*To His Excellency the Duke of Devonshire, K.G., P.C., G.C.M.G., G.C.V.O., etc., etc.,
Governor General and Commander in Chief of the Dominion of Canada.*

MAY IT PLEASE YOUR EXCELLENCY:

The undersigned has the honour to present to Your Excellency the Annual Report of the Department of Indian Affairs for the fiscal year ended March 31, 1919.

Respectfully submitted,

ARTHUR MEIGHEN,

Superintendent General of Indian Affairs.

OTTAWA, December 15, 1919.

PART I

REPORT

OF THE

DEPUTY SUPERINTENDENT GENERAL OF
INDIAN AFFAIRS

FOR THE YEAR ENDED MARCH 31, 1919.

REPORT OF THE DEPUTY SUPERINTENDENT GENERAL.

OTTAWA, December 1, 1919.

Hon. ARTHUR MEIGHEN, K.C., B.A.,
 Superintendent General of Indian Affairs,
 Ottawa.

SIR,—I have the honour to submit the report of the Department of Indian Affairs for the year ended March 31, 1919.

POPULATION.

A quinquennial census is taken of the Indian population, the last census having been taken in 1917, prior to which a census was taken annually. The records of the department indicate that there is a slow but steady increase in the Indian population from year to year.

The following table shows the Indian population by provinces according to the census of 1917:—

Province—	Population.
Alberta..	8,837
British Columbia..	25,694
Manitoba..	11,583
New Brunswick..	1,846
Nova Scotia..	2,031
Ontario..	26,411
Prince Edward Island..	292
Quebec..	13,366
Saskatchewan..	10,646
Northwest Territories..	3,764
Yukon..	1,528
Total, Indian population..	105,998
Eskimos..	3,296
Total, number of Indians and Eskimos..	109,294

A more detailed statement giving statistics of the Indian population under the headings of religions, ages and sex in the various provinces and inspectorates will be found in Part II of this report.

THE VISIT OF HIS ROYAL HIGHNESS THE PRINCE OF WALES.

Several of the Indian bands were so fortunate as to have an opportunity of expressing their loyalty to His Royal Highness the Prince of Wales in person upon the occasion of his recent visit to the Dominion. An interesting and impressive function was held at Brantford, where His Royal Highness unveiled a bronze tablet inscribed with the names of eighty-eight members of the Six Nations Indians who had given their lives to the Empire in the great war. Upon this occasion His Royal Highness was made a chief by the Indian council under the name of "Chief Dayrohasereh," which signifies "dawn of the day."

10 GEORGE V, A. 1920

The list was headed by the names of Lieutenant Cameron D. Brant, a descendant of Joseph Brant, the great Iroquois leader who assisted the British in 1776, and Lieutenant J. D. Moses, an Indian aviator, who died in a German prison camp as a result of injuries he received when he was brought down over the enemy lines.

His Royal Highness visited His Majesty's Chapel Royal of the Mohawks, an historic Iroquois church, and signed there the register which had also been signed by the late King Edward VII and the Duke of Connaught, and viewed the communion plate and Bible which were presented to the Six Nation Indians by Queen Anne. His Royal Highness planted a tree at the church in accordance with an ancient Iroquois custom, which is to be known as the "Prince's tree of Peace."

The Prince received a delegation of chiefs in native costume at Government House in Victoria, B.C., who presented him with an address expressive of their loyalty.

His Royal Highness was also made a chief by the Stony Indians at Banff. The Indians turned out in full ceremonial costume, and the occasion was one of the most successful and spectacular of its kind that had ever been held in the Dominion.

AGRICULTURE.

During the past two years the Department of Indian Affairs has shown great activity in opening up the reserves and developing their natural resources. In all the settled parts of the Dominion great care has been taken to encourage the Indians in agricultural pursuits and to afford them instruction in up-to-date methods of farming. The results of this policy are evidenced in larger and better crops on the great majority of the reserves.

In cases where reserves are too large to be cultivated by the number of Indians located on them, the surplus area is leased to whites for farming and grazing purposes, and in this manner extensive tracts that had hitherto lain idle are now being utilized.

ONTARIO.

The manner in which the department supervises the farming activities of the Ontario Indians by the employment of field agents who visit the various reserves and instruct the Indians in modern agricultural methods has been outlined in previous reports. The success of this policy is becoming more apparent each year, and notable progress is being made by the Indians of Ontario.

Ploughing Matches.—As a means of improving agriculture on Indian reserves, ploughing matches were organized at Deseronto, St. Regis, Moravian, Muncey, and Six Nations reserves. The first, second, and third prizes at each match included a trip to one of the large ploughing matches. Indians from the St. Regis and Deseronto reserves competed at the Ottawa match. The Muncey, Moravian, and Six Nations prize winners competed at the International match at Chatham. It is to the credit of the Indian competitors that they held their own with the white competitors. Several firsts were won by Indians at both the Chatham and Ottawa matches. The ploughing matches are instilling a pride in the Indian competitors that will be reflected in the ploughing on their own reserves.

Standing Crop Competition.—The standing crop competition has been extended this year, and now includes the Deseronto, St. Regis, Muncey, Saugeen, Sarnia, Moravian, Six Nations, Rice Lake, Alnwick, and Walpole Island reserves. The crop competition is a decided factor in the improvement of the crops raised by the Indians. From year to year marked improvement is noticed. Purer and better seed is planted and more care is being taken in the cultivation.

SESSIONAL PAPER No. 27

Agricultural Short Course.—Agricultural short courses have been held at the Muncey, Mount Elgin, and Shingwauk institutes. Practical courses in live stock, drainage, cultivation, fruit raising, and vegetable gardening were put on, and at the conclusion of each course examinations were written by the pupils. On the whole the answers were intelligent, showing a first-class knowledge of the subject.

School Fairs.—School fairs were organized at Muncey, Six Nations, Walpole Island and Deseronto. Pure seeds were supplied for these fairs, also pure bred-to-lay barred rock eggs. The fairs were a decided success. As a result the seed grain of the farmers has been improved and the poultry on the reserves is not only increased, but the strain is much improved.

Manitoulin Island and the North Shore.—This year an effort has been made to supply the Indians with better breeding stock and live stock improvement associations have been formed at Sheshegwaning, West Bay and Sucker Creek reserves. Shorthorn bulls have been obtained for these associations from the Live Stock Branch of the Dominion Department of Agriculture, and a Yorkshire boar has been applied for by the West Bay Association.

A competition was conducted in clover fields on the Wikwemikong reserve with a view to inducing the Indians to keep their clover fields free enough from weeds to enable them to thresh the clover for seed. Most of the fields inspected would be suitable for seed. At the West Bay reserve there was an oat competition, at the Sheshegwaning reserve a wheat competition, and at the Garden River reserve a potato competition.

Mustard spraying was conducted on the West Bay, Sheguiandah and Wikwemikong reserves. Meetings were held at which the Indians were given instruction with regard to eradication of weeds, especially mustard. At those meetings a moving picture was shown in order to give the Indians an idea how mustard might be sprayed on a large scale with a power spray outfit.

School fairs were again conducted for all the Indian schools on Manitoulin island in conjunction with the white schools in their vicinity and the Indian pupils again won a large share of the prize money. At Manitowaning school fair the pupils of three Indian schools were in competition with the pupils of three white schools and the Indians won about two-thirds of the prize money. At Garden River a school fair was organized for the two Indian schools.

Two home garden contests are held each year in this district for the pupils who have been identified with school fair work, but who have left school. They are supplied with a variety of seeds to plant a garden plot twenty feet by thirty. The first prize in East Manitoulin and the first prize in West Manitoulin were won by Indians in competition with white pupils.

Successful school gardens were conducted at the Spanish Industrial School and Shingwauk Home and some of the pupils of these schools had excellent plots in spite of the very unfavourable season.

There is a farmers' club and a womens' institute on the Sheshegwaning reserve, and a womens' institute on Sucker Creek reserve, which are doing good work in an educational way for the Indians of these reserves. A feature of the meetings of these societies is the showing of moving pictures demonstrating advanced agricultural methods.

PRAIRIE PROVINCES.

In view of the fact that only a small portion of land on the Indian reserves in the prairie provinces was under cultivation, and as these reserves are for the most part situate in the productive areas of the three provinces, it was considered necessary to take measures to have these idle lands brought under cultivation, and to organize the

10 GEORGE V, A. 1920

staff of the Department of Indian Affairs in the said provinces in the most advantageous manner possible for the effective carrying out of such measures. Accordingly, on February 16, 1918, an Order in Council was passed appointing Mr. W. M. Graham, Inspector of Indian agencies for the South Saskatchewan inspectorate, as Commissioner for the Department of Indian Affairs in Manitoba, Saskatchewan and Alberta, with the following duties and powers:—

(a) To make proper arrangements with the Indians for the leasing of reserve lands, which may be needed for grazing, for cultivation, or for other purposes, and for the compensation to be paid therefor;

(b) To formulate a policy for each reserve;

(c) To issue directions and instructions to all inspectors, agents and employees in furtherance of that policy;

(d) To make purchases and engage or dismiss any extra or temporary employees, and market the yield of grain and live stock, and in effect to have the sole management of this work subject to the approval of the Superintendent General of Indian Affairs, to whom he shall report fully at close and regular intervals;

(e) To make recommendations to the Superintendent General of Indian Affairs, looking to the greater efficiency of such of the Indian service in the said provinces as is not related to the said special work.

The greater production work on the Indian reserves is subdivided into three distinct branches, as follows:—

1. The establishment and operation of Government Greater Production Farms.—

Mr. Graham began to make arrangements for the establishment of these farms as soon as possible after his appointment, and the work was well under way early in the spring of 1918. Complete up-to-date equipment was secured at the most advantageous prices, and the necessary buildings, such as bunk-houses, cook-houses, stables, etc., were erected.

2. Farming by Individual Indians.—Every effort has been and is being made by the officers of the department, under the supervision of Mr. Graham, to stimulate, encourage and instruct the Indians in order that they may place larger areas under cultivation and materially increase their crops. This work has on the whole met with a great measure of success.

3. Farming and Grazing Leases.—As has been stated hereinabove. Mr. Graham was empowered by the Order in Council to make the necessary arrangements with the Indians for the leasing of reserve land to whites for farming and grazing purposes, in order to assist the greater production campaign. Mr. Graham has been particularly energetic in exercising the powers thus conferred upon him, and a large number of leases were granted and the result was a very valuable increase in the national food supply.

The acreage sown on the five Greater Production Farms is as follows:—

	Wheat.	Oats.	Flax.	Total.
Assiniboine..	725	80	805
Crooked Lakes	2,005	229	2,234
Muscowpetung..	3,050	800	3,850
Blackfoot..	7,344	488	7,832
Blood..	3,930	630	150	4,710
Total..	17,054	2,227	150	19,431

Unusual conditions prevailed in southern Alberta this year, and in fact there rarely has been in the history of that part of the country such an unfavourable season for growing crops.

SESSIONAL PAPER No. 27

In Saskatchewan conditions were more favourable. Wheat on the Muscowpetung farm averaged 16.39 bushels to the acre and oats 23.75 bushels per acre. At Broadview the results were not so good, owing entirely to rust which struck that section of the country late in July and early in August. The crop, however, compared favourably with others in that district.

The total yields on the Greater Production farms are as follows:—

	Bushels.
Wheat.....	140,000
Oats.....	37,500
Flax.....	400

These figures may vary a few hundred bushels either way, as they are based largely upon threshers' and bin measurements.

The wheat is all of the Marquis variety and a large proportion of it is grading No. 1 Northern. The oats are grown from pedigreed seed received through the Seed Grain Branch and will be sold in the country without difficulty, as there is a great demand for good seed. The growing of oats of this high grade means much to the country and the department has had requests, not only from the Seed Board, but from others, not to dispose of these oats outside the province, as there is a great need for pure-bred seed.

Seeding operations began early in April in Alberta, but the ground was almost parched and at times it was felt that it was really a waste of seed. However, in the Gleichen district what little rain there was certainly repaid the efforts that were made, as the average on the Blackfoot farm shows 5.17 bushels per acre in wheat and 20.49 bushels per acre in oats.

In Saskatchewan seeding began about the same time as in Alberta. There was more rain in this province, however, and at one time the stand of grain on the Department's farms indicated that there would be a yield of from 20 to 25 bushels per acre, but rust and lack of sufficient moisture prevented the results which would have been accomplished if conditions had been normal.

Great difficulty was experienced in securing help to carry on the operations during the past summer and fall. The labour market was very unsettled and it was with difficulty that the crops were harvested and threshed.

A great amount of preparatory work had to be done in an operation of this kind. In the matter of buildings it was necessary to erect 80 granaries and grain bins, 8 large stables, 3 permanent dwellings, and 4 dwellings, more or less of a temporary nature. Wells had to be sunk at the different points and equipped with pumping appliances. It was necessary to erect implement sheds and many miles of fencing at a cost of approximately \$3,000.

In the face of such adverse climatic conditions the department can show a substantial profit from the operation for the period ended October 31, 1919.

In the matter of equipment, due allowance has been made for depreciation, which has been charged against the operation accounts. The approximate yields of grain shown have been compiled from conservative estimates made of grain threshed into granaries and bins, a large portion of which is still unmarketed for lack of cars. Up to the time of writing there has been marketed in all 62,382 bushels of wheat and we have on the reserves or in transit 77,618 bushels. The total estimated value of the wheat and oat crops is \$321,500, and after liquidating all liabilities the estimated surplus earnings from the department's operations will be some \$137,000.

With regard to the work of Greater Production on the reserves generally, it may be said that in Manitoba and the southern portions of Saskatchewan the Indians have had fairly good crops, in Manitoba in particular. In northern Saskatchewan there was little or no rain, and in consequence the crop suffered severely and what grain was cut was of a poor sample, added to which very unfavourable weather for threshing was experienced. In fact many of the people in that section of the province were unable to get their grain threshed at all.

