returned to reserve life, but have struck out to work among the settlers, some at general work, some at carpentering. In this way they gain a knowledge of the settled life of the country, which is a very valuable possession whether they afterwards use it on the reserves, or keep on at work among the settlers. Some of our pupils are engaged in various places as teachers or helpers in connection with the Indian schools; two have taken a course at St. John's College, Winnipeg, and been ordained to the sacred ministry of the church. One of these is married to an English lady and is in charge of one of our missions. The other took his degree of Bachelor of Arts in the University of Manitoba, and is also now in charge of one of our missions. Nearly all the girls that have been discharged are married, most of them on the reserve to ex-pupils and others, but several of them are married to white settlers, and are keeping their homes in a creditable condition. While the results may not be in all cases what some might desire, yet we must not expect too much when we take all things into consideration. Improvement is very evident; the schools are doing good work, and the leaven of their teaching is seen in the surroundings of the ex-pupils. The residential schools, properly and systematically worked, are a true step in the way to solve the Indian problem. There is a very marked difference between the tone of the reserve where a considerable number of our ex-pupils are living, and that of those reserves that are without them.

GENERAL REMARKS.

I have pleasure in bearing testimony to the good work done by the various members of the staff. This tends to help in accomplishing the good work of teaching, training and uplifting the Indian to the plane on which we hope he will stand by and bye.

THE REPORT OF REV. J. HUGONARD, PRINCIPAL OF THE INDUSTRIAL SCHOOL, QU'APPELLE, SASK., FOR THE YEAR ENDED MARCH 31, 1910.

Location.—This school is situated in the Qu'Appelle valley, not on a reserve, but close to seven, viz., Piapot, Pasquah, Muscowpetung, Sioux, Crooked Lake, File Hills and Assiniboine.

Land.—The land consists of different parts of sections all in township 21, range 13, west of the second meridian, and contains about 1,300 acres (as per marked map by department), of which about one-third is arable. All the land is fenced and is owned by the department.

Buildings.—There are three separate buildings as follows: Main building, 120 x 50, contains kitchen, dining-room, offices, chapel and hospital. Girls' building, 80 x 50 feet, contains play-room, class-rooms and dormitories. Boys' building is same size and used for same purposes. Besides the above, there are the shop buildings and used for the different trades.

Accommodation.—The school will accommodate 225 pupils, and staff of 15.

Attendance.—The attendance for the year has been good. There were 231 pupils enrolled at the end of March; 112 boys and 119 girls.

Class-room Work.—The programme of the department has been followed, and classification of pupils is:—

1 GEORGE V., A. 1911

		Boys.	Girls.	Total.
Standard	I.	23	38	61
"	II.	32	20	52
"	III.	32	32	64
"	IV.	15	14	29
"	V.	10	11	21
"	VI.	4	4

The first and second standards attend class regularly for six hours each day, and the higher ones attend class one-half of the day and work at the different trades and general housekeeping the other half.

Farm and Garden.—The number of acres under seed was about 220, as follows:—50 acres under wheat yielding 1,100 bushels; 35 acres under barley giving 500 bushels, and 135 acres under oats, which returned 5,000 bushels. Seven acres were planted to roots.

Stock.—The live stock consists of 39 head of horses, 32 head of cattle, 42 hogs, and about 150 poultry.

Industries Taught.—The branches of industry are blacksmithing, carpentry, tinsmithing, shoemaking, farming, baking and painting. A number of boys are attached to each branch and are employed one-half of the day and attend class the other half.

Moral and Religious Training.—The moral training and general conduct of the pupils are attended to by the vice-principal and teachers. Every day during the winter months religious instruction is given the pupils after class for one hour. Chapel is attended night and morning daily.

Health and Sanitation.—The health of the pupils for the year has been good. In the month of January an epidemic of measles had broken out, about 150 cases were treated successfully. Sanitary precautions are always taken, premises kept clean, contagious diseases isolated and ventilation attended to. The physician in charge inspects regularly.

Water Supply.—Drinking water is obtained from wells. The water which supplies the house and laundry, also fire-protection, is brought from the lake 300 yards distant into two fifteen hundred gallon air pressure tanks.

Fire Protection.—Two 50-foot hose on each flat of the main, boys' and girls' building are connected with the air pressure tanks. Besides there are two McRobie 75-gallon chemical tanks with 50 feet of hose attached, on each flat of the main and girls' building. There is an electrical fire alarm system with stations placed throughout the different buildings. Fire drills are practised at intervals, and every precaution is taken for the saving of life and property. There are two iron fire-escapes attached to each of the three buildings, and 36 Star chemical hand fire-extinguishers are conveniently placed as well as 12 Eclipse dry dust fire-extinguishers.

Heating and Lighting.—Four Gurney steam boilers are used for heating the school buildings, and stoves for the shops. Two Siche gas tanks supply light for all school buildings, and coal oil is used in shops.

Recreation.—Football and baseball are the favourite games for the pupils in summer-time. Plays, dramas, singing and band exercises are the winter amusements.

Ex-pupils.—Most of the discharged pupils go back to their reserve either to work with their parents or to farm independently. Those who are made to farm by themselves at File Hills colony or elsewhere and marry educated girls keep up the habits of civilization acquired at school and are progressive. Those who are allowed to remain with their parents make merely a living, and whatever ambition they might have is destroyed by the surroundings.

Of the pupils who have learned shop trades, the carpenters seem to benefit most, earning, at times, from \$2.50 to \$3 a day. The trades enable the pupils to do their own work at home and give them a useful knowledge of implements, furniture, &c.

SESSIONAL PAPER No. 27

THE REPORT OF REV. R. B. HERON, PRINCIPAL OF THE INDUSTRIAL SCHOOL, REGINA, SASK., FOR THE YEAR ENDED MARCH 31, 1910.

Location.—The school is located on the banks of the Wascana creek, four miles northwest of the city of Regina. It is not on a reserve. There is a half section of land in connection with the school. The school has also the use of an adjoining section for grazing purposes. The soil is a heavy clay, notorious for its paint-like adhesiveness when wet, but exceedingly fertile. Wheat, oats, barley, flax and all the ordinary vegetables do well. The land in its natural state was treeless prairie, but of such uneven surface that horses can be driven over it only at a walk. Old hunters say that it was impossible to gallop their horses after the buffalo, when the herd came into this district. They resorted to the methods of stalking and also of driving the animals into corrals; where they were slaughtered in large numbers.

Buildings.—The main building is of brick, two stories high. The central part of the first floor contains the office, dispensary, dining-rooms, kitchen, store-rooms and sewing-room. On the second floor of this part are the bed-rooms for the staff, a staff sitting-room and a small dormitory for the small boys. The boy's quarters and the assembly-room are in the south wing. In the north wing, the girls' dormitory, clothing store-room, wash-room and lockers are on the second floor. On the first floor of the north wing are two well lighted class-rooms. The basement, which extends under the whole building, contains furnace-room, laundry; fuel-room, water-closets and bath-rooms. There are two pneumatic tanks for hard and one for soft water in the basement. Under the basement floor are two large soft water cisterns that catch the rain water from the roof; these have only been in use a short time, but have proved very valuable for laundry purposes, as the well water is too hard for satisfactory work in this connection. The other buildings are a two-story brick veneered residence for the principal, a farm cottage, cottage hospital, old laundry building, ice-house, bake-shop, carpenter shop, blacksmith shop and smoke-house. The farm buildings are: barn with horse stable under same, cow stable, hog pens, implement shed and poultry-house.

Accommodation.—There is accommodation for 150 pupils and a staff of 12.

Attendance.—During the past year the attendance has been about 65.

Class-room Work.—The class-room is graded as follows:—

	Pupils.
Standard VI.	8
“ V.	7
“ IV.	12
“ III.	11
“ II.	13
“ I.	14

The course of study outlined by the department for the use of Indian schools is followed.

Farm and Garden.—This is made a very important part of the industrial training for boys. The farm produced about 3,000 bushels of grain last year; much of this was fed to stock, producing beef and pork for school use. The system of feeding grain gives the boys an excellent chance to see what can be done with stock under good care. The garden produced all the vegetables used on the school tables.

Industries Taught.—All boys are taught the care, feeding and driving of horses, feeding of cattle and hogs. They are also given practical instruction in the use of farm implements, machinery and garden tools.

Carpenter Shop.—Four boys were given instruction in this department. This department has charge of the repairs both on buildings and equipment and much practical instruction is received in this alone; but there has been time for the making of new articles as well, such as chairs, tables, benches, whiffle-trees, neckyokes, sleighs, and numerous small articles.

Printing Office.—A monthly paper 'Progress,' is printed at the school. Some of the ex-pupils, who have learned type-setting in this office, are earning good wages in newspaper offices. The printing office is useful in connection with the class-room work, as the printer boys are found to make the greatest progress in spelling and English composition. Two boys have worked in this office during the year.

Engine Room.—Three boys have received instruction in the care and operating of the steam engine. Two have passed the examinations set by the provincial government, and have received qualified engineer's papers. These engineer boys prove to be very useful on their own reserves in the threshing season, as many reserves own steam-threshing outfits.

Girls' Department.—All the girls learn cooking, baking, sewing, laundry-work, and general housework. In the sewing-room they learn to cut and fit their own dresses, as well as other articles of clothing. Some of them are given instruction in the care of the sick; also in bandaging and dressing of sores and wounds.

Moral and Religious Training.—The pupils meet in the class-room to learn scripture verses at regular periods. Sunday school is held every Sunday afternoon, different members of staff take classes. The International course of lessons is followed. Service is conducted by the principal on Sunday-evening. When the weather is favourable, numbers of the pupils go to the Presbyterian church in Regina, for the Sunday morning service. Pupils and staff meet in the class-room morning and evening for prayers; at the evening prayers there is a short time given to Bible study.

Health and Sanitation.—The health of the pupils has been exceptionally good. Waste paper, dust from floors, and rubbish is carefully burned. Rooms that have been occupied by the sick are carefully disinfected after, even if the illness has been only a minor one. Thorough ventilation is considered as being most important. Outdoor exercise is insisted on for pupils and staff at regular periods every day. Several of the pupils were operated on by the school physician, Dr. Thompson, for scrofulous lumps, with good results in each case.

Water Supply.—Water of an excellent quality is secured at a depth of 45 feet, but the supply is limited. At the ninety-foot level a good supply of good water is obtained. Wells sunk to this depth can scarcely be pumped dry. The water is, however, found in a vein of quicksand that gradually rises and fills the wells to water-level, and also quickly wears out the valves in the pumping plant. The water is very hard.

Fire Protection.—There is a McRobie chemical extinguisher, six Stempel extinguishers, a number of hand-grenades and dust extinguishers. Drills are given with a view of getting the pupils out of the building as quickly and safely as possible.

Heating and Lighting.—The main building is heated by steam from a thirty horsepower boiler in the basement. The carpenter-shop, bake-shop, laundry and printing office are heated by stoves. The light used is acetylene gas made on the premises.

Recreation.—During the summer the boys play baseball, football, and other outdoor games. The girls play basketball. In the winter both boys and girls are encouraged to skate on the Wascana creek or on a prepared rink.

A brass band and magic lantern are used to advantage both for instruction and amusement. In winter many indoor games are played under the direction of one or more members of staff. Singing is taught and concerts are given; most of the programme being rendered by the pupils.

SESSIONAL PAPER No. 27

GENERAL REMARKS.

The school has many visitors during the summer months. People from eastern Canada, and also from Europe, when in Regina, take advantage of the nearness of the school to see something of the Indians, and also to note the educational work that is being done among them. Many of these visitors express surprise that our pupils speak English so well, and that the children are so apt in their studies. During the year His Excellency Earl Grey, the Governor General of Canada, was among the number of visitors.

It is to be noted that there is a deeper interest in education among the Indians on the reserves tributary to this school. Many of the Indians who were indifferent are now eager to have their children educated.

THE REPORT OF REV. S. PERREAULT, O.M.I., PRINCIPAL OF THE BOARDING SCHOOL, COWESSESS RESERVE, CROOKED LAKES AGENCY, SASK., FOR THE YEAR ENDED MARCH 31, 1910.

Location.—The Cowessess' boarding school is situated in the Qu'Appelle valley, south of Crooked lake, on Cowessess' reserve.

Land.—We have bought from the band of the reserve all the land comprised between the lake, on the north, the river Qu'Appelle, on the east, the creek, on the south, and hills on the west, containing 323 acres in area.

Buildings.—The buildings are as follows:—The priest's house, 30 x 20 feet; the church, 62 x 20 feet; a house, 20 x 20 feet, exclusively reserved for the Indians; an ice-house, 14 x 12 feet; a stable, 65 x 20 feet; a general workshop, 30 x 20 feet. The main edifice with institute proper is a 3-story building. Its dimensions are 58 x 38 feet, and its height, from the ground to the top roof, is 52 feet. The basement contains 3 dining-rooms, a kitchen, a pantry, a dairy-room, a bake-room, a lavatory with large boiler and power washing-machine, and rain-water tank.

On the first floor are the entrance, the parlour, the chapel, the girls' play-room, the boys' play-room, the school-room.

On the second floor are the sewing-room, the pharmacy, the nuns' quarters, and two sick-rooms, one for the boys and one for the girls.

On the third floor are two large dormitories and two rooms for the night guardians.

The general workshop is a two-story building with stone foundation. The first story comprises a carpenter's department, which is provided with all the latest wood-working tools, viz.: a buzz planer, a circular saw table, a wood-turning lathe, an emery wheel for grinding tools, and an improved wood lathe.

On the second floor is a small shoe-shop department.

Repairs.—Considerable repairs were made this year, chiefly: bricking the school-house, replastering the walls, and oiling and varnishing all the woodwork inside. The roofs of all the buildings had previously been repainted.

Accommodation.—Under present arrangements, there is accommodation for 60 pupils and a staff of 8.

Attendance.—The attendance is very regular, and we always have more than the authorized number of pupils.

Class-room Work.—The programme of studies prescribed by the department is closely followed. The subjects taught are: religious instruction, drawing, spelling, grammar, arithmetic, history and geography; but we give special care to reading and writing. The progress is encouraging.

1 GEORGE V., A. 1911

Farm and Garden.—There are about 100 acres in cultivation. We have also a garden, in which is raised a full supply of potatoes and other vegetables for the use of the school.

Industries Taught.—The boys are trained in practical farming and gardening, as well as in the care of stock, and shoe-mending. This year, they have also been a great help in the repairs; some become fairly skilled in painting and varnishing.

The girls are taught sewing, knitting, cooking, bread-making, and general house-work.

Moral and Religious Training.—We profit by every opportunity to instil into the hearts of our docile pupils the love and practice of virtue. A short instruction is also given them daily on some religious subject, as well as on politeness, obedience, cleanliness and order, after which hymns are sung. The children take particular delight in such singing. Very little, if any, corporal punishment is used; the good and the bad note system proves the most successful in forming their character.

Health and Sanitation.—The sanitary condition of our school, owing to the excellence of our fresh air, drains, and abundance of light, is very good; and the rosy cheeks of our healthy-looking pupils never fail to attract the attention of our visitors. The only sickness we had this year, among the children, were a few colds and sore throats.

Water Supply.—Our water-supply is taken from a well in the basement. It is of fair quality.

Fire Protection.—The fire-protection is abundantly provided for by means of a gasoline engine and power pump of 100 gallons per minute, connected by a 2-inch stand-pipe, with tank in the attic. These connections are placed in each dormitory, and in each hall; also one in the basement, and one outside of the building. The pump and engine are used to raise the water required to fill the tank in the attic; from the attic it flows through the stand-pipe to the plumbing system, which is, consequently, always ready for use. Besides, we have half a dozen fire-buckets hung up throughout the different rooms; and an apparatus of fire-escapes as simple as it is efficient. These fire-escapes consist of 2-inch iron tubes, along which the children can slip down to the ground, from iron balconies affixed to the windows of the second and third stories, at each end of the building.

Heating and Lighting.—The school-house is heated by steam. The apparatus is placed in an addition adjoining the building in the rear. It is installed on a cement floor, and surrounded by 8-foot stone walls. All the buildings are lighted by acetylene gas.

Recreation.—During summer, football, swimming, fishing, and shooting with bows and arrows of their own making; in winter, sliding, skating, playing cards and marbles, or checkers, are the favourite pastimes of our boys.

The girls amuse themselves dressing dolls, singing, swinging, playing games, cards and ball.

THE REPORT OF THE REV. H. MCKAY, PRINCIPAL OF THE BOARDING SCHOOL AT ROUND LAKE, SASK., FOR THE YEAR ENDED MARCH 31, 1910.

Location.—The school is situated in the Qu'Appelle valley at the east end of Round lake, in close proximity to the Crooked Lakes reserve, the following lands, S. $\frac{1}{2}$ of section 23, township 18, range 3, west of 2nd meridian, also 22 acres of N.E. $\frac{1}{4}$ of 14, in the same township and range, are in connection with the school and owned

SESSIONAL PAPER No. 27

by the Presbyterian Church. The location is beautifully situated on the shores of the lake and river, surrounded by the beauty of the Qu'Appelle hills.

The soil is well adapted for agricultural purposes. The land is prairie with a few bluffs scattered over it, and a good part of it is under cultivation, the rest is used for pasture-lands.

Buildings.—The buildings are frame on stone foundations and are as follows:—

1. The main building, in which are dining-rooms, boys' and girls' waiting-rooms, kitchen, laundry, store-rooms, parlour, rooms for four members of the staff, and the girls' bed-rooms.

2. The school-house, in which are the school-room, two class-rooms, the teacher's rooms, and a room for the farmer.

3. Barn and stable for horses and cattle.

Accommodation.—We have accommodation for 60 pupils and a staff of 6. During the past 20 years we have had empty rooms in our buildings.

Attendance.—The attendance has been very regular, 40 names on the roll and an average attendance of about 35.

Class-room Work.—We take up the work laid down by the Indian Department for Indian schools. Vocal and instrumental music is being taught, the progress made is satisfactory.

Farm and Garden.—We have about 100 acres under cultivation growing wheat, oats, barley, and a good garden. We have about 100 head of cattle.

Industries Taught.—The boys are taught general farming and dairy work. The girls general housework, baking, cooking, laundry work, plain and fancy needlework.

Moral and Religious Training.—This is considered the most important part of the work of the school. We bring all our teaching and intercourse with the pupils to bear upon this: we have our morning and evening devotions, the work of the Sabbath school and public services, thus striving to lead our children to become strong to do right and avoid the wrong.

Health and Sanitation.—Our school is situated on a beautiful spot well drained towards the lake and the river, and we pay particular attention to the cleanliness of our premises. The children have large and well ventilated rooms in which to sleep and study, and abundance of outdoor exercise. The children get all the food they require. Our herd supplies us with an abundance of fresh beef, and butter and milk, our lake supplies us with all the fish we require; our gardens with vegetables, and our bread is always the best quality made from No. 1 hard. We never see a loaf of bad bread at Round Lake. Our children are very fond of rolled oats with cream. The health of the children has been very good. We had to report only one death during the past 4 or 5 years.

Water Supply.—We have always an abundant supply of water from the lake and river and springs.

Fire Protection.—We have fire-escapes from all our bed-rooms, we also keep an abundant supply of water in convenient places, and a few fire-extinguishers, also give particular attention to fires, stove-pipes and flues; keep no coal oil, except what is in the lamps in the buildings.

Heating and Lighting.—The buildings are heated with hot-air furnaces and stoves, and lighted with coal-oil lamps.

Recreation.—The principal game for the boys is football; they are also fond of skating and tobogganing in winter, boating and fishing and riding in the summer.

The girls are fond of basketball, boating, climbing the hills, and pony-riding, and indoor games in very good weather; skating is much enjoyed by them in its season.

Ex-pupils.—Most of our ex-pupils are settled on the reserves and engaged in farming; they are trying to do their best. Nearly all have built for themselves good log houses, with shingled roof, with neatness in their inside arrangements.

General Remarks.—All the pupils in the school are expected to spend two hours each day in manual work. The boys find work in sawing wood, feeding cattle, clean-

1 GEORGE V., A. 1911

ing stables, milking, and the girls in making up beds, sweeping, washing dishes and general housework.

We pay our children for any extra work. A boy who can handle a team in farm work receives at the rate of 10 cents an hour. In this way a boy may earn as much as \$3 in a week by attending classes half the day and working in the field the other half, and in this way may have to his credit at the age of 18 enough to give him a good outfit for farming.

In many cases, however, the parents like to draw the earnings of their children and we find it hard to refuse, and at the same time try to cultivate in the child love and respect for his parents.

THE REPORT OF REV. W. McWHINNEY, PRINCIPAL OF THE CROW-STAND BOARDING SCHOOL, PELLY AGENCY, SASK., FOR THE YEAR ENDED MARCH 31, 1910.

Location.—The school is situated on Coté's reserve, adjacent to the main line of the Canadian Northern railway, and $3\frac{1}{2}$ miles from the town of Kamsack.

Land.—The land consists of the fractional south half of section 19, township 29, range 31, west of the first principal meridian, and the fractional S.E. $\frac{1}{4}$ of section 24, township 29, range 32, west of the first meridian. Part of this land was purchased and part obtained by free grant. In all there is about 350 acres. The higher parts are suited for growing the ordinary grains, and the lower parts for pasturage.

Buildings.—These consist of the main school, with two wings, one for boys' recreation-room, on the ground floor, and store-rooms overhead; the other for hospital and isolation purposes. The main school contains class-room, kitchen, laundry, dining-room, dormitories, staff-rooms, &c. Besides these, there are the principal's residence, stone milk-house, frame shop, granary, stables and poultry-house.

Accommodation.—There is accommodation for from 50 to 55 pupils, and 7 of a staff.

Attendance.—During the year there have been 3 discharges and 5 admissions. The actual attendance at the close of the year is 52 pupils.

Class-room Work.—Work and progress continue very satisfactory. The number in each case is as follows:—

Standard	I.	18
"	II.	5
"	III.	19
"	IV.	9
"	V.	2

Farm and Garden.—This has been a very satisfactory year. Thirty-one and a half acres of wheat yielded thirty-two bushels an acre, and graded No. 1 Northern. Oats yielded forty-five bushels an acre. Roots and vegetables were also good. The boys receive a good training in all lines of farm work under a competent instructor. This includes the proper management of implements and machinery.

Industries Taught.—The boys receive a good practical training in mixed farming, while the girls receive a similar training in all lines of housework and sewing.

Moral and Religious Training.—By attendance at church services and Sabbath school and in the class-room Bible truths and principles of Christian character are inculcated.

SESSIONAL PAPER No. 27

Health and Sanitation.—Exceptionally good health has prevailed throughout the year. There have been no epidemics, and the doctor has not been called to the school once in the last nine months.

Water Supply.—There has been no material change in this vexed question. However, by another year we hope to report improvement.

Fire Protection.—A system of water tanks with hose on each flat, fire pails and hand grenades forms our fire-protection.

Heating and Lighting.—The building is heated with three wood furnaces and a number of stoves in outlying parts. The lighting is by coal-oil lamps as heretofore.

A new outside drain was installed during the year.

Recreation.—In winter the boys skate and coast, and also have many indoor games. The girls skate, coast, skip, &c., outside, and have a number of indoor games.

Ex-pupils.—The boys who have graduated in recent years are all here on the reserves. They are all farming more or less successfully. The girls are mostly married and when given a chance prove good housekeepers. Unsuitable marriages, along with the influence of older Indians, have seriously impaired the success of some. However, to work and farm the land is becoming 'a habit' with most. Formerly, farming was an incidental pastime done to please the agent.

THE REPORT OF REV. J. DE CORBY, O.M.I., PRINCIPAL OF THE BOARDING SCHOOL, KEESEEKOUSE RESERVE, PELLY AGENCY, SASK., FOR THE YEAR ENDED MARCH 31, 1910.

Location.—The southwest quarter of section 2, township 32, range 32, west of the 1st meridian, patented, and is the homestead of Father De Corby, O.M.I.

Land.—There are 160 acres of bush, which is good land and well adapted for farming purposes.

Buildings.—There are two buildings: the first is 35 x 60 feet, consisting of the kitchen, large refectory, chapel, class-room, parlour and recreation-room on the first story; and two dormitories, work-room, large room and two small rooms for the female staff of the school on the second story.

The other house is 20 x 35 feet, for the use of the boys and the gentlemen in charge, and consists of a large dormitory for boys, recreation-room, and two private rooms for the staff in charge.

Accommodation.—There is ample accommodation for a staff of 6 or 7 persons and 35 pupils.

Attendance.—The attendance is only of pupils classified in four standards, as follows:—

	Pupils.
Standard I.	11
“ II.	5
“ III.	8
“ IV.	3

The progress of these different standards has been very satisfactory.

Class-room Work.—This consists of reading, writing, a sufficient knowledge of arithmetic, and some knowledge of geography and history, to which we must add, as necessary to the progress and prosperity of their households, instruction in other essential industries. The boys, under the able direction of Father Brouillet, are instructed in general farm work.

1 GEORGE V., A. 1914

The girls, under the supervision of Misses Atwater and O'Donnel, are acquiring a love for work, and are taught the practice of economy, tidiness, and all the domestic industries leading to the formation of prosperous and happy homes, such as sewing, knitting, gardening, dairying, &c.

Moral and Religious Training.—The moral conduct of the pupils has been generally, exemplary, and the religious instruction given to them well complied with.

Health and Sanitation.—The health of the school has been exceptionally good during the past year. No serious disease called for the services of the doctor, and no occasion for any exceptional sanitary precautions arose.

Water Supply.—We dug a well last summer and from it we have, near by the school, an abundant supply of first-class water.

Fire Protection.—Our appliances for fire-protection are still primitive. Fire extinguishers, buckets, always full of water, in every room, ladders, &c., are available; but a fire-escape would make exit from the main building easier. Stoves and coal-oil lamps are used for heating and lighting.

Ex-pupils.—Five ex-pupils have left the school since its opening: 3 girls and 2 boys. One of the girls has been transferred to Qu'Appelle school, one is with her family, one has been discharged before time for moral misconduct. The boys are with their families, and are a good help to them.

THE REPORT OF REV. O. CHARLEBOIS, O.M.I., PRINCIPAL OF THE BOARDING SCHOOL, DUCK LAKE, SASK., FOR THE YEAR ENDED MARCH 31, 1910.

Location.—The school is located about half a mile from the town of Duck Lake.

Land.—The land in connection with the school, comprising 100 acres, belongs to the government. Adjoining the school land, there is one half section north-east of section 33, township 43, range 3, west 3rd meridian, which belongs to the corporation of the Oblate Fathers, but which is cultivated for the benefit of the school.

Buildings.—The main building consists of the entrance, principal's apartments, parlour and dining-room. The south wing is occupied by the sisters in charge, and the girls, while the north wing accommodates the boys. Both wings are commodious and comfortable, and sufficiently large. The other buildings are the following: bakery, laundry, sewing-room, milk-house, workshop, farmer's dwelling-house, storehouse, hen-house and a new stable.

