AND INDUSTRIAL SCHOOLS, TEACHERS OF DAY SCHOOLS,
AND COPIES OF CIRCULAR LETTERS, FORM
OF CONTRACT, &c.

APPENDIX

TO THE

REPORT OF THE SUPERINTENDENT OF INDIAN EDUCATION

CONTAINING REPORTS OF INSPECTORS AND PRINCIPALS OF BOARDING AND INDUSTRIAL SCHOOLS.

The report of Rev. John Semmens, Inspector of Indian Agencies and Reserves, on the Indian day schools in the Lake Winnipeg inspectorate, for the year ended March 31, 1912.

Islington Day School (Church of England).

This school was inspected June 30, 1911. The number of pupils present was 32: 16 boys and 16 girls, and the average attendance was 25.

The school was conducted by Mr. Smith, a theological student of the Church of England. The examination showed very good work indeed, while the teacher has good command of his pupils, and was well qualified for his duties.

The school building was in fair repair, but was too small to accommodate the children attending. There was every evidence that the children delighted in coming, but it was the time of the year when all were gathered for treaty, and this no doubt accounted for the large number found in the school. It would be impossible to maintain such an average for the year around, because the parents of the children would be more or less widely scattered for the most part of the year.

This was the only school found to be in active operation on the Kenora, Savanne and Fort Frances agencies, at the time of the treaty payments. This was holiday time and nearly all schools were closed. I think it unfortunate that the schools should be closed at this time, as it is the most convenient occasion in the year for inspection. Much expense and extra travel are involved in making an extra journey to remote schools at other seasons of the year.

Hollowwater River Day School (Church of England).

This school was inspected February 5, 1912. The number of pupils present was 8; 3 boys and 5 girls; the number of children enrolled 9; and the average attendance for three months, was 9.

The teacher's grading is as follows:—

Standard	I.	6
“	II.	0
“	III.	3
Total.			9

The examination showed that fair work is being done. It is a regrettable fact that this small band are divided, so that a number of school children are living at Rice river, ten miles distance, and cannot avail themselves of advantages offered by the department. Steps are being taken to correct this state of affairs.

The teacher is Mr Arthur Santmier, who has a ten year Normal certificate from New York state, and who is well qualified for his duties, and is apparently well liked by the band

• Punctuality is reported good; care of material good; schoolhouse very clean and conduct of the pupils good.

The building is of logs, sheeted inside and out, and unpainted. It is an old building, but is still warm and cozy, supplied with storm windows, well banked and in good preservation, with the exception of a ridge of the roof where the rain appears to soak through.

Very good work is being done at this school.

Fisher River Day School (Methodist).

This school was inspected on February 16, 1912. The number of pupils present was 34; 21 boys and 13 girls. Number of school children on the reserve, 78; the number enrolled was 62; the average attendance for three months, 29.38.

Punctuality in this school was fair, class organization good, care of material good, cleanliness of pupils good, conduct of pupils good.

The teacher's name is Nellie Jane Nash, who has a third class Ontario certificate, and who has done excellent work since her connection with this school. The examination showed considerable progress, and a fair amount of proficiency in all lines.

The teacher's grading is as follows:—

Standard	I..	54
"	II..	3
"	III..	4
"	IV..	1
		—
Total..		62

The building is of frame, on a wood foundation, all windows are double and have window blinds; ventilation is good; the school is fairly warm, though the floor is cold, because the building is not banked. The out-buildings are in very bad repair.

This is one of the best schools that I have visited, as to behaviour, proficiency and good conduct of the pupils.

Poplar River Day School (Methodist.)

This school was inspected on February 12, 1912. The number of children present was 16-10 boys and 6 girls. The number of children enrolled was 40. The average attendance for three months was 14.

The school has not been kept very regularly for various reasons. The principal one seemed to be the pre-occupation of the teacher on the line of missionary duty.

The people of this reserve are wretchedly poor and their children are miserably clad, while the snow lies three feet deep on the ground and the winter has been unusually severe. The fall fishing is conducted ten miles away from the school, and lasted last fall about six weeks, and the children go with their parents. There has been a great deal of sickness, demanding the attention of the missionary, who is doctor, adviser and everything else to the poor and indigent. All these things have prevented regular service at the school.

The teacher regards himself as being first a missionary, and if any work was to be slighted, according to his view, it must be the school work.

The teacher is Mr. Percy Earl Jones, who has no certificate, and who does not regard himself as having any special qualification for the work of teaching. He

SESSIONAL PAPER No. 27

simply does his best, with an ordinary English education, when time and other duties permit.

The examination showed reading fair, spelling poor, work very elementary. Punctuality was reported to be bad, care of material good, cleanliness of pupils fair, conduct fair. There was an excellent showing in calisthenics.

The building is of frame 36 x 18 feet. There are 6 windows, 3 on each side, but there are no double windows. The schoolhouse looks well, and is painted within and without. Even the floor is painted, but it is so cold that it takes about half the day to make it comfortable enough for the other half day.

Mr. Jones talks of resigning in the spring, largely because he is not able to find time for both missionary and school duties.

The councillor unhesitatingly and emphatically affirmed that Mr. Jones was a hardworking and painstaking missionary, and that any apparent neglect of the school was only the result of faithfulness in ministering to the sick and needy members of the band.

This and similar cases, convince me that a teacher should not have the duties of a missionary superimposed, because one or the other must suffer from lack of proper attention.

Berens River Day School (Methodist).

This school was inspected February 9, 1912. The number of pupils present was 23; 11 boys and 12 girls. The number of children of school age on the reserve is 75; number of children enrolled, 36; average attendance for three months, 22. This is a most satisfactory showing. The examination showed that splendid work has been done during the year. Knitting was very good; knowledge of phonics very fair; singing was good; writing, good; arithmetic work, elementary; special mention must be made of the pupils' knowledge of English; the class in calisthenics did good work; in plaster cast work the pupils showed remarkable skill, in fact the whole examination was most satisfactory.

The teacher's grading was as follows:—

Standard	I..	33
"	II..	2
"	III..	0
"	IV..	1
Total..		36

The teacher is Mrs. Henrietta Lowes, who has a third-class professional certificate for Manitoba.

The building is frame, 20 by 30 feet, painted within and without; there is a proper ventilator in the ceiling and the windows are all curtained and draped; the six windows are single. The school is warm and home-like, and the children appear to be very happy.

I cannot but speak well of the work which is being done in this school.

Broken Head River Day School (Church of England).

This school was inspected January 26, 1912. The number of pupils present was 10; 6 boys and 4 girls. The number of children enrolled, 22. Average attendance for three months, 10. Teacher's grading was as follows:—

Standard	I..	13
"	II..	5
"	III..	3
"	IV..	1
Total..		22

The examination showed but very slight progress. The teacher's qualification is a day school training in Edmonton, and her experience is very limited. She is young for the position, and has a number of children under her care who have little or no ambition to succeed. I believe the teacher is very faithful, and does her best to mould very crude material. The school building is of logs, sheathed within and without, but unfit for use, the walls being out of plumb, and the foundation settling.

Lower Day School, Fort Alexander (Church of England).

This school was visited January 25, 1912, but was found to be closed for a lack of a teacher.

Miss Fryer, sister of the missionary in charge of the mission, taught for a portion of the year, but failing health compelled her to give up her charge. Crossing the river night and morning, in all weathers, from the only boarding house available, was found to be too great a strain for her. This is much to be regretted, as there was every prospect that she would have done excellent work.

The building which is a rented one, was found to be in very good condition, new, comfortable and warm, and the equipment fair.

Some of the pupils, who should attend this school, are at present crossing the river to attend the upper school, but the majority cannot do this.

Since my inspection, Bishop Lofthouse has nominated a Miss Isbister, who was sent forward early in February to open the school, but it has been impossible for me to visit it since this appointment was made.

The people of this reserve seem anxious to have their children attend school, and I look forward with some assurance to the good work which may be done here.

Upper Day School, Fort Alexander (Church of England).

This school was inspected on January 25, 1912. The number of pupils present was 27; 16 boys and 11 girls. The number of children enrolled, 30. Average attendance for three months was 17.7, while the average for the present quarter, so far, was 22. The examination was very satisfactory throughout.

Punctuality was good, class organization very good, cleanliness of pupils good, schoolhouse very clean. The manual of calisthenics was used each day, and the children are encouraged to engage in various games. The pupils were cheerful and happy and appeared to be delighted with their work.

The teacher is Charles Harold Fryer, who had a full course in Islington College, London, and has taken medical training in the Great Northern Hospital, London, and also enjoys the advantage of having had a full course in Manitoba University.

I cannot speak too highly of this school. The attendance is eminently satisfactory, and the work of the teacher deserves the highest compliment.

Black River Day School (Church of England).

This school was inspected January 24, 1912. The number of pupils present was 13; 4 boys and 9 girls. The number of children enrolled, 19. The average attendance for three months, 12.

The pupils show good reading and spelling, and a fair understanding of English, but writing was fair and the arithmetic exercises good.

The teacher's grading was as follows:—

Standard	I.	4
"	II.	8
"	III.	7
		—
Total.	19

SESSIONAL PAPER No. 27

Punctuality was good, class organization good, care of material good, cleanliness of pupils fair, and the school house was remarkably clean. Conduct of pupils is reported to be good.

The building is of logs, 20 x 24 feet. The plaster on the walls is very poor, and the building very cold.

The outbuildings were very poor.

The teacher is George Slater, whose training consists of one and a half years at St. John's College, Winnipeg. He is an Indian, and is doing splendid work for the chance that he has had, and the people appear to be very well pleased with his services.

My visit to this school was fairly satisfactory.

St. Peter's South Day School (Church of England).

This school was inspected January 16, 1912. The number of pupils present 9; 5 boys and 4 girls. Number of children enrolled, 25. Average attendance for three months being 15. Pupils were classified as follows:—

Standard	I.	11
"	II.	1
"	III.	7
"	IV.	3
"	V.	3
		—
Total.	25

Punctuality was reported good; class organization, good; cleanliness of pupils, good; conduct of pupils in school, good.

The teacher is Miss Margaret Jane Isbister, who was trained for her work for three years in the Kenora High School, and her success is fair.

The examination of pupils showed very fair work, indeed.

The school house is a frame building, 20 x 30 feet, but very cold, and sickness in the neighbourhood has interfered considerably with the attendance at school.

On the whole, I was favourably impressed with the work done at this school.

North St. Peter's Day School (Church of England).

This school was inspected January 16, 1912. The number of pupils present was 8; 4 boys and 4 girls. The number of children enrolled was 26. The average for three months was 13. Teacher's grading was as follows:—

Standard	I.	18
"	II.	3
"	III.	0
"	IV.	3
"	V.	2
		—
Total.	26

The examination showed fair progress, and the conditions generally were favourable.

The building was in good repair and warm, supplied with double windows and well plastered within and without.

The teacher is Mr. Peter Harper, whose training has been eight years of service in the St. Peter's day school. He is an Indian, honest and faithful, and is a credit to the band to which he belongs. His school is properly managed and is worthy of compliment.

3 GEORGE V., A. 1913

St. Peter's (Peguis) Central Day School (Church of England).

This school was inspected January 16, 1912. The teacher's grading is as follows:

Standard	I.	7
"	II.	3
"	III.	3
"	IV.	2

The number of pupils present at the time of inspection was 9; 6 boys and 3 girls. The number of children on the roll was 18, but the average was rather low. Examination of pupils showed very small advance.

The school was very improperly supplied with books. The teacher was at a great disadvantage in having a very cold room and a very poor outfit of supplies.

The building is of logs, very poorly plastered, with no double windows. Unknown persons had broken into the schoolhouse and had stolen some of the supplies.

The teacher is Miss Myrtle Pruden, who has a third-class non-professional certificate, and who, under favourable circumstances, would no doubt do herself credit in the management of the school.

Peguis (North) Day School (Church of England).

This school was inspected December 14, 1911. Twenty-seven children present, 17 of whom were boys and 10 girls. The number of children enrolled was 30. The average attendance could not be given, owing to the fact that the school had been in operation only a month. The teacher classified the children as follows:—

Standard	I.	15
"	II.	8
"	III.	6
"	IV.	1
Total.		30

Punctuality was reported to be good; class organization fair; preservation and arrangement of furniture good; care of material, good; cleanliness of pupils, very good; schoolhouse was clean; conduct of pupils was good.

Angus Prince, the teacher, is an Indian with three and a half years' experience at the Elkhorn industrial school, and one year at the St. Boniface industrial school. He has taken hold of his school with considerable interest, and is doing good work. The building is of logs, 30 x 20 feet, inside measurements, and built on a stone foundation. There are 5 windows, 2 on each side and one at the end. The building is plastered with lime and whitewashed outside and in. The floor is double, and well laid. Outbuildings are well arranged. The school is warm and cheerful.

I was pleased with the school in all its appointments, for the time it has been in operation it certainly reflects credit on the teacher and gives promise for the future.

Peguis (South) Day School (Church of England).

This school was inspected December 14, 1911. The number of pupils in attendance was 15; 9 boys and 6 girls. The number of enrolled pupils was 23. No average attendance could be given, as the school had only been started about a month before the time of inspection. The pupils were classified as follows:—

Standard	I.	10
"	II.	8
"	III.	5
Total.		23

SESSIONAL PAPER No. 27

Reading was good; knowledge of geography, good; exercise work, good; but other lines were imperfect, and necessarily so owing to the fact that the school was quite new.

Punctuality was reported to be good; class organization, fair; preservation and arrangement of furniture, good; care of material, good; cleanliness of pupils, very good; schoolhouse, clean; conduct of pupils, good.

The school building is constructed of logs, and is 30 ft. x 20 ft., outside measurements, built on a foundation of stone. The height of the walls is 12 feet at the side, to 15 feet in the centre, giving ample space for ventilation. There are 6 windows, 3 on each side. There are 2 doors, one on each end. The building is plastered with lime, and whitewashed, within and without. The floor is double and well laid. A double door is provided on the east end. The school is warm and cheerful and beautifully situated on the bank of the Fisher river, on the south part of the new Peguis reserve. Excellent out-buildings were provided and properly situated.

The people of the reserve seem not only well pleased to have a new school built, but were also pleased with the teacher sent to take charge. There is every reason to believe that good work will be done by Mr. Henry James Frances, the teacher, who has had some 15 years tuition in English college and high school work.

General Remarks.

In reviewing the work of inspecting the day schools under my supervision, I cannot say, as some have done, that the day schools are a failure. On the contrary, a number of them have been worthy of much compliment, because they have shown considerable progress, and I am convinced, that where the right kind of a teacher is secured there is no reason why they should not be continued. It must be admitted that there are hindering causes which it is difficult to overcome, but there is a work to be done, though it may be elementary, in the day schools of the reserve, and a duly qualified teacher will find his work and do it. It must further be admitted, that finding the right man means the giving of an adequate salary, but as the department is prepared to give this to men or women having proper certificate, I see no reason why the day school work should not accomplish the purpose which was intended by their inception.

I think it must be generally admitted, that our educational work is most important in the awakening and elevating influence upon the minds of the young. Its discipline is helpful, and there is nothing like it to inspire the children with proper ambition, and the effect of it all is seen distinctly in the subsequent life of the pupils, and whatever is worth doing is worth doing well. I sincerely hope that, instead of relaxing our efforts in this direction, we may redouble our energies and win more signal success throughout the work to which we have set our hands.

The report of Mr. S. J. Jackson, Inspector of Indian Agencies and Reserves, on the schools in the Lake Manitoba Inspectorate, for the year ended March 31, 1912.

Brandon Industrial School.

I made my inspection of this school on April 19. Miss M. Follet, is the teacher in the junior room. She has a second-class professional certificate from Newfoundland, and has been teaching 6 years. There were present at the time of inspection 15 boys and 18 girls, graded as follows:

Standard I.	20
“ II.	3
“ III.	10
Total.	33

On the roll of the room I found 22 boys and 25 girls, graded as follows:

Standard I	25
“ II	11
“ III	11
Total	47

Standard I read in the first primer. They do simple sums in addition and multiplication. They also are taught writing and spelling. Standard II read very well in the first reader, spell and write well and do sums as far as short division. Standard III. use the second reader, read, spell, and write well, and are taught arithmetic as far as simple division. Miss Follet appears to be a capable teacher, and has a liking for her work. She should do well at this school and I expect to report good progress at my next visit.

Mr. F. Dryburgh is the teacher in the senior room. He has a second-class professional certificate from Manitoba, and has been teaching for 4 years. There were present at inspection 11 boys and 13 girls, graded as follows:

Standard IV	13
“ V	11
Total	24

On the roll I found 24 boys and 25 girls, graded as follows:—

Standard IV	22
“ V	18
“ VI	9
Total	49

Standard IV. are taught geography, reading in third book, writing, arithmetic, up to fractions, oral history, simple lessons in English literature, free hand drawing and hygiene.

Standard V. are taught reading in fourth book, geography of Canada, oral lessons in English literature, writing, arithmetic, hygiene, No. 2 history of Canada and free hand drawing.

Standard VI. are taught geography of the world, writing, history of Canada, grammar, British history, from 1660, arithmetic, free hand drawing and hygiene.

The half-day system is followed in this school, one half-day at school and one-half day work of all sorts: girls in the kitchen and sewing-room, and the boys in the barn, farm and gardens. The holidays during the year total about 6 weeks.

The pupils in all the grades are doing fairly well. The great difficulty is to get the children to speak out. They all read well, but in a very low tone of voice. They keep excellent order in the class-rooms and are under good control.

The health of the pupils has been excellent for the year, no serious illness reported.

The books on hygiene had been in the hands of the teacher, just one week, and he has started to teach same, to which he is devoting twenty minutes each day, as required by the department.

The school buildings are heated by 5 hot air furnaces, 3 wood, and 2 coal, which service is proving satisfactory. Only 4 of the furnaces are being used continuously, the fifth being used only in very cold weather. The Smead-Dowd system was originally installed in the school, but did not work well as far as the ventilation was concerned. It has been changed into direct ventilation in the schoolrooms and dor-

SESSIONAL PAPER No. 27

mitories by openings into the large foul air shafts. The building is now in first-class condition as far as heating and ventilation are concerned. The air is sweet and pure in all parts of the building.

Instruction in calisthenics is given the pupils each evening; the girls are very proficient in their exercises. Miss Ferrier has been of great assistance to the school in this branch, and under her instructions the present teacher will soon be able to handle this branch.

Elkhorn Industrial School.

I visited this school twice during the year. I inspected the class-room of this school on May 4, 1911. The pupils were graded as follows:—

Standard	I.	30
"	II.	9
"	III.	15
"	IV.	1
"	V.	10
"	VI.	1
Total.		66

Miss Baldwin, the teacher, has been at the school about four years and is doing good work, and is one of the best teachers in the employ of the department. Her school is not as good to-day as it was a year ago, owing to a large number of her senior pupils having been discharged during the year, and the number of new pupils who were admitted. I would recommend that a junior teacher be employed to teach the lowest standard. These children should be at school both morning and afternoon. As will be seen by the grading, there are thirty in Standard I, and this number of Indian children would keep a teacher busy. Miss Baldwin would then be able to devote her time to the other standards, and when the pupils in school are increased, she could hand over Standard II. to the junior teacher. The class-room is clean and nicely kept. All the windows are full of plants, geraniums, &c., and the walls decorated with pictures. The room is well ventilated, having an ample supply of fresh air both summer and winter. The school furniture and supplies are in good order and well kept.

Of the pupils on the roll I found 4 away visiting, one boy and two girls at Le Pas, and one girl at Wabigoon, leaving 62 in residence at the time of my visit. On the morning of my inspection, there were present 34 pupils, and in the afternoon there were present 23 pupils.

All the usual studies are taught, as set forth by the department standards, and the pupils are doing as well as can be expected, with all the classes being taught in the one class-room.

On my September visit I found that Miss Wilson had been selected to teach in the junior class-room and appears to be doing very well. She has a Manitoba professional certificate, and is quite competent for the work.

Lake St. Martin's Day School (Church of England).

John E. Favel, teacher.

I visited this school twice during the year, May 16, and June 24. On my first visit there were present 7 boys and 8 girls, and on my second visit, 16 girls and 7 boys, a total of 23. On the roll I found 15 boys and 17 girls, a total of 32 pupils, and the average attendance for the quarter ending March 31, 1911, was 29.76. The pupils on the roll are classified as follows:—

Standard	I.	17
"	II.	9
"	III.	5
"	V.	1
		<hr/> 32

There is little improvement shown in this school from the first inspection to the one following. Just as soon as the children here are able to do any work at home or outside, they stay away from school. Only for the fact that the schools are kept up by the young children coming of school age, the attendance at this school would be very poor. Mr. Favel is a faithful teacher, but is labouring under the Indians' indifference to the education of their children. He was educated at Edmonton, and has taught for 26 years at different places in this inspectorate. Mr. Favel was also in the Hudson's Bay service for 11 years.

The material and books are in good order and the building is in a fair state of repair, with the exception of the ceiling, which requires a coat of paint.

Little Saskatchewan Day School (Church of England).

Peter Anderson, teacher.

I visited this school twice during the year, on May 16 and June 27. On my first visit 5 children were present, 4 girls and 1 boy. At my second visit, I found on the roll 24 pupils, classified as follows:—

Standard	I.	9
"	II.	5
"	III.	6
"	IV.	4
		<hr/> 24
Total.		24

There were present at inspection, 3 boys and 7 girls. The teacher is a graduate of Upper Fairford school and is doing the best he can. He has sufficient knowledge to teach the children, but does not know how to impart it. This school has not changed any since last year, the classification remaining the same. In standard I, the classes are doing very well and the pupils in the second book can read fairly well and do small sums up to simple division. All the pupils above the A, B, C class can write their names and also simple dictation.

The log school building is in good condition, but requires to be ceiled with seven-eighths ceiling and painted. This would add greatly to the appearance of the classroom. It is well lighted with 4 windows. The school material is in good condition and well cared for.

Lower Fairford Day School (Church of England).

Colin Sanderson, teacher.

I visited this school on June 28 at treaty time. There were 19 pupils present, 8 boys and 11 girls. The average attendance for the quarter ended March 31, 1911, was 9.5. The pupils, as shown by the roll, are classified as follows:—

Standard	I.	16
"	II.	7
"	III.	6
"	IV.	3
		<hr/> 32
Total.		32

SESSIONAL PAPER No. 27

There is no improvement to be seen in this school. The attendance for the last quarter was very poor, and upon asking the teacher what was the reason, it was found to be owing to the indifference of the Indians, sickness, lack of proper winter clothing, etc.

Standard I. knew their A, B, C's and can read simple words, dog, cat, etc., and are learning to write on their slates. Standard II. can read fairly well in the first primer and are also writing on their slates. Standards III. and IV. can read well, write nicely, and do simple sums up to short division. The teacher still complains of the irregular attendance and sees no remedy.

All the school material is in fair order, as good as can be expected, when it is known that the building is used by the band for all purposes, such as church services, band meetings, etc.

At this visit I found the class-room clean and airy and much better than on my last visit.

Upper Fairford Day School (Church of England).

Rupert Bruce, teacher.

I visited this school on June 29, just after the treaty payments at Lower Fairford. All the Upper Fairford Indians were still camped at Lower Fairford, and the only way to get any of the children present for inspection, was by bringing them up on the boat which was done, with the 7 children present; 3 boys and 4 girls.

The number on the roll remains the same as last year, 19; 8 boys and 11 girls, classified as follows:—

Standard I.	6
“ II.	9
“ III.	2
“ IV.	2
<hr/>	
Total.	19

The average attendance for the quarter ended March 31, 1911, was about 4 pupils. This is accounted for partly by the reason that the school is not properly located for all the available children to attend. This building should be moved, say one mile east. It is now on the townsite, but should be moved east on the reserve. On one occasion last year during the winter, I visited this school and at 10 a.m. found only one pupil present. Mr. Bruce tells me that he cannot get the parents to send their children, on account of the distance they live from the school, but this applied particularly to the winter season. Alex. Le Tandre, a very clever Indian, our steersman and interpreter during the treaty payments in this agency, has 4 or 5 children of school age living within a mile of this school, and yet only one or two of them, and at that irregularly, attend. He knows the benefit of education and yet is careless with his children. Even poor, as a great many of our day school teachers are, if some scheme could be devised to bring the children out, great good would be accomplished. Two neat water closets have been furnished since my last visit.

Crane River Day School (Church of England).

This school is still closed and no change can be reported from last year. There are very few children at this point and I can not recommend the opening of this school.

3 GEORGE V., A. 1913

Shoal River Day School (Church of England).

Rev. T. H. Dobbs, teacher.

I visited this school on July 13. The attendance was good. I found on the roll 24 pupils; 12 boys and 12 girls, classified as follows:—

Standard I.	18
“ II.	6
Total.	24

The average attendance for the quarter ended June 30 was 14.5. The junior class can just read in the first primer, and can spell fairly well. They do not do any arithmetic, except to write figures. The pupils in Standard II. were very poor indeed. They read poorly, and some of them could not write their own names, and were very poor at figures, though they do small sums up to subtraction. This school is not as good as it was during my inspections of 1909 and 1910. The teacher has started the study of calisthenics, but claims that his pupils are not far enough advanced for the study of hygiene.

The school building is in a very poor state of repair. It is built of logs and is 21 x 24 feet, with porch, 8 x 9 feet, and has 5 windows. There is a fire-place in the school, with a brick chimney, which is used occasionally. In the winter the school is heated with a box stove, but the teacher reports the building as being very cold and hard to heat.

Shoal Lake School (Church of England).

Francis Daniels, teacher.

This school is in the Pas agency and was visited by me on July 24. I found present 19 pupils: 11 boys and 8 girls, classified as follows:

Standard I.	13
“ II.	6
Total.	19

The Junior class know their A B C's, and can spell some small words, and are learning to write. Standard II. can read fairly well in the first book and do small sums up to subtraction, and are writing fairly well. This class can all write their names on their slates and on the blackboard.

Mr. Daniels is an ex-pupil of the Middlechurch (10 years) and Elkhorn (3 years) industrial schools, and has only been teaching for a short time. He is a non-treaty Indian, is married to a treaty woman and lives one mile from the reserve, on government land. He is also in charge of the religious work for the Church of England.

The school building belongs to the Church of England, is built of logs and is in a very poor state of repair. There is a steep roof with no ceiling inside, and it is very cold in the winter. The roof leaks in several places. There are 3 windows, but no double windows, or porch for the winter.

Red Earth Day School (Church of England).

J. G. Kennedy, teacher.

I visited this school on July 25, and found present, 17 children; 10 boys and 7 girls. On the roll there were 13 boys and 7 girls, classified as follows:—

SESSIONAL PAPER No. 27

Standard I.	7
“ II.	7
“ IV.	6
Total.	20

The average attendance for the quarter ended June 30, was 11.5. Standard I are in their A B C's, and can spell a few words and are learning to write on their slates. Standard II, can read fairly well in the first book, do simple sums in addition and write very well. Standard IV, can read well in the third book, do sums up to short division and are all good writers.

Mr. Kennedy, the teacher, received his education at the Manitoba public schools, but has no certificate to teach, and has had no normal training. He is also acting for the Church of England, as lay missionary on the reserve.

This school building is owned by the Church of England and is also used for church services. At the time of my visit I went over to see the new school building which is being erected. The logs are up and the rafters on, and it would not take long to finish, if the materials were furnished.

Moose Lake Day School (Church of England).

C. T. Mitchell, teacher.

I visited this school on July 31, and found a new teacher in charge, C. T. Mitchell, who was educated in Philadelphia and holds a certificate about equal to our Manitoba second class. He appears to be a very capable young man and is taking a great interest in his school. There were present 20 children, 9 boys and 11 girls, and he has them all in Standard I. There are on the roll 30 children, 11 boys and 19 girls.

This teacher is starting from the beginning and I expect to see good progress at my next visit. He has started the teaching of hygiene and calisthenics, and I was very much pleased at the progress made by all the pupils in the latter study.

The building is in poor condition.

Chemawawin Day School (Church of England).

Rev. M. B. Leffler, teacher.

I visited this school on August 2, and found 23 pupils present, 14 boys and 9 girls. On the register, I found 16 boys and 13 girls enrolled, classified as follows:—

Standard I.	24
“ II.	5
Total.	29

None of these children should be rated higher than Standard I. The average attendance for the quarter ended June 30 was 12.

This school is in a very backward condition and some change should be made at an early date. Mr. Leffler does not understand teaching and no progress has been made in three years. He does not like the work and has had no experience.

Cumberland Day School (Church of England).

John A. Keddie, teacher.

I visited this school on August 5, and found 11 pupils present, 4 boys and 7 girls. On the register are 22 pupils; 8 boys and 14 girls, classified as follows:—

3 GEORGE V., A. 1913

Standard I.	14
“ II.	3
“ III.	5
Total.	22

The average attendance for the quarter ended June 30 was 5:91. Standard I. know their A B C's and can say several words and are learning to write.

Standards II. and III, read well, and can do small sums up to multiplication and are good writers. These classes are doing well in all their studies, and are making some progress. The teacher has not started, as yet, the teaching of hygiene or calisthenics.

Mr. Keddie was educated in Edinburgh, and has had no experience in teaching, this being his first school. He is a man over 50 years of age, and I do not think, from what I saw, that he will be a success, as he has reached an age where it is difficult to take up and make good at a new profession.

Swan Lake Day School (Presbyterian).

Miss Jessie Bruce, teacher.

This day school is situated on the Canadian Northern railway, near the village of Swan Lake, and has the station of Indian Springs situated on the reserve, about two miles from the school. I visited this school on October 10, and found 10 pupils present, 5 boys and 5 girls. There were 22 children on the roll, classified as follows:

Standard I.	12
“ II.	8
“ III.	2
Total.	22

The pupils at this school are doing well in their different classes. The children are all bright and clean and answer all questions promptly. Standard I know their A B C's and can read and spell simple words. They can put on their slates all the alphabet and figures, and are also learning to write on their slates. Standards II. and III. can read in the first and second books, and can spell any word in their lessons correctly. They also write nicely and can do sums up to long division. Miss Bruce has a sister who lives with her, and who looks after the house which is located near the school. She also prepares the warm meal which is now given the children of this school at noon. The teacher tells me that this warm meal at noon is a very good thing for the children and helps to keep up the attendance. The teacher and her sister appear to have a liking for this Indian work, and I expect to see a great improvement at this school in the near future. As will be noticed, the children on the reserve, available for school, are in attendance. There were 22 on the roll at the time of my visit, as compared with 9 enrolled last year. Miss Bruce intends having a large garden next season, and will teach the pupils how to grow and look after all kinds of vegetables. This school has a very pretty location, is near the farm instructor's buildings, and is central in the reserve. It is in the Portage La Prairie agency.

Okanase Day School (Presbyterian).

Miss E. M. Murray, teacher.

This school is located in a good position on the Keeseekoowenin reserve in the Riding mountains. The Little Saskatchewan river runs through the reserve a short distance from the school. The school is built on the north side of the deep valley

SESSIONAL PAPER No. 27

through which this river runs, and nearby, within 300 feet, the Presbyterian church have a manse, in which their resident minister lives. At inspection, there were present 2 boys and 5 girls. I found on the roll 16 pupils, graded as follows:

Standard I.	11
“ II.	3
“ III.	1
“ IV.	1
Total.	16

The showing made by the pupils present was only fair, and no progress can be reported from last year. This school is in a very poor condition, and a change should be made at an early date. Miss Murray has been teaching for 5 years at this school, but had no previous experience whatever, has no certificate and no normal training. The band complain that Miss Murray has no control of the children and never visits their homes. The condition of the school building is the same as at the date of my last report. The books and school material are in good order and appear to be well looked after.

Miss Murray informed me that she had to close the school on the afternoon of the 15th for want of wood, but a load had been delivered by the time of my visit on the 16th. I brought this matter to the attention of the band at the band meeting and they promised it would not occur again.

Portage La Prairie Boarding School (Presbyterian).

Rev. J. L. Miller, Principal.

I have visited this school twice during the year. On the occasion of my last visit, November 28, I found the principal, Rev. J. L. Miller, sick in bed and Miss Helen Thornton in charge of the class-room. She is a high school graduate and was in a Montreal college for 4 years. She is doing good work at this school, having all the pupils well in hand.

There were present at inspection 29 pupils; 11 boys and 18 girls, classified as follows:—

Standard I.	3
“ II.	0
“ III.	14
“ IV.	5
“ V.	7
Total.	29

The pupils of Standard I. know their A, B, C's and can read simple words of one syllable, and spell and write them very well. They can also count up to 30 or 40.

Standard III. read in the second reader and spell and write all they read. They write well in their copybooks, and in arithmetic can do small sums up to multiplication. They are also taught geography of Manitoba.

Standard IV. are in the third reader, can spell all they read and are good writers in their copy-books. In arithmetic they have gone as far as long division. They also take up the geography of Canada and composition.

Standard V. are in the fourth reader, are good readers, can spell and write all they read. They are taking all the branches similar to the same grade in our public schools.

Roseau Rapids Day School (Undenominational).

Rose Godon, teacher.

I visited this school on Friday, December 1, and found present 2 pupils, one boy and one girl, both in Standard I. These children can say their A, B, C's and read simple words and can also write the same on their slates. Miss Godon is very much discouraged at not being able to get the Indians to send their children to the school.

The teacher was thinking of giving up the work at the end of the December quarter, but I advised her to stay till the end of the year and make one more effort. The Indians have been talked to, by both Mr. Ginn and myself. They make all sorts of promises, but fail to perform them. The school material is in good order, with the exception of the table which requires replacing. The school building is in good order and no change from my last report.

THE REPORT OF MR. W. J. CHISHOLM, INSPECTOR OF INDIAN AGENCIES AND RESERVES, ON THE SCHOOLS IN THE NORTH SASKATCHEWAN INSPECTORATE, FOR THE YEAR ENDED MARCH 31, 1912.

Battleford Industrial School.

This institution was visited at intervals during the year, and was briefly inspected on March 25 and 26.

The school continues in charge of Rev. E. K. Matheson, who has managed its affairs for the past seventeen years.

The attendance of pupils shows a further falling off, as is indicated by the following statement:—

Enrolled at last inspection, January, 1911	67
Admitted since	8
	75
Total	75
Discharged	30
Died	3
	33
Deduct	33
Enrolled March 25, 1912	42

In addition to the foregoing there is an attendnace of 5 pupils, for whom no grant is received from the Indian Department, but who are, in some instances, maintained by a contribution from other sources.

The improvement of the day schools which is being effected has led to a demand on the part of the Indians for their re-establishment on reserves where they had been closed for years, and an increasing disinclination to send their children to the boarding institutions.

For a time the attendance was recruited from the hunting bands of The Pas and Montreal Lake; but the change of diet and surroundings, and the restraint and discipline of residential school life were found to have a decidedly injurious effect on the health of these children, and they have all been allowed to return to their native place in the north.

Latterly the average health of the school has been much improved; and on the occasion of my recent visit I found no cases of sickness among the pupils.

SESSIONAL PAPER No. 27

The class-work, in charge of Mr. Marshall for the past two years, has been going on successfully. Fairly uniform and satisfactory progress is discernible in all the subjects, none of which has been neglected. Progress is tested at regular intervals by written exercises of a practical and useful character. Breathing and other physical exercises are practised regularly, in accordance with the department's instructions.

One of the ex-pupils of this school, a boy who through physical infirmity is incapacitated for heavier work, has conducted the class-work in the boarding school at Onion Lake during the past year in a creditable manner.

Industrial training, though now quite limited in range and extent, is well supervised and thorough.

The different departments of the school are properly equipped; but the buildings, which are no longer fully occupied, are in places in much need of repair.

Church of England Boarding School, Onion Lake.

This school was inspected on March 28, and again briefly on April 5.

There is an enrolment and attendance of 15 pupils of Indian parentage; but there are also in residence 18 non-treaty pupils, who are fed, clothed and educated by the mission, in most instances without assistance from any source.

The children are comfortably clothed, and well provided with wholesome food; and the school has a good record with respect to the health of its pupils.

The class-work has, for nearly a year past, been in charge of Joseph Chamberlin, an ex-pupil of the Battleford industrial school. He has very fair attainments, having passed the third-class teacher's non-professional examination and made some progress in the work for the second-class examination. He has, however, had no normal training; and he was on the point of leaving to pursue his studies further and later to take a normal course.

The senior classes have made fair progress in reading, writing, geography, language, and number work. The progress of the beginners is not so satisfactory. Hygiene has not latterly been taught; and physical exercises have also been neglected.

The class-room and dormitories are spacious and properly equipped; and the buildings throughout, though not by any means modern, are kept in a fairly sanitary condition.

South Fort à la Corne Day School.

This school was inspected on April 13. There were 19 pupils enrolled and 10 present on this date. There had been 191 days of school in the preceding twelve months; and the daily average attendance for this period was nearly 12 pupils. This rather favourable record was due in large measure to the personal influence of the teacher, Mrs. A. A. Godfrey, with the pupils and their parents; and there were no children of school age in the southern half of the reserve whose names were not on the register.

The examination of the classes revealed fair progress. Language and composition have been taught with fair success throughout all the standards and elementary grammar to Standard IV. The simpler notions of geography have been acquired, as well as, a tolerable range of general knowledge. Writing in copy-books and exercise books shows care and steady improvement. The exercise books illustrate a variety of work, including dictation, language, composition, map and freehand drawing. Singing is regularly taught and some of the elements of the theory of music. Calisthenic exercises and drills have regular practice.

The school-room is suitably equipped and furnished; and the building is in good repair.

The teacher's dwelling is a small log building, which should be replaced with a larger and more comfortable one.

North Fort à La Corne (James Smith's) Day School.

This school was also inspected on April 13. There were 25 pupils enrolled, while there are 33 children of school age in this part of the reserve. There were 188 days of school in the preceding twelve months, and a daily average attendance during this period of a little over 13 pupils; while the number present on the day of inspection was eleven. It cannot be said that this is a satisfactory showing, as the homes of most of the children are within a mile and a half of the school; and during the winter months the department provided a team and sleigh to convey to and from school the pupils who live at a greater distance.

Of the enrolment of 25 pupils, 14 are in Standard I, 5 in Standard II, and 6 in Standard III.

The teacher, Miss Anna A. Hawley, had at this date been on duty here for about eighteen months; and the results of her work with the more advanced pupils were very satisfactory. The class consisted of girls of from twelve to fifteen years; and they displayed a brightness, an intelligence, and an interest in themselves and their attainments never before discernible in the pupils of this school.

None of the pupils in Standard II. were present; and those in Standard I. showed no marked progress as yet.

Some of the teacher's time had been consumed in nursing or visiting the sick, while the school for best results would have required her undivided attention. The school hours were short and were further frequently broken into.

The building was old and in bad repair, but has since been replaced by a new and much improved one. A teacher's dwelling has also been built.

John Smith's Day School.

The inspection of this school was made on April 19. There were 29 pupils enrolled, 26 present, and an average attendance for the month, down to the date of inspection, of 26 pupils daily, which is most satisfactory.

There are 12 pupils in Standard I, 4 in Standard II, 7 in Standard III, and 6 in Standard IV. This school is taught by the Rev. R. F. Macdougall; his wife acts as matron. The classes were examined in all the subjects. They read out distinctly and audibly, and with a fair understanding of the meaning of the passages they read. They are making good progress in English, and use freely what they can command. For the most part similar progress is shown in all the other subjects. Hygiene is taught, as required; and calisthenic and breathing exercises are practised regularly and with good effect. The teacher cannot sing; but he succeeds at the less in getting the pupils to sing hymns and patriotic songs. Much animation and enthusiasm are imparted to all exercises; and the interest of the pupils is well sustained.

The school hours are not curtailed as in many schools, but are from 9 a.m. to 4 p.m., and the pupils attend punctually and do not appear to find the day long.

The school building is of suitable dimensions and in good repair. A very comfortable teacher's dwelling was built in the summer of 1910; and annexed to this is a dining-room for the pupils, in which a warm and wholesome meal is served at noon hour.

Wahpaton (Sioux) Day School.

This school was visited on January 3, and at intervals during the year, being situated on a small reserve occupied by Sioux Indians, at a distance of about ten miles from Prince Albert.

There were six pupils enrolled, which is the total school population of the reserve; and the average attendance for 12 months was 4 pupils daily.

On January 3 there were but two pupils present, and they were mere beginners. They had learned a few words of English, could make a few letters and figures with pencil, and had learned to count correctly up to ten.

SESSIONAL PAPER No. 27

The regular school building had been abandoned for the winter, for the sake of economy in heating; and a room of suitable dimensions and appointments in connection with the Mission dwelling was used instead. The equipment was sufficient for the very small attendance.

Until the population of the reserve is augmented, as it is likely to be, by migrations from the Sioux encampment near the city, no work of any considerable importance can be looked for in this school.

The teacher, Miss Walker, is about 18 years of age, and has fair attainments, but no special training for the work and no previous experience.

Ahtahkakoop's Day School.

The inspection of this school was made on January 18 and 23.

There were 13 pupils present on the 18th, and 15 on the 23rd, the latter being the total enrolment. There were 197 days of school in 1911, and the average attendance during the year was nearly ten pupils daily. The number of children of school age on this reserve is 45, from which it will be seen that the school is far from fulfilling the educational needs of the band. The cause of this is found in the fact that the majority of the children live too far from the school for the younger ones to walk; and to overcome this difficulty, I still know of no more efficient plan than that which I recommended many years ago, namely, to provide two large and comfortable conveyances to bring the children from distant parts of the reserve to school and to take them home.

The teacher, Mr. H. Hutchinson, had taken up his duties here only a few weeks previously; and as yet there were no distinctly noticeable results from his work, but he has all necessary qualifications and experience, and good results may confidently be predicted. Already some subjects that had hitherto been neglected are beginning to receive their due attention. The teacher has had a considerable course of study in medicine, and as might be expected he will teach hygiene to some purpose, while elementary science will be introduced as nature study. These and other new departments will add life and interest to the daily routine, which will presently have a new meaning for the pupils.

The class-room equipment, though sufficient for present requirements, would have to be largely increased in case anything approaching a full attendance of the children of school age were secured. The blackboard especially should in that event be enlarged and improved, and double the present number of desks provided.

The school building is large enough for an attendance of thirty pupils; it is beautifully and healthfully situated, well built, and generally in a good state of repair.

The school building, though erected by the department, is on mission property. Adjacent to it, but outside the mission property, a teacher's dwelling has been erected, affording ample and very comfortable accommodation for the teacher and his family. Attached to this dwelling is a dining-room for the pupils, and some dormitory accommodation.

Mistawasis Day School.

The day school on the Mistawasis reserve was inspected on January 24.

There were 14 pupils present, and 23 enrolled, which is nearly the total number of school age on the reserve. There were 189 days of school in 1911, and a daily average attendance of 14 pupils.

Of the 23 pupils enrolled, 13 are in Standard I, 1 in Standard II, and 9 in Standard III. Some of those in the third standard had been in attendance at the industrial school at Regina for a time; and making some allowance for this, the results of the work are not too encouraging, considering the liberal expenditure that has been made in recent years in an effort to make the work of this school a success. But though the pupils are not far advanced the work has some redeeming features. In some sub-

3 GEORGE V., A. 1913

jects the pupils display a fair degree of intelligence; and there is an entire absence of rote learning, such as prevails in some schools and gives a false appearance of progress. The weakest points revealed in the examination of the classes were low speaking and lack of expression in reading, both of which the teacher recognizes and seems anxious to amend.

The teacher, Rev. C. W. Bryden, B. A., has excellent qualifications, so far as these are attainable by study, training and experience; but both by scholarship and by natural aptitude he is much better adapted to the work of advanced students than of beginners.

The school building is of suitable dimensions for present conditions; it is properly lighted and comfortably heated, and in a good state of repair. The school grounds are clean and dry.

At a distance of two hundred yards from the school stands the teacher's dwelling, erected in 1910, a spacious habitation, including pupils' dining-room, as well as some residential accommodation for Indian children, which however, has not yet been utilized.

Red Pheasant's Day School.

The school on Red Pheasant's reserve was inspected on March 19. There were but four pupils present, which is about the daily average for the past year. There were nine pupils enrolled, and fourteen children of school age on the reserve.

There are 15 children between the ages of six and fifteen from this reserve at the Battleford industrial school, and two at Duck Lake. and as the most advanced have usually been taken from the day school to the residential schools, it is not surprising that all that remain are in the first standard.

Rev. D. McDonald has had charge of the school since January 1; and as he has neither qualification for the work nor interest in it, the arrangement must be regarded as only temporary.

The school building is healthfully situated; and is sufficiently large for the present possible attendance. Though not an expensive building, it is comparatively new, properly finished, in good repair and quite comfortable. It is not, however, quite central as to the population of the reserve, being almost out of reach of some who would otherwise attend.

Stony Day School.

The school on the Stony reserve was inspected on March 20.