10 GEORGE V, A. 1920

In northern Alberta the Indians fared very well, while in southern Alberta the Blackfoot Indians were able to harvest five bushels per acre. This was exceptionally good considering the weather conditions, and the crop harvested was due entirely to good cultivation. In the three provinces the farming Indians summer-fallowed 9,891 acres, broke 4,873 acres, and fall-ploughed 2,486 acres of land. Owing to the unsatisfactory autumn weather very little autumn preparation of the land was done, which means that greater efforts will have to be made in the spring to get the crop into the ground. On the reserves this year the Indians had a total of 55,657 acres in crop, which is the largest acreage that was ever sown.

Mention may also be made of the lands on the reserves leased to white people for grain production purposes. The total area leased for this purpose is 16,374 acres, the bulk of which is in the province of Alberta. It is estimated that in the neighbourhood of 200,000 bushels of grain was produced on these lands.

In addition to this the department has leased to white settlers for grazing purposes 297,024 acres of Indian lands. This, together with the lands leased for farming purposes, has realized to date the sum of \$144,343.95. This is practically a net profit for the Indians interested, for previous to the granting of the leases the revenue would not exceed \$10,000 per annum.

BRITISH COLUMBIA.

Marked progress is being made by the Indians of British Columbia in agricultural pursuits, and great improvement is shown in the quantity and quality of their produce.

The Indians of British Columbia receive advice and instruction in the control of fruit and field pests, the control of weeds, pruning and grafting, general horticulture and agriculture, and stock-raising, especially the economic raising of pigs on rough lands.

MARITIME PROVINCES.

There is an annual parliamentary appropriation for Nova Scotia and also for New Brunswick for the purchase of seed grain, and the encouragement of agriculture among the Indians. Assistance is also given to individual farmers where required in Prince Edward Island.

QUÉBEC.

The Indians living in agricultural districts in the province of Quebec are taking much greater interest in farming, especially in the Ristigouche, Pointe Bleue, St. Regis, Maniwaki and Oka agencies.

SESSIONAL PAPER No. 27

GENERAL.

The following table shows an increase in the land under crop, production and value of the products as compared with last year:—

Land under Crop, Production and Value of the Products.

Province.	Population.	Land under Crop. ¹	Grain.	Roots.	Hay.	Value of Farm Products in- cluding Hay.
		Acres.	Bushels.	Bushels.	Tons.	\$
Alberta.....	8,837	19,210	120,189	8,543	35,396	397,673

Increase.....		9,547	2,765	22,455	30	307,897

NOTE.—¹Not including Hay Lands. ²Does not include 5,292 Indians in Yukon and North West Territories.

THE INDIANS AND THE GREAT WAR.

In this year of peace the Indians of Canada may look with just pride upon the part played by them in the great war both at home and on the field of battle. They have well and nobly upheld the loyal traditions of their gallant ancestors who rendered invaluable service to the British cause in 1776 and in 1812, and have added thereto a heritage of deathless honour which is an example and an inspiration for their descendants. According to the official records of the department more than four thousand Indians enlisted for active service with the Canadian Expeditionary forces. This number represents approximately thirty-five per cent of the Indian male population of military age in the nine provinces, and it must be remembered, moreover, that there were undoubtedly cases of Indian enlistment which were not reported to the department. The Indian soldiers gave an excellent account of themselves at the front, and their officers have commended them most highly for their courage, intelligence, efficiency, stamina and discipline. In daring and intrepidity they were second to none and their performance is a ringing rebuttal to the familiar assertion that the red man has deteriorated. The fine record of the Indians in the great war appears in a peculiarly favourable light when it is remembered that their services were absolutely voluntary, as they were specially exempted from the operation of the Military Service Act, and that they were prepared to give their lives for their country without compulsion or even the fear of compulsion. It must also be borne in mind that a large part of the Indian population is located in remote and inaccessible locations, are unacquainted with the English language and were, therefore, not in a position to understand the character of the war, its cause or effect. It is, therefore, a remarkable fact that the percentage of enlistments among the Indians is fully equal to that among other sections of the community and indeed far above the average in a number of instances. As an inevitable result of the large enlistment among them and of their share in the thick of the fighting, the casualties among them were very heavy,

and the Indians in common with their fellow countrymen of the white race must mourn the loss of many of their most promising young men. The Indians are especially susceptible to tuberculosis, and many of their soldiers who escaped the shells and bullets of the enemy succumbed to this dreaded disease upon their return to Canada as a result of the hardships to which they were exposed at the front.

ONTARIO.

Ojibwa Bands.—The majority of the Indian bands in Ontario belong to the Ojibwa or Chippewa tribe, which is the largest subdivision of the great Algonkin linguistic stock. They are the descendants of the warriors who fought so valiantly in the war of 1812 under their great leader Tecumseh. The enlistment average during the late war was exceptionally high and many of their bands sent practically all their eligible members to the front.

Special mention must be made of the Ojibwa bands located in the vicinity of Fort William, which sent more than one hundred men overseas from a total adult male population of two hundred and eighty-two. Upon the introduction of the Military Service Act it was found that there were but two Indians of the first-class left at home on the Nipigon reserve, and but one on the Fort William reserve. In reference to the Nipigon Indians, it may be mentioned that in 1812 a war party from this reserve paddled the entire length of lake Superior and proceeded to Queenston Heights where it joined the forces of General Brock. The Indian recruits from this district for the most part enlisted with the 52nd, popularly known as the Bull Moose Battalion. Their commanding officer, the late Colonel Hay, who was killed, stated upon frequent occasions that the Indians were among his very best soldiers. Their gallantry is testified by the fact that the name of every Indian in this unit appeared in the casualty list. The fine appearance of these Indian soldiers was specially commented upon by the press in the various cities through which the battalion passed on its way to the front. One of the Indian members of the 52nd, Private Rod Cameron, won premier honours in a shooting competition among the best marksmen of twelve battalions. He rendered valuable service at the front as a scout and sniper and was subsequently killed in action.

Private Joseph Delaronde, another Nipigon Indian, of the 52nd Battalion, won the Military Medal for gallantry in action. His cousin, Denis Delaronde, who was killed in action, was the first man of the 52nd to enter the trenches of the enemy. Two other members of this fighting Indian family, Charles and Alexander Delaronde, also served with the 52nd. The latter was wounded, returned home, and discharged, re-enlisted and went back to the front. Another Nipigon Indian of the 52nd to be decorated was Sgt. Leo Bouchard, who was awarded the Distinguished Conduct Medal. Private Augustin Belanger, another Indian member of the 52nd Battalion, who was killed in action, was awarded the Military Medal. Alexander Chief, a Fort William Indian of the 52nd Battalion, returned to Canada after two years' service with no fewer than twelve wounds. Although he was an Indian of remarkably fine physique, he fell a victim to tuberculosis as a result of the hardships he endured and died in December, 1918. The Military Medal was posthumously awarded in the fall of 1917 to Corporal Thomas Godchere, of the 102nd Scottish, a British Columbia battalion, to which he was transferred from the 94th, the unit with which he enlisted at Port Arthur, of the Long Lake band, in the Thunder Bay district, in recognition of his gallant conduct at Vimy Ridge.

The Chippewas of Rama sent thirty-eight men to the front from a total adult male population of 110. The Military Medal was awarded to one of their number, Private Ben Simcoe, for gallant conduct in action. This Indian is the great-grandson of John Simcoe, whose Indian name was Windego, a Sawnee brave who

SESSIONAL PAPER No. 27.

served with Tecumseh in 1812. Windego fought at Detroit, Queenston Heights, and Moraviantown, and upon the conclusion of the war was awarded the British Medal. He afterwards served with the Loyalist forces in the rebellion of 1837.

Among the Mississaguas of Rice Lake, forty-three enlisted from a total male population of eighty-two. One of their number, Lance-Corporal Johnson Paudash, of the 21st Battalion, received the Military Medal for his distinguished gallantry in saving life under heavy fire and for giving a warning that the enemy were preparing a counter attack at Hill Seventy; the counter attack took place twenty-five minutes after Paudash gave the information. It is said that a serious reverse was averted as a result of his action. He enlisted in August, 1914. Like many others of the Indian soldiers, he has a splendid record as a sniper, and is officially credited with having destroyed no less than eighty-eight of the enemy. Upon the introduction of the Military Service Act it was found that not a single man of the class called remained at home among the Chippewas of Nawash, located at Cape Croker. Thirty-one Mississaguas of Alnwick enlisted from a total adult male population of sixty-four. One of their number, Sampson Comego, won distinction as a sniper, having destroyed twenty-eight of the enemy. He enlisted in the fall of 1914, and was killed in November, 1915. Peter Comego, brother of Sampson Comego, also enlisted in 1914, served in the trenches, and was twice wounded. He also distinguished himself as a sniper.

The Indian bands located on Manitoulin island, on the northern shore of lake Huron, sent about fifty men to the front. One of their number, Frank J. Sinclair, received the Military Medal, and another, Francis Misiniskotewe, was awarded the Russian Medal.

Another Indian member of the 52nd Battalion to be decorated was Dave Kisek. He is said to have been the tallest man in the regiment. He came through the war without being wounded, although two bullets went through his tunic. During the heavy fighting around Cambrai he unstrapped a machine gun from his shoulder and advanced about 100 yards to the German position, where he ran along the top of their trench, doing deadly execution with his machine gun. He single-handed took thirty prisoners upon this occasion. This Indian came from the remote regions of the Patricia district.

About twenty Indians enlisted from the Parry Sound district. One of their number, Corporal Francis Pegahmagabow, won the Military Medal and two Bars. He enlisted in 1914 with the original 1st Battalion. He distinguished himself signally as a sniper and bears the extraordinary record of having killed 378 of the enemy. His Military Medal and two Bars were awarded for his distinguished conduct at Mount Sorrell, Amiens, and Passchendaele. At Passchendaele, Corporal Pegahmagabow led his company through an engagement with a single casualty, and subsequently captured 300 Germans at Mount Sorrell. Corporal Pegahmagabow presented an address on behalf of his people to His Royal Highness the Prince of Wales upon the recent visit of the latter to Parry Sound.

Forty-two Moravians of the Thames went to the front from a total adult male population of seventy-nine. One of their number who won fame as a sniper, Private George Stonefish, of Moraviantown, was tendered a civil reception by the city of Chatham on his return to Canada in recognition of his exceptional services. Another of their number, Corporal Robert Tobias, also was awarded the Military Medal. He is the son of ex-Chief Walter Tobias, who was killed at Ypres. Two other sons of ex-Chief Tobias also served with the expeditionary forces. One of the Moravian Indian soldiers, Private Roy Snake, enlisted at the age of sixteen with a forestry unit. He was afterwards transferred to the infantry and participated in the battle of Cambrai.

Among the other Ojibwa bands in Ontario that have notable enlistment records are the Chippewas of Saugeen, who sent forty-eight from a total adult male population

10 GEORGE V, A. 1920

of one hundred and ten; the Chippewas of Georgina and Snake Islands, who sent eleven from a total adult male population of twenty-three; the Chippewas of the Thames, who sent twenty-five from a total adult male population of one hundred and ten; the Chippewas and Pottawatomes of Walpole Island, who sent seventy-one to the front from a total adult male population of two hundred and ten; the band located at Sturgeon Falls, which sent thirty-five from a total adult male population of one hundred and three; the bands in the Chapleau district, which sent forty from a total adult male population of one hundred and one; the Mississaguas of the Credit, located near Hagersville, who sent thirty-two from a total adult male population of eighty-six, and the Munsees of the Thames, who sent eleven from a total adult male population of thirty-eight.

Special mention must be made of the remarkable response to the call to arms among the Mississaguas of Scugog. This little band has only thirty of a population, and when the war broke out but eight of these were adult males. These eight men all enlisted without exception, thereby establishing what is probably an enlistment record unequalled in the annals of the great war. Another outstanding case is that of the Algonkins of Golden Lake, who sent twenty-nine soldiers to the front, leaving only three men on the reserve.

IROQUOIS BANDS.

There are a number of populous Iroquois bands in Ontario, and these also like those of the Ojibwa race have a proud record in the great war. They are the descendants of the loyal Mohawks, Senecas, Onondagas, Cayugas, Oneidas and Tuscaroras, who came to Canada from the state of New York in 1775 under the leadership of Captain Joseph Brant Tyendinaga, the great Mohawk chieftain whose name is perpetuated in those of the city of Brantford and the county of Brant. The largest band of Iroquois is the Six Nations of Brantford. This band sent two hundred and ninety-two warriors to the front, of whom twenty-nine were killed in action, five died from sickness, one is missing, fifty-five were wounded, and one was taken prisoner of war. Those of their number who were decorated were Captain A. G. E. Smith, who was awarded the Military Cross; Ignace Williams, who was awarded the Military Medal, and Austin Horse, who was awarded the Military Medal. Captain A. G. E. Smith is the son of a Six Nations chief. He went overseas with the 20th Battalion and was three times wounded. Upon his return to Canada he was made adjutant of a Polish battalion at Camp Niagara.