The stable and barn were set on fire last autumn by the younger children while at play. Luckily help arrived in time to save the other wooden buildings with which it was connected. About 35 tons of hay were lost by the accident. A new stable, 100 x 35 feet, has been erected, the government generously contributing to this expense.

The new building gives shelter to both horses and cows, and answers the purpose of a barn, as the loft contains the hay for the cattle. It is situated on a more convenient site than before.

The interior of the boys' recreation-room has been re-arranged. This work was done by the boys under the supervision of the carpenter. The floor of the children's dining-room and the girls' recreation-room have been renewed in hardwood.

Accommodation.—There is ample accommodation for 50 girls, 60 boys, and a staff of 15.

Attendance.—The attendance has been most satisfactory during the past year. One hundred pupils, the authorized number, have been maintained without any difficulty.

SESSIONAL PAPER No. 27

Class-room Work.—The children apply themselves well and show great interest in their studies. For the first time since the foundation of this institution a grade VIII candidate presented himself for examination and passed successfully. This has been a great incentive to the other pupils, the result being that a class of nine, both boys and girls, are now preparing to take the same step.

A children's library, of the very best literary and moral character, has been added to the class equipment. The children are very fond of reading, and we notice a marked improvement in their oral expressions and written compositions.

Farm and Garden.—The spring sowing and the products for 1909, were as follows:—

	Acres.	Bushels sown.	Products.
Wheat.	61	124	1,130
Oats.	32	70	1,550
Barley.	3	6	120
Pease.	1½	2	18
Potatoes.	6	..	1,025
Turnips.	1	..	150

We were amply supplied with vegetables from our garden, such as carrots, beets, onions, celery, cabbage, parsnips, sweet corn, pumpkins, squash, cucumbers, popcorn, &c.

We had very good success besides with our tomatoes, which ripened plentifully this year.

Industries Taught.—The boys take turns at all work common to farm life, and the great interest they take in this kind of work is very encouraging for those in charge of them.

An expert carpenter has been employed to train the boys in building and repairing. They have shown themselves very skillful and eager to learn the trade. The stable referred to above was built entirely by them. In addition to all kinds of housework, including baking, butter-making, poultry-raising, &c., the girls continue their usual gardening, taking pride in adding some new feature to their culture each successive year. Last year a hedge of raspberry bushes thrived very well, and this year they propose to increase the quantity considerably.

The sewing department, including cutting and fitting by chart, continues to turn out excellent work. The junior girls, as well as the little tots, are knitting, darning and hemming even quite artistically.

Moral and Religious Training.—Lessons are daily taught to all the children, and by word and example nothing is left undone to form solid habits of virtue in their young souls that may enable them to continue in the path of right-doing when left to themselves.

Health and Sanitation.—Diphtheria made its appearance in the school at the end of June, 1909. Those who were attacked by the disease were immediately transferred to a vacant house, some fifty rods from the premises, and two sisters were quarantined with the patients in this improvised hospital. This epidemic would have had fatal results had it not been for the timely assistance of the department through the wise measures taken by our ever-watchful agent to prevent the spread of the disease. Happily not one succumbed to this malady.

Throughout the long but mild winter outdoor exercise was encouraged, and approved plans of ventilation in the dormitories give great satisfaction.

Our children are remarkably healthy this year; this is due, no doubt, to the good system of ventilation installed in our school, and to the solid food and cleanliness which they enjoy.

Water Supply.—The water is supplied from two artesian wells, one at the kitchen, and another at the laundry, where there is also a cistern for soft water. There are two dug wells, besides one at the office entrance and one at the stable.

1 GEORGE V., A. 1911

Fire Protection.—Our appliances in case of fire are 4 Hempel fire-extinguishers, 1 Victor, 3 Patton, 16 buckets, 6 axes, a tank and a force pump.

Heating and Lighting.—The entire house is heated by the excellent system of steam heat installed last year, and which continues to give perfect satisfaction.

The lighting is by acetylene gas, which gives very good light. The children have seldom any eye trouble now, though some years ago it was quite common.

Recreation.—Long walks in fine weather, picnics, sham sports, at which all kinds of children's games are entered into with ardour, make the recreation hours appear too short. Indoors the children take great pleasure in playing games of all kinds. Drills, marches, music and singing rehearsals enliven the winter evenings. Their annual entertainment was well attended and favourably viewed by the public. The singing, acting, marching and drilling were all well executed, the children showing less timidity than formerly.

Ex-pupils.—Four boys were discharged last year. One of them is hired out and doing well; the other three are on their respective reserves with their parents. Although these do not do as well as we desire, still their manner of living and habits of industry are a great improvement over those discharged in former years. Among the girls who have left the school and are yet with their parents, the moral conduct, without exception, is irreproachable. At the present moment, with the consent of the department, five of our girls, who are in their last year of school, are placed in good families in the neighbourhood of the school. Every one of them is giving good satisfaction. These girls are not confined to housework only, but do the cutting and sewing, and in every case the mistress claims that she prefers to do her household duties and let the school girls cut, sew and mend for the family, as they do it so deftly. In being thus looked upon as a member of the family, they are cultivating a taste for working in such homes rather than wasting time on the reserves in filthy tents.

Two of the boys who are to be discharged this year, are already ploughing and seeding on their reserve, under the direction of the principal. They have their building logs ready, and after seeding, we intend putting up their little residences, thus giving them a home immediately on their being discharged. We hope to follow this plan in the future so as to prevent relapsing into idle habits when the restraint of the school life will be withdrawn.

General Remarks.—From time to time we have the visit of our worthy agent, Mr. Macarthur. On January 6, accompanied by his secretary, he presided at an examination, and expressed his entire satisfaction with the staff and pupils. We were also honoured by a visit from Most Reverend Archbishop Dontenwill, superior of the Oblate missionaries. His Grace was most agreeably surprised to find such a flourishing institution in Duck Lake, which he was visiting for the first time.

THE REPORT OF MISS JEAN CUNNINGHAM, PRINCIPAL OF THE BOARDING SCHOOL, FILE HILLS, SASK., FOR THE YEAR ENDED MARCH 31, 1910.

Location.—The school buildings are situated on section 33, township 22, range 11, west of the second meridian, and adjoining the File Hills reserve.

Land.—The west half of section 32, township 22, range 11, west of the second meridian, and also all that part of section 33 which is outside of Okanase reserve, belongs to the school, in all 413 acres. It was bought and is owned by the Presbyterian Church in Canada.

SESSIONAL PAPER No. 27

The south part of this land is being cleared of brush and will be good grain-land. The north part is pasture-land and bluff.

Buildings.—These are the boarding school, class-room, two stables, granary, shed, two root-houses.

Accommodation.—There is accommodation for 18 children and a staff of 4. Besides this the 10 boys have slept in a tent winter and summer for the last three years.

Attendance.—There has been an enrolment of 33 during the year. Of these 4 were day pupils, 4 non-treaty and 25 treaty.

Class-room Work.—The work still under Miss Eastman's care received the same careful attention to physical drill and vocal expression, resulting in a good standing. There are 5 grades and the work in each is well up to standard.

Farm and Garden.—Our farm was a success this year. The crop yield was good. We had 40 acres of oats and $7\frac{1}{2}$ acres of wheat. Root yield is always a good one and was quite as large as usual.

The cattle provided more than our meat during the year.

We had sufficient wood this year for our school on the farm and have now ready the coming year's supply.

Industries Taught.—The girls are taught to be clean, neat housekeepers and home-makers. The graduating girl is given entire charge of the staff cooking, washing, ironing, and her own sewing, for her last school year. This is to teach her to plan for and meet the various conditions of a home.

The boys are trained in practical farming and gardening. They are taught the proper care of stock and to do general chores.

Moral and Religious Training.—There is religious instruction morning and evening daily. Scripture is memorized, and the idea of right and wrong is based on the teaching of the Bible.

Health and Sanitation.—The general health has been good. There was one case of serious illness during the year. The small boys' dormitory has been condemned as unsanitary. With its low ceiling and small windows, good ventilation was not possible. The glass from half the windows was removed and replaced by cotton, which was found to be a great improvement.

The girls' dormitory is well ventilated.

Water Supply.—We get water for drinking and cooking from a well in the yard. The supply has been gradually failing during the year. For cleaning purposes the water is brought from a slough.

Fire Protection.—We have fire-axes, pails, ladders, extinguishers, and a small lake at the foot of the lawn. In winter four barrels are kept filled with water.

Heating and Lighting.—One furnace and six stoves are used to heat the buildings. Coal-oil lamps furnish light.

Recreation.—Outdoor sports both in winter and summer are enjoyed every day both by girls and boys. Football, baseball, games, coasting, sliding, skating, swimming, swinging, are in their season thoroughly enjoyed.

Ex-pupils.—The six boy-graduates are living on farms in File Hills colony, and all doing well.

There are two girl-graduates. One is married and living in the colony. The other is living here at the school still, and has the position of cook. All the ex-pupils have made a good record since graduating.

1 GEORGE V., A. 1911

THE REPORT OF MR. M. WILLIAMS, PRINCIPAL OF THE BOARDING SCHOOL, GORDON'S RESERVE, TOUCHWOOD HILLS, SASK., FOR THE YEAR ENDED MARCH 31, 1910.

Location.—The school is located on the west side of Gordon's reserve, about 12 miles from the agency headquarters.

Land.—The area of land in connection with the school is 320 acres, and comprises the east half of section 4, township 27, west of the second principal meridian. This, I believe, has been allotted to the school by the government, and is best adapted for pasture. Twenty-five or thirty acres might be cultivated, there is no wood, and scarcely any hay, and the land is very stony.

Buildings.—The main building is used for school purposes. One building, separate from the school, is used for laundry; another for storehouse, ice-house, the same as last year. Stable, 20 x 40, for horses and cattle.

Accommodation.—There is ample accommodation for thirty-five pupils and four of a staff.

Attendance.—The attendance has been remarkably good during the year.

Class-room Work.—The pupils' course of studies is that laid down by the department; their progress has been fair.

Farm and Garden.—We did not attempt any farming. The garden consists of about three acres, on this plot we raised 500 bushels of potatoes, and an abundance of other vegetables of all descriptions.

Industries Taught.—The boys are taught the care of horses and cattle, milking, and gardening in the summer.

The girls are taught all household duties, butter-making, and care of same. Some of the girls are very proficient in household duties and bread-making.

Moral and Religious Training.—Very careful attention is paid to the pupils in this respect. Their moral conduct has been good, and no severe punishment has been administered.

Health and Sanitation.—The health on the whole has been good. After Christmas an epidemic of measles broke out, and I am glad to say that they recovered in a short time without serious results. The sanitary condition is all that can be desired, the building is kept clean and well ventilated.

Water Supply.—Our water-supply is obtained from a well, about 200 yards from the school, and is very good, also a good supply.

Fire Protection.—This comprises one Babcock, one pump, two lengths of hose, ten hand grenades, six axes, a tank, and several barrels.

Heating and Lighting.—The building is heated with wood stoves, and lighted with lamps and coal oil.

Recreation.—Football, and swings, form the favourite pastime of the children during the summer. Coasting, skating, and games in the school-room are their chief recreations during the winter.

Repairs.—A cement tank was put in the basement, some of the floors repaired, the building alabastined and painted inside.

Ex-pupils.—These are located on Gordon's and Poorman's reserves; occupations, farming.

SESSIONAL PAPER No. 27

THE REPORT OF REV. J. E. S. THIBAudeau, O.M.I., PRINCIPAL OF THE BOARDING SCHOOL, MUSCOWEQUAN'S RESERVE, TOUCHWOOD HILLS AGENCY, SASK., FOR THE YEAR ENDED MARCH 31, 1910.

Location.—The Muscowequan's boarding school is located about 12 miles from the Touchwood agency, and $\frac{1}{2}$ mile from the Touchwood Hills post office. The school is not situated on a reserve.

Land.—The land connected with the school comprises 160 acres, the northwest quarter of section 14, township 27, range 15, west of the second meridian, belonging to the Oblate order. About 50 acres of this land is under cultivation.

Besides the above the Oblate order have recently secured 320 acres, being the southeast and the southwest quarters of section 14, township 27, range 15, west of the second meridian, about 50 acres of which is under cultivation.

All the above parcels of land are fenced in with barb-wire.

Buildings.—The main building has been much improved by the addition of a three-story annex, 42 x 52 feet. The new building is of frame with stone foundation. The dormitory formerly occupied by the girls now serves as dormitory for the boys, and the old refectory has been converted into a play-room for the boys. This change gives them a large recreation-room so that they have ample space to enjoy any indoor game they may care to indulge in. The new addition is divided as follows: the basement contains a large refectory for the children, girls' play-room, sisters' refectory, kitchen, pantry and dairy-room; on the first floor are the entrance, parlour, chapel, class-room, infirmary for boys and 2 spare rooms. On the second floor are situated girls' dormitory, infirmary and clothes-room, the sewing-room and sisters' sleeping apartments.

Accommodation.—Under the present arrangement there is accommodation for 60 pupils and a staff of 15.

Attendance.—There are 40 on the roll and attendance is regular.

Class-room Work.—The programme of studies prescribed by the department is followed.

Farm and Garden.—The area under cultivation is 100 acres, with the following acreage: wheat, 45; oats, 30; barley, 20; and the remainder in potatoes and garden vegetables. We grow enough potatoes and other vegetables to supply the needs of our school.

Industries Taught.—The boys are thoroughly instructed in the different branches of farming and gardening. The girls, under the direction of the reverend sisters, are instructed in all branches of housekeeping, particular attention being paid to dress-making, tailoring and baking.

Moral and Religious Instruction.—The moral and religious training of children is carefully and strictly attended to. Religious instruction is given daily to all the pupils and they attend morning and evening prayers in the chapel.

Health and Sanitation.—The health of the children during the past year was generally good. There were no deaths during the year. The sanitary conditions are looked after carefully. Everything is kept clean about the house and the building is well ventilated.

Water Supply.—The water is supplied from a windmill and large tank. This tank was constructed last fall.

Fire Protection.—The school has been provided by the department with 2 Babcocks, fire-extinguishers and axes. Hose is attached to the water-supply.

Heating and Lighting.—The whole institution is heated by a steam furnace which gives thorough satisfaction. Lamps burning coal-oil supply the light.

1 GEORGE V., A. 1911

Recreation.—Outdoor games, weather permitting, are much indulged in, and long walks are frequently taken by the girls. The winter evenings are pleasantly passed in the enjoyment of indoor games and singing.

THE REPORT OF THE REV. FRANCOIS ANCEL, O.M.I., PRINCIPAL OF
THE BOARDING SCHOOL AT LAC LA PLONGE, SASK., FOR THE
YEAR ENDED MARCH 31, 1910.

Location.—The school is situated north of the junction of the Castor river and La Plonge river, apparently on the limits of the 71st and 72nd townships, 2nd range, west third meridian. I say, apparently, for we are on land not yet surveyed.

Land.—As the country is not yet surveyed, we have not the title of the land, but we expect to have it at an early date from the Department of the Interior.

Buildings.—The main building is of wood, three stories high, 100 x 34 feet, and comprises on the first story: kitchen, two dining-rooms, two recreation-rooms, refectory, pantry, pharmacy.

Second story comprises: chapel, sewing-room, two class-rooms, dormitory.

Third story: two dormitories, large wardrobe.

A presbytery, three stories high, 26 x 36 feet, was built last year.

A wash-house, two stories high, 16 x 30 feet.

A barn, 25 x 60 feet, and a saw-mill shelter, 34 x 44 feet, complete the school property.

Accommodation.—There is accommodation for 60 children.

Attendance.—All the children being boarders, the attendance is regular.

There was one discharge, two died of consumption. There were two admissions during the year.

Class-room Work.—Two teachers have charge of standards in different rooms. The subjects taught are those prescribed by the school programme: reading, spelling, writing, drawing, grammar, arithmetic, geography, and general knowledge.

Farm and Garden.—The land (fenced) adjoining the school is about 25 acres, whereof 8 acres are cultivated. The soil is light and sandy, very good to cultivate potatoes, oats, barley, and other garden products. Most of our land is still covered with wood and the grubbing is very hard work, but remunerative. Last autumn 500 bushels of potatoes were gathered, as well as other garden products.

Industries Taught.—The girls are taught the different kinds of household work, as cooking, knitting, sewing, mending, washing, and ironing.

The boys help in the garden, and in feeding the cattle.

Moral and Religious Training.—Great care and special attention is given to this part of education, and no effort is spared to instruct our pupils thoroughly in principles of faith and religion. They attend divine service regularly.

Health and Sanitation.—With the exception of a slight attack of measles, and a few colds, the children's health was good.

Two children died, one at the age of twelve, who was lame since his birth; the other, at the age of nine, died of consumption.

Water Supply.—The La Plonge river furnishes us water, just as clear as crystal, which is excellent for the kitchen purposes. The water is forced from the river into the kitchen by means of a ram.

Fire Protection.—The house is well provided with three inside stairs and two outside stairs, by which escape is made very easy in case of fire.

Heating and Lighting.—The house is heated with stoves, and lighted with coal-oil lamps.

SESSIONAL PAPER No. 27

Recreation.—All recreation is taken in the open air as much as possible, even in winter. Football, racing, jumping, croquet, and sometimes canoeing, are their chief amusements. During winter, the boys especially, are fond of sleighing.

Remarks.—A post office has just been established here at La Plonge. Our mail used to come from Green Lake post office.

All the new buildings were made at our own expense (that is to say, the presbytery, wash-house, barn and saw-mill shelter), not having received any supplies from the department.

THE REPORT OF THE REV. M. B. EDWARDS, PRINCIPAL OF THE BOARDING SCHOOL AT LAC LA RONGE, SASK., FOR THE YEAR ENDED MARCH 31, 1910.

Location.—This school is situated on the western shore of Lac la Ronge, about $1\frac{1}{2}$ miles from the mouth of Big Stone river. The buildings are facing south, and we have from here a beautiful view of the lake, which is dotted with numerous islands.

Land.—The land in connection with the school was surveyed last summer. It is mission property, and belongs to the Church of England, a frontage of half a mile in length and extending back a quarter of a mile.

Buildings.—The two buildings, which were erected by Rev. James Brown, late principal of the school, are frame structures directly adjoining, measuring 80 x 26 feet and 30 x 42 feet, each two stories high. The outbuildings consist of a carpenter-shop, store-room, stable, milk-house, hen-house with the usual small outbuildings. Likewise, there is a log house occupied by our fisherman.

Accommodation.—There is accommodation for 60 children, and a staff of 6.

Attendance.—There are now 56 children on the roll; 54 of these being under the per capita grant, the remainder are non-treaty children, and the expense of their board and tuition is paid by private sources.

Class-room Work.—The programme laid down by the department has been followed as closely as possible.

Farm and Garden.—There were three acres under cultivation last summer, the greater part being used for the growing of roots and vegetables. Our stock comprises 3 head of cattle and 1 horse.

Industries Taught.—The boys do the work around the school, such as chopping wood, fishing and gardening, likewise attending to stock.

The girls are instructed in domestic work, including housekeeping, baking, cooking, laundry, sewing, knitting, and dairy work.

Moral and Religious Training.—The children attend all the regular church services on Sunday. The religious instruction is that of the Church of England. In both class-rooms religious teaching is given every day for half an hour by both teachers. Likewise during the week I have two classes for religious instruction. Morning and evening prayers and the reading of the Scriptures is observed daily.

Health and Sanitation.—The health of the children has been excellent during the year. Cleanliness and ventilation are well attended to, and the sanitary condition of the school is excellent.

Water Supply.—The water, which is drawn or carried from the lake, cannot be excelled for purity.

Fire Protection.—We have comparatively no protection against fire, except assiduous care and watching. There is one fire-escape.

Heating and Lighting.—We use stoves for heating, and lamps for lighting.

1 GEORGE V., A. 1911

Recreation.—The children enjoy the ordinary outdoor sports and games.

Ex-pupils.—There is only one pupil who has been formally discharged, Aurora Roberts. She is now married to William Bear, an ex-pupil of Battleford industrial school. They are both a credit to the school in which they received their education. They are living near the school, and are much respected.

General Remarks.—On account of my very recent appointment to the principalship of this school, my remarks are necessarily brief.

THE REPORT OF REV. E. J. CUNNINGHAM, PRINCIPAL OF THE ROMAN CATHOLIC BOARDING SCHOOL, UNION LAKE, SASK., FOR THE YEAR ENDED MARCH 31, 1910.

Location.—This school is situated on Seekaskootch reserve, about twelve miles from old Fort Pitt, on the north side of the Saskatchewan river.

Land.—About seven or eight acres of land are fenced in and set apart for the use of school purposes, buildings, gardens and playgrounds.

The land belongs to the Indians of the reserve.

Buildings.—The buildings are three separate frame buildings put up at different periods, but now connected by winding stairs from first floor to third floor of the building.

The main building is 45 x 35 feet, three stories high. On the first floor is junior class, 25 x 35 feet, 9½ feet high, this room serves as boys' recreation-hall in winter; pupils' refectory, 20 x 35 feet, 9½ feet high. On second floor is the senior class, 25 x 23 feet, 9½ feet high. Girls' sewing-room and recreation-room, 20 x 35 feet, 9½ feet high. Pupils' infirmary, 22 x 25 feet, 9½ feet high. The third story is one vast room, 45 x 35 feet, 8½ feet high, used as girls' dormitory, the attic is used as wardrobe and storehouse for the girls' clothes, it is 45 x 25 feet.

The second building is 36 x 26 feet, 33 feet high. First floor dining-room for staff, 13 x 16 feet, 9½ feet high. Kitchen, 20 x 26 feet, 9½ feet high. Second floor, private chapel for the sisters and pupils, 26 x 36 feet, 9½ feet high. The third floor is the boys' dormitory, 22 x 36 feet, 8 feet high, to this building is attached storehouse and pantries.

The third building is a log building, 25 x 30 feet, two stories are occupied by the sisters. The buildings are kept in good condition and are also comfortable and convenient.

Accommodation.—There is ample accommodation at present for 70 pupils.

Attendance.—The average attendance during this term has been 49.

There have been 3 discharges and 5 admissions since last March.

Class-room Work.—Two teachers have charge of the classes in separate rooms. The programme of studies prescribed by the department is followed closely.

The class-work is done neatly with application and emulation. The pupils like to study and show much encouragement. Half an hour is given every day for singing, the pupils form the church choir. They are able to sing in Latin, English and Cree.

Farm and Garden.—About three acres of land are cultivated for gardening, sufficient vegetables of all kinds are raised. Both boys and girls take an active part in the garden work.

Industries taught.—The boys have the care of horses and cattle, the preparing of fuel, bakery and cobbling.

They enjoy greatly going to the hay camp during vacation to help about for a few weeks.

SESSIONAL PAPER No. 27

The girls are instructed in all the branches of housework, cooking, washing, ironing, hand and machine sewing, darning and knitting, they are also very fond of music, several have been learning how to play the mandolin and are able to play many pieces.

Moral and Religious Training.—Great care and special attention is given to this important part of education. Every effort is used to instil morality and righteousness into the hearts of the children. Besides their morning and evening prayers said in common, there is half an hour each day given to religious instruction. The conduct of the pupils has been very satisfactory.

Health and Sanitation.—In general the health of the pupils is good, though we lost one boy in March after a few months' illness; he died of consumption.

Dr. Amos, of Lloydminster, the school physician, visited the institution as usual. There is nothing lacking in the attention given to the sanitary condition of the school: daily ventilation, disinfectants and plenty of fresh air are provided.

Water Supply.—Plenty of good water is supplied from a well a few rods from the house.

Fire Protection.—A well, tank with pumps, ladders, pails, axes and barrels of water are kept in readiness. From both boys' and girls' dormitories are exits on each side. Stairs lead down to the first floor, with doors opening outwards as required by the department. Twelve dry dust fire-extinguishers are also set up in different apartments. Fire-drills are given frequently to the pupils, without previous notice. All is done promptly and in an orderly manner.

Heating and Lighting.—The buildings are heated with fourteen wood stoves, the house is comfortable. Coal-oil lamps are suspended to the ceiling in the pupils' apartments.

Recreation.—Outdoor games are allowed daily. The boys enjoy football, baseball and other sports, while the girls enjoy swinging, croquet and lawn tennis.

General Remarks.—At different times during the year the children give entertainments consisting of drills, dramas, and singing accompanied by ten girls with mandolins. These mandolins were given to the pupils by friends of the institution.

Before ending my annual report, I gratefully acknowledge the kindness of the department in supplying us with a monthly journal entitled 'Canadian Life and Resources,' and also for two interesting volumes, 'People of the Plains,' written by Amelia M. Paget, which the pupils appreciate greatly.

THE REPORT OF REV. J. R. MATHESON, PRINCIPAL OF THE CHURCH
OF ENGLAND BOARDING SCHOOL, UNION LAKE, SASK., FOR THE
YEAR ENDED MARCH 31, 1910.

Location.—The school is situated on the northeast corner of Makaoos reserve, about 300 yards southwest of the agency headquarters.

Land.—There is about 30 acres of land in connection with the school and mission, this land being part of the reserve.

Buildings.—The present school-house is a frame building, 30 x 40 feet, 3 stories high, finished and painted throughout. The lower floor is one large class-room. The second floor is divided into rooms for members of the staff and the larger boys, and is reached by an outside stair. On both these floors the partitions and ceilings are finished with steel ceiling. The third floor is one large dormitory for the small boys, and is reached by an inside stair from the second floor.

1 GEORGE V., A. 1911

Ventilation and light have been carefully provided, there being 11 windows on each floor, with a fanlight on each window; while on the upper floor extra ventilation is secured by a hinged window and a trap-door in the roof, which can be opened at pleasure.

The hospital is a three-storied building, well finished throughout and ready for occupancy, but since the epidemic of whooping-cough and measles in 1908, we have had no Indians as in-patients.

Between the school-house and the hospital stands another log building, 20 x 22, 2 stories. The lower floor is divided into 2 rooms used as bed-rooms for the large boys and the school teacher. The upper floor is a sewing-room, reached by an outside door. Close to this, a log store-room, 15 x 20 feet, with an upper and lower floor, used for storing meat. Our other storehouse, a frame building, 18 x 24, has been enlarged and is now 18 x 50 feet, and includes a store-room and a wood-shed. The walls are covered with iron sheeting outside.

The mission house, which forms the quarters of the staff and all the girls of the school, is made up of 6 buildings, erected at different times, but all connected. Any one of the four outer doors gives access to the whole building, which is about 60 feet square. On the lower floor is the principal's office, Indian waiting-room, dispensary, sitting-room, and bed-rooms, two large dining-rooms, a kitchen, well-room and a bath-room.

