INDIAN AFFAIRS BRANCH

DR. H. W. MCGILL, DIRECTOR

The outbreak of war could not fail to affect in some measure the Indians of Canada. Always loyal, they were not slow to come forward with offers of assistance in both men and money. About one hundred Indians had enlisted by the end of the fiscal year and the contribution of the Indians to the Red Cross and other funds amounted to over \$1,300.

During the visit of Their Majesties, the King and Queen, the Indians of Canada participated officially in the receptions at four points. Their Majesties showed keen interest in the Indian village at Port Arthur where, in native dress, the Indians presented a striking appearance. At Calgary, Indian participation took the form of a camp-site of thirty teepees and some thirty-six mounted Indians in full regalia grouped at vantage points in the camp. When Their Majesties were leaving Vancouver, twenty war canoes manned by 300 Indians formed an escort for the ship carrying the King and Queen, from the dock to the Lions Gate Bridge. On the return trip to Eastern Canada the Queen Anne Bible, the property of the Six Nations Indians, was signed by The King and Queen at the Brantford station.

CONDITIONS AMONG THE INDIANS

Evidence of increasing interest in the various divisions of agriculture was noted among Indians on reserves in many parts of Canada. Although production was affected in certain provinces by adverse climatic conditions, on the whole the progress made was satisfactory and gave a clear indication of the growing utilization of suitable agricultural lands on the reserves. Improved conditions were also reported from parts of Canada where the Indians depend upon hunting and trapping for their livelihood. In most cases there was a slight increase in the number of fur bearers, and a more plentiful supply of other game animals than in the last fiscal year.

Wolves continue to affect the domestic economy of Indians in the North-west Territories and are reported to have caused much damage to fur in the traps. Adverse weather conditions made hunting and trapping difficult in some areas. Marten are reported to be increasing and moose and caribou were plentiful. A good summer fish run enabled the Indians to put up a large quantity of dried fish.

Generally speaking, the Indians of British Columbia had a normal year and undoubtedly as time goes on they will gradually improve their economic condition. The outstanding feature marking progress during the year under review was the increased acreage under crop. Much has been done by the Branch in the promotion of agriculture in this Province by supplying farm machinery and seed, and constructing irrigation systems. Increased attention is being paid to land clearing operations. Land in the vicinity of the old village of Bella Coola was cleared and planted to potatoes, the crop being sufficient to supply the season's requirements for the village. A similar project, undertaken at the Pemberton Reserve, New Westminster Agency, produced 147 tons of potatoes in 1939. The returns from fishing have decreased in the past few years in this Province owing partly to the smaller runs of salmon in certain sections and also to the inroads of white fishermen on grounds formerly held almost exclusively by the Indians. This competition is being met to some extent by the use of larger boats and more up-to-date gear. The complete failure of the pilchard run during the 1939 season was the cause of a decrease in employment as compared with the two previous years. As was the case in the year 1913, the pilchard failed to appear on the coast. The Indians of the Stikine Agency in the northern part of the Province had a successful trapping season.

For the most part the Indians of Alberta had a satisfactory year, an indication of which is the improvement that can be reported from the Stony Reserve, considered to be the poorest and most difficult to improve in the Province. The agencies had fair crops, all of which, however, suffered to some extent from a period of hot, dry weather in July and August. This was also disastrous for potatoes, causing the poorest crop in several years. Irrigation projects initiated at the Blackfoot Agency are working satisfactorily and should materially improve conditions in the irrigated areas. The Alberta Indians have good herds of high-grade cattle. Special attention is being paid to the breeding of stock for colour as this affects sales by carloads. The beef cattle sold during the year brought top prices in the market. The introduction of better breeding stock has improved the quality of the horses owned by the Alberta Indians. There was a slight increase in fur-bearing animals and the Indians found plenty of big game for food. Additional trap-lines are being acquired for the Indians whenever these become available. Commercial fishing was not remunerative, but Indians fishing for food were well supplied.