The great majority of these Six Nations soldiers enlisted with the 114th Battalion, which was organized in the fall of 1915, under the command of Colonel E. S. Baxter, of Cayuga, then commanding officer of the Haldimand Rifles, a well known militia battalion. Colonel Baxter died in 1916 and was succeeded by Lieut.-Colonel Andrew T. Thompson of Ottawa. Colonel Thompson had also for some years commanded the Haldimand Rifles, the left half of which was made up of Six Nations Indians. Colonel Thompson is an honorary chief of the Six Nations Indians and his position at the head of the battalion did much to stimulate recruiting among the Indians. Many Indians from other bands also joined this unit, among whom were a large number from the Caughnawaga and St. Regis bands, in the province of Quebec, which also belong to the Iroquois race. Two entire Indian companies were formed in the 114th Battalion, and the majority of the officers of these companies were also Indians. In recognition of the fact that among its Indian members were many who were descendants of warriors who fought at the battle of Queenston Heights under General Brock, the battalion received the name of Brock's Rangers, and the device of two tomahawks became part of the regimental crest. A singularly beautiful regimental flag was worked for the Rangers by the Six Nations Women's Patriotic League. This is adorned with figures symbolic of various tribal legends and has been the subject of much comment and admiration. The 114th regimental band, com-

SESSIONAL PAPER No. 27

posed almost entirely of Indians, toured the British Isles for recruiting and patriotic purposes. Three Indian officers of this battalion, Captain J. R. Stacey of Caughnawaga, and Lieutenants Moses and Martin, of Ohsweken, were transferred to the Royal Flying Corps. Captain Stacey was killed in an accident and Lieutenant Moses was among the missing. Through a strange coincidence the first man from Brant county to be killed in action in the great war was Lieutenant Cameron D. Brant, a great-great-grandson of the famous Captain Joseph Brant. Lieutenant Brant enlisted with the 4th Battalion and was killed at the second battle of Ypres while gallantly leading his men against the trenches of the enemy. Two of the lineal descendants of Captain Joseph Brant, Corporal Albert W. L. Crain and Private Nathan Montour received severe wounds at the battle of Ypres. The present head of a distinguished old Iroquois clan or family, the Bearfoot Onondagas, is Mrs. Elijah Lickers. Four of her sons, two grandsons, and a son-in-law served with the expeditionary forces, of whom a son and grandson were killed in the field. One member of this family, who served with the original 48th Highlanders of Toronto, was taken prisoner in April, 1915, and was kept in Germany until the end of the war. Another Six Nations woman, Mrs. Catherine General, had a husband, four sons, and two sons-in-law with the overseas forces.

The other Iroquois bands in Ontario are the Mohawks of the Bay of Quinte, and the Oneidas of the Thames; both these bands have an exceptionally high enlistment record. Eighty-two Mohawks of the Bay of Quinte enlisted from a total adult male population of three hundred and fifty-three, and forty-eight Oneidas of the Thames enlisted from a total adult male population of two hundred and twenty. The Military Medal was awarded to one of the soldiers of the Bay of Quinte named Corby.

QUEBEC.

The Indians of Quebec were well represented in the expeditionary forces. The historic Iroquois village of Caughnawaga, near Montreal, sent forty-three men to the front with the 114th Battalion, Brock's Rangers, which, as has been mentioned in connection with the Indians of Ontario, contained two full battalions of Indians. One of their number, Captain John R. Stacey, was transferred to the Royal Flying Corps, after his arrival in England, and was subsequently killed in an accident. The famous Colonel Bishop, V.C., the great Canadian ace, stated that Captain Stacey was a flier of exceptional promise. He had been selected by Colonel Bishop to be a member of one of the latter's famous "fighting circle," but the accident which caused his death occurred before he was able to take his place in that renowned organization. In civilian life Captain Stacey was a successful customs broker in Toronto. He was untiring in his efforts to stimulate enlistment among the Iroquois both by able recruiting work and financial assistance. Captain Stacey went overseas as a lieutenant, but was soon promoted as a result of his exceptional abilities.

Sergeant Clear Sky, another Caughnawaga Indian of the 114th Battalion, was awarded the Military Medal for one of the most gallant and unselfish deeds that is recorded in the annals of the Canadian forces. During a heavy gas attack Sergeant Clear Sky noticed a wounded man lying in "no man's land" whose gas mask had been rendered useless. Clear Sky crawled to him through the poisonous fumes, removed his own mask, and placed it on the wounded man, whose life was in consequence saved. Sergeant Clear Sky was himself severely gassed as a result of his heroic action. He is a graduate of the well known Carlyle Indian University, and prior to his enlistment was a professional vaudeville entertainer. He was very popular at the front owing to his ability to entertain the troops with his singing and dancing.

The excellent record of the Caughnawaga Indians in this war is reminiscent of their loyalty upon former occasions. During the rebellion of 1837-38 these Indians rendered important service to the Government. On Sunday, November 4, 1838, a body

10 GEORGE V, A. 1920

of rebels attempted a surprise attack upon the village of Caughnawaga. A squaw warned the Indians, who were attending divine service at the time. They quickly and signally defeated the insurgents and made seventy prisoners, who were handed over to the authorities upon the following day. Their gallant conduct upon this occasion was specially mentioned in a despatch from Lord Glenelg to Sir John Colborne.

The St. Regis band of Iroquois sent twenty-six of their warriors to the front. One of their number, Private Philip McDonald, won exceptional distinction as a sniper. He enlisted in August, 1914, and served with the 8th Battalion, more particularly known as the Little Black Devils of Winnipeg. He was killed in action after having destroyed forty of the enemy by his deadly sharpshooting.

Delphis Theberge was awarded the Military Cross in recognition of his gallant conduct during the attack on the Canal du Nord.

Private Willie Cleary, a Montagnais Indian of Lake St. John, who served with the illustrious 22nd Battalion, was decorated with the Military Medal by His Royal Highness the Prince of Wales at Lafontaine Park, Montreal, on October 28, 1918, for conspicuous gallantry in an important trench raid. He was severely wounded.

Another Indian member of the 22nd Battalion, Private Joseph Roussin, of Oka, was awarded the Military Medal.

MARITIME PROVINCES.

All the Indians of the Maritime Provinces belong to the Micmac tribe, which is a subdivision of the Algonkin linguistic stock, with the exception of the Maliseets of New Brunswick, who form a separate branch of the Algonkin race.

The Nova Scotia reserves are not very thickly populated, and in consequence the number of recruits secured upon them was numerically small. In a number of instances, however, the enlistment record in proportion to the population was very high, for example, from among the Micmacs of Sydney every eligible man went to the front. The Micmacs of Colchester county sent nine men from a total adult male population of twenty-five; the Micmacs of Hants county sent six from a total adult male population of sixteen; the Micmacs of Lunenburg county sent eleven from a total adult male population of nineteen; the Micmacs of Pictou county sent ten from a total adult male population of forty; the Micmacs of Shelburne county sent three from a total adult male population of eight; the Micmacs of Yarmouth county sent three from a total adult male population of twelve, and the Micmacs of Digby county sent six from a total adult male population of twenty-four. One of these Nova Scotia Indians, Private Joseph W. Morris, was awarded the Distinguished Conduct Medal and the Military Medal. He was three times wounded.

From among the Micmacs and Maliseets of New Brunswick, sixty-two went to the front out of a total adult male population of one hundred and sixteen.

The Micmacs of Prince Edward Island have an exceptionally fine enlistment record. The total number of adult males among these Indians was sixty-four, of whom thirty went to the front, or practically every eligible man. They earned the highest praise for their exceptionally gallant conduct in action, and particularly distinguished themselves in the great battle of Amiens. One of their number, Private James Francis, received the Military Medal. A curious incident is recorded with regard to two Micmac brothers named Cope, from Kings county, Nova Scotia. These two young Micmacs enlisted in different battalions, and did not see each other until they met quite by chance in the thick of the fighting at Vimy Ridge. They were so begrimed as a result of the hard day's fighting that they had at first failed to recognize each other. The elder of these boys was afterwards killed at Passchendaele, but the younger came through the war safely and proceeded with the army of occupation into Germany.

MANITOBA.

Some of the Manitoba bands have an excellent enlistment record. Notable among these is the Peguis band, which sent twenty men to the front from a total adult male

SESSIONAL PAPER No. 27

population of one hundred and eighteen, eleven of whom were killed in action, four wounded and gassed, three wounded, and one taken prisoner. Two of these Indians were with the Serbian forces. The Pas band sent nineteen men to the front from a total adult male population of ninety-two. The St. Peter's band sent thirty-three men to the front from a total adult male population of one hundred and twenty-seven, seven of whom were killed in action, eight wounded, and one gassed. The Sioux Indians located at Griswold sent twenty men to the front from a total population of eighty-four. They are descendants of refugees who came to Canada half a century ago, after the famous wars between the Sioux Indians and the American Government.

SASKATCHEWAN.

In previous reports reference has been made to the model agricultural community at File Hills, which is composed of ex-pupils of Indian schools, and which was organized by the department some sixteen years ago. As a result of this experiment these progressive young Indians are now on a wholly self-supporting basis and are ranked among the most competent farmers of the province. They fully appreciate the advantages that have been brought to them by civilization and were ready at the critical time to defend them against the menace of a foreign enemy. Twenty-four of their number enlisted from a total adult male population of thirty-eight, and this remarkably high percentage is emphasized by the fact that the majority of them were married men. One of these Indians, Alexander Brass, was awarded the Military Cross for conspicuous gallantry in action. He is the bandmaster of the File Hills Indian Colony brass band, a well known organization which rendered excellent assistance at recruiting meetings and other patriotic gatherings throughout the province.

The Coté band, whose reserve is located in the vicinity of old Fort Pelly, one of the earliest Hudson Bay posts established in the province, sent twenty-two men to the front from a total adult male population of forty-three.

One of the Saskatchewan Indian soldiers, Joe Thunder, of the 128th Battalion was awarded the Military Medal for a feat of arms of an exceptionally dramatic character. He was separated from his platoon and surrounded by six Germans, each of whom he bayoneted. He received a severe wound in March, 1918, and now wears a scarf pin made from a bone that was removed from his leg as a result of this wound.

Two Indians of the Mistawasis band, Joe Dreaver and N. G. Sanderson, were awarded the Military Medal.

ALBERTA.

That the present generation of Alberta Indians had not lost the intrepid spirit of their ancestors, the warlike riders of the plains and hunters of the buffalo, is demonstrated by the fact that they were well and gallantly represented in the Canadian Expeditionary Force.

One of their number, Albert Mountain Horse, a Blood Indian, who held a commission as lieutenant, and who enlisted as a private in August, 1914, particularly distinguished himself. He was badly gassed upon three different occasions as a result of which he afterwards contracted consumption and died in November, 1915. The military funeral that was held for him at Calgary will long be remembered as one of the most impressive ceremonies that ever took place in that city. So many desired to attend the service that it was necessary to issue tickets of admission to the church.

Another Alberta Indian who won fame at the front was Lance-Corporal Norwest, who came from the vicinity of Edmonton and enlisted with the 50th Battalion of Calgary. He was one of the foremost snipers in the British army and was officially credited with one hundred and fifteen observed hits. He carried a special rifle fitted with a telescopic sight. He was killed by a German sniper in August, 1918, while

10 GEORGE V, A. 1920.

endeavouring with two companions to locate a nest of enemy sharpshooters who had been causing a considerable amount of trouble to the advance posts of the Canadian front line companies. He won the Military Medal and Bar.

BRITISH COLUMBIA.

The British Columbia Indians are somewhat less warlike in character than those of the plains and in the eastern provinces, and are by nature adverse to leaving their homes upon any unfamiliar venture. They nevertheless sent several hundred good soldiers to the front, and a number of them have very distinguished records.

Although the Military Service Act did not apply to the Indians, a record of those enlistments was compiled upon the introduction of the measure. It was found that among the Indians of the Head of the Lake band in the Okanagan district every man who came within the description of the first call had already enlisted. This is a record of which any community might well be proud. One of these Indians, Private George McLean, received the Distinguished Conduct Medal in recognition of the performance of a feat which was of an extraordinary character even for the great war. Private McLean single-handed destroyed nineteen of the enemy with bombs and captured fourteen. He was himself severely wounded upon this occasion.

A number of the British Columbia Indians served with the Mesopotamian forces. One of these, David Bernardan, of the Oweekayno band, in the Bella Coola agency, commanded a motor transport vessel on the Euphrates river. An Alert Bay Indian, Edwin Victor Cook, received the Distinguished Conduct Medal. He was wounded twice, and was finally killed towards the end of the war. Dan Pearson, an Indian of the Metlakatla band, which is located near Prince Rupert, was awarded the Military Medal. He afterwards died of pneumonia.

PATRIOTIC AND OTHER WAR FUNDS.

From the outset of the war the Indians, both as bands and as individuals, have been very generous in proportion to the means at their disposal in contributing to the Patriotic, Red Cross, Belgian Relief, and other war funds, their donations in all making a total of \$44,545.46. In addition to this amount, sums totalling \$8,750, were offered, but as the bands in question were not in a position to make the outlay, the department could not sanction the expenditure. The following list shows by provinces the contributions of the Indians to the various war funds:—

ONTARIO.

10 GEORGE V, A. 1920

comforts for the soldiers, knitted socks, sweaters and mufflers, and also raised money for patriotic purposes by holding card parties, bazaars, and other social entertainments. The making of baskets and beadwork is a native industry among the Indians, and the Indian women found a novel and very successful means of securing funds for war needs by the sale of these wares.

The first of these organizations of the nature above mentioned to be formed on a reserve was the Six Nations Patriotic League, which was organized in October, 1914, and continued in operation with great success until the conclusion of the war. Upon the mobilization of Brock's Rangers, a battalion which has been hereinbefore mentioned, another women's patriotic society was formed on the Six Nations reserve under the name of the Brock's Rangers' Benefit Society. The purpose of this society was to provide for the needs of the Indian companies of this battalion. The society was very painstaking in its work and no Indian member of the battalion failed to benefit as a result of its efforts.

The Indian women of the Oneidas of the Thames, another Iroquois band, which sent a large number of its members to the front, also formed a patriotic league in 1916 in order to provide comforts for their soldiers. In the first year of its existence this society sent twenty-five boxes overseas; in 1917, one hundred and four, and in 1918, seventy-four up to the signing of the armistice. Each of these boxes contained thirty pairs of socks and twenty-four khaki sweaters.

A Red Cross society was formed by the Chippewas of Saugeen to provide comforts for the members of the band who were at the front. This organization raised more than \$400 for the benefit of their soldiers by holding a series of box socials.

A branch of the Red Cross society was also formed by the women of the Rolling River band in the province of Manitoba, and the particularly fine quality of the beadwork which they sold for the benefit of the fund was the subject of special comment.