The upper floors are used as bed-rooms for the staff and girls' dormitories. One of the dormitories has an outer door leading to a balcony, also reached by an outside stair so that a fire-escape and free ventilation are both provided. There is also a cellar under the house, 20 x 30 x 7 feet.

The stables are very commodious and comfortable.

Accommodation.—We have ample accommodation for 70 pupils and a staff of 8 or more if necessary.

Class-room Work.—Here very satisfactory progress has been made in English-speaking as well as in general class work. We have only one teacher at present, but hope to have a second about the middle of May.

Farm and Garden.—Our garden land covers about 5 acres, and last year we raised sufficient vegetables to supply the whole school. The work is done by the staff and children.

Industries Taught.—The boys are taught carpentering and building, but they also have care of the stock and assist in haymaking and gardening. The girls are taught housework in its different branches.

Moral and Religious Training.—Particular attention is paid to this part of work by each one of the staff, realizing as we do that without this training all our other work is useless.

Health and Sanitation.—The health of the children has been excellent during the year. No cases of anything like serious illness have occurred, although there is always a certain amount of daily dispensary work among any large family of children.

Water Supply.—We have three wells and a sufficient supply of good water.

Fire Protection.—Two small chemical and one dozen Eclipse fire-extinguishers with wells and plenty of water in two of our large buildings are all the protection we have, with constant watchfulness. The doors of the dormitories all have been hung to open outwards.

Heating.—All the buildings are heated with good stoves. Where there is any danger of the children playing with fire, we use top-draught stoves, so that it is almost impossible for them to reach the fire.

Recreation.—The principal recreations are football, cricket, swings, skating, and foot races.

General Remarks.—For the first time since the beginning of this work we have had new buildings to erect and very little repairing except the laying of two new floors, but this year will bring quite a lot of necessary repairing to be done.

SESSIONAL PAPER No. 27

THE REPORT OF REV. H. DELMAS, O.M.I., PRINCIPAL OF THE BOARDING SCHOOL, THUNDERCHILD'S RESERVE, BATTLEFORD, SASK., FOR THE YEAR ENDED MARCH 31, 1910.

Location.—The Thunderchild's (St. Henry) boarding school is on the Roman Catholic Mission land, about half a mile north of Delmas station.

Land.—The land in connection with the school consists of the southeast quarter, section 6, township 46, range 18, west of the third meridian, patented.

Buildings.—The school is of frame construction. The foundations are of stone. The interior of the main building is plaster finish except the ceilings, which are of wood. This building is 36 x 28 feet, 2½ stories high, with an annex at the south end 36 x 28 feet, 3 stories high.

Accommodation.—There is accommodation for 50 children and 9 sisters.

Attendance.—The attendance was good during the past year. The sale of the two reserves, 'Moosomin and Thunderchild,' has not decreased the number of our pupils; parents living only 18 miles from our school-house, consented to leave their children here until the entire expiration of their school term. A good number of our pupils are drawn from the two adjacent reserves, Poundmaker and Sweet Grass.

Class-room Work.—The programme of studies, prescribed by the department for Indian schools, is carefully followed. The pupils are studious and the progress is satisfactory.

Farm and Garden.—Our garden has yielded 175 bushels of potatoes, 1 bushel of tomatoes, which ripened in the open air last year, and a quantity of other vegetables. Our four cows supply us with milk throughout the year.

Industries Taught.—The boys are taught farming, and on washing days they also assist the girls with the heavy laundry work. The girls are trained in all the branches of domestic work, such as washing, ironing, mending, and all needle-work, in which they delight.

Moral and Religious Training.—The moral and religious training is strictly attended to. Besides their morning and evening prayers, said in common, there is half an hour daily for the teaching of the doctrine of the Roman Catholic Church, to which they belong. Respect and obedience to all authorities are continually insisted upon.

Health and Sanitation.—With the exception of one boy, who died from the after-effects of whooping-cough, the health of the pupils was good during the past year. The ventilation is excellent, and the children are allowed to take outdoor exercises several times daily.

Water Supply.—Our well, which is at hand, gives us a sufficient supply of water.

Fire Protection.—Our dormitories are provided with exits, and two barrels of water are always kept in readiness. On the first story are a few axes, and doors opening outwards.

Heating and Lighting.—The buildings are heated with two hot-air furnaces. The fuel used is wood. Coal-oil lamps are used for lighting purposes.

Recreation.—Outdoor games such as football, baseball, coasting and military drills are preferably enjoyed by Indian children, though cards and checkers, in winter evenings, seem to be of great attraction to them.

Ex-pupils.—Only a few pupils have left the school since the opening of it, which was nine years ago. Most of them live with their parents. Farming and hunting are their chief occupations. The missionaries are satisfied with their moral conduct and the agent with their work.

1 GEORGE V., A. 1911

General Remarks.—On October 16 we had the pleasure of becoming acquainted with our new inspector, Mr. McKenna. The pupils sang a welcome song, which they rendered well. On December 18 they also had a public entertainment, the programme was as follows: 'Dumbell Drill' for boys, and 'Rainbow Drill' for girls; songs and recitations. The audience was much interested, and found it a great progress and a real success.

THE REPORT OF REV. ARTHUR BARNER, PRINCIPAL OF THE INDUSTRIAL SCHOOL, RED DEER, ALTA., FOR THE YEAR ENDED MARCH 31, 1910.

Location.—The school is salubriously situated on the north bank of the Red Deer river, about 3 miles in a direct line from the town of Red Deer, but on account of the windings of the river, the actual distance is about 4½ miles. We have a beautiful location and a very fine view of the surrounding country, a rolling prairie varied by river, creek and bush. The school is not situated on a reserve, the nearest one being about 40 miles to the north.

Land.—There are three quarter sections of land where the buildings are situated, being part of section 14, township 38, range 28, west of the fourth meridian; also some 14 acres of section 11, which lies between the original school property and a deep gully to the southwest, and was later added by gift of the government. In addition we have half, each, of sections 16 and 20, hay-land. The whole acreage thus under control of the school amounts to 1,140 acres, and is the property of the Department of Indian Affairs. The three quarter sections of 14, consist of the best black loam soil, and are admirably adapted for mixed farming and gardening.

Buildings.—The main building is of gray stone, quarried from the river bank immediately below. It contains the dormitories for the girls, as well as all the boys under ten years of age, private rooms for lady members of the staff; staff dining-room and sitting-room; general dining-room; kitchen; laundry, store-rooms; sewing-room and principal's office.

A three-story brick building accommodates the bigger boys. The ground floor of this building contains reading-room, lavatory, gymnasium and two private offices used by the vice-principal. The second story is the dormitory, and the third story forms the school-room, which is also used for chapel purposes.

In addition to these larger buildings, there is a neat and commodious residence for the principal, three cottages for married members of the staff, a blacksmith and carpenter's shop, ice-house and refrigerator combined, pig-house, horse-stable, cow-stable, hen-house, dairy, engine-house, implement shed, well-house, granary, private stable and three closets.

Accommodation.—There is accommodation for 75 pupils, and a staff of 10.

Attendance.—The year began with 48 names on the roll, and 43 in actual attendance. The record of the year is as follows:—

Number on roll.	48
Admitted during the year.	18
	—
Total.	66
Died.	0
Discharged.	5
Dropped.	0
	— 5
	—
Total number on roll.	61
Total number in attendance.	60

SESSIONAL PAPER No. 27

Class-room Work.—The half-time system is carefully followed, and another very successful year has been spent in this department. During the year Mr. Shaw found it necessary to leave in order to prepare for university work, and Mr. F. J. Dodson succeeded him. He holds a second-class professional certificate, and has proved a very sympathetic and thorough teacher. At the close of the year the grading of the pupils is as follows:—

Standard	I.	26
"	II.	9
"	III.	7
"	IV.	5
"	V.	9
"	VI.	5
Total.		61

Farm and Garden.—Last season we had about 234 acres of land under cultivation as follows:—

Fall wheat.	26	300 bush.
Oats.	102	2,450 "
Barley.	18	300 "
Timothy.	29	60 tons.
Green feed.	16	Good yield.
Potatoes.	4½	400 bush.
Roots and garden.	1	Good yield.
Summer fallow.	37½	
		234 acres.

We have live stock as follows:—

12 horses valued at.	\$1,850
20 cows valued at \$35 each.	700
13 steers valued at \$20 each.	260
26 young cattle valued at \$20 each.	520
1 thoroughbred cow valued at \$150.	150
1 thoroughbred bull valued at \$125.	125
4 pigs.	64
78.	Total. \$3,669

A severe hail-storm swept over the district in July, last, this accounts for the comparatively meagre yield of grain and potatoes.

Industries Taught.—Farming and cattle-raising are the chief industries in which the boys are trained. This is quite appropriate, for all our pupils come from good agricultural districts. Mr. Charles Hives has been in charge of this department during the year, and it is safe to say that under his tuition the boys have taken a much more intelligent interest than ever before in their work.

When there are improvements being made around the estate, the boys are instructed in carpentry, painting, paper-hanging, &c., by Messrs. T. H. Lockhart and J. S. Kendell, who are professional men at their trades.

There have been some changes in the lady membership of the staff, but the same high standard of domestic training is sustained under Miss Cummings, as matron; Mrs. Hopkins, as cook; Miss Archibald, as laundress, and Miss Slack, as seamstress.

Moral and Religious Training.—This department of effort has been well guarded and developed. All the regular services have been faithfully conducted. Divine ser-

1 GEORGE V., A. 1911

vice morning and evening, with Sunday school in the afternoon of every Sabbath. Daily prayers morning and evening of a bright cheerful character. Voluntary services have been conducted once a week each for boys and girls. Good numbers have attended. But we find that our most effective work is in the personal grip and influence. These children need much training and encouragement to enable them to overcome the dreadful handicap of heredity and early influence.

Health and Sanitation.—We have enjoyed a marvellous year in this regard. No deaths and no sickness, with the exception of colds and such like minor ailments. The medical officer pays many a visit just to turn round and return to town without touching a pupil. There is not a child in the school with weak lungs and the few cases of scrofula that we have are being very successfully treated by building up the constitution and thus giving power to throw off the disease. All the buildings are kept clean and well ventilated.

Water Supply.—An abundant supply of pure spring water is pumped through the two main buildings by steam power and stored in tanks. Also a second well is in working order, with hand-pump, and in close proximity to the buildings.

Fire Protection.—We have the water tanks and thirty-six dry dust fire extinguishers, also two modern fire-escapes. Our best fire-protection has proved to be in keeping of chimneys well cleaned and care in handling the furnaces.

Heating and Lighting.—Two Smead-Dowd and two Pease furnaces have kept the main buildings and the principal's house comfortable during the past winter. The cottages are heated with wood-stoves. Coal-oil is used for lighting in all the buildings excepting the girls' building, in the basement and on the ground floor, where we have this winter installed seven gasoline gas lights, which have added much to the brightness and cheer of the building. These lights have given perfect satisfaction.

Recreation.—The girls have found ample recreation all winter on the skating rink, which has been kept open on the river. In the summer they walked and played all the seasonable games.

The boys organized two hockey teams, and under the able management of Mr. Royston, who was acting as engineer at the school, a series of matches was played. In the summer all the games in the calendar are indulged in.

Reading still continues to be one of the favourite forms of recreation. We have a reading-room for the boys and one for the girls, where current newspapers and magazines are kept on file. We keep adding good books to the library, which now contains considerably over one hundred volumes all systematically cared for.

Ex-pupils.—Silas House. Has been working on railroad construction.

Alexander Reindeer. In the school just short period and now at White Whale Lake, with his guardian.

Willie and Madge Foureyes. These were very small children and their parents would not allow them to stay.

Elizabeth Lapotac. A delicate child at home with her parents.

General Remarks.

(a) General Repairs.—Although no special provision has been made by the department for improvements this year, we have not been unmindful to the great need of constant effort to repair and install according to our means. Sufficient money has been saved from the annual income to install a gasoline gas-light system in part of the main building; to re-furnish the children's dining-room with new tables and benches, and to place new washing-machines in the laundry, besides minor improvements too numerous to mention. The farm, which is fenced with posts and barbed wire, has been thoroughly repaired and new fences placed around the yards and stables.

(b) Relationship with the Reserves.—The efforts mentioned in the report for last year seem to have been well directed, for the antipathy on the part of the Indians,

SESSIONAL PAPER No. 27

so pronounced three years ago, is almost altogether gone. Quite a large contingent of new pupils has come in from the White Whale Lake reserve, and the action of the Rev. R. B. Steinhauer in bringing his only son here this spring to be fitted for entrance to Alberta College, Edmonton, will have a very good influence on the Indians on the northeastern reserves. The Indians are realizing as never before the great handicap under which their children will labour if deprived of a modern education. The work is slow but sure.

(c) *The Efforts and Influence of the Staff.*—Under this head I pointed out last year the great strain upon the workers consequent upon the constant decrease in attendance. The fact that our actual attendance during the closing year went up by seventeen relieved the situation very much, and has enabled the workers to turn their efforts into other channels, such as inspiring the children with higher ideals of life, and more careful training in the duties of the hour. I am thankful to know that I am surrounded with a company of co-labourers who are not actuated by selfish motives, but are devoting much of their time 'off duty' in seeking to develop a noble character in the pupils of the school.

(d) *A New Development.*—Three years ago it seemed to be a great problem to keep the boys at school after they were brought here; for many attempts, successful and otherwise, were constantly made to desert from the school. This year such a thing has been practically unknown. Whereas then the dormitories were kept locked at night, now the key is never turned in the door at night, and the boys are responding nobly to the trust confided in them. Two boys have applied to be allowed to remain at the school during the summer holidays, giving as their reason, 'We do not want to go to the reserve, for we are lazy there.' These are all hopeful signs in the evolution of an aboriginal people, and we ascribe all praise to Him Who alone is able to ennoble the peoples of the earth.

THE REPORT OF REV. J. RIOU, O.M.I., PRINCIPAL OF THE INDUSTRIAL SCHOOL (ST. JOSEPH'S), DAVISBURG, ALTA., FOR THE YEAR ENDED MARCH 31, 1910.

Location.—The school is situated on the west bank of the High river, about $\frac{3}{4}$ of a mile from its mouth. The school is 4 miles from Davisburg post office, and 11 miles from DeWinton station, our nearest railroad station. The school is not on a reserve.

Land.—There are 1,870 acres of land in connection with the school. The home-farm contains 1,063 acres, as follows: the east half of section 22, township 21, range 28; half of the southwest quarter of section 26, township 21, range 28; 30 acres of section 15, township 21, range 28; and 633 acres of section 27, township 21, range 28, all west of the 4th meridian. The east half of section 26, township 20, range 27, and $\frac{3}{4}$ of section 36, township 20, range 27, west of the 4th meridian, are held as a hay reserve, and are situated about 12 miles southeast. All this land belongs to the government. The home-farm comprises good bottom and bench land. The hay-reserve land is situated in a low-lying district, which is well suited for hay and grass.

Buildings.—There are two main buildings, one for the boys, and the other for the girls. The boys' building contains dormitories, class-rooms, lavatories, recreation rooms, infirmary, office, and rooms for the principal and male members of the staff. The girls' building contains dormitories, class-room, sewing-room, chapel, kitchen, refectory, infirmary, lavatories, and rooms for the female members of the staff.

1 GEORGE V., A. 1911

The workshops, bakery and lumber-sheds are situated to the west of the main buildings, and the pump-house and laundry are to the east. The coal-sheds, store-room, and hen-house, are to the rear of the girls' building, and the farm buildings, corrals, wagon-sheds, implement-sheds, slaughter-house, and piggery, are further back.

During the year a new floor was laid in the senior boys' recreation-room, and also in the junior boys' recreation-room. New steps were put in in the stairs leading to the two dormitories. Numerous other repairs were made to buildings, sidewalks, and furniture. A considerable amount of painting was done, and at present we have material on hand to complete the work.

Accommodation.—There is accommodation for 125 pupils and the necessary staff.

Attendance.—There was an attendance of 62 pupils.

Class-room Work.—The half-day system is in vogue for the older pupils. Half of the day is spent in school and the other half at their trade. Regular school hours are observed. The school hours are 9 a.m. to 12, noon, and 1.30 p.m. to 4 p.m. The junior pupils attend school morning and afternoon. The authorized programme of studies is adhered to as closely as possible. The progress of the pupils has been very satisfactory.

Farm and Garden.—We had about 250 acres under cultivation and had good returns. We grow all our own vegetables. Both boys and girls are taught gardening.

Industries Taught.—*Farming*.—This is the principal industry taught. The pupils are taught farming and stock-raising in their different branches, and under the direction of a farm instructor do all the work. The pupils take quite an interest in the work. All the boys and girls learn to milk.

Carpentry.—The boys, under the instruction of the school carpenter, did all the repairs and building during the year.

Needlework.—Under the direction of the reverend sisters the girls are taught sewing, dressmaking, knitting, machine sewing, fancy and plain needlework.

Housekeeping.—The girls are thoroughly instructed in the art of housekeeping and cooking.

Moral and Religious Training.—The pupils are well grounded in the principles and doctrines of their religion. A half hour each day is devoted to religious instruction.

Health and Sanitation.—The health of the pupils during the year has been good. The sanitary condition of the school is good. The premises are kept neat and clean.

Water Supply.—An abundant supply of water is obtained from the High river. The water is filtered into a well and then pumped into tanks in the main buildings.

Fire Protection.—The buildings are well supplied with stairs and fire-escapes. There are two water tanks in the boys' building, and one in the girls' building, each with a capacity of 1,400 gallons. About 50 feet of hose on each flat is connected with these tanks. There are also 18 fire-extinguishers, 48 hand grenades, 40 fire pails, and 8 fire axes.

Heating and Lighting.—The two main buildings are heated by steam. Each building has its own plant. Both give excellent satisfaction. The buildings are lighted by acetylene gas.

Recreation.—In winter hockey is the favourite game, while in summer baseball, football, archery, are indulged in by the boys. The girls play basket-ball, skip, swing, coast, and take long walks when the weather permits. Both the boys and girls have large well lighted play-rooms, where they pass their recreation in bad weather.

Ex-pupils.—The ex-pupils for the most part have taken up work on the different reserves to which they belong; most of them are engaged in farming and cattle-raising, and are doing well.

SESSIONAL PAPER No. 27

THE REPORT OF REV. GERVASE E. GALE, PRINCIPAL OF THE CHURCH OF ENGLAND BOARDING SCHOOL, BLOOD RESERVE, ALTA., FOR THE YEAR ENDED MARCH 31, 1910.

Location.—The school is situated some fifteen miles southeast of Macleod, which is our mailing office. The school is opposite the agency, and is separated from it by the Belly river.

Land.—The land, which is prettily situated and well watered, comprises an area of 160 acres. Its natural features are very pronounced. On the north and east it is bounded by the Belly river; on the south and west it is surrounded by trees. The soil is a light loam and well adapted for farming and gardening.

Buildings.—The buildings are uniformly painted and present a pleasing appearance. They are built around a square. At the northwest corner of its western side is the girls' home, a commodious building affording accommodation for thirty girls. Immediately south stands the school chapel, a neat building, roomy, well lighted and ventilated. At the end of the west side is the horse stable, with harness-room and granary. On the south side is the boys' home, which is an old building almost beyond repair. On the east side stands the hospital; this is an excellent building containing two large and airy wards, dispensary, bath-room, kitchen and back kitchen on the ground floor, as well as three rooms upstairs. On the north side stands the rectory.

Accommodation.—There is accommodation for 60 pupils, and a staff of 8.

Attendance.—The attendance has been very regular. The number on the roll is 44.

Class-room Work.—Good progress has been made in all branches.

Farm and Garden.—We had 35 acres in oats, 15 acres of which was green feed, and 20 acres were threshed yielding 1,200 bushels of grain. In addition we harvested 10 acres of timothy, 2 acres of alfalfa, 2 acres of brome grass, and about 10 tons of prairie hay; 2 acres of sugar beets, and 1 acre of turnips gave excellent returns. Our kitchen garden was a success, although our potato crop was more or less a failure owing to the dry summer.

Industries Taught.—The boys learn farming and gardening. They are taught how to handle, feed, and groom horses. This is a very necessary part of an Indian lad's education, and one which should receive more attention. The same system is followed with stock. A boy is an apt pupil and a good imitator, and Indian boys are no exception to this rule. If he is properly instructed for his future work in life when he is of an impressionable age, there is little doubt that success will attend him throughout it. The girls are instructed in housekeeping, cooking, dairying, dressmaking, darning, and fancy-work.

Moral and Religious Training.—Definite church teaching is given. Matins and evensong are said daily.

Health and Sanitation.—The health of the pupils has been excellent. Pits are regularly disinfected and no refuse is allowed to lie exposed.

Water Supply.—We have good water. The garden has a well which is governed by a windmill.

Fire Protection.—We are fairly well off in this department. Our fire-pails, hand-grenades, and axes are always ready in case of an emergency. The exits from the several buildings are sufficient to ensure safety to life.

Heating and Lighting.—The buildings are heated by hot-air furnaces and stoves, and lighted with coal-oil lamps.

Recreation.—All sports are encouraged, and heartily participated in. Drill is carried out, and it is my intention to organize a company of boy scouts here. I

1 GEORGE V., A. 1911

cannot think of any finer recreation than this, for it is sure to bring out and intensify the keenness of perception which the Indian already possesses. We have an excellent band of 25 members, and three successful concerts were given at three near-by towns early in the winter.

General Remarks.—Many improvements have been made in the appearance of the square since my last report. We have now 8,000 trees under cultivation, and this entails a lot of extra work, but it is certainly worth while.

THE REPORT OF REV. J. M. SALAUN, PRINCIPAL OF THE ROMAN CATHOLIC BOARDING SCHOOL, BLOOD RESERVE, ALTA., FOR THE YEAR ENDED MARCH 31, 1910.

Location.—The school is situated about 25 miles south of Macleod, one mile from the upper agency, within a few yards of the Belly river on the Blood reserve.

Land.—The land (about five acres) connected with the school, belongs to the reserve.

Buildings.—The buildings are as follows: the main building, 36 x 36, three stories high; the said building is divided into an office, parlour, refectory, class-room, working-rooms, recreation-rooms, on the ground floor; boys' and girls' dormitories, the chapel, private apartments for the sisters on the second floor. The third story is divided in two, one part used as a wardrobe, the other part, larger, occasionally used as dormitory for sick pupils.

There is also situated behind the main building and adjacent to it a three-story building, which comprises kitchen and pantries and two large rooms reserved for the use of the staff.

The other buildings are a laundry, 18 x 14 feet, a storehouse and a stable.

Accommodation.—There is accommodation for 50 pupils and a staff of 8.

Attendance.—There are 38 pupils on the roll, 19 boys and 19 girls.

Class-room Work.—The programme of studies is followed closely. The progress is noticeable. The boys exhibited at Macleod's fair drawings and several works pertaining to class matters, for which they were awarded prizes.

Farm and Garden.—There is no farming, nor gardening, done at the school. The location, too close to the river bank, is unfit for the purpose. But a farmer living some 6 miles away, lent the school three acres of his own. These three acres were sown in potatoes, the return was a very fair one. The farmer ploughed up the ground, the rest of the work was done by the principal, the lay brother, the reverend sisters, and the boys.

Industries Taught.—Gardening, stablework, baking, sawing and chopping wood for the kitchen and for the furnaces are some of the occupations of the boys. The girls are trained in the different branches of housework: baking, cooking, laundrying, sewing, knitting, dressmaking. The girls exhibited some of their own work in this line at the Macleod fair, last summer, and they were awarded several first and second prizes.

Moral and Religious Training.—This part is looked after very carefully. Religious instruction is given daily, and all the children attend regularly to all the church services.

Health and Sanitation.—Two girls died last year, from tuberculosis, at home. The health of the other pupils is good. Three ventilators were put up in the children's dormitories, last summer, so as to have these apartments properly ventilated.

SESSIONAL PAPER No. 27

Fire Protection.—Five fire-extinguishers, four hand grenades, five fire-pails and four axes, are distributed throughout the buildings, and besides, there are some others, buckets full of water ready for any emergency.

Heating and Lighting.—The school is heated with two hot-air furnaces. The heating gave better results last winter, as the furnaces were repaired extensively.

Light is supplied by coal-oil lamps.

Water.—The water is supplied by a well nearby.

Recreation.—Recreation, three times a day after each meal. Football, swimming, fishing, shooting with bows and arrows, are some of the pastimes of the boys. The girls enjoy themselves playing ball and skipping. Whenever the weather permits, outdoor recreation is indulged in. Boys and girls each have their own playgrounds, and are always under the supervision of an attendant.

Ex-pupils.—As a rule, our older pupils are transferred to High River industrial school, where they get their discharge.

THE REPORT OF REV. J. L. LEVERN, O.M.I., PRINCIPAL OF THE BOARDING SCHOOL (CROWFOOT), BLACKFOOT RESERVE, ALTA., FOR THE YEAR ENDED MARCH 31, 1910.

Location.—This school is situated about 2 miles from Cluny station, near the Bow river.

Land.—There are about 25 acres under cultivation for the use of the school. It is government land, being a part of the Blackfoot reserve, and is fenced in with the permission of the department and the consent of the-Indians.

Buildings.—The main building, 36 x 36 feet, is three stories high, the third story of which was just completed last summer.

There are two wings to the main building, two stories high, 36 x 32 feet.

Behind the main building and adjacent to it is a two-story building, 50 x 30 feet. The buildings are divided into an office, reception-room, refectory, kitchen, pantry, milk-house, storehouse, laundry, school-room, sewing and recreation rooms, on the ground floor; while upstairs are the dormitories, dining-room for the staff and two spare rooms, and the third story is reserved for the chapel.

There is besides another building, 24 x 16 feet, used only for hospital purposes.

The outbuildings are two stables, a root-house, an implement shed, and an ice-house.

A well kept picket fence surrounds the main building, and an ordinary wire fence serves for the same purpose around the garden, pasture and field.

Accommodation.—There is accommodation for 60 pupils, and a staff of 8.

Attendance.—There are at present only 40 children, 27 boys and 13 girls; the medical officer refuses to admit any more children, for the specious pretense that all the Indians are in consumption.

Class-room Work.—The programme of studies prescribed by the department is followed as closely as possible. The progress is very good and encouraging. The grading of the pupils is as follows:—

Standard	I.	16
"	II.	7
"	III.	5
"	IV.	9
"	V.	3

1 GEORGE V., A. 1911

Farm and Garden.—About 25 acres are under crop, 10 in oats, 10 in potatoes, and 5 in gardening. The larger boys do the ploughing, as well as the mowing when the hay season comes.

Industries Taught.—Farming and gardening, baking and dairy work, the care of horses and cattle are taught the boys.

The girls are instructed in dressmaking, knitting, cooking, and general house-work.