Peter Wattanee, an ex-pupil of the Battleford school, has been teacher since January 1, before which date Rev. D. McDonald, now of Red Pheasant's school, was in charge here.

The number of pupils enrolled was nine, while there were 13 children of school age on the reserve. There were eight present on the day of inspection; and the average attendance for the March quarter to that date was six pupils daily, while the daily average for the year 1911 was but three.

Considering that this is regarded as one of the most backward bands of Indians, the pupils presented an unusually decent appearance, behaved well and answered brightly. They are at present in a fairly good state of progress, and there are conditions here for a valuable work which the present teacher, though not specially trained for his duties, will in some measure accomplish. It cannot be said, however, that there are in the school or on the reserve evidences of any substantial return for the supposed efforts of some eight years of educational work which the department has maintained.

The school-room and teacher's dwelling are under one roof. Both are rudely constructed, poorly finished, and uncomfortable.

SESSIONAL PAPER No. 27

Little Pine's Day School.

This school was inspected on March 23, having been closed on the occasions of my two previous visits to the reserve.

At this date I found 25 pupils enrolled, out of a total school population of 27 on the reserve. Of these 13 were present, and there was an average for the quarter of over 15 daily. This is a great improvement on the past, and is an unmistakable evidence of increased interest and efficiency in the work. The average for 171 school days in 1911 was slightly over 10.

James Wattanee, another ex-pupil of the Battleford school, has been in charge since last midsummer, and is making a creditable effort to maintain the improvement in the work inaugurated some two years ago by Rev. Mr. Butcher, who has for a time relinquished his duties here in order to complete his studies.

To illustrate the improved conditions in connection with this school I cannot do better than quote some observations by Farmer G. M. Young, which I found in his daily journal for Friday, January 12. He writes: 'Mrs. Young and I went to Little Pine's school in the evening. The school children had a concert, the Indian children all taking their part very well. Mrs. Young sang, along with the teacher and his wife. I had the gramophone along and gave them some music.'

The Indians were better pleased when their children were taking part than with the rest of the programme. Every child on Little Pine's got a present in the shape of a new cap, mitts, muffler, or some similar article, which were given by Rev. Mr. Butcher, who taught this school last summer. There is a big improvement in the children on Little Pine's in the past two years. When I came here two years ago none of the children could talk to you in English, but now if you speak to one of them you nearly always get an answer you can understand.' Very definite conclusions as to the possibilities of day school work on this and many other similar reserves can be drawn from these direct and pointed remarks by a wide-awake man right on the ground.

The school and teacher's dwelling, neither of which is at all adequate to the present requirements, are this summer being replaced by modern structures; and there are now good reasons to expect this school to develop into an institution of great usefulness.

Meadow Lake Day School.

This school was visited on March 12, but there were no pupils present.

There are 12 children of school age on the reserve at times; but as the parents are mostly hunters, they frequently take their children abroad with them. This, however, is only for brief periods; usually about half of these children are on the reserve, and for several months in the year all of them.

The average attendance for 222 reported days of school in 1911, was less than two pupils daily; and the school might as well be closed.

If the school is to be of any use at all, new buildings are required, both school and teacher's dwelling, as the present are entirely unfitted for such use. But it would also be necessary to secure a qualified teacher, and to adopt some scheme for securing a larger and more regular attendance.

General Remarks.

Poundmaker's, Sturgeon Lake, and Big River day schools were also visited; but as they were closed at the time there is little of importance to report regarding them.

3 GEORGE V., A. 1913

THE REPORT OF MR. W. M. GRAHAM, INSPECTOR OF INDIAN AGENCIES
AND RESERVES IN SOUTH SASKATCHEWAN, ON INDIAN SCHOOLS
IN SOUTH SASKATCHEWAN, FOR THE YEAR ENDED MARCH, 31,
1912.

I visited the Crooked Lake agency during July last, and made an inspection of the agency. The Round Lake boarding school was closed at the time for the summer holidays and I was therefore unable to make an inspection. However, there has been very little change in this school since my last inspection.

Moose Mountain Day School.

The day school at Moose Mountain was also closed when I last visited that agency. The buildings and surroundings were in good shape and there was a nice garden. I expect to visit this school shortly.

Crowstand Boarding School.

I inspected this school on October 12, 1911. It is under the auspices of the Presbyterian Church.

This school has accommodation and authority to admit 50 pupils. At the time of my inspection there were 49 children enrolled. The attendance in the class-room has been very regular throughout the year. The children were healthy, clean and warmly clad.

The forty-nine children in attendance were graded as follows:—

Standard	I.	19
"	II.	18
"	IV.	12

The pupils went through their various exercises and were well up in their work.

The school had a good garden last summer and there were ample vegetables of all kinds to last through the winter. The children at this institution receive a good training in gardening.

A very fine new barn has been completed. It is large enough to accommodate all the horses and cattle of the institution and is a great improvement on the old log one, which has been torn down.

The area under crop was about as usual, but I regret to say that rust and frost greatly affected the wheat. The oats were good. Threshing operations were going on at the time of my inspection.

The financial standing of this school is good. The principal is a good manager and always has a balance on the right side.

Assiniboine Day School.

I visited the day school on the Assiniboine reserve several times during the year and am glad to report that everything in connection with the school is quite satisfactory. The attendance is good, children are clean and healthy and the school and surroundings are kept in splendid condition. Last year the children had a very good garden and preparations are made for a better one in 1912. Miss Laurence is a very enthusiastic teacher and gets along well with the parents.

The class-room work is splendid; it was really a surprise to me to see the advancement these children had made during the short time the school has been opened. Children living at a distance are driven to and from the school each day.

SESSIONAL PAPER No. 27

File Hills Boarding School.

The File Hills boarding school, situated near the File Hills agency, was completed early in August, 1911, and occupied almost at once. The building is very complete and has accommodation for 60 children. It is a brick-veneer structure, with two stories above a good basement, and the whole is heated by steam. There is a complete water and drainage system. The building that was formerly used as a school has been converted into a principal's residence. This building is connected with the new school by a passage. The class-room is a detached building, newly built, and heated by a furnace.

There has been a change of principals in this institution during the year. Miss Cunningham resigned in October last, and her place was filled by the Rev. H. Sweet. The attendance has been steadily on the increase and now numbers 46 pupils.

The school has a fine garden in connection with it, but the farm is altogether too small and it is hoped that more land will be brought under cultivation during the summer. The school has quite a number of cattle and the boys receive a good training in the care and management of the stock.

There is a complete hospital in connection with the school, but fortunately it has not been required very much so far. Aside from a few minor cases of illness, the health of the children has been good.

THE REPORT OF MR. J. A. MARKLE, INSPECTOR OF INDIAN AGENCIES
AND RESERVES, ON THE SCHOOLS IN THE ALBERTA INSPECTORATE,
FOR YEAR ENDED MARCH 31, 1912.

Peigan Church of England (Victoria Home) Boarding School.

This school, under the auspices of the Church of England, is adjacent to the Peigan reserve. I visited this institution on December 11, 1911. The staff then were as follows: A. R. Collins, Esq., principal; A. Bonehill, assistant principal; Miss Henderson, matron; Mrs. Simons, assistant matron.

The position of teacher was vacant. Miss Stenning taught for about three weeks during the month of November. The principal, I understood, did some teaching when his time admitted.

There were 17 boys and 8 girls enrolled and of this number 3 boys were absent.

The principal stated that the eldest boys did gardening in season, made bread, did dairy work and chores. The eldest girls assist at the laundry work, mending clothes and general house-work.

The live stock consisted of one team of horses, eight head of cattle and twenty head of poultry.

The cattle were in good condition, but the team of horses would be no credit to an Indian and much less credit to an institution of this sort.

Workmen were engaged fitting up the late principal's residence for a hospital, also on some changes and improvements to the interior of the main building.

The classification of the 25 pupils enrolled was as follows:—

Standard	I.	16
"	II.	4
"	III.	3
"	IV.	2
Total.		25

3 GEORGE V., A. 1913

I was informed that 3 cows were regularly milked and that the children were allowed milk to drink.

I was not favourably impressed with the condition of this school at this inspection.

Blood Church of England (St. Paul's) Boarding School.

This school is located near the Blood reserve, and is under the auspices of the Church of England.

I visited this school on the afternoon of March 15, 1912, and regret to report that the classes had been dispersed for that week. I did not, therefore, see or hear the pupils in the class-room.

Thirty-eight pupils were enrolled, classified as follows:—

Standard I.	8
“ II.	10
“ III.	9
“ IV.	5
“ V.	6
Total.	38

Miss E. Gardner, is the teacher, and although she does not hold a provincial teacher's certificate she is a graduate of an English college and reported to be a capable teacher.

The staff consisted of: Rev. S. Middleton, principal; Mr. C. Bailey, assistant principal; Miss E. Gardner, teacher; Mrs. Middleton, girls' matron; Miss Lumly, boys' matron; Miss Smalley, cook.

A new dormitory for the use of the boys had just been completed and had been occupied a few nights previous to my visit. It is roomy, well planned, and it should be a healthful sleeping apartment for the boys of this institution. The old dormitory building was being torn down, with a view of rebuilding it for a residence for the principal. The principal's former residence had been fitted up for a hospital.

The stock at this school consisted of 5 head of horses, 10 cows, 3 pigs and 50 fowl. Five cows were giving milk and sufficient butter was being made for use within the school. The stock here was in good condition and apparently well cared for.

Forty acres of land are under cultivation and approximately 1,500 bushels of oats, 14 tons of potatoes and 5 tons of other roots were grown last season and, besides, 1,500 heads of cabbages and a quantity of small garden stuff.

The larger boys spend half of each working day at farm work of various sorts and the girls assist at dairy work, general housekeeping, dressmaking and sewing.

Sarcee Boarding School.

This school is located on the Sarcee reserve. Mr. Grevett is still the assistant principal and teacher.

The building, in use for many years, has not yet been replaced with a new one, as was the intention a year ago.

The attendance of pupils averages about 15, and reasonably good work has been accomplished at this institution. It is under the auspices of the Church of England.

Old Sun's Boarding School.

New and modern planned buildings were started during the spring of 1911 and are now practically completed and ready for occupation. The old class-room building was moved from the old location near the Bow river, to the new site about a mile south of the town of Gleichen and within the Blackfoot reserve. This building has been

SESSIONAL PAPER No. 27

placed on a cement concrete foundation, a furnace installed thereunder and generally fitted up in a first-class manner. The residential building is commodious and modern from every standpoint. To the rear of the main building, a new building was erected with a full basement, and within it, the water works are located. The first floor is divided into three apartments for use as a laundry, bakery and store-room, to hold supplies, a refrigerator and a Colt gas generating machine. To the rear of the store-room an ice storage has been provided. The upper floor has been divided into apartments to be used as wards in the event of a contagious sickness breaking out, and accommodation for a nurse also provided adjacent to the wards. A new poultry house, separate horse and cow stables, with hay mows for each, and a vehicle shed was also erected in connection with this institution.

One hundred and sixty acres of land had been set apart for use in connection with this school and it is the intention and the management to farm a portion of this area and to grow the fodder required to feed the stock to be kept, as well as to provide the necessary pasturage for the horses and the cows.

This school is to be under the auspices of the Church of England.

A portion of my time was taken up during the last twelve months inspecting the building as it progressed and locating the various buildings in connection therewith.

Red Deer Industrial School.

The industrial school near Red Deer, under the auspices of the Methodist church, is yet in operation, and I believe is doing a good work. My time has been so much occupied with work of various kinds that I failed to find time to visit this and the other schools within my inspectorate.

Rev. Arthur Barner is principal of this institution.

Day Schools.

A day school has been operated on the Samson's reserve within the Hobbema agency, and I understand the attendance has been very satisfactory. This school, and the day schools within the Saddle Lake agency, were not inspected, for the want of time to do so.

THE REPORT OF MR. W. E. DITCHEBURN, INSPECTOR OF INDIAN AGENCIES, ON THE SCHOOLS IN THE SOUTHWESTERN INSPECTORATE, BRITISH COLUMBIA, FOR THE YEAR ENDED MARCH 31, 1912.

COWICHAN AGENCY.

Kuper Island Industrial School (Roman Catholic).

I visited this school on January 23, 1912. The staff is as follows: Rev. D. Claesen, principal; Rev. W. Cortenaad, boys' teacher; Jos. Lecrom, trades instructor; A. Rault, farm instructor; Sister Mary Everista, matron; Sister Mary Joseph, girls' teacher; Sister Mary Albert, laundress; Sister Mary Stanislaus, cook.

There were 66 pupils on the register—37 boys and 29 girls, the grant being for 60. Since my last visit about 14 pupils have been discharged, which has relieved, to quite an extent, the overcrowded state in the girls' dormitory.

The pupils were all making good progress in their studies, and all have enjoyed good health during the past year. There were no deaths, and the only sickness among them were two light cases of pneumonia.

3 GEORGE V., A. 1913

The buildings are heated by means of stoves, and ventilated by leaving the windows open.

Some repairs have been made during the year, but the buildings are very old and the foundations have decayed in places, causing the building, used for the boys' school, to sag considerably. This whole collection of buildings should be replaced, as soon as possible, by a new and modern school, built upon the higher ground, with accommodation for approximately 100 pupils.

A great improvement was noticed with respect to the sewers. These have been rebuilt and are anchored to the ground and now run out to deep water. A new water closet for the boys has also been built. The closet is flushed with running water, and is a marked improvement over the old one. The foul odours which were so noticeable last year have thus been done away with.

Regular lessons in hygiene are given every day. The girls also practise calisthenics and drills, and the boys have their gymnasium. Besides the regular studies, the boys are taught farming, principally, but some are taught baking, carpentry, blacksmithing and shoe repairing; and the girls are taught laundry work, cooking, sewing and general housework.

Fire fighting appliances are kept in place, and occasional drills are given in the matter of emptying the buildings in case of fire.

There are 40 acres under cultivation, upon which were grown last year, 35 tons of hay, 15 tons of potatoes, 20 tons of turnips and mangolds, 3½ tons of wheat, 1½ tons of oats, 8 tons of carrots, 1 ton of onions, 100 boxes of apples, as well as a quantity of small fruits and vegetables. The live stock consists of 9 cows, 1 bull, 1 heifer, 5 pigs, 5 horses, and 150 chickens.

Nanaimo Day School (Methodist).

I visited this school on January 25, 1912. Rev. W. J. Knot is the teacher, and takes a great interest in his work, but seemed discouraged at the lack of appreciation on the part of the Indians of the efforts made to give their children an education. At the time of my visit, there were only two pupils in attendance. The number of children on the register showed 7 boys and 3 girls. The average attendance last quarter was 7.5, out of 18 pupils. There are 24 children of school age on this reserve, and the attendance should be much better than it has been. I personally saw the parents of most of the absentee pupils, and I have since been informed that there has been a much better attendance.

When the pupils attend regularly they make very good progress. The building is in good repair.

Koksilah Day School (Methodist).

I visited this school on January 22, 1912. C. A. Dockstader is the teacher. This was the opening day, and six boys were present. The average last quarter was 6.08, but Mr. Dockstader expected better results for this quarter, the March term generally being the best of the year. When the children attend regularly they make fair progress. Their health had been good during the year. The building is in a good state of repair, and new water closets have been built since last year.

Quamichan School (Methodist).

I visited this school on January 26, 1912. Mr. E. J. Bowden is the teacher. This school is very poorly attended. There were only three children present on the day of my visit. Number of children on the roll, 8 boys. The average attendance during the December quarter was 5.14; with 8 boys and 4 girls on the roll. The health of the children had been fair during the year, with the exception of an epidemic of influenza, which prevailed during the month of December last.

SESSIONAL PAPER No. 27

Mr. Bowden, the teacher thought it advisable to keep the school open for only four months in the year in future—November, December, January and February, owing to the fact that the children are not on the reserve for the other eight months. It is doubtful if the schooling they would obtain during the four months mentioned would be of any practical value to them, as they would forget everything they had learned before coming back to school again.

Quamichan Day School (Roman Catholic).

This school is located on the Clemclemalitiz reserve. I visited it on January 26, 1912. Owing to the difficulty of obtaining a competent teacher for this school the attendance has been very poor. Rev. Father Lemmens, the missionary at Tzouhalem, expects to be able to get a lady teacher in the near future, and it is thought, that when this is accomplished, there will be a good average attendance. At the time of my visit there were only three boys and two girls present, and the teacher for the time being was Archie Alexander, an ex-pupil of the Kuper Island industrial school. The average for the December quarter was also very poor. The building, itself, is not in very good repair, and should be painted both inside and out, but it would not be advisable to incur any expenditure on the school until a much better attendance is shown.

Tsartlip Day School (Roman Catholic).

This school is situated on the West Saanich road, close to the Tsartlip reserve. I visited this school on February 23, 1912. Miss Helen Hagan is the teacher. There were 13 children—5 boys and 8 girls—on the roll, the average for the December quarter being 6.70, but should be somewhat higher for the March quarter. The children make good progress when attending regularly. Their health had been good during the year. The school is in a good state of repair.

East Saanich Day School (Roman Catholic).

This school, situated on the Tsawout reserve, has been closed since December. Daniel Dick, the teacher, an ex-graduate of the Kuper Island industrial school, having left the reserve. If a white teacher could be obtained for this school, no doubt there would be a better attendance than there has been in the past.

KWAWKEWLTH AGENCY.

Alert Bay Industrial School (Church of England).

I visited this school on November 20, 1911. The staff consists of Rev. A. W. Corker, principal; George Martin Luther, assistant; Mrs. A. W. Corker, matron; Miss A. M. Warrenner, assistant matron; Eli Hunt, trade instructor. There were 33 pupils in attendance, with 35 on the roll, two being away at the time of my visit. This school has a grant for 35 pupils. The pupils were reported to be making good progress in their studies, both in the class-room and the carpenter shop. The general health of the children had been good during the year, though there had been a few cases of tonsillitis during the unusually cold weather in the early part of November.

Considerable work had been done on this school since my last visit, which gives it a much better appearance than it had last year. The exterior had been painted and the roof re-shingled. A new floor was about to be put down in the dining-room, and when this was done the interior was to have a new coat of paint also.

The dormitories are well ventilated and are heated by means of stoves. Fire-fighting appliances are kept in place, but at least six more fire buckets were re-

3 GEORGE V., A. 1913

quired for this equipment. The tubs in the laundry were old and might very easily be replaced by porcelain ones. Six new basins were needed for the bath-room.

The two dormitories have enough space for approximately 44 pupils, but the class-room will not accommodate any more than at present on the roll. If the present class-room were moved a short distance and a new one built in its place with a dormitory upstairs, the school would then have accommodation for 20 or 25 more pupils. Mr. Corker informed me that he had applications for 20 more pupils, but owing to lack of space he could not take any more. If this addition were made, the present class-room could be utilized as a carpenter shop, and would give much more space for this work to be taught.

About 4 acres of land had been under cultivation during the year, from which 5 tons of potatoes had been gathered, as well as other vegetables and small fruits. The live stock consisted of two cows, one calf and one horse.

Alert Bay Girls' Home (Church of England).

During the year, the department has built a home for Indian girls at Alert Bay, at a cost of close to \$20,000. At the time of my visit in November, this building was almost completed, and the contractor stated it would be finished by the close of the year. This institution presents a fine appearance and is thoroughly modern in all its arrangements. It has accommodation for 30 pupils. This should prove a valuable acquisition to the department's educational system, as in the past, there has been no boarding school in the Kwawkewlth agency for the education of Indian girls. The furnishings for this institution have recently been purchased by the department at a cost of approximately \$2,000.

Alert Bay Day School (Church of England).

I visited this school on November 24, 1911. The teacher was Mr. William Brotchie, an educated Indian of the Nimkish tribe. There were 13 children present at the time of my visit, and Mr. Brotchie reported that they made fair progress when they attend regularly. They all had enjoyed good health during the year. This building is in a first-class state of repair, it being comparatively a new structure. This school room is to be used in connection with the Girls' Home.

Gwayasdums Day School (Church of England).

My visit to this school was on November 22, 1911. The Indians all having left Gwayasdums, the school teacher had moved with them to Kingcome Inlet. The school is in charge of Mr. Herbert Pearson, the missionary, and is very poorly attended. On the day of my visit there were only 3 children present, out of 17 on the roll. The average for the previous quarter had only been 1.66, and the prospect seemed to be very poor for the December quarter. The poor attendance is due to the fact that the Indians keep moving about to the various reserves and take their children with them, there rarely being at any time enough children at home to make a fair attendance. Mr. Pearson was discouraged at the poor attendance, and did not have any hope of things improving in the future. It would appear to be a waste of money to continue the grant for this school under the present conditions, and could be put to a better purpose by applying it to improvements on the Industrial School at Alert Bay and increasing the accommodation.

Cape Mudge Day School (Methodist).

On the day of my visit to the Cape Mudge reserve, July 21, 1911, this school had been closed to allow the children to take part in the fishing. Rev. J. E. Rendle, the missionary and teacher, reported to me that there had been a very good attendance

SESSIONAL PAPER No. 27

during the June quarter, the average being 11.63, out of 16 pupils enrolled. He also reported that their health had been good and that the children were making fair progress in their studies. There were no water closets in connection with the school, but were much needed.

NEW WESTMINSTER AGENCY.

Coqualeetza Industrial Institute (Methodist.)

I inspected this school on October 5, 1911. The school is situated at Chilliwack. The staff consists of the Rev. R. H. Cairns, principal; Miss Pittman, senior teacher; Miss Clarke, junior teacher; Miss Holtrop, matron and Chas. Reid and Wm. Allen, trades instructors. There were 87 pupils in attendance—51 boys and 36 girls.

I heard some of the pupils at their lessons, and found they were making good progress. Generally speaking, the health of all the pupils had been good during the year, though a slight epidemic of measles and mumps had prevailed during the month of September. They were, however, all light cases and no after effects were anticipated. There had been no tubercular troubles during the year up to the time of my visit. Besides their regular studies, the boys are taught general farming, truck gardening and carpentry, and the girls dressmaking, laundry work, cooking and general housework.

The dormitories and class-rooms were in a clean condition. Studies in hygiene are given daily, and fire drill is practised at regular intervals. Fire-fighting appliances are always kept in place.

The building is heated and ventilated by means of the Smead-Dowd system, and city water is laid throughout the school.

The farm consists of 85 acres of land and produced good crops of vegetables, oats, hay and small fruits, though the crop of apples had been a failure. There are 20 head of cattle, 7 horses, 1 brood sow, and 75 chickens on the farm.

St. Mary's Mission Boarding School (Roman Catholic).

My visit to this school was on October 6, 1911. The staff was Rev. P. Collins, principal; Rev. Father Rohr, chaplain; Sister Benedict, superior; Sister Mary Rogation, Sister Mary Zephirin, Sister Mary Veronica, and Sister Mary Willhemmin, teachers; Sister Mary Paulin and Sister Mary Agnes, cooks.

There were 67 pupils on the roll, 34 boys and 33 girls, all making good progress in their studies. The boys are also taught farming, gardening and carpenter work, and the girls dressmaking, knitting, fancy-work and general housework.

During the summer there had been an outbreak of small-pox among the pupils, but as it was of a very mild type no deaths occurred. One death was reported for the year, the cause being heart disease. Outside of the epidemic spoken of above, the general health of the pupils had been all that could be desired.

First-class crops of vegetables and fruits, of all kinds, had been raised on the farm belonging to the school, which consists of 300 acres, 150 of which are under cultivation. There had been 7 acres of land cleared during the year.

A shingle mill has been established in connection with the school, at which about 250,000 shingles had been manufactured, a large number of which had been used by the pupils in shingling the church.

The whole building is kept scrupulously clean. The principal meditated erecting two new buildings this year, to be used as dormitories and class-rooms, for both the boys' and girls' schools.

There is a first-class water supply. Fire-fighting appliances are kept in place, and fire drill is practised regularly.

Regular studies are given in hygiene, in which the pupils appear to take considerable interest.

3 GEORGE V., A. 1913

Squamish Mission Boarding School (Roman Catholic).

I visited this school on October 7, 1911, and on February 9, 1912. The staff are, Sister Mary Amy, principal; Sister Felician and Sister Heuronymia, teachers; Sister Mary Eugene, matron.

There were 50 pupils in attendance in October and 46 in February. The pupils are mostly making good progress in their studies and are reported to be very obedient. Regular daily lessons are given in hygiene. There had been no sickness among the pupils during the year.

The building was in a good state of repair and is kept very clean. The ventilation is by means of keeping the windows open. Automatic flushing tanks are installed in the water closets. There is a first class water supply on the premises, and the building is heated with hot-air and lighted with electricity.

The garden consists of a four-acre piece of ground, which yielded a good supply of vegetables for the school, though the fruit crop had been a failure.

Besides their regular studies, the boys are taught gardening and general handy-work, and the girls dressmaking, laundry-work, fancy-work and general housekeeping.

Upon my visit in October, I found that the sleeping quarters for the boys were crowded and recommended that at least five beds be placed in another room which had been vacant. Upon my visit in February, I found that my recommendation had been carried out and it has thus relieved the overcrowded state which had prevailed before.

Sechelt Boarding School (Roman Catholic).

I visited this school on October 10, 1911. The staff consists of Sister Theresine, principal; Sister St. Ouen, matron; Sister St. Denis, Sister Mary, and Sister Octavia, teachers.

There were 49 pupils on the roll, 24 boys and 25 girls, the grant being for 50. The pupils were making good progress in their studies, and the discharge of seven had been asked for. Their health had been all that could be desired during the past year, there having been no epidemic of any kind amongst them.

Combined with their regular studies, the boys are taught carpentering, gardening and general handiwork, and the girls learn dressmaking, housework cooking and basket-work. Fire-drill is practised regularly and the fire-fighting appliances are kept in place. Studies in hygiene are given each day.

The garden consists of about four acres, and a good crop of vegetables had been obtained during the summer. One and a half acres of ground had been cleared during the year. This will also be used for garden purposes.

During the present year, it is intended to add a new wing to the main building in order to overcome the overcrowding in the boys' dormitory.

The water supply at this school is very poor during the summer months, owing to the fact that the flume was old and in a leaky condition. This flume also supplies the Indian houses at the Sechelt village, and in all probability it will be replaced by a wood pipe line during the coming summer.

The live stock consists of 4 cows, 3 goats, 125 chickens, 5 geese, and 10 rabbits.

Sliammon Day School (Undenominational).

My visit to the Sliammon reserve was on Saturday, October 14, 1911, and the school was closed for the day. The teacher was Mr. J. W. L. Brown. Mr. Brown informed me that the children had been making good progress. The register showed an average attendance for the September quarter of 9.44, but during the June quarter it had been 21.87. The health of the children had been good during the year. The building was in a good state of repair. Mr. Brown has since resigned his position as teacher, and it will be necessary to obtain another.

SESSIONAL PAPER No. 27

WEST COAST AGENCY.

Alberni Boarding School (Presbyterian).

I visited this school on June 19, 1911. The staff is composed of H. B. Currie, principal; Mrs. Currie, matron; Miss M. A. Grant, teacher; Mrs. J. Stevens, assistant matron.

There were 50 pupils on the roll, 24 boys and 26 girls. These children were all making good progress under the instruction of the new teacher, Miss Grant.

Considerable improvement was noted since my last visit. A new class-room was under construction to replace the old one, and a new bake-shop, laundry and tool-house had been constructed. The greater part of the interior of the main building had also been painted.

There are about 12 acres of land under cultivation, and on this the boys are given instruction in farming and gardening.

Mr. Currie reported that the children had all enjoyed good health throughout the year.

Besides their regular studies the girls are taught cooking, housework and sewing.

The building is heated by means of hot air, and is well ventilated. There is also a good supply of pure water on the premises.

Fire-fighting appliances are kept in place, and fire-drills are practised.

Six pupils had received their discharge during the year.

Ahousaht Boarding School (Presbyterian).

I visited this school on June 15, 1911, which had just then been re-opened after the summer vacation. The staff consists of Rev. J. T. Ross, principal; Miss McIvor, teacher; Miss R. Hall, matron.

There were 30 pupils present, 18 boys and 12 girls, and Mr. Ross reported that the children had been making good progress with their studies. The boys are also taught carpentering, painting and gardening, and the girls, sewing, housework, cooking and laundry-work.

The piece of ground behind the school, 17 acres in extent, promises in the future to be of much value to the school, for the purpose of growing vegetables. Fair results have already been obtained, but the land will need considerable fertilizing to bring it to a high state of cultivation.

There had been two deaths among the pupils since the beginning of the year 1911, but Mr. Ross reported that otherwise the children had been in a healthy condition.

The building is in a first-class state of repair, being comparatively a new one, only having been built a few years. The water supply is poor, and is only obtained by storing rainwater in tanks. In the dry summer months this supply gives out.

The principal proposed moving the boys' water closet from its present location to one nearer the sea, where the excrement would be washed out by the tide. This would in future provide against any foul odours arising from this building.

There are ample fire-fighting appliances on the premises, and the pupils are given regular practice in fire-drills.

Clayoquot Industrial School (Roman Catholic).

I visited this school on June 16, 1911. At the time Rev. P. Maurus was the principal. There were 66 pupils in attendance, 35 boys and 31 girls. All were making good progress in their studies.

The buildings are in the very best of repair, and the school may be classified as being thoroughly modern in every respect. It is heated by hot water, and there are lavatories, bathrooms and water closets throughout the building. There is also a first-class steam laundry.

3 GEORGE V., A. 1913

The amount of land for cultivation is only 4 acres, but upon this, all the vegetables for the school, with the exception of potatoes, are grown.

The water supply cannot be excelled, it being both pure and plentiful.

The pupils all enjoyed the best of health during the year.

Besides their regular studies the boys are taught carpentering, boat-building, and gardening, and the girls sewing, fancy-work, and general household duties.

Fire-fighting appliances are always kept in place.

Clayoquot Day School (Roman Catholic).

I visited this school on June 17. Rev. J. Schindler, O.S.B., is the teacher. He was preparing to re-open the school on the Opitsat reserve, after his return from the Echasis reserve, where the school had been held for the previous three months. The attendance at Echasis school had only averaged 7 pupils out of 20 enrolled, but the attendance when the school is held at the Opitsat reserve is generally much better, and averages 15 out of 30 pupils on the roll. The children had all been well and were making fair progress in their studies.

Kyoquot and Yuquot Day Schools (Roman Catholic).

The day schools at both Kyoquot and at Nootka were closed at the time of my visit, there being no missionary at the former reserve and there not being enough children of school age at the latter to warrant keeping the school open.

Ucluelet Day School (Presbyterian).

On June 30, 1911, there were 18 pupils on the register, 8 boys and 10 girls. The average for the previous quarter had been 9.38. H. W. Vanderveen is the teacher, and reported that the children had been making very fair progress, and that there had been very little sickness among the children on the reserve. The building was in a good state of repair, it only having been built the year previous.

THE REPORT OF MR. A. M. TYSON, INSPECTOR OF INDIAN AGENCIES,
ON THE SCHOOLS IN THE NORTHERN INSPECTORATE, BRITISH
COLUMBIA, FOR THE YEAR ENDED MARCH 31, 1912.

I beg to submit my first annual report on the Indian schools of this inspectorate, as follows:—

BELLA COOLA AGENCY.

Bella Coola Day School (Methodist).

This school, of which Miss Gibson is teacher, was inspected on May 29, 1911. A first-class building had been provided, which is well ventilated, with good sanitary arrangements; and the teacher is doing satisfactory work. On the date mentioned, the number of pupils in attendance was not large, as most of the older children were engaged in garden work, or were looking after the younger children while the parents worked in the gardens.

SESSIONAL PAPER No. 27

Bella Bella Day School (Methodist).

Since my visit to Bella Bella on June 3, 1911, a new teacher has been appointed to take charge of the school in the person of Miss Tranter, and I understand that fairly good work has been accomplished. The school building is in good condition, and the high average attendance very encouraging.

China Hat Day School (Methodist).

June 4, the day on which I visited China Hat, being Sunday, the school was closed. The building was inspected, however, and was found to be in good repair. The school was in charge of Rev. George Reid, who reported the scholars to be progressing quite favourably.

Hartley Bay Day School (Methodist).

I inspected this school on June 7, at which time it was located in a very dilapidated building. A new building has since been erected, however, and the school, in charge of Rev. P. Kelly, is doing good work.

Kitkatla Day School (Church of England).

Inspected on February 2, 1912. The school is located in a fine new building in which the best of sanitation and ventilation has been provided. Miss Gurd is the regular teacher, but was absent in Vancouver at the time of my visit, her brother, Mr. Roy Gurd, being temporarily in charge. The school is being carried on in a very satisfactory manner.

Kitamaat Day School (Methodist).

I visited this school on June 6, 1911, finding a large number of pupils in attendance, and satisfactory conditions prevailing. Miss Lawson, who is in charge, is doing good work, the average attendance at the Kitamaat school being the largest among all the schools of this agency.

Kitamaat Boarding School (Methodist).

This school, which was also visited on June 6, is located in a good building, with fine water supply and sanitary arrangements. Miss Donough is doing satisfactory work, and the children are being well taken care of. Large playgrounds have been provided, enabling the pupils to take advantage of all opportunity for exercise.

NASS AGENCY.

Port Essington Day School (Methodist).

A splendid new school building has recently been completed, but on the date of my inspection, February 29, 1912, the school was closed for lack of a teacher. A large number of children would attend if afforded the opportunity.

Kincolith Day School (Church of England).

I inspected this school on February 9, 1912. The school is located in a fine building, and is one of the best equipped schools in the northern inspectorate. Miss Colli-son is in charge and is doing good work.

Port Simpson Day School (Methodist).

Inspected this school on February 7, 1912. Mr. Richardson is in charge of the senior, and Mrs. Dudoward of the junior pupils. The building is in a fair state of repair, and a large number of pupils attend.

Port Simpson Boys' Boarding School (Methodist).

I visited this school on October 3, 1911. The school was being conducted in as satisfactory a manner as was possible under the circumstances, as the building is in a very dilapidated condition and practically no sanitary arrangements have been made. The matron in charge found it very hard to keep the place clean, but received the aid of the boys under her charge in endeavouring to create as much comfort for the inmates as was possible. Playgrounds should also be provided and, if possible, the school-room should be included in the living quarters.

Port Simpson Girls' Boarding School (Methodist).

This institution, which was inspected on October 3, 1911, is being conducted in a very satisfactory manner. Proper discipline is being enforced by the staff in charge; the sanitary condition of the building is good, and the pupils appeared healthy and clean. A good playground and open-air gymnasium have been provided for the use of the pupils, and proper arrangements are made for their amusement as well as for their education.

Metlakatla Day School (Church of England).

This school, which is in charge of Miss Jackson, is doing good work. The building is in a good state of repair, but a woodshed should be provided for storage purposes

QUEEN CHARLOTTE AGENCY.

Masset Day School (Methodist).

Visited October 9, 1911. The schoolhouse needed painting inside and out, and required supplies in the way of desks for the junior pupils and new blackboards. The chimney also needed repairing. At the time of inspection the school was closed on account of an epidemic of whooping-cough among the children. I was informed, however, that the school, in charge of Mr. McConkey, is doing good work.

Skidegate Day School (Methodist).

Inspected October 25, 1911. Dr. Spencer is in charge, with Mr. Russell as assistant, and much good work is being accomplished. Quite a large number of children attend and they are exceptionally clever, clean and well-behaved. The school building is in a fair state of repair, except part of the floor, which can easily be replaced.

STICKINE AGENCY.

Tahltan Day School (Church of England).

This school was visited on August 11, when there were a large number of children in attendance. Good progress is being made by the pupils of the school, which is in charge of Rev. T. P. Thorman.

Telegraph Creek (Undenominational).

The Indian children of Telegraph Creek attend the public school, which at the time of my visit, was closed for the summer season.

SESSIONAL PAPER No. 27

BABINE AGENCY.

Kitselas Day School (Methodist).

This school, which is located in the village of New Town, was visited on February 13, 1912. It was unfortunately closed at the time of inspection for want of school desks and other supplies. This matter has been taken up, and the requested supplies should be furnished at an early date.

The above is the only school of the Babine agency visited by me during the past year.

GENERAL REMARKS.

I am pleased to report that the children attending the various Indian schools which I visited appeared to be very clean and well-dressed, and I was very favourably impressed with their bright and healthy appearance.

With the exception of the Port Simpson boys' boarding school, the buildings were, on the whole, in fine condition, and are a credit to the department. The matter of playgrounds is, in my opinion, a very important one, and due consideration should be given to the providing of grounds to the various schools requiring same. It would be advisable to take up this matter at the earliest possible date.

In the various boarding schools visited, it was noted that the fire-fighting appliances furnished were being kept in proper place for use in case of necessity.

THE REPORT OF REV. A. E. GREEN, INSPECTOR OF SCHOOLS, ON THE
SCHOOLS OF THE PROVINCE OF BRITISH COLUMBIA, FOR THE
YEAR ENDED MARCH 31, 1912.

NAAS AGENCY.

Lakalsap Day School (Church of England).

Teacher:—Sylvester A. F. Hone, M.D.

I inspected this school April 14, 1911, and found present 36 children; 20 boys and 16 girls. There are 25 boys and 25 girls of school age in the village, and 46 of them are enrolled on the school register, and are classified as follows:—

Standard I.	30
“ II.	16
Total.	46

Average attendance, 15.

Those in Standard II did well in all their subjects, while those in the first Standard did fairly well in reading, writing, spelling, and counting. All could speak English. The singing and physical exercises were very good. Satisfactory progress was being made. Dr. Hone is an excellent teacher.

The old schoolhouse being unfit for use, school was being held in the teacher's house. I assisted the agent and Indians in selecting a site for the new schoolhouse, on which during the year a good building has been erected. This will give the school a better opportunity to do good work.

Kincolith Day School (Church of England)

Teacher:—Miss Elsie M. Collison.

This school was inspected April 15, 1911. There were 12 present; 8 boys and 4 girls. The 36 children of school age in the village are all enrolled, with an average attendance of 18. Many of the people were away from home at the time of my visit. The pupils were graded as follows:—

Standard	I.	14
"	II.	8
"	III.	6
"	IV.	4
"	V.	4
		—
Total		36

The children present did very well in all subjects, and had made reasonable progress since former inspection. The children were very bright and intelligent, they answered quickly and distinctly. A start had been made with the study of hygiene, and the physical exercises.

The Indian council asked for a more experienced teacher, but the leaders in this were those who did not have children attending the school.

The fine new school house was completed but the desks for it had not arrived, but were expected at any time.

Gwinoha Day School (Undenominational).

Teacher:—W. A. Myers.

In April, 1911, I met Mr. Myers with the Indians at their fishing camp. He had lived with them and taught the 18 children of school age for a year. He had done good work, and with the supplies furnished will be able to carry it on. He also teaches the Indians various kinds of work.

Metlakatla Day School (Church of England).

Teacher:—Miss Helena Jackson.

Inspected February 12, 1912. I found 13 children present, 8 boys and 5 girls. There were 37 children of school age in the village, all enrolled, with an average attendance of 15. They were classified as follows:—

Standard	I.	19
"	II.	7
"	III.	3
"	IV.	7
"	V.	1
		—
Total		37

Pupils present did fairly well in reading, spelling, composition, arithmetic, geography, physical drill and singing, good. They are understanding a little of the hygiene, and seem interested. The order in the school-room was very poor. Miss Jackson has taught this school for many years, and done faithful work, but the children seem to have gotten beyond her power of control.

The Indians of this village appear to let the children do as they please, and of course the children expect to do the same in school.

SESSIONAL PAPER No. 27

The school building is in fair repair, but a woodshed is required to keep the wood and coal dry. The school lot should be cleared, fenced, &c., and the teacher could teach a little gardening. The school would then look so much more inviting.

Port Simpson Day School (Methodist).

Teacher:—Lorne M. Richardson, B.A.

Assistant:—Mrs. K. Dudoward.

Inspected February 14, 1912. Present at inspection, 47. There were 120 children of school age on the reserve, 52 boys and 68 girls. 108 of these were enrolled and classified as follows:—

Standard	I.	98
"	II.	4
"	III.	6
Total.		108

There was an average attendance of 39.

Those in the first standard are taught by the assistant during the winter season. She has taught a part of the year for nearly 40 years. She follows the old method, teaching the alphabet by letters rather than by sound, so progress is slow. Pupils did very nicely in counting and singing.

Mr. Richardson teaches the boarding school boys with the seniors in this school. He is an excellent teacher; progress made showed that the children had been taught thoroughly. Composition, drawing, arithmetic, geography, were all good. The answers to questions in hygiene, displayed a fair knowledge of the subject. Calisthenics were well done.

During the summer season many of the children are away from the village, as their people have to leave home to get work.

Crosby Girls' Home, Port Simpson (Methodist).

I inspected the school February 13, 16, and 17, 1912. The staff consisted of:—Miss F. E. Hudson, principal and matron; Miss L. M. Deacon, asst. matron; Miss E. M. Collins, sewing teacher; Miss E. Black, laundry teacher; Miss S. Gray, school teacher.

I found forty girls enrolled, and thirty-nine of them present at the inspection. The one girl absent was in the hospital, being treated for swollen glands. The girls are classified:

Standard	I.	3
"	II.	7
"	III.	3
"	IV.	12
"	V.	10
"	VI.	5
Total.		40

The pupils were examined in the required subjects and showed a good grasp of their work. Their command of English is good. The departmental course of study is followed, and subjects taught are, reading, spelling, writing, drawing, arithmetic, geography, grammar, hygiene, composition, and the little ones kindergarten work. The girls' singing was quite good, some play the organ well. Twelve of them were taking music lessons. I saw some excellent drawings done by the girls. Class-room work was entirely satisfactory.

3 GEORGE V., A. 1913

The general condition of the school-room work is good. This is especially evident in their composition. They are more interested in letter-writing, as a number of the older girls have corresponded with girls of the Red Deer Industrial School in Alberta.

The school room is quite comfortable with seats and plenty of light, and sufficient supplies. The new hyloplate blackboard and the four fine maps received last summer are much appreciated.

In addition to the usual course in general house work the girls are taught darning, reed and raffia work, a little gardening and poultry raising.

I found every part very clean. The sanitation is good, the drainage and sewerage system working well.

The girls are suitably dressed, and looked healthy and well fed.

The building is ventilated by means of windows, doors, ventilators, and transoms.

All necessary appliances are on hand in case of fire. There is a splendid iron fire-escape at the north end of the building.

There is also a large tank, capacity four thousand gallons, connected with the water system. A force pump with three hundred feet of hose attached to it would add materially in case of fire. Fire drill is held, and the girls know their places.

Physical exercises are taught, with proper methods of breathing, &c. To the study of hygiene, a half hour lesson is given each week. Girls are taught to observe the laws of health, and have the chance to put them into practice.

I found the buildings in good repair, laundry and kitchen had been renovated and painted, the floors of pantry, dormitory and hospital room had been painted; classroom and sewing-room painted; all done since the former inspection. The fire escape had also received a coat of paint, and last summer the whole building had a coat of paint put on the outside.

The building can accommodate forty-two pupils comfortably.

The school is in good financial condition having a balance in hand of over one thousand dollars at the time of inspection.

The principal is a capable woman, and the teacher Miss Gray an excellent worker. The staff is doing splendidly, and the school is a model one.

Port Simpson Boys' School (Methodist).

Inspected February, 1912. The staff is composed of Rev. G. H. Raley, principal; Mr. L. M. Richardson, acting principal; Mrs. L. Winters, matron; Miss M. Henry, assistant matron; Mr. V. L. Sansum.

Twenty-six children were enrolled, and twenty-one of them were present at the inspection. Pupils were classified:

Standard	I.	Boys..	11
"	II.		6
"	III.		4
"	IV.		3
"	V.		2
	Total.		26

These boys are taught in the day school by Mr. L. M. Richardson, B.A., who is an excellent teacher. The pupils have improved under his instruction. Those in Standards II. and III. are doing very well in all subjects, while those in IV. and V. had perhaps made more marked advancement. Their lessons in geography, grammar, history were well learned. I had them write letters, and a story from memory. Both letters and story were quite nicely worded. The improvement since former inspection was very noticeable. Pupils are much in advance of the children who live in the village.

SESSIONAL PAPER No. 27

A start has been made in hygiene, the boys seem to be interested, and make some attempt to carry out the lessons practically.

In this school the ceilings are very low, but the windows are kept open for better ventilation. The drains were working well.

Since last inspection a large tank has been placed in position. There are also one dozen buckets filled with water distributed in the corridors, and one hundred and fifty feet of hose, in readiness in case of fire.

The boys go to school both morning and afternoon, and work around the home and mission house morning and evening. As there is less than half an acre cultivated, the boys do but little gardening. A few of the ordinary garden vegetables and small fruits are grown. I think it would be better for the boys if they had more outside work to do.

There is no instructor to teach the boys carpentering, the older boys do a few little repairing jobs, and a little wood-carving.