The women of the File Hills Colony, in Saskatchewan, formed a branch of the Red Cross Society in 1915, and in the fall of the same year there was also organized a branch of the Patriotic society at the colony. Branches of the Red Cross were also formed by the women of the Indian bands located at Qu'Appelle and Pelly, Sask., and the head office of the Saskatchewan Provincial Branch of the Red Cross stated that the sewing and knitting work of these Indian societies was unsurpassed in quality and workmanship by any received from any part of the province.

Similar activities to those above mentioned were carried on throughout the period of the war by the women on a great many of the reserves in all parts of the Dominion.

MILITARY ESTATES, PENSIONS AND ASSIGNED PAY.

The department is dealing with more than three hundred and fifty individual cases of military estates, pensions and assigned pay. This work has involved keeping close track of the dependents of Indian soldiers. In many cases, where the department thought that the pension or assigned pay might not be judiciously expended, it has administered the money for them. The result has been that these dependents have been maintained in good circumstances and that we have been able, through the exercise of considerable care, to fund about \$25,000 over and above what has been expended for maintenance. This money, so funded, will be used chiefly on behalf of the children of Indian soldiers and in almost all cases will be sufficient to give them a splendid start in life.

GENERAL REMARKS.

There were more than five hundred Indians on the roll of the 107th Pioneer Battalion, which was commanded by the late Lieut.-Col. Glen Campbell, of Winnipeg, formerly Chief Inspector of Indian Agencies. Among these there were representatives of many different Indian tribes, including Crees, Saulteaux and Sioux from

SESSIONAL PAPER No. 27

the north and west; Mohawks, Onondagas, Oneidas, Tuscaroras, Delawares and Chippewas from Ontario, and Micmacs from the Maritime provinces. The excellent services rendered by these Indians in pioneer work was particularly commented upon, and especially their ability to adapt themselves to bad weather and awkward circumstances without complaint. Several of these Indians qualified for commissions after their arrival in England, and two of them, Private O. Barren and A. W. Anderson were awarded the Military Medal for gallantry in action. The Indian company of the 107th particularly distinguished itself by its coolness and efficiency in continuing at work under heavy fire during a terrific bombardment of Hill 70 near Lens.

Three of these Indians, Tom Longboat, Joe Keeper and A. Jamieson were well known in athletic circles as long distance runners, and another, John Nackaway, before enlisting had been a runner for the Hudson's Bay Company in the far north. These Indian athletes rendered invaluable service as despatch carriers.

About one hundred Indian recruits were secured in the remote regions of the Hudson Bay and Patricia districts. Many of these first came into contact with civilization as a result of joining the forces and a number of them were unable to speak a word of English. It is remarkable how rapidly these Indians became smart, well-disciplined soldiers and how well they adapted themselves to surroundings that were entirely new to them.

John Campbell, a full-blooded Indian who lived on the Arctic coast, travelled three thousand miles by trail, canoe and river steamer in order to enlist at Vancouver.

Many of the Indian soldiers were hunters in civil life and in consequence were expert marksmen. As a result of this experience they were able to render excellent service as snipers at the front and in this branch of fighting they were unexcelled. It is claimed that the Indians did much towards demoralizing the entire enemy system of sniping. They displayed extraordinary patience and self-control when engaged in this work and would sit hour after hour at a vantage point waiting the appearance of the enemy at his sniping post. The Indian snipers recorded their prowess by the picturesque method of notching their rifles for every observed hit. Three famous Indian snipers of the 8th Battalion, McDonald, an Iroquois; Riel, a grandson of the famous rebel, Louis Riel; and Ballantyne, a western Indian, had forty, thirty-eight and fifty-eight notches, respectively, on their guns. The two former were killed in action, but the latter survived the war and is now taking a course in gas engineering.

Many interesting letters were received from Indians at the front wherein were displayed keen powers of observation and exceptional descriptive ability.

Many of the Indian bands during the course of the war prepared memorials expressive of their loyalty and desire to assist to the utmost extent of their ability in the prosecution of the war, which were either forwarded to His Majesty King George V or to His Excellency the Governor General of Canada.

A large number of Indians have invested their savings in victory bonds, in a number of cases the amount invested by individual Indians exceeding \$1,000. Chief Baptiste George, of Inkameep, in the Okanagan valley, B.C., purchased bonds to the amount of \$21,000, and was presented with a victory bond flag upon two occasions.

The Indian returned soldiers have been tendered enthusiastic receptions by their fellow countrymen upon their return to the reserves. On some of the reserves suitable memorial tablets have been erected in honour of the members of the band who fell in the war. The return of so many Indian soldiers who have been broadened and inspired by contact with the outside world and its affairs is bringing about radical and progressive changes in the life of the reserves.

The Department is administering the Soldier Settlement Act with respect to Indians and some account of the work that is being done in connection with this subject will be found under the heading of Amendments to the Indian Act.

AMENDMENTS TO THE INDIAN ACT.

A number of amendments have been made to the Indian Act during the past year, the most important of which is that providing for the administration of the Soldier Settlement Act by the Department of Indian Affairs in so far as returned Indian soldiers are concerned.

SOLDIER SETTLEMENT.

The new provisions with regard to this matter are as follows:—

196. (1) *The Soldier Settlement Act, 1919* (excepting sections three, four, eight, nine, ten eleven, fourteen, twenty-nine, subsection two of fifty-one, and sixty thereof, and excepting the whole of Part Three thereof), with such amendments as may from time to time be made to said Act shall, with respect to any "settler" as defined by said Act who is an "Indian" as defined by this Act, be administered by the Superintendent General of Indian Affairs.

(2) For the purpose of such administration, the Deputy Superintendent General of Indian Affairs shall have the same powers as the Soldier Settlement Board has under *The Soldier Settlement Act, 1919*, the words "Deputy Superintendent General of Indian Affairs" being, for such purpose, read in the said Act as substituted for the words "The Soldier Settlement Board" and for the words "The Board."

(3) Said Act, with such exceptions as aforesaid, shall for such purpose, be read as one with this Part of this Act.

197. (1) The Deputy Superintendent General may acquire for a settler who is an Indian, land as well without as within an Indian reserve, and shall have authority to grant to such settler a location ticket for common lands of the band without the consent of the council of the band, and, in the event of land being acquired or provided for such settler in an Indian reserve, the Deputy Superintendent General shall have power to take security as provided by *The Soldier Settlement Act, 1919*, and to exercise all otherwise lawful rights and powers with respect to such lands, notwithstanding any provisions of the *Indian Act* to the contrary.

(2) Every such grant shall be in accordance with the provisions of said *Soldier Settlement Act, 1919*, and of this Part.

198. The Soldier Settlement Board and its officers and employees shall, upon request of the Deputy Superintendent General of Indian Affairs, aid and assist him, to the extent requested, in the execution of the purposes of this Act, and the said Board may sell, convey and transfer to the said Deputy, for the execution of any such purposes, at such prices as may be agreed, any property held for disposition by such Board.

199. (1) In the event of any doubt or difficulty arising with respect to the administration by the Superintendent General of Indian Affairs of the provisions of *The Soldier Settlement Act, 1919*, or as to the powers of the Deputy Superintendent General of Indian Affairs, as by this Act authorized or granted, the Governor in Council may, by order, resolve such doubt or difficulty and may define powers and procedure.

(2) Such order shall not extend the powers which are by *The Soldier Settlement Act, 1919*, provided. 9-10 Geo. V. c. 56, s. 4.

It is proposed to settle the Indian soldiers as far as possible on reserves belonging to the bands of which they are members, with a view to relieving the claims for land on behalf of returned soldiers to that extent. When these returned Indian soldiers are thus settled on the reserve, the administration of their affairs is, under the legislation above

SESSIONAL PAPER No. 27

quoted, left entirely in the hands of the Department of Indian Affairs, thus avoiding the confusion which would inevitably arise if their affairs were administered partly by the Department of Indian Affairs and partly by the Soldier Settlement Board. The Indian agents throughout the Dominion have a personal knowledge of the capabilities and needs of Indian returned soldiers belonging to their respective agencies, and are, therefore, able to supply the information and assistance required in the same manner as the qualification committee, field agents, inspectors, etc., under the Soldier Settlement Act, thus reducing the cost of the work to a minimum. This arrangement, moreover, is considered more satisfactory by the Indians themselves, who prefer to have all matters which relate to them personally in any way dealt with by their own department.

Section 21 of the Indian Act provides that:—

“No Indian shall be deemed to be lawfully in possession of any land in a reserve, unless he has been or is located for the same by the band, or council of the band, with the approval of the Superintendent General.”

and section 102 provides that:—

“No person shall take any security or otherwise obtain any lien or charge, whether by mortgage, judgment or otherwise, upon real or personal property of any Indian or non-treaty Indian ” with respect to property in a reserve.

Subsection 1 of section 197 of the amendment above quoted provides for the taking of the common lands of the band, if any be available, for an Indian soldier without reference to the Indian council of the band, and for the taking of proper security for advances to Indian returned soldiers.

These amendments give the department practically all the powers of the Soldier Settlement except those of expropriation. A large number of returned Indian soldiers have been glad to take advantage of the provisions of the Soldier Settlement Act. On the Six Nations reserve thirty-five loans have been granted, and altogether seventy-five have been dealt with in Ontario, Quebec, and Prince Edward Island. No return has been received from the western provinces as yet. Altogether the expenditure has been more than \$100,000, and it is expected that next spring a large number of applications for loans will come in. The department has endeavoured to keep the loans as low as possible in order not to burden the settler with too large a repayment; but in all cases he has been given sufficient to secure everything which he needs. Proper security and mortgages are secured in each case, and it is confidently expected that there will be very few settlers who will not be in a position to repay the amounts advanced them. The work of the settlers has been an excellent incentive to other members of the band, and the progress which they are making is very satisfactory.

MINING RIGHTS.

Section 48 of the Indian Act, which reads as follows:—

“Except as in this part otherwise provided, no reserve or portion of a reserve, shall be sold, alienated or leased until it has been released or surrendered to the Crown for the purposes of this part: Provided that the Superintendent General may lease, for the benefit of any Indian, upon his application for that purpose, the land to which he is entitled without such land being released or surrendered, and may, without surrender, dispose to the best advantage, in the interests of the Indians, of wild grass and dead or fallen timber,” has been amended by adding thereto the following clause:—

“Provided also that the Governor in Council may make regulations enabling the Superintendent General without surrender to issue leases for

10 GEORGE V, A. 1920

surface rights on Indian reserves, upon such terms and conditions as may be considered proper in the interest of the Indians covering such area only as may be necessary for the mining of the precious metals by any one otherwise authorized to mine such metals, said terms to include provision for compensating any occupant of land for any damage that may be caused thereon as determined by the Superintendent General."

The precious metals belong to the provinces, but under the Indian Act prior to the passage of the amendment hereinabove quoted no lease of surface rights for the purpose of taking out these metals could be given without a surrender thereof from the band. Until recently the British Columbia Mineral Act and Placer Mining Act, respectively, provided that Indian reserves were to be excepted from the lands which might be entered upon for mining purposes. At the last session of the Provincial Parliament, however, amendments were passed whereby Indian reserves are no longer excepted, but until the amendment hereinabove quoted was passed the Indian Act still prevented any mining on a reserve without a surrender from the band. It was, therefore deemed necessary to pass this amendment in order to facilitate the operation of the provincial Act and to co-operate with the province with regard to mining rights in order that mutual benefits might be obtained therefrom in the most expeditious manner. Owing to local conditions, misapprehension or hostility on the part of a band, it is not always possible to secure a surrender for mining rights. This obstacle has been effectively overcome by the amendment.

TIMBER SALES.

Subsection 1 of section 89 of the Indian Act, which formerly read as follows:—

"With the exception of such sum not exceeding fifty per centum of the proceeds of any land, and not exceeding ten per centum of the proceeds of the timber or other property, as is agreed at the time of the surrender to be paid to the members of the band interested therein, the Governor in Council may, subject to the provisions of this part, direct how and in what manner, and by whom, the moneys arising from the disposal of Indian lands, or of property held, or to be held in trust for Indians, or timber on Indian lands or reserves, or from any other source for the benefit of Indians, shall be invested from time to time, and how the payments or assistance to which the Indians are entitled shall be made or given."

has been amended by striking out the words "and not exceeding ten per centum of the proceeds of any"

Prior to the year 1906 the Indian Act stipulated that a distribution of ten per cent of the proceeds of the sale of land or timber might be made to the Indians surrendering such, but on July 13, 1906, an amendment was passed authorizing the distribution of 50 per cent of the proceeds of the sale of land.

The primary object of the amendment of 1906 was to persuade the Indians to more readily surrender certain of their lands, and it resulted beneficially in the interests of the public. It is considered that the increase in the distribution of the proceeds of timber as well from ten to fifty per cent will be of special benefit to the Indians.

On many reserves the timber has either attained a mature stage of growth or is subject to a serious fire hazard and the cutting of such timber is well warranted if a system of proper forestry economics is to be followed.

On several occasions the Indians have refused to surrender their timber, notwithstanding the fact that it would be in the interests both of themselves and the public, unless upon condition that a larger portion than ten per cent of the proceeds would be distributed amongst them. This amendment has been passed, therefore, with the object of facilitating such surrenders.

SESSIONAL PAPER No. 27

ENFRANCHISEMENT.

In 1918 Parliament added the following section to the Indian Act with regard to enfranchisement:—

122A. (1) If an Indian who holds no land in a reserve, does not reside on a reserve, and does not follow the Indian mode of life, makes application to be enfranchised, and satisfies the Superintendent General that he is self-supporting and fit to be enfranchised, and surrenders all claims whatsoever to any interest in the lands of the band to which he belongs, and accepts his share of the funds at the credit of the band including the principal of the annuities of the band to which share he would have been entitled had he been enfranchised under the foregoing sections of the Act, in full of all claims to the property of the band, or in case the band to which he belongs has no funds or principal of annuities, surrenders all claims whatsoever to any property of the band, the Governor in Council may order that such Indian be enfranchised and paid his said share if any, and from the date of such order such Indian, together with his wife and unmarried minor children shall be held to be enfranchised.