Moral and Religious Training.—Of course, great care and special attention are given to this most important part of education. Religious instruction is given to the pupils by the principal and the teacher every day, and it is encouraging to see the great efforts the children make to put in practice the lessons they are taught.

Health and Sanitation.—Two children died of pneumonia last summer. Since then all the pupils have been in perfect health.

The sanitary conditions are looked after carefully, the ventilation is excellent, and everything is kept clean around the house and the outbuildings.

Water Supply.—Our water-supply is pumped into the house from a good well close by, by means of a gasoline engine.

Fire Protection.—Fire-extinguishers, hand grenades, fire-pails and fire-axes are distributed throughout the hall and rooms.

Heating and Lighting.—The school is heated partly with stoves, partly with one hot-air furnace, and light is supplied by coal-oil lamps.

Recreation.—Football, shooting with bows and arrows, fishing, swinging and skating are the favourite pastimes of the boys; the girls amuse themselves in playing ball, swinging, skipping, croquet, &c.

THE REPORT OF SISTER M. A. DIGNIERE, PRINCIPAL OF THE BOARDING SCHOOL, ST. ALBERT, ALTA., FOR THE YEAR ENDED MARCH 31, 1910.

Location.—The St. Albert boarding school is not on a reserve. It is beautifully situated at a distance of a quarter of a mile north of the C. N. R. station, on an eminence overlooking the town of St. Albert, and the Sturgeon River valley.

Land.—Some 335 acres of land are attached to the school. The soil is of excellent quality, and from 200 acres, large crops, consisting of hay, vegetables and cereals, are produced. The remaining 135 acres are in pasture or wood-land. The farm is the property of the Sisters of Charity. It lies in township 54, range 25.

Buildings.—The main building is a four-story frame structure, 180 x 35, with brick foundation, and is occupied by the girls and members of the staff. The section, 50 x 30, in which the boys formerly took up their quarters, has been replaced by a four-story brick building. Six well equipped and commodious class-rooms are also situated in this section. These rooms, as well as all the others throughout this structure, are spacious and well ventilated. A new laundry has also been put in this building. A kitchen, 40 x 30 feet, joins these two buildings. The outbuildings consist of bakery, barn, stables, hennery, implement shed, repair shops, and storehouses.

Accommodation.—The present buildings have accommodation for 300 persons.

Attendance.—There has been an average attendance of 66 Indian pupils during the year.

Class-room Work.—The progress in the school-room throughout the year has been very satisfactory. The public school programme of studies for the province is followed as closely as circumstances will admit of. Most of the pupils have musical

SESSIONAL PAPER No. 27

talent. The boys have a disciplined and well trained brass band. Eighteen of the girls have been learning the mandolin since May, 1907, and can master the instrument very well.

Musicales are frequently given by these pupils, and their proficiency noted.

Farm and Garden.—Last year the yield of grain was as follows: wheat, 1,120 bushels; oats, 4,280 bushels; barley, 2,526 bushels; potatoes, 1,500 bushels; vegetables, 210 bushels; hay, 250 tons. The wheat was greatly damaged by frost.

Industries.—Both boys and girls have fixed hours for work, during which time they are trained in various trades and industries by competent teachers. The boys are thoroughly instructed in the different branches of farming and gardening, dairy work, and rough carpentry. The girls are instructed in the culinary department, dairy, laundry, dressmaking, carding, spinning, knitting, machine sewing, fancy and plain needlework, and general housework, in which many of them excel, as it is proved when they leave school, and have homes of their own to look after.

Moral and Religious Training.—The pupils are thoroughly instructed in the principles of faith and religion. They are vigilantly trained to self-respect, truthfulness, and all Christian virtues. It is a pleasure to certify that good results are obtained. Punishments are of very rare occurrence.

Health and Sanitation.—The general health of the pupils has been good. Scrofula is the main ailment we have to contend with. The sanitary condition of the school is excellent.

Water Supply.—Three wells furnish the institution with an abundant supply of excellent water. The water of two of these wells is pumped into tanks by a hot air engine, the third is pumped by a hand pump.

Fire Protection.—Water being distributed through the building affords a good defence. Easy access from every department to outside galleries and stairs, fire-escapes, 500 feet of hose, 13 chemical fire-extinguishers, 6 grenades, 4 fire-axes and several ladders placed about the building, all kept in readiness in case of emergency.

Heating and Lighting.—The main building is heated by three hot-air furnaces, and several ordinary stoves, coal and wood are used as fuel. The new section is heated by two Economy water heaters. Light is satisfactorily supplied to the primary building by Siche gas; to the new one by ordinary lamps.

Recreation.—Every day two hours are set aside for recreation, when weather permits, the boys play baseball and football and other open air healthful games. The girls amuse themselves at croquet, basket-ball, skipping, physical drills, &c.

THE REPORT OF REV. R. L. DAUPHEN, O.M.I., PRINCIPAL OF THE
BOARDING SCHOOL, ERMINESKIN'S RESERVE, HOBBEA AGENCY,
ALTA., FOR THE YEAR ENDED MARCH 31, 1910.

Location.—The school is situated on the Ermineskin reserve, a mile from Hobbema station. There is a post office.

Land.—About 40 acres of land are in use for the wants of the mission, five of which are taken up for the garden, five for the yard, and the remainder for pasturage.

Buildings.—The main building, 45 x 50, has a school-room and refectory on first floor; boys' dormitory, sewing-room and infirmary on second floor; girls' dormitory on third floor. The kitchen and chapel are in another building, 25 x 20 feet; this joins the main building to the sisters' building, which is 30 x 24. A laundry, 40 x 24, is situated a few yards from the house, and contains a lavatory, store-room, ice-house, and three bath-rooms on the first floor; while on the second floor, there is a room for drying and ironing clothes, and a room used in case of contagious diseases.

1 GEORGE V., A. 1911

Accommodation.—There is accommodation for 75 children and 10 sisters.

Attendance.—The attendance was 55.

Class-room Work.—The application has been good, the year round, and the progress has been very satisfactory in every branch of the programme.

Farm and Garden.—Our garden has yielded 280 bushels of potatoes, but a hail-storm caused them great damage, and destroyed our other vegetables.

Industries Taught.—Every day outside of school hours, some time is given for farming. And, as for the girls, they are taught to keep a house in good order, cooking and the making and mending of their garments.

Moral and Religious Training.—Instruction daily is given by the missionaries or teachers, to which the pupils pay great attention.

Health and Sanitation.—We have had two cases of pneumonia; the other children enjoyed very good health. We have good ventilation.

Water Supply.—Our school is provided with a good artesian well, a pump and a tread power, by means of which we obtain water for the institution, the laundry and the stable.

Fire Protection.—Two fire-escapes, twelve dry dust extinguishers, a hose, six pails, three fire-axes, are our means of protection against fire.

Heating and Lighting.—Our rooms are lighted by lamps, and heated by wood stoves.

Recreation.—Baseball and football are the amusements enjoyed in summer; coasting, checkers, are the winter plays for the boys, while the girls' chief amusement is music.

General Remarks.—The pupils have given three entertainments, several concerts, and the girls have been asked to play music in two bazars in the neighbourhood during the course of the year. Such visits are a nice reward for them.

Ex-pupils.—Most of our pupils give satisfaction by their conduct and work, and are able to live comfortably.

THE REPORT OF REV. LEON BALTER, PRINCIPAL OF THE BOARDING SCHOOL, BLUE QUILL'S RESERVE, ALTA., FOR THE YEAR ENDED MARCH 31, 1910.

Location.—The school is situated about 6 miles southwest of Saddle Lake, and one mile north of the Saskatchewan river, on the Edmonton road.

Buildings.—The school is a frame building, 90 x 30 feet, two and a half stories high, and suitably divided into the various departments necessary for the convenience of the school.

Attendance.—The attendance has been regular, as all are boarders at the institute.

Class-room Work.—The course of studies authorized by the department is faithfully followed.

Garden.—About six acres are under cultivation. Vegetables are the chief products.

Industries Taught.—The boys saw and chop the wood required for fuel, and bake their own bread. They help in caring for the cattle. The girls are taught sewing, cooking and laundry work, also carding, spinning, knitting and fancy-work.

Moral and Religious Training.—Great care and special attention are given to this most important part of education.

Health and Sanitation.—The general health has been good.

SESSIONAL PAPER No. 27

Fire Protection.—A fire-escape leads from the top story to the ground.

Heating and Lighting.—The building is heated by wood stoves; and kerosene lamps are used for lighting purposes.

Recreation.—The pupils have about an hour's recreation, three time a day after meals. The girls enjoy their mandolin orchestra. Several of them play very nicely. The brass band has proved to be a great amusement for the boys. They are making good progress.

THE REPORT OF REV. W. R. HAYNES, PRINCIPAL OF THE CHURCH OF ENGLAND BOARDING SCHOOL, PEIGAN RESERVE, ALTA., FOR THE YEAR ENDED MARCH 31, 1910.

Location.—The school is situated on the banks of Pincher creek, on the north-east quarter of section 12, township 7, range 29, west of 4th meridian, and 2 miles from the Peigan agency headquarters and Brocket.

Land.—The school owns the whole quarter section.

Buildings.—The buildings consist of a boarding school proper, a laundry, stable, workshop, and other necessary buildings. The boarding school proper is 78 x 32 feet over all. It is built of wood, on a stone foundation, and is lathed and plastered throughout. It contains kitchen, dining, play-rooms, and dormitories, bath-rooms for the pupils, also rooms for the staff, as well as store-rooms.

Accommodation.—The school has accommodation for 40 pupils, viz.: 24 boys and 16 girls, also for a staff of 6 persons.

Attendance.—The attendance has been good, being full to the limit of the government grant.

Class-room Work.—Good progress has been made in all branches of study.

Farm and Garden.—The farm consists of 4 acres, all put in with vegetables, such as potatoes, onions, carrots, beets, turnips, cabbages, and other small seeds. We had an abundant supply of vegetables, and enough potatoes for seed this spring. Ten acres was also cropped with wheat, which gave excellent results.

Industries Taught.—The boys are taught farming and gardening, bread-making, to mend their own clothes, and do all the work on their side of the school.

The girls are taught sewing, mending, darning, and knitting; they do all their own washing, ironing, and mending, all the work on their side of the school, and attend to staff quarters; learn bread-making, and, in fact, everything that would be useful to them when they leave school and have homes of their own.

Religious Instruction.—This is given daily by the principal, and everything is done to teach them their need of divine guidance, no matter where their lot may be cast.

Health and Sanitation.—The health of the pupils has been very good; we have had no serious cases of any description, and very few colds. The sanitary conditions are much improved; the sanitary closets installed by the department give excellent satisfaction.

Water Supply.—All the water is drawn from a drive-well in the house.

Fire Protection.—There are 12 fire tubes hung in the main rooms.

Heating and Lighting.—The building is heated by two large Pease furnaces, which give every satisfaction. The building is lighted by ordinary coal-oil lamps.

Recreation.—The pupils have ample playgrounds, and are out walking most days with some members of the staff.

1 GEORGE V., A. 1911

Ex-pupils.—With regard to the ex-pupils, I may say they are all doing well considering the influence of the older Indians, but now that they are to be placed on their own farms, it will give them a chance to prove themselves, and I have not the slightest doubt very great improvement will take place in these next few years, and they will prove a credit to the department, as well as their school.

THE REPORT OF REV. L. DOUCET, O.M.I., PRINCIPAL OF THE ROMAN CATHOLIC BOARDING SCHOOL, PEIGAN RESERVE, ALTA., FOR THE YEAR ENDED MARCH 31, 1910.

Location.—The Sacred Heart boarding school is situated on fine elevated ground on the north side of the Oldman river, a very healthy location in the centre of the Peigan reserve.

Address.—Sacred Heart boarding school, Brocket, Alta., is our address.

Land.—The land on which the school is built belongs to the reserve. About half an acre is fenced in for a vegetable garden in which a fair crop is raised if the season is rainy. About 50 acres are fenced in for a pasture.

Buildings.—The school building consists of a large house, 108 x 26 feet, with an addition on the north side for a kitchen, 19 x 26 feet, and a pantry, 17 x 14 feet.

The centre building is 30 x 30 feet, two stories high, the roof part is unfinished and unoccupied.

On the first story are the refectory for the staff, the sewing-room, the parlour and a corridor leading from the front door to the kitchen. On the second story are the rooms for the staff, and a chapel of good size. On the west side are: on the first floor, the class-room, and the recreation-room; on the second floor, the dormitory for the boys, 48 x 26. On the east side are: on the first floor the class-room, the refectory for the pupils, and the recreation-room for the girls.

We have a small outbuilding, 18 x 17, used as a chicken-house. Close to the kitchen is the laundry-house, 30 x 20 feet; on the first story is the washing-room, 20 x 20 feet, and the coal-room, 20 x 10 feet. In the upper story is the drying-room.

We have also a stable and barn, 28 x 30 feet.

Accommodation.—The building affords accommodation for forty pupils and the staff.

Attendance.—The pupils of the institution are all boarders, and therefore the attendance is regular. In this last fiscal year we lost seven pupils. Three boys are at Dunbow and two were discharged. One girl died, another is at Dunbow. We got five new pupils, three boys and two girls.

Class-room.—We follow the programme of the department. The progress is generally slow but fair and encouraging.

Farm.—We have not a regular farm, but a garden in which at special hours the pupils are working.

Industries Taught.—Our children have special hours every day for manual work. The boys work in the garden, in the stable, keep clean their rooms and dormitory, scrub the floors, help in the laundry-house, and do the choring. The girls are kept busy in general housekeeping, helping in the kitchen, knitting, sewing, mending and washing. The oldest girls cut and make their own dresses.

Moral and Religious Training.—Special attention is given to the instruction of the pupils in moral and religious truths. Prayers, Bible history and catechism are taught by the reverend principal half an hour every day.

Health and Sanitation.—The health of the pupils has been generally good. In the spring we have many cases of influenza in a mild form. We had also a few cases

SESSIONAL PAPER No. 27

of scrofula; two consumptives were discharged, one died. The health is now in a fair condition.

Water Supply.—We have a good well a few feet from the kitchen with sufficient water for the needs of the school.

Fire Protection.—We have three fire-axes, some fire-extinguishers; and buckets full of water are put at convenient places through the building.

Heating and Lighting.—We use common stoves for heating purposes. Coal-oil lamps are used for lighting. Proper care is taken against any danger of fire. Matches are removed out of the reach of the pupils.

Recreation.—We have two recreation-rooms, large and well ventilated, the larger for the boys, the other for the girls. We have a fence around the school buildings. We have two yards for the pupils. Besides, there is around the buildings a good piece of prairie, where they can play in good weather under the supervision of some of the staff, and where the boys take a special delight in playing at football or at some other games.

Ex-pupils.—There are very few ex-pupils discharged directly from this school who live on the reserve. Three boys, who were discharged on account of ill health, are living with their families; one is half blind, and two affected with tuberculosis. There are also three girls married to ex-school boys on the reserve.

THE REPORT OF VEN. J. W. TIMS, PRINCIPAL OF THE BOARDING SCHOOL, SARCEE RESERVE, ALTA., FOR THE YEAR ENDED MARCH 31, 1910.

Location.—The school is situated on the southeast corner of the Sarcee Indian reserve, within a short distance of Fish creek, and adjacent to the agency buildings.

Land.—About fifteen acres of the reserve lands are fenced in and used for school and mission purposes.

Buildings.—The school buildings are all under one roof, and consist of boys' and girls' wings connected with each other by the dining-room and kitchen.

Accommodation.—The school will accommodate twenty boys and ten girls in addition to a staff of three persons.

Attendance.—The attendance of pupils has been regular during the year. Ten pupils (five boys and five girls), are all that we have on the per capita grant, and there does not appear to be any likelihood of our being able to increase that number if the present strict medical examination is to be adhered to. Five pupils were presented for examination during the year and were refused on medical grounds.

Class-room Work.—This has been carried on regularly during the year, but since Dr. Bryce's visit in July last, the hours have been shortened and more outdoor life has been given to the pupils. The standing of the pupils is as follows:—

Standard IV..	3
“ III..	3
“ II..	3
“ I..	1

Farm and Garden.—There is no farm in connection with this school. A garden about an acre and a quarter in extent is regularly cultivated, planted with all the necessary vegetables, and cared for by the pupils under the teacher's supervision. Beyond milk cows, a team of horses belonging to the mission, and a few hens, no live stock is kept.

1 GEORGE V., A. 1911

Moral and Religious Training.—This always forms an important part of our work, and every effort is made by principal and staff to train the pupils in 'righteousness, sobriety and Godliness.'

Health and Sanitation.—Generally speaking, I should say the health of the pupils has been good. Every possible precaution has been taken to keep off any active tubercular trouble, and, so far, I think we have been successful. Warm clothing, dry feet, dormitory windows open all winter, and all the milk and eggs we could get, as well as other nutritious food, have helped in this.

Water Supply.—We have a good well of spring water, which is pumped into the building by hand through pipes laid under the ground.

Fire Protection.—Doors all open outwards, dry dust fire-extinguishers hang in convenient places, and a barrel of water always stands in the kitchen. The ashes are disposed of with care, and a close inspection is made of all the stoves by the staff before retiring at night.

Heating and Lighting.—For heating, coal and wood stoves are used, and for lighting the ordinary oil lamps are in use.

Recreation.—Football, cricket, skating, tobogganing, fishing, and walking are all enjoyed by the pupils in the respective seasons.

Ex-pupils.—As I reported last year, all our ex-pupils are, with one or two exceptions, doing well. They are all earning their own living on the reserve, and so far as I know, not one of them looks to the ration-house for food. The girls who have left the school are all married, and are bringing up young families of healthy-looking children.

General Remarks.—The staff, consisting of Mr. and Mrs. P. Stocken, and Miss Crawford, have the welfare of the children at heart.

THE REPORT OF SISTER M. McDOUGALL, PRINCIPAL OF THE BOARDING SCHOOL, FORT CHIPEWYAN, ALTA., FOR THE YEAR ENDED MARCH 31, 1910.

Location.—This school is conducted by the Sisters of Charity, commonly called Grey Nuns, who have their headquarters in Montreal (Guy street). The buildings and premises are the property of the Roman Catholic Mission, conducted by the reverend Oblate fathers. The location is healthy.

Land.—We have about 15 acres of farm-land. The soil is poor. The farm produce consisted this year of 800 bushels of potatoes, 40 bushels turnips, 1 bushel carrots, and a small quantity of onions and cabbage. Owing to extra hot weather, we were favoured with a little supply of ripe tomatoes, cucumbers and pumpkins.

Buildings.—The mission place consists of the clergy-house, a fine new church built in the course of the year, and our school, the exterior of which is not yet painted. We look forward to more prosperous days when we shall have the satisfaction of speaking about the exterior decoration of our buildings as a fact.

Accommodation.—There is ample accommodation for 60 pupils and 13 members of a staff.

Attendance.—Attendance has been regular throughout the past year.

Class-room Work.—This consists of reading, writing, arithmetic, spelling, dictation, grammar, geography, sacred history, history of Canada, composition, vocal and instrumental music, calisthenics for the girls, and military drill for the boys.

Farm and Garden.—Our garden and potato-field were kept clean, and the crop was taken in by the children, under the supervision of the sisters.

SESSIONAL PAPER No. 27

Industries Taught.—The boys' work is to saw, split, and pile the wood required for fuel. The girls were taught during the year to sew, knit, darn and mend neatly; the eldest ones ran the sewing-machine and received lessons in dressmaking and tailoring.

Moral and Religious Training.—Great care was given to this part of the pupils' education. A half-hour of religious instruction, given mostly every day by the reverend father in charge, was followed with great interest. I am pleased to state that our children's conduct has been remarkably good all year.

Health and Sanitation.—One boy died of tubercular-meningitis. Last spring an outbreak of fever and malignant grippe undermined the strongest constitutions, and even caused a great many deaths among the people here; our children were not spared and some were very ill, yet none of them died, and it was with heartfelt gratitude towards Divine Providence that we noted their speedy recovery. They had enjoyed excellent health ever since, when, on February 4, dysentery in the form of an epidemic made its appearance. Fortunately for us that our skilled nurse was able to face the foe, and with what had been kept in reserve of our scanty provision of drugs, in case of emergency, she mastered the disease so well that with the exception of a baby girl, who died on the third day, all her patients soon recovered their former state of health. The sanitary condition of school and premises is good.

Water Supply.—Our water-supply is taken from the lake and two wells.

Fire-protection.—A force-pump and hose, ladders, buckets, and axes, also three fire-escapes, are the appliances on hand.

Heating and Lighting.—Two hot-air furnaces and 7 wood-stoves are used to heat the house. Coal oil is used for lighting.

Recreation.—The boys and girls have their respective playgrounds, where they amuse themselves with balls, swings, and other such games. The chief sport in summer is football for the boys; in winter, nothing can equal the interest they take in setting traps and visiting them; they are allowed, occasionally, a little hunting expedition, but, in such cases, one of the reverend fathers accompanies them. As a rule, the girls have a morning and evening walk every day.

THE REPORT OF REV. P. JOUSSARD, O.M.I., PRINCIPAL OF THE ROMAN CATHOLIC BOARDING SCHOOL, LESSER SLAVE LAKE, ALTA., FOR THE YEAR ENDED MARCH 31, 1910.

Location.—The Lesser Slave Lake (St. Bernard's, R.C.) boarding school is situated on the northeastern bank of Lesser Slave lake. The location is healthy, and the view of the lake very fine.

Buildings.—The main structure is 72 x 28 feet, three stories. The boys' house is 60 x 25 feet, with two stories. The third building is 35 x 24 feet, with three stories, and consists of school-rooms only.

Accommodation.—The buildings are large enough to provide good accommodation for 60 children, and the staff necessary to carry on the work.

Attendance.—The attendance was regular, as all the pupils are boarders.

Class-room Work.—The school hours are faithfully observed. The programme of studies is followed with application and success.

Farm and Garden Work.—Both boys and girls are glad in early spring to remove small stones and prepare the land for potatoes, carrots, onions, even flowers. Later on, they help in weeding the gardens.

Industries Taught.—The girls are taught to use the sewing-machine, mending, knitting, and general housework. The boys take in wood, water and help in the barns.

1 GEORGE V., A. 1911

Moral and Religious Training.—Instruction in the Roman Catholic faith is imparted to the pupils; half an hour each day is devoted to religious training. Little by little our children are giving up their savage customs to adopt those of civilized nations.

Health and Sanitation.—During the months of March and April, some of the pupils suffered from severe colds and influenza; they were attended by Dr. Donald. They are all well at the present time.

Water Supply.—An abundant supply of water is obtained from a well and a small river flowing in front of the mission.

Fire Protection.—There are ladders and outside stairs in case of fire.

Heating and Lighting.—The heating apparatus consists of a hot-air furnace for the main building, and stoves for the other departments.

Recreation.—Football and bows and arrows form the favourite amusements of the children during the summer months. Coasting, and games in the recreation-halls are the chief recreations during the winter.

THE REPORT OF REV. J. CALAIS, O.M.I., PRINCIPAL OF THE BOARDING SCHOOL AT STURGEON LAKE, ALTA., FOR THE YEAR ENDED MARCH 31, 1910.

Location.—This school is situated on the eastern shore of Sturgeon lake, in the centre of the Sturgeon Lake reserve. The location is healthy, and the view of the lake very fine.

Land.—There are 240 acres of land in connection with the school, about 30 acres are under cultivation; the remainder consists of nice groves and pasturage.

Buildings.—The main building, which is a three-story structure, 40 x 27 feet, consists of entrance-hall, parlour, two refectories; chapel, girls' dormitory, and the private apartments for the staff. This building has an addition two stories high, 27 x 20 feet, the lower story is used as a kitchen, and the upper as a boys' dormitory.

A second building, 30 x 25 feet, two stories in height, comprises a recreation hall and a well-lighted class-room.

Accommodation.—There is accommodation for 40 pupils.

Attendance.—All the pupils being boarders, they have attended school regularly during the term.

Class-room Work.—The subjects taught are reading, writing, spelling, arithmetic, grammar, geography, composition, dictation and vocal music. All the children are full time in the class-room. The good conduct and desire to learn have been a great encouragement.

Farm and Garden.—An excellent crop of potatoes was gathered in last autumn. The vegetable garden also yielded well.

Industries Taught.—The girls are taught cooking, sewing, knitting, and washing. The boys prepare all the wood required for fuel, by means of saws and axes, and they help to carry water.

Moral and Religious Training.—A half hour daily is given to religious instruction. Every effort is made to cultivate these young hearts and inculcate a great love of duty towards God and man.

Health and Sanitation.—I am happy to state that the pupils' health has been remarkably good the year through. Much care is taken to maintain perfect sanitary conditions.

Water Supply.—The lake supplies good water for all the wants of the school.

SESSIONAL PAPER No. 27

Fire Protection.—The water from the lake, ladders, axes and buckets are the fire-appliances on hand.

Heating and Lighting.—Wood is used for heating, and coal oil for lighting.

Recreation.—Exercise in the open air is greatly encouraged. Football and shooting with bows and arrows are the favourite pastimes of the boys. The girls amuse themselves with the dressing of dolls, singing and skipping.

THE REPORT OF REV. J. LETRESTE, PRINCIPAL OF THE BOARDING SCHOOL, FORT VERMILION, ST. HENRI MISSION, ALTA., FOR THE YEAR ENDED MARCH 31, 1910.

Location.—The school is situated on a very picturesque bend of the Peace river, facing the Caribou mountains on the north side, and the Buffalo towards the south. Here ends also the last spur of the Rockies, 600 miles below the main range.

Land.—The area of land connected with our establishment and owned by the Oblate fathers, is about 1,000 acres; 400 acres have been fenced and 100 acres are in pasture.

Buildings.—The present buildings appropriated for the boarders and their teachers have been put up temporarily, but a good frame building, 80 x 35 feet, on a stone foundation, will be finished for the month of September.

Attendance.—The attendance has been regular, the pupils being all boarders.

Class-room Work.—The subjects taught are reading, spelling, writing, grammar, geography, arithmetic and vocal music.

Farm and Garden.—There are over 60 acres of land under cultivation at present.

Moral and Religious Training.—The moral and religious training is based on the pure and unsullied doctrine of the holy scripture.

Health and Sanitation.—Every possible precaution is taken to ensure perfect sanitary conditions.

Water Supply.—The river which flows near the mission furnishes an abundant supply of water.

Fire Protection.—We have only the water from the Peace river and ladders as protection against fire.

Heating and Lighting.—Wood is used for heating and coal-oil for lighting.

Recreation.—Recreation is taken after meals in the open air, during which the children enjoy outdoor games. In cold weather a long walk is taken almost every day.

THE REPORT OF W. F. BROADSTOCK, PRINCIPAL OF THE CHURCH OF ENGLAND BOARDING SCHOOL, WABISKAW, ALTA., FOR THE YEAR ENDED MARCH 31, 1910.