The sanitary conditions are not up to date, but correspond with the rest of the building, which is really not fit for a home. One serious defect is the lack of recreation space within doors.

The boys are given wholesome food, and are warmly clad.

The water supply is better than formerly. Besides a well, there is a tank for rain water. The ex-pupils show to advantage when compared with the boys of the same age who have not attended school. Generally speaking they are doing well. They are fairly thrifty, nearly all of them still attend the village Sabbath school and the church services.

Better buildings with accommodation for more boys are urgently required. The present building is unfit for the purpose.

The acting-principal has the work, both in the class-room and out of it, well in hand.

Port Essington Day School (Methodist).

At the opening of the year Miss Bland, who was well qualified, was teaching, but was removed on May 4, 1911, and when I visited the school in February, 1912, it was still closed. The Indians waited on me and were very much displeased that the school had been closed. I saw the Church authorities, and they reopened the school on March 4, with Ernest H. Pierce as teacher. He was educated at Columbian College, New Westminster, and while he has not taught before, he should be able to carry it on until a teacher can be secured. There were twenty-two children of school age in the village at the time of my visit, and several others were away with their parents. The Indians informed me that the school opened with an attendance of eighteen; boys, 8; girls, 10.

The new school house was in good shape, ready for use.

Kitkatla Day School (Church of England).

Teacher, George Wright (native).

I met the teacher and was informed by him that he closed the school in January. He had been engaged by the missionary to carry on the school work, but as the missionary did not go there this winter, he (G. Wright) grew tired of it and closed the school to go trapping. Hence I did not visit the village.

Aiyansh Day School (Church of England).

This school was closed at the time of my visit to the Nass River. I saw Mr. Priestly, the teacher who informed me the school had been doing about as usual.

BABINE AGENCY.

Kishpiax Day School (Methodist).

Teacher, Miss F. B. Kemp.

Inspected May 4, 1911. I found 7 boys and 8 girls present. There are 64 pupils of school age on the reserve, 54 of them being enrolled on the school register. The average for the quarter previous to the inspection was 17.

The children were graded thus:—

Standard	I.	35
"	II.	3
"	III.	9
"	IV.	3
"	V.	4
Total.		54

I had them read, spell, and do small sums. They did quite well. The older children were just commencing hygiene. Their physical exercises were well done. The children are taught to grow flowers and watch plant development. Miss Kemp is doing well.

The new school is a great improvement. New desks were required.

I hear that Miss Kemp is no longer teacher at this village. The missionary, Rev. Mr. Lee, has been supplying the latter part of the year.

Glen Vowell Day School (Salvation Army).

Teacher Miss Agnes Law.

Inspected May 4, 1911. There were 14 children present, 4 boys and 10 girls. But there are 30 children of school age on the reserve, all enrolled. The average attendance for six months had been 7. Pupils are enrolled as follows:—

Standard	I.	13
"	II.	9
"	III.	7
"	IV.	1
Total.		30

The pupils were well up in all subjects, even the little ones could count well, and every child in the school could speak English. They seemed to enjoy going through the drills and physical exercises. These children were very clean, well dressed, and very bright.

Miss Law takes great interest in the people, and visits them in their homes. She is competent and successful.

Hazelton Day School (Church of England).

Teacher, Miss E. J. Soal.

Inspected May 5, 1911. I found 23 present, 7 boys and 16 girls. There are 40 children old enough to go to school on the reserve, and all are enrolled, the average attendance for six months being fourteen. Pupils were graded:—

SESSIONAL PAPER No. 27

Standard I.	17
“ II.	14
“ III.	6
“ IV.	2
“ V.	1
Total	40

Pupils did well in all subjects and went through their physical exercises as though they enjoyed them.

The school house is in good repair, the furniture and school material well cared for.

The teacher is doing excellent work.

Rocher Deboulé Day School (Roman Catholic).

Situated $4\frac{1}{2}$ miles east of Hazelton.

Teacher, Rev. A. Godfrey.

When I visited the village the teacher had gone out to get supplies. This school was opened in January, 1911, the Indians were very pleased. There were 19 boys and 19 girls all enrolled, with an average attendance of 18. The children had made a good beginning. All were in Standard I.

The school building is 20 x 30 feet, with ceiling 11 feet high (formerly used for church purposes). The roof was not in very good repair and before long would need re-shingling.

The teacher is energetic and painstaking.

Kitsegukla Day School (Methodist).

Teacher, Miss Hannah Edgar.

Inspected May, 1911. I found 12 children present, 6 boys and 6 girls. The 18 children of school age are all enrolled and classified:—

Standard I.	4
“ II.	9
Ungraded.	5
Total	18

Average attendance, 7.

Nine of those present did well in reading, counting, and geography. The others were beginners. The drill was fair, singing good. Altogether reasonable progress had been made.

The teacher and her mother were taking care of three girls, aged 8, 9, and 12 years, so they could attend school, as their parents were some miles away, but wished their children to go to school.

The log building is 20 x 30 feet, and in need of repair.

Andimaul Day School (Salvation Army).

Teacher, Mr. Duncan Rankin.

I visited this school on May 6, 1911, but the school was then closed, and the teacher absent, so I could find out but little about it. The Indians were divided in their ideas and wishes about this school.

3 GEORGE V., A. 1913

Kitwangar Day School (Church of England).

Teacher, Miss A. Broomfield.

This teacher had had no previous experience and was not very happy in the work. She was leaving a few days after my visit.

There were seven boys and eight girls present. There were thirty-seven of school age, but only twenty-eight of them were enrolled. They were graded:—

Standard	I.	7
"	II.	13
"	III.	4
"	IV.	1
Ungraded.		3
Total.		28

The children could read, write, and spell quite well. Arithmetic and geography, fair. Hygiene fair, physical exercises poor.

The teachers are changed here every year, leaving the school very unsettled. A house is needed for the teacher to live in.

Meanskinisht Day School (Undenominational).

Teacher, Miss A. Tomlinson.

Inspected May 8, 1911. Four boys and ten girls were present. There are sixteen of school age on the reserve, all enrolled with an average for six months of ten. Pupils were classified:—

Standard	I.	3
"	II.	8
"	III.	4
"	IV.	1
Total.		16

Pupils did well in all subjects studied. Those in Standards III. and IV. spelt every word correctly. Arithmetic and geography were good. They went through the physical exercises quite well, singing good. Very reasonable progress had been made since former inspection.

The new school house, 18 x 32 feet, was just completed. It stands on high ground and has a fine appearance.

COWICHAN AGENCY.

Kuper Island Industrial School (Roman Catholic).

I inspected this school in August, 1911. The staff consisted of Rev. P. Claessen, principal; Rev. W. Cortenaad, boys' teacher; J. Lecrom, trade instructor; A. Ruult, farm instructor; Sister M. Evariste, matron; Sister M. Albert, assistant matron; Sister Ethelrude, girls' teacher; Sister M. Stanislaus, cook.

There were seventy children enrolled, thirty-eight boys and thirty-two girls. Of these there were thirty-six boys and twenty-eight girls present when the school was visited. Classified:—

SESSIONAL PAPER No. 27

		Boys.	Girls.
Standard	I.	5	5
"	II.	5	2
"	III.	7	3
"	IV.	11	9
"	V.	4	7
"	VI.	4	2

Total, 64.

As the boys were just back from their vacation, and the weather was extremely hot for British Columbia, the children were hardly up to the mark. The arithmetic was poor; reading and spelling good. There was more excuse too for the older boys, for since the re-opening of school they had been busy harvesting, and had had no time to brush up in their studies.

The girls did well, answering quickly and distinctly. Grammar, composition, geography, very good; map drawing, excellent; arithmetic fair. When questioned the girls could word their answers in very good English. Reasonable progress had been made.

The half-day system is followed, three hours of class work in the forenoon, one hour of study in the evening; then besides general fatigues, they work from 1.30 to 4 p.m. Good order is maintained in the class-room.

The girls' class-room is too crowded, and the desks are very poor, thirty new two-seated desks are greatly needed.

In connection with the school there is a farm of about seventy acres, a little over forty acres being cultivated. The soil is very good. Last year they raised twenty tons of good hay, one hundred and fifty bushels of wheat, thirty bushels of oats, eighteen tons of potatoes, forty bushels of onions.

Some three acres are laid out in a nice garden, with vegetables for school use. The orchards had had a smaller crop than that of the previous year.

There are eleven milking cows, one bull, one ox, two horses, seven pigs, twenty rabbits, and two hundred head of poultry. Enough butter is made for school use. The boys like looking after the stock.

The boys do odd jobs around; five of them under the instructor work at carpentry, one boy repairs shoes.

The girls take care of the poultry, learn general housekeeping, and sew for themselves and the boys.

Five of the children were absent on account of ill-health, but the others all looked healthy enough. They are given plain but good food, and are kept warmly clad. There was a poor supply of clothing on hand, but the principal purchased more soon after.

At that time the water supply was good. The drains were working well, but the pipes had been moved some by the heavy swell, and the box covering (the lumber used was too light) broken. The girls' closets were in good order, the boys' fair.

With the exception of the girls' class-room and girls' dormitory (poorly ventilated) the building is ventilated as well as possible by open windows.

In case of fire three dozen fire buckets, two fire axes, one hundred and twenty feet $\frac{1}{2}$ -inch hose are kept in readiness. Fire drill is held twice a month.

Financially, there was a deficit of \$1,051.37 on August 1, but with their good crops they should be able to reduce it during the year.

Most of the ex-pupils live in the neighbourhood of Cowichan, a few in Victoria, and speaking in a general way, all are doing fairly well; a few, of course, have returned to the old ways. At the time of the 'Iroquois' disaster, one boy distinguished himself by saving several lives.

The buildings are in about the same condition as formerly, the principal thinks they are not worth repairing. Several repairs were needed in the girls' dormitory; the

3 GEORGE V., A. 1913

plaster needed fixing and both girls' dormitory and class room are overcrowded. There was plenty of room in the boys' dormitory, but the mattresses were in poor condition, and new ones are required.

One room had been fixed up nicely, showing how a little paint, a little kalsomine, and a little work, will make even an old building brighter.

The grounds around the building have been improved since my previous visit. The boys have a fine place to play, the girls are without a playground and need one very much. A part of the farm had been fenced with a good wire fence, making a decided improvement. The shade trees planted were doing well, the walnut trees, loaded with nuts.

The new barn was in good shape, and first-class in every detail.

The Sisters in charge of the girls' part, work very hard, and I cannot speak too highly of their efforts.

Tsartlip Day School (Roman Catholic).

Teacher:—Miss Helen Hagan.

I visited this school on December 11, 1911. I found 6 girls and 1 boy present. There are 14 children of school age on the reserve, but they have to walk quite a distance to school, and only 11 are enrolled, with an average attendance of about 5. They attend well when at home, but the Indians go away to work. The pupils were graded:—

Standard	I..	7
"	II..	4
		—
Total..		11

The 4 girls in Standard II. did quite well and had made very good progress since former inspection. Those in Standard I. had made some advancement.

The school house is in good repair, clean, bright, and homelike with pictures. Miss Hagan takes great interest in her pupils, and they in turn are much attached to her.

Saanich Day School (Roman Catholic).

Teacher:—Daniel Dick (native).

Inspected December, 1911. After ringing the bell for some time 4 boys came, 2 of them quite small (children of the teacher) and one of the others had attended the public school for whites. There are 9 boys and 6 girls of school age in the village right by the school. The teacher informed me that they would not attend, and that he could not depend on any children but his own. The Indians declared they would not send their children to the present teacher. The teacher is not suitable, and was quite discouraged. I could not find that any progress had been made.

I believe that a lady qualified to teach would have a fair attendance. If something better cannot be done, it would be advisable to close the school.

The building—a poor one—was clean, but cold.

Quamichan Day School (Methodist).

Teacher:—Mr. Ernest J. Bowden.

Inspected December 14, 1911. There were 4 little boys present. There are 18 boys and 12 girls of school age, but only 11 are enrolled, and all are in the first division. The average attendance for the winter months had been 4, and the school cannot get that average more than half the year.

SESSIONAL PAPER No. 27.

The school is conveniently situated near the village, so there is no excuse for the children not attending. It is useless to keep a teacher here unless the attendance improves.

The building was in good repair.

Quamichan Day School (Roman Catholic).

Teacher:—Archie Alexander (native).

The teacher is an ex-pupil of Kuper Island Industrial School. The school was inspected December 13, 1911. I found only 1 little boy present, who could not speak English. There were 11 boys and 18 girls of age on the reserve, but the Indians informed me that they would not send their children unless a white teacher is in charge. The school is very small at present, and unless a suitable teacher can be secured, it would be better to close the school. I could not find the school register.

The building was in fair repair.

Koksilah Day School (Methodist).

Teacher, Chas. A. Dockstader.

Inspected December, 1911. I found eight boys present. There were eleven boys and four girls of school age on the reserve, twelve of them were on the school register, with an average attendance of six. Children were classified:

Standard I.	10
“ II.	2
Total.	12

Results of examination showed their reading, good; spelling, fair; number work, fair; physical exercises and drills, good. Most of the children walk quite a distance, as the church built the school-house in the white settlement, not the most convenient place for the Indians.

The teacher is well qualified, but the school is small.

Nanaimo Day School (Methodist).

Teacher, Rev. W. J. Knott.

Inspected December 15, 1911. I found nine boys and two girls present. There are eleven boys and thirteen girls of school age; eighteen are enrolled with an average attendance of about nine. Pupils were classified:

Standard I.	11
“ II.	6
“ III.	1
Total	18

Those in standards II and III did fairly well in reading and spelling; number work, very good. Standard I did fairly well. Physical exercises, fair.

The school-house was in good repair, and very clean. The teacher is somewhat discouraged by the poor attendance. A number of the most advanced pupils dropped out during the year, their places being taken by those just coming of school age. Mr. Knott is an excellent teacher, and takes great interest in the welfare of the Indians. The register was well kept.

Songhees Day School.

This school was closed when the Indians moved from the old reserve in the early part of the year.

Somenos Day School.

Not opened during the year.

WEST COAST AGENCY.

Alberni Indian Boarding School (Presbyterian).

Inspected in September, 1911. The staff was composed of H. B. Currie, principal; Mrs. H. B. Currie, matron; Miss Grant, teacher; Mrs. J. Stevens, asst. matron.

All of the forty-eight children enrolled were present at inspection, and were graded as follows:

Standard	I.	20
"	II.	4
"	III.	18
"	IV.	1
"	V.	5
	Total.	48

I found that the pupils were making good progress. The seniors read very well, and there was improvement in the expression. They could work out difficult problems in arithmetic, answer my questions in history, and had a fair knowledge of geography. The juniors too, were getting along nicely, the smaller ones getting a good grasp of the English language. The pupils seemed attached to the teacher, and were well behaved in the class-room.

There was a fair supply of necessary materials on hand..

Only eleven of the one hundred and fifty-six acres in connection with this school, are under cultivation. About three acres in oats (gave an excellent crop), two acres were in hay, from which they got five tons, and two acres in summer-fallow.

As considerable building was being done, only a small garden had been planted, but the peas, corn, beets, turnips, tomatoes, potatoes were good.

At the time of inspection they had two horses, three grown cattle and two pigs, with good accommodation for all. Besides the above they had sold that season one horse, one cow, and three head of young cattle. Also one hundred and ten chickens.

Only two of the cows were being milked then. The boys look after the stock, do general farm work, gardening, baking, laundry work, painting, and six of them help with the carpentry.

The housework, sewing, and cooking are done by the girls, who become efficient little housekeepers.

The general health had been good, one little girl had a serious case of pneumonia, but has fully recovered since.

The pupils looked well nourished, and suitably clad, with a good supply in the store room.

The water used is good, and there is a sufficient supply during the dry season.

The present drainage system was in good working order, and satisfactory, but owing to the building of a new laundry, preparations were being made to put in another permanent drain which will make the system now in use still better.

Ladders, fire escapes, fire buckets, are kept in convenient places. There were four Keystone Fire Extinguishers, and four Haverhill Eclipse Extinguishers. Fire drill is held periodically.

SESSIONAL PAPER No. 27

Calisthenics are practised regularly in the open air. I noticed the pupils seemed to think the exercises good fun. The teacher had made a beginning with hygiene, and was trying to impress the pupils with the advantages to be derived from living under improved conditions.

The ex-pupils are located principally about Alberni or on the shores of the Alberni Canal. They earn their living by fishing, road-work, or by working in lumber camp and sawmill. As a rule they are steady, and certainly are a marked improvement over their parents who had not the advantage of a boarding school training. I visited some of them. Three ex-pupils died during the past year.

There had been a great many improvements, the greater portion of the inside woodwork had been painted; the teachers' rooms papered, walls kalsomined, a new Gurney hot air furnace had been installed, two new lead-lined tanks, three feet six inches each way to improve water system, a new building erected 18 x 50 feet, which is to be divided in three parts downstairs, for bake shop, laundry and carpenter shop, while the upstairs will be used as a drying room.

A new class-room 40 x 24 feet had also been built (on a concrete wall with basement and cement floor), the basement is intended for a play-room for pupils during the wet season. The class-room is built with a view to giving every comfort to pupil and teacher, the light coming over the left shoulder of pupils, and ample floor space. The ventilation system is one of the best in any school in my inspectorate.

Everything about the buildings was clean and orderly, the grounds looking better than ever before.

The present principal has been in charge eighteen months, and has the work well in hand. Notwithstanding the many improvements the debt has been wiped out, and there is now a substantial balance on hand.

The members of the staff take a deep interest in their work. The new teacher Miss Grant, sister of the late Principal Grant, of Queen's University, is a very able teacher, and does excellent work. The principal informed me that he was trying to secure a new member for the staff, who was expected to be on duty in a week or two.

Ahousaht Boarding School (Presbyterian).

Inspected in September. The staff consisted of: Rev. John T. Ross, principal; Mrs. J. T. Ross, matron; Miss L. McIvor, teacher; Miss R. Hall, asst. matron.

There were 18 boys and 13 girls on the roll; 1 child not yet enrolled. 30 of the children were from Ahousaht and 2 from Kelsomat; 31 were present at inspection, 1 boy having gone sealing in the Behring Sea. Pupils were classified:—

		Boys.	Girls.
Standard	I.	1	3
"	II.	3	3
"	III.	5	3
"	IV.	4	2
"	V.	6	2

Total 32

The seniors did well, their composition being especially worthy of note. The juniors had improved in arithmetic and spelling. All pupils speak English quite fluently.

The class-rooms (two small ones) were thrown into one by opening the folding doors, this gave sufficient seating capacity.

Only eighteen of the one hundred and forty acres of land belonging to the mission are cultivated. This was reclaimed by draining a lake, and the soil is still poor, but is improving each year, and in time should produce a fair crop. The land this

3 GEORGE V., A. 1913

year yielded about two tons of hay, three quarters of a ton of oats, and a few vegetables.

The garden, due to poor soil and a dry season, was a partial failure, only a few vegetables and very few flowers were raised.

They keep one bull, one milk cow, and about fifty fowls.

The bull (the children call him 'Mr. Dan') is used for ploughing.

The stock is looked after by the larger boys. The boys also bake, do garden work, and several do rough carpentry about the place. The principal gives instruction in house drawing and building construction, and the boys like the work.

The girls learn to bake, sew, weave baskets, and do general housework.

The food was well prepared, and the children looked healthy. All were clothed quite neatly.

Nine months out of the year there is plenty of rainwater, but during the dry months, water has to be taken from a well a short distance from the school, but it is poor. Good water for drinking has to be brought from some distance by canoe.

The drains were working well.

Fire appliances are kept on hand, and instruction is given in what to do in case of fire, but in a dry season there would be little water.

The children are instructed in the exercises laid down by the department, and by request use the text book of Hygiene as a 'reader.'

At time of inspection the school had a balance in hand of two hundred and fifty dollars.

The building was in good repair, and well ventilated. I noticed several improvements, a new verandah had been built across one end of the school, an Indian waiting room, a playroom for the girls, and a smoke-house for drying salmon.

I visited eight ex-pupils on the reserve, and found them clean and respectable.

The principal and staff are energetic and deeply interested in the work, doing their best to make the school a success. They frequently visit the Indians of the village, and hold religious services in their little church. The meetings are well attended by the village Indians.

Clayoquot (Christie) Industrial School (Roman Catholic).

Inspected September, 1911. The staff was as follows: Rev. P. Maurus, O.S.B., principal and teacher; Mr. George Sturmer, manual instructor; Sister Mary Clare, matron and laundress. Sister Mary Scholastica, teacher; Sister Mary Clotilde; seamstress; Sister Mary Elizabeth, cook.

Thirty-five boys and thirty-one girls were entered on the roll; thirty-three boys and twenty-eight girls were present at inspection. Pupils were classified:

		Boys.	Girls.
Standard	I.	6	4
"	II	4	9
"	III.	12	4
"	IV.	7	2
"	V.	4	6
"	VI.	2	6
Total 66.			

The reading of the seniors was good, spelling and composition, fair; arithmetic and grammar, fair; geography, poor; singing, good. I was somewhat disappointed in the work of the juniors; questions in arithmetic and geography were not answered readily; their spelling and reading, fair. Of course the children had not long been back from their holidays.

The blackboard in the junior room was sadly in need of repair. There was a sufficient supply of material on hand.

SESSIONAL PAPER No. 27

Only gardening is done; some three to four acres were laid out in vegetables and flowers. There was a good crop of potatoes, cabbage, turnips, and a goodly number of strawberries and raspberries. A small pasture was seeded in the fall, but was not a success, as the ground was too sour.

There were four milch cows, one bull, one heifer, one steer, one yearling, and two calves. Also one hundred thoroughbred chickens, housed in up-to-date buildings on the Central Farm plan. New fences had been put around the poultry yards.

Ten boys were learning carpentry. They moved the old laundry, made a new addition to it for use as a carpenter shop and shoe shop. They also built a new substantial double track tramway from beach to house, for which it is proposed to use water ballast for hauling up the load cars instead of doing it by hand winch, as had been the practice heretofore. The tram was nearly ready for use.

Six of the boys painted all the outside of the buildings, the fences, and some parts of the inside, and the work was well done.

Three apprentices do all the repairing and half-soleing of worn shoes. Eight boys have learned to prepare the bread dough, and the girls then bake it.

The girls' work consists of sweeping, scouring, cooking, dusting, preparing vegetables, laundering, plain and fancy sewing, &c. Besides their own clothes the girls make the boys' jumpers, shirts, &c. The girls help too in the flower and vegetable gardens.

The senior boys with assistance of extra help cleared a new piece of ground and were taught how to use stumping powder to advantage in removing immense stumps which encumber the ground. The cleared part is to be used for an orchard. The boys cut, split, and house all the firewood for the institution.

One girl had suffered from enlarged glands (in mild form), the others had been exceptionally healthy. At the time of my visit they were well clothed, and looked healthy and well fed.

The water is perfect in every respect. All the drains were working well.

Sufficient appliances were kept on hand in case of fire.

Calisthenics are practised (as prescribed) ten minutes each day. Pupils seem interested in the study of how to take care of their bodies. I advised the teacher to have the senior pupils use the hygiene book as a reader one or two days a week.

I found the buildings well ventilated and in good order. The coat of paint on the outside had greatly improved the general appearance. All the rooms had been cal-somined.

Some ex-pupils are married and live in their own village, some are at the whaling station, some in the Behring sea, some at the canneries. The employers of those I met spoke highly of them.

The principal has improved the school grounds greatly; he, and his excellent staff are doing a great work. The deficit has been greatly reduced.

The Rev. P. Maurus has been in charge of this school from the start, eleven years ago, and it is largely to his untiring zeal that the school owes its splendid success.

The Rev. Frowin Epper had arrived to assume charge of the school just a few days before my arrival.

The day schools in this agency were closed at the time of my visit.

WILLIAMS' LAKE AGENCY.

Williams' Lake Industrial School (Roman Catholic).

This school is beautifully situated in the valley near St. Joseph's river, six miles from William's lake. I inspected it in October. The staff was as follows: H. Boening, principal; J. D. Chiappini, agricultural instructor; Brother Joseph, foreman; Sister J. Gabriel, matron and teacher; Sister Seraphim, teacher of small boys; Sister Alix, teacher of small girls; Sister Fabian, cook; Sister Lydia, assistant cook; Sister Assumption, seamstress.

3 GEORGE V., A. 1913

All of the sixty-five children enrolled were present at inspection, and were classified:—

		Boys.	Girls.
Standard	I.	5	9
"	II.	0	0
"	III.	6	5
"	IV.	3	0
"	V.	8	17
"	VI.	4	8
Total 65.			

In the examinations the geography and history of the girls was especially good, the boys not so good, but still fair. Of the questions asked ninety per cent were answered readily and correctly. Thirteen new pupils were just beginning to understand a few words of English. Progress since last inspection was very satisfactory. The teachers are well qualified.

A start had been made with the 'hygiene.'

The school rooms were in fine condition, plenty of fresh air and light, floors freshly painted, etc. The school material was well looked after.

The land in connection with the school belongs to the O.M.I. Nearly five hundred acres are under cultivation. The land is good, and there is plenty of water for irrigation purposes. About thirty tons of oats, one ton of barley, two hundred and fifty tons of hay had been raised.

In the garden they raised one ton of cabbages, one ton of carrots, two tons of turnips, and pease and onions in a fair quantity, the potatoes had not been dug yet. The small fruits had been a failure on account of very late frosts in the spring.

The live stock was comprised of thirty-two horses, three hundred and fifty cattle, including calves, twenty-five pigs and fifty chickens, with good accommodation for all.

Fifteen cows were being milked, and they had up to the time of my visit made five hundred and fifty pounds of butter, all consumed at the school. A great deal of milk is given to the pupils.

As the carpenter had left, the boys were continuing work under supervision of the principal.

Four of the bigger boys attend to the separator twice every day, and twice a week to the butter churn, while the girls do the finishing to butter and cheese.

The boys attend to any little jobs in plumbing; one boy attends to the mending of shoes for both boys and girls. In the course of the summer four boys painted the floors of several rooms, halls, stairways, improving the appearance greatly.

The girls are instructed in the many branches of housework. They make their own clothing, and part of the boys.

Just after Christmas there was an epidemic of measles throughout the Cariboo, nearly every child in the school had it. At the time of inspection, with the exception of one boy, all were well.

The pupils have all they need in the way of food; a beef is killed every ten days, so the meat is always fresh. Children were well clad, and there was a goodly supply of clothing in the store-room.

There is a good supply of water for ordinary uses, but in case of fire the pressure would be too weak to be of much use. Fire appliances were in evidence in convenient spots.

The children are taught the physical exercises as directed in the book sent out by the department.

The ex-pupils are living on their reservations where they take care of their little plots of land. Some hire out in the white settlements or go teaming on the cariboo road. I visited some of them.

The buildings were sanitary, drainage and ventilation both being good. All the buildings need a coat of paint and the floors in five halls and rooms need to be renewed.

SESSIONAL PAPER No. 27

Since my last visit a new blacksmith shop had been built, also a new flume (125 x 5 x 3), and some sidewalks and fences had been renewed, all the work of the boys.

Financially, the school is in good condition, with a balance of \$500 on hand.

The work of the school is held in respect by the Indians, and there is no difficulty in getting the children back at the appointed time, although some of them have to travel 300 miles to reach the school. In one case especially, a boy, driving a freight team from Ashcroft, found he could not reach home in time for school by his present mode of travel, left his outfit in charge of another Indian and hurried home on horseback, and reached the school on the fixed day.

The principal and his able staff are doing good work and certainly deserve to be encouraged.

KOOTENAY AGENCY.

Kootenay Industrial School (Roman Catholic).

This school is situated at St. Eugène Mission, adjoining St. Mary's reserve. Inspected in November. The staff was as follows: Rev. F. Beck, O.M.L., Sister Justinian, superior; Sister Gervais, boys' matron; Sister Valentina, girls' matron; Sister M. Benedicta, senior teacher; Sister Ernestine, junior teacher; Sister Delphine, seamstress; Sister Lalumiere, cook. Mr. J. M. Smith, farm and trade instructor.

There were 60 pupils enrolled and 18 not yet formally enrolled. All were present at inspection. These are recruited from St. Mary's reserve, from Lower Kootenay, Tobacco Plains, Columbia Lake, and Shuswap reserves.

Pupils were classified in:—

		Boys.	Girls.
Standard	I.	9	9
"	II.	9	7
"	III.	4	6
"	IV.	8	8

The 18 not formally enrolled were in Standard I, had made a start with simple words, and could count up to 50.

I questioned the pupils in all their studies and found that the girls especially had made good progress, and all had a fair knowledge of subjects. Children sing quite well. Hygiene is taught and the teacher is careful in pointing out the practical side of the lessons, care of body, &c.

Children went through the physical exercises in a most satisfactory way; their appearances seem to have improved since my previous visit.

The supplies on hand were sufficient for the present, but new equipment will be necessary when the new building is completed.

The 190 acres of land are under cultivation: 2 in orchard, 6 in potatoe garden, 8 in grain field, 118 in pasture land, and 50 in hay. Last season they raised 60 tons of hay, 5 tons of grain and 29 tons of potatoes.

Six acres are in garden, they have enough cabbage, turnips, carrots, parsnips, beets and onions to last until next season. The orchard is one of the best if not the best in the Kootenay; they sold 150 boxes of fine apples besides having plenty for use in the school. The boys, under supervision of the foreman, take care of the garden.

On the farm are 12 milch cows, 70 head of cattle, 3 pigs, 6 horses, and 50 chickens, 25 turkeys and 12 geese, all well housed, and in good condition.

The boys repair shoes, harness, take care of stock, work in garden and farm.

The girls attend to the many tasks indoors, laundering, cooking, baking, dress-making, dairying, and a little gardening out of doors.

The pupils here seem to be stouter and stronger than the children on the coast. Nearly all the food used is raised on the farm. I saw the supplies on hand, which were of good quality. They were neatly clad.

3 GEORGE V., A. 1913

Financially there was a deficit of \$1,982, due to the fact that they have more children at the school than the regulation number for which the grant is given.

I was assured by white people that knew them that ninety per cent of the pupils are thrifty and a credit. With but few exceptions they seem to be profiting by their education. I saw some of them working at Cranbrook.

The old buildings were clean. I looked around the new building which is being erected, the work is being well done, and it will probably be completed by the middle of this summer.

I was well satisfied with the work of the school, and when the new building is occupied they will be in a position to do even better work.

KAMLOOPS AGENCY.

Kamloops Industrial School (Roman Catholic).

Inspected in November. The staff was made of Rev. A. M. Carion, principal; Mr. L. Viel, trade instructor; Mr. J. A. Rioux, teacher; Sister M. Monica, matron; Sister M. Adolphus, teacher; Sister M. Ovide, cook; Sister M. Odila, assistant matron.

All of the children were present at inspection, 33 boys and 31 girls, and were graded thus:—

		Boys.	Girls.
Standard	I.	12	16
"	II.	6	6
"	III.	3	3
"	IV.	4	6
"	V.	4	0
"	VI.	4	0

Total 64.

The children did well in subjects studied; after reading a story, they could give a synopsis of it, spell any word asked or re-write the story on their slates. Hygiene is taught and the pupils are learning the simple rules of health, and how much depends on the care of the body. The boys had made more advancement than the girls. The teachers are certainly doing good work in the class-room.

The class-room was well lighted, clean and well stocked with the necessary material.

Most of the land (they have about 200 acres under fence) is very poor; ten acres were in alfalfa, and four in garden. Crops raised last year consisted of 20 tons of potatoes, about 6 tons of carrots and mangolds, peas, parsnips and corn. Small fruits are raised too, but there does not seem to be any good location for an orchard.

As the soil is for the most part sandy and dry, there is but little feed for stock, so there are only four horses, five milch cows, and three head of young cattle. For the same reason the calves have to be butchered every fall, and butter can only be made in the spring.

The boys work on the farm and in the garden, and like to take care of the stock. Twelve boys were learning carpentry, others repair shoes.

The girls are instructed in housekeeping, and make clothes for themselves and underclothing for the boys.

Both food and clothing were quite good and sufficient. The water used has to be brought by a gasoline engine at considerable expense to the school.

Some fire appliances were on hand, but more fire extinguishers were required. Drill is held.

All parts of the building were clean, the rooms were fairly well ventilated, by means of windows. There were some improvements made, some floors had been laid;

SESSIONAL PAPER No. 27

a new laundry had been built with large stationary tubs, the work done by boys and instructor.

A new room is needed, as the present work room has to serve the girls as a recreation room as well. A new chapel is needed badly, as the present one is overcrowded. If a new chapel were built, the present one could be added to the girls' dormitory, thus a little more air space would be afforded the girls.

The boys need a good bathroom with two bath tubs, as at present there is no bath in their building. In the summer they bathe in the Thompson river, but in winter it is very awkward, as they can only get a bath by using one of the bathrooms in the girls' building. All the buildings need a coat of paint.

The principal informed me that as the cost of living had increased so much he could not possibly raise the money for the much needed improvements. At present there is a deficit of \$356, but considering the poor land, the expense of pumping the water, and the high price of fuel, the school is run as economically as possible.

If the material were supplied, most of the work could be done by instructor and boys.

I saw a number of ex-pupils, and they appeared to be thrifty; I only heard of one who was not doing well.

KWAWEKWLTH AGENCY.

Alert Bay Industrial School (English Church).

Inspected in October, 1911, and in February, 1912. The staff was as follows: A. W. Corker, C.M.S., principal; Mrs. A. W. Corker, matron; Miss Warrenner, asst.-matron; Eli Hunt, trades instructor; George Luther, teacher; A. David, cook.

Thirty-five boys were enrolled, and thirty-three of them were present at inspection. They were classified:

Standard	1.	4
"	II.	7
"	III.	6
"	IV.	6
"	V.	8
"	VI.	4

Total. 35

The pupils would compare favourably with white children of the same age; both seniors and juniors seemed to have grasped the meanings of the various lessons. Excellent order was maintained in the classes.

The class-room is much too small; the black-boards need re-covering. There were sufficient supplies on hand.

This school has about 410 acres of rather poor land, about 5 of which are under cultivation. Onions, carrots, turnips and greens do quite well; potatoes do not do so well, as there is too much gravel in the soil. Strawberries do well.

Of live stock, they have one horse, two cows, eighteen fowls. The boys have fresh milk to drink daily.

Some of the boys have done splendidly at carpentering. Instructor and pupils had painted the school building. Others have had lessons in plumbing, new wash basins supplied by the department were put in by boys under the instructor's care. The boys do all the chores, and help in the garden. One more acre of land had been cleared since my previous visit.

Ventilation and drainage were both good. The new terra cotta pipes supplied by the department had been connected, and all waste is carried out to sea.

School has fire-appliances on hand, the hose was not in very good order. Every precaution is taken to guard against fire.

3 GEORGE V., A. 1913

Boys have military drill, and drills to show them how to breathe properly. They are instructed in the simple rules of health as shown in books on hygiene, and the anatomy charts. The boys take an interest in this important subject, and try to put in practice the lessons taught.

Some of the pupils that have gone out from this school are logging, two were working at sawmills, some were at the new cannery at Alert Bay, and are fairly thrifty. I heard of two of the ex-pupils that had gone into the potlatch and heathen dance to get wives.

The school building had been painted, a new floor laid in the lavatory, and the dining-room was being repaired at the time of my visit. The new sink supplied by the department makes the kitchen more sanitary than formerly, but there is great need of a new stove and boiler, as the range is worn out, and the present boiler only contains twenty-five gallons, which is not sufficient.

In the top dormitory, twelve of the bedsteads are home-made, unsightly and unhealthy, and eight are those supplied by the department nineteen years ago. The bedrooms are very clean and the best is made of what they have, but twenty new bedsteads would add considerably to the comfort and health of the pupils. Eighteen new wool mattresses and two dozen pairs of blankets are required, and then the light, airy dormitories will be well equipped.

With the exception of garden vegetables, everything has to be bought, as the school has so little cleared land; supplies have to be brought from Vancouver (two hundred and ten miles away). I consider that the school is as economically run as is possible considering the circumstances.

Each member of the staff is interested in the work. The boys are well behaved, and their advancement in class room work is very gratifying.

Alert Bay Day School (English Church).

Teacher:—Wm. Brochie, an educated native, but very slow. I visited the school twice during the year. In February, 1912, there were 3 boys and 5 girls present; 26 of the 28 children of school age, are on the register, with an average of 8. Those present in Standard II did very well in reading, spelling and counting. Those in Standard I had made a start, but not attending regularly, do not advance. The parents take little interest in the school.

The building was in good repair.

Gwayasdums Day School (English Church).

Teacher:—Mr. Herbert Pearson.

I visited the village, but the teacher had gone to Kingcome Inlet, so school was closed. I met the teacher later at Alert Bay, he is quite discouraged. I do not think the children attend often enough to make any headway.

The village is in a very dilapidated condition. At the sight of a stranger, the Indians in blankets, crowd around as in early days.

Cape Mudge Day School (Methodist).

Teacher:—Edward Rendle.

I found 10 children present, 8 girls and 2 boys. There are 16 children of school age on the reserve, 14 on the school register. There had been an average attendance of 9.

The village 'council' has helped to secure a better attendance. The children did well in spelling, reading, and counting. This school has improved quite a little during the year.

The building was being re-shingled, and improved. School supplies were in good order.

SESSIONAL PAPER No. 27

LYTTON AGENCY.

All Hallow's Indian Boarding School (Church of England).

Inspected in June of 1911, and in January of 1912. There were on the staff:—
Constance, Sister Superior C. A. H., principal; Sister Althea, C. A. H. acting principal; Miss Witter, teacher; Miss Flower, asst. teacher.

Of the 26 children enrolled 24 were present at the time of my visit. Pupils were classified:—

Standard	I..	9
"	II..	4
"	III..	1
"	IV..	5
"	V..	3
"	VI..	4
Total..		26

Those in Standards IV, V, and VI did quite well, their composition was excellent; grammar, geography, map-drawing, and arithmetic, all good. They read distinctly, and seemed to understand what they were reading about. The other classes had made reasonable progress. The girls have had regular lessons in hygiene, they have become quite interested, and ask for toothbrushes 'because of the germs.'

The school room was well stocked with the necessary books, &c.

The girls are instructed in every department of housekeeping, do basket weaving, and a little gardening. One-half an acre is in orchard and garden, lately another quarter of acre was cultivated.

The girls are carefully looked after, any that seem rather delicate are given extra milk each day. They seemed in good physical condition, and were dressed neatly.

Sanitary conditions are good, there is plenty of pure water, buildings are carefully ventilated, and the drainage system works well.

All precautions are taken to safeguard the building in case of fire; fire hose with attachments are in readiness, and the older girls are taught to use the hose.

Besides outdoor recreation the girls are taught calisthenics regularly three days a week, even the little girls can do the exercises well.

Most of the ex-pupils have married, and have settled down amongst their people, some have been married to white men. Others were unsteady at first, but since marriage have been doing better.

The buildings were very clean, and in fair repair, a new floor was needed in the playroom, and flush tanks in the two bath rooms.

I saw work done by the girls since my previous visit, some very fine baskets, made by the older girls, a variety of garments, knitting, &c. The girls are learning much that will be, or should be of great benefit to them in after life.

Lytton (St. George) Industrial School (Church of England).

Inspected in August, 1911, and in January of 1912. With the one exception of the trade instructor, the staff is new this year. They are: Rev. Leonard Dawson, principal; Mr. G. Fitzgerald, farm manager and blacksmith; Mr. G. Blackmore, schoolmaster; Mrs. Seddons, matron; Mrs. Overard, laundry teacher; Mr. T. Smith, carpenter; Mr. J. Fairburn, farm hand; Jung, cook.

Only 13 children were enrolled, and 11 were present at inspection. Two of the pupils were in the hospital very sick.

Classified:—

Standard	I.	5
"	II.	3
"	III.	2
"	IV.	3
Total.		13

Of the 11 boys present 7 showed considerable improvement since former inspection. The teacher is trying to give them a good working knowledge of grammar, composition, geography, and arithmetic. They were more willing to study than formerly. A bare start had been made in hygiene and with the physical exercises.

There are 200 acres of cultivated land in connection with this school. Vegetables and small fruits were grown in abundance, and there were good crops of oats, timothy, alfalfa, wheat and barley.

Seven cows were being milked. Children get extra milk at recess at 10.30 a.m. Children have liberal portions of bread, meat and vegetables.

There is a fire escape at the end of each dormitory, and fire appliances are on hand.

Financially, there is no debt. All the buildings were clean and in good repair.

This school is splendidly equipped, there is a good staff, good land, a healthy climate, ample funds, and all that they want is boys. Such boys in the agency, whose education is being neglected should be placed in the school.

Lytton Day School (Church of England).

Teacher, Miss Lily Blachford.

Inspected in January, 1912. There were five boys and six girls present. On the school reserve there are sixteen children of school age, fourteen of them on the school register. Average attendance, nine. Children were graded:—

Standard	I.	10
"	II.	2
"	III.	2
Total.		14

Some of the oldest pupils had gone to boarding and industrial schools, their places being taken by beginners, who were just getting a start. They could read and count a little.

Miss Blachford is a good teacher.

The school building was being improved at time of inspection.

Shulus Day School (Church of England).

Teacher, Mr. Reginald C. Morris.

I visited the school in January, 1912. The former teacher had resigned in November. I was present and helped Mr. Morris re-open the school. There were thirteen children present all in Standard I. There are, however, thirty children of school age on the reserve.

Mr. Morris is well qualified to teach. He moved with his family into the village while I was there. The example of an earnest worker living with his family right in their midst will be of great benefit to the Indians, as the previous teacher boarded at the hotel quite a distance away.

Mrs. Morris is desirous of helping the women, and I believe will be a good teacher.

SESSIONAL PAPER No. 27

.BELLA COOLA AGENCY.

Bella Coola Day School (Methodist).

Teacher, Miss Kate Tranter.

I inspected this school on February 19, 1912. The former teacher had closed the school in May, 1911, and there were then sixty-four children on the register. It was re-opened by Miss Tranter on January 17, 1912. I found five boys and three girls present, the average for the month had been eleven. There are thirty-seven boys and thirty-three girls of school age in the village, but only thirty-five have been home since the school re-opened. They were graded:—

Standard	I.	26
"	II.	6
"	III.	3
Total.		35

Those present were not far advanced, five could read, spell, write and count up to a hundred. Three could not speak English at all. Little progress had been made.

One great drawback here is the fact that the teachers are changed every year. Then too the people are away from the village a great deal. Miss Tranter, with twenty years' experience, is an excellent teacher.

The building is in fair repair, the desks are old. The stagnant water under and around the building should be drained off.

China Hat Day School (Methodist).

Teacher, Mr. George Reed.

I visited this school in February, 1912. There were enrolled eight boys and eleven girls, with an average attendance for December quarter of eleven. The children were graded.

Standard	I.	12
"	II.	4
"	III.	3

Many of the Indians were away at time of inspection. I saw them at a fishing camp.

Those present had improved. This village has improved too during the past year. Mrs. Reed is doing a good work among the women.

The school house is in good repair but needs a coat of paint.

Hartley Bay Day School (Methodist).

Teacher, Mr. Peter Kelly.

I visited this village in February, but as few of the Indians were home, the teacher's wife sick, and there would be no chance for me to get away again for two weeks, I did not remain. The Indians assured me the school was doing well and that they were pleased with the teacher.

Kitamaat Boarding School (Methodist) and Bella Coola Day School (Methodist).

Neither were visited. There is only a steamer once a month to Kitamaat and the captain informed me they would not remain an hour, hence it was useless to go. When I was at Bella Bella there was no steamer going to Bella Coola, so I could not go.

NEW WESTMINSTER AGENCY.

Coqualeetza Industrial School (Methodist).

Inspected in July, 1911, and in January, 1912. The staff was composed of R. H. Cairns, principal; Chas. Reid, farmer; Wm. Allen, carpenter; Mary Hortop, matron; Hannah E. Young, assistant matron; Merida Pittman, school teacher; Isabella Clarke, school teacher; Martha E. Jefferis, sewing teacher; Lina Harding, laundry teacher; Mary Allen, cook.

Ninety-four children were enrolled, and 87 of them were present at inspection. Pupils were classified:—

Standard	I.	20
"	II.	12
"	III.	21
"	IV.	5
"	V.	19
"	VI.	10
Total.		87

Result of examinations: The reading was good and when questioned the pupils answered quickly, using good English, and understood the substance of what had been read. The geography was good; map-drawing, excellent and special attention is given to composition. The departmental book in hygiene is used, the pupils are interested in their new study. Satisfactory progress had been made in both divisions.

The primary class did well too. The little tots are learning to read, to spell, and to count. The teacher uses the blackboard, this appeals to the eye.

Class-room work shows that the teachers must be efficient, trained, and painstaking.

Each child attends school one half of each day.

The school-rooms were warm, bright and comfortable, and well stocked with the necessary materials.