(2) Any unmarried Indian woman of the age of twenty-one years and any Indian widow and her minor unmarried children, may be enfranchised in the like manner in every respect as a male Indian and his said children.

(3) This section shall apply to the Indians in any part of Canada.

Prior to the passage of this amendment it was necessary for an Indian to be in possession of land on a reserve in order to become enfranchised under the Act. If the applicant did not happen to be in possession of land when his application was submitted he was obliged to secure a location from the council of the band. Among the more progressive bands the lands are all occupied, and there are no common lands from which locations could be given, and the enfranchisement, therefore, of individual Indians without lands was impossible. There are Indians from such bands who earn their living at various industries in towns and cities, and who would be glad to be enfranchised without claiming any land on the reserve whatsoever. These Indians have demonstrated their ability to support themselves and to exercise the rights and privileges of enfranchised persons, and it was, therefore, considered undesirable that their enfranchisement should be longer obstructed.

Many Indians qualified for enfranchisement under the provisions of the section of the Indian Act hereinabove quoted have availed themselves of this advantage. The following list shows by bands the number of Indians that have so far been enfranchised as a result of the passage of the amendment.

Six Nations	212
Mississaguas of the Credit	11
Mississaguas of Mud Lake	1
Mohawks of the Bay of Quinté	2
Ermineskin's	1
Total	<hr/> 227 <hr/>

The procedure adopted in connection with these enfranchisements is to obtain from each individual applicant a release and surrender under seal, providing that in consideration of the payment of the applicant's share of the funds at the credit of the band to which he belongs, he releases all claims whatsoever to any interest in the lands or property of the band, as well as all manner of action, actions or cause of actions or claims and demands whatsoever which he might have had or may have by reason of any matter, cause or thing whatsoever in respect of the said band. The

10 GEORGE V, A. 1920

applicant in each case is also required to furnish a statutory declaration by a priest, clergyman or minister of the religious denomination to which he belonged, or by a justice of the peace or a notary public, to the effect that to the best of the knowledge and belief of the deponent the applicant has been for at least five years a person of good moral character, temperate in habits and of sufficient intelligence to hold land in fee simple and otherwise to exercise all the rights and privileges of an enfranchised Indian.

In addition to the above, the local Indian Agent is required in each case to report as to the earning capacity of the individual Indian, and that he did not reside on the reserve and owned no land thereon.

Upon satisfactory information being furnished as above, an Order in Council is applied for, and upon the passage thereof, a certified copy is forwarded to the applicant through the local Indian Agent, together with a cheque for the amount to which the applicant is entitled as his share, and if married, that of his wife and family, of the band funds.

The manner in which so many of the Indians have availed themselves of the opportunity to become enfranchised is gratifying and proves that the laws was needed. I think it would be in the interest of good administration if the provisions with regard to enfranchisement were further extended so as to enable the Department to enfranchise individual Indians or a band of Indians without the necessity of obtaining their consent thereto in cases where it was found upon investigation that the continuance of wardship was no longer in the interests of the public or the Indians.

EDUCATION.

There were 322 Indian schools of all classes in operation during the year, namely, 248 day, 58 boarding and 16 industrial.

As compared with the previous year there is a decrease of 16 in the day school class and one in the industrial.

Several of the day schools were closed owing to lack of attendance, and a number of others through inability to secure teachers. A few day schools, which had been closed for some time, were re-opened and new schools started at several points.

The Elkhorn industrial school was closed from May 1, 1918. This accounts for the decrease of one school in this class.

The total enrolment for the year was 11,952 pupils, 5,966 boys and 5,986 girls. This, as compared with the previous year shows a decrease of 461 pupils, 245 boys and 216 girls. There was an enrolment of 7,312 in the day schools, 3,018 in the boarding schools and 1,622 in the industrial schools.

The average attendance during the year was 7,532, a decrease of 346.

The percentage of attendance of the number enrolled during the year was 63.02.

In addition to the above about 100 Indian children, the greater number of whom are orphans, are being cared for and educated in public and private residential institutions throughout the Dominion.

The 322 schools comprising day, boarding and industrial in operation during the year were conducted under the following auspices: Undenominational, 53 day and one industrial; Roman Catholic, 83 day, 32 boarding and 8 industrial; Methodist, 42 day, 3 boarding, and 4 industrial; Presbyterian, 4 day and 7 boarding, and the Salvation Army, one day school.

The Indian schools in Ontario, Quebec, Nova Scotia, and Prince Edward Island are inspected semi-annually by the provincial, separate and public school inspectors under arrangements with the Department of Education in each province. In New

SESSIONAL PAPER No. 27

Brunswick and British Columbia Indian schools are inspected by officials appointed by the department. In Manitoba, Saskatchewan, Alberta, and the Northwest Territories the schools are inspected by the inspectors of the different Indian agencies; regular visits are made, and reports submitted to the department. In addition to this inspection, almost all the schools are under the direct supervision of the different Indian agents, who are required to make monthly inspections and reports.

Qualified teachers with professional training are engaged whenever it is possible to obtain them, and in the older settled portions of the different provinces the greater number of the teachers are so qualified. In the schools situated in the more remote reserves it is difficult to secure teachers with certificates. Many of our teachers who have not professional qualifications have, however, long experience and are meeting with a great measure of success in Indian school work.

Our schools compare favourably with white schools similarly situated with respect to the work in the class-room, and in accommodation and equipment provided.

It has been found necessary in many cases to increase the salary of the teachers in the day schools. A war bonus at the rate of \$150 per annum, was paid to those teachers who were in the employ of the department on March 31, 1918, and who gave continuous service throughout the year.

In the day schools the course of study prescribed for the provincial, public and separate schools is strictly followed.

At practically all the residential schools there was a large acreage under cultivation. At many of the day schools also school gardens were conducted. The pupils are thus enabled to receive a general knowledge of agriculture which should be of great use to them in after life.

The policy of granting assistance to graduates to encourage farming has been maintained. Upon leaving school a male ex-pupil may be given a grant of cattle, horses, implements and building material. During the past fiscal year 6 girls and 12 boys, ex-pupils, have been assisted to the extent of \$2,611.50, and refunds on previous loans to the amount of \$2,249.01 have been received.

The expenditure on Indian education from Parliamentary Appropriation during the year amounted to \$735,504.90. Expenditures for new buildings and repairs to old buildings were reduced to as low an amount as possible during the year. The following statement will show the expenditure for the fiscal year ended March 31, 1919, for Indian education from Parliamentary Appropriation:—

Province.	Day Schools.	Boarding Schools.	Industrial Schools.	Ex-pupils.	Travel and Salaries.	Tuition.	Freight Expenses.	Mis-cellaneous.	Total.

SESSIONAL PAPER No. 27

In addition to the above, the various bands of Indians, whose funds are sufficient to meet the outlay, contributed the sum of \$33,919.12 towards the payment of teachers' salaries and the maintenance of school buildings on their reserves. For the fiscal year ended March 31, 1919, the amounts so contributed have been as follows:—

Account No.	Band.	Interest.	Capital.
		\$ cts.	\$ cts.
1	Ojibbewas of Batchawana	876.80	
2	Chippewas of Beausoliel	276.66	
3	Chippewas of Nawash	2,156.21	
4	Chippewas of Rama	699.13	
5	Chippewas of Sarnia	1,984.99	
6	Chippewas of Saugeen	1,902.90	
7	Chippewas of Snake Island	143.89	
8	Chippewas of The Thames	863.93	
9	Chippewas of Walpole Island	242.28	
12	Ojibbewas of Garden River	810.50	
13	Ojibbewas of Henvey Inlet	70.83	
14	Ojibbewas of Nipissing	623.97	
15	Manitoulin Island (unceded)	533.45	
17	Mississaguas of Alnwick	570.65	
18	Mississaguas of Credit	454.00	
19	Mississaguas of Rice Lake	312.00	
20	Mississaguas of Mud Lake	200.95	
22	Mohawks of Bay of Quinte	2,397.38	
23	Moravians of Thames	746.46	
30	Chippewas of Parry Sound	312.00	
33	Six Nations of Grand River	11,348.14	3,000.00
34	102.62	
50	502.75	
82 Lake	328.66	
182	Dokis Band	290.68	
246	Ojibbewas of Sheguiandah	446.04	
247	Ojibbewas of Sheshegwaning	847.30	
248	Ojibbewas of South Bay	131.25	
249	Sucker Creek	91.78	
251	Ojibbewas of West Bay	710.92	
		30,919.12	3,000.00
	Total		\$33,919.12

The amount expended from interest represents current expenses, while the expenditure from capital was an outlay for new buildings.

At the request of the directors, an exhibit of Indian school work was made at the Central Canada Exhibition at Ottawa in September, 1918. A creditable display of sewing, writing, drawing and other school work was made and the exhibit elicited a great deal of favourable comment.

A comprehensive statistical statement will be found in Part II of this report, showing the enrolment and attendance at all classes of schools.

10 GEORGE V, A. 1920

REAL AND PERSONAL PROPERTY.

The following table shows a steady and substantial increase from year to year in the value of the real and personal property of the Indians.

	1917	1918	1919
	\$	\$	\$
Total value of lands in Reserves.....	48,057,758	49,782,695	51,146,347
Value of private fencing.....	1,273,120	1,288,532	1,333,319
Value of private buildings.....	4,551,097	4,616,745	4,766,236
Value of public buildings, property of the Band.....	1,236,805	1,181,987	1,223,648
Value of implements and vehicles.....	1,540,407	1,581,080	1,710,875
Value of live stock & poultry.....	3,998,663	4,471,945	4,613,062
Value of general effects.....	955,806	1,020,042	1,069,424
Value of household effects.....	1,272,259	1,342,086	1,399,454
Total Value of Real and Personal Property...	62,885,915	65,285,112	67,262,415

The following table shows by provinces a marked increase in the per capita value of the real and personal property of the Indians during the past four years.

PER capita value of real and personal property.

Province.	1916 P. C. Value of Real and Personal Property.	1917 P. C. Value of Real and Personal Property.	1918 P. C. Value of Real and Personal Property.	1919 P. C. Value of Real and Personal Property.
	\$ cts.	\$ cts.	\$ cts.	\$ cts.
Alberta.....	1655 20	1852 05	2058 18	2121 78
British Columbia.....	686 41	687 03	666 47	695 07
Manitoba.....	259 80	270 04	288 86	300 83
New Brunswick.....	118 60	119 30	119 85	124 09
Nova Scotia.....	110 31	114 74	121 02	120 67
Ontario.....	331 42	332 38	342 26	344 06
Prince Edward Island.....	147 17	155 62	154 85	163 15
Quebec.....	206 76	208 92	212 42	214 90
Saskatchewan.....	1234 82	1286 88	1317 48	1366 84
Average.....	593 79	624 45	658 10	667 95

It will be noted that since 1916 the average per capita increase has amounted to \$74.16; in the province of Alberta there has been an increase of nearly \$500 per capita since 1916, which is a gratifying indication of progress among the western Indians. The fact that the per capita value of the real and personal property of these Indians exceeds \$2,000 will afford some idea of the well-to-do circumstances in which they are situated.

Further detailed statistics of real and personal property will be found under the heading of Table 5, Part II of this report.

SESSIONAL PAPER No. 27

SOURCES AND VALUE OF INCOME.

The following table shows the sources and value of the income of the Indians during the past four years, and it will be observed that the increases have been sufficient to offset in a great measure the increase in the cost of living during this period:—

	1916.	1917.	1918.	1919.
	\$	\$	\$	\$
Value of farm products including hay.....	2,246,507 00	2,351,807 00	2,834,149 00	3,142,046 00
Value of beef sold and also of that used for food.	307,779 00	346,792 00	388,885 00	424,419 00

Average.....	60 48	66 74	72 49	84 59	94 57

Further statistics with regard to sources and value of income will be found under the heading of Table 6, Part II of this report.

HUNTING AND TRAPPING.

Many of the Indians, especially in the more remote and outlying parts of the country still depend upon hunting and trapping for a livelihood. These Indians have benefitted very materially from the present exceptionally high prices paid for furs. I may here mention that there exists a certain misunderstanding on the part of many people with respect to the position of the Indians with regard to hunting and trapping. There would appear to be rather a widespread belief that the Indians are specially exempted from the application of the provincial game laws. This is not the case. It is true that in that part of Ontario situated north and west of the French and Mattawa rivers treaty Indians are allowed to trap ten otter or beaver without buying a license.

10 GEORGE V, A. 1920

This privilege was extended to these Indians by Order in Council of the provincial government. Elsewhere in the Dominion the Indians are obliged to comply with the game regulations in the same manner as other persons. The provincial governments have in many instances, however, taken the position that the game laws should be to some extent non-irritant in their application to Indians in view of the fact that hunting is their natural means of livelihood. It is the policy of the department to endeavour to secure special privileges for the Indians with regard to hunting and trapping in so far as consistent with adequate protection for the preservation of the game.

CENTRAL CANADA EXHIBITION INDIAN EXHIBIT.

The Department has for the last few years held an Indian Exhibit at the Central Canada Exhibition, Ottawa. This year it took the form of an Indian handicraft exhibit, in which the handiwork of the Indians of different reserves was shown. An Indian canoe-maker and his wife from Maniwaki occupied one booth and made during the week a 12-foot birch bark canoe. Another booth was occupied by three Huron Indians of Lorette who made snow-shoes, moccasins and fancy slippers. The third booth was used for a display of sweet grass basket work by the Abenakis Indians of Pierreville with two of their number making baskets throughout the exhibition week.

The exhibit proved exceedingly attractive, and the handiwork of the Indians in their different arts was very highly commented upon by the large number of people who patronized it.

BUILDINGS.

Owing to the necessity of economy in expenditure, there has been very little new building undertaken by the department during the past year.

A new school is being erected at Alberni, B.C., to replace the one that was totally destroyed by fire on June 2, 1917.