Location.—The school is situated on Lake Wabiskaw, on the north side of a small bay at the south end of the lake. The post office is at the Hudson's Bay Company's store here, and is called 'Wabasca.' It is not on a reserve.

Land.—The land has never been surveyed or measured; it is a long narrow strip running back about $\frac{3}{4}$ of a mile. It is situated between the trading post of the Hudson's Bay Company and that of the Revillon Brs., Limited. There is, perhaps, in

1 GEORGE V., A. 1911

the claim about 45 acres, about 12 acres of which is cleared. The land belongs to the Church Missionary Society of England, and was bought from an Indian, who had cleared about an acre. The land is rich, and slopes gently towards the south. Potatoes, vegetables, and grain are grown with success. We rarely have either late or early frosts.

Buildings.—The boarding school is 33 x 24 feet, with kitchen 22 x 16 feet, one and a half stories high, with Gothic windows. The mission-house is two stories high, 24 feet square, with kitchen, 14 x 13 feet. The church is 17 x 22 feet, with a chancel 10 x 12 feet, in which school is taught during the week. A storehouse, 20 x 16 feet; a workshop, 12 x 14 feet, horse-stable, 18 x 20 feet; cow-stable, 16 x 18 feet.

Accommodation.—In the school building we have room for 15 girls and 12 boys, also for two ladies of the staff. The mission-house has accommodation for a teacher.

Attendance.—The majority of the scholars being boarders, their attendance is good. The children of the traders attend regularly. The average has been fairly high for the past year.

Class-room Work.—The teaching ranges from the very beginning to the fourth reader. The writing generally is very good; to the more advanced pupils geography and grammar are taught.

Farming and Gardening.—There is in this neighbourhood no real farming; cattle and horses are raised, and the missions, traders, and a few Indians have good gardens. Our garden has been very successful and a source of profit to us, also it is an object lesson to the Indians in what the land can produce.

Industries Taught.—The boys are taught the care of horses, stock, &c., gardening and fishing. The girls receive good training in all connected with housekeeping.

Moral and Religious Training.—Nothing is spared on the part of the teachers to give to the pupils a sound moral and religious training, and to instil into their minds a true sense of their Christian duties.

Health and Sanitation.—The health of the children has been exceptionally good; every care is taken to keep them in good health.

Water Supply.—The water-supply is defective; we are dependent on the lake. At times, especially during high winds, the water is very dirty, owing to the mud being stirred up. At all times all water used for household purposes is carefully strained. It is drawn to the school in barrels.

Fire Protection.—We have no regular system; ladders are hung to the peaks of the buildings, and a supply of water kept standing in barrels.

Heating and Lighting.—Lighting is done by means of oil lamps and candles. Heating is done by stoves, wood is the only fuel used.

Recreation.—We have football and cricket for the boys, and swings, sleighs, skates, and quoits for all.

THE REPORT OF REV. SISTER MARY FLORE, PRINCIPAL OF THE ROMAN CATHOLIC BOARDING SCHOOL, WABISKAW LAKE, ALTA., FOR THE YEAR ENDED MARCH 31, 1910.

Location.—St. Martin's mission is situated on a stony point on the northern shore of Lake Wabiskaw. A splendid view of the scenery surrounding can be had from the buildings.

Land.—The area of land in connection with the school consists of about 22 acres. Of this portion, about 7 acres are under cultivation. The remainder affords good pasturage.

SESSIONAL PAPER No. 27

Buildings.—There are four buildings. The two largest stand in a line, and the church is just in the centre, but nearer the lake. These buildings are of hewn logs; two of them are 42 x 32 feet, and three stories high. One is devoted to school purposes. A wing on the west side is 24 x 20 feet. On the first floor is the school-room; on the second, the boys' dormitory. Two outbuildings have been erected: one for a dairy and a safe storage for meats and other articles of food. The other house is used for a carpenter shop. There are also two stables.

Accommodation.—There is room for about 50 pupils, and a staff of 7 members. The girls have their apartments in the main building apart from the boys. Their rooms comprise a recreation hall, a refectory, a sewing-room, and a dormitory. The other apartments are occupied by the members of the staff.

Attendance.—The average daily attendance for the year was 36.

Class-room Work.—The pupils have five hours of school a day. Their progress is generally good and encouraging.

Industries.—The girls are taught sewing, knitting, washing, ironing and all that can contribute towards making them good housekeepers. The boys prepare the fuel and aid in the care of the stock and garden.

Moral and Religious Training.—The moral and religious training is based on the pure and unsullied doctrine of the holy scriptures. The reverend father in charge instructs the children with great care and zeal, and we do our utmost to make them understand and practise what they are taught.

Health and Sanitation.—The children have enjoyed good health all the year. We attribute this in a great measure to good ventilation and frequent outdoor exercise.

Water Supply.—A large supply of water is always kept on hand in case of fire. We are also provided with ladders and buckets. Other improvements are to be made.

Heating and Lighting.—All the houses are heated by stoves. Wood is the only fuel used. Coal oil is used for lighting, and proper care is taken against danger by fire.

Recreation.—Outdoor exercise and games are given between school hours as often as the weather permits. The boys have great sport in playing football, while the girls amuse themselves skipping, swinging, playing games or rolling hoops.

THE REPORT OF REV. SISTER McQUILLAN, PRINCIPAL OF THE
BOARDING SCHOOL, FORT RESOLUTION, GREAT SLAVE LAKE, FOR
THE YEAR ENDED MARCH 31, 1910.

Location.—The school is situated on elevated ground, in a healthy location, on the bank of Great Slave lake.

Land.—The school premises occupy about 4 acres of land taken up by buildings, playgrounds and garden.

Buildings.—The buildings are the same as mentioned in my last report, with the exception of a new school building erected last year. It is a frame building, three stories high, the main building measuring 40 x 30 feet, with two wings 20 x 40 feet.

Accommodation.—At present we have ample accommodation for 70 pupils, 40 girls and 30 boys.

Attendance.—The average attendance during the year was 45. The pupils are all boarders.

Class-room Work.—This consists of reading, writing, arithmetic, spelling, composition, dictation, grammar, geography, natural history, and vocal music. The following statement will show how the pupils stand in their studies:—

1 GEORGE V., A. 1911

Standard	I.	18
"	II.	10
"	III.	8
"	IV.	7

Farm and Garden.—We have about 3 acres under cultivation, in which we raised an abundance of carrots, beets, cabbage, onions, turnips and pease for table use. Last year we also raised 500 bushels of potatoes.

Industries Taught.—The girls are taught sewing, knitting, embroidery, bread-making and general housework, with very marked results. The boys help to prepare wood for the furnaces, and work in the garden.

Moral and Religious Training.—The children with slow but steady steps are acquiring habits of civilization, which daily take deeper root, and they are becoming more and more familiar with the rules of politeness. They are as a rule very docile and affectionate, and respond readily to the religious and moral training which is carefully given them. The discipline is excellent, and severity unknown.

Health and Sanitation.—The sanitary conditions of the school are, I believe, all that could be desired. The grounds are dry and the house is roomy, bright, clean and well ventilated. One of our girls died of consumption in December, aged 11. All the other pupils are in excellent health.

Water Supply.—The water is supplied from the lake, and is hauled to the house by ox and cart. It is not very good during the hot season, but we intend having a well dug in the basement this spring.

Fire Protection.—Every possible precaution is taken against danger from fire. The department supplied us with two chemical engines, and we have outside stairs descending from the dormitories and recreation-rooms.

Heating and Lighting.—The building is heated by means of hot air from two furnaces placed in the basement, which have given great satisfaction so far. Oil lamps are used for lighting purposes.

Recreation.—The pupils take their recreation in the open air, as much as possible, even in winter. During the fine season they go on holidays to some suitable place, where they take their luncheon and enjoy themselves at all kinds of sport. Coasting, football, baseball, swings and arrow-shooting are the principal outdoor amusements; cards, dominoes and harmonicas are the winter pastimes.

General Remarks.—The pupils are steadily and surely acquiring English. To instil a greater spirit of emulation, slight rewards are promised to those who speak English during each month, and the consequent improvement is very satisfactory.

At an entertainment given in the school-room on New Year's Eve, the pupils performed most creditably in songs, recitations and dialogues. The programme lasted about two hours and a half.

Corporal Miller and several employees of the Hudson's Bay Company were present and were highly pleased with our little Indian children.

THE REPORT OF REV. ALFRED J. VALE, PRINCIPAL OF THE BOARDING SCHOOL, HAY RIVER, GREAT SLAVE LAKE, FOR THE YEAR ENDED MARCH 31, 1910.

Location.—I have the honour to report that the above-named boarding school, in connection with the Church of England in Canada, of which I am in charge, is located at the mouth of the Hay river on its east bank, on the southwest shore of the Great Slave lake, within the limits of Indian treaty No. 8. It is not on a reserve, but in the

SESSIONAL PAPER No. 27

unorganized territory of Mackenzie River, under the supervision of the Royal Northwest Mounted Police.

Land.—We have had under cultivation about 8 acres of Crown lands adjoining the village of Hay River; this year we cleared another acre, so that we have now a total of 9 acres under cultivation. The soil in the immediate vicinity is flat alluvia deposit on a bed of sand, and is adapted for agriculture. A varied growth of trees, consisting of spruce, tamarack, poplar and willows extends all around us. The land has been acquired by what is known as settler's possession and is the property of the mission.

Buildings.—We have the following buildings:—

1. A large dwelling-house used as our boarding school, composed of three parts, consecutively erected, the last being 2½ stories high. The whole is constructed of logs and boards, and contains 18 rooms. We have completed the metallic roofing on two-thirds of this dwelling-house.

2. A dwelling-house, size 25 x 20 feet, 2½ stories high, and a story and a half lean-to attached, 25 x 15 feet. We are using the whole of it, part as a storehouse for some of our provisions, and part as a dwelling for some of our staff.

3. A workshop used for carpentering and blacksmithing; it also contains a pit for hand-sawing lumber.

4. A storehouse for winter fish and general supplies.

5. A woodshed.

6. A small house for cleaning fish.

7. A new stable, built of logs, with accommodation for 6 cattle and 2 horses. It has a board floor and a hay-loft overhead, size 21 x 18 feet.

8. A small dwelling-house for hired help, 14 x 16 feet, built in 1907.

9. Small dwelling for interpreter, 14 x 16 feet.

10. Our church, which is now finished, is lined inside and ceiled with figured iron; the roof is sheathed with metallic shingling. The outside walls are covered with metallic siding. The nave of the church measures 35 x 22 feet, and the chancel 13 x 12 feet.

11. A small house with yard attached, used for mending nets, &c.

12. A two-storied warehouse, 24 x 21 feet, completed this fall. It is built of logs, with board floors and cellars beneath, and is roofed with metallic roofing.

Accommodation.—Our institution is a mission house and school, the age of the pupils ranging from 4 to 20 years, though we occasionally receive widows and others as mission helpers, under instruction. We have one such person with us now, and she is very eager to learn to read and write. We have room for about 40 pupils in our home, and we can accommodate others in our various dwellings, so that with staff and pupils combined, we have room for about 60 persons. During this year, June 30, 1908, to June 30, 1909, we have had as many as 46 persons, including our staff.

Attendance.—The attendance of pupils during the year ended June 30, 1909, was: girls, 20; boys, 15; making a total of 35 regulation boarding pupils, besides our native (female) helper under instruction in general housework. In addition to these, we had 10 day pupils. These, however, are exceedingly irregular in their attendance.

Class-room Work.—The subjects taught in our institution include reading, writing, arithmetic, composition, geography, dictation, and holy scripture in the English and Stari Tukugd languages. The pupils make fair progress, though necessarily somewhat slow, because of their total ignorance of the English language.

Class Hours.—From 9.30 a.m. to 12, and 1.30 to 3.30 p.m. We find too close confinement tends to impair the health of the children. Our daylight in winter is only of about 5-hour duration.

Farm and Garden.—We planted all our available ground in potatoes, and, although

1 GEORGE V., A. 1911

the season is short, we reap a fair crop. The returns this year were about 400 bushels less than we grew last year. This loss was caused by the dry weather.

The garden is simply the ground between our school and the river, it is fenced off separately; in it we grow vegetables, cabbage, cauliflowers, carrots, onions, parsnips, turnips, beets, beans, pease, radishes, lettuce and also some flowers to beautify the place.

The vegetables are used chiefly by the staff and mission help. The school children help in the work of the garden. Our boys and myself harvested all our potatoes this year.

Our hay-supply is derived solely from the natural grass found along the river banks and sloughs near by. There is a large amount of goose grass amongst it and this causes us not a little trouble in keeping our cattle.

We have 2 milk cows, 1 bull, 1 heifer and 1 calf. We train our cows to work and use them with the bull for hauling and ploughing. We have to keep 2 or 3 teams of dogs (4 dogs to a team). This necessitates securing food for them the whole year round. We have also purchased 2 horses this year as an experiment. No horses have previously worked in these parts.

We have had also a steam launch of good sea-going qualities, 27 feet long and 8 feet 6 inches beam, in use for the past eight years, which has been indispensable to us for towing, visiting nets, &c.

This boat's term of useful service is now about over; but we hope to replace her by a larger steamer, equipped with greater power, in the near future.

Industries Taught.—We have no stated industries, but we aim to make all our children useful. The boys are taught the general outdoor work, including use of tools and building. The girls are taught the various branches of housework.

Moral and Religious Training.—We try to teach our pupils to be obedient, diligent, straightforward and honest. We seek to develop in them the essential principles of faith and trust in God, and obedience to His will as revealed in the Old and New Testaments. All of our training is under the control and inspection of the bishop of the diocese.

Health and Sanitation.—I am very happy to report that not one of our pupils has been obliged to lose a day's schooling through illness during the year.

There have been a few deaths in the village, but not many.

We take all the sanitary precautions we can to preserve the healthfulness of the school and also the village.

We avoid all such practices as having cesspools and the like near the house. All rubbish is removed and burnt, to avoid infection.

Water Supply.—We obtain all our water from the river flowing by the school.

Fire Protection.—We keep barrels of water constantly on hand and have ladders conveniently placed. A number of axes are kept on hand for fire purposes only. Water buckets for fire only, are placed in each dormitory for immediate use. A system of fire-drill is now practised throughout the year. By means of this our children can be partially dressed and out of the building in a few minutes. In actual practice the time has been: at night, 3 minutes; in the day time, $\frac{1}{2}$ minute.

We are also contemplating the equipment of our premises with a system of hand-grenades if it is possible to bring them into the country.

Heating and Lighting.—We heat the main building No. 1, with 7 wood stoves, the new building with 2, and the church with 1. Our fuel is chiefly spruce, which grows near by.

The institute is lighted with paraffine candles, and coal-oil lamps are used by the staff.

Recreation.—We encourage the pupils to play all healthful outdoor games, such as football, baseball, jumping and skating, and skipping and swinging for the girls. All our children are taken periodically, almost weekly, for nice long walks.

SESSIONAL PAPER No. 27

Indoor games are provided and a good library of books is open to them.

Food Supply.—By far the greater part of our food-supply is derived from the river and lake, setting nets in them nearly all the year round. We are seldom a day without fish on the table. These, with the potatoes we raise, form the staples of our diet. We occasionally get a little fresh meat from the Indians when meat is plentiful. We sometimes kill one of our beef animals and consume it, giving a portion to the children, who seem to relish it greatly. All other articles of diet must be imported, and ordered at least a year before we can get them here. It costs us nearly 10 cents for every pound of freight, including the freight on packing used for safe carriage, which must be thrown away, it being of no further use.

Clothing.—The school children are clothed principally out of the mission bales, contributed voluntarily by various branches of the Women's Auxiliary of the Church of England throughout the eastern part of Canada.

Mail Service.—The Hudson's Bay Company now carries, under contract with the government, two mails a year past our village, and a third to within 80 miles of us, viz., to Fort Resolution. We are not able to answer these mails direct, as they return from Resolution at the same time as ours is brought on to us. Thus we are obliged to wait for the next packet, unless some passerby is kind enough to carry out mail to Fort Resolution.

Finance.—In this connection, I must explain that we are only beginning to use the cash system. The skin system has been, and still is, the more general mode of exchange. All native helpers are paid wages in goods. These goods are bought in Winnipeg, and paid for by the bishop of the diocese, and sent on to us to be used to pay our help. Some of the gifts and clothing sent in the Women's Auxiliary bales are used for this purpose. All mission freight charges, as well as travelling expenses of the children, are settled for by the bishop of the diocese. All missionary helpers are hired and paid by the bishop.

You will see from the above that I am not able to forward a financial statement.

THE REPORT OF REV. D. CLAESSEN, PRINCIPAL OF THE INDUSTRIAL SCHOOL, KUPER ISLAND, B.C., FOR THE YEAR ENDED MARCH 31, 1910.

Location.—This school is situated on Telegraph bay, on the southwest side of Kuper island, about 5 miles from Chemainus station, on Vancouver island. The scenery of the bay, sheltered from three sides, widening southwards into Stuart channel, with a blue mountain range for background, is truly magnificent.

Land.—The land in connection with the school was surrendered by the Penelakut Indians, and forms part of the Kuper Island reserve. It extends over an almost square area of 70 acres. Most of it is under cultivation. The soil is good and suitable for mixed farming.

Buildings.—The buildings, twenty in number, are scattered in a very disorderly way at the southern corner of the school property. The profusion and irregularity of so many small buildings on different levels cause great inconvenience and discomfort to staff and pupils. Most of the buildings are old and some damaged beyond repair by long use and weather.

The main group of buildings, four in number, comprises on the ground floor: office, staff's and boys' dining-rooms, kitchen, girls' dining-room, recreation hall, sick-room, store-room, and sewing-room. On the upper floor are two bed-rooms, girls' class-room, girls' and sisters' dormitories, with linen-room and bath-room adjoining.

1 GEORGE V., A. 1911

The boys' home is divided on the ground floor, as follows: infirmary, bed-room, store-room, sitting-room, bath-room, and lavatory, play-hall, school-room. On the upper floor are the linen-room, dormitory and bed-rooms for teacher and two foremen.

The outbuildings consist of a cottage, a gymnasium, laundry, with dry-room, bakery, barn and stables, chicken-house, boat-house, carpenter, shoemaker and blacksmith shops, and woodshed. Since my last report a new hen-house with all modern improvements has been erected, and also a new bakery, with Hubbard portable oven. New barns and stables are under construction.

Accommodation.—The institution can accommodate 80 pupils.

Attendance.—During the year 84 pupils were in attendance. The average attendance was 75; 5 pupils were discharged with the consent of Superintendent Vowell; 10 new pupils were admitted.

Class-room Work.—The school hours were from 8.45 to 11.45 a.m., and from 4.30 to 5.45 p.m., with study from 7 to 7.45 at night for the boys. Monthly examinations are held by the principal, and the pupils made very good progress. At the end of the year the pupils were graded as follows:—

		Pupils.
Standard	I.	26
"	II.	15
"	III.	9
"	IV.	8
"	V.	7
"	VI.	7

Farm and Garden.—All the boys receive instruction in farming and gardening. The fields and garden yielded a very good crop. Our live stock consists of 11 cows, 1 bull, 3 heifers, 3 calves, 6 pigs, and about 100 fowls, and 3 horses.

Industrial Work.—Boys.—*Carpentry*.—Four boys received instruction. A new bakery was made, and a new barn, with stables, is under construction, besides the incessant repairing of old decaying buildings.

Shoemaking.—Three boys did the mending.

Painting.—All the painting was done by boys. This consisted mostly in inside work, and painting of boats and launches.

Baking.—One of the senior boys does the baking.

Dairying.—All the senior boys are trained in the milking of cows. Two boys operate the cream-separator.

Laundry.—Both boys and girls do this work under supervision of the laundress.

Girls' Industrial Work.—The girls are trained to do all kinds of general house-work, such as cooking, washing, baking bread and pastry, &c. They show great skill in hand and machine-sewing, cutting and finishing dresses, as well as in crochet and fancy-work.

Moral and Religious Training.—Religious instruction is given every day to all the pupils during half an hour. Morning and evening prayers are said in common.

Health and Sanitation.—The health of the children was exceptionally good since last summer.

Water Supply.—A hydraulic ram supplies the school with plenty of water. Natural springs give us pure water for drinking and kitchen use.

Fire Protection.—The pupils have been trained in the way of escaping, and three triangles are in use for signals. For fire-fighting, ladders, buckets, fire-axes, and chemical extinguishers are kept in the most convenient places.

Heating and Lighting.—The heating is done with ordinary heaters and box-stoves, which consume 100 cords of wood yearly. The heating cannot be very satisfactory on account of too many small scattered buildings. All the rooms are well lighted with acetylene gas.

SESSIONAL PAPER No. 27

Recreation.—A few improvements were made at our playgrounds. The boys enjoy mostly football, with boating and swimming. The girls amuse themselves skipping, playing ball, boating and bathing, when the weather allows. We have occasional concerts, with dramas, recitations, songs, and band-music.

According to information received, the ex-pupils who were supplied with tools by the department are making good use of them.

THE REPORT OF REV. R. N. CAIRNS, PRINCIPAL OF THE INDUSTRIAL SCHOOL (COQUALEETZA HOME), CHILLIWACK, B.C., FOR THE YEAR ENDED MARCH 31, 1910.

Situation.—The Coqualeetza industrial school is situated on the south side of the Fraser river, and is about 4 miles from the steamboat landing. Boats ply daily between Chilliwack and New Westminster, a distance of twenty miles. Connection is made with the Canadian Pacific railway at Harrison station, which is on the north side of the Fraser river. The school is three miles from the city of Chilliwack. In a few months connection by tram line will be completed between the school and Vancouver. It is not located on a reserve.

Land.—There are 90 acres of excellent land in connection with the school. The farm comprises lots 38 and 297, group 2, in the district of New Westminster, and is within the municipality of Chilliwack. The land is all cleared and under cultivation. A fine stream of spring water runs through it, making it an ideal farm for dairy purposes. The Missionary Society of the Methodist Church owns the property.

Buildings.—These are: (1) the main building, containing kitchen, dormitories, lavatories, laundry, recreation-rooms, school-rooms, clothes-rooms, furnace-rooms, and dairy; (2) the residence of the principal; (3) the residence of the farm instructor; (4) three large barns; (5) a granary; (6) a wagon and implement shed; (7) a wood-shed; (8) a new bake-house; (9) a hen-house; (10) a root-cellar; (11) a hot-house; (12) a new pig-pen; (13) two new tent-house dormitories added this year.

Accommodation.—The main building will accommodate 90 pupils and a staff of 10 teachers.

Attendance.—One hundred and three pupils have been in attendance during the past year. Of these 85 are now in the school, 12 have been discharged, 5 are away on holiday, and 1 has died.

Class-room Work.—The hours of study in the school-room are from 9 to 12 a.m., and from 1 to 4 p.m. Each pupil is in the school-room one-half of each day. The regular course of study of the schools of the province of British Columbia is followed. Good faithful work has been done, and the standing of the school is excellent. Two of the pupils passed the examination for entrance to a high school last June. We have been fortunate in securing the services of capable and painstaking teachers. The progress of many of the pupils is remarkable. At the end of the year the pupils were graded as follows:—

Standard	I.	13
"	II.	11
"	III.	29
"	IV.	9
"	V.	11
"	VI.	12

1 GEORGE V., A. 1911

Fifteen of the girls have received instruction in music. Some of them are fairly efficient, being able to play for our religious services. All are fond of singing, and both girls and boys have a singing lesson one evening each week. The boys have a reading-room, which is well patronized. The older pupils are encouraged to keep in touch with the busy world through the daily newspaper and the magazine. The pupils of our school are receiving a good practical elementary education. The hope is that they will go out from us to fill a place in this new province, and that each one of them may become a factor in the development of the great natural resources of our country.

Farm and Garden.—Both farm and garden gave us splendid crops last year. The following were produced: 28 tons of oats, 100 tons of turnips, 10 tons of field carrots, 25 tons of potatoes, 60 tons of hay, 5,000 heads of cabbage and cauliflowers, 10 tons of tomatoes, 6 tons of which ripened; besides what has been enumerated, quantities of onions, beets, parsnips, squash, pumpkins, radish, rhubarb, berries, and apples were grown. The live stock consists of 20 head of cattle, 6 horses, 1 colt, 20 chickens, and a number of pigs.

Industries Taught.—The aim of the school is to give the pupils a practical training, so that they will be able to do things. They are taught both by precept and example how to get results. The boys are very much interested in the garden. Our garden excited favourable comment from the neighbours last year. The boys did the work and received pleasure from it. Many of the boys become efficient with horses. They are taught to milk and care for cows, and, in fact, all kinds of farm work. Some of them learn the use of carpenter's tools very quickly. The boys do the baking of the bread. The girls are taught to sew, to wash, to cook, and to do all kinds of housework. It costs money to develop the latent powers of these Indian children. It calls for teachers of more than ordinary skill and patience to make a success of the work.

Moral and Religious Training.—The moral and spiritual education is done most thoroughly. The Bible is carefully studied; prayer meeting is held every week; the pupils are gathered in classes one evening each week for instruction in regard to things spiritual; they attend two preaching services each Sabbath; a simple prayer service is conducted each morning and evening at which all the staff gather as well as the pupils. During the past winter we held special evangelistic meetings for two weeks. A very large number of our pupils were led to decide to live a Christian life. We are greatly encouraged.

Health and Sanitation.—The health of the pupils has been remarkably good for the year. The past winter all the pupils have been free from even a cold. The services of a doctor have not been needed for months at a time. The record has been good. We have had 16 boys sleeping outside in a tent dormitory. This has relieved the pressure on our dormitories, and we are convinced that the change has been highly beneficial to the pupils. The windows in the dormitories are kept open all night summer and winter. These Indian children must have plenty of fresh air. Another thing that has helped the health of our pupils is the fact that they have had more butter and cheese than in former years, and a greater variety of food generally. The results have justified the increased expenditure. All drains are systematically and regularly flushed. We use crude carbolic for disinfecting the drains each at least once a week.

Water Supply.—There is an abundant supply of excellent water for domestic purposes. The Elk Creek Water Company's system passes in front of the institute. It is a four-inch pipe, but on account of the number drawing from it, the pressure is not sufficient to make it valuable for fire-protection.

Fire Protection.—This is afforded by the following conditions: a brick building, the furnace in the basement and the laundry stove on a cement floor, the baking is done in a brick oven detached from the main building, there is a barrel of water in each hall on the upper flat. There is a limited supply of water on the first and second

SESSIONAL PAPER No. 27

flats from the taps. The means of egress are numerous. There are four stairways leading from the second floor and three from the third. There are fire-escapes from the dormitories. All doors leading from the school-rooms, dormitories, dining-room, and from the halls open out. Fire-drill is held at intervals. The school can be free of pupils in less than two minutes.