Notwithstanding the adverse climatic conditions with which the farming Indians of Saskatchewan have had to contend, marked progress in agriculture can be reported. This improvement can be attributed largely to closer supervision. Effective personal contact with the Indians has inspired them to make a real effort towards successful farming. Community farms and gardens have played a large part in this achievement, showing the Indians the value of co-operative effort. For the season of 1939, nine new tractors, as well as horses and implements, were provided from appropriation and from band funds. In the spring of that year seventeen community farms comprising some 2,900 acres were in operation in Saskatchewan.

In many agencies in Manitoba tractors were supplied and new land was broken. On some of the reserves the aim has been to break and seed enough land to provide the Indians with sufficient flour for their own requirements and this goal has been reached. On the majority of the farming reserves the Indians harvested good crops. On Lakes Winnipeg, Manitoba, and Winnipegosis the fishing was better than in previous years and a good price was obtained for the fish. Trapping is the chief means of livelihood for many of the Indians of the northern part of the Province. The fur catch, although not plentiful, was better than for the year 1938-39, and prices were higher. The return of rabbits in large numbers has increased the food supply of the Indians.

There was a noticeable increase in agricultural activity in Ontario during the season of 1939. The Indians were encouraged and assisted by providing them with equipment and by loans to individuals for farming operations. The Caradoc Reserve at Muncey and the Six Nations at Brantford were the centres of greatest activity. At the former reserve the Indians had 3,000 acres under cultivation and their crop realized approximately \$40,000. The Sarnia Indians supplied their own farming equipment and built a new granary at a cost of \$3,000, the money being provided from band funds. The Indians of Tyendinaga, Manitoulin Island, and the Sault Ste. Marie Agencies also have made progress in this direction. The Batchewana Indians, who were formerly on the Garden River Reserve in the Sault Ste. Marie Agency, purchased, with their own funds, land for a reserve some 6 miles from Sault Ste. Marie where they intend to engage in agriculture. A total of 48,000 trees was supplied in the spring of 1939 for the afforestation of 36 acres on the Caradoc Reserve.

In Quebec a serious effort has been made during the past few years to interest the Indians of as many reserves as possible in farming and to impress upon them the necessity for increasing the acreage under cultivation and for making more effective use of the land already being worked. This policy has been effective at Pointe Bleue and St. Regis Agencies, where the Indians are well equipped with

implements that they have acquired themselves. Progress in agriculture is also reported on the Maniwaki, Nedelec, Restigouche, Maria, and Oka Reserves. Indians of the reserves on the north shore of the St. Lawrence River have had somewhat better results from trapping.

The authority of the Governor General in Council was obtained during the fiscal year for the establishment of an Indian agency for the northwestern portion of Quebec to be known as the Abitibi Agency. The area covered is approximately 60,000 square miles and extends east and west between the town of La Tuque and the boundary of the Province of Ontario and approximately 200 miles north and 100 miles south of the transcontinental railway line of the Canadian National Railways. The agency contains some 1,500 Indians scattered over twelve reserves. Owing to the vastness of the area and to the widespread location of the reserves it has been difficult to administer the affairs of the Indians of this district. With the appointment of an agent with headquarters at Senneterre, Que., it is expected that much closer and more effective supervision will be possible.

Conditions among the Indians of the Maritime Provinces do not vary greatly although gradual improvement is noted from year to year. The provision of tractors and other farming equipment has assisted them in their gardening and small-scale farming operations. A number of new dwellings were erected for the Indians of these provinces.

INDIAN HEALTH SERVICE

Further progress was made in Health Services. There was about the usual amount of infectious disease. In the West Coast Agency an epidemic of influenza with a high incidence of pneumonia caused 16 deaths. Deaths also occurred from influenza in the Fond du Lac area and in northern Ontario. There were sporadic outbreaks of diphtheria, scarlet fever, measles, chicken-pox, and whooping cough, but no epidemics of serious proportions developed. Investigation showed a reported outbreak of smallpox in the Chapleau Agency to be chicken-pox, and that almost every member of the band had been vaccinated during recent years.