A new barn is being erected for the Kamloops Indian Industrial School to care for the large crops resulting from the new irrigation system.

A new day school has been erected on the Tyendinaga reserve.

Teachers' residences have been erected for the Red Bank School, N.B., and Garden Village School, Ont.

Alterations and additions were carried out to the buildings at Tobique, N.B., and fire-escapes and ventilation systems were erected at the Abenakis School and the Girls' and Boys' School at Caughnawaga.

ROADS, BRIDGES, WHARVES, DRAINAGE AND WATERWORKS.

A considerable amount of repair work of a permanent character has been done in connection with the main highways and bridges on various reserves. A number of concrete culverts and new bridges have been erected to replace old wooden and stone constructions, which previously entailed frequent expenditures for their maintenance, etc.

Among the reserves on which special road repairing work was carried out are the following: Doncaster, from St. Lucie to Notre Dame de la Mercie; Caughnawaga, Que., to St. Isidore and Ste. Philomene roads; Restigouche, Que.; Timiskaming, Que.; Rama, Ont.; Sarnia, Ont., the River and Second Line Roads; Kettle Point, Ont.; Stony Point, Ont.; Cape Croker, Ont.; Saugeen, Ont.; Tobique, N.B.; St. Peter, N.S.; Sheshegwaning, Ont.; and Fort Alexander, Man.

SESSIONAL PAPER No. 27

New culverts and bridges of concrete have been erected to replace wooden ones on the Laprairie road, Caughnawaga, Que., on the main road of the Abenakis reserve, the Slash road, Tyendinaga reserve, over the Spring and Boston creeks, Caradoc reserve, and on the River road, Moravian reserve.

A number of drains have been constructed on the Six Nations reserve, Sarnia, Caughnawaga, Caradoc, St. Regis, and at Kamloops, B.C., where an elaborate irrigation system is in the course of completion, and on other reserves where farming is being conducted on a large scale.

A steel bridge has been erected over the McKenzie creek, at the Six Nations reserve, and surveys and plans are in course of preparation for the building of a bridge on the Dummy road, Caradoc reserve, and also at Broken Head, Man.

A number of waterwork systems are in course of construction to supply water to some of the large Indian schools at Caughnawaga, Que., at Sechelt, B.C., and also at the Indian hospital, Caughnawaga.

Substantial repairs have been made to the wharf at the Cape Croker reserve, Ont. Concrete sidewalks have been constructed in the main streets of the Indian villages of Caughnawaga and Betsiamites.

There is a useful co-operation between this department and the Water Powers Branch of the Department of the Interior. The technical officers of this branch in British Columbia have rendered material assistance to the department in planning irrigation schemes, and in dealing with the water records of the Indians before the provincial board; their services are gratefully acknowledged.

SURVEYS.

ONTARIO.

Two plots of land were surveyed at White Sand river and Sand Point, Lake Nipigon, for the use of the Indians, under a license of occupation granted by the province.

At the request of the Indian council, the village of West Bay was surveyed and posted and a plan made.

SASKATCHEWAN.

The recently surrendered portion of the Poorman's reserve No. 88 was surveyed for the purpose of sale.

Surveys were made of the lands in the Gordon Indian reserve No. 86 exchanged for school purposes with the Church of England.

A subdivision into town lots for purposes of sale was made of a tract of land, named Lakeview (at Regina Beach), in the Last Mountain Indian reserve No. 80-A.

ALBERTA.

Surveys were made for the purpose of deciding on the locations of certain roads and of certain sections at the south end of the Blood reserve No. 148 for the purposes of leasing the land.

A large portion of the Blackfoot Indian reserve No. 146 was surrendered to be leased; the land was subdivided for the purpose.

BRITISH COLUMBIA.

An exchange of a small area of land was made by the Cowichan band on account of the house of an adjoining owner having been found to be within the limits of one of their reserves. The necessary surveys were made.

10 GEORGE V, A. 1920

YUKON.

The boundary marks of the Indian reserve at Lake Laberge were replaced at the request of the local magistrate to facilitate the prevention of the sale of intoxicants.

LANDS.

Sales of surrendered, surveyed lands are shown in the tabular statement No. 1, herewith, and during the past year 19,010.45 acres were sold, realizing \$104,656.57.

During the year 305 Crown grants were issued and recorded under the provisions of the Indian Act, and forwarded either direct to the patentees or to the different registrars of titles for the districts in which the lands patented were situate, in accordance with the Land Titles Act.

Returns of Crown grants to the number of 41 were prepared and forwarded to the registrars of the counties and districts in which the lands patented were situate, and four returns were made to the provincial secretary of Ontario covering lands patented within that province.

On the 7th of August, 1918, the lots on the Fairy Lake Indian reserve, in the counties of Annapolis and Queens, in the province of Nova Scotia, were offered for sale by public auction, at Caledonia, in the county of Queens, and a number of the lots were sold, realizing satisfactory prices over and above the upset prices. Subsequently the unsold lots were disposed of at the upset prices placed thereon.

On the 31st of July, 1918, tenders were called for coal on the North Thompson reserve, in the district of Kamloops, in the province of British Columbia, and a lease was issued to the highest tenderer, at an annual rental of \$305 for surface rights, and a royalty of 15 cents per ton on all coal mined from the reserve.

On the 1st of March, 1919, tenders were called for 2,484 acres of land in the township of Tupper and 2,776 acres of land in the township of Vankoughnet, in the district of Algoma, and province of Ontario, and a sale was made of the property to the highest tenderer for the sum of \$2,104.

On the 23rd of March, 1918, the Touchwood Hills and Qu'Appelle bands of Indians surrendered to the Crown reserve No. 80A, comprising 1,408 acres, to be sold for their benefit, and a subdivision survey has been made of a townsite on this reserve with the object of disposition of the lots for summer resort purposes.

Under an amendment to the Indian Act of last session, which provided for the enfranchisement of Indians not residing on an Indian reserve, not following the Indian mode of life, and being self-supporting and fit for enfranchisement, a large number of members of the Six Nations band of Indians have relinquished their rights in the lands and funds of the band, and have been duly enfranchised by Order of His Excellency in Council.

LOCATION TICKETS.

Location tickets granting title under the provisions of the Indian Act to individual owners for lands on their reserves were issued during the past year to the number of 82, and on the 31st of March last there were current 2,209 location tickets.

RETURNED SOLDIER SETTLEMENT.

As there is pressing need for securing land for the settlement of returned soldiers under the provisions of the Soldier Settlement Act, the comparatively large areas of Indian reserve lands throughout the country, which were but scantily used by the Indians, were sought as a source of supply.

This department lost no time in inaugurating prompt and comprehensive measures in collaboration with the Soldier Settlement Board to take a complete survey of all

SESSIONAL PAPER No. 27

available lands, and to make proper legal arrangements for placing these at the disposal of the Board. All the unsold surrendered land in the market were turned over to the Soldier Settlement Board for acquirement, if, on investigation, they found the character of the land suitable for their purposes. It was realized that the Indian reserves in the provinces of Manitoba, Saskatchewan and Alberta might yield extensive regions of cultivable land.

The areas of the reserves set apart under treaty were generous, but were given as part compensation for the cession of title, and with the intention that, in the future, the proceeds from the sale of the lands might form funds from which the Indians could be maintained. That they have legal title to the lands, which can only be surrendered and sold with their consent, is a fact sometimes lost sight of.

The department, acting in conjunction with the Board, arranged for a joint examination and valuation of these properties, and Mr. Commissioner W. M. Graham undertook this important duty. When the lands were found to be acceptable to the Board, and when a valuation had been placed upon them, Mr. Graham negotiated a surrender from the Indians.

In no case have the Indians refused to part with their lands for fair and reasonable payments, and the action has resulted in already placing 62,128 acres of land in the hands of the Board, and 9,134 acres, which had already been surrendered, were rendered available.

It will, therefore, be seen that Indian reserves in the western provinces have already furnished 71,262 acres for this important public purpose.

In arranging the financial side of the surrenders, great care was taken to see that the money paid for the lands would not be squandered, but spent in a way to advance the civilization of the Indians.

LEASES.

Under the provisions of section 11 of the regulations for the disposal of Indian lands, lease were issued in triplicate to white men at the request of Indian locatees, and for the purpose of increased production, to the number of 89, and on the 31st of March, last, there were 1,362 leases current.

TIMBER.

The quantity of timber cut on Indian reserves during the year May 1, 1918-April 30, 1919, was 75 per cent greater than during the previous license year. The quantities cut under license and permit were:—

Pine..	feet, B.M.	16,488,616
Spruce..	" "	2,511,955
Spruce for aeroplanes..	" "	1,125,435
Hemlock..	" "	1,963,965
Douglas fir..	" "	2,091,873
Other coniferous timber..	" "	728,539
Hardwood timber..	" "	341,153
Poplar and cottonwood..	" "	1,189,292
Cordwood for munitions.. cords.	11,112
Cordwood for fuel..	" "	6,255
Pulp-wood..	" "	10,709
Shingle bolts..	" "	6,167
Ties..No.	12,875
Posts..	" "	5,921
Boom timber..cu. ft.	185,278

Owing to the curtailment of operations under license due to war conditions and the outbreak of the influenza epidemic the quantity cut under license was considerably less than in the previous year, but this was offset by the much larger quantity of timber cut under permit for sale by the Indians themselves.

SESSIONAL PAPER No. 27

ONTARIO.

Agencies.—The following agencies are included in the province of Ontario: Alnwick, Bay of Quinte, Cape Croker, Chapleau, Chippewas, Munsees and Oneidas of the Thames, Christian Island, Fort Frances; Georgina and Snake Islands, Golden Lake, Gore Bay, Kenora, Lake Superior (Eastern and Western Divisions), Manitowaning, Mississaguas of the Credit, Moravians of the Thames, Parry Sound, Rama, Rice and Mud Lakes, Sarnia, Saugeen, Scugog, Six Nations, Sturgeon Falls, Thessalon and Walpole Island.

Tribal Origin.—The great majority of the Indians of Ontario are Ojibwas, and are of Algonkin stock. The Oneidas of the Thames, the Mohawks of the Bay of Quinte, the Mohawks of the Parry Sound district, and the Six Nations of Brantford are of Iroquoian stock. There is a band of Pottawattamies at Walpole Island, and Delawares at the Caradoc agency; these are of Algonkin stock.

Occupations.—The principal occupation of the Indians in the eastern, central, and southern parts of the province is mixed-farming, including grain-growing, stock-raising, vegetable gardening, and dairying. There has been a great improvement during the past few years in their methods of cultivation, which is largely due to the work of the department's field agents.

An account of the part played by the Indians of Ontario in the campaign for greater production will be found on page 8. Statistics with regard to agricultural operations will be found on page 61, Part II. During the summer months the Indians find a profitable source of income in employment as guides and canoe men for tourists, surveyors, prospectors, and fire rangers. Some of them work as sailors and deckhands for navigation companies on the great lakes, and a number are employed on the railways in summer. In lumbering districts many of the Indians work in the lumber shanties during the winter months, and at river-driving in spring, and in the mills in summer.

Many of the Indians who live in the vicinity of the centres of population are employed as day labourers in the various local industries, such as canning factories, cement works, implement factories, oil refineries, iron works, box factories, brick and tile-making, flax pulling, etc.

Some of the Indian women are employed as domestics; and many of them derive a considerable income making fancy-work and baskets. At Rice Lake and Savanne some of the women and children engage in berry and wild-rice picking. The Indians still find a profitable source of income in the making of mitts, moccasins, snowshoes, and canoes.

Health and Sanitation.—The Indians of Ontario in common with other sections of the population suffered very severely from the epidemic of influenza and the mortality among them as a result of this cause was high. The department's medical officers and the agency staffs spared no effort in their efficient and energetic efforts to prevent the spread of the disease. Unfortunately it was impossible to secure adequate medical attention for the Indians living in the more outlying parts, a circumstance which is not remarkable in view of the fact that a similar situation existed in the majority of the white communities throughout the Dominion.

Dwellings.—The great majority of the Ontario Indians have frame houses, which are in many cases well built and comfortable, and compare very favourably with those found in white communities. Some of the Indians have houses of stone or brick. At the Christian Island, Georgina and Snake Islands, Fort Frances, Gore Bay, Kenora, Savanne, Fort William and Sturgeon Falls agencies the majority of the houses are still of log construction. In the districts included in the Chapleau and Fort William agencies many of the Indians continue to live in tepees.

10 GEORGE V, A. 1920

New Ontario.—Hunting and fishing are the chief sources of livelihood for the Indians of Northwestern Ontario and the James Bay district. Their only source of income is acting as guides and canoeemen in the summer months. These northern districts are not suitable for agriculture, but the Indians are beginning to raise potatoes with some measure of success. These Indians live in tents throughout the year.

They are very subject to tuberculosis, although their health is otherwise good.

QUEBEC.

Agencies.—The following agencies are included in the province of Quebec: Becancour, Bersimis, Caughnawaga, lake St. John, Lorette, Maria, Mingan, Oka, River Desert, Ristigouche, Seven Islands, St. Francis, St. Regis, Timiskaming and Viger.

Tribal Origin.—The principal tribes found in Quebec are: Iroquois at Caughnawaga, lake of Two Mountains, and St. Regis; the Hurons of Lorette are also of Iroquoian stock; the Montagnais, who are also of Algonkin stock, at Bersimis, Mingan, lake St. John and Seven Islands; the Abenakis, also of Algonkin stock, at Becancour and St. Francis; the Micmacs, also of Algonkin stock, at Maria and Ristigouche; and the Malecites, also of Algonkin stock, at Viger.

Occupations.—In the agricultural districts of the province the Indians are displaying much keener interest in farming, and market gardening, and a marked improvement is observable in their methods of cultivation.

In the Gaspé peninsula and districts adjacent thereto, the Indians are chiefly employed in the lumber shanties. In the Maniwaki and North Timiskaming agencies also a number of Indians work in the shanties.