Heating and Lighting.—The building is heated throughout by the Smead-Dowd system of hot air furnaces. The buildings of the institute, including the barn and cow stables, are lighted by electricity. It is much cheaper and much more satisfactory than acetylene gas.

Recreation.—The pupils have more or less time for play each day. Saturday afternoon is given over entirely to play. The pupils play football, baseball, basketball, and all kinds of games usually played by healthy active boys and girls. Just now our football team is playing in the league.

General Remarks.—The year just closed has been very satisfactory from my standpoint. The staff has done good faithful work. Each member seems to have an interest in the welfare of the pupils. The officials of the church have given every encouragement in the work.

THE REPORT OF REV. ALPH. M. CARION, PRINCIPAL OF THE INDUSTRIAL SCHOOL, KAMLOOPS, B.C., FOR THE YEAR ENDED MARCH 31, 1910.

Location.—The Kamloops industrial school is situated at the foot of St. Paul's mountain, on the northern bank of the South Thompson river. It is in the immediate vicinity of the Kamloops reserve, and about two miles from the town of Kamloops, which is on the other side of the river and is a divisional point of the Canadian Pacific railway.

Land.—Three hundred and twenty acres of land were originally surrendered by the Indians of Kamloops for the purpose of the industrial school; but in reality less than 200 acres belong to the school, for a public road cuts the school reserve in two parts and the land situated north of the road has been lately fenced in by the Indians as a part of their reserve. Of the 200 left, about 40 could be cultivated; but owing to the difficulty of obtaining water for irrigation, only 15 acres are laid out in fields, garden and orchard. The remainder consists of sandy and gravelly land suitable only for grazing, and of low-lying land subject every spring to overflow from the river. There is no natural grass to be cut for hay, nor is there any timber available for fuel.

Buildings.—The main building contains on the ground floor: the parlour, office, dining-room for the boys, kitchen, pantry and the laundry, with four bath-rooms and bake oven. The second story comprises the chapel and dormitory for the little girls. To the right is the girls' house, containing sewing and recreation-room, dining-rooms for the teachers and girls, and dormitories. To the north, about one hundred feet from the main building, is the boys' home, which contains store-rooms, recreation-room, lavatory and dormitory. There are also two rooms for the accommodation of the staff. The boys and girls' school-rooms are two separate buildings, only one story high and distant fifty feet from their respective homes.

The outbuildings consist of the carpenter and shoe shops, two stables and barn, two cellars, hen-house, ice-house, three-room cottage, girls' summer-house and tank tower.

Some alterations have been made during the year in the dormitories, so as to afford more accommodation and better ventilation.

1 GEORGE V., A. 1911

The floors of several apartments are very much worn out, but only the floor of the girls' recreation-room could be renewed this year. The buildings show externally a great need of a fresh coat of paint; otherwise, they may be said to be in good repair.

Accommodation.—There is sufficient accommodation for 60 pupils and the necessary staff.

Attendance.—During the year, 32 boys and 36 girls were on the roll; 4 boys and 5 girls were discharged; 8 boys and 7 girls were admitted.

Class-room Work.—The school hours for all the boys were in the morning from 8.45 till 12 o'clock every week-day, except Saturday; and in the afternoon of every week-day from 4.45 till 6.15 p.m. Besides, the boys of the lower grades attended school from 1.30 to 2.30 p.m. every week-day, except Saturday. Their teacher is very zealous and they have made very satisfactory progress. The school hours for the girls were from 2 to 5 o'clock in the afternoon, with half an hour's study in the evening. The course of studies required by the department was followed as nearly as possible

At this date the pupils are graded as follows:—

Standard		Pupils.
I.	21
"	II.	15
"	III.	3
"	IV.	17
"	V.	8
"	VI.	4
		—
Total.	68

Farm and Garden.—Considering the limited quantity of land which we can irrigate only by means of a gasoline engine, we have every reason to be satisfied with the crops this year: 22 tons of potatoes, 5 tons of carrots, 6 tons of mangolds, besides beans, pease, onions, parsnips and corn in sufficient quantities for the needs of the institution.

Small fruits: currants, gooseberries and raspberries were plentiful last summer. The orchard is not a success; the old trees are dying one after the other. This is partly due to the extreme cold of the winters, but also to the nature of the soil and the scarcity of water. There is a good location for an orchard further up the river, but it is too far from the school. Last summer, we had only a fairly good supply of crab apples.

The first alfalfa crop was very light owing to the dry spring; the two other crops were better, because we were able to irrigate from the windmill.

All the boys are employed at farm and garden work. They milk the cows and attend to the stable work in turn, outside of the regular work hours, which are from 1.30 to 4.30 p.m.

Since the last report, one very old horse, almost useless, was sold; another, also very old, died by accident, so that at present we have only two horses. The rest of the live stock consists of 4 milch cows, 1 dry cow, 1 yearling heifer, 1 young bull, 5 calves and about 60 fowls.

Industries Taught.—*Carpentering*.—Eighteen boys have received more or less instruction in the practical rudiments of carpentry. They have made all the repairs and alterations needed about the buildings; they have built a new tank of a capacity of 3,000 gallons. The tank is made of 3-inch planks and lined inside with galvanized iron. A new laundry, 40 x 20 feet, is now in course of erection, and the boys will have an opportunity to learn practical building.

Shoe Repairing.—Five boys have repaired the shoes for all the pupils as well as the harness used on the farm. They have done their work very well.

SESSIONAL PAPER No. 27

Baking.—The big boys were employed in turn in doing the heavier part of the work, and the girls did the rest. They have always succeeded in turning out first-class bread.

Girls' Work.—The girls do the cooking and washing, and are taught all the branches of housekeeping. Besides the help they give in the general baking, they are made to go through the whole process of making bread on a small scale in the kitchen stove oven. They are taught also hand and machine sewing, knitting, mending and darning. They make all their dresses and other articles of clothing.

Moral and Religious Training.—Every possible attention is paid to this most important branch of education. Religious instruction is given almost daily for half an hour, and constant supervision is exercised over the pupils in order that they may acquire more easily the habit of fulfilling all the duties they owe to God, to their neighbour and to themselves. Morning and evening prayers are said in common. On Sunday, the pupils assemble three times in the chapel, and besides, one hour is devoted to the learning of sacred hymns and to the explanation of the gospel.

Health and Sanitation.—During the summer holidays, three girls got sick at home and could not return for a few weeks; since their return they have enjoyed good health. We have had a few cases of itch amongst the boys and girls, which gave us much trouble; but timely treatment prevented the spreading of the disease. One boy, upon examination by the medical officer, was found with a portion of one lung affected, and was discharged. With these exceptions, the general health of the pupils has been very good.

The sanitary condition is excellent. The water from the kitchen and laundry is carried to the river by an underground drain. Garbage and refuse matter are not allowed around the buildings; chloride of lime and lye are used as disinfectants. Ventilation is carefully attended to, and the pupils are often reminded of the importance of securing a constant supply of fresh air.

Water Supply.—Good water is obtained from the South Thompson river by means of a bull-dozer pump and gasoline engine. The storage tank, of a capacity of 3,000 gallons, is placed near the kitchen, whence the water is conveyed to the boys' building by galvanized iron pipes.

Fire Protection.—The fire-appliances are as follows: 3 Carr chemical fire-engines, and 4 Eclipse dry dust extinguishers, 2 fireman's axes, 3 heavy ladders, permanently attached to the buildings and some smaller ones, about 2 dozen buckets, one large stair outside of the boys' dormitory for fire-escape. There is one tank, containing 3,000 gallons, near the kitchen, but too low to give sufficient pressure in case of fire, and the water would have to be carried by hand. A new tank, of a capacity of 1,000 gallons, has just been purchased to replace the old one and is now being installed on the top of the tower 30 feet high. The tank can be filled in less than half an hour's time by the bull-dozer pump operated with a 3-horse power gasoline engine. In connection with the tank, there are 100 feet of rubber hose, which can be attached to any of the three hydrants placed at convenient points, so that a stream of water may be directed to any part of the main buildings. It is to be regretted that we cannot find the means to protect the tank against frost in the winter.

Heating and Lighting.—Ordinary box stoves are used for the purpose of heating the rooms, and for lighting we have only coal-oil lamps, though we use tallow candles when it is necessary to move the light from one room to another.

Recreation.—The pupils are allowed ample time for recreation during the weekdays, and on Sundays and holidays they usually take a walk through the country. They indulge in the ordinary amusements suitable to their age and sex. The girls are fond of reading and listening to the gramophone, but the boys prefer outdoor exercises.

Ex-pupils.—With the exception of three female ex-pupils who died after a few years of married life, all the pupils who completed their term of residence at the

1 GEORGE V., A. 1911

school, are living and, generally speaking, are in good health. Most of the boys prefer to marry girls trained in the same institution; quite a number of marriages have taken place between ex-pupils, to the satisfaction of all concerned. The circumstances of the Indians in this district are such that it is next to impossible to form the ex-pupils into separate colonies or settlements. The parents are anxious to have their children returned to them after their discharge from the school, and generally take good care of them. Attempts have been made in the past to give assistance to ex-pupils, but the parents refused it.

The great majority of the ex-pupils are doing well, and are a credit to the school. Some reside on their reserves and cultivate their little farms, though occasionally they work out for wages. Others find it more profitable to work steadily for the white people, and are employed on railroads, steamboats and farms or in saw-mills and logging camps, where they give general satisfaction. Still they always remain in contact with their own people. The female ex-pupils, as a rule, live on the reserves and get married almost as soon as they leave the school. Many ex-pupils are regular subscribers to magazines and newspapers; they write often to their relatives at school and give them good advice as to the diligent use of their time.

THE REPORT OF REV. GEO. DITCHAM, PRINCIPAL OF THE INDUSTRIAL SCHOOL, LYTTON, B.C., FOR THE YEAR ENDED MARCH 31, 1910.

Location.—The school is $2\frac{1}{2}$ miles from Lytton, north, on the left bank of the Fraser river, immediately beside the Lytton-Lillooet wagon road.

Land.—The land comprises some 800 acres, and is sandy, sandy loam, and a little alkali; owned by the New England Company, and all obtained by purchase.

Buildings.—The school building is in good repair, and all other buildings are in use for their special purposes. We gave the main school building a good coat of paint this year from base to ridge-boards, a good log house has been added to the number, and a large barn in the framing, on lot 47, group 1, and a saw-mill on lot 11.

The other buildings are: poultry-sheds, laundry, Chinese-room, paint-room, woodshed, two log houses, ice-house, cold storage, coal-oil dugout, pig-houses, cow-barn, horse-stable, smoke-house, carpenter's shop, root-cellar, implement-shed, blacksmith's shop, sheep-sheds, near the school; farmhouse, two pig-sheds, root-cellar, cattle-sheds, horse-stable, dairy-barn, dairy, hay-sheds, on lot 12, about a mile north of the school.

Accommodation.—The school was built for the accommodation of 35 pupils and a staff of 4, but we could easily house more, as we have spare room in the basement.

Attendance.—There are 29 on the register, 2 in Lytton hospital, 2 absconded.

Class-room Work.—The hours for school are from 9 a.m. to noon, 7.30 p.m. to 8.30.

The subjects taught are reading, writing, arithmetic, English and Canadian history, grammar, geography, geometry.

Farm and Garden.—We had a fair season for grain and hay, poor for fruit, but a tip-top season for garden truck and roots.

Industries Taught.—Carpentry, blacksmithing, farming, gardening.

The housework is done by the boys, and a good deal of clothes-mending, and washing and cooking.

Moral and Religious Training.—Some improvement is noticeable in truthfulness and honesty, and the boys are fairly well-behaved and obedient, though they need constant supervision.

SESSIONAL PAPER No. 27

The instruction and services for them are those in general use in Church of England schools, and now that the boys understand English so well, this work comes easier.

Health and Sanitation.—Health has been good; the southeast winds in the early spring, blowing up from the rains of the coast, we find very trying, bringing influenza; these find out the weak spots in the constitutions. We have had no sickness from any immediate surroundings; and these we are careful to keep clean, but one gets a little anxious when a thaw carries road-matter into the creeks from which we get our water-supply. The provincial road to Botanie valley runs east along the north of the creek. One boy died in Lytton hospital of consumption; an exceptionally clever lad at arithmetic and handy-work.

Water Supply.—We have now two stone and cement tanks, which give us two weeks' supply. They are filled from a creek fed by three springs.

Fire Protection.—Two fire-escapes are built to the dormitories, a perforated pipe is along the ridge for watering roofs, and a good number of axes, buckets and hose are at hand

Heating and Lighting.—Heating is by hot-air furnaces, lighting by coal-oil lamps.

Recreation.—Football, rounders, and hockey, are the principal games played; the coasting was very good last winter, as we got a run by flooding part of a field.

Ex-pupils.—These are engaged chiefly in agriculture as farm labourers, or on their own places.

When they leave school they come under the care of the mission clergy.

THE REPORT OF REV. FELIX BECK, PRINCIPAL OF THE INDUSTRIAL SCHOOL, ST. EUGENE, KOOTENAY AGENCY, B.C., FOR THE YEAR ENDED MARCH 31, 1910.

Location.—This school is beautifully located in a valley, which lies northeast of Cranbrook, our nearest railway station, at a distance of about 5 miles.

Land.—An area of 33 acres belongs to this school. It is occupied by the buildings, playgrounds, gardens and orchard. There are also 120 acres connected with the school, which is the property of the Sisters of Charity. It is cultivated principally in order to give the boys a more thorough training in farming.

Buildings.—There are three separate frame buildings, which form the accommodation of the staff and pupils. The outbuildings are a bakery, laundry, supply store, foreman's house, shoeshop, woodshed and stables.

Attendance.—There has been a regular attendance of from 60 to 65 pupils, while the per capita grant is for 50 pupils only.

Class-room Work.—The course of studies outlined by the department is closely followed, and the pupils have made good progress during the year. They are exercised in reading, spelling, writing, arithmetic, geography, grammar and history according to their ability or the requirements of their standard. Regular lessons in vocal and instrumental music, were given. The boys have a good band; they play, at intervals, at the church on festival days, and sometimes go to Cranbrook or elsewhere to exhibit their band, of which they may justly be proud.

A string band has been established among the girls during the current year. Splendid progress was made, and they are now able to execute pieces on their respective instruments, singly or together as desired.

1 GEORGE V., A. 1911

At the close of the term the pupils were classified as follows—

Standard		Pupils.
I.	27
“	II.	7
“	III.	15
“	IV.	10
“	V.	2

Total.	61

Farm and Garden.—The abundant yield in the crops of hay, oats, and potatoes, show what can be effected on this soil with proper irrigation and care. All the work is done by the boys under the supervision of the foreman. The apple produce was not so good this year owing to the plenteous supply of last year.

Boys' Industrial Work.—The boys, besides receiving a thorough and practical training in farming and all its branches, are instructed in the carpentering trade, and are able to attend to all the repairing that is needed about the farm and premises. They have constructed, with the aid and under the supervision of the foreman, a sidewalk, leading from the school to the church. It certainly speaks very much in their favour and is also a great benefit to the school.

Girls' Industrial Work.—The girls are trained in the culinary art; they are taught to bake, sew, and wash, in fact, everything that tends to make them good housekeepers. They show great aptitude for all manual work, and as a general rule succeed very well. All the baking is done by the girls, under the supervision of the sister in charge. Their bread is generally excellent. They sew all their own clothes and sometimes help with the boys' sewing or mending.

Moral and Religious Training.—As far as can be exacted of children of their condition, the conduct of the pupils has been excellent. They are taught to abide by the laws of the Christian religion and are generally exact in their observance. A continual watchfulness is exercised over the pupils.

Health and Sanitation.—The general health of the pupils has been good; every precaution is taken to prevent their exposing themselves to take cold.

Water Supply.—We get a good and healthful supply of water from Joseph creek, a streamlet flowing into the St. Mary's river. It is conveyed to the premises by means of pipes.

Fire Protection.—Chemical fire-extinguishers, buckets, ladders, and axes stationed at convenient places are the protection depended upon in case of fire. There are two main pipes connected with the school, to which a hose can be attached in time of need.

Heating and Lighting.—The houses are heated by wood stoves, which are 23 in number. Owing to the great inconvenience of keeping up so many fires during the cold season, we added to our store, a coal furnace, which served the purpose of several stoves, by diffusing its heat through three or four rooms at the same time.

Recreation.—During the winter season, skating and coasting are freely indulged in; in summer, football and baseball form the main pastime.

THE REPORT OF MR. A. W. CORKER, PRINCIPAL OF THE INDUSTRIAL SCHOOL, ALERT BAY, B.C., FOR THE YEAR ENDED MARCH 31, 1910.

Location.—This school is healthily situated on the Alert Bay Industrial School reserve. It is protected from the north wind, has a southern aspect and commands a pleasant view to the sea.

The post office address is Alert Bay, British Columbia.

SESSIONAL PAPER No. 27

Land.—There are 410 acres of land connected with the school, 5 of which have been cleared and fenced. The land is best adapted for pasture. It is very difficult to clear. Potatoes do well for the first and second years.

Buildings.—The school building is of wood, 60 x 40 feet, strongly and tastefully erected, with plastered walls, and light airy rooms. Attached to the main building is a wing, 54 x 18 feet, comprising class-room and workshop. The outer buildings comprise trades instructor's house, root-house, cow-house, and tool shed.

Accommodation.—There is accommodation for 35 boys and 3 officers.

Attendance.—The average attendance was 32.

Class-room Work.—The work in the class has been very encouraging. Good progress was made in English, reading and geography. The principal has taught all the year only assisted by George M. Luther, who was educated in this institution. The programme of studies authorized by the department is followed.

The pupils were graded as follows:—

Standard	I.	3
"	II.	4
"	III.	12
"	IV.	5
"	V.	5
"	VI.	3

Industries Taught.—All the smaller boys have had definite and systematic teaching in the general housework of the institution. The older boys have had regular instruction in the carpenter's shop, under Mr. Geo. Green, until May, when Mr. Eli Hunt was appointed trade instructor. The pupils under him have made very fair progress and have taken a much keener interest in this branch of the work than ever before.

Farm and Garden.—The flower garden was tended by the matron, Miss Warrenner, and the smaller boys. The vegetable garden yielded a good supply of fresh vegetables and small fruit. A very good crop of potatoes was raised, also about a ton and a half of hay.

A fresh piece of land, 226 x 200 feet, has been cleared during the year, which I hope to sow down with potatoes. It needs to be fenced.

Laundry Work.—Miss Warrenner, as usual, has been indefatigable in teaching this branch of the work.

Moral and Religious Training.—The moral and religious welfare is strictly and conscientiously looked after. The moral atmosphere of the school is good, and tells for good in the lives of the boys. The pupils are continually taught the necessity and advantage of purity of mind and body. This is done by daily prayer, Bible reading, as well as talks with individuals, by the principal, and the staff.

The boys attend Sunday morning and evening service in church.

Health and Sanitation.—The general health of the pupils has been very good, with the exception of a very mild attack of measles, in the fall. The sanitary arrangements are satisfactory. A wooden drain carries the water from the kitchen, bath-room and wash-house to the sea. Cleanliness is enforced, and disinfectants used. Ventilation is carefully attended to.

Water Supply.—The water is supplied to the house from a well near by. The water is pumped up by the boys into a wooden tank, which is always kept clean.

The water is pure.

Fire Protection.—Four fire-extinguishers, two fireman's axes, and eight fire buckets are kept in places of easy access. An iron fire-escape was erected last year to the upper bed-room.

There is also a pump and 184 feet of hose. Fire-drill is practised.

Heating and Lighting.—The school is heated by ordinary box-stoves. Coal-oil lamps are used, and are hung from the ceiling.

1 GEORGE V., A. 1911

Recreation.—Outdoor exercises are heartily encouraged. Football still retains its place as the most popular game. Baseball has been played more during the year than in the past. The senior boys have been taught to play lawn tennis.

Indoor Games.—Draughts, crokinole, parlour croquet, chess, and word-making, are played during the winter evenings. The plasticine supplied by the department was much appreciated by the pupils; they made good progress in modelling and designing.

Ex-pupils.—Most of the ex-pupils living in the vicinity are, on the whole, well conducted, industrious, and thrifty. Some are logging, others work in the saw-mill.

General Remarks.—The Bishop of Columbia, and Mrs. Perrin, visited the school last June. His Lordship carefully examined the pupils, and was delighted with the progress made since his last visit.

I thank Miss Monk, the matron of the Alert Bay hospital, for her weekly lessons imparted to the pupils in singing, breathing, and chest expansion. The boys enjoy these lessons very much, and I have noticed a marked improvement in the deportment of the boys, and less chest trouble than heretofore. I have also to thank Dr. Baker, of the same institution, for professional visits, and his interest taken in the health of the boys.

THE REPORT OF REV. P. MAURUS, PRINCIPAL OF THE INDUSTRIAL SCHOOL (CLAYOQUOT), WEST COAST AGENCY, B.C., FOR THE YEAR ENDED MARCH 31, 1910.

Location.—The Clayoquot (Christie) industrial school is situated in a cove of Deception channel, Clayoquot sound, on the west coast of Vancouver island. The location is ideal for a school, central on the coast, secluded from the Indian reserves and the white settlements, and well sheltered from prevailing and cold winds. Mail reaches the school by private mail-bag direct from the Victoria post office.

Land.—The institution owns 175 acres, the title of which is vested in the Abbot of St. Benedict's Abbey. The land is heavily timbered and offers great difficulties to cultivation; a small amount of garden produce excepted, it yields no material advantage.

Buildings.—The main building is a commodious, substantial frame structure of two and a half stories, with basement of concrete walls, and has a frontage of 144 feet and a depth of 52 feet. In the basement are two gymnasiums, the furnace-room, cellars, cold storage, paint and plumber shops. The first floor includes officers', boys' and girls' entrance halls, parlour, sitting-room, Indian-room, kitchen, pantries, store-room, pupils' and officers' dining-rooms, senior and junior class-rooms, girls' sitting-room, boys' recreation-room, 2 sewing-rooms, and 2 toilet-rooms. On the second floor are girls' dormitory and lavatory, 2 infirmaries with bath-rooms, office, 8 bed-rooms, 2 officers' bath-rooms, chapel, 32 x 48 feet, and vestry. The boys' dormitory, 1 bed-room, 2 clothes-rooms and 1 trunk-room, occupy the attic.

In the rear of the main building stand the laundry, 26 x 60 feet, and the woodshed, 36 x 50 feet, the upstairs of which is divided into carpenter shop and shoe shop. For the use of the instructor and family there is a cottage, 24 x 30 feet. At a little distance from the main building is the warehouse for the storing of flour and other provisions. Other buildings on the premises are the hen-house and the barn.

Accommodation.—The school has comfortable accommodation for 75 pupils and a staff of 10 members.

SESSIONAL PAPER No. 27

Attendance.—The average attendance for the year is 68.5, 3 boys and 7 girls received their discharges during the year, 7 boys and 4 girls were admitted. The present enrolment is 66 pupils, 37 boys and 29 girls.

Class-room Work.—Class and study hours are from 8 a.m. to 12, and from 2 to 4 p.m. All pupils are in school from 8 to 10 a.m. While the seniors have their classes from 10 to noon, the juniors are occupied with chores and industries, the juniors, however, attend school from 2 to 4 p.m. The children are taught reading, writing, arithmetic, spelling, dictation, letter-writing, composition, geography, history of the province and of the Dominion, catechism, Bible history, hygiene, drawing, vocal and instrumental music. Examinations are held monthly. The progress of all pupils has been highly satisfactory. At the end of the term they are graded as follows:—

Standard		Pupils.
I.	7
"	II.	12
"	III.	18
"	IV.	11
"	V.	11
"	VI.	7
Total..		66

Farm and Garden.—On account of the great expense and the hard and slow work of clearing the land of the heavy timber and the dense undergrowth, the school may not boast as yet of rich harvest-fields and verdant pastures, but 'a garden is smiling, where once frowned a forest.' It yielded only a fair amount of vegetables, owing to a late and wet season. All boys are taught gardening.

Industries.—Our course of manual instruction is designed to serve the double purpose of cultivating habits of thrift and a love of honest labour in check of the strong natural indolence so marked in the Indian nature, as well as of imparting knowledge and practice of such industries as will be of use and necessity to the pupils in their future environment.

Clearing land and adapting it to use of vegetable gardens and poultry yards is an important item for the west coast Indian.

Carpentry, in as far as it includes house-construction, decoration and equipment, strongly appeals to the Indian's ambition to possess comfortable dwellings. The boys apprenticed to this trade in the past year had ample opportunity to learn and improve by the work of finishing the interior of the new laundry. In repairing furniture and in making new household articles they had good practice. When actual construction of buildings at the school is wanting, the instructor has his pupils make models by accurate scale of cottages suitable for Indian life. In connection with this trade the teaching of the proper care of tools is by no means overlooked. The apprentices in carpentry are also taught painting, mixing and shading of paint, and the correct application to woodwork, likewise staining, graining, varnishing and polishing.

While there was no call for new boats in the past year, still this industry was not allowed to suffer on that account, and the boys when free from other occupations, were detailed to making oars, paddles, bails, and models of row and sail boats.

As fish is the staple article of food of our Indians, fishing in all kinds of weather is the delight of our older boys, who again have done well the past year and kept the institution well supplied with all kinds of fish. Net-making is taught as a matter of course.

We make no speciality of either blacksmithing or plumbing, or masonry, but there is always some occasional work in one or other of these lines to teach the young Indian to be handy with tools at the anvil and the forge in making tools or repairing same,

1 GEORGE V., A. 1911

or threading and fitting pipe, or mixing concrete and mortar. All the water and the steam and the sewer connections in the new laundry were made by pupils in a creditable manner. The concrete floors, the concrete foundations for the engine and for other machinery made by them, are as good as any made by professionals. They also built a brick chimney with good success.

Four apprentices are very busy every rainy afternoon in the shoe-shop, half-soling and repairing shoes.

Dairying is carried on to a small extent, and four boys learned milking and had care of our few cows.

The girls are taught and assigned tasks, according to ability and proficiency, in the different branches of domestic work, such as sweeping, dusting, scouring, care of rooms. They take their turns in the kitchen, cooking, baking, preparing of vegetables, in feeding and caring for poultry. Each girl has to pass through specified courses in plain sewing, hemming, darning, sewing by machine, plain and fancy knitting, mending, hemstitching, cutting, fitting, and finishing of dresses, in crocheting, lace-making, and embroidery. They make all their own garments and much of the boys' clothing. Their needle-work, both plain and fancy, is an object of admiration to visitors.

The laundry work is all done by the girls since the installation of machinery and steam. Every detail and nicety of doing fine work is explained and demonstrated to them. Outsiders have been quick to appreciate their good work and have become regular customers.