There is a splendid farm in connection with the school, 85 acres are cultivated. The soil is good, and yields good crops. Last year they had 80 tons of hay, 12 tons of oats, 2 tons of wheat, 50 tons of turnips, 5 tons of carrots, and 35 tons of potatoes.

Some 7 acres are in garden and orchard. Large quantities of raspberries, and strawberries are grown, besides all kinds of vegetables. There is a large lawn, and flower gardens in the front of the building.

They have 15 cows, 1 bull (registered), 3 brood sows, 90 chickens, and 7 horses. One team of horses cost \$600.

All the milk is used in the institution.

The boys look after the stock, some do carpentry work, others become proficient as teamsters. All work in the gardens at times.

The girls are carefully trained in all the branches of general housekeeping and plain sewing.

Physically, the pupils all looked quite healthy. They have good food, plenty of milk, are well dressed, and looked happy.

The ventilation is good, with the exception of the laundry. A new laundry is urgently needed, as the present one is not sanitary.

All precautions are taken in case of fire, there are fire-escapes, appliances, &c.

Recreation and exercise: Weather permitting the children play all kinds of outdoor games. They are taught the drills as prescribed in the book sent by the department.

On January the first, there was a balance in hand of \$267.36. Since former inspection a cement block fence had been erected in front of the main building. Other new fences had been put up.

SESSIONAL PAPER No. 27

I have visited a number of ex-pupils of the school, 10 of the 12 visited were prospering, and making use of the varied knowledge gathered at an industrial school.

The staff work well together and are accomplishing good work.

St. Mary's Mission Boarding School (Roman Catholic).

Inspected in July, 1911, and in January, 1912. On the staff there were: Rev. Father V. Rohr, O.M.I.; chaplain; Bro. P. J. Collins, principal; Bro. Lajoie, O.M.I., electrician; Bro. L. Manseau, O.M.I., gardener; Bro. J. Mulvaney, O.M.I., dairy instructor; Sister Mary Rogation, boy's teacher; Sister Mary Benedict, matron; Sister Mary Zephirin, assistant boys' teacher; Sister Mary Wilhelmina, girls' teacher; Sister Mary Veronica, assistant girl's teacher; Sister Mary Pauline, cook, boy's school; Sister Mary Agnes, cook, girl's school; Bro. Collins, O.M.I., farm instructor.

I found 63 children on the register, and 61 of them present at inspection. Children were graded:—

		Boys.	Girls.
Standard	I.	5	2
"	II.	6	6
"	III.	11	5
"	IV.	10	4
"	V.	1	6

Total 56.

The pupils did exceedingly well. They read well, pronouncing words carefully and distinctly. Problems in arithmetic were worked out quickly. Grammar and geography, good. Their writing books were neatly kept. The older pupils are taught hygiene. Some of the children sing and play very well. Marked improvement had been made, generally speaking, in all subjects.

The class rooms were sufficiently well equipped for the present.

Last year they harvested four tons of grain, two tons of pease, twenty-five tons of potatoes, fifteen tons of roots and thirty-eight tons of hay. Nearly three acres had been set apart for the growing of small fruits and vegetables. Approximately, last season, they got from it, one ton of cabbage, one half ton of carrots, one quarter ton of beets, one quarter ton parsnips and three hundred pounds of berries. There was not such a good crop of apples, pears or plums.

There are twenty-five head of cattle, five horses, two colts, thirty sheep, twenty pigs and eighty fowls.

Dairy.—The boys do the milking, and receive practical instruction in the feeding and general care of the stock. They assist with the cream separator, with the churning and butter-making. Some are taught carpentry, others painting. All receive a thorough training in agriculture.

The girls take turns in kitchen, laundry and sewing room, learning many things that will be useful to them in later life.

Sanitary conditions were quite as they should be, rooms were well ventilated; drainage system, good; water for all purposes pure and plentiful. The children have plain but good food, and neat clothing.

As I have said, there is plenty of water, and sufficient pressure to fight fire. Pupils knew their places and were trained to act quickly.

The children have improved in their physical exercises, they go through them to music (the band playing), and keep splendid time.

On the whole, the ex-pupils of this school are profiting by their training, and are fairly thrifty. I visited several of them during the year.

The buildings were in fair repair and very clean. A new building would be a great improvement. The school is in a prosperous condition, the staff, a good one, is trying to do everything in their power to improve the children, mentally and morally.

Squamish Mission Boarding School (Roman Catholic).

This school is situated at North Vancouver. Inspected in July, 1911, and in March, 1912. The staff comprised: Sister Mary Amy, principal; Sister Mary Eugene, matron; Sister Jerome, teacher; Sister Eldefonse, teacher; Sister Anatolie, cook; Sister Ambrosine, assistant cook; Joseph Vannier, gardener.

Fifty pupils were enrolled and all were present when the school was inspected. They were classified:—

		Boys.	Girls.
Standard	I.	8	9
"	II.	7	5
"	III.	7	6
"	IV.	0	0
"	V.	4	4
Total, 50.			

Both boys and girls had improved greatly, and gave entire satisfaction. When asked questions the children spoke promptly and distinctly. Hygiene lessons are given each day.

The class-room was well supplied with material for present use.

Two of the four acres owned by the school are laid out in orchard, flower beds, vegetable garden, etc. The last season they had a good crop of vegetables; apple crop poor.

The live stock consisted of two cows and seventy chickens.

Under the supervision of Mr. Vannier, the older boys are taught gardening, repair shoes, do glazing, etc. The girls are instructed in housekeeping, make beautiful lace and nice baskets.

As to health, the pupils looked in good condition, well fed and well clad.

The school has an abundant supply of good water; the drainage is excellent; the ventilation good.

In case of fire they have on hand eight fire extinguishers, eighteen buckets, two hundred feet of canvas hose, one hundred feet of rubber. Drill is held.

Nearly all the pupils are living respectably, and are quite thrifty.

Since former inspection the dormitory had been enlarged. The building was clean and in good repair.

The pupils seem happy and contented, are willing to work and study, and are fond of their teachers. The teachers are well qualified; the principal and staff are doing excellent work.

There is no debt.

Sechelt Boarding School (Roman Catholic).

Inspected in June, 1911, and in March, 1912. The staff comprised Sister Ther-sine, principal; Sister St. Ouen, matron; Sister Mary Colombe, teacher; Sister St. Denis, teacher; Sister Octavia, teacher; Sister Amelia, cook.

I found forty-one pupils enrolled, and forty of them were present at inspection. They were graded:—

		Girls.	Boys.
Standard	I.	1	1

SESSIONAL PAPER No. 27

I was highly pleased with the progress the pupils had made in their studies, they did exceedingly well in composition, history, geography and arithmetic. They are becoming interested in the study of hygiene, and seem a little more careful about the simple rules of health.

Physical exercises are practised daily.

Class-room supplies were sufficient.

The school has now four acres under cultivation. The crop of vegetables last year was a failure on account of the dry season, and the lack of water for irrigation.

They keep four cows, two goats and eighty fowls, with good accommodation for all.

The boys milk, do a little carpentry, repair fences; others are taught wood-carving, gardening, netting, laundry work.

The girls make butter, mend, knit, darn, cook, etc.

The general health was good, the food was well served, the children's clothes neat.

There is plenty of pure water in the winter, but in the summer the supply is insufficient. The long flume above the pipes is falling to pieces. Drains work well.

Fire drills are held according to instructions of the department, and appliances ever ready.

The ex-pupils are doing well. David, No. 6, and Emily, No. 011, were married on November 7. They are very pleased with the assistance the department granted them.

I found the buildings spotlessly clean; with the exception of the dormitory, which is too crowded, the rooms were well ventilated.

More dormitory room is needed, a larger class-room, and a chapel. I would suggest that a wing be put on the south end of the building about 24 x 35, and the same height as the present building; this would give sufficient accommodation for all purposes.

I wish to say that the principal, Sister Thersine, and her associates, have done, and still are doing, a wonderful work, and that not one of them has received a cent of salary since the school was opened. There is no broder in connection with this school; the garden, the two orchards, the ornamental trees on the outskirts of the grounds, the school itself, all are due to the work and energy of the good Sisters. The gardens and grounds, for plan and neatness, are not excelled by any school in the province, and are a most beneficial object lesson for the village Indians. The accounts were well kept.

Homalco Day School (Roman Catholic).

Teacher, Mr. Wm. Thompson.

Inspected October 26. There were 5 boys and 5 girls present. Number of school age on the reserve, 21, and all are enrolled with an average attendance of 10. Children were classed:—

Standard	I.	7
"	II.	5
"	III.	5
"	IV.	4
Total.		21

Mrs. Thompson has taken care of some of the children when parents were away from the village. The children had made fair progress in reading, spelling, and counting. I hope with a new teacher the school will be more successful.

School supplies were well cared for. The school building leaked a little, but otherwise was in good repair.

3 GEORGE V., A. 1913

Sliammon Day School (Undenominational).

Teacher, Mr. J. W. Browne.

Inspected September 27, 1911. Twelve boys and 6 girls were present. There are 17 boys and 12 girls of school age and all are enrolled. The average attendance for six months had been 23. Pupils were classed:—

Standard	I.	6
"	II.	5
"	III.	18
		<hr/>
Total.		29

The pupils did exceedingly well in composition, reading, spelling, and arithmetic. They had made satisfactory progress. Mr. Browne had forwarded his resignation before my visit.

The building was in good repair.

THE REPORT OF W. M. GRAHAM, ON THE EX-PUPIL COLONY AT FILE HILLS, FOR THE YEAR ENDING MARCH 31, 1911.

In accordance with the instructions I beg to submit my third annual report in connection with the work and progress on the File Hills Indian colony for the past twelve months.

Although the season of 1911 has been, from a farming standpoint, one of the most unfavourable on record, I must say that taking everything into consideration, these people fared well, as they threshed over 70,000 bushels of grain, which was an increase of fully 20,000 over the previous year. The season was very favourable for breaking new land and some 600 acres were brought under cultivation. Nearly 1,000 acres were summer-fallowed, most of which was ploughed twice. Nearly all the Indians had good gardens which provided them with vegetables of all kinds throughout the fall and ample for winter use.

There are a few women in this colony who are taking more than an ordinary interest in the appearance of the premises surrounding their houses. One in particular, Mrs. F. Deiter, has as pretty a flower garden as is to be seen in the district. In it are flowers, shrubs, and various kinds of ornamental and fruit trees. It has always been a pleasure to visit this home.

Fred Deiter is a very prosperous Indian. He has had built by contract one of the finest barns in the district, in fact there are very few better barns between here and Indian Head. It is a frame structure 40 by 22 feet, with high loft and hip roof. The building is set on a concrete foundation and is painted bright red with white finishings. This man has several good frame granaries and a full line of modern farm machinery. He has seven or eight splendid horses, worth from \$200 to \$250 each. He has under cultivation over 300 acres of land, and last year, notwithstanding the fact that he was one of those who suffered most from frost and weather conditions, he threshed 4,378 bushels and fed about 600 bushels in the sheaf. Early in August we estimated his crop as between 8,000 and 10,000 bushels.

There has been a substantial advancement during the year in the farming line. The Indians are steadily increasing the extent of their cultivation and eight or ten of them would be classed as big farmers in any white community, and it may be interesting to cite a few cases of progress. John Bellegarde has under cultivation 210

SESSIONAL PAPER No. 27

acres of which 65 acres were summer-fallowed last season. He threshed 5,383 bushels of grain. John R. Thomas has 180 acres of which 60 were summer-fallowed. He threshed 4,325 bushels. The Flag has 200 acres, of which 60 were fallowed. This man had 3,240 bushels of grain. I am quite safe in saying that had the season been favourable for threshing this fall, each Indian would have had from twenty to thirty per cent more grain. As it was the stooks had to be dug out of the snow, and fully the percentage mentioned above went through the separator with the straw. At the time of writing about twenty carloads of grain have been shipped, and a great deal has been hauled out to the track and sold by the load.

There are few farming communities that are better equipped with farm machinery and horses than are the Indians of this colony. There is a splendid Clyde stallion owned by the community and last year there were about 25 splendid foals. This year I expect twice as many.

Generally speaking these Indians are becoming more economical in the management of their funds, and it is really surprising to see how many of them use their money to improve their condition by buying good mares and machinery, or by building better houses, &c. Among the older residents there is a keen desire to bring their homes and surroundings up to the standard of the white man.

I notice as time passes there is a marked improvement in the manner in which these young mothers care for their children. If a child is sick they send for the doctor. Little or no attention is ever given to the Indian doctor.

There has been comparatively little sickness in the colony during the year and only 3 deaths. One young man died of tuberculosis and 2 young children died at the Elkhorn industrial school of meningitis. There were 10 births.

The cottage hospital which the department is building is about completed. This is a splendid building and when the institution is in full operation it will be a great blessing to the people.

The cost of management of this colony has been reduced to a minimum. Outside of the salaries for oversight and an occasional visit by the doctor, the department pays for nothing.

These people provide very well for their homes, and there is not a single house where signs of poverty are to be seen. All have a year's supply of flour ahead and many of them bought their beef by the quarter this fall. They buy all kinds of household necessities and live quite as well as the average white farmer.

The members of the colony own 2 steam threshing outfits and if the area that is ready for crop next year yields as it should, they will have to buy a third outfit.

At most of the schools the boys are taught band music, but in the past they have not kept it up after leaving school. A year ago the young men of the colony who had a knowledge of music organized a brass band and have held regular practices during this winter. It is to-day one of the finest country bands in this province, and affords them and others a great deal of pleasure, as well as being a profitable way for them to spend their evenings.

There are two churches in the colony, a Roman Catholic and a Presbyterian. Both hold regular services and are well attended.

THE REPORT OF A. NELLES ASHTON, PRINCIPAL OF THE MOHAWK
INSTITUTION (INDUSTRIAL SCHOOL) BRANTFORD, ONTARIO, FOR
THE YEAR ENDED MARCH 31, 1912.

Buildings.—The only building erected during the year was a red brick, shingle-roofed, eleven seated, flush closet (15 feet x 21 feet), lighted by electricity and heated in the winter with natural gas.

The upper girls' dormitory was kalsomined and painted, and two large cupboards for storing bedding, etc., were built adjoining this dormitory.

New floors were laid in the boys' reading room and playroom.

Accommodation.—Accommodation is provided for 125 pupils (70 girls and 55 boys) and a staff of 12, including 3 farm-hands and a gardener.

Attendance.—The average attendance for the year was 123.

Class-room Work.—This covers the full course prescribed by the department. Four pupils, Minnie Gibson, Rheva Miller, Arnold Moses, and Andrew Martin, passed the entrance examination into the high school. Three pupils are at present attending the Collegiate in Brantford. Stenography and type-writing were taken up in the senior school (a class of about 8 pupils). A new Underwood typewriter was purchased during the year.

The school hours are from 8.30 to 12 a.m., and from 1.30 to 4 p.m. in summer, and in winter 8.45 to 12 a.m. and from 1.30 to 4 p.m., and from 7 to 8 p.m. All pupils in Standards IV., V. and VI. have private study from 8 to 9 p.m. Pupils form two divisions 'A' and 'B'; one week 'A' division attends school in the morning and 'B' in the afternoon, the next week the order is changed. The pupils in Standards I. and II. are in school full time throughout the year.

Classification.—

	Pupils.
Standard I.	10
“ II.	16
“ III.	16
“ IV.	19
“ V.	24
“ VI.	44
Total.	129

Farm and Garden.—The cash sales in this department amounted to \$3,251.90. about \$700 less than last year. This was owing to the severe drought. We threshed 368 bushels of wheat, 1,430 bushels of oats, and 447 bushels of barley. Two cars of sugar beets were shipped to the factory. 3,981 lbs. of butter were made and 2,437 lbs. sold to the city.

Industries Taught.—(*Boys work*).—Farming, carpentering, gardening and the care of greenhouses form the principal occupation of the boys, and include the management of a dairy of over 35 cows and the raising of pigs, also the cultivation of plants and flowers for market.

Girls work.—The girls are trained for domestic work, including sewing, dress-making, cooking, baking, laundrying and butter making. They make all their own clothes, also those of the boys, with the exception of the best tweed uniform, an issue of which is purchased every other year.

Moral and Religious Training.—Morning and evening prayers are conducted for the whole school daily, and Divine Service at His Majesty's chapel of the Mohawks at 11 a.m. each Sunday by the chaplain, Rev. R. Ashton. Religious instruction is given daily in the schools and on Sunday from 9 to 10 a.m., 2.30 to 3.30 p.m., and 7 to 8 p.m.

The boys are divided into four sections under monitors, who are responsible for the cleanliness and order of their respective sections. Four section monitresses exercise similar supervision over the girls.

Health and Sanitation.—The general health of the pupils has been good, no sickness of any serious nature during the whole year. We have had, however, three or four bad cases of ophthalmia among the girls, which caused us some anxiety. We were obliged to call in a specialist from the city, who advised isolation, special dietary and a general toning up of the system. The trouble is now practically over.

SESSIONAL PAPER No. 27

The sanitation is good, the drainage being connected with the city sewer. New up-to-date closets have been installed on both sides during the year. Both lavatories have been increased and fitted with modern bowls.

Recreation.—The recreation hours are one hour at noon, two hours in the evening in summer, and one hour in winter, and for school divisions in summer from 4 to 5 p.m., also one half holiday a week.

There is no school from July 17 to August 21. During this time the teachers take their vacation, each pupil has half a day holiday, but the industrial work of the institution goes on as usual.

The boys are furnished in their playground with swings and horizontal bars. They have a field where they play baseball, cricket and football. They also have a bugle band.

The girls are provided with swings, footballs, croquet, skipping ropes, balls, etc. Those who prefer to read are furnished with magazines and books from the school library.

In the winter we built a large rink (ice) for the pupils in the boys' yard and both boys and girls enjoyed the skating and hockey.

Ex-pupils.—Twenty-three pupils were discharged during the year, 13 being girls. Of the ten boys who left, 7 are working with white farmers, one returned to the reserve, one is in hospital with a bad leg (tubercular) and one is continuing his studies in Hamilton.

Of the girls, one is attending the Carlyle Indian school, seven are in domestic service, one is continuing her studies at the Caledonia High School, three are at home on the reserve, and one little girl, Cinderella Reid, is dead.

General Remarks.—New laundry equipment was installed during the year, a metallic washer and an extractor, also a steam boiler, and an electric motor. This lessens materially the work of the pupils. Enough washing is kept out weekly for purposes of instruction.

One hundred new white enamelled iron bedsteads have been placed in the dormitories and add much to the appearance of the rooms and the comfort of the pupils.

Our Cadet Corps, No. 161, took first place in No. 2 Military District (Central Ontario), a fact of which we are justly proud.

THE REPORT OF REV. S. R. McVITTY, PRINCIPAL OF THE MOUNT
ELGIN INDUSTRIAL INSTITUTION, MUNCEY, ONTARIO, FOR THE
YEAR ENDED MARCH 31, 1912.

Accommodation.—The main building furnishes accommodation for the principal and his family, 8 officers and 100 pupils. Owing to an increase in our authorized attendance, additional accommodation is being provided this summer.

Attendance.—The average attendance for the year was 115. Our authorized attendance now is 125.

Class-room Work.—The school work is under the direction of two teachers. The primary pupils are in school full time; the older pupils go to school half time and are engaged in industrial training the other half. The Ontario programme of studies is followed with very gratifying results. Hours: 9 a.m. to 11.45 a.m.; 1 p.m. to 3.45 p.m. A voluntary study period is provided in the evening for the senior classes. Grading:—

3 GEORGE V., A. 1913

		Boys.	Girls.	Total.
Standard	I	16	10	26

Model Class.	1	3	4
		—	—	—
	Total	62	67	129

During the year promotions were made, subject to the approval of the inspector, as follows: Standard I to II 12, Standard II to III 5, Standard III to IV 13, Standard IV to V 7.

Five candidates wrote the High School Entrance examination and all were successful, two having over 75 per cent.

Industrial Work.—The boys are given thorough instruction, under competent officers in all departments of agriculture, including the care and management of horses, cows, pigs and poultry; also, agriculture, gardening (vegetable and floral), fencing, carpentering, cement work, and engineering (steam and gasoline).

The girls receive thorough instruction in housekeeping, baking, cooking, laundry and dairy-work; and also in cutting and making of garments, quilting, knitting, and fancy needlework.

Farm and Garden.—During the year we harvested 45 acres of wheat, 35 acres of oats, 30 acres of corn, 15 acres of barley, 2 acres of roots, 6 acres of potatoes, 100 acres of hay. The garden supplied ample vegetables for home consumption.

Moral and Religious Training.—Incidental moral instruction is given from literature, history, &c., and from current local and foreign events. A moral standard is set for the pupils by a staff of able officers. Morning and evening prayer services are held daily; this includes scripture reading. On Sunday morning the pupils, in charge of officers, attend service at the Colborne Mission. Sabbath school is conducted regularly.

Health and Sanitation.—Situated upon the high banks of the river, our sewage system works splendidly. We have also an excellent supply of spring water piped to all parts of the building.

The health of the pupils has been good except for a serious outbreak of scarlatina last fall. This disease was brought to the school by certain pupils who had been home for holidays. The results, however, were not serious except in two or three cases.

Recreation.—Recreation hours are provided as follows: one hour at noon, and an hour and a half in the evening, in winter, and two hours in summer. The boys play baseball extensively in summer. In winter, skating, hockey, sleigh-riding, tobogganing, &c., are indulged in. Field-days are held from time to time. Hunting and fishing are provided in season.

The girls play various indoor games in winter, as well as skating, sleigh-riding, &c. In summer they play ball, basket-ball, &c.

Ex-pupils.—During the year 9 pupils left the school; 4 boys and 5 girls. Two of the boys truanted: the other two returned to their homes. All of the girls went home; one has since died.

Conduct.—The conduct has been the best in the history of the institution. A home-like atmosphere and a mutual sympathy between pupils and staff exist. Consequently reports and punishments are almost unknown.

General remarks.—This year we added two new departments to our school:—

(a) Music, under the supervision of a competent instructor. The senior girls take this subject and are doing splendid work.

SESSIONAL PAPER No. 27

(b) Model class, under the supervision of the head teacher. Three girls and one boy are in training for the work in Indian schools. They are "making good" in every respect.

THE REPORT OF REV. CHAS. BELANGER, S.J., PRINCIPAL OF THE INDUSTRIAL SCHOOL, WIKWEMIKONG, ONT., FOR THE YEAR ENDED MARCH 31, 1912.

Accommodation.—On account of the fire that took place in February, 1911, the accommodation for both schools is limited, though sufficient for the pupils and their respective staffs. The new buildings are growing up rapidly.

Attendance.—The boys were 75 in number, with two teachers and twelve officers; the girls were 70 with two teachers and 11 officers. The day pupils are not included in these figures.

Class-room work.—The school is governed by the official programme of studies for Indian schools. The time appointed for it, is from 9 to 11.45 a.m., and 1.30 to 4 p.m., with a recess in the middle of each session. There is also another hour of study for home-work, private reading, letter-writing and vocal music. On Saturdays they have twice as much; on Sundays they have two hours.

The boys of the fifth standard were present in class only for two hours and a half daily, the rest of the time being employed at their trades. In the same manner the older girls spend a part of the time devoted to class work, in sewing, dressmaking, knitting and baking.

The pupils are about equally divided into four sections, two for the boys and two for the girls, and are under the tuition of four different teachers; boarders of the lower grades being taught in the same room in connection with the day-pupils.

The pupils were graded as follows:—

Standard	I.	36
"	II.	35
"	III.	34
"	IV.	24
"	V.	16
Total.		145

Farm and Garden.—The farm is managed with a view of supplying the institution with meat, vegetables, milk and butter. It is well stocked with cattle, sheep, horses, hogs and chickens. The work is done partly by the boys, with the help of Indian workmen, under the guidance of an experienced farmer. About one acre is laid out and cultivated as a kitchen-garden.

Industries taught.—The main industry taught to the boys is farming, because it is the best and almost the only means they will have of earning the living when out of the school. Attention is also given to woodworking, baking and shoemaking. Twenty of the older boys were especially instructed in farming, four in wood-working and three in shoemaking. Besides this special training, all the pupils are employed daily about two hours, each one according to sex and ability, at various kinds of labour, such as sweeping, scrubbing, helping in the kitchen and on the farm, sawing and splitting firewood, dairying, gardening and feeding stock. The laundry work is done at the girls' school, with the help of Indian women. The more advanced girls have a daily sewing class. The pupils generally take well to these various kinds of manual labour.

3 GEORGE V., A. 1913

The girls in particular show that they appreciate the zeal of the teachers. Regularly, after they have left school, the village girls come once a week to receive lessons in fancy sewing, crocheting, etc.

Health and Sanitation.—Although slightly crowded, on account of the fire of February 5, 1911, the sanitary condition of the school is on the whole good, owing to the system of hygienic ventilation which is going through at present along with other improvements. The sanitary condition of dormitories, class-rooms, study-halls and refectories is good, ventilation being well regulated.

When weather permits, the pupils very frequently bathe in the bay, and during the midsummer time of hot weather, daily. The boys' dormitory is furnished with bath-room, hot and cold water, and other conveniences. The health of the pupils, in general, has been exceptionally good.

Recreation.—Two hours daily, besides Saturday afternoons, which are given exclusively to recreation. The first Tuesday of each month is a free day for every boy who has given satisfaction throughout the month. The first Wednesday is for the girls. Both schools have playgrounds furnished with suitable games and gymnastic appliances, and play-halls for bad weather and evening recreation in winter. The girls' playground is divided into two parts, one of which is reserved for the smaller girls and the other for the senior ones.

General remarks.—I may say confidently that the school is contributing largely to the elevation of the moral tone and development of habits of thrift and industry, the enlightenment of the mind generally, and improvement of physique among our Indians. Our present pupils appreciate more their training and rise to a higher level than our former ones. They take more interest in reading and develop to a certain extent an intellectual life. A few former Iroquois boys have gone to college in Quebec, and a few of our present boys intend doing the same thing upon leaving school. Another proof of the gradual improvement over their predecessors is the fact of their being fonder of study.

Often, during the year, public entertainments, were given by the girls and boys, and our population in town looks forward with great eagerness to the agreeable hours they spend listening to our promising actors and singers.

THE REPORT OF REV. L. CARRIERE, O.M.I., PRINCIPAL OF THE PORT ALBANY BOARDING SCHOOL, ALBANY, JAMES BAY, VIA COCHRANE, ONT., FOR THE YEAR ENDED MARCH 31, 1912.

Accommodation.—The number of pupils in attendance is between 30 and 40. The staff is composed of one Sister, teaching English, and two Oblate Fathers; one teaching the Indian language, and the other moral and religious matters.

Attendance.—The attendance at school is very regular, as the pupils live and board at the house. Generally, we have at school 14 boys and 20 girls throughout the year.

Class-room Work.—Our class-room work comprises reading and writing of the English and Indian language, arithmetic, geography, grammar, and drawing. The most important subjects taught our Indians is reading and writing, because for many of them it is the only thing they learn. They only stay two or three years at school, and then go back to their hunting grounds.

Farm and Garden.—We are doing a little farming and gardening. Although the soil is fertile, we cannot harvest very much as the climate is too severe. We only have three months of warm weather; carrots, turnips and potatoes are the only veget-

SESSIONAL PAPER No. 27

ables that we can grow; and sometimes they are cut down by the frost. Wild hay is growing profusely, the land being marshy.

Industries Taught.—The industries taught are farming and carpentering for the boys, and sewing and cooking for the girls.

Morals and Religious Training.—One of the Rev. Fathers, takes care of the moral and religious training of the pupils. We have come to the conclusion that the religious training is the best of all for the Indians, morally. It instructs them in their duties towards God and man. First towards God, by uprooting superstitious ideas, and at the same time teaches them what they were created for.

Health and Sanitation.—In general, the health of the pupils is very good, although the change to school life is great, for those Indians who are used to a life in the woods. In fact it is rather hard for them to be shut in the house; but after two or three months they get used to this mode of life and thrive very well.

The epidemics, which are most prevalent, are consumption and scurvy. Out of ten cases we had only two deaths during the year. As soon as we discover a case of scurvy, isolation of the patient is at once made and they are placed under the care of a trained nurse who has made a special study of these maladies.

Recreation.—The recreation of our pupils consist of foot-ball and canoeing in summer, and of skating and snowshoeing in winter. These are the amusements most enjoyed.

Ex-pupils.—Several of our ex-pupils have good positions and are well paid as interpreters and clerks. They are working for the Hudson's Bay and the Révillon Bros., fur trading companies at Fort Albany and Moose Factory and other places. The others go to the woods, fur hunting and trapping in winter, returning in the spring to work all summer for the fur trading companies.

THE REPORT OF THE REV. W. HAYTHORNTHWAITE, PRINCIPAL OF
THE BOARDING SCHOOL, MOOSE FORT, JAMES BAY, ONT., FOR THE
YEAR ENDING MARCH 31, 1912.

Accommodation.—The boarding school was built for a residence, and it is not exactly suited to school purposes. With a little interior alteration there will be ample room to accommodate upwards of 25 children and part of the staff.

Farm and Garden.—Our crop of hay, roots and vegetables last year was very good. We are greatly indebted to the officials of the Agricultural College at Guelph for specially selected seed and valuable advice.

Miss L. Barker, day school teacher, takes a great interest in this branch of study, having taken the teacher's short course at Guelph last year. Elementary lessons in the theory of agriculture are given to all the children during school hours.

Most of the older boys can milk and take their turn in looking after the cattle. They spend a good deal of time in the garden and field during the summer.

Carpentering, painting and general jobbing are taught to a few of the older boys, rather as a help to general usefulness than as a trade.

The girls are taught needlework, knitting, laundry-work and general household management. They also take an interest in flowers.

Moral and Religious Training.—The children attend family prayers in the day school in the morning and in the evening at home. They also have religious instruction for half an hour every morning, besides attending Sunday school once and church service twice on Sunday.

Health and Sanitation.—There has been one death through pleurisy at the school during the year.

The scarcity of fresh food has, as usual, told on the health of the children. Moose meat (our chief supply of fresh food) has been very scarce during the past twelve months. We were, therefore, obliged to fall back on preserved and salt meats. On this diet Indian children quickly fail.

An effort is being made to increase the number of cattle, and so guard against this in the future.

The children more accustomed to salt food are all happy and well.

We are fortunate this year in having two workers on the staff with medical training.

Water Supply.—Prior to this year most of the water has been carried in buckets from the river.

Last summer the boys graded a road from the river to the grounds, so that the horse now does the work both winter and summer. A plentiful supply of good water can be had from the river, 100 yards distant.

Attendance.—The number of children in the boarding school during the year, has been as follows:—

	Boys.	Girls.	Total.
April—June..	10	7	17
July—September..	7	7	14
October—December..	19	6	25
January—March....	19	6	25

Class-room Work.—In the examination held at the close of the year, specially for this report, the children, with one or two exceptions, did remarkably well.

Fire Protection.—The Bishop's school has two flights of stairs to the ground floor; most of the front windows upstairs open out on a low pitched verandah roof giving easy access to the ground. A supply of water is always kept in the attic, and water barrels, pails and ladders are always at hand.

Lighting and Heating.—The school is lighted and heated throughout by oil lamps and wood stoves.

Recreation.—The children know all kinds of games both indoor and outdoor.

The boys are specially fond of their bows and arrows and football.

The girls toboggan and have their walks, but like their elder sisters nothing seems to be so pleasant to them as their talks.

We find it necessary to give the children plenty of time for play and to give them as much freedom as possible.

Ex-pupils.—At present most of the pupils are returned to their homes, as there are practically no situations open for them as yet. The ex-pupils all seem pleased to visit the school at every opportunity. The one or two who have been placed in situations are doing well.

THE REPORT OF MISS SUTHERLAND, PRINCIPAL OF THE BOARDING SCHOOL, CHAPLEAU, ONT., FOR THE YEAR ENDED MARCH 31, 1912.

Accommodation.—There is accommodation for 13 pupils and a staff of 2. During the year the school has been filled to its capacity.

Attendance.—The attendance has been good since October. The pupils were slow in returning after the summer vacation, owing to the uncertainty in the time

SESSIONAL PAPER No. 27

of re-opening. The members of the old staff were home on furlough. A new staff had been secured but the principal was compelled to withdraw his acceptancy at the eleventh hour, through medical advice. Consequently we had no staff ready to begin work in August, and it was September before we could re-open.

Class-room Work.—The old pupils show a steady and satisfactory progress. Necessarily the work of the new pupils, who had no knowledge of English on admission, is very elementary. They, however, are making splendid advance in acquiring the English language.

Farm and Garden.—This department was most disappointing. In spite of much care and labour, the crops both in the large field and the garden were a total failure. On two occasions the potato tops were cut down and blackened by the frost. Though they seemed to revive, the poor season generally in Ontario, was also true of this locality. This was a serious loss and a large addition to the expenditure for maintenance.

Industries Taught.—No regular trades are taught. The boys perform the duties pertaining to the outside management, such as the supply of wood and water for daily needs, mail carrying and general messenger service in providing for the various requirements of the school. The girls are taught all the branches of domestic science.

Moral and Religious Training.—This department is very carefully attended to by the matron. There are daily morning and evening devotional exercises and scripture lesson with practical application showing the beauty of an honest and clean life. The pupils and the staff attend service in the town church on Sunday morning, have their Sunday school session during the afternoon, and as often as can be arranged, a service in their own language in the evening.

Health and Sanitation.—The health of the pupils has been splendid. With the exception of a mild attack of whooping cough, the usual colds and one case of erysipelas, all has been well. All are showing signs of increasing weight, particularly some of the new comers. The premises are kept clean and tidy, all refuse being immediately disposed of, and the rooms are well aired. The ventilation of the main building is much assisted by the use of a separate building for school and class-room.

Recreation.—In winter, tobogganning, snow-shoeing and rabbit-snaring are the chief pastimes, besides the usual indoor games. In summer, canoeing, skipping, marbles and ball games of various kinds are indulged in.

Ex-pupils.—Some are married or living on their reserves or following the chase, not having been long enough at the school to help them make any marked improvement in their mode of life. Others are earning good wages as domestics or laundresses in the villages of Chapleau and Bisco.

General Remarks.—The school had, as usual, many visitors. Among others the following members of the Woman's Auxiliary were welcomed, viz.: Mrs. Hall, president; Miss Hall, dornas secretary; Miss Carter, treasurer; and Mrs. Willoughby Cummings, leaflet editor. The Woman's Auxiliary are naturally much interested in the school, as they supply not only personal outfits and most of the clothing, but have kindly undertaken the salary of the matron. Rev. J. W. Bilby, missionary to the Eskimo, at Lake Harbour, Baffins Land, was another interested visitor, as being engaged in a kindred work.

THE REPORT OF THE REV. SISTERS OF ST. JOSEPH ON THE INDIAN ORPHANAGE, FORT WILLIAM, ONT., FOR THE YEAR ENDED MARCH 31, 1912.

Accommodation.—There is ample accommodation for 80 pupils and a staff of 10.

Attendance.—There are fifty-eight (58) pupils registered during the year. Good progress has been made throughout. One of the pupils is going to try for entrance in June.

Class-work.—The programme of studies required by the department is followed. The school hours are from 9 to 12 a.m., and from 1.30 to 4 p.m.

Farm and Garden.—There is no farm in connection with the house, but we have a large garden, well cultivated. The boys take great interest in planting and keeping the garden free from weeds.

Industries Taught.—The girls are trained in domestic work, including baking, cooking, sewing, knitting, darning, dressmaking and laundry work. The boys are taught to keep their charges neat and clean, to help in the garden and to attend to wood and water.

Moral and Religious Training.—The moral and religious training of the children receives special care. Respect for authority and obedience is continually inculcated and insisted upon. A course of religious instruction is given to the whole school each day; apart from this they attend morning and evening prayers in the chapel.

Health and Sanitation.—All the pupils have enjoyed good health throughout the year, there having been no sickness of any consequence and no deaths. The sanitary condition of the school is excellent, and the buildings are kept clean and well ventilated.

Water Supply.—The building is connected with the city water supply, and thus we are abundantly supplied with water.

Fire Protection.—There is a splendid fire escape of wrought iron pipe from first to second floor and from second to ground floor. The pupils are drilled at frequent intervals in speedily vacating the building day and night. There is 100 feet of hose in each flat and connected with the street water supply.

Heating and Lighting.—The building is heated throughout by a hot water system and lighted by electricity.

Recreation.—The boys and girls have large, well kept playgrounds, where they enjoy all kinds of games, nearly the whole year round. This winter they had a splendid rink and had good skating. The boys play football, while the girls amuse themselves skipping, swinging and playing other games.

Ex-pupils.—Ten pupils left the school during the year. Angeline and Agnes Belleau went to Garden River, at the request of their parents, who needed their help. Marie and Veronica Boucher are at the Mountain Road, near Mission Bay, helping their mother. Joseph Shab is working at the mission. Antoine and Ignatius Wisseau were taken from the school for the summer holidays and did not return. We tried several times to locate them, but could not. Mary Rita Plummer and Agatha Guingwish are working at West Fort William. Jessie Deschamp and Marianne Skeilter are employed as housemaids in the city, and are giving good satisfaction.

General Remarks.—Mr. S. C. Young, mayor of the city, and Mrs. Young, visited the school, and were very much pleased with the work done by the children.

The children gave a concert in the auditorium, consisting of drills, recitation and songs, which was very much enjoyed by a large audience.

Painting and decorating in the interior of the institution has made the house cheery and home-like.

SESSIONAL PAPER No. 27

THE REPORT OF REV. F. T. DODDS, PRINCIPAL OF THE CECELIA JEFFREY BOARDING SCHOOL, SHOAL LAKE, KENORA P.O., ONTARIO, FOR THE YEAR ENDED MARCH 31, 1912.

Accommodation.—There is accommodation for 40 pupils and for six members of staff.

Class-room Work.—We have followed as closely as possible the programme of studies prescribed by the department. The hours are the same as in the public schools. The older pupils take half-day work in the class-room, the other half is given to industrial occupations. Satisfactory progress has been made in all branches of study. Hygiene has received special attention.

Farm and Garden.—We do not grow any grain. The crop of roots and vegetables from our gardens was good. We had 365 bushels of potatoes, 100 bushels of turnips, and an abundance of other roots and vegetables for both summer and winter use. The live stock consists of 2 horses, 2 oxen, 7 cows, 8 young cattle, 2 pigs and 32 fowls.

Industries Taught.—The boys are taught the feeding and care of stock, milking, driving and management of horses and oxen, work on the steamboat and gardening. The girls are instructed in all the departments of housekeeping; kitchen, dining-rooms, dormitories, sewing-room and laundry.

Moral and Religious Training.—There is daily morning and evening worship conducted by the principal. There are also religious opening exercises in the class-room. On Sundays we have in the school, morning and evening services and the Sunday-school in the afternoon. We endeavour to make the moral and religious instruction practical, to implant the idea that Christianity is a vital principal, guiding, controlling and colouring all the activities of life.

Health and Sanitation.—Nearly all the children had chicken-pox during February. No other infectious or contagious disease appeared in the school. The health of the pupils, except a few who were given leave of absence on account of tubercular enlargement of the glands, has been good. Every precaution is taken to keep the school in a clean and sanitary condition. The rooms are all thoroughly scrubbed and cleaned once a week, some of them twice. They are ventilated by trap-doors in the ceiling, and the class-room and children's dining-room by grates also in the chimneys. Cotton cloth is used instead of glass in some of the dormitory windows for additional ventilation.

Recreation.—In summer, boating and swimming are favourite recreations. Baseball and football are practised by the boys, and basket-ball and swinging by the girls. Hockey, skating and coasting are the principal outdoor amusements in winter. Checkers, dominoes, crokinole, music, &c., are practised in the school.

Ex-pupils.—There are 23 ex-pupils living, 16 boys and 7 girls. The girls are all married, except one who is working in Kenora. Two only of the boys are married. The others make their homes with their parents or friends on the reserves. Some of them are away part of the time, working for white people, and all are doing well.

General Remarks.—The fact that there are more applications for admission than we can accept, and from widely separated districts, is an indication, not only of the confidence the Indians have in the school and its management, but also of the increasing appreciation of the benefit and advantage that education confers upon their children. We try to make their school-life happy and interesting, as well as profitable to the children, so that they may not only acquire useful knowledge which can be applied and put into practice in the future, but that the recollection of their school days will be to them an inspiration, a ray of sunshine to lighten the dark places in their after life, a pleasant, rejuvenating memory.

THE REPORT OF REV. PH. VALIS, O.M.I., PRINCIPAL OF THE BOARDING SCHOOL, FORT FRANCES, ONT., FOR THE YEAR ENDED MARCH 31, 1912.

Accommodation.—When the proposed addition is erected, as the new regulation exacts, there will be ample accommodation for 60 pupils. At present we are authorized to have 52.

Attendance.—The average attendance was 48 children during the two first quarters of the year, and 54 during the two last, 30 girls and 24 boys. Since my instalment as principal in this school, 7 children were discharged, 1 was transferred to the Kenora school, and 1 died, but 12 new admissions filled these places.

Class-room Work.—The programme of studies prescribed by the department is carefully followed. According to the season and the material wants of the school, the elder pupils, boys and girls, are employed a half day in manual labour, according to their strength. Apart from the very busy seasons, they attend class each day, to profit of the five hours of instruction that is given them.

They have a real desire to learn and show that they appreciate the zeal of their teachers.

Industries Taught.—The boys under the supervision of a farmer instructor are employed in the garden and on the farm; three or four among them work at shoemending and seem to have an aptitude for this industry which was inaugurated here this winter.

The girls, under the direction of the Sisters, are trained in the different branches of domestic economy.

Farm.—This school was built in 1905 in the midst of a forest. Since this epoch, of the 63 acres granted the school by the department about 43 acres are under cultivation. The hard labour of clearing this land can only be appreciated by those who live, or have lived, where spruce and tamarack grow.

We certainly do not regret the sacrifice made during the first years. The land, which is very sandy and moist, produces vegetables in abundance, which is a powerful means of helping us to carry on the great work done here. Without the farm, the grant accorded by the government would be entirely insufficient to maintain the school on a good footing.

During the course of this month a disastrous fire (no doubt caused by the carelessness of some smoker, who had spent the night there), destroyed in a few minutes our fine stable built by the generosity of the department in the latter part of 1910. Only the horses and cows were saved; the hens (there were about 175) were all burned, as well as the hay, about 12 tons.

We had completed some very necessary repairs, and this incident is a grievous loss to the school.

Health and Sanitation.—During the year our children enjoyed excellent health. We have had no serious cases of any description and very few colds. One boy died of consumption, which he had contracted during a vacation spent at home.

Moral and Religious Training.—Lessons are daily taught to all the children, and nothing is left undone to form solid habits of virtue in their young souls, that may enable them to continue in the path of right doing when left to themselves.

Recreation.—Outdoor exercise and games are allowed after school hours, as often as the weather permits.

The boys greatly enjoy playing football, while the girls amuse themselves skipping, playing games or taking long walks.

Ex-pupils.—The children who have been discharged remain with their parents and help them in their labours. Their conduct is excellent and they show that their training has been of real value to them.

SESSIONAL PAPER No. 27

THE REPORT OF REV. P. BOUSQUET, O.M.I., PRINCIPAL OF THE
KENORA BOARDING SCHOOL, KENORA, ONT., FOR THE YEAR
ENDED MARCH 31, 1912.

Accommodation.—Our school has ample accommodation for 60 pupils and the necessary staff.

Attendance.—The attendance for the year 1912 has been good. There were 51 pupils enrolled at the end of March, 26 boys and 25 girls.

Class-room Work.—Two teachers have charge of the classes, in separate rooms, and they follow the programme of studies authorized by the department. The progress of the pupils is encouraging.

Farm and Garden.—We do not attempt any farming, but we grow enough vegetables to supply the needs of our school.

Industries Taught.—The boys do the work around the school, such as chopping wood, ploughing, gardening, likewise attending stock. Some of them are able to do a little carpentry work and shoe-making.

The girls are instructed in domestic work, including housekeeping, baking, cooking, washing, sewing, &c.

Moral and Religious Training.—The moral and religious training of the children is carefully and strictly attended to. Besides their daily religious exercises, morning and evening, they are instructed in the doctrine of the Roman Catholic belief.

Health and Sanitation.—The health of the children has been exceedingly good. There has not been a serious case of sickness in the house.

When the weather permits the pupils frequently bathe in the lake and some of them are very good swimmers.

Recreation.—Outdoor games, weather permitting, are heartily encouraged. Football in summer, skating in winter, still retain their place as the most popular games amongst the boys.

The girls have swings, skipping-ropes, croquets, &c., with which they enjoy themselves.

Ex-pupils.—The ex-pupils are doing very well. Some reside on their reserves and they help their parents in trapping. Others make their living in cutting cord-wood and logs and give general satisfaction.

Nearly all the girls are married. When the girls are free from the old patriarchal system and have their own little homes, they are very neat, clean and capable.