One of the principal industries among the Indians of this province is the making of ash and sweet-grass baskets. A number of them spend the summer in the country resorts in the United States, where they sell baskets to tourists. The Indians also make lacrosse sticks, axe handles, racquets, and moccasins. Some of them are employed as guides to tourists and canoeists.

The majority of the Indians of the village of Caughnawaga, situated near Montreal, are employed with the Dominion Bridge Company at Lachine, where they are recognized as exceptionally skilful in bridge construction and metal work. They earn good wages and many of them, therefore, are in very comfortable circumstances.

Health.—Although influenza was prevalent among the Indians of Quebec, the epidemic was not nearly so widespread as in the other provinces, and the mortality from this cause was much lower. In other respects the health of the Indians of Quebec has been normal during the past year.

Dwellings.—In the settled parts of the province, the great majority of the Indians live in houses of frame construction, which are as a rule comfortable and well built. Some of them have good stone houses. In the more remote northern district many of the Indians continue to dwell in tents.

Lower St. Lawrence.—Among the Indians of the lower Gulf of St. Lawrence the fishing industry has been carried on with greater success this year. The Indians are taking more interest in the work, and are now quite competent fishermen. For the past few years, while the Indians were learning how to catch and cure the fish, it has been necessary to engage a practical man for each band during the summer months to instruct them as to salting, drying, etc. It is no longer necessary to do this, and it is hoped that in future the Indians will carry on the work themselves. Their earnings have increased from year to year and they now realize the advantage to be gained by working during the summer months, which they formerly spent in idleness.

SESSIONAL PAPER No. 27

At Bersimis, on the river St. Lawrence, steps have been taken to establish that band in the salmon fishing industry. Snow houses are being constructed and the necessary equipment prepared for operations next year. It is hoped that this will provide not only fresh food for the Indians during the salmon fishing season, but an appreciable income as well from proceeds of salmon sold, which will be shipped fresh to city markets.

NEW BRUNSWICK.

Agencies.—There are three agencies in the province of New Brunswick, the Northeastern, located at Buctouche, the Northern, located at Perth, and the Southwestern, located at Fredericton.

Tribal Origin.—The majority of the Indians of New Brunswick belong to the Micmac race, which is of Algonkin stock. In addition to these there are some bands of Malecites, also of Algonkin stock.

Occupations.—In the northeastern division the Indians are engaged in fishing, hunting, trapping, and farming. A number work in the lumber woods during winter and at the lumber mills in summer. In the northern division the Indians work in the woods in winter, river drive in the spring, and are for the most part employed as farm labourers in the summer and fall. In the southwestern division the Indians support themselves chiefly by the sale of Indian wares. In all parts of the province the Indians are expert at making baskets, snowshoes, moccasins, and other Indian wares.

The Indians of this province are showing a greater interest in farming than formerly.

Health and Sanitation.—The Indians of New Brunswick, in common with other sections of the community, suffered heavily from the epidemic of influenza. Otherwise their health has been good during the past year. Reports of the departmental officers indicate that they are paying more attention to the laws of hygiene and sanitation from year to year and that a fairly high standard now prevails among them in these matters.

Dwellings.—The great majority of the Indians of New Brunswick live in small frame houses, which in most cases are well built and well cared for. A gradual improvement is observed from year to year in their dwellings and outbuildings.

NOVA SCOTIA.

Agencies.—The following agencies are included in the province of Nova Scotia: Yarmouth, Digby, Annapolis, Shelburne, Queens, Lunenburg, Halifax, Cumberland, Colchester, Pictou, Antigonish-Guysborough, Richmond, Victoria, Inverness, Kings, two in Hants county (Windsor and Shubenacadie), and two in Cape Breton county (Sydney and Eskasoni).

Tribal Origin.—The Indians of Nova Scotia, numbering about two thousand, are Micmacs. They are of Algonkin stock.

Occupations.—The occupations followed by Indians in Nova Scotia are varied, rather more so than those ordinarily engaged in by other inhabitants of the province. Indians, residing permanently on reserves and forming organized communities, cul-

10 GEORGE V, A. 1920

tivate the soil. Their principal farm products are potatoes, turnips, garden vegetables, hay, and live stock—chiefly horses and cattle. A considerable number of our Indians do not live on reserves, but on private properties, as squatters, near railway lines. These make their living by hiring as day labourers, and by the manufacture of Indian wares, which are always in very good demand at remunerative prices. This latter occupation is a fruitful source of income to all the Nova Scotia Indians at certain periods of the year and includes the manufacture of hockey sticks, axe-handles, pick-handles, butter-tubs, baskets of various kinds for different purposes, fancy moccasins, etc. Between seed time and harvest many of the younger Indians leave their homes to work at industrial centres, such as the Sydneys, New Glasgow, and Halifax, where they readily find profitable employment. A certain class make lumbering in its various branches their chief occupation. They assist in cutting the timber in the forests, in conveying it to the saw-mills, and finally, in converting it into boards, deals, scantling, shingles, laths, etc. Other occupations in which the Indians of Nova Scotia engage at seasonable times are fishing, trapping fur-bearing animals, and acting as guides for sportsmen.

Health and Sanitation.—The Indians of Nova Scotia in common with those in all other parts of the Dominion suffered severely during the past year from the epidemic of influenza. They also underwent an epidemic of small-pox. The percentage of deaths as a result of the epidemic of influenza among the Indians in this province, however, was not as high as in the case of the white population.

The Indians of Nova Scotia are gradually acquiring a better understanding of the necessity for observing in a practical way the sanitary regulations prescribed for their benefit by the department, and consequently their general health is improving. Tuberculosis, once rampant among them, seems to be slowly disappearing.

Dwellings.—On all the reserves in this province the houses of the Indians as a rule are small frame buildings, usually well constructed. Squatters on private property live in shacks covered with tar paper.

PRINCE EDWARD ISLAND.

Agency.—There is but one agency for the whole province which includes the reserves of Lennox Island, Rocky Point, Scotchfort and Morell. The population which at the last census was 292 seems to have decreased to a considerable extent. This decrease has been caused by the demand for labour in the neighbouring provinces and it is difficult to ascertain where their permanent domicile is, as they frequently move from one province to another.

Tribal Origin.—The Indians of Prince Edward Island belong to the Micmac tribe, which is of Algonkin stock.

Health.—The health of the Indians has been fairly good. The epidemic of influenza, which was so disastrous in other places, did not cause such ravages in this province; only three deaths being directly due thereto. They have been very careful to observe the rules of sanitation laid down by the Department.

Occupations.—The Indians of this province devote considerable attention to the working of the land. Practically every able-bodied Prince Edward Island Indian of military age has seen overseas service in the Great War, and there is a keen desire among the Indian returned soldiers to acquire land from their less industrious neighbours and to prepare to work it more intelligently and with more energy. Some have devoted themselves to fishing, but the greater part are engaged in the making of baskets and other Indian wares. The principal difficulty encountered by the Indians

SESSIONAL PAPER No. 27

in this industry is obtaining the raw material for the making of baskets. There is no ash for the purpose on the reserves and indeed throughout the entire province there is now only a very limited quantity. Some go to New Brunswick and procure the necessary lumber. An effort is now being made to secure a supply of ash co-operatively for this purpose.

Care of Stock.—They are careful of the animals they have and seem anxious to increase them. They also look after whatever machinery they possess.

MANITOBA.

Agencies.—The following agencies are included in the province of Manitoba: Fisher River, Clandeboye, Norway House, Griswold, Portage la Prairie and Manitowapah, Pas and Birtle.

Tribal Origin.—The majority of the Indians of Manitoba belong to the Ojibwa race, which is of Algonkin stock. Bands of Swampy Crees are found at the Norway House and Fisher River agencies and in the York Factory district; these are also of Algonkin stock. The Indians located at the Griswold agency are Sioux; there are also Sioux at the Birtle and Portage la Prairie agencies. There is a band of Chipewyans at Fort Churchill; this tribe is of Athapascan stock.

Occupations.—Grain-growing is the principal occupation of the Indians at the Birtle, Griswold and Portage la Prairie agencies. Those at the Clandeboye, Fisher River, Norway House, Pas and Manitowapah agencies and throughout the northern districts still obtain their livelihood chiefly from hunting and fishing. The hunting and fishing Indians have not suffered from the increased cost of living, as the value of fish and fur has on an average since the beginning of the war been about double that during the five years prior to the war. These Indians are expert guides and canoe men and many of them find employment at this work, for which they receive good wages.

In the more settled districts many of the young men receive high wages as farm labourers. Some also are employed at road-work, in mines and on railway construction, and in most cases their services have been found very satisfactory by their employers. Some of the more educated Indians work as clerks for traders and merchants and most of them have proved to be very efficient in their work. They are not as successful, however, when they undertake to trade independently, owing to their tendency to give credit to excess.

The Indian women on many of the reserves in Manitoba engage in making bead-work moccasins, in weaving mats from rushes, in making toy canoes, rogons, willow baskets, rag and straw mats, and other articles from birch bark, ornamented with beads or porcupine quills. They also engage in picking wild berries for the summer market, gathering wild rice in the fall of the year, gathering senega root, in mending and making fish nets, and in making clothes for themselves and their families. Some of the young women are skilled needle workers and earn a good living by making various kinds of women's wear for the white settlers. The Indian girls who have had a course of training in the boarding schools are much in demand as domestic help. They give increasing satisfaction as the years go by, and reflect credit upon the department's educational work. The majority of the bands in the province raise stock.

Statistics of the agricultural operations of the Indians of Manitoba will be found on page 60, Part II, and of their stock holdings on page 68, Part II.

Health and Sanitation.—The Indians of Manitoba in common with other sections of the population suffered very severely from the epidemic of influenza, and the mortality among them as a result of this cause was high. The department's medical officers and the agency staffs spared no effort in their efficient and energetic efforts to

10 GEORGE V, A. 1920

prevent the spread of the disease. Unfortunately it was impossible to secure adequate medical attention for the Indians living in the more outlying parts, a circumstance which is not remarkable in view of the fact that a similar situation existed in the majority of the white communities throughout the Dominion.

The officers of the department avail themselves of every opportunity to make the Indians realize the value of hygiene and sanitation, and there is a gradual improvement among them from year to year in these respects, which is particularly observable in the more cleanly condition of their houses.

Dwellings.—Indian houses in Manitoba are for the most part of log construction. These Indians are usually expert axemen, and for that reason their primitive homes are generally well constructed and are, as a rule, warm during the winter. On some of the reserves located near the more settled parts of the province quite a number of our Indians have built a better class of house. This improvement is increasing from year to year. In the northern districts the houses are still of a very primitive type, usually comprising a log wall with a roof made of poles and covered with mud, a floor of bark and brush, and an open fireplace, and only one room.

SASKATCHEWAN.

Agencies.—The following agencies are included in the province of Saskatchewan: Assiniboine, Battleford, Carlton, Crooked Lake, Duck Lake, Moose Mountain, Onion Lake, Pelly, Qu'Appelle, and Touchwood Hills.

Tribal origin.—The most numerous tribes among the Saskatchewan Indians are the Ojibwas, Swampy Crees and Plain Crees, which belong to the great Algonkin stock. In addition to these, Sioux Indians are found at the Assiniboine, Moose Mountain, Qu'Appelle and Carlton agencies, and on the Moose Woods reserve. In the Onion Lake agency there is a band of Chipewyans, who are of Athapascan stock. There are also a few Chipewyan Indians in the Isle a la Crosse district.

Industries and Occupations.—Farming and stock-raising are the chief occupations of the Indians of Saskatchewan. In the more unsettled districts, however, many of them still obtain a livelihood from hunting and fishing. Others derive an income from the sale of wood, pickets, senega root, etc. The hunting Indians had a very exceptional year and received very high prices for the catch of fur.

Nearly all the farming Indians are well provided with modern machinery, and implements, and in most cases these are well cared for.

The great majority of the bands in the province own herds of horses and cattle. As a general rule the Indians take good care of their stock, and some of it is of exceptionally fine quality.

Statistics of their agricultural operations will be found on page 62, Part II, and of their stock holdings on page 70, Part II.

Health and Sanitation.—There was a very heavy mortality among the Indians of Saskatchewan as a result of the epidemic of influenza, which was prevalent on practically all the reserves in the province. Very few of the Indians escaped this malady, and many of them have been left in a very delicate state of health as a result thereof. In some localities it was accompanied by a form of bronchial pneumonia of a virulent nature. The department's medical officers and the agency staffs spared no effort in their efficient and energetic efforts to prevent the spread of the disease. Unfortunately it was impossible to secure adequate medical attention for the Indians living in the more outlying parts, a circumstance which is not remarkable in view of the fact that a similar situation existed in the majority of the white communities throughout the Dominion. Apart from the ravages of influenza, the general health of the reserves

SESSIONAL PAPER No. 27

in Saskatchewan has been steadily improving from year to year. This improvement is to be noted in the gradual decrease in the number of cases of scrofula and tuberculosis and may be attributed in large measure to better food, greater personal cleanliness and a better understanding and observation of sanitary precautions.

Dwellings.—The great majority of the Indian dwellings in this province are of log construction. In the more settled districts they are usually two storied, shingle-roofed and well built. On the reserves which are farther removed from the centres of civilization the old style one or two-roomed, mud or thatched-roof shacks of a very primitive type still predominate. Many of the Indians live in tents in summer. Some of the more progressive Indians are beginning to erect frame houses.

ALBERTA.

Agencies.—The following agencies are included in the province of Alberta: Blackfoot, Blood, Edmonton, Hobbema, Peigan, Saddle Lake, Sarcee, Stony, and Lesser Slave Lake.

Tribal Origin.—The Alberta Indians are of Algonkin stock, with the exception of the Sarcees near Calgary and the Beavers and Slaves in the Lesser Slave Lake agency, who are Athapascan, the St. Paul's band in the Edmonton Agency, who are Iroquoian, and the Stonies, who are of Siouan stock. The Algonkin Indians of Alberta are subdivided into the Blackfoot nation, comprising the Indians of the Blackfoot, Blood and Peigan agencies, Plain Crees found in the Lesser Slave Lake, Saddle Lake and Hobbema agencies, and a band of Ojibwas at Moberley Lake, in the Lesser Slave Lake agency.