A serious outbreak of typhoid fever occurred in the Norway House residential school. It is planned to install a chlorinator there this year. Typhoid also appeared at Gods Lake and in the Sioux Lookout Agency, and at Poormans Reserve in Saskatchewan. Wherever it occurred, steps were taken to trace the source and also to do as widespread inoculation of contacts as possible. A serious health problem among the Indians of the north is the fish tapeworm. It infects both dogs and man.

During the year, the Department acquired a residence and office for the Medical Superintendent at The Pas; a building that is being transformed into an isolation hospital for tuberculosis on Manitoulin Island; and a fifty-bed tuberculosis sanatorium near Selkirk, Man. A twenty-bed hospital and sanatorium was built at the Fisher River Agency. In the construction of this building only one white foreman was employed. The remainder of the work, including getting out logs and manufacturing all the rough lumber, was done by the Indians themselves.

The campaign aimed at the eradication of trachoma was pursued vigorously, under the direction of Dr. J. J. Wall, and included the use of sulphanilamide, a new and promising type of treatment.

Good results are being obtained in the campaign against tuberculosis; the greatest single achievement was the purchase, renovating, and equipping of the Dynevor Hospital, which is now being operated for the Department by the Sanatorium Board of Manitoba on an audited per diem cost basis. Across the country, at one time during the year, 582 Indian patients were receiving treatment in institutions. The total cost of institutional treatment for the fiscal year

was \$380,115. As an example of progress, a tuberculosis survey made in Alberta may be cited. A survey of 12 Indian residential schools made in 1938 disclosed 30 active cases, whereas a re-survey the following year showed only 11 active cases.

WELFARE AND TRAINING SERVICE

TRAINING

The following table shows pupil enrolment and attendance during the past 10 years:—

Fiscal Year	Residential Schools		Day Schools		Total		
	Enrolment	Average Attendance	Enrolment	Average Attendance	Enrolment	Average Attendance	Percentage of Attendance
1930-31.....	7,831	6,917	8,584	5,314	16,415	12,231	74.51
1931-32.....	8,213	7,400	8,950	5,707	17,163	13,107	76.36
1932-33.....	8,465	7,613	8,960	5,874	17,425	13,478	77.40
1933-34.....	8,596	7,760	8,852	5,592	17,448	13,352	76.52
1934-35.....	8,709	7,882	8,851	5,560	17,560	13,442	76.54
1935-36.....	8,906	8,061	9,127	5,788	18,033	13,849	76.79
1936-37.....	9,040	8,176	9,257	5,790	18,297	13,966	76.34
1937-38.....	9,233	8,121	9,510	5,978	18,743	14,099	75.22
1938-39.....	9,179	8,276	9,573	6,232	18,752	14,508	77.36
1939-40.....	9,027	8,643	9,369	6,417	18,396	15,060	81.87

Day schools were constructed during the year at the following reserves: Salmon River, N.S.; Eel Ground, N.B.; Maria (two-room), Que.; Metagamii, Mud Lake (two-room), Six Nations, and Sucker Creek, Ont.; Little Grand Rapids, Man.; Big River, Sask.; Boothroyd, Cowichan, Gitlakdamix, and Seton Lake, B.C. Schools were established for the first time at Metagamii, Ont., and at Big River (R.C.), Sask. The other schools were constructed to replace buildings that had become unsuitable for educational purposes.

The Ste. Catherine day school, Cowichan Agency, B.C., is a consolidated four-room school with full basement accommodation for vocational instruction. About 100 pupils are conveyed to this school daily by bus. If successful, schools such as this may, in time, displace a number of residential schools now operating on Indian reserves.

Residential school buildings at Carcross, Yukon; Albany, James Bay, Ont.; and Ahousaht, West Coast Agency, B.C., and the Indian day school at Hunter's Point, Timiskaming Agency, Que., were totally destroyed by fire. The boys' building at the Alert Bay residential school, Kwawkewlth Agency, B.C., was partly destroyed. It is felt that in future all residential schools should be of fireproof construction.