General Remarks.—Too much praise cannot be given to the employees of the school, especially the Reverend Sisters, for the great zeal with which they have worked at the difficult task allotted to them.

In closing this report, I wish to express my sincere thanks to Mr. J. A. J. McKenna, inspector; Mr. R. S. McKenzie, our agent; and Dr. Hanson, who on every occasion have shown a very favourable interest in our work.

THE REPORT OF MR. A. E. WILSON, PRINCIPAL OF THE ELKHORN
INDUSTRIAL SCHOOL, ELKHORN, MANITOBA, FOR THE YEAR
ENDED MARCH 31, 1912.

Accommodation.—The school has accommodation for 85 children and a staff of 12.

Main building.—On the top floor a new water tank of galvanized iron was substituted for the lead tank (of similar capacity) and in November, for purposes of water supply, a new three horse-power gasolene engine was installed in the basement in place of the old $1\frac{1}{2}$ horse-power which was worn out.

Attendance.—Our attendance is now 77-43 boys and 34 girls.

Class-room Work.—Attendance is on the half-day system, part industrial and part class-room work. Recent admissions have been all below the average in education and ability to speak English, so the standard is low at present, but the pupils are advancing rapidly now that they are mastering the language, and the June examinations showed that even then good progress has been made in nearly all cases.

The annual prize giving was held on June 30, during my absence at the Lac Seul reserve, when the silver medal annually given by myself to Standard V. was won by John Morrison, who also received the prize for neatness, there being no entries for the late Mrs. Wilson's medal in Standard VI. A prominent feature on the occasion was a really fine display of needle-work by the girls' sewing class.

Farm and Garden.—Inside the pasture about five additional acres of new land were broken and the whole ten acres fenced and sown, part to wheat and part to flax, while about three more acres inside the western fire guard were also put into flax, together with about an acre just north of the principal's house, under shelter of the belt of trees. This latter as a vegetable garden.

The results for the farm were very satisfactory this year, the quality being as usual equal to the best in the vicinity. The returns into storage were as follows:—

Wheat, 1,653 bushels; oats, 898 bushels; barley, 300 bushels; flax, 73 bushels; potatoes, 800 bushels; turnips, 180 bushels; mangolds, 70 bushels; beets, 38 bushels, and for the school garden: Onions, 26 bushels; carrots, 22 bushels; cabbage, 115 head; besides the usual peas, beans, cauliflowers and other vegetables during the summer. The returns for the farm root crops, other than the potatoes, would have been much larger but for the fact that the freeze up came much earlier than usual, some roots being frozen in consequence.

The flower beds made the best showing in the history of the school and the vegetables were equally good. We exhibited at only one fair, getting ten first and two second prizes out of twelve entries.

Industries Taught.—For the boys, general and careful instruction in farming is the main feature, while they also learn carpentering, painting, plumbing and the care of the gasolene engine, with all the incidentals of repair work peculiar to an institution of this kind. A few also work at trades in the town such as harnessmaking, blacksmithing, etc. Practically all show very good results. The smaller boys are fully occupied with the daily chores and the care of the garden and grounds.

The girls are instructed in all household duties including kitchen, laundry and sewing room. At the local fair this summer, Mary Jane Rose, the only entry from the school, won second prize for biscuits and 'Highly Commended' for bread.

Except for farm, carpenter and town pupils there is a system of monthly interchange in the work so as to ensure an all round training in the different branches of work.

Moral and Religious Training.—Careful discipline is maintained and stress is laid on the necessity for industry, neatness and obedience, the main points in the industrial training of our pupils, so as to enable them to properly adapt themselves after discharge.

The religious side of their training is carried out by attendance at church, by Sunday School instruction and by carefully keeping before them the high ideals of the true Christian character, by example as well as by precept. Daily prayers are, of course, held both morning and evening.

Health and Sanitation.—We have been very unfortunate this year in the matter of sickness in the school. There have been two epidemics of measles and, as an indirect consequence, there have been several deaths, all due to tubercular troubles

SESSIONAL PAPER No. 27

developed thereby. Again, late in January, there were ten cases of pneumonia, several most serious, but these have all recovered. The latter was considered to be due to confinement in crowded quarters within doors during the spell of very cold weather followed by a few days of comparatively high temperature.

Careful attention is paid to ventilation, disinfection and thorough cleanliness in all connections.

Recreation.—Ample opportunity is given for recreation for both sexes, Saturday being always a half holiday and for summer we have plenty of out door space, including a good football and baseball ground. Our skating rink this winter has been, and is still, a great source of interest, every one benefiting thereby in getting plenty of exercise and fresh air.

Ex-pupils.—I was much gratified by the action of the department in granting me permission to visit several of the reserves this summer thereby not only enabling me to promote the interests of the school, but to meet many ex-pupils who, I am very pleased to say, were all reported as having profited by their training and experience here. The visit to File Hills was one not only of interest, but of instruction also, for me.

General Remarks.—Early in the year Mr. Smith, who has been farm instructor here for the past 8 years, resigned his post, which he has filled with much benefit to those under him. We had the pleasure in April, of a visit from the Rev. Mr. Ferrier, of the Brandon Industrial School, who came with the view of reporting to the department on the installation of the laundry machinery. In May our inspector, Mr. S. J. Jackson, paid his official visit of inspection. Several of the improvements noted herein were due to his suggestions and we have benefited materially thereby.

In June, I visited the Lac Seul reserve, together with the Rev. John Semmens, inspector of Indian agencies, and Mr. R. S. McKenzie, Indian agent, bringing back ten pupils, and in August I returned from the Crooked Lakes and other reserves with three pupils.

In conclusion, after a careful survey of the year's work, I can confidently say that the school has progressed materially and that our pupils are better for their year's experience and under Divine Providence we all hopefully anticipate that the coming year will be one of prosperity and success.

THE REPORT OF REV. T. FERRIER, PRINCIPAL OF THE BRANDON INDUSTRIAL SCHOOL, BRANDON, MAN., FOR THE YEAR ENDED MARCH 31, 1912.

Accommodation.—We have accommodation for one hundred and twenty-five (125) pupils and staff.

Attendance.—The average attendance for the year was ninety-eight (98). This includes two boys and one girl not admitted as pay pupils.

Class-room Work.—The two class-rooms, junior and senior, have accommodation for forty-eight (48) and forty (40) pupils respectively, graded as follows:—

	Boys.	Girls.	Total.
Standard I.	17	7	24
“ II.	6	8	14
“ III.	4	7	11
“ IV.	8	13	21
“ V.	8	8	16
“ VI.	4	2	6

Total number of pupils present, ninety-four (94).

3 GEORGE V., A. 1913

Standard VI., boys and girls, are preparing for High school entrance examinations. All pupils are making good progress and taking great interest in their school work.

Farm and Garden.—This year has been the best of any of our preceding seasons, the yield being as follows:—

Wheat, Red Fife, 22 acres, 646 bushels; Marquis wheat, 9½ acres, 371 bushels; oats, 33½ acres, 2,019 bushels; barley, 14 acres, 595 bushels; corn, 13 acres, fodder, 80 tons and 650 dozen ears table corn; potatoes, 10½ acres, 4,000 bushels; turnips, 3 acres, 4,000 bushels, carrots, mangles and sugar-beets, 4 acres, 1,550 bushels; hay, alfalfa, millet and timothy, 30 acres, 34 tons; hog pasture rape and green oats 20 acres; fruit, 1,000 pounds; onions, 80 bushels; parsnips, 270 bushels; cucumber, citron and squash, 150 bushels; green peas, 30 bushels, cabbage and cauliflower, 1,300 heads; beef, 4,950 lbs. (1911-12); cream, 16,910 lbs.

Industries Taught.—The boys are instructed in farming, gardening, flower culture, stock, hog and poultry raising, carpentry, painting, kalsomining, paperhanging, glazing, repairing machinery and all such work as is required to keep the entire plant in first-class repair.

The girls learn all branches of housekeeping, sewing, laundering and buttermaking under the competent direction of a most efficient staff of lady workers.

Moral and Religious Training. Devotional services are held morning and evening, at which the children take a prominent part by reading the Scriptures and assisting with the singing. Sunday school is held every Sabbath. The boys and girls attend morning service in Brandon every Sunday. We hold a service in the school every Sunday evening. The aim of the school is to implant in each child a higher ideal than the reserve life has given him. We seek to encourage honesty and straightforwardness by trusting them as far as possible. We hope by the exercise of patience and by sympathy to lead them on to the standard set by Jesus Christ.

Health and Sanitation.—The children have been remarkably healthy during the past year. We have had no deaths. The children have suffered a little from a slight epidemic of measles. A couple of the boys and some of the girls have been troubled with a slight attack of papular eczema. The sanitary arrangements are excellent, all drains kept thoroughly clean by systematic flushing. Two rooms are set apart for isolation purposes. The premises are kept scrupulously clean from cellar to garret. Our water supply consists of good spring water from a well on the hillside, pumped by a windmill into a large tank at the top of the building, and conveyed to all parts of the institution. When the wind fails us, an electric pump supplies us with water, from another well which contains equally as good water.

Recreation.—The children are very fond of all kinds of outdoor sports, and have certainly attained a high standard of proficiency in some of the sports. Our boys have proved themselves the equal of the white man at football and running, in fact, in the latter we think them superior. The boys play football, handball, baseball and hockey, and also indulge in swimming, skating and running. The girls play basket-ball and occasionally during the winter time we have skating parties in the evening for the boys and girls. Both boys and girls play all kinds of indoor games in the winter. We try to make the school as home-like as possible, and to give them all the recreation we can, as it assists them to be more contented, besides giving them a better physique.

Ex-pupils.—Almost all our ex-pupils are taking advantage of the training received here, and are making great progress. Some of our boys are located at the colony at File Hills, and are proving themselves to be competent farmers. Others are working for farmers throughout the province. Two of our boys are managing a farm for a Brandon farmer near the school. They attend our Sunday school and evening service. Three of our boys are in Winnipeg and doing well. One of them, J. B. Keeper, is to-day one of the prominent running athletes of Canada. He has been engaged as carpenter in the Canadian Pacific Railway workshops for the past three years.

SESSIONAL PAPER No. 27.

A number of our girls are in service and have proved themselves very efficient housekeepers. Some of our girls are married and settled in various parts of the west. Those who have returned home to the reserve are exerting a good influence on the reserve, showing the results of the training they have received. Many of our ex-pupils have visited the school during the past year, and have inspired our pupils to make themselves as worthy of respect as these graduates.

General Remarks.—The tone of the school at the present time indicates a very healthy state of mind on the part of the pupils. They all seem to be anxious to learn and to prepare themselves to be useful citizens. They want to compare favourably with the white people. Some of our boys have ambitions to enter college after leaving school. Some wish to be efficient carpenters, some first-class farmers, and all, boys and girls, seem to be more ambitious than we have noticed in the past.

While we have had some measure of success in the past years, we are looking forward to still greater success. The department has seen fit to grant us another section of land, and we have installed machinery to work that land in a proper manner. We have a forty-five horse-power gasolene engine, ploughing eight furrows, and we shall need more machinery to cultivate the land as it ought to be cultivated for intensive and mixed farming.

The produce from this farm is in great demand for seed by farmers and some of the prominent seed houses. Our Marquis wheat last year averaged forty-one bushels per acre and was sold at \$2.50 per bushel. A carload of potatoes was shipped to Alberta at \$1.50 per bushel. We wish to retain the reputation we have gained through scientific farming, and in order to do so we shall need proper implements.

In closing this report, I wish to extend my sincere thanks to the officials of the Methodist church and the Indian department for their kind consideration during the year.

THE REPORT OF REV. W. W. McLAREN, B.A., PRINCIPAL OF THE BIRTLE BOARDING SCHOOL, BIRTLE, MAN., FOR THE YEAR ENDED MARCH 31, 1912.

Accommodation.—Under the new regulations, we can accommodate 40 pupils and a staff of 7. The altered building will provide for 75 pupils, a staff of 8 and a principal's residence.

Attendance.—The year began with 54 enrolled and closed with 50, of whom 25 are girls and 25 boys. Seven were admitted. Eight were honourably graduated. Two died from complications following pneumonia and one was dismissed for persistent truancy. The number of grant earners is 50.

Class-room Work.—This department has been interrupted by the promotion of our teacher, Miss E. Macgregor, to a more important post, and by the long delay in procuring her successor, Miss McCurdy, of Halifax. Our senior classes were depleted by the large number of discharges and our junior classes correspondingly enlarged by new recruits. Mrs. W. W. McLaren acted as interim supply for six months.

Farm and Garden.—The school possesses 190 acres and rents 30 more. Next year 55 more acres will be rented for pasturage; 100 acres are now broken, 10 of which were broken this year. Ninety acres were in crop. The garden and cereal returns were good. The root and corn crop was a failure and the hay meadows were drowned out by excessive rains. The total yields of cereals were as follows: Oats, 1,800 bushels; wheat, 600 bushels; barley, 200 bushels. Nearly 20 acres have been brushed off completely, ready for the brush breaker. The stock consists of 12 head of cattle, 5 horses and 42 hogs. During the year there was added to our equipment

one heavy draught team, one set of heavy harness, a binder, one set of sleighs, one set of light harrows, and 6 dairy cows, to replace animals sold for beef. The root cellar was thoroughly overhauled and reeiled.

Industries Taught.—The girls are taught in all departments of housekeeping, including cooking, sewing, knitting, and laundrying. The older ones are also instructed in gardening, dairying and nursing. The boys are taught all phases of mixed farming and the use of tools.

Moral and Religious Teaching.—All the children, when in good health, attend the Sabbath services, morning and afternoon of the Birtle Presbyterian church. The older children attend the Sabbath evening, mid-week and any special services held by the same congregation. The younger children have a Sabbath evening service at home. Morning and evening prayers are conducted by the principal and a half-hour is devoted to Bible study in the class-room.

Health and Sanitation.—The excellent work done by Nurse A. J. Hight, in the Indian hospital, superintended by the school, has kept our general health excellent. Complications following pneumonia carried off two of our brightest pupils. Our high altitude, natural drainage and the possession of a good sewerage system, emptying into a septic tank, provide good sanitary conditions. Our new alterations will provide additional plumbing, a steam heating plant and more systematic ventilation. These, when installed, will give us all the advantages of an urban school. Our chief need in former years, an abundant water supply, has been met through the kindness of Sir William White, of the Canadian Pacific railway, who allowed the school to connect up with the railways new pumping plant in Birtle. Water at a pressure of 45 pounds is now on tap for all purposes. When our alterations are completed, water from the Canadian Pacific railway plant will be used for sanitary and fire purposes, water from the wells stored in the attic tank for cooking and drinking purposes, and soft water stored in large cement cistern outside the building will be pumped by a small water pressure pump to the laundry and bath rooms.

Recreation.—Our location is ideal for outdoor sports. Coasting on our hills, skating, hockey, fishing and bathing at the river, and trapping and hunting along the river or in the woods are much indulged in. Football, baseball and tennis are also enjoyed greatly. Indoor games are played under the supervision of the staff. Fresh air exercise is rigidly enforced upon all. The alterations and additions being made provide over 800 square feet floor area for play-rooms and a gymnasium, 40 feet x 25 feet, under the new class-room.

Ex-pupils.—Thirty pupils have been honorably discharged during the last six years. Twenty-six of these are living. All the seven boys are farming. Of the girls, one is teaching the Valley River reserve day school, two are out in service, eight are married and eight are with their friends at home.

THE REPORT OF REV. H. M. BRASSARD, O.M.I., PRINCIPAL OF THE
BOARDING SCHOOL, FORT ALEXANDER, MAN., FOR THE YEAR
ENDED MARCH 31, 1912.

Attendance.—When I took charge of this school in September last, I found 70 pupils enrolled. We now have 62 pupils regularly admitted and 60 attending school regularly. Besides these, we have 6 children in attendance as day pupils. Their parents are non-treaty people, but there is no other school in the vicinity which they could attend.

Class-room Work.—The programme of the department is followed as closely as possible. The pupils are graded as follows:—

SESSIONAL PAPER No. 27

		Pupils.
Standard	I.	21
"	II.	16
"	III.	12
"	IV.	11
"	V.	8
Total.		68

Industries Taught.—The Reverend Sisters devote themselves to train the girls in all kinds of household work after class hours. Visitors have remarked on the good results of the training received when visiting the school. The boys are taught various outside works, according to age, such as they will need in the future.

Moral Training.—The conduct of our pupils is good.

Health and Sanitation.—The sanitary condition of the building is not very good as we have a very defective system of closets, and we are also obliged to have the gas generator inside of the main building.

Fire Protection.—We have two fire-escapes. There are hose connections and fire-extinguishers throughout the building. The children are drilled as prescribed by the department.

Recreation.—This consists of swings, skipping rope, and many inside sports for the girls. They also enjoy long walks in suitable weather. The boys have many inside games; outside they play football, &c.

THE REPORT OF REV. A. CHAUMONT, PRINCIPAL OF THE PINE CREEK BOARDING SCHOOL, CAMPERVILLE, MAN., FOR THE YEAR ENDED MARCH 31, 1912.

Accommodation.—Seventy-eight children besides the staff can be accommodated in the school.

Class-room Work.—As a rule, all the children are anxious to learn and do their best to meet the wishes of their teachers.

Attendance.—The attendance is very good.

Farm and Garden.—Thirty acres are under cultivation. Besides vegetables, oats, barley and flax are grown.

Industries Taught.—The boys are taught farming, raising cattle and horses. The girls learn sewing, knitting, housekeeping, cooking, baking, dairying and the care of poultry.

Moral and Religious Training.—Each day, one-half hour is given to moral and religious training.

Health and Sanitation.—The health of the children has been very good during the whole year. There was no sickness whatsoever except a few colds now and then.

Water Supply.—A windmill and a gasolene engine draws the water from the river.

Recreation.—The children have recreation in the morning, at noon, at four o'clock in the afternoon and in the evening.

Ex-pupils.—Most of our ex-pupils settle on the reserve. They are doing well. One of the girls has been teaching school with success for quite a long time.

THE REPORT OF REV. G. LEONARD, O.M.I., PRINCIPAL OF THE BOARDING SCHOOL, SANDY BAY, MAN., FOR THE YEAR ENDED MARCH 31, 1912.

Accommodation.—There is accommodation for 50 pupils and the necessary staff. Attendance.—The attendance has been good. The present enrolment is 45.

Class-room Work.—The programme of studies prescribed by the department has been followed and the progress is fair.

Farm and Garden.—We had about 65 acres under cultivation. The crop was remarkably good and was saved in good condition. The garden furnished us with a plentiful supply of vegetables.

Industries Taught.—The boys are taught farming, gardening, the care of cattle and horses and everything pertaining to farm work such as the use of implements, tools, &c. The girls are trained in all the different branches of housekeeping.

Moral and Religious Training.—Special attention is paid to this very important part of education, and our pupils generally behave well.

Health and Sanitation.—The health of the pupils has been very good. Every precaution is taken to keep the school in a clean and sanitary condition.

Fire protection.—There are two fire-escapes from the dormitories and hose connections on each floor, with tanks in the attic. We also have 15 fire-extinguishers.

Heating and Lighting.—The school is heated by steam and lighted by acetylene.

Recreation.—Football, shooting with bows and arrows, fishing, skating and quoits, are the favourite pastimes of our boys. Lawn swing, croquet, skipping ropes and the dressing of dolls are the games best enjoyed by the girls.

Ex-pupils.—Two of our ex-pupils are now farming, the others are working with their parents. They keep steadily at work and generally behave well. There is a great difference between the expupils and the children of the same age who have never attended school.

THE REPORT OF J. A. LOUSLEY, PRINCIPAL OF THE NORWAY HOUSE BOARDING SCHOOL, NORWAY HOUSE, MAN., FOR THE YEAR ENDED MARCH 31, 1912.

Accommodation.—We can provide accommodation for 7 of a staff and 55 pupils. The principal living in a separate building, in connection with the mission, has enabled us to accommodate the day school teacher and sometimes the government doctor.

Attendance.—The attendance this year has been good. The school has been full most of the year.

Class-room Work.—The prescribed course has been followed carefully and good results secured.

Farm and Garden.—About two acres of land only is in shape for use this year. One acre, previously used, has been surrendered to the Indians.

Industries Taught.—Gardening, care of cattle and horses, sewing, laundry, cooking and all other household occupations.

SESSIONAL PAPER No. 27

Moral and Religious Training.—This consists of prayers, night and morning, in the dormitories, reading and explanation of Scripture or hymns, with singing night and morning in the dining room, Sunday school, prayer meeting Wednesday evening in the church, two preaching services each Sunday, one class on Tuesday for the girls conducted by the matron, and one for the boys on Thursday, conducted by the seamstress. Each member of the staff takes every suitable opportunity offered by circumstances of work or play, to apply truth and show the beauties of religious principles.

Health and Sanitation.—There has been a great amount of sickness this year among the people, and as a result, the children of the school have also suffered. Erysipelas was almost epidemic on the reserve and several cases developed in the school, but were attended to with all possible precaution. Perfect isolation was impossible on account of the great numbers sick; the accommodation at the hospital and also in the school being totally inadequate to meet the needs. Peritonitis, erysipelas, consumption and other forms of scrofula have been the chief manifestations of disease.

Recreation.—Each pupil has five periods of recreation each day. Games of many kinds are indulged in, according to the season of the year. Boating, football, baseball, quoits, skating, coasting and long walks are the chief.

Ex-pupils.—Our ex-pupils are almost, without exception, located either here at Norway House, or at Island Lake, a reserve or band of Indians about 200 miles east of here, from where we have received many scholars. They are mostly following the methods of the country in making a living, but are showing the good results of the schooling received in their methods of living. Their homes are cleaner and they are much tidier about their persons. One young woman is a splendid seamstress and has been offered the position in the school, but is staying home to help her mother and brothers, and goes to the homes of white people and earns good wages.

THE REPORT OF W. A. HENDRY, PRINCIPAL OF THE PORTAGE LA PRAIRIE BOARDING SCHOOL, PORTAGE LA PRAIRIE, MAN., FOR THE YEAR ENDED MARCH 31, 1912.

Accommodation.—The school can accommodate 25 pupils with a staff of 4.

Attendance.—The attendance has been good. Five were discharged and 8 were admitted, making the present enrolment 35.

Class-room Work.—The programme of work outlined by the department has been followed. Music is taught the pupils and some of the older girls play the organ nicely. The younger pupils are very apt students and make rapid progress.

Farm and Garden.—The garden produced a good supply of vegetables of every kind, as well as six tons of corn fodder. The school keep 3 cows, a horse and 50 fowl. We hope to rent 10 acres of land and so greatly increase our production.

Industries Taught.—The boys are taught gardening, caring for the stock and poultry. They also do the shoe repairing for the school and help in the painting, kalsomining and general carpenter work around the buildings. The girls learn sewing, cooking, laundry-work, dairy-work and general housework.

Moral and Religious Training.—Morning and evening devotion is conducted in the school. The children attend morning services in Knox church of this city, and also Sunday school in the afternoon.

Health and Sanitation.—The health of the school has been good, except for an epidemic of measles out of which developed five cases of pneumonia, one case proving fatal. The children got plenty of out-door exercise, and ventilation is closely

3 GEORGE V., A. 1913

attended to, so as to secure an abundance of fresh air in the dormitories. The book prescribed on calisthenics and games is used and the games are the source of much amusement to the children in the summer evenings.

Recreation.—The boys and girls have a rink in the winter, on which they skate and play hockey. In summer, the boys play football and baseball, while the girls play basket ball and tennis.

Ex-pupils.—There were five pupils graduated during the year. One boy is in a printing office in this city and is receiving \$9 per week. Another boy works with a farmer on the plains at a good wage. One girl married and has a home on Swan Lake reserve, where she is doing well. Another girl is at service in Swan Lake, where she gives good satisfaction. The third girl is still in the school, where she will remain until she gets a home of her own.

THE REPORT OF REV. E. MATHESON, PRINCIPAL OF THE BATTLEFORD INDUSTRIAL SCHOOL, BATTLEFORD, SASK., FOR THE YEAR ENDED MARCH 31, 1912.

Accommodation.—We have accommodation for about 120 pupils, if we could get that number, and for the staff that would be required to instruct and care for them.

Attendance.—Two pupils, a boy and a girl, died during the year. The cause of the death in each case was meningitis. Fourteen boys and fourteen girls were discharged by instructions from the department. Eight boys and eight girls were enrolled as pupils. We enter upon the incoming year with an enrolment of 48.

Class-room Work.—The courses of studies required by the department is followed, and the pupils are graded from the alphabet up to standard VI. Several of our ex-pupils, of whom two are now ordained missionaries, are engaged in the work of teaching in connection with the Indian schools, or in mission work in Manitoba, Saskatchewan and Alberta.

Farm and Garden.—We have 70 acres cultivated, of which we use about 6 acres for raising vegetables and general garden produce.

Industries Taught.—Farming and gardening, repair work in connection with the farm, the care of horses, cattle, pigs and poultry, kalsomining, painting, glazing, &c., baking, dairy-work, laundry work, sewing, knitting, making and mending clothes, cooking, and general housework.

Moral and Religious Training.—To this we give careful attention, as being the only foundation on which to build up worthy characters and true citizenship. We have the regular Sunday services of the church, Sunday school, a shortened form of morning and evening prayer, with the reading of a portion of the Holy Scriptures each day, and a mid-week service each Wednesday evening. A circle of the 'King's Daughters' among the girls, and the 'King's Sons' among the boys; and a branch of the 'Daily Scripture Reading Union,' to which both boys and girls belong, have been carried on for several years with manifestly good results. These organizations are officered by the pupils, and are carried on under staff supervision.

Health and Sanitation.—There has been good general health and no epidemics during the year. The ventilation of the building is good, a constant supply of fresh air passing through the building, and the sanitary arrangements are attended to carefully.

Recreation.—This consists of swings, football, indoor games and plenty of outdoor exercises.

SESSIONAL PAPER No. 27.

Ex-pupils.—Of those who have returned to their reserves, some have not done as well as one could wish; in many cases their surroundings are very much against them, the old people persistently discouraging them from all efforts in the way of civilized life and practices. But these are not all; there are others of them who have their own portion of land cultivated, their own houses, animals and other property, and are doing very well. Others again there are who have not returned to reserve life, but have struck out to work among the settlers, some at carpentering and some at general work. In this way they gain a knowledge of the settled life of the country, which is a very valuable possession whether they afterwards use it on the reserves, or keep on at work among the settlers, or become homesteaders eventually, as it is hoped many of them will. Some of our ex-pupils are engaged in various places as teachers or helpers in connection with the Indian schools; two have taken a course at St. John's college, Winnipeg, and have been ordained to the sacred ministry of the church. Both are married to English women and are in charge of some of our missions. One of these took his degree of Bachelor of Arts in the University of Manitoba, and is now proceeding to take his B.D. and M.A. Nearly all the girls that have been discharged are married, most of them on the reserves to ex-pupils and others, but several of them are married to white settlers, and are keeping their homes in a creditable condition. While the results may not be in all cases what some might desire, yet we must not expect too much from the first generation when we take all things into consideration. Improvement is very evident; the schools are doing good work, and the leaven of their teaching is seen in the life and work of many of the ex-pupils. The residential schools properly and systematically worked are a true step in the way to solve the 'Indian's Problem.' There is a very marked difference between the tone of the reserve where a considerable number of our ex-pupils are living, and that of those reserves that are without them; and a very noticeable change for the better is the fact that there is no difficulty in getting the children of ex-pupils into our residential schools—a change that can be appreciated only by those who know the difficulties encountered in former years in this work, and still encountered in many cases.

General Remarks.—I have pleasure in bearing testimony to the good work done by the various members of the staff. They have all been devoting their energies cheerfully to help in accomplishing the good work of teaching, training and uplifting the Indian to the plane on which we hope he will stand in the years to come. The prayerful persevering efforts we have put forth will bear good fruit for all time to come.

I beg to thank the officers of the department for the consideration, courtesty and kindness shown by them in their dealings with us.

THE REPORT OF REV. J. HUGONARD, PRINCIPAL OF THE INDUSTRIAL SCHOOL, QU'APPELLE, SASK., FOR THE YEAR ENDED MARCH 31, 1912.

Accommodation.—The school will accommodate 225 pupils and a staff of 15.

Attendance.—The attendance for the year has been satisfactory, the enrolment at the end of March being 223 pupils, 100 boys and 123 girls.

Class-room Work.—The programme of the department has been followed and classification of pupils is as follows:—

	Boys.	Girls.	Total.
Standard I.	41	49	90
“ II.	30	19	49
“ III.	16	26	52
“ IV.	13	16	29
“ V.	0	13	13

The first and second standards attend class regularly for six hours each day, and the pupils in the higher standards attend one-half of the day and work at the different trades and general housekeeping the other half.

Farm and Garden.—Two hundred acres were seeded, but a poor yield was secured owing to frost and unfavourable weather which was general in this district.

Stock.—The live stock consists of 35 head of horses, 32 head of cattle, 48 hogs and about 130 poultry.

Industries Taught.—The branches of industry are farming, blacksmithing, carpentry, shoemaking, painting, and baking. A number of boys are attached to each branch and are employed one-half of the day and attend class the other half.

Moral and Religious Training.—The moral training and general conduct of the pupils are attended to by the vice-principal and teachers. Each day, during the winter months, religious instruction is given the pupils, after class, for one hour.

Chapel is attended morning and evening daily.

Health and Sanitation.—The health of the pupils, for the year, has been good. Sanitary precautions are always taken, premises kept clean, contagious diseases isolated and ventilation attended to. The physician inspects regularly.

Water Supply.—Drinking water is obtained from wells. The water which supplies the house and laundry, also fire protection, is brought from the lake, 300 yards distant, into two, 1,500 gallon, air pressure tanks.

Fire Protection.—Two 50 feet hose lengths, on each flat of the main boys and girls buildings are connected with the air pressure tanks. Besides the above, there are two McRobie, 75 gallon chemical tanks with 50 feet of hose attached, on each flat of the main and girls building. There is an electrical fire-alarm system, with stations placed throughout the different buildings. Fire drills are practised at intervals and every precaution is taken for the saving of life and property.

There are two iron fire escapes attached to each of the three buildings, and 36 Star chemical hand fire-extinguishers are conveniently placed, as well as 12 Eclipse dry dust fire-extinguishers.

Heating and Lighting.—Four Gurney steam boilers are used for heating the school buildings and stoves are used for the shops. Two Siche gas tanks supply light for all school buildings and coal oil is used for the shops.

Recreation.—Football and baseball are the games for summer, and for winter, dramas, concerts and band exercises.

Ex-pupils.—Nearly all discharged pupils return to their reserves and are under the control of the agents.

THE REPORT OF THE REV. S. PERRAULT, O.M.I., PRINCIPAL OF THE
COWESSESS BOARDING SCHOOL, CROOKED LAKE AGENCY, MARIE-
VAL P.O., VIA GRAYSON, SASK., FOR THE YEAR ENDED MARCH 31,
1912.

Accommodation.—We could in the past conveniently accommodate 60 children and a staff of 8, but according to the latest requirements of the department as to air space, our school will need to be enlarged to provide sufficient accommodation for that number. Measures are being taken for this purpose, and we hope to soon have an additional wing built which will afford the required facilities for 60 children.

Attendance.—The attendance is very good. We always have more pupils in attendance than the number shown on the returns, which is 45. Many children are waiting till the new building is ready to be admitted.

SESSIONAL PAPER No. 27

Class-room Work.—Owing to the size of the class-room, the progress is good, and the programme of studies adopted by the department is followed. Great attention is given to the study of hygiene, which is very interesting. Our pupils are graded from the first to the fourth standard.

Farm and Garden.—Over 100 acres of land are cultivated each year, and sown with wheat and oats.

Our garden last year provided all the vegetables required for the use of the school. The herd of cattle supplies us with butter, milk and beef.

Industries Taught.—The boys are taught farming, gardening, the care of horses, cattle, pigs and poultry. They repair the children's shoes. It is astonishing to see how adept our young boys are at all kinds of work. The girls receive daily instruction in kitchen work, sewing and general housework. On Thursday afternoons they darn the children's stockings and knit some new ones.

Moral and Religious Training.—Special attention is given to mould the character of our pupils and we daily strive to inculcate the beautiful virtue of charity, without neglecting, however, the other virtues so necessary for social and Christian education. They heartily share with each other a portion of the dainties they receive from their parents. They seem happy when able to contribute towards buying decorations for the altar.

Health and Sanitation.—We have had no serious illness for the last two or three years.

Recreation.—In winter the boys have a rink for skating and playing hockey. This is a very amusing and healthy exercise. They also slide on the hill, play cards, marbles and checkers with much enjoyment:

The larger girls spend their recess in playing music, singing, knitting and performing gymnastic exercises. The small girls dress dolls, play hide and seek, and other games.

General Remarks.—Before closing my report, I wish to thank the officers of the department for the consideration, kindness and interest shown by them in their dealings with us. Both Mr. J. A. J. McKenna, our inspector, and Mr. M. Miller, our agent, are highly esteemed by the staff and the children.

THE REPORT OF REV. R. B. LEDINGHAM, PRINCIPAL OF THE ROUND
LAKE BOARDING SCHOOL, WHITEWOOD, P.O., SASK., FOR THE
YEAR ENDED MARCH 31, 1912.

Accommodation.—There is accommodation for 40 pupils (by the new regulations) and a staff of 6.

Class-room Work.—Most of the pupils attend school 5½ hours each day, except Saturdays and Sabbath. The programme of studies authorized by the department is adhered to.

The progress made by the pupils has been good—singing, vocal and instrumental, has been taught.

Farm and Garden.—There are 320 acres of land reserved for the use of the school. We harvested 1,500 bushels of wheat, 1,400 bushels of oats, 200 bushels of barley, 300 bushels of potatoes, and an ample supply of vegetables sufficient to supply the school, until the new crop is fit for use. The boys have been taught farming and dairy-work, under the instruction of an experienced farmer.

Moral and Religious Training.—Prayers are held morning and evening and religious instruction given in the class-room daily. All the pupils attend Sabbath school

3 GEORGE V., A. 1913

on Sabbath, when the International Sunday School Lessons are taken up. Also all the pupils attend public service on Sabbath evening. In all our work we try to build up the Christian character in our pupils.

Health and Sanitary Conditions.—The health of the pupils has been remarkably good. The only illness being an outbreak of measles during the month of March, which passed away without leaving serious results. The buildings are beautifully situated, well drained towards the river, the premises and pupils are kept clean and an abundance of good food, well prepared, is provided.

Recreation.—The boys are fond of football, the girls of croquet, in summer, and skating and tobogganing in winter.

Heating and Lighting.—The buildings are heated by hot air furnaces and stoves; the lighting is done by means of coal oil lamps.

Water Supply.—There is an abundant supply of water, obtained from the lake and from a well.

THE REPORT OF REV. W. McWHINNEY, PRINCIPAL OF THE CROW-STAND BOARDING SCHOOL, KAMSACK, SASK., FOR THE YEAR ENDED MARCH 31, 1912.

Accommodation.—Under the new requirements as to air-space, our school would accommodate only about 30 pupils, and a staff of 6 persons.

Attendance.—The average attendance for the year has been 47.5. There have been no admissions during the year as we wished to avoid over-crowding during the winter season. Several new pupils will come in shortly.

Class-room Work.—During the past year we have laid down the principle that each pupil should aim to complete Standard V. at least, before leaving school. Our teacher is hard working and painstaking and good progress has been made during the year. We find that as year follows year and brings in new pupils, the Indian boys and girls are taking more kindly to class-room work.

Farm and Garden.—Last year, in many ways, was very unsatisfactory as far as farm work was concerned. The early part of summer promised well, but when the usual June rains continued into August, September and October, bringing with them early frosts the harvest was not a time of rejoicing. Our yield of wheat was about 36 bushels per acre, but much of it is only graded as feed. Oats yielded between 75 and 80 bushels per acre, and barley 55 bushels per acre. Roots and vegetables were excellent, but all our turnips, field carrots and mangels, were frozen in the ground and were therefore a complete loss, as far as feed purposes were concerned.

Industries Taught.—Mixed farming is the main outdoor industry for the boys. All the principal cereals are grown and a number of horses and cattle are kept as well as pigs and poultry. A competent farm instructor is always employed and therefore the boys receive a first hand knowledge of all work in connection with such a farm. The girls are given a thorough training in all branches of house work. When they leave school they are well able to keep house for themselves.

Moral and Religious Training.—The chief difficulty with which we have to contend in this branch of the work is the lack of stability in the Indian character. A child may respond readily to good influences, but when they come under other influences, they may bend as readily the other way. It will take more than one generation to produce a race of even moderately strong characters. Knowing the difficulties in our way, we are trying by teaching the fundamental truths of Christianity and by encouraging their daily practice, to establish habits which may prove a source

SESSIONAL PAPER No. 27

of strength when the strain of after years comes upon these young people. By morning and evening worship in the school, by Sabbath services and by daily instruction in bible truths, we are trying to lay foundations which may endure. Attention is paid to individual peculiarities, to lead them to develop along their own peculiar lines, yet guiding them into the better ways.

Health and Sanitation.—We have had three cases of pneumonia of which one proved fatal. The other two were extremely bad cases, but by good nursing, both pulled through. One boy, however, has developed Bright's disease as an after effect. This may prove fatal eventually, but in the meantime by care and proper diet, we are trying to bring him up to fair health. Except for the usual winter epidemics of colds, there has been no other sickness, except one case of scrofula.

Recreation.—In the winter the principal outdoor amusement is coasting and skating. Indoors, the pupils play various games in the evenings, in which they are often joined by members of the staff. Outside in summer they play football, baseball and various other games.

Ex-pupils.—To speak of ex-pupils is to speak of results. In many cases we have been disappointed, because we have expected too much and have not made allowance for the obstacles in our path. Critics point out that in many cases the ex-pupil is inferior to his uneducated ancestor. In some respects this may be so, for in making a vigorous effort to correct the faults of the ancestor we have neglected other things which afterwards marred the finished product of our schools. It seems to me there is little use in producing an ex-pupil who is trained for a sphere far in advance of his parents, unless we afterwards place him in surroundings where he will have an opportunity to put in practice what he has learned, untrammelled by the prejudices and customs of the older Indians. All our boys who have left our school have gone back to the reserve, and while many of them are doing very well, yet they have been discouraged and hindered very much by the influence of the older people. Nearly all are farming more or less successfully. The girls have proved good thrifty housekeepers when they have the means with which to work. Two of our girl graduates are married and living on the File Hills colony, proving themselves good thrifty housewives.

All of which is respectfully submitted.

THE REPORT OF N. A. RUELLE, O.M.I., PRINCIPAL OF THE KEESEE-
KOUSÉ BOARDING SCHOOL, ST. PHILIP'S P.O., SASKATCHEWAN,
FOR THE YEAR ENDED MARCH 31, 1912.

Accommodation.—The main building can provide ample accommodation for 20 pupils and a staff of 5—4 Sisters and the principal.

The boys' building can give accommodation to 16 pupils and a night watch.

Attendance.—The attendance during the year was good.

Class-room Work.—The pupils have made good progress in the class-room. Language, manners, reading, arithmetic, geography are the special branches of studies taught.

Farm and Garden.—The garden did not give satisfactory results. The worms destroyed nearly all the roots. Early in the fall most of the vegetables then in the field were frozen. Oats, barley and wheat rendered a fair yield.

Industries Taught.—The boys are taught farming, care of stock and order and cleanliness in the stables and yards. The girls are taught the general care and keeping of a house—cooking, bread and butter-making, knitting, darning, patching and making of new clothes; above all to keep the house clean.

3 GEORGE V., A. 1913

Moral and Religious Training.—The morals are improving, religious training being given daily, morning and evening. The principal is in charge of the religious training.

Health and Sanitation.—Everything is arranged to keep the children in good health. Good food is provided and cleanliness, exercise, bathing and outside games are insisted upon.

Recreation.—In summer the games are baseball and football, while during the winter, tops, marbles and other playthings are plentiful, as well as cards, dominoes and checkers.

Ex-pupils.—Nearly all ex-pupils are doing well. Farming is the occupation of most of them.

THE REPORT OF REV. H. DELMAS, O.M.I., PRINCIPAL OF THE DUCK LAKE BOARDING SCHOOL, DUCK LAKE, SASK., FOR THE YEAR ENDED MARCH 31, 1912.

Buildings.—A new granary, 34 x 46, on a very practical plan, has been added to the outbuildings. The hen-house has been enlarged and other arrangements made to facilitate the proper raising of poultry.

The acetylene gas plant has been renewed at a great expense, and the steam heat furnaces repaired and improved. Beneficial results have been obtained from these improvements.

Accommodations.—During the year by a mutual understanding between the department and the Order of the Oblate Fathers, the Duck Lake boarding school has become the property of the latter. Reverend Father Grandin, superior of the order, signed the contract and agreed to make the improvements demanded by the department. Immediately an artesian well, 110 feet deep, was drilled. It supplies water of a better quality and in greater quantity for washing purposes than that in the other wells. The basement has been dug out under the main building and cement walls begun. At the present writing most of the gravel for this work is at hand, a car-load of cement has been received, also an engine and mixer for the concrete are in full operation. The boys are pushing on the work in every line under the guidance of an expert. Some are on scrapers, others at the mixer, and several are handling carpenters' tools with skill. As soon as the ground is thawed work will begin on the sewers. Everything promises that by midsummer the work will be completed.

The varied industries which are constantly being introduced into the school, requires more accommodation than has been hitherto allotted to the pupils and their staff. Consequently the basement referred to will provide for a cooking department, where the girls will be initiated into every line of the culinary art. A bakery will also be established there. With this arrangement and others of a most sanitary nature, the most beneficial results cannot fail to follow.

Attendance.—A very satisfactory attendance of the authorized number has been fairly maintained during the year.

Class-room work.—The work in the class-rooms has given the most perfect satisfaction to the various inspectors, to the Indian agent, to the principal and to the three teachers in charge of the respective grades. This is doubtless owing to the fact that the teaching staff has remained unchanged for several years, and that the most modern and efficient methods of teaching are employed. Normal training, attendance at conventions and institutes, also school journals, have contributed to put the teachers in the foremost ranks of their arduous profession. In addition to the usual branches taught, particular attention is given to business and friendly correspondence and prac-

SESSIONAL PAPER No. 27

tical computations. The theory of agriculture is well taught and followed up by careful practice in the 'oldest of arts and latest of sciences.' Hygiene and calisthenics receive marked attention.

Farm and Garden.—The wheat production was the greatest yet recorded. From 145 acres of land sown with wheat a crop of 4,000 bushels was the result, and 60 acres sown with oats produced a crop of 2,000 bushels. This, with garden vegetables of all kinds, furnishes good proof that agriculture holds a high place in the estimation of the staff, the employees and the children.

Industries taught.—The fact that all the ex-pupils among the girls are coveted by those in need of servants, proves that they are adepts in every household art; cooking, washing, ironing and mending are perfectly acquired, while their needlework is the admiration of all. So quickly do they acquire the art of plain sewing, that embroidery on linen and silk, lace making, drawn work, &c., must be introduced to satisfy their ambition. No white children can compete with the Indian girls in their needlework, which is natural with them. Cutting by chart, dress-making and tailoring is very successfully taught. Gardening is a specialty with the girls, as also all kinds of cooking. The boys are much interested in all kinds of farm work. Under a good carpenter many of them have become very handy in this line. The bakery is always carried on in connection with the school. The vast vegetable and flower gardens furnish interesting work to the boys, as well as to the girls.

Moral and Religious Training.—We remark with great satisfaction a sense of self respect, a tendency to honest, upright conduct, a more industrious bent in both sexes, no doubt due to the daily moral and religious training received. The ex-pupils observe the Sunday and also influence the parents in this respect.

Health and Sanitation.—The general health has been good; no contagious diseases are to be recorded. All the children were vaccinated when one case of small-pox was pronounced in the town, but no symptoms appeared in the school. Four deaths were recorded this year, two cases of meningitis proved fatal. Tuberculosis claimed two victims after a short illness. Strange to say, that for nearly two years no deaths had occurred, and the four mentioned above took place almost at the same time. The sanitary arrangements are as good as can be obtained under the circumstances, but the alterations now going on in the basement and the installation of sewers in the near future will give first-class sanitation.

The physician, Doctor N. H. Touchette, in charge of the pupils' health, is all that can be desired. His attendance is regular and his directions are practical and skilful.

Recreation.—Both boys and girls are fond of games in every way. When they have exhausted the programme of romping, ball playing and rope skipping, they are able to invent new games not yet named. Their favourite pastime in summer is the traditional picnic. One can imagine a caravan 'en route,' when the school starts off for a day's outing. It is for them a day of 'Indian life.' The girls cook around the open fire-place, while the boys hunt and explore to their hearts' content.

The staff, too, joins in the innocent festivities, to the utmost joy of the children.