Moral and Religious Training.—The development of Christian character is our ideal in school work, and we hold that religion must be the dominant influence in that work. By thorough religious instruction imparted daily we strive to awaken in the young hearts sincere love and fear of God, to develop the right conscience, and to encourage the practice of Christian virtues aided by the supernatural means of religion. Correction and suasion in private is a potent factor with the Indian in stimulating individuality and earnest effort for good.

Health and Sanitation.—The average health of the pupils was good; one boy had to be discharged for reason of impaired health. Early this spring some cases of tonsillitis of rather a severe nature made their appearance, doubtlessly due to unusual conditions of weather. Sewerage and sanitation are very good.

Water Supply.—This is excellent, and is obtained from a small mountain stream, having its source in the southern slope of Lone Cone. At a head of about 190 feet the water is conducted by a flume to an 8,000-gallon tank, from which it is brought to the school by 3 and 2-inch galvanized iron pipe, for a distance of nearly 1,200 yards. The water is pure and abundant all the year round.

Fire Protection.—Ten chemical extinguishers, 24 fire-pails, 2 fireman's axes, and 200 feet of two-inch rubber-lined web hose constitute our fire-fighting apparatus ready for emergency in easily accessible places. The pupils are drilled in vacating the building, by day and by night, orderly and expeditiously, likewise in the use of above-mentioned appliances. Outside fire-escapes provide for safe exit in case of fire. The pressure of the water main is about 80 pounds.

Heating and Lighting.—The heating plant is a direct two-pipe open tank hot water system in connection with a Kewanee Great Northern tubular boiler, a complete success and economical in consumption of fuel. Coal-oil lamps are used for lighting.

Recreation.—Liberal allowance is made for recreation, in the middle of the forenoon and of the afternoon, after meals, Saturday afternoon and on Sunday. The beach of hard sand, right in front of the school, offers the boys an ideal playground on which to give vent to their buoyant spirits in football, baseball, jumping, racing. To those fond of aquatic sport the smooth and troubled waters of the bay offer exceptional facilities. The girls have swings, skipping ropes, croquet and ten-pins. On

SESSIONAL PAPER No. 27

rainy days the children enjoy themselves with a variety of indoor games. They also have drills and calisthenic exercises.

Ex-pupils.—It affords me pleasure to witness the very friendly relations existing between the ex-pupils and the institution, manifested in visits and epistolary correspondence. Most of them are at home with their people, one only is away in Tacoma working in a saw-mill. While a few were engaged in the hunt for fur seal and sea otter on board of schooners, some worked for the Kyuquot whaling station, others for the Nootka Marble Quarry Company, in nearly every instance holding favoured positions of trust, again others were fishing for canneries last summer. Three are successful and well-to-do shopkeepers on their respective reserves. Some girls have been out in domestic service, and one enterprising maid renting a sewing-machine and suitable premises opened a dressmaking establishment in Victoria. We know of no ex-pupil of ours who is not anxious to find and keep work when to be had.

Nearly all the ex-pupils who are married have their own homes, in not a few instances built by themselves, and though not all succeed to keep them clean, some, however, have as tidy a house as may be found with white people. Since my last report seven couples of ex-pupils have been united in the holy bonds of matrimony.

Considering the many and great obstacles made to them by the old people, I am happy to report that our ex-pupils so far have done honour to the school which educated them to be Christian and useful members of the human family.

THE REPORT OF REV. H. BOENING, PRINCIPAL OF THE INDUSTRIAL SCHOOL, WILLIAMS LAKE, B.C., FOR THE YEAR ENDED MARCH 31, 1910.

Location.—This institution is beautifully situated in a fertile valley along the San Jose creek, 135 miles from Ashcroft, a station on the Canadian Pacific railway, and 4 miles from Sugar Cane, the nearest Indian reserve. The post office is Williams Lake.

Land.—All the land in connection with the school is the property of the Corporation of the Oblates of Mary Immaculate. It is, for the greater part, only pasture land.

Buildings.—These consist of the main building, the boys' and the girls' homes, and a fourth building containing kitchen and dining-rooms. The main building is mostly occupied by the reverend principal and the other fathers. The boys' home comprises on the lower floor: school-room, play-room, shoemaker-shop, bath-room and lavatory; on the second floor: dormitory, store-room, office and bed-room for the foreman; in the attic are located the boys' wardrobes.

The girls' home has on the lower floor: a school-room, a store-room, two parlours, bath-room and lavatory, a sewing and play-room; the upper floor contains a dormitory for the bigger girls, with a bed-room for members of the staff, chapel and vestry, bed-rooms for the teachers, and a second dormitory for the smaller girls; in the attic are the girls' wardrobes and another store-room.

The outbuildings are: granary, meat-house, carpenter and blacksmith shops, 3 cellars, hen-house, stable, barn, machine-shed, and warehouse, with a lean-to on three sides for buggy, wagons and sleighs.

Accommodation.—The school can easily accommodate 90 pupils with the necessary staff.

Attendance.—On March 31, 1909, there were 59 pupils in attendance here. Now there are 67 in attendance: 27 boys and 40 girls. Of these, 55 pupils are enrolled,

1 GEORGE V., A. 1911

the others are not. During the year, 10 were admitted and 2 discharged, a boy and a girl, both 18 years old.

Class-room Work.—The steady progress in the school-room, I am glad to state, has been kept up in the two departments. The school hours for the boys are in the forenoon, from 8.15 to 10 every week-day, and in the afternoon, from 4 to 5.30, except Saturday. The school hours for the girls are in the forenoon, from 10.30 to 12 every week-day, except Monday forenoon, and in the afternoon from 4 to 5.30. The subjects taught are those prescribed by the department. The pupils are at present graded as follows:—

Standard	Pupils.
I.	11
“ II.	4
“ III.	16
“ IV.	14
“ V.	9
“ VI.	13
	—
Total.	67

Farm and Garden.—All the field crops did well. In the garden also we raised a good supply of all kinds of vegetables, such as beets, cabbage, cauliflower, turnips, carrots, onions, lettuce, pease, celery, leeks, &c. Only the few apple trees we planted some years ago did not bear any fruit, most of them having been killed to the ground the preceding winter. But currants and raspberry bushes did well, as usual.

Industries Taught.—Farming being in this part of the country the best and most lucrative occupation for our Indians, we try to give our boys a thorough and practical knowledge of this branch. All the work in our garden of about 6 acres, except ploughing, was done by the senior boys, and, at times, even all the smaller ones were employed there. During winter they saw and split the fire-wood, which is no small item here.

Carpentry.—Mr. J. J. Swain is a very efficient instructor in carpentry. Three boys received regular instruction by him. They built a new boat, helped in the erection of a saw-mill, put up a small house, 12 x 12 feet, over the acetylene gas plant, and made many important alterations in the girls' home, besides attending to all the repairs in and around the premises.

Plumbing.—Occasionally some work has to be done in the many plumbing fixtures of the institution, when two of the more promising boys are called in to learn something of the trade.

Shoemaking.—In the absence of a competent shoemaker, work in this shop is limited to half-soling and mending. This is done in a neat manner by one of the senior boys, who instructs others now also.

Dairying.—Twice every day, at noon and in the evening, four boys attend to the separator. They also do the churning, while the girls attend to the lighter work of butter-making.

Girls' Industrial Work.—The girls attain great proficiency in all branches of housekeeping; in knitting, mending, hand and machine sewing, dressmaking, crocheting, embroidery and lace-making. Except their underwear for winter, they make all their own clothing and the greater part of the boys' suits. Under the direction of a sister, also, they in turn attend to the laundry, to the cooking, baking, butter and cheese-making. The aim ever kept in mind is to prepare each girl to become an all-round practical housekeeper. How well the good sisters succeed in this is shown by the many inquiries from white people for girls to help in the housework and by the Indians being very anxious to send their girls to school so that they may learn well, cooking, knitting, and mending, as is shown also by the great number of girls at school: 40 against only 27 boys.

SESSIONAL PAPER No. 27

Moral and Religious Training.—This being the most important part of education, particular care is taken by all members of the staff in training the children to be obedient, truthful, honest, kind and obliging. Religious instruction is given daily by the principal, morning and evening prayers are said in common, and on Sundays and holy days the children do all the singing in the church, often in two and three, sometimes even in four parts. Under this heading I am very pleased to state, to the children's credit, that our efforts meet with splendid success. Very, very seldom I am obliged to resort to corporal correction, religious persuasion being mostly sufficient to obtain the desired effect.

Health and Sanitation.—Under this heading I am happy to say that since a number of years the children of this school always enjoy excellent health. This good record has been kept up again as we have no contagious disease, no serious case of any kind, no death to deplore. Not surprising then to hear Indians saying when presenting their offspring for admittance: 'I'm afraid he'll die if I keep him.'

Water Supply.—This comes to us through pipes from an artificial lake, into which runs part of the San Jose creek. It has taken a great deal of the Oblate Order's private funds in order to get the water system in such good working order that even in the severe winter of 1908-9 everything worked without a hitch. Unfortunately the pressure is not strong enough to be of any service in a big fire, so that steps ought to be taken soon to improve this.

Fire Protection.—With a change in the heating system fire-protection has become more efficacious, though there is still much room for improvement.

Heating and Lighting.—The school management was forced last year to make a big loan in order to carry out the very necessary improvements in the heating apparatus. Both the boys' and the girls' homes are now heated by three McClary hot-air furnaces, which give good satisfaction. The benefits of this improvement cannot be over-estimated. The greater number of box stoves—in the girls' department alone as many as sixteen were sometimes burning—have gone and with them a continual danger of fire, not mentioning the trouble of cleaning flues often and the extra work in preparing fuel. With the furnaces have come also a never-failing supply of running water and interior toilets, two items absolutely necessary for the welfare of the inmates. I cannot let pass this occasion without bringing to the notice of the department the extraordinary zeal and good will that boys and girls displayed in the long and tedious work of digging out a basement, 110 x 18 x 7 feet, for these furnaces without other tools but picks and shovels and buckets. All the buildings are lighted by acetylene gas, which continues to give complete satisfaction.

Recreation.—Boys and girls have large and well-kept playgrounds where they enjoy all kinds of outside games nearly the whole year. The girls have one part of their playground fenced off, where each one has her little flower garden.

Recreation.—Boys and girls have large and well-kept playgrounds where they continue, on the whole, to be a credit to the school.

Before closing I am happy to say that this has been the most successful year, thanks to the generous co-operation of my staff.

THE REPORT OF REV. SISTER THERESINE, PRINCIPAL OF THE BOARDING SCHOOL, SECHELT RESERVE, FRASER RIVER AGENCY, B.C., FOR THE YEAR ENDED MARCH 31, 1910.

Location.—The school is beautifully situated on the top of a small hill just behind the little Indian village of Sechelt. The view from its windows is grand, one looks south out across the gulf of Georgia and sees the blue mountains of Van-

1 GEORGE V., A. 1911

cover island in the distance. It is built on Secelt reserve, and the post office address is 'Sechelt, B.C.'

Land.—There are three acres and a half cleared, but more is available if required, as all belongs to the Indians. The soil is sandy, but well fertilized, is good for all gardening purposes and the growing of fruit-trees. What is now cleared is divided into vegetable garden, orchards, flower gardens and playgrounds.

Buildings.—The school-house composed of the main building, 83 x 36 feet, and a wing, 30 x 28 feet, is divided as follows: entrance hall, boys' parlour, children's dining-room, two private rooms, parlour, kitchen, dining-room and pantry, on the first floor; the boys' lavatory, their school-room, a dormitory, a lavatory, an infirmary for the girls, four rooms for the staff, and the boys' infirmary, on the second floor; the chapel and two dormitories with toilets and bath-rooms adjoining on the upper floor.

The second building, 65 x 25 feet, comprises, in the basement, two cellars, two wood-sheds and a workshop; on the first floor, two play-rooms and a wash-room; on the second floor, a large drying-room and a store-room.

The third building, 30 x 22 feet, is used as stable and chicken-house.

Accommodation.—Accommodation can be provided for 60 pupils and the necessary staff.

Attendance.—The attendance has been all that could be desired.

Class-room Work.—This is carried on according to the course of studies prescribed by the department, and good progress has been made during the past year.

The interest in the class-room work is kept active by the giving of good marks for proficiency in work and good conduct. To the pupils who obtain the highest number of marks, a prize is given. The books sent by the department, together with magazines, prove always very acceptable.

Lessons in perspective drawing and in vocal music are given every week, and the children show great interest in them.

Farm and Garden.—When the gardening season comes, all the children work with zest and pleasure under the supervision of the sisters. Last year we harvested three tons of potatoes and a good supply of all other vegetables.

The land slopes gently to the south, and this exposure is perfect for the cultivation of all kinds of fruit and flowers.

Industries Taught.—The girls learn cooking, baking, laundrying, mending, knitting, crocheting, dressmaking, lacemaking, Indian basketry and every kind of needle-work and fancy-work. Some of the older ones excel in the particular work that appeals to them. They have clever fingers as a rule. The following extract from a New Westminster paper gives a good idea of what the children are capable:—

'An exhibit that is worthy of every attention is that of the Sechelt Indian school. No one who views this exhibit will have any further doubts as to the advisability, as to the wisdom of training Indian children. The exhibit is a particularly large one and in the work shown is everything that white needle-work can do. There are exquisite centre pieces, lace work, drawn work, Battenburg work, cushions and all other kinds of fine fancy-work. Samples of drawing, map drawing, and writing are also shown, all of which demonstrates in no mean way the advancement of Indian children under modern educational methods.'—*Daily Columbian*, October 14, 1909.

The boys do carpentering, wood-carving, shoe-repairing, painting, netting, gardening and all the repairs of the house. In general, they are clever and good workers.

Moral and Religious Training.—Half an hour of religious instruction is given daily to all the children by the missionary or one member of the staff, and no effort is spared to inculcate in their hearts the virtues that will make them, later on in the world, strong Christians and good citizens. Their conduct during the past year has been very good.

Health and Sanitation.—One boy and one girl died of tuberculosis, and there was one case of pleurisy. The other children have been very healthy during the year and

SESSIONAL PAPER No. 27

seem stronger than when first they came to the school. The premises are always kept clean, the drainage is very good and precautions against disease are always taken. Breathing exercises are given regularly.

Water Supply.—The water is very good, but the supply during the summer is not sufficient.

Fire Protection.—Our protection against fire consists of 6 Underwriters' fire-extinguishers, 200 feet of hose, 24 buckets and one ladder, distributed throughout the school-house and always ready for use.

Heating and Lighting.—We burn wood in air-tight stoves, and we use coal oil and gasoline lamps.

Recreation.—The games that the boys indulge in and enjoy are baseball, football, lacrosse, bars, shooting, &c.

The girls take pleasure in skipping, swinging, reading, singing, dressing dolls, croquet, &c.

All the children take an hour's walk almost daily and have plenty of outdoor exercises. Picnics and berry-picking excursions are often allowed in summer, while in winter all indoor games are played, and at Christmas-time a huge Christmas tree furnishes pleasure and fun to them all.

Ex-pupils.—Three of the girls are married on the reserve, one is still at home looking after her sick mother. The boys are logging with their fathers. They all behave well, are healthy and thrifty.

General Remarks.—Our exhibit at New Westminster fair held in October, attracted a great deal of attention. Mention was made of it under the heading of industries. Two prizes were won for collections, one was for needle-work of all kinds, and one for writing, drawing, maps and wood-carving.

The Canadian Handicraft Guild of Montréal asked us to send some of our work for competition. We did so and were the recipients of three prizes, one for pillow lace, one for Indian basketry and one for wood-carving.

THE REPORT OF REV. SISTER MARY AMY, PRINCIPAL OF THE BOARDING SCHOOL, SQUAMISH, BURRARD INLET, FRASER RIVER AGENCY, B.C., FOR THE YEAR ENDED MARCH 31, 1910.

Location.—This school is beautifully located on the north shore of Burrard inlet, opposite the thriving city of Vancouver, and about 4 miles therefrom. It is not on the Indian reserve.

Land.—The land connected with the school is the property of the Sisters of the Holy Infant Jesus in charge of the school, and consists of about 14 acres, of which 4 only are under cultivation; the remainder is covered with stumps and brushwood.

Buildings.—The main building consists of an entrance hall, two parlours, a large school-room, and sewing-room, also used as recreation-room for the girls on rainy days; all these are on the ground floor. On the second floor are: the chapel, vestry, and two private rooms for the members of the staff. The third story is taken up by a large dormitory and lavatory for the girls; on each floor are bath and toilet-rooms.

The old building consists of recreation-room and parlour, large school-room, two dining-rooms, kitchen, pantry, and store-room; on the second floor are: two dormitories, with lavatories and bath-rooms for the boys, two bed-rooms for the teachers and principal, also the infirmary.

The outbuildings consist of: woodshed, meat-house, hen-house. Under the direction of our foreman, Mr. Joe Vannier, the old rickety stable has been torn down and

1 GEORGE V., A. 1911

a new one was built by the boys; this new building is divided so as to house 3 or 4 cows and a horse, with sufficient room on the second floor for the winter supply of feed. The laundry comprises wash-room, provided with 12 wash-tubs, each having a tap for cold and hot water, also a waste tap; boiler-room, with 2 large boilers and heater; the drying-room, with everything convenient to dry the clothes during the winter.

Accommodation.—Under present arrangement there is accommodation for about 70 pupils, and the necessary staff to carry on the work.

Attendance.—Seventy pupils have been in attendance during the year, 4 are on sick leave, 3 have been regularly discharged, and 7 have been admitted.

Class-room Work.—The hours of study and recreation in the school-room are from 8.30 to 11.45 a.m., and from 2 to 4 p.m.; with one hour study before bed-time. The progress of the pupils has been highly satisfactory. It is the endeavour of the teachers not to depart from the official programme of studies prescribed by the department for Indian schools. Besides reading, spelling, writing, arithmetic, history, geography, &c., half an hour is daily given to singing. The pupils form the church choir.

The grading of the pupils for the past year is as follows:—

Standard		Pupils.
I.	21
“	II.	16
“	III.	12
“	IV.	9
“	V.	9
“	VI.	3
Total.....		30

Farm and Garden.—There is no farm connected with the school; about 4 acres of land are laid out in vegetable garden, orchard and flower beds. We have had this year quite a good supply of cabbages, carrots, turnips, lentils, salsifi, &c., but the crop of potatoes has been a total failure.

Industries Taught.—The boys are taught gardening, carpentry, glazing, shoe-repairing, &c.; the girls are carefully instructed in all branches of housekeeping, cooking, washing, ironing, hand and machine-sewing, crochet and pillow lace, and all sorts of fancy needlework, for which they show much aptitude. At the local exhibition they obtained quite a number of prizes, 14 of which were first prizes.

Moral and Religious Training.—Great care is given to this part of education, and no effort is spared to instruct the pupils thoroughly in principles of faith and religion. Besides their daily prayers in chapel, there is half an hour each day for the teaching of the doctrines of the Roman Catholic Church, to which they belong. I am pleased to state that the behaviour of all the pupils throughout the year has been very satisfactory.

Health and Sanitation.—The general health of the pupils has been good; no death occurred during the year; however a few children suffered from scrofula. The sanitary condition of the school is excellent and the buildings are well ventilated.

Water Supply.—The school buildings, being connected with the city water-supply, are abundantly supplied with pure crystal water.

Fire Protection.—Two Stempel fire-extinguishers, 1½ dozen fire-buckets, 250 ft. rubber hose, 2 ladders and 2 axes are kept in readiness in case of emergency. Our proximity to the town with a telephone in the building, strengthens our fire-protection, as we could make use of the town fire brigade.

Heating and Lighting.—The heating of the building is done by means of two McClary M. F. G. C. hot air furnaces, in which we use coal. The lighting is done by electric lamps.

SESSIONAL PAPER No. 27

Recreation.—The pupils are encouraged to play all healthful outdoor games, such as football, baseball, running, skipping, &c. All the children are frequently taken for long walks when the weather permits. On rainy days they enjoy indoor games such as chess, dominoes, lottos, reading, drawing, &c.

General Remarks.—It is a pleasure for me to state the interest taken by the pupils in the different departments of work and study. In every respect this past year has been a most successful one. The pupils have been healthy, cheerful and contented. At Christmas they had their usual Christmas tree. The faithful and efficient services rendered by the members of the staff, cannot be too highly praised; each one has done her utmost in the best interest of the pupils.

THE REPORT OF REV. J. P. O'NEILL, O.M.I., PRINCIPAL OF THE BOARDING SCHOOL, ST. MARY'S MISSION, FRASER RIVER AGENCY, FOR THE YEAR ENDED MARCH 31, 1910.

Location.—The St. Mary's Mission boarding school is beautifully located on the north bank of the Fraser river, about 40 miles east of the city of Vancouver. The buildings stand on an elevated plateau and command a picturesque view of the Fraser valley with the Sumas and Cheam mountains forming a background that terminates in the everlasting snows of Mount Baker in the state of Washington. The proximity of the Canadian Pacific railway and the double service of comfortable steamers which ply daily between New Westminster and Chilliwack, make access to the school easy for the pupils and our many interested friends who call to visit the institution.

Land.—About 310 acres, the property of the Oblates of Mary Immaculate, is attached to the school. About 200 acres of this land is still covered with heavy timber, whilst the remainder under cultivation is most productive, and the hay, grain and root crops raised yearly are all that could be desired. Fruit yields well, especially apples, pears, plums, and the different kinds of small bush-fruits. The farm lies in the Mission City District Municipality, section 2, townships 3 and 4.

Buildings.—The main buildings of both boys' and girls' schools measure 75 x 35 feet in extent with two additional wings, one on each building, and contain the necessary apartments for comfort and accommodation of both pupils and teaching staff. An additional building was erected to serve as a vegetable cellar, 30 x 18 feet, two stories.

Accommodation.—There is ample accommodation for 90 pupils and the necessary staff.

Attendance.—On an average, 75 children: 38 boys and 37 girls, have been in attendance during the past year.

Class-room Work.—The programme of studies ordered by the department is followed as faithfully as possible, still time and attention are required a good deal for elementary work, owing to the fact that we have quite a number of young pupils, in other words, beginners.

The reputation of our Indian boys' band is always well sustained by the untiring efforts of its leader, Rev. Brother Collins. The boys' and girls' separate choirs, heard not only at our church services on Sundays and holidays, but also at the numerous musical recitals and entertainments given by the school children during the course of the year, sufficiently prove that the reverend sisters in charge spare no efforts in the line of music.

Farm and Garden.—The land under cultivation is well worked and planted under the direction of our farm instructor, who has taken the greatest possible interest along

1 GEORGE V., A. 1911

these lines for well-nigh twenty years. Abundant crops of hay, grains of different kinds, and roots are raised successfully each year. In our gardens, vegetables and small fruits sufficient for the use of both schools are cultivated. Our fruit-trees, over 200 in number, are being pruned and sprayed this year as last, according to the instructions of our worthy inspector, Mr. Thomas Wilson, who, we expect, will pay us a friendly visit again this season.

Industries Taught.—The rudiments of carpentering and painting are the only trades taught the boys, several of whom have made fairly good progress during the past year. As our boys are supposed to work a few hours in the afternoon of each day except Saturday, they have sufficient opportunity to learn the different branches of farming and gardening. The care of live stock and the work of the dairy are taught them by an experienced instructor. The boys render valuable service in the seeding and harvesting of our crops. Since the installation of our new water-power system a few of our most reliable pupils have been instructed in the care and running of power-saw and electric lighting machinery. The reverend sisters instruct the girls in the culinary department, dressmaking, knitting and general needlework. Both at the provincial and local exhibitions last fall, our girls obtained quite a number of prizes, several of which were first prizes.

Moral and Religious Training.—The moral and religious training of the children is carefully and strictly attended to. Besides their daily religious exercises morning and evening, they are instructed in the teaching and doctrine of the Roman Catholic belief. No efforts are spared to elevate the minds of the pupils to the highest standard of morality and righteousness.

Health and Sanitation.—A strictly conscientious care is given to this matter, not only because we know that it is the constant desire of the department, but also that we earnestly wish to co-operate with those who are doing so much for the common good of our province in their efforts to stamp out all tubercular diseases. Our devoted friends, Drs. Fagan and Stuart, ever help and encourage us, and, if need be, will be ready to testify to our good will in this respect. We are blessed with abundance of water, and the children are obliged to take baths frequently. Their clothing is scrupulously kept clean and neat by the two sisters in charge, who spare no pains to have order in their respective offices. In case of illness our devoted doctor or his assistant, is always with us, by telephone call.

Water Supply.—This comes to us through pipes running from St. Mary's creek, which has its source in the mountains in the rear of our property, and empties into the Fraser river. The supply is good and abundant. The government department supplied us with a new pipe system, which proved very satisfactory, but at present we are threatened with a serious loss, if our water commissioner allows our neighbour, Mr. Windebank & Co., to rob us of rights which we have enjoyed by record from the foundation of our mission. Our case regarding Mr. Windebank's company, and water, is now in court. It is to be hoped our school will not suffer, especially in case of fire-protection.

Fire Protection.—Our fire-appliances consist of 24 dry dust extinguishers, 4 fireman's axes, and 45 pails, kept in constant readiness in case of fire. Every attention is given to prevent incendiary. The children are taught the use of the fire-appliances in case of fire. Their safety is provided for by several escapes arranged according to the last orders of the department in this matter. The schools are protected by a good water pressure and hose system, plus the new appliances supplied this year.

Heating and Lighting.—Stoves are used to heat both buildings, and as wood is still quite plentiful on our property, the apartments can be kept quite comfortable without entailing any considerable expense. Our electric plant, which has undergone much improvement since its installation, supplies us with a very satisfactory lighting system. The first dynamo has been replaced this year by a more powerful one to secure better light (at our own expense.)

SESSIONAL PAPER No. 27

Recreation.—Strict attention is given to the recreation of our children, as we are well aware that it is a conducive agent both to their mental and physical development. Outdoor games, weather permitting, are much indulged in by our children in their large and well-kept playgrounds. With their respective disciplinarians they are allowed to spend their half-holidays in selected picnic grounds in the neighbouring woods. Songs and band recitals, together with the different indoor games, make their recreation cheerful and pleasant.

General Remarks.—I here beg to thank the members of our staff, whose willing help is ever an encouraging factor in the good work done for the Indian children under our charge. The past school year has been one marked with much success in our work. A few cases of sickness, which must naturally be expected among so many children, have occurred; but thanks to the excellent care of our resident doctor, seconded by the promptitude in the carrying out of his orders by the reverend sister infirmarian in each of our schools, we have been singularly blessed with having had no serious illness or fatality.

I beg to close with the sincere wish that St. Mary's school may ever continue to work hand in hand with her sister schools, and in conjunction with the department for the welfare of the Indians in our fair province of British Columbia.