Industries and Occupations.—The principal occupations of the Alberta Indians are farming and stock-raising in the settled parts of the province. In the more remote northern districts they continue to gain their livelihood almost entirely by hunting, fishing and trapping. Many of the Indians have found profitable employment during the past year working for white settlers, farmers and ranchers, from whom they received high wages.

An account of the activities on the reserves in Alberta in connection with the greater production campaign will be found on page 9.

Practically all the bands in the province own herds of horses and cattle, and their stock is of a very fine quality. The Blood Indians have the largest herds, comprising upwards of 4,000 head of the finest beef cattle in the West. The Indians, as a general rule, care for their stock well.

Detailed statistics with regard to the stock held by the Indians of Alberta will be found on page 68, Part II, of this report.

The Indian farmers are well supplied with modern machinery and implements, except in the Stony and Lesser Slave Lake agencies, where little farming is done.

Statistics of the grain and root production will be found on page 60, Part II.

Health and Sanitation.—The Indians of Alberta in common with other sections of the population suffered severely from the epidemic of influenza. The department's medical officers and the agency staffs spared no effort in their efficient and energetic efforts to prevent the spread of the disease. Unfortunately it was impossible to secure adequate medical attention for the Indians living in the more outlying parts, a circumstance which is not remarkable in view of the fact that a similar situation existed in the majority of the white communities throughout the Dominion.

During the summer of 1918 an epidemic of small-pox broke out among the Indians of the Hobbema agency, but the disease was effectively checked by quarantine and

10 GEORGE V, A. 1923

vaccination, and only two deaths resulted from it. There has been an improvement in the number of cases of tuberculosis and scrofula among these Indians, and sanitary precautions are being practised more carefully by them.

Dwellings.—With the exception of those living in the more remote northern districts, the great majority of the Indians of Alberta have modern frame houses, which in many cases are well built, well lighted, and well ventilated. Many of them have good barns, implements sheds and stables. Some of the Indians still live in tents and tepees in summer.

NORTHWEST TERRITORIES.

Agencies.—The department has only two agencies in the Northwest Territories one being located at Simpson, and the other at Fort Smith.

Tribal Origin.—The principal tribes found in the far north are the Slaves, Hares, Loucheux, Secanics, Dogribs, Yellow-knives, Chipewyans and Caribou Eaters. All these tribes are of Athapascan stock. There are a few Crees in the neighbourhood of Chipewyan. These are of Algonkin stock. The most northerly tribes are the Tukudah, who extend to the Mackenzie Delta, and the Copper Mines, who are located along the Copper Mine river. The territory occupied by these two last mentioned tribes is contiguous to that inhabited by the Eskimos.

Occupations.—These Indians are solely dependent upon fishing and hunting. In view of their nomadic mode of life it is difficult to induce them to take up agricultural pursuits, and they do no farming or gardening, with the exception of a few living in the vicinity of the forts, who raise some potatoes. In the summer some of the Indians are employed as pilots and deckhands on the steamers running on the Peace, Slave, and Mackenzie rivers.

Health and Sanitation.—Tuberculosis and scrofula are the diseases most prevalent among the Indians of the Far North. Those who live in tents throughout the year are generally in better health than those who spend the winter in houses.

Every effort is being made by the officers of the department to make these Indians realize the value of hygiene and sanitation, but it is difficult to instruct them in these matters, as they are still in a very primitive stage of development.

Dwellings.—The majority of the northern Indians live in bark or skin tepees all the year round. Those who live in the vicinity of the posts have houses of a primitive type.

YUKON TERRITORY.

Tribal Origin.—The Rampart House, Forty Mile, Blackstone, and Moosehide bands, known as the Hunkutchin or Big River Indians, belong to the Takudah tribe. There is a band of Slavies at Lancing creek who migrated from Fort Good Hope, on the Mackenzie river; another band of Slavies, called Nahanies, is located at the headwaters of the Pelly river. All the above mentioned Indians are of Athapascan stock. At Mayo, Selkirk, Little Salmon, and Carmacks there are bands belonging to the tribe known as the Stick Indians. Bands belonging to the Tlingit tribe are found at Whitehorse, Teslin Lake, Champagne Landing, and Carcross.

Occupations.—Hunting, fishing, and trapping are the chief occupations of all the bands in the Yukon. In summer some of the younger men work as deckhands on the steamboats. A few work on the land for the local market gardeners; others cut cordwood and raft logs, and occasionally act as packers.

Efforts have been made to interest these Indians in gardening. At one or two centres they have been induced to raise potatoes with a fair measure of success; they

SESSIONAL PAPER No. 27

are born hunters and look upon that occupation as naturally belonging to them, hence their disinterestedness in gardening. Another factor is the importance of laying up a store of dried fish for themselves and their dogs for winter use during the salmon season, which occurs just at the time when the raising of crops would demand their undivided attention; this, in no small measure, accounts for their apparent neglect of gardening. The fishing is decidedly the more profitable of the two for them.

Quite a few of these Indians earn a good living; they are industrious and independent.

Health and Sanitation.—The general health of all the bands may be said to have been good during the past year. A little more attention is being paid to sanitation, though there is much room for improvement in many cases in this important matter. However, we hope by constant endeavour to increase the improvement. They are slowly learning the value of cleanliness, both personal and in their homes. All bands have been free from epidemics during the year. The Territory is, up to date, free from the Spanish influenza; strict precautionary measures have been adopted and are still in force owing to the prevalence of the epidemic in the neighbouring territory.

Dwellings.—There is little change to report regarding the Indian villages which usually consist of a number of small log cabins. Some of the older cabins are gradually being torn down and large and better ones taking their place, the construction of the new cabins is of a better order, more light and ventilation being provided for; some are being divided into rooms and the interiors decorated, rather crudely perhaps, but it is a step in the right direction. In most of the villages there are school houses and small churches, which as a rule are well built and kept in good repair.

BRITISH COLUMBIA.

Agencies.—The following agencies are included in the province of British Columbia: Babine and Upper Skeena, Bella Coola, Cowichan, Kamloops, Kootenay, Kwawkewlth, Lytton, Nass, New Westminster, Okanagan, Queen Charlotte, Stikine, Stuart Lake, West Coast, and Williams Lake.

Tribal Origin.—The Indians of the Bella Coola, Cowichan, Kamloops, Lytton, New Westminster, and Okanagan agencies belong to the Salish tribe. The Kootenay tribe is located in the agency of the same name. The Kwakiutl-Nootka tribe is located in the Kwawkewlth and West Coast agencies; the Haidas, in the Queen Charlotte Islands; the Tlingits, in the Stikine; and the Tsimshians, in the Naas agency. The Indians of the Babine, Stuart Lake and Williams Lake agencies belong to the Athapascan race.

In addition to these there are about 3,000 nomadic Indians in the province who cannot be correctly classified according to linguistic stock or tribal origin.

Industries and Occupations.—The principal occupation of the Indians living on the coast is fishing, at which they have had a very successful year. Many of these Indian fishermen have gasoline launches, which they often construct themselves with great skill and efficiency. The Haida Indians of the Queen Charlotte islands are particularly proficient and are considered to be among the best fishermen on the Pacific coast. Many Indians, including a large number of women, are employed in the canneries. The occupations of the coast Indians also include logging, teaming, boat-building, and hunting.

Hop-picking is an important source of revenue to the Indians of the Kamloops, Lytton, Cowichan, West Coast, and New Westminster agencies.

The Indians of the Lytton, Kamloops, Kootenay, Okanagan, and New Westminster agencies engage in farming, including the raising of grains, fruit and vege-

10 GEORGE V, A. 1920

tables of all kinds. Marked progress has of late years characterized their agricultural efforts. They are well supplied with farm machinery and equipment, of which they take good care.

The Indians of the Kamloops, Kootenay, New Westminster and Okanagan agencies raise horses and cattle. They take good care of their stock, and are meeting with marked success in this industry. The Indians of the Kamloops agency own about 5,000 horses and about 2,000 head of cattle.

The Indians of the more remote northern districts still derive a livelihood from hunting and trapping.

Notwithstanding a few more or less serious unexpected setbacks and hindrances, the progress made by Indians of the various agencies of the interior of British Columbia during the past year has been most encouraging. The outstanding feature marking that progress was the increased acreage under crop. While this applied to all the agencies, it was, perhaps, more marked in the Kamloops and Lytton agencies, and in a few bands of the Okanagan agency. Prices of farm produce on the whole have been exceedingly favourable, and with the single exception of a drop in the price of beans, which affected the Lytton agency more than all others, there has been a great opportunity for industrious Indians to better their position. Not only were the Lytton Indians seriously handicapped by this fall in the price of beans, but a destructive frost made re-seeding necessary in a number of cases, and this made the crop so late that there was difficulty in saving it. Where mixed farming obtains, the failure or lessening in the price of any particular kind of crop does not have so serious an effect, but in parts of the Lytton agency beans are about the only crop that can be raised.

In the Stuart Lake agency it is gratifying to note the interest created among the Indians because of the well-bred bulls supplied by the department, and the superior quality of calves which have resulted. So marked has this been that white farmers are offering the Indians tempting prices for the calves, but care is being taken to warn them against selling and in no case to part with a heifer calf sired by one of these bulls. Most of these Indians are also being induced to keep hogs, and a few more have attempted dairying.

The prevailing wage paid for farm labourers and for work in the saw-mills and logging camps was higher than at any time previous and this induced many able-bodied Indians to leave their land and work for others.

The fishing season in the Fraser river was unsuccessful and those engaged in this work were barely able to cover their expenses. The Indian fishermen on the sea coast had a good season. Their fishing season was prolonged, and the cheaper grades of salmon which are usually in little demand were eagerly sought after by the canneries and abnormal prices were paid for fish. The result was that these Indians all made large earnings. Some of them have invested their earnings in larger gasoline boats and some have built new cottages for themselves.

In the lumbering industry wages were exceptionally high, and the Indians engaged in that work earned from five to eight dollars per day.

Health and Sanitation.—The most serious setback to the health of the Indians of British Columbia during the year was the epidemic of Spanish influenza which was particularly severe in the Kamloops and Lytton bands, the former having a death-roll of 194 up to the first week in December, 1918, and the latter of over 100 in the months of October and November. The disease was particularly hard on the aged and those of weak lungs. Several chiefs were among the victims. Industrially it interfered with the saving of the root crops, and in several instances fields of potatoes were left with the tubers in the ground, because so many were sick that there were none left who were well enough to dig them. Much more fall ploughing would also have been done but for influenza and its after effects. Where it was possible the patients were at once removed to the hospitals for treatment, and in cases where the sick remained at their

SESSIONAL PAPER No. 27

homes the medical officers of the department rendered every assistance possible. In isolated localities where medical aid could not be obtained, the agent or constable visited the sick, and under the directions of the medical officers arranged for their care and supplied them with the necessary medicines. Pneumonia which frequently accompanied the influenza was the immediate cause of death in many cases. Many of those who succumbed were suffering from tubercular trouble or some other chronic disease. In other respects the general health of the Indians of British Columbia has been normal.

The agents in all parts of the province report a constant improvement from year to year in sanitary conditions on the reserves, and the department is making every effort to educate the Indians in this respect.

Dwellings.—The great majority of the British Columbia Indians, except in the more outlying districts, now have modern, well-built, comfortable houses either of log or frame construction. This is an evidence of rapid progress, as a few years ago nearly all of them lived either in wretched little shacks, or herded together in the large barnlike, unventilated and unsanitary structures, which are still in use in some of the more unsettled parts of the coast. The Haida Indians of the Queen Charlotte islands, who are remarkably progressive, build up-to-date frame houses that will compare favourably with those found in the average white community.

FINANCIAL.

At the close of the twelve months ended March 31, 1919, the capital of the Indian Trust Fund, which at the end of the preceding year amounted to \$8,665,137.35, had increased to \$9,238,786.67.

The amounts expended from the Consolidated Revenue Fund were as follows: voted by Parliament for the purposes of the department, \$2,038,499.24; and annuities by statute, \$184,471.

On March 31, last, the balance to the credit of the Indian Savings Account for the funding of the annuities and earnings of pupils at industrial schools, together with collections from Indians for purchases of stock and for ranching and farming expenses, was \$66,870.42. Deposits and interest during the twelve months aggregated \$62,293.14, and withdrawals \$50,942.21.

The comparative statement hereto appended of expenditure covering the fiscal years from 1914-15 to 1918-19 inclusive, as well as the estimated expenditure for 1919-20, which includes the supplementary estimates, hereinafter shown, demonstrates the economy that has characterized the Department's administration.

The expenditure, not including Indian education in 1914-15 was \$1,211,288.62, and during the fiscal year just closed it was only \$1,051,292.31, which includes the cost of the influenza epidemic, which amounted to \$87,320. Had this epidemic not occurred, our expenditure last year would have been only \$963,972 as compared with \$1,211,288 in 1914-15, a reduction of \$267,316. As it is, it has been \$159,996. This reduction in the expenditure is all the more remarkable when the extra cost of the barest necessities is taken into consideration. Prices of such supplies as meats, provisions, clothing, ammunition and twine, seed, drugs, live stock, etc., have risen at least 100 per cent and in some cases even higher. Contracts for supplies at Winnipeg and in Treaties Nos. 8 and 10 have doubled and the cost of all services has increased considerably. The salaries of many officials in the Outside Service have been increased.

Indian Education.—The expenditure in 1914-15 was \$2,195,319.20 and last fiscal year it was \$1,786,797.21, a reduction of \$408,521.99, notwithstanding the fact that the grants have been increased.

10 GEORGE V., A. 1920

NOTE.—The estimated figures for 1919-20 include the Supplementary Estimates.