Ex-pupils.—It is very gratifying to notice during the past few years the increasing ambition of the children to prepare a home for themselves, as soon as they are discharged. Several of the boys last year hired out in order to earn the lumber for building their house. The girls, too, are taken up with the idea of getting things ready for housekeeping. A very remarkable characteristic of all our ex-pupils is their attachment to the school. They make every effort to be with us at Christmas and Easter. Those who are married write good and neat letters, and even in order to show their good will, they put the pen or pencil into the hand of a baby whom they pretend is the writer. Many of them show a strong desire to put their own children in the school as soon as advisable. This encourages us in what so often appears an ungrateful task.

General Remarks.—Inspector McKenna made his visit in October, 1911. He found the school beyond reproach in every department. He entered with interest into

3 GEORGE V., A. 1913

the minutest details of all the work and greatly encouraged both staff and pupils by his favourable remarks.

Agent MacArthur deserves a large share in the credit given to this school. His visits are always a source of pleasure and profit to all concerned. We are happy to offer him publicly our most sincere thanks for his efficient services.

The department merits our deepest gratitude for its great interest in the advancement of the school. The high place which this school has obtained in the opinion of the public is principally due to the hearty co-operation of the government.

THE REPORT OF THE REV. H. C. SWEET, B.A., PRINCIPAL OF THE FILE HILLS BOARDING SCHOOL, BALCARRES, SASK., FOR THE YEAR ENDED MARCH 31, 1912.

Accommodation.—We have conveniences for almost 70 pupils and a staff of 8.

Attendance.—Our attendance at present is 48 pupils. We had two deaths during the year; but the children remaining are enjoying health and every one is able to do his or her full share of work. We hope to increase this number immediately.

Class-room Work.—The work has been under the efficient leadership of one teacher continuously throughout the year. The attendance of almost every pupil has been continuous throughout the year and very substantial progress has been made in all the main ordinary subjects of the public school. The pupils are classified as follows:—

		Pupils.
Standard	I.	22
"	II.	8
"	III.	6
"	IV.	9
"	V.	3
	Total.	48

Farm and Garden.—The wheat suffered in common with other fields in our district from frost. Our oats are excellent. This year we propose to grow only oats, barley and vegetables. The probability of success is greater than with wheat. Our potato crop was fair. Vegetables are grown easily on this soil, which has a slight mixture of sand. Our boys do all the garden work under the supervision of the farm instructor.

Industries Taught.—The boys are taught the art of making their own beds, keeping clean their dormitory and wash room. They cut the wood and become familiar with both wood and coal fires. They are encouraged to be kind in the care of chickens, ducks, geese, and turkeys. We have also pigs, cattle and horses. They drive horses, plough, harrow, sew, break, run the mower, hay rake, binder and to do threshing. Under supervision, the children work well, and some of the seniors have good aptitude in carpenter and mechanical work.

The girls are taught to be all-round practical housekeepers. They wash, iron, bake, sew, care for milk, cream and butter. We aim to have senior girls make their own clothes.

Moral and Religious Training.—We have a good standard of morals obtaining among all our pupils. We are away from the influence of the town. All live a sim-

SESSIONAL PAPER No. 27

ple, innocent, industrious life. The New Testament is rigidly taught, love for God and man are inculcated, and the memorizing of scripture is a daily exercise for each pupil.

Health and Sanitation.—We have had little to contend with in the way of sickness among the average child, except colds or a little stomach trouble. No infectious diseases have invaded our home. Two girls recently died; they previously were rugged. Their foe was the white plague, which is quite prevalent among the Indians.

Our dormitories afford fresh air in abundance throughout the entire year. On the prairies, with our school surrounded by trees, we have a favoured location from the point of health and sanitation.

Recreation.—Our Indian children spend much time out of doors, even in moderately cold weather. They enjoy freedom. They easily devise their own amusements, such as football, baseball, sleighing, skating on the lake, taking extensive walks in the woods and over the prairies. In their play-rooms they have games, reading, songs, and all are very fond of music.

THE REPORT OF W. A. MONCK, PRINCIPAL OF THE GORDONS BOARDING SCHOOL, SITUATED ON THE GORDONS' RESERVE, TOUCHWOOD AGENCY, FOR THE YEAR ENDED MARCH 31, 1912.

Accommodation.—There is ample accommodation for 30 pupils and 4 of a staff.

Attendance.—The attendance has been remarkably good.

Class-room Work.—The studies laid own by the department have been followed as closely as possible; the progress of the pupils has been very good.

Farm and Garden.—We have about three acres, which is sufficient to raise all the vegetables needed for the school.

Industries Taught.—The boys are taught the care of horses, cattle and poultry, milking and gardening. The girls are taught all kinds of housework, special attention being given to cooking and serving.

Moral and Religious Training.—Special attention is given to this important branch and with the best of success.

Health and Sanitation.—The health of the pupils has been very good. The school has been kept perfectly clean, inside and outside, and well ventilated.

Recreation.—Outdoor games in summer and plenty of indoor games for winter. I have a recreation ground for the girls fenced, about eighty rods of fence, with eleven strand of patent fencing and two strands of barb wire on top.

Heating and Lighting.—The school building is heated with box stoves and lighted with coal oil lamps.

Ex-pupils.—Most of the expupils are farming on the reserve, and with the interest that the Indian agent takes in them, their prospects for the future are good.

THE REPORT OF THE REV. A. J. A. DUGAS, O.M.I., PRINCIPAL OF THE BOARDING SCHOOL ON MUSCOWEQUAN'S RESERVE, TOUCHWOOD HILLS AGENCY, SASK., FOR THE YEAR ENDED MARCH 31, 1912.

Accommodation.—Under the present arrangement, there is ample accommodation for 25 boys and 33 girls, with a staff of 10. So we took in 11 half-breed children and 1 Indian child under 7 years of age, besides the number on the roll.

3 GEORGE V., A. 1913

Attendance.—The attendance, except for 2 girls who are at home sick with scrofula, was regular, and may be classified as follows for grant-earners:—

Standard	Pupils.
I.	12
“ II.	5
“ III.	6
“ IV.	11
“ V.	3

Class-room Work.—The school hours are from 9 to 11.45 a.m. and from 1.30 to 4 p.m., with 45 minutes of study from 7.45 to 8.30 at night. The teaching is grounded on the programme of studies prescribed by the department, and the progress of pupils has been satisfactory.

Farm and Garden.—We had last year 120 acres of land under cultivation, namely, 20 acres of wheat, 13½ of barley, 80¾ of oats, and 6 acres of potatoes and vegetables. The grain crop was somewhat reduced by a hail-storm, and again by frost towards the end of the summer; so the yield was rather poor, but the potatoes and other vegetables gave very good returns.

Industries Taught.—The boys, under the direction of a lay brother, have a complete training in all branches of farming, gardening and care of stock.

The girls are taught all household duties, scrubbing, washing, sewing, mending, cooking, and bread and butter making. Some of them are showing great aptitude for these duties.

Moral and Religious Training.—Special attention is given to this important branch. The pupils attend morning and evening prayers in the chapel, and receive religious instruction daily.

Health and Sanitation.—The health of the pupils has been generally good. Two only have been kept at home for more than a year with scrofula. But those in attendance did not lose any exercises, excepting two boys who were kept in the infirmary for two days each with sore throat.

We have a perfect system of ventilation in the house, and the premises are kept clean.

Recreation.—Football, baseball, and swings are the favourite pastime of the children in summer; skating and coasting constitute their winter recreations. We keep them in the open air as much as the weather permits.

Ex-pupils.—The pupils who have left the school have all settled around on the reserve except one boy and one girl, who after their marriage started a farm on a homestead four miles south of the school. They are all doing fairly well, and keeping good relations with the school.

General Remarks.—Owing to the fact that I have only recently been appointed and so am new at the work, and as repairs are only being completed, I did not have time to visit the reserves as much as I should like to do, consequently I have not yet been able to have the authorized number of pupils; but, as there are many children of school age, I hope to succeed in getting the authorized number during the course of next summer.

THE REPORT OF REV. FRANCOIS ANCEL, O.M.I., PRINCIPAL OF THE BOARDING SCHOOL, LAC LA PLONGE, SASK., FOR THE YEAR ENDED MARCH 31, 1912.

Accommodation.—This school has accommodation for 60 pupils and the required staff.

SESSIONAL PAPER No. 27

Attendance.—All the children being boarders, the attendance is regular. The admissions numbered 20; there were 2 pupils discharged.

Class-room Work.—Satisfactory progress is noticed in all divisions. The programme of studies prescribed by the department is followed closely.

Farm and Garden.—A sufficient quantity of potatoes and other vegetables are raised every year to supply the entire school. Our garden has yielded a good quantity of barley and oats.

The poultry are doing well and giving good returns.

The live stock consists of 12 horses and 60 head of cattle. Our herd of milch cattle, 14, supply us with milk and butter.

Industries Taught.—The boys are taught the feeding and care of stock, the management of horses, milking and gardening. The girls are instructed in all kinds of housework, including baking, cooking, washing and ironing, knitting, sewing and mending.

Moral and Religious Training.—Great care and attention is given to this important part of education.

Health and Sanitation.—The pupils' health has been remarkably good, excepting a few cases of la grippe.

Water Supply.—Clear good water is obtained from La Plonge river.

Fire Protection.—In case of fire, escape could be made easily by means of 6 doors opening outwards.

Heating and Lighting.—The heating is effected by a large wood hot-air furnace, and gives every satisfaction. The lighting for all purposes is by means of electricity, which gives a satisfactory light.

Recreation.—Both boys and girls have large and well laid out playgrounds, and all take their recreation in the open air when the weather is favourable. Football and baseball are the principal outdoor amusements of the boys. Cards, skipping and the dressing of dolls are the girls' favourite amusements.

General Remarks.—The school was examined by Inspector G. Bond, to whom I beg to tender my sincere thanks for his unvarying kindness and his earnest co-operation in all matters connected with the interests of the school.

The faithful and efficient services rendered last winter by the good Brothers cannot be too highly spoken of; each has striven to do his utmost in the best interests of the pupils.

I have pleasure in bearing testimony of the good work done by the Grey Nuns.

THE REPORT OF REV. M. B. EDWARDS, PRINCIPAL OF THE LAC LA RONGE BOARDING SCHOOL, LAC LA RONGE, SASK., FOR THE YEAR ENDED MARCH 31, 1912.

Accommodation.—There is sufficient accommodation in this school for 60 children and a staff of 8.

Attendance.—There have been 53 children in attendance during the past year.

Class-room Work.—The programme of studies as given by the department is strictly followed and good progress has marked the work of the year. Religious instruction, reading, writing, arithmetic, dictation, recitation, geography, history, hygiene and singing are taught.

Farm and Garden.—Our garden last summer was not equal to the previous year on account of frost, still the yield of potatoes and other vegetables was good. We had 2½ acres more of land cleared, and we intend sowing this with grain this spring.

3 GEORGE V., A. 1913

Industries Taught.—There are no trades taught, but all the boys learn gardening and are also able to attend to all repairing that is needed about the buildings and premises.

Moral and Religious Training.—The children are instructed for one half hour each day from the Bible. They attend at least two church services each Sunday, receiving instruction also each Sunday in the Sunday school. At all times the children are taught lessons in truthfulness, purity, sobriety, industry, and all other virtues. And all the encouragement that can be given to inculcate these virtues in the lives of these children is given.

Health and Sanitation.—Every precaution is taken to keep the buildings and the premises in a sanitary condition. Thorough ventilation, especially at night, is insisted on and to this, accompanied by a free use of disinfectants, must be attributed our immunity from sickness.

Recreation.—Boys and girls have large and well-kept playgrounds where they enjoy all kinds of outside games nearly the whole year.

Ex-pupils.—Two pupils have been discharged during the year on account of having reached the age limit.

Philomene Charles is staying at home with her parents.

Absalom Roberts is being employed by the school. He has made good use of his training during the five years he has been in school, and I hope his remaining on as an extra worker may be an incentive to others of the pupils to become more and more diligent and persevering in their various studies.

THE REPORT OF REV. E. J. CUNNINGHAM, O.M.I., PRINCIPAL OF THE ROMAN CATHOLIC BOARDING SCHOOL, UNION LAKE, SASK., FOR THE YEAR ENDED MARCH 31, 1912.

Accommodation.—We have ample room for 70 pupils and a staff of 10.

Attendance.—The average attendance during the term has been 40 pupils. There have been five admissions and five discharges since last March.

Class-room Work.—The programme of studies prescribed by the department is followed closely. The subjects taught are, geography, arithmetic, language, history, composition, hygiene and drawing. Special attention is given to reading and writing. Half an hour each day is devoted to singing and calisthenics.

Farm and Garden.—About five acres of land are laid out in garden. All the vegetables needed for the use of the school are raised on the farm. Both boys and girls take an active part in this work.

Industries Taught.—The boys have the care of the horses and other stock, also the preparing of the fuel. They also help with the work about the farm. The girls receive a thorough training in the domestic branches, which makes them good house-keepers. They are taught to do their own sewing and mending, do all the baking for the children, also make butter and help to do the cooking.

Moral and Religious Training.—The children are thoroughly instructed in the principles of religion. Particular care is taken by all the members of the staff to train the children to be respectful, truthful and honest. They receive religious instruction daily. The conduct of the children is excellent.

Health and Sanitation.—There is nothing lacking in the attention given to sanitation. With the exception of one little girl who was sick with typhoid fever in October, all the children enjoyed good health throughout the year. The calisthenic

SESSIONAL PAPER No. 27

exercises are performed each day, and the breathing exercise is also taken daily in the open air as much as possible.

Water Supply.—A well, tank with pumps, also water pails are placed in each of the dormitories for immediate use.

Dry dust fire-extinguishers are placed in the different rooms.

Fire drill is practised regularly.

Heating and Lighting.—The buildings are heated by means of wood stoves. Coal oil lamps are used for lighting purposes.

Recreation.—All recreation is taken in the open air when the weather is suitable. Out-door games are very popular and long walks are also much enjoyed. In summer picnics are given frequently to the delight of all the pupils.

General Remarks.—Some alterations have been made during the summer in the school rooms and dormitories. According to latest requirements of the air space required, the ceilings of both dormitories have been raised to provide for better accommodation and ventilation.

In closing, I wish to express high appreciation of the courtesy and assistance rendered us by our inspector, Mr. J. A. J. McKenna, and Mr. W. Sibbald, our agent, in all matters connected with the school.

REPORT OF REV. J. R. MATHESON, PRINCIPAL OF THE CHURCH OF ENGLAND BOARDING SCHOOL, UNION LAKE, SASK., FOR THE YEAR ENDED MARCH 31, 1912.

Accommodation.—We have ample accommodation for 60 pupils and the necessary teachers.

Class-room Work.—The children have made good progress, and the younger ones especially, are learning English very fast.

Farm and Garden.—Our garden covers about five acres and we raise our own vegetables for the use of the school.

Industries Taught.—The boys are taught to use carpenter's tools, although they are too small to do much with them, and they also work at the wood pile, and assist in caring for the stock.

The girls are taught all kinds of house work, sewing and knitting.

Moral and Religious Training.—Particular attention is paid by each member of the staff to religious and moral training, as on this depends the success of all our other work.

Health and Sanitation.—The health of the children in the school has been exceptionally good. There have been no epidemics prevalent during the year.

Water Supply.—We have two wells and an abundance of good water.

Fire Protection.—Two small chemical and one dozen eclipse fire-extinguishers, with top draft stoves and constant watchfulness are our protection from fire. All our doors open outwards.

Heating.—All the buildings are heated by good wood stoves, most of them having top draft.

Recreation.—Our recreations are football, foot-racing, swinging, skating, and tobogganing in season.

Buildings and Repairs.—A solid stone foundation was put under the hospital and cottage and each building was raised one foot. Two new floors were also laid in these buildings and the new storehouse built last year was sided up on the outside and finished.

All of which is respectfully submitted.

THE REPORT OF REV. A. WATELLE, O.M.I., PRINCIPAL OF THE BOARDING SCHOOL, THUNDERCHILD'S RESERVE, BATTLEFORD, SASK., FOR THE YEAR ENDED MARCH 31, 1912.

Accommodation.—This school is able to accommodate 40 children and a staff of 9 Sisters.

Attendance.—Owing to the general good health of the children, the attendance was particularly good. During the past year 4 boys and 3 girls were admitted, and 24 children attended the school regularly.

Class-room Work.—The school hours are from 9 a.m. to 12 noon, and from 1.30 to 4 p.m. Another hour of study is allowed the children from 5 to 6 in the evening. All the subjects of the curriculum prescribed by the department are carefully taught. A greater attention, however, is given to the teaching of hygiene. There is rehearsal of vocal music three times a week. The general application and proficiency are very satisfactory.

Farm and Garden.—Some 20 acres of land are under cultivation. The crop raised was 75 bushels of potatoes, 4 bushels of onions and a quantity of several other vegetables.

Industries Taught.—The larger boys are instructed in gardening and farming. Outside of school hours they are generally kept busy with the care of the cows, the management of the horses and in preparing the fuel required. The smaller pupils provide the kitchen with the needed water and wood. The girls are trained in all branches of general household work. They do all the mending, knitting and washing of the children's clothing. Every Thursday they receive special lessons in cutting and making clothes, or in cookery in which they are very successful.

Moral and Religious Training.—Half an hour is devoted daily to moral and religious training. Besides the morning and evening prayers, said in common, the children attend the public service on Sunday. Nothing is wanting on our part to instil into their minds feelings of gratitude towards those who govern them. Oftentimes we recall to their minds the liberality of the department which secures for them the benefits of a good education. We avail ourselves of every opportunity to teach them politeness and cleanliness.

Health and Sanitation.—We had to report one death during the past year, that of Marguerite Assassayo who died from consumption. As soon as the first symptoms were noticed, she was isolated and was given good tonics and more substantial food. After a couple of months, at the request of her parents, she was taken home where she died a few weeks after. Excepting that, and a few cases of grippe, the health of the children has been good. The laws of hygiene are scrupulously obeyed, the rooms are well ventilated and often disinfected. Lately openings have been made and grates fitted in the chimneys for additional ventilation. The surroundings are always kept free from decaying matter.

Recreation.—Everything is arranged with a view to provide the children with plenty of fresh air during their recreation. The parlour games are allowed the children in the evening only. The most attractive are cards, out of which they can play several games, dominoes and checkers. In day-time coasting, racing, football and baseball are repeatedly engaged in. On pleasant days the girls have long walks, and this always under the supervision of one of the members of the staff.

Ex-pupils.—Three pupils were discharged during the year One boy, Joseph Simaganis, was transferred to the St. Joseph's industrial school, Dunbow, to learn farming. He is proving satisfactory. The two girls are staying with their parents. Both are doing well.

SESSIONAL PAPER No. 27

General Remarks.—In October last, the inspection of the school was made by our worthy inspector, Mr. McKenna, who is ever ready to give encouragement and assistance. In November Inspector Chisholm made an appreciated visit. During December Rev. Father Delmas, the former principal, who was transferred to the principalship of the Duck Lake boarding school, made a visit to this school. Needless to say, he was warmly welcomed here. Besides that, the school has been regularly visited by our devoted agent, Mr. Day.

Before closing this report, I beg to tender my sincerest thanks to all the officers of the department for their courtesy and kindness in our dealings with them.

THE REPORT OF REV. ARTHUR BARNER, PRINCIPAL OF THE RED DEER INDUSTRIAL INSTITUTE, RED DEER, ALTA., FOR THE YEAR ENDED MARCH 31, 1912.

Accommodation.—There is accommodation for 75 pupils and a staff of 10.

Attendance.—The year began with 69 names on the roll and 66 in actual attendance.

The record of the year is as follows:—

	Pupils.
Number on the roll.	69
Admitted during the year.	13
	—
Total.	82
	—
Discharged.	13
	—
Total number now on the roll.	69
Total number now in attendance.	68

Class-room Work.—The half-time system is carefully followed, and a very successful year has been spent in this department. It is safe to say that a larger measure of progress has been accomplished than in any of four previous years.

At the close of the year the grading of the pupils is as follows:—

	Boys.	Girls.	Total.
Standard I.	31	14	45
“ II.	7	5	12
“ III.	0	2	2
“ IV.	5	5	10
	—	—	—
Total.	43	26	69

Mr. F. J. Dodson proves an excellent teacher.

Farm and Garden.—Last season we had 242 acres of land under cultivation:—

Fall wheat, 30 acres; oats, 90 acres; barley, 10 acres; mixed greenfeed, 52 acres; timothy, 50 acres; potatoes, 8 acres; and garden, 2 acres.

The yield was 12,000 bushels oats, 300 bushels barley, 32 loads of timothy, 1,000 bushels of potatoes and a good yield of garden produce. The mixed and greenfeed, and the oat and wheat acreage, which was unfit for threshing, yielded 130 loads feed; of the oat crop only 34 acres were fit for threshing. No fall wheat was threshed.

Between June 22 and September 22, 1911, our crop was seriously hailed, frozen and snowed under, which will serve to explain the unsatisfactory figures above.

We have live stock as follows: 12 head of horses, 24 cows, 11 heifers, 11 steers, 28 calves, 1 bull, (Holstein), and 21 pigs. The total value of the live stock is \$4,331.

Industries Taught.—Farming and cattle raising are the chief industries in which the boys are trained. This is quite appropriate, for all our pupils come from good agricultural districts. Mr. Alfred B. Hives is in charge of this department and has done good work. There is a larger interest in and more thorough execution of the work on the part of the boys than I have hitherto seen.

When there are improvements being made around the estate, the boys are instructed in carpentry, painting, paper hanging, &c. by Messrs. Foster and Joblin.

The girls receive a very thorough training in housekeeping and sewing under the care of Miss Cummings, matron; Miss Marshall, cook; Miss Valentine, laundress; and Miss Willington, seamstress.

There is a steady improvement in the work of every department.

Moral and Religious Training.—We have continued to conduct every Sabbath, morning and evening preaching service, also a well organized Sunday school in the afternoon, under the able superintendence of Mr. Joblin. Every day morning and evening prayers are held. The Sacrament of the Lord's Supper has been dispensed twice during the year, and has proved a real means of grace to several of the pupils. Many of the children take a deep interest in the Mission Band, which was organized and is conducted by Mrs. Barner. This work certainly tends to develop an unselfish interest in others. A voluntary meeting for the girls, conducted by Mrs. Joblin, and one for the boys, conducted by Mr. Joblin, each week have proved very helpful. Mrs. Joblin has organized a meeting which is held on Saturday afternoon each week for the little ones. The work, however, which appears to be most important for these children, whether in meeting or out, is the personal touch of sterling Christian character. This is the agency which is most powerful in the hands of the Holy Spirit to transform their lives and the results of this method are appearing very clearly in the lives of the ex-pupils.

The object lesson appeals most powerfully to the Indian in this as well as in all other matters.

Health and Sanitation.—We have enjoyed another year almost free from sickness. We have continued to act on the principle of 'prevention is better than cure,' and have thus averted what might have been cases of serious sickness. I do not know of a child in the school with weak lungs.

All the buildings are kept clean and well ventilated. We have the best of drainage.

Water Supply.—An abundant supply of pure water is pumped from a spring well through the two main buildings by steam power, and stored in tanks. There is a second well in working order with hand pump and in close proximity to the buildings.

Fire Protection.—We have the water tanks and 36 dry dust fire-extinguishers, also two modern fire-escapes. Our best fire protection has proved to be in keeping the chimneys well cleaned and care in handling the furnaces.

Heating and Lighting.—Two Smead-Dowd and two Pease furnaces have kept the main buildings and the principal's house comfortable during the past winter. The cottages are heated by wood and coal stoves. Coal oil is used for lighting in all the buildings excepting the girls' home, where we have, in the basement and on the ground floor, seven gasolene gas lights which are a great improvement on the coal oil both in safety and results.

Recreation.—The girls have found ample recreation during the winter in skating and walking. In the summer they play all the seasonable games.

The boys have enjoyed skating and hockey. In the summer they play all the various games for boys in turn.

Our library, which is well cared for by Mr. Dodson, is well patronized by many of the older pupils.

SESSIONAL PAPER No. 27

Ex-pupils.—There were 13 pupils discharged from the school during the year: 9 boys and 4 girls. Six of the boys are at home assisting their parents, two others have steady employment and one, Mark Steinhauer, is taking a course in Alberta college. Three of the girls are out at service in Red Deer and giving good satisfaction, the other is living with relations at Lac Ste. Anne, Alta.

General Remarks.—The attitude toward the school on the part of all the reserves with which we have to do is very cordial. Even Hobbema, which reserve has held out stubbornly against sending any pupils ever since I came here five years ago has, during the past year, sent six pupils. While the school is not filled we have now three other applications before the department which, if clear, will bring the actual attendance up to 71.

The annual holiday arrangement has proved to be a great success. It entails much labour and expense, but I am satisfied that it pays. The children returned from their holidays last summer with about equal hilarity as that manifested when they were starting for home, which to my way of thinking nearly approaches an ideal condition.

We have our 'ups and downs' throughout every year in regard to conduct, but it is certainly gratifying to be able to report that in almost every case a strong appeal in words leads the pupils to see and accept the higher alternative by thoughtful and well ordered choice. I have been delighted with an increased disposition in this direction during the year just closed.

My thanks are due and are hereby tendered for the sympathetic co-operation of every member of the staff and assisting friends, to the officers of the missionary society, the workers on the reserves and to the officials of the department at Ottawa, also to Almighty God for His unfailing guardianship over the work of the institution.

THE REPORT OF REV. J. RIOU, O.M.I., PRINCIPAL OF THE ST. JOSEPH'S
INDUSTRIAL SCHOOL, DAVISBURG, ALBERTA, FOR THE YEAR
ENDED MARCH 31, 1912.

Accommodation.—There is accommodation for 125 pupils and the necessary staff.

Attendance.—During the year there was an average attendance of 73 pupils.

Class-room Work.—The half-day system is in vogue for the older pupils. Half the day is spent in the school room and the other half is spent at their trade.

Regular school hours are observed; they are from 9 a.m. to 12., and from 1.30 to 4 p.m.

The junior pupils attend school forenoon and afternoon. The authorized programme of studies is adhered to as closely as possible. The progress of the pupils during the year has been very satisfactory.

Farm and Garden.—We had about 300 acres under cultivation. The fall was rather cold, with a lot of snow, which left the threshing very late, some of it not being completed until late in the winter.

We grow our own vegetables. All the boys and girls are taught gardening.

Farming.—This is the principal industry. The boys are taught farming and stock-raising in all their different branches, and under the direction of a farm instructor do all the work. All the boys and girls learn to milk.

Carpentry.—The boys under the instruction of the school carpenter did all the ordinary repairs and building during the year.

Needle-work.—Under the direction of the reverend Sisters the girls are taught sewing, machine-sewing, dressmaking, knitting and fancy and plain needlework.

Housekeeping.—The girls are thoroughly instructed in the art of housekeeping and cooking.

Moral and Religious Training.—The pupils are well grounded in the principals and doctrines of their religion. A half hour each day is devoted to religious instruction.

Health and Sanitation.—The health of the pupils during the year has been good. The sanitary condition of the school is satisfactory. The premises are kept neat and clean.

Water Supply.—An abundant supply of water is obtained from the High River. The water is filtered into a well and then pumped into tanks in the main buildings.

Fire Protection.—The buildings are well supplied with stairs and fire escapes. There are two water tanks in the boys' building and one in the girls' building, each with a capacity of 1,400 gallons. About 50 feet of hose on each flat is connected with these tanks. There are also 3 dozen fire extinguishers, 4 dozen hand grenades, 40 fire pails and 8 fire axes.

Heating and Lighting.—The two main buildings are heated by steam. Each building has its own plant. Both give excellent satisfaction. For light we use acetylene gas.

Recreation.—Hockey is the favourite game. In summer the pastimes are football, baseball, lacrosse and field sports. The girls play basketball, skip, swing, coast and take long walks when the weather permits. Both the boys and the girls have large well lighted play-rooms, where they spend their recreation hours in wet weather.

Ex-pupils.—The ex-pupils for the most part have taken up work on the different reserves to which they belong. The majority of them are engaged in farming and cattle raising and are doing well.

General Remarks.—We did very well with our cattle at the fat stock show in Calgary last spring, taking first prize with a carload, and several smaller prizes. Over 100 acres of new land were broken last summer, which we intend to seed this spring. Last August we had the telephone installed; it saves our horses many a trip and is very convenient.

REPORT OF REV. S. MIDDLETON, PRINCIPAL, ST. PAUL'S MISSION,
CHURCH OF ENGLAND BOARDING SCHOOL, BLOOD RESERVE,
MACLEOD, ALBERTA, FOR THE YEAR ENDED MARCH 31, 1912.

Accommodation.—There is accommodation at this school for 50 pupils and the necessary staff.

Attendance.—The attendance has been regular, the number on the roll is 43.

Class-room Work.—Good progress has been made. The school hours are from 9.30 a.m. to noon, and from 1.30 to 4 p.m. The authorized programme of study is closely followed.

Farm and Garden.—There are 30 acres under cultivation, which yielded a crop of 1,400 bushels of oats.

In addition, we also harvested 8 tons of timothy and 10 tons of green feed.

The garden gave splendid results; 15 tons of potatoes, 5 tons of mangels and Swede turnips, 1,400 cabbages, and a considerable amount of other vegetables, some of which were sold, independent of having an adequate supply for school purposes.

Industries Taught.—The boys are taught practical agriculture and the different systems are fully explained to them during the winter evenings.

SESSIONAL PAPER No. 27

They are taught how to care for all kinds of farm stock, and the boys are eager to excel each other in all farming operations.

They are also instructed in woodwork, picture framing, making and repairing gates.

Moral and Religious training.—The principles of religion and the doctrines of the Church are fully explained to the pupils at morning and evening services, and great stress is explained as to their moral life.

Health and Sanitation.—The health of the pupils during the past year has been good.

Disinfectants are regularly used and all refuse is burned.

Recreation.—All kinds of sports are heartily indulged in, football being followed very keenly.

The pupils are most attentive to their drill exercises.

I have organized a cadet corps amongst the boys in order to foster and stimulate the duties of citizenship and loyalty.

The project is very successful. The girls take daily walks with members of the staff.

Ex-pupils.—Whenever one goes on the reserve, strong evidences of school life are very conspicuous in painstaking housekeeping, well-furnished houses, well cared for children, and the general system of living. Progress can be seen on every hand.

Some of our ex-pupils' houses act as good examples to the old Indians, for all the girls who have left the school make splendid wives and are proficient in housekeeping.

The ex-pupils attend church regularly every Sunday and like to come back to their Alma Mater.

General Remarks.—Two successful concerts were given during the past winter by the pupils and staff, one at the school and the other in a neighbouring town. Both were highly appreciated, especially the calisthenics, which were very creditably rendered by the boys.

In closing this report I would like to express my heartiest thanks to the departmental employees on the reserve for the abundant supply of magazines and periodicals which they have so regularly given for the use of the school, and for the unflinching kindness which has been so liberally shown.

THE REPORT OF THE REV. FATHER E. RUAUX, O.M.I., PRINCIPAL OF
THE BLOOD ROMAN CATHOLIC BOARDING SCHOOL, BLOOD
RESERVE, ALTA., FOR THE YEAR ENDED MARCH 31, 1912.

Accommodation.—There is accommodation for 50 pupils and a staff of 8.

Attendance.—There are 42 pupils on the roll: 20 boys and 22 girls.

Class-room Work.—The programme of studies prescribed by the department is followed closely. The progress is fair and encouraging.

Farm and Garden.—There is no farming or gardening done at the school. The ground is too close to the river bank and is unfit for the purpose. A farmer living some six miles away has leased the school about three acres of land, which was sown in potatoes, the yield being fair.

Industries Taught.—Stable work, baking, sawing and chopping wood for the kitchen and the furnaces are some of the occupations of the boys. The girls are trained in the different branches of housework: baking, cooking, laundrying, sewing, knitting and dressmaking.

Moral and Religious Training.—Religious instruction is given daily and all the children attend regularly all the church services. As a matter of fact, this part of their training is looked after with the greatest care.

3 GEORGE V., A. 1913

Health and Sanitation.—The health of the children has been very good throughout the year; however, one boy died of hemorrhage.

Recreation.—Recreation is taken three times a day after each meal. Football, baseball, fishing and skating are the favourite pastimes of the boys. The girls enjoy themselves swinging, playing ball and skipping. As often as the weather permits, outdoor recreation is indulged in. Boys and girls have each their own playground, and are always under the supervision of an attendant.

Ex-pupils.—As a rule our older pupils are transferred to the High River industrial school, where they receive further training before their discharge from that school.

THE REPORT OF REV. J. L. LEVERN, O.M.I., PRINCIPAL OF THE ROMAN CATHOLIC BOARDING SCHOOL, BLACKFOOT RESERVE, CLUNY P.O., ALTA., FOR THE YEAR ENDED MARCH 31, 1912.

Accommodation.—There is accommodation for 50 pupils and a staff of 8.

Attendance.—There are at present 43 pupils: 27 boys and 16 girls.

Class-room Work.—The programme of studies prescribed by the department is followed as closely as possible; the progress is very good and encouraging.

Farm and Garden.—About 25 acres are under crop: 10 acres in oats, 10 acres in potatoes and 5 acres in gardening. The larger boys do the ploughing, as well as the mowing, when the hay season comes.

Industries Taught.—Farming and gardening, baking and dairy work; the care of horses and cattle are taught the boys. The girls are instructed in dress-making, knitting, cooking and general housework.

Moral and Religious Training.—Of course great care and special attention are given to this most important part of education. Religious instruction is given to the pupils, by the principal and the teacher, each day and it is encouraging to see the great efforts the children make to put in practice the lessons they are taught.

Health and Sanitation.—The health of the pupils has been very good during the year. The sanitary conditions are looked after carefully, the ventilation is excellent, and everything is kept clean around the house and outbuildings.

Recreation.—Football, shooting with bows and arrows, fishing, swinging and skating are favourite pastimes of the boys; the girls amuse themselves in playing ball, swinging, skipping, croquet, &c.

Ex-pupils.—All our ex-pupils are, with but few exceptions, doing well on the reserve.

THE REPORT OF THE REV. SISTER M. M. DIQUIERE, PRINCIPAL OF THE ST. ALBERT BOARDING SCHOOL, ST. ALBERT, ALTA., FOR THE YEAR ENDED MARCH 31, 1912.

Accommodation.—There is ample accommodation at St. Albert Boarding School for 80 pupils with their respective staffs.

Attendance.—The attendance has been satisfactory, the enrolment at the end of March being 67 pupils; 36 boys and 31 girls.

Class-room Work.—The regular course of studies prescribed by the department is closely followed; calisthenics and hygiene are being taught. The half-day system is in

SESSIONAL PAPER No. 27

vogue for the older pupils. The juniors attend class forenoon and afternoon. The progress of the pupils is most satisfactory. There is a mandolin club for the girls and a brass band for the boys. A few of the girls are taking piano and organ lessons. Special attention is given to training in vocal music.

Farm and Garden.—Last year we had about 250 acres of land under crop, which yielded as follows: wheat, 1,707 bushels; oats, 4,383 bushels; barley, 1,188 bushels; timothy, 100 tons; potatoes, 2,000 bushels. The remainder of the land was sown with various kinds of vegetables and produced a fair crop.

Industries Taught.—The boys are carefully instructed in all the branches of agricultural work and the caring of stock. The girls are trained for domestic work including plain and fancy needle work, knitting, crocheting, cooking, baking, laundrying and dairying.

Moral and Religious Training.—Great care and special attention are given to this important part of education, and no effort is spared to instruct the pupils thoroughly in the principles of faith and religion. They are as a rule very docile and readily respond to the religious and moral training so carefully given to them. Corporal correction is unknown in the school.

Health and Sanitation.—The health of the pupils has been excellent; there was no serious illness of any kind. Our medical doctor is very clever and devoted.

We are very grateful to the department for the supply of drugs received in December.

Recreation.—The boys and girls have large playgrounds, and as often as the weather permits outdoor recreation is indulged in. Games, dramas, singing and band exercises are some of the winter indoor amusements.

Ex-Pupils.—The pupils who have been recently discharged from this institution are doing well. Some of the girls are at home keeping their parents, while others are married and have comfortable homes. Most of the boys, being accustomed to handle horses and having a fair idea of agriculture, easily find employment with the local farmers.

General Remarks.—Before closing my report, I beg to extend my sincere thanks to the officers of the department for their unfailing kindness; to our worthy inspector, Mr. McKenna, for his kind approbation and suggestions, and to our devoted agent, Mr. Verreau, for his promptitude in attending to all matters connected with the school.

THE REPORT OF REV. L. DAUPHIN, O.M.I., PRINCIPAL OF ERMINE-SKIN'S BOARDING SCHOOL, HOBEBEMA, ALTA., FOR THE YEAR ENDED MARCH 31, 1912.

Water and Sewage.—Great improvements were made last summer, and we now possess a complete sewerage system, emptying into a cesspool some distance from the building. We are also blessed with an abundance of soft water from a never failing artesian well, which has enabled us to conduct the water throughout the building. As soon as the pleasant weather returns, the work will be continued, as we intend bringing our school up to date in this respect.

Accommodation.—There is accommodation for 60 children and 10 Sisters.

Attendance.—The attendance during the year was 56.

Class-room Work.—The application to studies has been very good throughout the year, and the progress has been very satisfactory in every branch of the programme. Calisthenics and hygiene are carefully taught. The children have behaved wonderfully well. The boys, as well as the girls, are very docile. Their obedience,

respect for the teachers and love of the school are worth mentioning. More than once some of the eldest children have been known to tell their parents who wanted to take them away from school, that a few more years would be beneficial to them. This proves how much they appreciate their school life.

Farm and Garden.—Our garden has yielded 375 bushels of potatoes, 150 head of cabbages, 8 bushels of carrots, 5 bushels of onions, and a large quantity of other vegetables.

Industries Taught.—Each day, outside of school hours, the boys devote some time to farming. The girls are taught how to keep a house in good condition, as well as cooking and the making and mending of their garments. All the clothes are made by the children, the girls cut and fit the boys suits, as well as their own.

Moral and Religious Training.—Daily instruction in religious training is given by the missionaries or the teachers, to which the pupils pay great attention.

Health and Sanitation.—The pupils have enjoyed very good health during the year with the exception of one little boy, who was taken ill with pneumonia and died after a few days' sickness.

Recreation.—Baseball and football are the amusements enjoyed by the boys in summer, and coasting and checkers in winter. They also enjoy reading the newspapers, especially the 'Canadian Century,' offered so generously by the department. The girls' chief amusement is music.

Ex-pupils.—Most of our pupils give satisfaction by their conduct and work, and are able to live comfortably. They like to visit their Alma Mater, and also delight in reading newspapers, reviews, &c. in a room at the rectory; some of them attend the Sunday school.

General Remarks.—The pupils have given one public entertainment and several musical entertainments during the year. Our 15 mandolinists have given concerts in Red Deer, Crossfield and Carstairs, which outings proved a treat for the children. The boys' brass band is kept up and theirs, as well as the girls, beautify our little entertainments very much.

THE REPORT OF REV. CYP. BOULENE, O.M.I., PRINCIPAL OF THE BLUE QUILLS BOARDING SCHOOL, SACRED HEART P.O., ALTA., FOR THE YEAR ENDED MARCH 31, 1912.

Accommodation.—There is in this school accommodation for 45 pupils and the necessary staff.

Attendance.—As all the pupils are boarders, the attendance is very regular.

Class-room Work.—The programme of studies laid down by the department is followed and the progress is fair.

Farm and Garden.—The gardens produced a good supply of vegetables and potatoes for the school. I may add that the flower garden was a delight to the children and all those who had the pleasure of seeing it.

Industries Taught.—The boys are taught farming, gardening and other outside work, such as sawing and carrying wood, cleaning up the premises and last winter they learned to knit their own mittens. The girls are trained in domestic work, including baking, cooking, sewing, knitting and laundry work. Most of the larger girls cut and make their own dresses.

Moral and Religious Training.—This, being the most important part of education, is carefully attended to in every respect. Religious instruction is given daily, and morning and evening devotions are attended by the pupils in the chapel. The children make great efforts to put in practice what they are taught.

SESSIONAL PAPER No. 27

Health and Sanitation.—All our children have enjoyed perfect health during the year.

Recreation.—Girls, as well as boys, are supplied with different games: reading, singing, outdoor exercises, drives and music. The boys have a brass band. The girls have a mandolin club including a violincello. They each have their own playground and are always supervised by a Sister.

Ex-pupils.—A number of the ex-pupils are married and doing well. Others are helping to make their parents' home brighter. We often see them, as they like to come back to their Alma Mater, and also delight in reading newspapers, reviews, &c., in a room at the rectory.

General Remarks.—Few repairs were made during the year, for the reason that our search for water, so far, has been useless. If it continues we shall be compelled to remove the building to some other place.

THE REPORT OF A. R. COLLINS, PRINCIPAL OF THE CHURCH OF
ENGLAND BOARDING SCHOOL, PLIGAN RESERVE, BROCKET P.O.,
ALTA., FOR THE YEAR ENDED MARCH 31, 1912.

Attendance.—The school is capable of accommodating 40 children, but our average attendance at present is only 22. One difficulty we have experienced recently is that pupils let out on sick leave cannot be induced to return, even when sufficiently recovered from their sickness.

Class-room Work.—Good progress has been made in reading and writing, but our children have very little idea of expressing themselves on paper. Encouragement is given to the senior boys and girls to spend some of their leisure time in correspondence, by providing paper, stamps and envelopes free. The knowledge of arithmetic is very limited, and one hour per day is given to this part of the curriculum. Physical drill is taught daily and a little time each week devoted to military drill.

Farm and Garden.—About 4 acres of good land, situated close to the school, have been cultivated with excellent results. Sufficient potatoes, carrots, turnips, beets and other vegetables were grown last year, to supply the home for twelve months, whilst peas, lettuce, radishes and cabbages were also grown in abundance and used in the home. We have 7 cows, 2 horses, 18 hens and 2 ducks on the farm. We have about 5 acres grown to alfalfa.

Industries Taught.—The boys have received instruction in house-painting, butter-making and general dairy work. They are also made responsible for the care of the stock and horses and are given a considerable amount of work to do in the garden. The girls are taught general housework and laundry work and arrangements have been made for them to receive instruction in bread making.

Moral and Religious Training.—Half an hour daily is given to religious instruction, as well as morning and evening prayer. The principal hopes that the moral example of the staff will influence the morality of the Indian children.

Health and Sanitation.—The health of the girls has been, and is, unsatisfactory. Scrofula has been very persistent amongst both boys and girls, four more being out on sick leave and two sick in the home. Every care is taken to prevent contamination and creoline is now being used throughout the building.

Recreation.—Skating, tobogganing, football and other outdoor games are indulged in; every pupil being free from 3.30 to 5 p.m. to indulge in outdoor exercise, when weather permits. In the warm weather swimming is also taught the boys, and the girls, under the supervision of the matron, are allowed to bathe.

3 GEORGE V., A. 1913

General Remarks.—Our boys are bright and intelligent and give satisfaction in school but are not reliable outside. The girls are not so bright at their lessons, but are excellent workers in and about the home and can be relied upon to perform the various duties entrusted to them.

THE REPORT OF J. M. SALAUN, PRINCIPAL OF THE ROMAN CATHOLIC BOARDING SCHOOL, PEIGAN RESERVE, BROCKET P.O., ALTA., FOR THE YEAR ENDED MARCH 31, 1912.

Accommodation.—There is accommodation for 40 pupils and the necessary staff.

Attendance.—The attendance was regular, the pupils are all boarders.

Class-room Work.—The programme of studies is the same as prescribed by the department and is the one followed.

Farm and Garden.—There is no farming done at this school. We do some gardening. Last year, on account of the season being favourable, we had a fair supply of vegetables of all kinds.

Industries Taught.—The boys do the stable work and some other outside works, and besides do their own housework. The girls do the same, and are also taught to cook, mend and sew their own clothes.

Moral and Religious Training.—The children are taught Catholic catechism and Bible history. They also attend very regularly all church services.

Health and Sanitation.—One girl died last September from an affection of the lungs, and one pupil whose sight is affected more or less, is at home; the rest of the pupils are enjoying good health. The sanitary regulations of the department are followed closely.

Ex-pupils.—Some of the ex-pupils threshed their first crop last fall, and undoubtedly have been very much encouraged by the results they obtained.

THE REPORT OF THE VENERABLE ARCHDEACON J. W. TIMS, PRINCIPAL OF THE SARCEE BOARDING SCHOOL, CALGARY P.O., ALBERTA, FOR THE YEAR ENDED MARCH 31, 1912.

Accommodation.—There is accommodation for 20 pupils and a staff of 3.

Attendance.—This has been very good during the past year. There have not been any absences. One pupil was discharged, being of age last autumn, one died and one was admitted. The number at present in the institution is 18.