THE REPORT OF REV. SISTER SUPERIOR CONSTANCE, PRINCIPAL OF
THE BOARDING SCHOOL, YALE, B.C., FOR THE YEAR ENDED
MARCH 31, 1910.

Location.—This school is situated about half a mile west of the Canadian Pacific railway station of Yale, B.C. It stands on the right bank of the Fraser river, about a mile below the mouth of the famous Fraser canyon. The school is not built on a reserve.

Land.—The school buildings stand in prettily laid out grounds, about 4 acres in extent in the township of Yale. This land was bought by friends of the school authorities, aided by a government grant of \$500, and is held in trust for the school. The property is bounded on one side by a narrow ravine, through which rushes a rapid mountain torrent; in front, below a high bank, flows the Fraser river, only separated from the school grounds by the government road, and the Canadian Pacific railway line; at the rear of the buildings a high spur of the Cascade mountains rises abruptly, giving an air of picturesque grandeur and rugged beauty to the whole place.

Buildings.—These consist of a large Indian school building, a small school chapel, and a house for teachers and visitors. In the course of the year the plumbing was put into good order by a competent plumber; three new stationary wash-tubs were placed in the wash-house; two additional racks for drying clothes were also put up.

Accommodation.—Accommodation is provided for 30 pupils, and for 6 teachers.

Attendance.—All the girls are boarders.

Class-room Work.—This is under the direction of a teacher, holding first-class certificates of British Columbia, and Prince of Wales' College, and normal school, Charlottetown, P.E.I., assisted by a junior teacher, who has had some years' experience in Indian schools. Religious instruction is given by the sisters of the community. The matron teaches the younger girls sewing.

Farm and Garden.—About half an acre of land is devoted solely to the cultivation of fruit and vegetables, while flower-beds are laid out nearer the house.

A neighbour, who is one of the oldest and most experienced fruit-growers in the province, has kindly undertaken the care of the fruit-trees, which, thanks to his at-

1 GEORGE V., A. 1911

tentions, produce good crops of excellent fruit. Last summer 500 pounds of cherries were sold, the elder girls bottled 500 pounds more, while the school had as much fruit as it could use for the whole season. There is also a good supply of small fruit.

In regard to vegetables, the school was well supplied with them from the garden for the whole summer and autumn; enough cabbages were grown to last till March, and carrots and parsnips are still being used.

Industries Taught.—Housework, cooking, bread-making, and plain needlework are systematically taught. One of the sisters teaches some of the older girls lace-work. Every girl in the school is taught laundry work, so that even the younger ones can wash and iron their own clothes each week. Stationary wash-tubs and drying-racks are provided for the sake of convenience, but otherwise the girls are taught to make use of such simple, homely contrivances as they would be likely to have to use in after-life, as, for instance, boiling their clothes in coal-oil tins to which wooden handles have been attached. This tends to make them resourceful and independent.

Moral and Religious Training.—Religious instruction is imparted carefully by the chaplain and sisters. The children attend a short service morning and evening in the school chapel, and go to the village church for matins on Sundays. They attend choir practice once a week, that they may learn to take their part in the services of the church. Interesting books on Bible history, and other religious teaching, with Scripture picture-book for the younger ones, are provided on Sunday, and all the girls take great and constant interest in reading them.

The moral virtues of cleanliness, obedience, order, thrift and diligence are constantly inculcated and practically taught.

Health and Sanitation.—With a few exceptions the health of the pupils has been, on the whole, very good. During the autumn term, September to Christmas, there was no case of illness, since then there has been one epidemic of influenza, but no swollen glands in the whole school, as has sometimes happened at this time of year. Last May one little girl, eight years old, was taken ill, but none of the doctors who saw her, either here or at the hospital, could determine the nature of the complaint. As she was recovering from it, rapid consumption set in, of which she died suddenly in August at the Lytton hospital. Another pupil, absent on sick leave, who had caught a cold from a wetting at home, also died at home from consumption in the summer. One girl, who had outgrown her strength, had a gland beginning in the summer, but her people kept her at home till February, and she seems quite healthy now.

The sanitary arrangements are in excellent order, an earthenware drain, which was injured by the frost, was repaired by a skilled workman in the winter. A good outdoor man keeps all the premises thoroughly clean outside, and the girls are taught to do the same inside the house. All the windows and ventilators in the large dormitory are kept wide open day and night, and only partially closed even in the most severe weather, while windows are constantly open in school-room and play-room during the day. If, however, any girl shows symptoms of glandular trouble, or any form of tubercular disease, she is at once taken away from the other girls' sleeping apartments, and placed in a separate room with doors and windows open. In the daytime she is out of doors as much as possible, and has plenty of milk and other nourishing food.

Water Supply.—The school owns large water rights on two mountain streams behind the school property. The new high-pressure water system put in by the department in 1908 gave an abundant supply of excellent water in both stories of the Indian school building, as well as in the stand-pipes outside. Owing to a cloudburst last November the soil covering the pipes on the mountain was completely washed away for some distance, and before the water had subsided sufficiently to allow of the damage being repaired, a severe frost rendered the water-pipes useless. Being wooden pipes, all efforts to thaw them out proved ineffectual, but now, in April, the water is be-

SESSIONAL PAPER No. 27

ginning to flow through them again. In the meantime, water was used from the old water system, though that was useless also for about six weeks in the winter, when water had to be carried from the brook near the school. A separate pipe from the ditch on the mountain supplies the orchard and vegetable garden with water for irrigation purposes.

Fire Protection.—There are three stand-pipes at the rear of the buildings, and one in front, also one in the upper story of the main building. The older girls are taught how to turn on the water in case of fire. The department also furnished three lengths of fire-hose with which any part of the building can be reached. A good stream of water can be sent over the roof of the highest building. There are also fifteen fire-extinguishers in various parts of the building, as well as a fire-axe, some buckets and three triangles for sounding the alarm for fire-drill. There is a staircase at each end of the large dormitory, and several ladders on the premises.

Heating and Lighting.—The school is heated with wood and coal stoves. All the stove-pipes pass through brick chimneys.

The school is lighted by coal-oil lamps. Those in the children's rooms are fastened to the walls, or hung from the ceilings. In the chapel, and in the teachers' house, Moore gasoline lights are used, also candles.

Recreation.—An hour's walk is taken daily by all the pupils in suitable weather. Saturday evenings are given to games and music. There is a large playground with a swing, see-saw, and summer-house, also plenty of trees, and a garden for each child where many happy hours are spent. Meals are often taken out of doors in hot weather.

In the winter, coasting, or playing in the snow is much enjoyed, with indoor games instead, when the weather is very cold or wet. The girls know a great many games, and enter into them with great zest.

Ex-pupils.—The girls who have left the school in former years, have generally gone back to live amongst their own people, in the villages, or ranches from whence they originally came; though a few, chiefly those whose homes had been broken up, have gone out to service in the towns.

Many have married, some marrying Indians, and some white men. As a rule they make good wives and mothers. Several have sent their little daughters back to be trained in their own old school.

One girl went out as nursery governess in a white family, another went to a hospital and was trained as a nurse; both of these have since married and settled down in good homes of their own.

Two or three are doing good work among their own people, and help to interpret for them.

One girl who left school last summer, after having been trained in the kitchen, able to take a good place at once, where she earned twenty-five dollars a month.

The school was lately visited by the archdeacons of Yale and Columbia, who spoke very well of the ex-pupils they had lately seen, and of the good work they were doing, both in service and among their own people.

General Remarks.—The school closing took place last year on June 26, when a good programme of songs, recitations, and musical drill was very nicely carried out. A large number of visitors from the town were present, among them being Mr. Green, the school inspector, who expressed his satisfaction at the way the girls acquitted themselves.

The prize-giving followed, when prizes were given for basket-making, lace-work, and dressmaking, in addition to the usual school and domestic subjects. Specimens of the work were shown and elicited great interest and commendation.

The numbers of the school have not been so large this year, owing to day schools having been opened on two of the reserves. More girls are, however, beginning to come in now, as it is found that day schools, while giving actual teaching, are unable to supply the training and education of character which girls gain in a boarding school.

1 GEORGE V., A. 1911.

THE REPORT OF REV. GEO. H. RALEY, PRINCIPAL OF THE BOARDING SCHOOL (BOYS' HOME), PORT SIMPSON, B.C., FOR THE YEAR ENDED MARCH 31, 1910.

Location.—The school is situated about 350 yards distant from the ocean and the same distance from the Port Simpson post office, on a slight elevation at the northeast of the Indian village on the Tsimpsean reserve.

Lands.—The school is built on a lot of land, two chains by four chains, and belongs to the Missionary Society of the Methodist Church. It was acquired several years ago from the Port Simpson Indian council. Through the centre of the lot, there runs a small ravine, which serves as a drain to the land, which in this part of the country is naturally mossy and bog-like, but when drained and cultivated is well adapted to floriculture and horticulture.

Buildings.—The residence is a large two-story frame structure, old and inadequate. It is impossible to make it an attractive school for boys.

The outbuildings consist of woodshed, drying sheds, stable and play-shed, the last being used for boat-building.

The buildings are kept in repair during the year, several new floors have been laid, old windows and doors replaced with new, and much of the interior has been painted.

Accommodation.—The residence has accommodation for 25 pupils, with a staff of 3 or 4.

Attendance.—The attendance during the year has been only fair.

Class-room Work.—The school-room is bright and comfortable and the boys have made good progress, the inspector reports favourably. Classified the standing is as follows:—

Standard	I.	11
"	II.	5
"	III.	3
"	IV.	3
"	V.	1

Farm and Garden.—No farming is attempted; owing to climatic conditions and nature of the soil, farming as an industry would be of little use to these Indian boys. Gardening has proved successful. The small fruits bear well and vegetables are a satisfactory crop.

Industries Taught.—The industries taught are general carpentry and painting, boat-building gardening and general housework.

Moral and Religious Training.—This comprises class instruction daily, morning and evening prayers, regular attendance at the church services, Sunday school and mid-week service included, and friendly talks on moral and religious themes.

Health and Sanitation.—The health of the boys has been exceedingly good, there has been no epidemic, two or three boys who appeared delicate were given an extended holiday. The premises are in good sanitary condition and have been kept very clean throughout the year.

Water Supply.—The water-supply is plentiful in the rainy seasons, but in cold weather the pipes from the dam freeze and water for all purposes has to be carried. Although the water system is an improvement on that of former years, it is not yet satisfactory.

SESSIONAL PAPER No. 27

Fire Protection.—This consists of a large tank placed at rear of the building, a quantity of hose, some chemical fire-extinguishers, and buckets filled with water in the corridors.

Heating and Lighting.—The main building is heated by coal stoves and lighted with coal-oil lamps.

Recreation.—There is a playground on the premises, but it is neither large enough nor level enough to prove a satisfactory ball ground. The boys invent games of their own, running and jumping being popular. When there is snow, coasting is indulged in freely. Indoor games are provided.

General Remarks.—The past year has seen good work done, the deportment has been satisfactory and the general appearance of the boys improved. The regular physical drill has been beneficial.

Port Simpson itself is an attractive healthy spot and a central village.

THE REPORT OF MISS FRANCES E. HUDSON, PRINCIPAL OF THE
BOARDING SCHOOL (GIRLS' HOME) PORT SIMPSON, B.C., FOR THE
YEAR ENDED MARCH 31, 1910.

Location.—The school is located at Port Simpson, B.C., and is situated just outside the limits of the Tsimpshewan reserve.

Land.—The land lies in section 4, township 1, range 5, coast district. It is owned by the Women's Missionary Society of the Methodist Church of Canada, and was acquired by purchase from Gordon Lockerby, Esq., Port Simpson, B.C. There is an area of two acres which is fenced, but only about one-eighth of an acre is cultivated. We have a section reserved for a playground for the girls. The land lies on the slope of a hill, the greatest elevation being towards the south and east. When drained, the land is fairly well adapted for raising vegetables and small fruits.

Buildings.—The buildings consist of a house with three stories and a basement, a tank-house, chicken-house, wood-shed, drying-shed, and play-shed. The play-shed, a building 25 x 50 feet, is being built in place of the old play-room and will be ready for use in a few days.

Accommodation.—We have good accommodation for 42 girls and 4 teachers.

Attendance.—The average attendance is 41.12; the total enrolment is 47; the number discharged is 4; there has been 1 death; the number admitted is 3; present number in attendance is 39; 3 are on extended holiday, making 42.

Class-room Work.—The progress made by the various classes has been satisfactory. The girls speak English fluently and are fond of reading. They have been encouraged to study and work independently as well as to enter into class work, and the result has been good. The course prescribed for the public schools of British Columbia is the one used. The subjects taught are: reading, writing, arithmetic, spelling and dictation, grammar, composition, geography, history, hygiene, music, Bible history, and catechism. Thirteen girls have taken lessons on the organ, and one on the piano. Three girls take turns in acting as organist for the school. Special attention has been given to class training in vocal music and expression.

Two have been promoted to standard II; one has been promoted to standard IV; other promotions will be made in June, before the summer vacation.

Farm and Garden.—A small vegetable and flower garden is cultivated by the girls under teachers' supervision.

Industries Taught.—The industrial teaching consists of instruction and training in general housework, laundry work, cooking, bread-making, dressmaking, sewing,

1 GEORGE V., A. 1911

mending, darning and fancy-work. In connection with the training in cooking the work of the senior and junior domestic science classes has proved valuable. The older girls are taught to cut and fit their own dresses, and all can patch and darn neatly. The girls are also taught to raise chickens and care for hens. The industrial work of the school has frequently received high commendation.

Moral and Religious Training.—The girls are carefully trained to be honest, truthful, obedient, industrious, kind and obliging. A Bible lesson is taught every day. The first aim is always to help the girls to a life of sincere Christian service; and in many cases where this ideal has been realized, the helpful home atmosphere of the school has been one of the strongest influences.

Health and Sanitation.—The general health has been good. In the late autumn there was an epidemic of tonsillitis, but none of the cases were serious, and all recovered. One girl died on January 1, 1910, of acute indigestion with a tubercular complication. Two whose physical condition was a menace in the school are now out on extended vacation. The sanitary conditions are good, and precaution in cases of illness is always taken in the isolation of sick pupils and disinfecting of clothes and dormitories.

Water Supply.—The water-supply is derived principally from a mountain stream at some distance from the house. It is conducted by wooden pipes connecting the reservoir with our tank, which has a capacity of 4,000 gallons. Pipes also bring the rain water from the roof to the tank. The water is carried through the house by means of pipes, so we have hot and cold water on two floors. The water is good and abundant, except for a month or more of cold weather, when we bring it from an unfailing spring.

Fire Protection.—We have large canvas fire-escapes from each of the four dormitories, but only three of these are of practical value on account of the height of the north side of the building. We are making application for an iron fire-escape for this side, and also for a force-pump and hose to complete appliances for fire-protection. We have one stationary ladder from the ground to the roof, besides one movable ladder with hooks. Buckets of water and sand, and a hatchet, are kept in readiness on each flat, and 12 pails are available in case of fire. We have also 2 chemical fire-engines. Mention may also be made of the village fire-brigade, within call, and a hydrant, a few rods away, in connection with the village waterworks. Fire-drill has been well organized, and practised according to departmental instructions.

Heating and Lighting.—The heating of the institution is accomplished by one furnace, one kitchen range, one stove in the laundry, and one stove in the sewing-room, besides stoves in teachers' rooms, which are used part of the time. We have also one open grate. We use soft coal and wood as fuel.

Coal-oil lamps and lanterns are used for lighting, bracket and hanging lamps being exclusively used for the pupils' apartments.

Recreation.—Regular hours are set apart for recreation each day, and every day when weather permits exercise is taken outdoors. In wet weather the girls use the play-room. Their recreation consists of a variety of outdoor and indoor games, walking and playing on the beach. In season they gather wild berries, a favourite pastime. They also have regular lessons in physical culture and fancy drills.

Ex-pupils.—The majority of the ex-pupils are married and living in Port Simpson. Some have made their homes up the Nass river, some on the Skeena, others at Prince Rupert and on the Queen Charlotte islands. A few have gone as far south as Vancouver. Of the ex-pupils, those who have conducted themselves creditably form a majority, and the fact that several have sent their own little girls to the school is an evidence of their appreciation of the care and training they received here. Two of the ex-pupils, who are not married, have engaged in mission work, several have gone to service, and some have taken up dressmaking.

General Remarks.—As we reach the close of the year and review its work, we feel satisfied that several advance steps have been made. The moral tone of the school

SESSIONAL PAPER No. 27

is good, and the prevailing spirit a happy one. Four girls, whose influence was harmful, were discharged early in the year, and the measure taken has proved a wise one. The three girls admitted during the year are satisfactory pupils. Five other applications for admission were refused on account of undesirable physical or moral qualities. We have had to allow two girls an extended vacation on account of poor health. In compliance with the request from the Indian Department the examination now given those seeking admission has been made more rigid.

Several times within the past year our ordinary routine of work has been pleasantly broken. In August we had the honour of a visit from His Excellency Earl Grey. The commendation of the school and its work, afterwards expressed in a public address made by His Excellency at Prince Rupert, has given our institution a more important place in the esteem of the native people particularly. Another event of special interest to us was the formal opening of the Port Simpson hospital. In connection with the opening a sale of work was held, and to this our girls donated a quantity of fancy-work. The Port Simpson exhibition, our Christmas and New Year festivities, and Easter services are also numbered among the events of the year which have been marked by special interest and happiness.

THE REPORT OF MR. JOHN T. ROSS, PRINCIPAL OF THE BOARDING SCHOOL, AHOUSAHT, B.C., FOR THE YEAR ENDED MARCH 31, 1910.

Location.—The school is situated on a tract of land adjoining Maktosis reserve on the inner side of Flores island. The situation is a beautiful one, affording a good view of the picturesque Herbert arm and North channel.

Land.—The mission property consists of 140 acres, chiefly covered with timber, most of this timber is cedar with a sprinkling of pine and hemlock on the higher land. About 16 acres of loamy soil ready for cultivation has been recovered from the drainage of a small lake about 100 yards away from the school. The land is the property of the Presbyterian Church.

Buildings.—The school building is a frame structure, 68 x 46 feet, with two stories basement and attic. During the year a workshop, 24 x 16 feet, was built, the department giving a grant of \$150 towards its construction. Other buildings consist of a barn, 26 x 18 feet, a hen-house, 17 x 15 feet, and a woodshed, 40 x 18 feet.

Accommodation.—The school building can accommodate 60 pupils and 5 of a staff.

Attendance.—The enrolment during the year has been 41. Of these 2 were discharged on account of health not being satisfactory for school life, and 3 were discharged during the year, having reached the limit of school age. The present attendance is 32; 21 boys and 15 girls.

Class-room Work.—The course of study prescribed by the department is followed. The pupils attend forenoon and afternoon sessions of school. One qualified teacher has charge of the class-room work. The progress made in the class-room during the year was satisfactory. In addition to the regular course of study, the larger boys were given instruction in practical geometry and construction drawing.

The pupils are graded as follows:—

Standard	I.	3
"	II.	11
"	III.	4
"	IV.	5
"	V.	13

1 GEORGE V., A. 1911

Industries Taught.—In addition to the regular duties of wood-cutting, making fires, laundry work and caring for dormitories, in which all the boys take part, the larger boys were given some instruction in carpentry, painting, baking and shoe repairing. During the summer the boys assisted in the painting of the entire school outside, also the building and painting of the new workshop.

The girls received instruction in cooking, baking, making and repairing clothing, laundry work, knitting and fancy-work. Several of the larger girls made good progress in housework, and if they do not look after their own homes so well after they leave school, it will not be because they are not capable of doing so.

Farm and Garden.—About two tons of hay were obtained from the lake farm. The roots and other vegetables were a failure on account of the heavy rains flooding the farm. The land requires deeper draining or ditching in order to run off the vast in-flow of water from the surrounding country more quickly. When once this is done and considerable fertilizer used, the land will yield good crops.

Moral and Religious Training.—The conduct of the pupils has been good. The pupils attend regular Sabbath services, also Sabbath school, and every day religious instruction is imparted to them.

Health and Sanitation.—The health of the school for the greater part of the year has been good. Two girls were discharged on account of their health being unsatisfactory for school life. One of the girls since discharged died of consumption. Cleanliness and proper ventilation are carefully attended to, also a room is provided for isolation in case of sickness. The drainage of the school is good.

Water Supply.—The water-supply is chiefly obtained from rainfall. The tanks in which it is stored are cleaned at times so as to keep the water pure. In case of prolonged drought in summer a well supplements any shortage in the tanks.

Fire Protection.—Seven fire-extinguishers are distributed throughout the building. Ladders for fire-escapes are placed at each end of the building. Fire-buckets are provided for dormitories; also a large force-pump and fire-hose can be used in case of fire. The boys and girls were given some instruction in fire-drill.

Heating and Lighting.—A large hot air furnace is used for heating the school. In case of really cold weather in midwinter a larger stove is used in the class-room to make up for any lack of heat throughout the building. Considering the size of the building, the furnace gives good satisfaction. Coal-oil lamps are used for lighting.

Recreation.—Various outdoor games are played in favourable weather. Football and foot-racing make up the principal games for the boys, while the girls find considerable recreation at croquet and canoeing during the summer months.

General Remarks.—The year has been one of fair progress. The relations between the school and the reserve are very friendly. The parents take more interest in the school now than formerly and show some desire to have their children educated.

THE REPORT OF MR. H. B. CURRIE, PRINCIPAL OF THE BOARDING SCHOOL, ALBERNI, WEST COAST AGENCY, B.C., FOR THE YEAR ENDED MARCH 31, 1910.

Location.—This school has a beautiful location. It is built on a plateau about 60 feet above the level of the garden, which it overlooks. At the back of the school the country rises to a higher level, and is heavily timbered, giving abundant shelter from the prevailing winds. In front of the school, about two hundred yards away, flows the beautiful Somas river, and from the school grounds we obtain a splendid view of the river, with Alberni two and a half miles distant. On the same plateau across the

SESSIONAL PAPER No. 27

road which divides this property from the reserve, is the Shesaht village; and one mile down the river on the opposite side is the Opitchesaht village.

Land.—There is 150 acres in connection with the school, which is known as part lot 81, district of Alberni. The land, of which only about six acres is cleared and the rest bush, is owned by the Presbyterian Church. The land, being heavily timbered, is very expensive to clear, the soil, however, is very good. The soil is well adapted for all farm purposes after the land has been cleared.

Buildings.—The buildings consist of main building, 38 x 43 feet, three stories high, with wing, 32 x 46 feet, two stories high. The old school building is used for laundry, bake shop and carpenter shop. Other buildings are: class-room, woodshed, driving shed, root-house, stable, hen-house, and lavatories.

Some necessary repairs to the buildings are being carried out and the result will be to improve the sanitary condition.

Accommodation.—There is accommodation in the school for 60 pupils and a staff of 7.

Attendance.—There are 46 pupils on the roll, 22 boys and 24 girls. Five pupils (2 boys and 3 girls) were admitted during the year. Five pupils were discharged (2 boys and 3 girls). Four of the above, Nos. 40, 50, 037 and 041, were discharged because their time was up. No. 040 was discharged for improper conduct, having contracted gonorrhoea while holidaying at Steveston.

One boy only (No. 71) died September 11, 1909, from tuberculosis.

Three boys and one girl are absent on sick leave and are not likely to return: Nos. 47 and 64, suffering from tuberculosis; No. 45, abscess on right lung, and No. 063, scrofula. One girl, No. 044 (an orphan), is suffering in the school from tuberculosis. Special care is being taken of this child. Most of her time is spent in a tent apart from the school, and she appears to be making satisfactory progress.

Class-room Work.—Fair progress has been made during the year. The programme of studies authorized by the department is followed. Miss L. Morris, who has been in charge for the past three months is a capable teacher, and the work done by her is very satisfactory.

Farm and Garden.—The stock consists of one horse and three head of cattle, several of the boys have learned to milk. The larger boys do the ploughing and teaming for the school. The garden yielded a very poor crop last year as did also the small fruits.

Industries Taught.—Farming and gardening are taught, also plain carpentering, painting, shoe-repairing and baking. The larger boys are also expert fishermen.

The girls are taught thoroughly in all departments of housework. Their training includes cooking, laundrying, bread-making, dressmaking, the care of milk and butter, the canning of fruits, also sewing and music. All mending of clothes and darning of stockings is done by the girls.

Moral and Religious Training.—The conduct of the pupils has been fair. The pupils attend regular Sabbath services, also Sabbath school, and every day religious instruction is imparted to them.

Health and Sanitation.—The health of the pupils has not been good. One boy died from tuberculosis. Four pupils are absent on sick leave, and one pupil is suffering in the school from tuberculosis. Apart from the above, there has been an outbreak of impeta contagiosa, which we are still fighting. The sanitation is fair, the location of the school being on high ground affords good drainage.

Water Supply.—Our water-supply is from a large tank fed by a spring 250 yards behind the school on a higher elevation. There are also two wells, which are used part of the time, especially during a dry season.

Fire Protection.—We have four Keystone fire-extinguishers, six Haverhill Eclipse, and 12 fire-buckets distributed through the building. A large tank mentioned in the 'Water Supply' is used for fire-protection purposes.

1 GEORGE V., A. 1911

Heating and Lighting.—The main building is heated by a hot-air furnace. The new addition is heated by wood stoves. Coal-oil lamps are used for lighting the buildings.

Recreation.—The boys play football, baseball and other outdoor games. Our grounds for these are not the best, but during the coming year we may be able to do something to improve them. The boys do considerable swimming and canoeing during the summer months. A lantern and a large number of good slides provide much pleasant and instructive entertainment, especially for the winter evenings.

General Remarks.—This school has not had a fair chance during the past year. During that time there have been three principals in charge. Mr. Jas. R. Motion was principal from April 1, 1909, till September 30, 1909, when he was succeeded by Mr. W. A. Hendry, who only left on March 25, 1910, since which time I have been in charge. In spite of all the changes, I believe good work has been done. Your agent, Mr. A. W. Neill, has given much valued assistance during the year.

PART II

TABULAR STATEMENTS

INDIAN LAND STATEMENT

SHOWING the number of acres of Indian Lands sold during the year ended March 31, 1910, the total amount of purchase money realized and the approximate quantity of land remaining unsold at that date.

ONTARIO.

Town or Township.	County or District.	Number of acres of land sold.	Amount of sale.	Approximate Quantity remaining unsold.	Remarks.
		Acres.	§ cts.	Acres.

NORTH WEST TERRITORIES.

The Pas (T. plot)	50	100 00	404 50	
----------------------	-------	----	--------	--------	--

General Remarks.

The land sold during the year amounted to 81,602.66 acres, which realized \$952,042.53. The quantity of surrendered land in the hands of the department was approximately 279,100 acres. The principal outstanding, on account of Indian lands sold, amounted to \$1,655,403.91, a considerable portion of which has not yet become due.