Class-room work.—The pupils are making very fair progress. The present teacher holds a second-class professional certificate. The standing of the pupils is as follows:—

	Pupils.
Standard I.	6
“ II.	4
“ III.	6
“ IV.	2
—	
Total.	18

SESSIONAL PAPER No. 27

Farm and Garden.—No farming operations are carried on at this school as yet. A large garden produced last summer a plentiful supply of vegetables, but owing to the sudden fall in temperature before the potatoes were taken from the pits about a hundred bushels were frozen, which proved a great loss. The boys kept the garden well weeded during the season.

Industries Taught.—The girls are thoroughly trained in every branch of housework. The head girl last summer took full charge of the kitchen for three weeks during the housekeeper's absence on holiday. All the scrubbing, washing, ironing, mending, bread-making, sewing and a certain amount of dressmaking is done by the girls. The few boys of any size find all the work they can do in milking cows, tending horses, weeding the garden, keeping the fences in repair and cutting up all the wood required for fuel.

Moral and Religious Training.—Daily prayers and Bible reading in the institution, and attendance at the morning and evening services in church on Sundays is compulsory. Every opportunity is taken by the staff of inculcating moral and religious truth. The girls are all members of the W.A. in connection with the Anglican church, and are taught to work and pray for others than themselves. Truthfulness, honesty and consideration for others are instilled into all the pupils as occasion offers.

Health and Sanitation.—There has been no sickness of a serious nature during the year, except in the one case referred to above. Every effort is made to keep the buildings clean and in a sanitary condition. Lime is freely used.

Recreation.—Football is the chief source of recreation for the boys. They are encouraged to be out of doors as much as possible, and in the warm weather are permitted a daily bath in the creek. The girls go for walks almost daily. They have small plots of garden in their grounds in the summer.

Ex-pupils.—All our ex-pupils are at the present time located on the reserve. Some of them are in the employ of the farmers in the vicinity, whilst others are working for themselves. The girls are all married, with one exception, and she prefers to be at home with her mother, going out occasionally to do washing and other housework for the white people in the vicinity. The majority of our ex-pupils keep up their connection with the school and church.

General Remarks.—Mr. and Mrs. Grevett continue on the staff as housemaster and housekeeper respectively. Miss Lear who resigned last fall has been succeeded by Mrs. Dean, who has so far given every satisfaction as girls' matron. Miss Tims, who holds a second-class professional certificate for Alberta, has been added to the staff as teacher.

A great many persons from Calgary, as well as tourists, visit the school during the summer months, and all express themselves as pleased with the general tone of the institution and remark upon the brightness of the pupils and the cleanliness of the building.

THE REPORT OF REV. C. JOUSSARD, O.M.I., PRINCIPAL OF THE LESSER SLAVE LAKE ROMAN CATHOLIC BOARDING SCHOOL, ST. BERNARD'S MISSION, GROUARD P.O., ALTA., FOR THE YEAR ENDED MARCH 31, 1912.

Accommodation.—There is accommodation for 60 pupils and the staff necessary to carry on the work. Our children's dormitories are now provided with iron bedsteads; they have outer doors leading to balconies, also reached by outside stairs for fire-escape and free ventilation.

3 GEORGE V., A. 1913

Attendance.—The attendance during the year was regular, as all the pupils are boarders.

Class-room Work.—The school hours are faithfully observed. The programme of studies is followed with application and success.

Farm and Garden Work.—Both boys and girls are glad in early spring to help in preparing the land for the planting of potatoes, carrots, onions, and flowers. Later on, they help in weeding the gardens.

Industries Taught.—The girls are taught sewing, mending, darning, knitting and general house-work. The boys assist in the work around the house.

Moral and Religious Training.—Instruction in the Roman Catholic faith is imparted to the pupils. Half an hour each day is devoted to religious training and they attend regularly all church services.

Health and Sanitation.—During the past year the pupils' health was particularly good.

Water Supply.—The water supply is obtained from a well and a small river near by.

Fire Protection.—Two fire-extinguishers, six axes, buckets and ladders are always ready in case of fire.

Heating and Lighting.—The heating apparatus consists of a hot air furnace for the main building and stoves for the other departments.

Recreation.—Football and bows and arrows, are the favourite games of the children during the summer months. Coasting, and games in the halls, are the principal recreations during the winter.

THE REPORT OF REV. J. LETRESTE, PRINCIPAL OF THE BOARDING SCHOOL, FORT VERMILION, ALTA., FOR THE YEAR ENDED MARCH 31, 1912.

Accommodation.—There is accommodation for 100 pupils and 7 Sisters.

Attendance.—The attendance is regular, the pupils being all boarders.

Class-room Work.—The subjects taught are reading, spelling, grammar, geography, arithmetic and vocal music.

Farm and Garden.—There are over 80 acres of land under cultivation at present. Most of our children are too small to be of much use on a farm, but they help in the garden.

Moral and Religious Training.—The moral and religious training is based on the pure and unsullied doctrine of the Holy Scripture.

Health and Sanitation.—Every possible precaution is taken to insure perfect sanitary conditions, however the health of our pupils has not been very good this winter. A number have been seriously ill with pneumonia, bronchitis and influenza. Thanks to the zeal and good services of Dr. H. Y. Baldwin, they all enjoy very good health at present.

Water Supply.—The river which flows near the mission furnishes an abundant supply of water for the laundry and other domestic uses. There is also a well inside the house, adjoining the kitchen, which is amply sufficient for the needs of the school.

Fire Protection.—Ladders, stairs and galleries are our chief protection against fire. There are exits from every part of the building, and besides, there is an outer door, balcony and stairway connected with each dormitory.

Heating and Lighting.—The building is comfortably heated by two hot air furnaces. The fuel used is wood. The school is lighted by coal-oil lamps.

SESSIONAL PAPER No. 27

Recreation.—Recreation is taken after meals in the open air, during which the children enjoy outdoor games. In cold weather a long walk is taken almost every day.

THE REPORT OF REV. CHARLES WEAVER, MISSIONARY IN CHARGE
OF THE CHURCH OF ENGLAND BOARDING SCHOOL, WABASCA,
P.O., ALTA., FOR THE YEAR ENDED MARCH 31, 1912.

General Remarks.—I write this report at rather a disadvantage, as for several years I have not had the immediate supervision of the school, my duties being ministerial.

Mr. Broadstock, the late teacher, left last June. His place was filled by Mr. Harris, a candidate for holy orders. Fearing a delay in his ordination, owing to the sudden death of our Bishop, he left for Calgary diocese, so I am taking the school to fill the gap.

Accommodation.—At the present time there are twenty-four children and a lady worker accommodated, but there is no room for more. We have also accommodation in the mission house for one more member of the staff.

Attendance.—The attendance has been fairly good. There was a long delay in some cases in the parents returning their children to school after the holidays. They wished to keep them at home to help in the autumn fishing, also in getting in their little garden.

Class-room Work.—The children are as well advanced in the simple subjects of reading, writing and arithmetic as can be expected from their age. The Cree language is their mother tongue. They are all mastering English, so as to speak it intelligently. Some surveyors were surprised to hear the children speak such good English.

Farm and Garden.—This is a wooded country, and all the land needs clearing. We are at present not able to do much farming, but the boys are learning to care for the stock and to drive horses.

Industries Taught.—We have a good garden which supplies the school with potatoes and vegetables and serves as an illustration to both the children and their parents of the value of cultivating the land. The boys generally help in planting potatoes and similar work.

The girls are taught household work, knitting and sewing. The two elder girls are good plain cooks and bread-makers.

Moral and Religious Training.—The religious training is what the missionaries naturally regard as the most important. By precept and example, as occasion offers, the pupils are taught morality, cleanliness and patriotism. Our text-book of religion is the Bible. The children of the more advanced classes are taught texts and the meaning of Bible terms, such as 'faith.' The younger ones are taught in the vernacular the Creed, Commandments and the Lord's Prayer. In the evening the New Testament is read in Cree and explained and questions asked the elder children following the reading in their Cree New Testaments.

Health and Sanitation.—The health of the children has been good, and with the exception of colds and influenza, there has been no serious illness. One little boy seems subject to sore eyes. Skin diseases seem to be prevalent.

The sanitation is fairly good. Of course in a new place like this there is no artificial system of drainage, but the natural fall is good. We have a deep well and water for washing purposes is always drawn from the lake some distance away. The buildings are not ceiled under the roof, so there is always ventilation in the dormitories.

3 GEORGE V., A. 1913

Recreation.—The children are encouraged to play outside as much as possible. Last summer there was football and cricket. The children are often taken out by the teachers or matron canoeing and bathing. In the winter many of the children skate if there is any bare ice. Some years ago skates were provided for the whole school. During the long winter evenings, they are taught many games. Some of them enjoy reading such books as 'The Wide Wide World' and 'Uncle Tom's Cabin.'

Ex-pupils.—When the boys or girls leave school there is nothing for them but to go back to lives like their parents. The old people almost all make their living hunting and trapping, but while the young people make their living in the same way, there is a decided improvement in their surroundings, many of the girls taking a pride in keeping their houses clean. The men, too, are improved, they are making gardens and trying to get a little stock. Some of them have learned to drive horses. They seem to value education more for their children than their parents did.

The example of our ex-pupils is in some cases educating their relatives in cleanliness. On one of my itinerating trips to Loon lake, north of here, I noticed three little girls come to the service very clean and tidy and they all had on aprons very neatly made with shoulder straps. I inquired who had made them, they said their mother had. She had taken the pattern from one worn by a cousin of theirs who had been to our school.

The hope of this work among the children is in the future. The next generation will show the results of the education given to their parents. Gradually the conditions of life here are changing. The young people are already realizing that they must depend now mostly on the white man's way of getting a living, instead of by moose hunting and trapping.

THE REPORT OF SISTER CATHERINE AURELIE, PRINCIPAL OF THE ROMAN CATHOLIC BOARDING SCHOOL, LAKE WABASCA, ALTA., FOR THE YEAR ENDED MARCH 31, 1912.

Accommodation.—The school can accommodate 50 pupils and 7 Sisters.

Attendance.—The pupils being all boarders, the attendance is regular.

Class-room Work.—The subjects taught are: Christian doctrine, reading, spelling, writing, arithmetic, grammar, geography, drawing, history of Canada, and vocal music. Oral examinations are held monthly by the reverend Fathers. Good progress was made in the class-room during the past year and the children have improved greatly in speaking English.

Industries Taught.—The care of cattle, milking, gardening and the preparation of fuel keep the boys quite busy. The girls are taught cooking, washing, sewing, knitting, mending and house-keeping in general.

Moral and Religious Training.—A half hour is devoted daily to the religious instruction of the pupils by the missionaries, besides the explanations so often provided on this important subject by the teacher. The general behaviour is good.

Health and Sanitation.—The school is well ventilated and fresh air is never lacking. All the pupils have enjoyed good health throughout the year.

Recreation.—The children have plenty of out-door exercise; recreation is taken in the open air every day, weather permitting. It consists in football, foot-racing, swinging and sliding in winter months. Picnics, taken during summer, are most liked by the pupils.

Ex-pupils.—The few boys and girls that have already been discharged from the school are living with their parents and they behave well.

SESSIONAL PAPER No. 27

THE REPORT OF C. D. WHITE, PRINCIPAL OF THE BOARDING SCHOOL,
WHITEFISH LAKE, ALTA., FOR THE YEAR ENDED MARCH 31, 1912.

Accommodation.—Much care has been taken in the laying out of the ground floor of the main building, to bring every foot into use, as it has to serve the purposes of a dining-room, a school-room, which is also used as boys' play-room, also a small room for the staff. There is accommodation for 24 pupils and 3 of a staff.

Attendance.—There were 16 children in the Home part of the December quarter, but the class-room average was only 13, measles was the cause of this; the attendance for the March quarter was over 17; during the year we had 37 pupils on the roll.

Class-room Work.—The subjects taught are: Religious instruction, reading, writing, arithmetic, recitation, ethics, geography, English, general knowledge, singing and physical exercise.

Farm and Garden.—There is a good sized garden of about 1½ acres, producing vegetables for the home consumption. Onions, carrots, peas and potatoes, do very well in this soil, which is manured every spring.

Industries taught.—Gardening, and the general work required in connection with a home of this kind, comprise the industries taught.

Moral and Religious Training.—Great care and attention is given to the instruction of the children, and to endeavour to have them understand what is their duty to God and man. The larger boys copy out moral and religious truths, which are put up in the school-room for all to see and read. The religious training is that of the church missionary society.

Health and Sanitation.—An epidemic of la grippe broke out in the Home and settlement about the beginning of the fiscal year. This produced tubercular trouble. One of the boys was taken by his parents, and after the close of the school term he succumbed to this disease at his own home. Every precaution is taken as regards the sanitary condition of the school. The epidemic of measles that swept this province reached our home at the beginning of December. One room was isolated and as soon as any child showed signs of this disease, it was immediately removed to the sick quarter. The assistant matron was in charge of the patients, and slept in the room. Disinfectants were freely used. The medical inspector sent by the Alberta government at this time visited us and stated that we were taking every necessary precaution. All our pupils but three took this disease, but got over it well. Soon after la grippe visited the whole settlement, and also the children in our home, but they were not long in recovering. This la grippe produced stomach tuberculosis among some of the young children not in the home, and proved fatal in two cases. There is no doubt but that care and good food has enabled our children to battle against these sicknesses; they all look better, some much better than when they first came in.

The inside and outside of the home was whitewashed with lime, disinfectants were used, and in the spring all refuse and rubbish was raked up and burnt. This has been an exceptional winter for sickness throughout the province. As a rule, the health of the pupils is good.

Recreation.—Time is given for recreation at mid-day and after school. The boys enjoy football, also tobogganing in winter. In summer they are fond of bows and arrows, and swinging. The girls enjoy tobogganing, skipping and swinging.

Ex-pupils.—All the boys and girls of this class live in the settlement. The ex-pupils like visiting the mission and home, especially during the children's play hours. They have become more regular church attendants. Not much can be said under this head as this institution has not long been established.

3 GEORGE V., A. 1913

Fish.—The supply last fall for winter purposes was limited, but the quality of the whitefish was good. They are caught late in the fall and frozen, and generally keep good till the spring.

General Remarks.—All the buildings are enclosed within a rail fence, five rails high. This fence encloses about eighteen acres, nearly all cleared.

**REPORT OF THE REV. SISTER McQUILLAN, PRINCIPAL OF THE FORT
RESOLUTION BOARDING SCHOOL, FORT RESOLUTION, N.W.T. FOR
THE YEAR ENDED MARCH 31, 1912.**

Attendance.—Twenty-seven Indian children attended class regularly during the year; 16 boys and 11 girls. They are all boarders.

Class-room Work.—The programme of studies prescribed by the department is closely adhered to. The pupils do all they can to improve in their studies, and I am glad to say that a true emulation exists among them, and the progress of a great number is very satisfactory. They are also becoming much more familiar with the English language. Lessons in calisthenics, military drill, dumb-bell exercises and singing are daily given to the children. Hygiene is one of our principal studies this year.

Industrial work.—Our children have special hours during the day for manual work. The girls are kept busy sewing, knitting and mending. The eldest girls run the sewing machine. They also do all their own cooking and attend to their dining-hall, and under careful supervision have made rapid progress. The boys help with the washing, saw, split and cord the wood. They also help in the garden.

Moral and Religious Training.—The conduct of the pupils has been uniformly good, and their prompt submission to the rules of the school is most remarkable. Half an hour is devoted each day to religious knowledge in their own language. The discipline is enforced almost exclusively by means of religious exhortations, prizes and distinctions of honour.

Health and Sanitation.—I am pleased to report that another year has passed without one case of sickness. The sanitary conditions are good on account of the situation of the school. All our windows can be lifted from the bottom and pulled down from the top, thus admitting free and ample circulation of air.

Water Supply.—We have a well in the basement which affords an ample supply of good, wholesome water.

Fire Protection.—Chemical fire extinguishers, buckets and ladders are stationed at convenient places in case of fire. Wide and convenient stairs on each side of the doors of communication well disposed, would permit the children to escape in case of fire.

Heating and Lighting.—This is accomplished by means of two hot air furnaces and one stove for kitchen use; the lighting is done by coal oil lamps and wax candles.

Recreation.—In the winter coasting and other outside sports are engaged in, also different games during the evening in the school-room; football is a favourite pastime, and many other games are played during the summer. A splendid picnic was given this year which all enjoyed immensely. We went about 30 miles up the Slave river in the mission steamer and camped there for several days. The children enjoyed themselves boating, berrying and swimming. Some days previously one of our employees placed two bear traps, and during our stay captured two bears. One of them was still alive when we visited the trap, but was wild with fury. A shot was fired and the poor animal fell to the ground. The present healthy condition of the children is not a little due to these outdoor exercises.

SESSIONAL PAPER No. 27

Stock.—This consists of five milch cows, two oxen, one bull, two yearlings, and two young calves.

General Remarks.—I acknowledge with pleasure and gratitude the ample supply of class-room material, also 25 iron bedsteads, given by the department during the last year.

We have met with a severe loss in the death of Dr. Rymer. The sterling virtues of integrity and industry which distinguished him, secured the allegiance of men of all creeds.

Dr. Bell, M.D., of Ottawa, favoured us with two very pleasant visits during his stay here last summer, also Inspector Conroy, Dr. McDonald, and Sergeant Field, who are always welcome visitors at our school.

THE REPORT OF THE VEN. ARCHDEACON I. R. LUCAS, PRINCIPAL OF
THE ST. PETER'S MISSION BOARDING SCHOOL, HAY RIVER, GREAT
SLAVE LAKE, N.W.T., FOR THE YEAR ENDED MARCH 31, 1912.

Accommodation.—The school and staff-house have accommodation for 40 pupils and a staff of 5 persons.

Attendance.—The pupils of our institution being boarders, the attendance is most regular.

Class-room Work.—Steady progress has been made by the majority of the pupils. The subjects taught include reading, writing, arithmetic, history, composition, hygiene, geography, vocal music, and holy scripture in the English, Slavi, and Tukulud languages.

Farm and Garden.—All our available ground is planted with potatoes. Last year we obtained 600 bushels. All varieties of vegetables are grown in our gardens and thrive well. Flowers are sown by staff and children. This work is done by the boys of the school under our supervision. Our hay supply is derived from the natural grass found along the river banks and sloughs nearby. The prevalence of the horsetail or equisetum makes it increasingly difficult to obtain good hay in sufficient quantities.

We have three milch cows, one bull, and one calf. The bull and cow haul the firewood. Other hauling is done by the dogs during the winter.

Industries Taught.—The boys are taught fishing, ploughing, dog-driving, milking, the use of tools and building. The girls learn the various branches of housework, cooking, sewing, washing, and moccasin making.

Moral and Religious Training.—This is most carefully attended to, the children being taught thoroughly their duty to God and man.

Health and Sanitation.—The health of the pupils has been excellent during the greater part of the year. One death has recently occurred from meningitis. All possible precautions are taken to preserve the healthfulness of the school. The rooms are well ventilated. There are no cesspools near the house; all rubbish is removed and burnt to avoid infection. Water is supplied from the river flowing past the school.

Recreation.—The girls and boys have separate playgrounds which are made use of to their fullest extent for outdoor games. Long walks are also taken in winter and summer.

Ex-pupils.—Most of the ex-pupils have returned to their parents or guardians and live in the woods hunting. Some are married to men holding good positions.

Two are clerks in the service of the Hudson's Bay Company. Others work regularly on the river steamers.

3 GEORGE V., A. 1913

THE REPORT OF SISTER ST. ELZEAR, PRINCIPAL OF THE PROVIDENCE MISSION (SACRED HEART) BOARDING SCHOOL, FORT PROVIDENCE N.W.T., FOR THE YEAR ENDED MARCH 31, 1912.

Accommodation.—The present buildings provide accommodation for seventy pupils and the necessary staff.

Attendance.—All the scholars are boarders and consequently attend school regularly.

Class-room Work.—The subjects taught are reading, writing, arithmetic, history, grammar, composition, and hygiene. Besides this, two hours are given to vocal music lessons per week. In general, the pupils give satisfaction.

Farm and Garden.—We have no real organized farm in connection with the school; still we generally keep 25 to 30 head of cattle, for the wintering of which the Oblate Brothers have to provide hay from very different and distant places. During summer, the milch cows furnish the daily supply of milk and butter for about fifteen persons. The oxen are used for hauling, ploughing, sowing and harvesting. The crop was not good this year, on account of the dryness of the weather.

Industries Taught.—The girls learn the various branches of housework and how to make and repair their own clothes, including moccasins for all the school children. The boys provide water for the whole establishment by means of a capstan; they also saw and chop the wood for fuel. Both boys and girls are trained to work on the farm and garden.

Moral and Religious Training.—Religious instruction is given the pupils half an hour each day, and I am glad to say the consequences are gratifying.

Health and Sanitation.—The general state of health has been exceptionally good throughout the year.

Recreation.—Both winter and summer the children take a long walk each day. Besides, they are encouraged to take part in the different outdoor games becoming to their sex.

Financial Statement.—All our goods are bought in Montreal and paid for by the Bishop of the diocese. All freight charges and mission helpers are also paid by His Lordship.

THE REPORT OF REV. D. CLAESSEN, PRINCIPAL OF THE INDUSTRIAL SCHOOL, KUPER ISLAND, B.C., FOR THE YEAR ENDED MARCH 31, 1912.

Accommodation.—The institution can accommodate from 75 to 80 pupils.

Attendance.—During the year 77 pupils were in attendance. The average attendance was 66; 9 pupils were formally discharged, and 6 admitted.

Class-room Work.—The school hours were from 8.45 to 11.45 a.m., and from 4.30 to 5.30 p.m. Monthly examinations are held by the principal. The pupils made fair progress and were graded as follows at the end of the year:—

SESSIONAL PAPER No. 27

	Pupils.
Standard I.	8
“ II.	13
“ III.	13
“ IV.	16
“ V.	11
“ VI.	6
Total.	67

Farm and Garden.—Instruction in farming and gardening is imparted to all the boys. The seniors in turn do the heavier work.

Industrial Work.—*Carpentry*.—Six boys received instruction in the trade for which they seem to have a special liking.

Shoemaking.—Two boys did nearly all the mending.

Painting.—Three boys were employed at this work, mostly on the inside.

Baking.—Two of the seniors were trained for baking, one of whom has now found employment in the city.

Dairying.—The senior boys do the milking. Two operate the cream separator and make the butter.

Laundrying.—Boys and girls are detailed for this work every Monday under the supervision of the laundress.

Girls' Industrial Work.—The girls do all kinds of general housework. They show great skill in hand and machine sewing, dressmaking, crochet and fancy work.

Moral and Religious Training.—Religious instruction is given every day for half an hour. Morning and evening prayers are said in common daily. It is wonderful how easily the children adopt and put into practice the higher and uplifting ideals of religion, to which we mainly ascribe the success of our work.

Health and Sanitation.—A great improvement is noticeable in the health of the children within the past two years. The principles of hygiene in the matter of nutrition, clothing, exercise and ventilation have been closely adhered to.

Water Supply.—Our water system, with hydraulic ram renewed a year ago, works splendidly.

Fire Protection.—The danger of accidents has been reduced to a minimum by providing for a rapid escape in case of fire. For fire-fighting, ladders, buckets, fire-axes, &c., are kept in the most convenient places.

Heating and Lighting.—The heating is done with heaters and box stoves and is unsatisfactory, though very expensive on account of too many scattered buildings.

All the rooms are lighted with acetylene gas.

Recreation.—Basketball in winter-time and football or baseball are much enjoyed by the boys; while the girls are fond of skipping, walking, and ball-playing. All get plenty of boating and swimming when the weather is suitable. We have occasional concerts with brass band selections, recitations, songs and drills. The music and drills have elicited the highest praise from our visitors.

General Remarks.—I wish to thank the officers of the department for their courtesy.

THE REPORT OF R. H. CAIRNS, PRINCIPAL OF THE COQUALEETZA INDUSTRIAL SCHOOL, SARDIS, B.C., FOR THE YEAR ENDED MARCH 31, 1912.

Accommodation.—The main building will accommodate 90 pupils, and a staff of 10 teachers.

Attendance.—One hundred and one pupils have been in attendance during the year. Of these 86 are now in school, 9 were discharged, and 6 are away on holidays.

Class-room Work.—The hours of study in the schoolroom are from 9 to 12 a.m., and from 1 to 4 p.m. Each pupil is in the school room one half of each day. One girl who was in the school six years passed the entrance examination last year. She entered the school at 10 years of age and passed at 16 years of age. She went to school one half of each day, making three years of actual attendance to finish the public school course. This is an exceptionally good record. She came from Queen Charlotte Islands. Our teachers are doing faithful work. At the close of the year the pupils were graded as follows:—

Standard	I.	21
"	II.	15
"	III.	18
"	IV.	7
"	V.	16
"	VI.	9
Total.		86

The older girls receive instruction in music. They play for all our religious services. Both boys and girls are fond of singing, and get plenty of practice. Books and magazines are supplied and the pupils are encouraged to read. The older boys keep in touch with the world through the daily papers. The pupils are receiving a good all-round practical education.

Farm and Garden.—The crops of last year were good. The following were produced: 12 tons of oats, 55 tons of turnips, 10 tons of field carrots, 35 tons of potatoes, 2 tons of wheat, 5 tons of mangolds, 80 tons of hay. In the garden there were large quantities of parsnips, cabbage, celery, carrots, rhubarb, pumpkins, squash, cucumbers, radish, onions, beets and berries. Our apple crop was very small. The live stock consists of 14 cows, 1 bull, 4 hogs, 6 horses, and 60 hens.

Industries taught.—The boys learn all branches of farming, including milking and the feeding of stock. They become efficient as teamsters. It takes over 300 cords of wood for our furnaces, and the kitchen range. This is hauled home by the boys. The boys also do all our repairs in and around the buildings. Four of them, each year, learn to bake bread. Then the garden gives employment during the summer months to a number of boys. The girls are taught washing, cooking, baking, sewing, and all kinds of housework. The pupils who take a full course in our school are in a splendid position to earn for themselves a good living, as well as to live a good life. To take the raw material that we get and turn out a fairly good product calls for splendid teachers.

Moral and Religious Training.—This part of the education of the pupils is not neglected. They get a fairly good knowledge of the Scriptures in Sunday school, which meets at 9.30 a.m. each Sabbath. A Junior Epworth League is carried on. The pupils take an active part in the services. Nearly all the pupils are disciples of Jesus.

Health and Sanitation.—The health of the pupils has been fairly good. There has been very little sickness. One girl showed signs of weakness. She was sent home, and seems to be developing tuberculosis. This is the only case among the 40 girls in the school during the year. Two boys have swollen glands. They will be sent home in a few days. This is the extent of our sickness during the year among the 101 pupils enrolled. In this I am not taking into account slight indisposition from colds. All drains are systematically and regularly flushed. Crude carbolic is used at least once a week for disinfecting the drains.

Recreation.—The pupils have regular play hours each day. The boys play football. They are in the Chilliwack league, and are very much interested in all sport. The girls also play a great deal in the open air.

SESSIONAL PAPER No. 27

General Remarks.—Good faithful work has been done by the staff. Both the officials of the Church and of the Indian Department have been responsive to the needs of the work. Good reports reach us concerning many of the ex-pupils. Their conduct compares very favourably with men and women of the same class among the white race. Gradually the Indian is being raised to a higher plane of civilization. Education is the lever that is doing this work. Every effort should be made to increase the efficiency of all the schools among the Indian people.

THE REPORT OF REV. ALPH. M. CARION, PRINCIPAL OF THE KAMLOOPS INDUSTRIAL SCHOOL, KAMLOOPS, B.C., FOR THE YEAR ENDED MARCH 31, 1912.

Accommodation.—There is sufficient accommodation for 60 pupils and the necessary staff.

Attendance.—During the past year, only 64 pupils have been in attendance; 33 boys and 31 girls. Owing to present lack of accommodation for more pupils, some applicants had to be turned away. After the summer holidays 22 pupils were discharged and 18 admitted with the consent of the department.

Class-room Work.—The school hours for all the boys were in the morning from 8.45 till 12 o'clock, every week day, except Saturday; and in the afternoon from 4.45 to 6.15. Besides, the boys of the lower grades attended school from 1.30 to 2.30 p.m. The school hours for the girls were from 2 to 5 o'clock in the afternoon, with half an hour's study in the evening. The course of studies prescribed by the department was followed as nearly as possible. Special attention was given to the subject of hygiene; the deep breathing movements and calisthenic exercises are regularly practised by the boys. The girls advance rather slowly, but the boys are making rapid progress.

At the end of the fiscal year, the pupils were graded as follows:—

Standard	I.	28
"	II.	12
"	III.	6
"	IV.	10
"	V.	4
"	VI.	4
	Total.	64

Farm and Garden.—In farming operations this institution is handicapped by lack of cultivable ground and still more by lack of water for irrigation. All that can be done by means of gasoline engines and windmill, is to raise alfalfa for fodder, roots and vegetables. The hay crop was good, but scarcely sufficient, as we had to feed the animals from the beginning of November, owing to a heavy fall of snow. The garden produced 20 tons of potatoes, 900 lbs. beans, 486 lbs. peas, besides carrots, mangolds, onions, parsnips and rhubarb. Currants, gooseberry and raspberry bushes gave a good crop as usual, but the produce of the orchard was very poor. All the boys are employed at farm and garden work. They milk the cows and attend to the stable work in turn, outside of the regular work hours which are from 1.30 to 4.30 p.m. The live stock consists of four horses, one bull, four cows, one heifer, two yearling heifers and fifty-three fowls. This winter many loads of manure were hauled from town and the Indian reserve to enrich the garden.

Industries Taught.—*Carpentering*.—Twelve boys have received more or less instruction in the practical rudiments of carpentry. They have made the repairs

needed about the buildings, built a toilet room, made sashes for the laundry and painted some of the buildings with cheap powder paint.

Shoe-repairing.—Five boys were employed in repairing the shoes of the pupils and occasionally of Indians, as well as harness and saddle used on the farm.

Baking.—The boys were employed in turn in doing the heavier part of the work, and the girls did the rest. They have always succeeded in turning out first-class bread.

Girls' Work.—The girls did the cooking and washing, and were taught all the branches of housekeeping. Besides the help they gave in the general baking, they were made to go through the whole process of making bread on a small scale in the kitchen stove oven. They were taught also hand and machine sewing, knitting, mending and darning. They made all their dresses and other articles of clothing.

Moral and Religious Training.—Every possible attention is paid to this most important branch of education. Religious instruction is given by the principal almost daily for half an hour, and constant supervision is exercised over the pupils in order that they may acquire more easily the habit of fulfilling all the duties they owe to God, to their neighbour and to themselves. Morning and evening prayers are said in common. On Sunday the pupils assemble three times in the chapel and half an hour is devoted to the study of the gospel.

Health and Sanitation.—In general, the health of the boys has been good; there were only a few cases of skin disease amongst them. But the health of the girls gave us more concern. In September last one of the older girls, while busy in scrubbing a worn-out floor, got a splinter very deep in her finger; symptoms of blood poisoning appeared and it was necessary to send the girl to the hospital where an operation removed all danger. In the beginning of December measles broke out amongst the girls. The medical officer was called at once and the necessary precautions were taken. One of the two girls' dormitories was converted into an isolation hospital, and the girls were crowded into the other. Only nine cases developed, and after a few days, the disease disappeared. Under direction of the medical officer, everything connected with the epidemic was disinfected. In February, a little girl had to be sent to hospital to be treated for glandular swelling; she returned after eleven days. She has very much improved, but she is still under treatment by the doctor. Another little girl was operated to remove some glands which impaired her hearing. It may be remarked that it is the first time since the opening of this school, nineteen years ago, that it has been necessary to send pupils to the hospital. The sanitary conditions are at present unsatisfactory, owing principally to the fact that the wooden sewer got choked last winter by the ground falling through the rotten planks. Garbage and refuse matter are not allowed around the buildings; chloride of lime and lye are used as disinfectants. Ventilation is carefully attended to, and the pupils are often reminded of the importance of securing a constant supply of fresh air.

Recreation.—The pupils are allowed ample time for recreation during the weekdays, and on Sundays and holidays, they usually take a long walk through the country. They indulge in the ordinary amusements suitable to their age and sex, such as baseball, jumping, running, coasting, skating, and swimming. They are all fond of outside exercises which the dry climate of Kamloops affords them the whole year.

Ex-pupils.—The ex-pupils, as a rule, continue to do well. Some reside on their reserves and cultivate their little farms, though occasionally they work out for wages. Others are employed more or less steadily on railroads, steamboats, saw-mills and logging camps, and farms, where they give general satisfaction. Most of the female ex-pupils remain at home with their parents till they get married; a few are employed as housekeepers by their white neighbours and their services are very much sought after. It is gratifying to report that quite a number of marriages have taken place between ex-pupils. It is real pleasure to see them occasionally visit the school with their young children, all looking so clean and so tidy. Many ex-pupils are regular subscribers to magazines and newspapers, and keep up friendly relations with

SESSIONAL PAPER No. 27

the school by visits and correspondence. They express their gratitude for the education they have received, and when writing to their relatives at school they give them good advice about the diligent use of their opportunities.

THE REPORT OF REV. FELIX BECK, O.M.I., PRINCIPAL OF THE
KOOTENAY INDUSTRIAL SCHOOL, ST. EUGENE, KOOTENAY
AGENCY, B.C., FOR THE YEAR ENDED MARCH 31, 1912.

Accommodation.—The beautiful, new building will provide accommodation for 80 children and a staff of 12 members.

The parents are so anxious to have their children attend school, that several on applying had to be refused owing to the want of room in the old buildings.

Attendance.—Although the grant allowed is for only 60 children, there was an average attendance of 70.

With permission of the department, ten of the pupils were discharged and ten others admitted.

Class-room Work.—The school hours for the boys are from 8.30 to 11.15 a.m., with a half an hour of study in the evening and another half hour in the morning before school.

The school hours for the girls are from 1 to 4 p.m., with an hour's study in the evening.

The programme of studies authorized by the department has been closely followed.

The subjects taught were reading, writing, spelling, grammar, history, arithmetic, geography, hygiene, catechism, bible-history, and exercises in calisthenics.

The children are attentive, apply themselves and they have made satisfactory progress.

Lessons were given in music, both vocal and instrumental. The boys' brass band and the girls' string band are both under the training of R. W. Russell of Cranbrook. They each receive a two hour's lesson every week, and the selections rendered on several different occasions speak to their credit.

The children are classified as follows:—

	Pupils.
Standard I.	15
“ II.	11
“ III.	13
“ IV.	17
“ V.	4
	—
Total.	60

Farm and Garden.—There are 30 acres in connection with this institution, besides which 100 acres belonging to the Sisters of Charity are cultivated, in order to give the boys a thorough training in farming. The first piece is partly laid out in an orchard which was so laden with fruit last year that many of the branches had to be propped up to prevent them breaking.

There is also a garden which produced an abundant supply of vegetables for kitchen use and for stock.

Industries Taught.—Under the supervision of the foreman, the boys received instruction in farming, gardening, carpentering, caring for the cattle, in fact everything requisite to keep a farm in good order and in good condition.

They are trained in the art of seeding, cultivating and harvesting by the use of the different kinds of agricultural implements.

They learn to put in practice lessons taught them in carpentry, by keeping the fences, walks, and out-buildings in repair.

Some have learned shoe-making and mend all the children's shoes and also the harness used on the farm.

The girls are trained in all kinds of work that appertains to good house-keeping, such as laundrying, house-cleaning, cooking, baking, dairying, and sewing. They make and mend all their clothes. Some are quite proficient in dressmaking. The children take a great interest in their work.

Moral and Religious Training.—Each day the children assist at Holy Mass and say their morning prayer in common. On Sundays and holy days they attend the public services in the church.

Principles which lead them to love and respect God and those in authority are impressed upon them daily, and on Thursdays they are particularly instructed by the principal himself.

The children are constantly supervised by one or other of the members of the staff and they observe the rules well.

Health and Sanitation.—The children's health has been good; the only exception having been a few cases of chicken-pox, which were very light.

They enjoy plenty of open air exercise and have sufficient, well-cooked, substantial food.

The ventilation is fairly good and the premises well kept.

The refuse water is carried off by means of the sewerage system and disinfectants are used wherever necessary.

Recreation.—All games suitable to the age and sex of the children are enjoyed by them, these varying with the seasons of the year. The boys take great pleasure in skating, coasting, hockey, horseback riding, baseball, football, marble-playing and hunting and fishing. The latter they find very plentiful in St. Mary's river, and game is also plentiful in the vicinity.

The girls amuse themselves by skating, coasting, skipping, swinging, playing tag and such games. They while away the winter evenings by round games, story-books, music and singing.

Ex-pupils.—Nearly all the ex-pupils are living on the reserve. Some of them are married and keep themselves and their homes in good order, everything neat and clean. Those who are not married are living at home with their parents. Among the former, those who have children old enough to attend school show their appreciation of education by placing their children in school as soon as they have reached the proper age.

General Remarks.—I cannot close this report without expressing my appreciation and heartfelt gratitude to the officers of the department, for having done so much towards obtaining for us the erection of the new building which is so badly needed. Many more children can be taken and conveniently cared for; the results from whom are very promising, as the second generation who are much brighter than the first, are beginning to come to school. I also tender my sincere thanks to Inspector Green and Agent Galbraith, who have both taken such a deep interest in the welfare of our institution and rendered valuable assistance by their kind encouragement during their regular visits.

SESSIONAL PAPER No. 27

THE REPORT OF REV. LEONARD DAWSON, B.A., PRINCIPAL OF THE
LYTTON (ST. GEORGE'S) CHURCH OF ENGLAND INDUSTRIAL
SCHOOL FOR INDIAN BOYS AT LYTTON, B.C., FOR THE YEAR
ENDED MARCH 31, 1912.

Accommodation.—There is accommodation for 40 boys, but if all the available boys of the district were compelled to attend school, there would be need for larger accommodation. This would immediately be met by enlargement or alteration of the school buildings.

Attendance.—When I took charge in June, 1911, the school had dwindled down to 5 pupils, but at the present time there are 22 boys on the books, of whom one is in the Indian hospital at Lytton. In spite of every care there for the last 9 months, he is dying of tuberculosis.

The school hours are from 9 to 11.45 a.m. and 5 to 5.45 p.m. on three days in the week. On two days, Tuesday and Thursday, the boys are divided into two sections, one section being taught in the morning from 9 to 11.45 a.m., and the other from 1.30 to 4.15 p.m.

Class-room Work.—The class-room work is under the immediate care of our trained and certificated schoolmaster, Mr. Blackmore. The boys have made good progress.

Nominally, we have four standards, I. to IV., but with necessary subdivisions to meet extent of boys' knowledge or want of it, it really involves eight standards, or classes; which it is very difficult for one teacher to manage. We use the aid of some of the elder boys for a small part of the time, as monitors or pupil teachers, which helps them also in their own education. The majority of the boys are slow at book-learning.

Recreation.—Under the guidance of Mr. Blackmore, the schoolmaster, at a certain stated hour daily, the boys play cricket, football, hockey or baseball, and many have learned to swim. They are now playing games with greater zest and pluck.

Ex-pupils.—No boys have left during the last year, but speaking generally, the ex-pupils are not as satisfactory as one would wish. This is largely due to want of suitable work on leaving the school—so few of their parents have farms, owing to the scarcity of suitable land and water for irrigation—so there is no opening for them there.

The result is they often go and work in Canadian Pacific railway section gangs, which is sure to deteriorate them and in my judgment the Indian agent should have power to control the work and life of these boys and by aid of farm instructors and provision of suitable and irrigated land encourage them to farm land of their own, for which life they have been trained here.

We are trying to make this institution and farm a centre for instructing and encouraging the young men, who are no longer scholars, and already we have some response to our efforts on their behalf.

Some of them I have gladly employed as extra day labourers.

We shall have an annual re-union for them at the school.

Farm and Garden.—Attached to the school is an extensive farm and garden, of which some 100 acres are under cultivation.

The boys are directed in such work as they are physically capable of by an excellent staff consisting of farm instructor, who is also blacksmith and butcher, a carpenter, market gardener, and farm labourer, who is especially good with horses and ploughing, also instructs the boys.

3 GEORGE V., A. 1913

The boys, when old enough, assist in turn with the milking of 8 cows, and in butter-making, the latter is down under my daughter's care.

Poultry also are kept.

We supply the school with milk, butter, eggs and vegetables, and have a balance of each for sale at Lytton and elsewhere.

Indoor Work.—Our college-trained teacher also instructs the boys in drilling and breathing exercises.

The matron directs the boys in the repair of their clothes, darning of their socks, and keeping the school clean.

A laundry woman directs the boys in the washing of their own clothes, on one afternoon each week.

A shoemaker, an Indian, comes from time to time and teaches some of the boys boot-mending.

Moral and Religious Training.—This is especially under my care, though with the valued assistance of the members of the staff, we have morning and evening prayers daily in our beautiful chapel, built by the New England Company, and Sunday school on Sunday with usual services.

There are distinct signs of a higher moral tone gradually growing up.

We trust the boys and when any offence is committed we leave the boys to find out the culprit themselves and thus develop good public opinion.

Health and Sanitation.—The buildings are airy with good sanitary arrangements, but we try to develop greater strength and better health by careful and liberal diet.

These Indians need all the help to build them up, and we have seen distinct signs of improvement in physique and appearance in the course of a few months.

Drilling and breathing exercises are frequently held and help towards better health.

THE REPORT OF A. W. CORKER, PRINCIPAL OF THE ALERT BAY INDUSTRIAL SCHOOL, ALERT BAY, B.C., FOR THE YEAR ENDED MARCH 31, 1912.

Accommodation.—There is an accommodation for 35 pupils and 3 officers.

Attendance.—The average attendance was 33.

Class-room Work.—The work done in the class-room has been excellent. Good progress has been made in English, arithmetic, geography, reading and history.

The principal has taught all the year, ably assisted by George Luther, an ex-pupil of this institution.

The programme of studies authorized by the department is followed.

The pupils were graded as follows:—

Standard	Pupils.
I.	4
" II.	5
" III.	6
" IV.	6
" V.	8
" VI.	4
Total.	<u>33</u>

SESSIONAL PAPER No. 27.

Farm and Garden.—The flower garden was tended by the matron, Miss Warrener and smaller boys. Most of the boys have a patch of their own; seeds are given them, and prizes are awarded for the best.

The boys took a keener interest in their plots than in previous years.

The vegetable garden yielded a good supply of fresh vegetables and small fruit. Cabbages have been cut the whole year.

The strawberries and squash were very fine and plentiful.

The potato crop in one field was fair, the rest poor owing to the exceptionally dry summer.

Nearly an acre of land has been cleared during the year.

Industries Taught.—All the smaller boys received definite and systematic teaching in the general housework of the institution. The older boys had regular instruction in the carpenter's shop, under Mr. Elie Hunt, and they have made very good progress.

The pupils have done all the washing, under the direction of Miss Warrener, who is indefatigable in this branch of the work.

Moral and Religious Training.—The moral and religious welfare of the pupils is strictly and conscientiously looked after. Morning and evening prayers are said daily. A Bible lesson is given daily to each class, and a prayer meeting held every Saturday.

The pupils attend Sunday services in church, morning and evening, and Bible classes are held in the institution every Sunday afternoon.

The pupils are continually taught the necessity and advantage of purity of mind and body.

Health and Sanitation.—The general health of the pupils has been excellent.

The sanitary arrangements are good. A new terra-cotta drain has been put in during the year to replace the wooden drain, and good sanitary drain traps put in. The department supplied the pipes. The work was done by the pupils under the trades instructor.

Cleanliness is enforced and disinfectants used freely. Ventilation is carefully attended to. The wall cards respecting house-flies sent by the department were hung up and the instructions carried out.

Recreation.—The pupils are encouraged to play all healthful outdoor games, football, baseball, lawn-tennis, running and drill.

Indoor games, draughts, parlour croquet, chess, and educational games are played.

Ex-pupils.—Very friendly relations exist between the ex-pupils and the school, many of whom live in the vicinity. Considering the surroundings in which these are placed, they are fairly industrious, and well conducted on the whole. Some are working in camps, logging, others occasionally work in the saw-mill.

General Remarks.—It is with thankfulness that I send off this report of another year's work among Indian children.

The pupils have taken a keen interest in their studies, and have done their manual work in a satisfactory manner. The painting and repairs to the institution have made more work, but the boys have risen to the occasion and have done their work well and willingly, and have taken pride in their work for the school.

The Rev. A. E. Green, inspector of Indian schools, paid two visits to the institution during the year, and said 'he was much pleased with all he saw and inspected.'

Mr. Ditchburn, the inspector of Indian agencies, visited the school and spoke nicely to the boys, and gave them some good advice.

He praised the general bearing and healthy appearance of the boys.

THE REPORT OF REV. FROBEN EPPER, PRINCIPAL OF THE CLAYOQUOT INDUSTRIAL SCHOOL, CLAYOQUOT, KAKAWIS, VIA VICTORIA, B.C., FOR THE YEAR ENDED MARCH 31, 1912.

Accommodation.—This school has comfortable accommodation for 60 pupils and a staff of 10 members.

Attendance.—The average attendance during the year was 34 boys and 28 girls; 15 were discharged and 12 were admitted. The present enrolment is 58 pupils; 32 boys and 26 girls.

Class-room Work.—All the pupils are in school from 8 to 9.45 a.m. The seniors have their classes from 10 a.m. to noon, while the juniors are at work. These are in school from 1.30 to 4 p.m. Examinations are held monthly. The progress of the pupils and their interest in school work have been very satisfactory.

Classification.—On March 31 of this year, the pupils were graded as follows:—

	Pupils.
Standard I.	12
“ II.	4
“ III.	16
“ IV.	15
“ V.	5
“ VI.	6
Total.	58

Farm and Garden.—There is no farm land belonging to the institution. A garden of about two and a half acres has been under cultivation, and very satisfactory yields of potatoes, cabbage, onions, beans, peas, carrots, turnips and other vegetables have been obtained. An additional area of approximately three-quarters of an acre has been partly cleared and fenced in. It will require considerable additional labour to bring this under the hoe. The boys have helped in the garden work and in clearing the land.

Industries Taught.—It must be the object of every industrial school to cultivate in the pupils application to work, and the desire and knowledge to do their work well. This has ever been the aim of this school.

Carpentry.—Ten boys have received instruction in this trade. A substantial double-tracked tramway has been erected from the beach to the elevation on which the school stands. Firewood and heavy freight had heretofore to be hauled up by a hand-winch. The new track is designed to do this work by means of a water car. This work occupied practically the whole of last summer. It also necessitated the relaying of the track so as to bring the freight nearer to where it will be needed. Wire fences were put around the newly cleared land and a new freight boat built. Two new altars and a communion rail were made for the chapel and installed. Concrete walls were also built by these boys for a vegetable cellar and a fruit room and the doors and shelving put in. Shakes were split on rainy days for a new woodshed and the ordinary repair work and minor improvements attended to.

Painting.—The school buildings, the laundry, the carpenter's and shoemakers' shops, and the instructor's house received a new coat of paint. This kept the painters very busy during the entire dry season. The new freight-boat, the two altars and the communion rail, were also painted by them. Consequently, this was a very busy year for our masters of the brush, and they did their work creditably.

SESSIONAL PAPER No. 27

Shoemaking.—Three of the boys have done all the repair-work required for the institution.

Plumbing.—The necessary repairs of this nature were again done by three of the boys. Two new basins, with the necessary pipe connections for cold and warm water, were installed by them.

Dairying.—Four cows were milked during the year and butter was regularly made. The milking was done by boys, the making of the butter by girls.

Girls' Industrial Work.—The aim of the school has always been to fit the girls for their future state in life as house-wives and to train them in such work as will be useful to them when they have left school. Hence they receive a thorough instruction in cooking, baking and laundry work. They take care of the poultry and are taught every kind of needlework. All the girls' garments and most of the boys' clothing were done by them.

Moral and Religious Training.—It is of the greatest importance to train the heart as well as the mind. Religion furnishes the strongest motives for a moral life. Hence the children are thoroughly instructed in their religion and trained to live according to it. They receive daily instructions, attend divine services on Sundays, and receive the Sacraments at stated times.

Health and Sanitation.—The health of the pupils has been very satisfactory during the fiscal year. No case of sickness of a serious nature has occurred.

Recreation.—The sandbeach in front of the school offers excellent playgrounds. Baseball, football, racing, jumping, &c., occupy the boys during free times. The girls engage in various games suited to them. Checkers, chess, domino, and other indoor games are played in rainy weather.

Ex-pupils.—Most of these are a credit to the school. The men worked in saw-mills, in whaling stations or canneries, or were engaged in fishing on the Fraser river. Some were sealing in Behring Sea. Most of the girls are married.

General Remarks.—Last September, Rev. Maurus Schnyder, O.S.B., was called away from the school, of which he had been the head from its very beginning. Like all pioneer work, his was an arduous one. Untiringly he worked for 11 years, put his whole heart and soul into his work, and from the humble beginning worked it up to the respected position it now holds among Indian industrial schools. He added two wings to the original school building, built a laundry with modern machinery, installed for the school buildings a system of hot water heating, brought an abundant supply of mountain water from a distance, and laid the present sewage system. The high esteem in which he was held by his superiors in the department is the best proof of the excellent work he did.

THE REPORT OF REV. H. BOENING, O.M.I., PRINCIPAL OF THE WILLIAMS LAKE INDUSTRIAL SCHOOL, WILLIAMS LAKE P.O., WILLIAMS LAKE AGENCY, FOR THE YEAR ENDED MARCH 31, 1912.

Accommodation.—The school can easily accommodate 90 pupils with the necessary staff.

Attendance.—There are now 66 children in attendance, of whom 40 are girls and 26 are boys.

Class-room Work.—There has not been, I am again very glad to say, any lessening in the splendid progress of last year in the two departments. The school hours for the boys are in the forenoon, from 8.15 to 10 every week day, and in the afternoon from 4 to 5.15, except Saturday. The school hours for the girls are in the fore-

3 GEORGE V., A. 1913

noon, from 10.30 to 12 every week day except Monday forenoon, and in the afternoon from 4 to 5.30. The subjects taught are those prescribed by the department. The pupils are at present graded as follows:—

	Pupils.
Standard I.	18
“ II.	0
“ III.	10
“ IV.	2
“ V.	24
“ VI.	12
	—
Total.	66

Farm and Garden.—All the field crops did fairly well. In the garden, also, we raised a good supply of all kinds of vegetables, such as beets, cabbage, cauliflower, turnips, carrots, onions, lettuce, pease, celery, leeks. Currants and raspberries did well as usual.

Industries Taught.—Farming being in this part of the country the best and most lucrative occupation for our Indians, we try to give our boys a thorough and practical knowledge of this branch. All the work in our garden of about 6 acres, except ploughing, was done by the senior boys, and at times even the smaller boys were employed there. During the winter they saw and split the firewood, which is no small item.

Carpentry.—Of the three apprentices in carpentry the oldest was honourably discharged last August, having finished his term. The instructor left in the course of the year. But the two remaining apprentices did not cease to work in the carpentry shop. They laid, in a very creditable manner, new floors in several rooms, besides making a few changes in others and attending to all the wear and tear in, and around, the buildings.

Plumbing.—Occasionally some work has to be done in the many plumbing fixtures of the institution, when two of the most promising boys are called in to learn something of the trade.

Shoemaking.—In the absence of a competent shoemaker, work in this shop is limited to half-soleing and mending. This is done in a neat manner by some of the senior boys.

Dairying.—Twice each day, at noon and in the evening, four boys attend to the separator. They also do the churning, while the girls attend to the lighter work of butter-making.

Girls' Industrial Work.—The girls attain great proficiency in all branches of housekeeping, in knitting, mending, hand and machine sewing, dressmaking, crocheting, embroidery and lace-making. Except their underwear for winter, they make all their own clothing and the greater part of the boys' suits. Under the direction of a Sister, they in turn attend to the laundrying, to the cooking, baking, butter and cheese-making. The aim ever kept in mind is to prepare each girl to become an all-round practical house-keeper. How well the Sisters succeed in this, is shown by the many inquiries from the white people for girls to help in the housework. The Indians are very anxious to send their girls to school, so that they may learn cooking, knitting and mending, as is shown by the great number of girls at school; 40 as against only 26 boys.

Moral and Religious Training.—This being the most important part of education, particular care is taken by all members of the staff in training the children to be obedient, truthful, honest, kind and obliging. Religious instruction is given daily by the principal, morning and evening prayers are said in common, and on Sundays and holydays the children do all the singing in the church, often in two or

SESSIONAL PAPER No. 27.

three parts, sometimes even in four parts. Under this heading I am very pleased to repeat, to the children's credit, that our efforts meet with splendid success. Very, very seldom I am obliged to resort to punishment of any kind, religious persuasion being mostly sufficient to obtain the desired effect.

Health and Sanitation.—In last year's report I remarked, under this heading, that for the first time since my arrival ten years ago, an epidemic of measles had visited the school, and through it, we had had the misfortune to lose several of our children. But I concluded that at the time of writing the report, the children were again enjoying their former excellent health. This, I am happy to state, was maintained throughout the year till about April 10, when one boy was declared to have scarlet fever. He was immediately isolated. The day following two more boys showed the same symptoms. They also were isolated and the school quarantined. The disease, however, was of such a light character, that after three or four days these boys were again all right, and no others showed any further symptoms. Among the girls, however, quite a large number were affected, without also, any serious effect.

Water Supply.—This comes to us through pipes from an artificial lake, into which runs part of the San José creek.

Early in winter the supply gave out, and after due investigation we concluded to buy new pipes, as the old ones had become deteriorated. This is becoming an expensive work, as we have already paid out over \$2,000, but when finished we will have plenty of water for all purposes.

Fire Protection.—Under this heading I must mention the change that was made a few years ago in the heating system from numberless small box stoves to a couple of furnaces. Then we expect also to have a good water supply for this purpose. Fire-axes and fire-pails are always kept in convenient places so they are ready in case of emergency. Fire-drill also is practised regularly, especially during the winter months.

Heating and Lighting.—The heating is now in both departments, by means of hot-air furnaces that are very satisfactory. All the buildings are lighted by acetylene gas.

Recreation.—Boys and girls have large and well-kept playgrounds where they enjoy all kinds of outside games nearly the whole year. The girls have one part of their playground fenced off, where each one has her little flower garden. They take great delight and even pride in its care, and so what might be only a pastime becomes at the same time a very practical means of education.

Ex-pupils.—Our ex-pupils are nearly all settled on the reserves. They continue, on the whole, to be a credit to the school. Quite a number of them are in epistolary correspondence with their former teachers, whom they like to meet whenever possible.

General Remarks.—In many regards this has been one of the best, if not the best year. The children become more and more attached to their school, and seem to even dread the time of their discharge. I seize this opportunity to tender by sincerest thanks to the members of my staff, to the devoted Sisters especially, whose untiring zeal and constant care have largely contributed to the success that has crowned the work of the school.

THE REPORT OF REV. SISTER THERESINE, PRINCIPAL OF THE
SEHELTL BOARDING SCHOOL, SEHELTL RESERVE, NEW WEST-
MINSTER AGENCY, B.C., FOR THE YEAR ENDED MARCH 31, 1912.

Accommodation.—There is accommodation for 50 pupils.

Attendance.—The attendance has been very good.

Class-room Work.—The programme of studies prescribed by the department is followed as closely as possible and the progress is very satisfactory. The subjects taught are: reading, writing, spelling, catechism, Bible, grammar, arithmetic, geography, history of Canada, hygiene, letter-writing, vocal music and drawing.

The school hours are from 8.30 a.m. to 12, with a recess at 10 o'clock, and from 4.30 to 5.30 p.m.

The present classification of the pupils is as follows:—

Standard	I.	2
"	II.	14
"	III.	8
"	IV.	7
"	V.	8
"	VI.	2
	Total.	41

Farm and garden.—The boys and the girls take an active part in the garden work under the supervision of the Sisters. Our fruit trees have been sprayed according to the instructions of Mr. Wilson, the inspector of Indian orchards. Our crop of vegetables and fruits was promising up to the month of July, when for the want of water everything withered. Half an acre has been cleared since last report; we have now about four acres under cultivation.

Industries Taught.—The children have special hours every day for manual work. The girls are trained in all branches of domestic work: baking, cooking, laundrying, mending, darning, hand and machine sewing, dressmaking, crocheting, lace-making, embroidery, etc. They are bright and generally take well to this kind of labour.

The boys are taught gardening, carpentering, shoe repairing, netting, wood carving, etc. They also do the milking, chop the fire wood and take care of their own rooms.

Moral and Religious Training.—Great care and particular attention is given to this important part of education and no effort is spared to instruct the pupils in the principles of faith and religion. I am pleased to say that they endeavour to put into practice what they are taught in the daily religious instructions.

Health and Sanitation.—With the exception of one case of tuberculosis and one of rheumatism, all the children have been healthy during the past year. The premises are always kept clean, the drainage is good, all the rooms are well ventilated, disinfectants are used often and freely, baths are taken frequently, food is good and varied, breathing exercises and calisthenics are practised daily and every precaution is taken to keep the children in good health.

Recreation.—Recreation is taken in the open air as much as possible, and weather permitting, all the children have an hour's walk each day. The girls are fond of croquet, swinging, skipping, handball, etc.; while the favourite games of the boys are lacrosse and football. Berry-picking and swimming in summer afford great pleasure to all.

Ex-pupils.—Two girls were married last fall; three are still at home helping their mothers and working as dressmakers. The boys are logging with their fathers. All the ex-pupils pay us frequent visits and I take pleasure in stating that their behaviour in the world is a credit to the school.

On November 7, David, pupil No. 6, married Emily, pupil No. 011. They will soon have a cottage of their own, thanks to the generous gift of the department.

General Remarks.—The day of the Coronation gave great pleasure to the children; they made crowns with flowers picked in their own flower-beds and crowned the pictures of King George and Queen Mary. The performance ended by the singing of the national hymn 'God Save the King.'

I must not omit to say that amongst the many presents offered to Queen Mary by the Canadian Handicraft Guild, on the occasion of her coronation, was a lace insertion, crocheted by one of our girls, aged 13 years, and a miniature war canoe, carved by one of our boys.

SESSIONAL PAPER No. 27.

Before closing this report, I beg to convey my best thanks to the department for having granted us class-room supplies and drugs. I wish also to add a word of appreciation for our inspectors and agent who have, on every occasion, shown us the kindest concern and interest.

THE REPORT OF REV. SISTER MARY AMY, PRINCIPAL OF THE BOARDING SCHOOL, SQUAMISH, BURRARD INLET, NEW WESTMINSTER AGENCY, B.C., FOR THE YEAR ENDED MARCH 31, 1912.

Accommodation.—Under the present arrangement there is accommodation for 50 pupils and the necessary staff.

Attendance.—Fifty pupils have been in attendance during the year, six have been discharged and six have been admitted.

Class-room Work.—Very satisfactory work was done by the pupils in the class-rooms. The children are well advanced and seem to appreciate the advantages of instruction. The subjects taught are: reading, spelling, arithmetic, geography, history of Canada, hygiene, calisthenics, drawing, vocal and instrumental music, &c. The school hours are from 8.30 to 11.45 a.m., and from 4 to 6 p.m., besides one hour of study before bed-time. At the end of the year the pupils were graded as follows:—

		Boys.	Girls.	Total.
Standard	I..	8	9	17
"	II..	7	6	13
"	III..	7	5	12
"	V..	4	4	8
		—	—	—
		26	24	50

Farm and Garden.—There is no farm connected with the school; about 4 acres of land is laid out as a vegetable garden, orchard and flower beds. Owing to the great amount of rain which we had at the beginning of the summer our crop was not as good as the previous year. The plums and apples were a total failure.

Industries Taught.—The boys are taught gardening, painting, glazing, shoe-repairing, &c. They have also sawn and split all the wood used during the winter and have in advance a supply to last during the summer months. The girls assist in the general housework and take their turns regularly in the kitchen. In needlework they have made good and satisfactory progress. They do all the mending and darning, make their own dresses and underwear, and are also very clever at lace-making, embroidery and all kinds of fancy work.

Moral and Religious Training.—To this we give special care and particular attention. A short instruction is given daily on some religious subjects, and morning and evening prayers are said in common. On Sundays and holy days the pupils attend the two services held in the mission church and help in the choir. The discipline is mild but firm, the pupils are under constant supervision and their conduct is watched most carefully. In a word, nothing is spared on the part of the teachers to give them a sound religious training and to infuse into their mind a true sense of their Christian duties.

Punishments are of rare occurrence.

Health and Sanitation.—The general health of the pupils has been good. There has been no serious cases of illness at the school; we have, however, to deplore the death of one girl who died at home during the summer holidays. The sanitary ar-

3 GEORGE V., A. 1913

rangements are excellent. A wooden drain carries the water from the kitchen, bath-rooms, wash-room and toilets to the sea. Ventilation is carefully attended to.

Recreation.—The boys enjoy football, baseball, lacrosse and hockey, and during summer boating, fishing and berry-picking are their favourite sports and pastimes. The girls are fond of reading, skipping, dressing dolls, playing school, &c. Once each week they are all taken for a long walk.

Ex-pupils.—Of those who have returned to their homes, some have not done as well as one could wish. In many cases their surroundings are very much against them; however, the majority are doing well. The boys are logging, fishing, hunting; some are working in the Vancouver saw-mills and earning good wages. The girls help their mothers in weaving baskets and making rugs which they sell to the many tourists who visit Vancouver during the summer.

General Remarks.—At Christmas we had our usual entertainment and Christmas tree. The concert given was splendid in every respect and thoroughly deserved the praise it received from a very pleased and most appreciative audience.

I cannot close my report without mentioning my high appreciation of the hard work done during the past year by the different members of my staff, who have greatly helped me in the management of this institution. I also wish to tender my sincere thanks to our inspector, A. E. Green, and to Peter Byrne, our agent, for their unremitting attention and kindness in behalf of the school.

I am especially grateful to the department for the help afforded this year in the increase of the grant, it is an appreciated encouragement of our efforts for the welfare of the school.

THE REPORT OF REV. P. J. COLLINS, O.M.I., PRINCIPAL OF THE ST. MARY'S MISSION BOARDING SCHOOL, FRASER AGENCY, MISSION CITY, B.C., FOR THE YEAR ENDED MARCH 31, 1912.

Accommodation.—Ample accommodation can be provided for 90 pupils and a staff of 12.

Attendance.—There have been 70 children in attendance during the past year, and the classes were regular.

Class-room Work.—Amongst the subjects taught in our class-rooms are reading, spelling, arithmetic, grammar, geography, hygiene, calisthenics, drawing, Christian doctrine and music. In the above branches good and steady progress has been made.

Farm and Garden.—The farm in connection with the school consists of about 300 acres, one-third of which is under cultivation and yields good crops of hay, grain and roots of all descriptions. The orchard, comprising an area of some four acres, furnishes an abundance of fruit which proves a great benefit to our institution.

Industries Taught.—There are four boys learning to paint, two employed as carpenters and several are learning to mend shoes. They take an interest in such occupations and are progressing. The senior boys receive a practical training in the cultivation of the soil, being employed on the farm in the seeding season, cultivating and harvest. They are instructed in the management of live stock and dairy work in general.

Orchard cleansing receives our special attention and lessons are given the older boys on the use of the saw and pruning knife, the utility and manner of applying the different sprays and everything connected with successful fruit growing. I have to acknowledge that we are ably assisted in this work by Mr. T. Wilson, Indian orchard inspector, who pays his seasonable visits and helps us to keep our fruit trees in proper condition.

SESSIONAL PAPER No. 27.

The girls are trained in the different methods of cooking and preserving fruit and other things requisite for the accomplishment of the future housewife.

A practical knowledge of dressmaking, fancy and plain needlework, machine sewing and knitting is also imparted, in which many of the girls become skilful. At the Mission City exhibition, of last September, their work took 13 first and 4 second prizes. The boys had several premiums for fruit and vegetables, including second prize for 'General Farm Exhibit.'

Moral and Religious Training.—Strict attention is given to this most necessary branch of instruction, and great care is taken to have all the pupils present at the recitation of morning and evening prayers, catechetical instructions and other religious exercises.

Health and Sanitation.—Health in general has been excellent during the past year. We had no epidemics or sickness of a serious nature. The house and premises are kept clean and the lavatories and toilets in good working order; the drainage is also good.

Acting upon the advice of our worthy physician, discharges were obtained for a few pupils who were beginning to develop ailments of an hereditary nature and whose dismissal from the school was considered advisable.

Dr. Stuart, the attending physician (who is also health officer for the city), keeps a watchful eye over our institution and by his regular visits and personal examinations keeps sanitary conditions at an A. 1 standard.

Recreation.—Our children have nearly three hours daily for recreation. Baseball, football and lacrosse are amongst the leading outdoor sports, but in winter and wet weather, music and some of the more quiet games constitute the principal amusement.

Ex-pupils.—According to statements furnished by our missionary priests who visit the different Indian villages and through personal correspondence, I am pleased to state that the majority of our former pupils are doing well. Some of them remain at home and cultivate their farms, and some are engaged in local industries, but, as a rule, they work well and maintain respectability.

General Remarks.—It is noticeable that for the past few years our Indian children are becoming more attached to their books and studies, that the spirit of unrest so prevalent in the past is disappearing, and that ex-pupils are in earnest in sending their children to be educated, and when necessary urge them to remain until their course is complete. Amongst the noteworthy items during the past year our Xmas. concert and the celebration of the Rev. Sister Matron's birthday deserve special comment. On these occasions, the songs, recitations, dialogues, drills and clubswinging were very creditably rendered and received loud applause, whilst the selections by the boys' band were heartily encored by the appreciative audience.

In concluding this report I beg to tender once more my sincere thanks and that of our staff and pupils to the department's worthy officials who have taken such interest in our work during the past year, which has been one of decided success for our institution.

We are especially indebted to the kindness of Mr. A. E. Green, inspector of Indian schools, for his presence at several successful examinations, to Mr. W. E. Ditchburn who paid us several visits, to Mr. P. Byrne, our local agent, and Mr. T. Wilson, Indian orchard inspector, for their friendly visits, and Dr. A. J. Stuart, who has been so prompt in attending our sick pupils. But it is to the immediate teachers and custodians of the children that we owe our special thanks. Theirs is a work which requires great patience and perseverance, combined with unbounded charity, and, we are pleased to say that as a result of their strenuous efforts our school maintains its proficiency.

THE REPORT OF REV. G. H. RALEY, PRINCIPAL OF THE BOYS' HOME
PORT SIMPSON, B.C., FOR THE YEAR ENDED MARCH 31, 1912.

Accommodation.—Twenty-two boys with four of a staff are all that can be accommodated comfortably, though the building was planned for 25 boys.

Attendance.—The attendance has been excellent during the year. There were 22 boys in residence, with 10 applicants for admission, for whom there was no accommodation. There are 23 boys on the register, but 1 is out on an extended holiday.

Class-room Work.—The boys attend the Indian day school, which is a bright and spacious building. This work is carried on by Mr. L. M. Richardson, B.A., and is very satisfactory. It will be observed that the majority of the boys are in the lower standards, this is accounted for largely by the fact that no matter at what age a boy may enter the school his education is invariably backward, and it is exceptional when a new boy is not placed in Standard I.

The pupils are graded as follows:—

	Pupils.
Standard I.	9
“ II.	5
“ III.	4
“ IV.	3
“ V.	2
Total.	23

Farm and Garden.—This is not a farming country. Gardening is undertaken annually with excellent results when the season is favourable, that is, when the rainfall is not excessive. Small fruits are cultivated; currants, gooseberries and raspberries can be depended on. A variety of the hardier vegetables are produced.

Industries Taught.—This is a boarding school so no industrial teacher is kept. The industries of this country are fishing, logging, lumbering and mining. All but the last engage the attention of the boys of this school during the summer holidays, which they spend with their parents.

Fishing boats and launches are what especially interest the boys. They have made a number of models of sealing schooners, Columbia river fishing boats, yawls, dingies and dories.

The boys show aptitude for manual training, especially along this line. They do bits of carpentry and painting about the premises. The boys do general housework under the direction of the matron, and do it very satisfactorily.

Moral and Religious Training.—This important feature of school life has received special attention with very gratifying results, as evidenced in the general deportment of the boys. The moral tone of the school is excellent.

The staff and pupils attend the church services with commendable regularity. A system of Bible instruction is maintained with daily prayers throughout the year.

Health and Sanitation.—Considering the thin line which separates health and disease in Indian children, the year's record is satisfactory. While measles and whooping cough have been prevalent on the reserve, there has not been a case of either in the school. Last September there was more or less influenza.

One boy is receiving treatment for glands in the neck, another who apparently was a healthy child showed very slight symptoms of 'petit mal' and on the doctor's advice was given a holiday.

SESSIONAL PAPER No. 27.

The premises have been kept clean inside and out; the drains are kept in good order.

A plentiful supply of water has been furnished by the new well and tank.

The building is kept fresh and sanitary by the use of plenty of kalsomine. Winter and summer it is possible to keep the dormitory window open. When any epidemic is prevalent in the village, the boys are not permitted to spend the Saturday afternoon with their friends as is the custom. As a precaution against infection or contagion this measure appears to be effective.

Recreation.—The boys have been allowed more time for recreation this past year than formerly. In favourable weather they practically live out of doors, enjoying the usual outdoor sports. This has a good effect on their appetites, dispositions and physiques. Plenty of indoor games are provided which they enjoy greatly, some are quite clever at checker playing.

Ex-pupils.—Many of the ex-pupils of the boarding school have finished their education at the Coqualeetza institute. A few are in Vancouver, but the greater number return to their native villages on the northwest coast.

A good many spend six months of the year on the river boats of the Skeena and Stikine rivers, where up to the present time there has been constant demand and good remuneration. However, this means of livelihood is being largely withdrawn this year, owing to the completion of the Grand Trunk Pacific railway along the banks of the Skeena, up to the head of navigation.

A few engage in logging, some find work in saw-mills. Very few follow the old occupations of trapping, nearly all however find their way to one or other of the numerous canneries of the north for several weeks in the summer.

General Remarks.—This school has taken a pronounced forward move since last April. In mentioning this I would like to express my thanks to Miss Angus, Mrs. Winters, and Mr. L. M. Richardson, who have actively co-operated with me in my efforts to raise the standard of the school. The expenditure has necessarily increased, and there has been absolutely no waste. To bring about this pronounced change, it has taken improved equipment, a better supply of clothing and possibly more food. From careful study of conditions we find it costs nearly twice as much to feed a boy in the northwest coast as it does in a farming country. At one time fish was our cheapest food staple, but with the rapid growth of the fishing industry and increased facilities for exportation we are paying five times as much for fish as we did four years ago. Our local physician, Dr. Large, who has spent fourteen years amongst the Indians and who is thoroughly competent to speak with authority on health conditions, urges a very liberal supply of nutritious foods. The boys look back with pleasure on a few red letter days during the year, one is that of athletic sports which was a public affair. The school concert and Christmas tree were enjoyed greatly, as was also a party given them by the matron, and another given for them at the principal's residence. Inspector Rev. A. E. Green and Indian Agent Perry take commendable interest in the pupils' and ex-pupils' welfare.

THE REPORT OF MISS FRANCES E. HUDSON, PRINCIPAL OF THE PORT
SIMPSON (CROSBY) GIRLS' HOME BOARDING SCHOOL, PORT
SIMPSON, B.C., FOR THE YEAR ENDED MARCH 31, 1912.

Accommodation.—There is accommodation for 40 pupils and 5 teachers.

Attendance.—The enrolment during the year was 45. The present attendance is 40. During the year 5 girls were discharged and 3 admitted to the school.

Class-room Work.—The hours of study are from 10.45 to 12 a.m., and from 1.30 to 4 p.m., with a study hour from 7 to 8 p.m. three evenings each week for the older

3 GEORGE V., A. 1913

girls. The course of study prescribed by the department is followed. A qualified teacher has charge of the class-room. Satisfactory progress was made in all the different branches of study. The pupils are graded as follows:—

Standard		Girls.
I.	3
“	II.	7
“	III.	3
“	IV.	12
“	V.	10
“	VI.	5
Total.....		40

Twelve girls are receiving instruction in music.

Farm and Garden.—A small vegetable and flower garden is cultivated. A few hens are kept.

Industries Taught.—The girls are instructed in all branches of housework. They make all their own clothing. They are also taught crochet, embroidery, reed and raffia work.

Moral and Religious Training.—Special attention is given to the moral and religious training of the girls. The bible is carefully studied; prayer meeting is attended each week, the girls attend two preaching services each Sabbath; all attend morning and evening prayers; each Saturday evening an hour is spent in the study of the Sabbath-school lesson. The older girls have an organized mission band which meets once a week. We try to teach the girls to be obedient, diligent, honest, and self-reliant.

Health and Sanitation.—The general health of the girls has been good during the year. Three girls were discharged because of ill-health. Two others have been at the hospital with tubercular glands but they are home and almost better again.

Cleanliness and proper ventilation are carefully attended to. Drainage is good. A sufficient supply of good wholesome food is provided. Native food is given when procurable.

Recreation.—The principal recreations are swinging, basket-ball, walking, and reading. Outdoor exercises are encouraged as much as possible. There is a large playroom which is used in wet weather. The girls are taught fancy drills and calisthenics. Some of the girls are very fond of reading and this taste is encouraged. The little girls are very fond of their dolls.

Ex-pupils.—Many of the ex-pupils are a credit to the school and show their approval and appreciation by sending their own children for training. Most of the girls make good housekeepers. The two girls who were discharged last September at the full age of eighteen years are doing well.

THE REPORT OF CONSTANCE, SISTER SUPERIOR, C.A.H., PRINCIPAL
OF THE ALL HALLOWS' BOARDING SCHOOL, YALE, B.C., FOR THE
YEAR ENDED MARCH 31, 1912.

Accommodation.—Accommodation is provided for 26 pupils, and a sufficient staff.

Attendance.—There has been 24 pupils on the register this year, besides two who are not in receipt of the grant—26 in all. Two were absent part of the year on sick leave.

Class-room Work.—This is under the care of two experienced teachers. The Sisters give instruction in religious knowledge, needlework and singing. The course

SESSIONAL PAPER No. 27.

of studies prescribed by the department is closely followed. The girls take much interest in the study of hygiene. Physical exercises are daily practised.

Garden.—Though the crop of orchard fruit, with the exception of apples, was almost a total failure last year, yet we had an abundance of small fruit and of excellent vegetables.

Industries Taught.—All the girls are thoroughly instructed in housework, needlework and laundry work, the older ones also in cookery and bread-making. Most of the girls learn simple dressmaking. Some are taught lacework and basket-making. During the Christmas holidays, they worked very busily for a little exhibition of work at which prizes were given.

Moral and Religious Training.—This receives the most careful attention. The girls attend a short service each morning in the school chapel, besides the usual services on Sundays and festivals. Religious instruction is given daily by the Sisters. The practices of cleanliness, obedience, thrift and all the other moral virtues are constantly taught.

Health and Sanitation.—The health of the pupils has been very good on the whole during the past year. Two little girls have been absent on sick leave, one with a small gland and the other for a slight rise in temperature following influenza. The girls are given abundance of well-cooked, plain food, and seem to thrive upon it. Plenty of extra milk is given to the little girls, or to any who seem at all delicate. Their strong healthy appearance is constantly noticed.

There is an excellent drainage system, the pipes are kept thoroughly flushed with water. The greatest care is taken to keep all the premises clean and healthy. Windows and ventilators are kept open night and day in the dormitories. Special rooms, having glass doors opening on to sunny balconies, are provided for any children who show signs of scrofulous or tubercular disease.

Recreation.—There is a large playground with summer-house, swing and see-saw, and a small garden for each child. They much enjoy working in their garden and are taught to cultivate them intelligently. In the winter coasting is much enjoyed. Games, such as skipping and ball games are played out of doors whenever the weather permits. An hour's walk is taken daily in suitable weather with one of the teachers. Plenty of games are provided for wet days indoors, but all the girls enjoy having an interesting book read aloud while they employ themselves with some quiet occupation.

Ex-pupils.—Most of these are married or living at home. They seem to make good wives and mothers, as a rule, and to keep their houses neat and clean. We keep in touch with almost all of them at Christmas time, and constantly receive letters from them. Some girls who left the school many years ago are doing very well indeed in the upper country. There is a great demand for our girls as domestic servants, and those who care to go out to service (very few, as a rule), generally do well and earn very good wages.

General Remarks.—The closing exercises were held last year on Coronation Day, in honour of the visit of the King and Queen to the school, 10 years before, when Duke and Duchess of Cornwall and York. The patriotic song, which had been specially written for that occasion, was brought up to date, and sung again, with the 'Coronation Ode.' A little cantata, the 'May Queen,' was performed with much spirit and many pretty actions.

In the evening all the buildings, which had been gaily decorated for the occasion, were illuminated, and many visitors from the village came up to witness the torchlight procession in which the teachers and children all took part, singing patriotic songs with great enthusiasm. The day will always live in the children's memories.

Christmas joys are eagerly anticipated for months beforehand. All the music for the Christmas services was very carefully learned and grand preparation of small Christmas presents 'to send home' went on. A beautiful tree was laden with many lovely presents for all the girls, through the kindness of friends, and even the older girls looked forward to the never-to-be-forgotten visit of Santa Claus.

THE REPORT OF JOHN T. ROSS, PRINCIPAL OF THE AHOUSAT BOARDING SCHOOL, AHOUSAT, B.C., FOR THE YEAR ENDED MARCH 31, 1912.

Accommodation.—There is accommodation for 36 pupils and 4 of a staff.

Attendance.—The present attendance is 19 boys and 16 girls. During the year 5 pupils were discharged and 2 admitted into the school.

Class-room Work.—One qualified lady teacher has charge of the class-room work. She is a good teacher and the marked progress of the pupils in all the various branches of study is proof of the faithful instruction given in this department. During the past year more attention was given to physical instruction and hygiene. No doubt it added somewhat to the good spirits and health of the pupils.

The pupils are graded as follows:—

	Pupils.
Standard I.	4
“ II.	5
“ III.	6
“ IV.	9
“ V.	8
Total.	32

Farm and Garden.—This consists of about 18 acres of low-lying soil of sandy loam. It is poor land. A few years ago it was reclaimed from the bed of a lake which lay about 100 yards west of the school. However, the land is improving slowly from year to year under cultivation, but so far it does not pay for the labour and high cost of fertilizers. During the summer the main drains were deepened, which allows us to work the land earlier in the spring. The stock consists of two cows, a calf and a bull, also about 40 hens. The bull is used for ploughing and is a useful animal for farm work.

Industries Taught.—The boys are taught to work at gardening, wood cutting, plain carpentry, painting, baking bread, and the care of stock. The girls receive instruction in general housekeeping, dressmaking, mending and fancy work. The girls make capable housekeepers and should on leaving school make some improvement in their own homes on the reserve.

Moral and Religious Training.—Careful attention is directed to the moral and religious training of the pupils. Beside morning and evening devotions, Sabbath services are held regularly in the church on the reserve.

Health and Sanitation.—In the early part of the year two girls were discharged on account of symptoms of decline. I am sorry to report that both have since died of consumption. One boy was discharged last December on account of ill-health. He seems to be recovering his health again and very likely the change has done more than medicine could do. With the exception of these cases, the health of the pupils during the year was excellent. There has been no epidemic of any kind, and the year closes with a record of the best health since the school was opened in 1904. Cleanliness and proper ventilation are carefully attended to, also two rooms are provided for isolation in case of any sickness. The drainage is good.

Water Supply.—The water supply is obtained from rainfall. The tanks are cleaned from time to time and although not a very satisfactory system of supply, it is the best we can do, as there is no prospect of securing good well water within a reason-

SESSIONAL PAPER No. 27

able distance of the school. Two large storage tanks are being put in to supplement shortage during the dry season. A well 10 feet deep at the rear of the school gives an ample supply of water for laundry and washing purposes, but it is not fit for drinking.

Fire Protection.—A strong force pump and 150 feet of fire hose, 18 fire buckets and 12 dry fire extinguishers are ready for use in case of fire. Instruction in fire drill is given once a month.

Heating and Lighting.—The school is heated with a large hot air furnace. Coal oil lamps are used for lighting.

Recreation.—Weather permitting, various outdoor games are played by the boys, such as football, baseball, running, jumping, also canoe racing and surf riding is a common amusement during the summer months. The girls find amusement in various outdoor games also.

Ex-pupils.—All with the exception of two, make their homes on Maktasis reserve. They are doing fairly well, although they are inclined to be easy-going and lack ambition in life. Morally they are to be commended and are an example for good to their parents.

THE REPORT OF H. B. CURRIE, PRINCIPAL OF THE ALBERNI BOARDING SCHOOL, ALBERNI, B.C., FOR THE YEAR ENDED MARCH 31, 1912.

Accommodation.—The school can accommodate 55 pupils and a staff of 6.

Attendance.—The attendance during the year has been good. We started the year with 22 boys and 28 girls (50). During the year there were added to the roll 2 girls and 5 boys, while 2 boys and 5 girls were discharged, leaving 50 in attendance (25 boys and 25 girls). The attendance has suffered very little from sickness or other causes.

Class-room Work.—The class-room work is carried on largely in accordance with the rules of the department. The pupils are receiving good, practical instruction and I may say without exception are making satisfactory progress.

Farm and Garden.—During the past year our farm and garden has undergone much improvement in the way of putting the soil in better condition, and the result was that we had excellent crops. Our oat crop was the finest I ever saw grow and the hay crop averaged nearly 4 tons per acre. During the year we purchased a new wagon, plough, cultivator, set of double work harness, set of single driving harness and a new covered carriage. From our live stock and poultry excellent results were obtained.

Industries Taught.—The boys are instructed in the care of stock and poultry, milking, teaming, gardening, cutting wood, and all branches of farm work. Painting, shoe-repairing, plain carpenter work, scrubbing, baking of bread and care of their own dormitories.

The girls are taught cooking, baking, sewing, darning, dormitory and dining-room work, in fact they receive instructions in connection with practical good house-keeping.

Moral and Religious Training.—This being the most important phase of our work, and as upon the success attained under this heading, largely depends the usefulness of our school, we spare no pains to educate our pupils to be honest, loyal, moral citizens. Occasionally patriotic exercises are conducted. Twice daily devotional exercises are conducted in the home, and daily religious instruction is imparted in

3 GEORGE V., A. 1913

the class-room. The pupils memorize passages of the Sacred Word, hymns, the shorter catechism, and the books of the bible. Sunday school and one service are conducted each sabbath.

One pupil, discharged during the year, occasionally conducts a service in the native tongue.

Health and Sanitation.—The health of the school pupils during the year has been good. It is over two years since a pupil of the school has died. During the year we have not had occasion even for isolation. We have had a number of cases of minor ailments. About a third of the pupils were vaccinated during the year. We find abundance of fresh air, ample nourishing food and good care, especially during the wet season, excellent preventatives of disease. Dieting cannot be too carefully looked after with Indian children. We have always plenty of fresh eggs and good milk, and in the case of a child not satisfactorily responding to regular food, a special diet of milk and eggs principally usually proves beneficial.

Disinfectants are regularly added to bathing and scrub water, and hygiene is regularly taught in the class-room. Drills and various movements tending to develop lung, limb and muscle, are practised in the open air, while good and suitable clothing are always provided.

The school is built on a good elevation, affording good drainage. Stable and other refuse is never allowed to accumulate. A new drain is under way, to carry the wash water from the new laundry. Four-inch glazed sewer pipe is being used for this purpose.

Recreation.—The recreations usually resorted to are running, boating, swimming, fishing, wheeling, baseball and football. The pupils won the Junior West Coast District Football Association's cup in 1911. Outdoor games are encouraged at all times when the weather is suitable.

Ex-pupils.—The ex-pupils of this school are mostly located along the different points of the Alberni canal. As a rule they marry young. The girls make good housewives and the boys work at the saw-mills, whaling stations, canneries or fishing. They do some hunting and some do a little farming, a few work at trades. They all make good wages and have comfortable homes. As a rule the ex-pupils are a more moral class than a large portion of the white population with which they come in contact at the mills and canneries.

THE REPORT OF MISS E. J. DONOGH, MATRON OF THE KITAMAAT BOARDING SCHOOL, KITAMAAT, B.C., FOR THE YEAR ENDED MARCH 31, 1912.

Accommodation.—There is accommodation for 30 pupils and 4 teachers.

Attendance.—The pupils were a week or two late in returning to the home after vacation other than that the attendance during the year was good. Two or three were out a short time on sick leave.

Class-room Work.—The class-room work during the year has been good and progress marked.

Farm and Garden.—There is a small garden under cultivation, a larger space is being cleared for same purpose.

Industries Taught.—The boys are taught to care for the cow, work in the garden, and also have a few household duties.

The girls are taught general housework, cooking, sewing, laundrywork and gardening. Twelve of the oldest pupils study music, four having become quite proficient.

SESSIONAL PAPER No. 27

Moral and Religious Training.—The pupils attend services at the church in the village every Sunday. One week-night service is held in the home during the week. At least one-half hour each day is devoted exclusively to devotional exercises.

Health and Sanitation.—The health of the pupils during the year has been fairly good. There was only one really serious case, which proved fatal, one of tubercular meningitis.

There is in the building an isolation ward. The ventilation and heating are good. All drainage and sewerage is carried right to tide level.

The grounds surrounding the buildings are kept in perfect condition.

Recreation.—Music and games, indoors; out-of-door games: swinging, walks and picnics, and an occasional boat ride are the chief forms of amusement of the pupils.

Ex-Pupils.—The ex-pupils marry and return to their own people, though not usually to the old life. They are better homemakers and do credit to their training in the school.

General Remarks.—The Kitamaat children are especially bright. Both they and their parents seem to appreciate the privileges of the boarding school and quite proud of any achievements made.

THE REPORT OF E. D. EVANS, PRINCIPAL OF THE CARCROSS BOARDING SCHOOL, CARCROSS, YUKON, CANADA, FOR THE YEAR ENDED MARCH 31, 1912.

Buildings.—During the year a large building has been erected by the Indian Department in place of the old school. It is situated about two miles from the town of Carcross, and in a most desirable locality.

Accommodation.—Accommodation is provided for 30 pupils and a staff of not exceeding 6.

Attendance.—The attendance for the past year has been very good, an average of 82 per cent.

Class-room Work.—The class-room work consumes five hours of each day. In addition to the regular course of study we hold classes in singing, rope work, as taught in the British navy, and the study of the compass. The senior classes attend during the forenoon, the juniors being engaged in other occupations, they attending the latter half of the day. The lessons in 'First Aid' are popular, and the pupils take a great interest in this work.

Farm and Garden.—Two small gardens were established in connection with this school and were successful. This year we hope to take up farming and gardening on a more extensive scale. We have several acres of ground cleared and ready for planting, and we are hoping that we shall be able, in a year or so, to raise sufficient garden truck to supply the school. We expect to have several cows, horses, and a number of chickens shortly, and farming will be taken up in earnest.

Industries Taught.—During the past year we have taken up carpentry for the boys; sewing, knitting and cooking for the girls. It is planned, with the additional facilities at our command, to take up other industries, such as shoe mending, boat-building, &c., and also to teach cooking to certain of our boys, as there is always a demand in this country for cooks, and the wages are fairly good.

Moral and Religious Training.—All the children, when practicable, attend divine service on Sunday morning at the church, the Ven Archdeacon Canham in charge. Services are held in the school on Sunday evening, conducted by the principal. Morn-

3 GEORGE V., A. 1913

ing and evening prayers accompanied by Bible readings are held every day. Bible classes and special services are held once a week. Great care is exercised in this part of their training.

Health and Sanitation.—The health of the children has been fairly good during the past year. There has been one death, unfortunately, from consumption; the case being a boy recently admitted to the school. No epidemics or diseases have visited us beyond the usual cases of colds, &c., common to children, but these taken in hand in the early stages disappear in a few days. Antiseptics are used liberally and freely; we have an excellent drainage system, and pay special attention to the ventilating of the building. The building is kept clean and neat, and the surroundings in good condition.

Recreation.—Ample time is given for recreation; boating, fishing, football, cricket, running, sleighing, &c., are indulged in, in their respective seasons. The motto of the school is 'mens sana in corpore sano.' (A sound mind in a sound body), and this we endeavour to live up to. Physical culture exercises and drilling are included in our curriculum, and we are endeavouring to raise a corps of boy scouts in connection with the school. We have a tent-cabin to be used in case of an outbreak of any contagious disease. It is situated at a reasonable distance from the school building and can accommodate two patients; a tent being provided for the person in attendance. We hope, in due time, a suitable building may be erected.

Ex-pupils.—Three of the ex-pupils (girls) are engaged in domestic service in Dawson. They are considered very satisfactory by their employers. Two or three boys are living with their friends in Moosehide district, and another is engaged on a farm in West Dawson. Two or three of the girls are married in Carcross and vicinity; one is married in Seattle to a man of means. Two of the girls have been living in Victoria, one in domestic service. The other, Daisy Mason, has been continuing her studies, her father, Jim Mason, being in a position to support her financially. Henry, another ex-pupil, has been working steadily on the railroad for a long time.

General Remarks.

The land sold during the year amounted to 83,496.13 acres, which realized \$1,219,473.51. The quantity of surrendered land in the hands of the department was approximately 295,145 acres. The principal outstanding, on account of Indian lands sold, amounted to \$2,809,898.20, a considerable portion of which has not yet become due.