There is a growing realization on the part of our Indian population of the direct relationship between worth-while secondary school courses—academic and vocational—and the ability of the members of the younger generation to establish themselves on a self-supporting basis. This has led in recent years to a widespread demand for tuition grants. An arrangement has now been made whereby the first year high school course will be provided at a large number of Indian day schools. Assurances have been received from the Correspondence Branch of the Department of Education in each of the provinces concerned that they will co-operate with the Department in the promotion of these courses.

Indian day and residential schools in Prince Edward Island, Nova Scotia, Ontario, Manitoba, Saskatchewan, and Alberta are regularly inspected by public school inspectors and in New Brunswick and British Columbia, by inspectors employed by the Department. The reports received from these

officers indicate that courses of study have been adjusted to meet the peculiar temperament, outlook, and needs of the Indian pupil. They indicate also that the teachers in charge of Indian schools are, with few exceptions, fully qualified in a professional sense, are deeply interested in the welfare and progress of their pupils, and are anxious to co-operate with Indian agents and farm instructors in the organization of women's clubs, and cultivation of subsistence gardens, and in general welfare work on the reserves.

WELFARE

Relief and welfare costs for the year show a reduction amounting to \$26,712.89 for Prince Edward Island, Ontario, Manitoba, Saskatchewan, and the Northwest Territories, and an increase amounting to \$32,241.61 in Nova Scotia, New Brunswick, Quebec, Alberta, and British Columbia, or a net increase for the Dominion amounting to \$5,527.72.

A steadily increasing interest in the improvement of home conditions was in evidence throughout the year. A large number of Homemakers' Clubs were organized under the direction of the Inspector of Indian Agencies for Saskatchewan and a number of somewhat similar groups were organized in the Kwawkweth and New Westminster Agencies, British Columbia, in the Birtle and Fisher River Agencies, Manitoba, and in the Six Nations Agency, Ontario. The members of these groups meet monthly. The programs provided usually consist of worth-while projects such as knitting, dressmaking, fruit preserving, the canning of vegetables, and lectures on health, sanitation, and child care. The officers of the Provincial Extension Services have willingly responded to the requests to arrange seasonal programs and provide lecturers for these clubs.

The number of Indians seeking loans from the Revolving Fund was not so large as expected. Eighteen groups of Indians were provided with loans from this fund amounting to \$35,046.91 during the calendar year 1939. With the exception of two loans amounting to approximately \$7,000, secured by the Caughnawaga and Abenakis Indians of Quebec, all loans secured were used for the organization and promotion of collective farm projects in the Prairie Provinces. The largest single item of expenditure was that necessary for the

purchase and operation of tractors. Loans are authorized only after a thorough investigation of local conditions by the Indian agent and by the inspector and then only to responsible groups of Indians and in amounts not exceeding \$5,000 in each case.

The following is a statement of welfare expenditures by provinces for the year 1939-40:—

Province	1939-40	1938-39	Province	1939-40	1938-39
	\$ cts.	\$ cts.		\$ cts.	\$ cts.

			Net Increase.....		5,527 72

HANDICRAFT

Handicraft projects remain in the experimental stage and from a promotional standpoint have been confined almost wholly to the Provinces of Ontario and Quebec. Experience has shown that exhibitions and displays, coupled with practical demonstrations by skilled handicraft workers, are an important factor in stimulating interest in Indian welfare and in the sale of handicraft products. Two exhibits and demonstration centres were organized during the year. The exhibit organized at the Canadian National Exhibition, Toronto, received wide publicity and was one of the most attractive on the exhibition grounds. The display was arranged in an attractive and suitable setting provided in the courtyard of the National Industries Building. Black ash and sweet grass baskets, carved figures, bark work, beaded moccasins, and hand-wrought metal utensils, valued at \$3,000, were sold. Forty Indians took part in the demonstration.

Six Indians took part in the exhibition and demonstration of handicraft work organized at Winnipeg and goods valued at \$5,000 were sold during the display, which covered the period from November 25 to December 21, 1939.

Indian handicraft projects, to be successful, impose upon the Department an obligation to provide constant supervision and this obligation has until now confined efforts largely to reserves in Eastern Canada. Faulty workmanship and the failure of wholesale and retail marketing agencies to secure a continuous supply of high quality handicraft products have in the past militated against the success of the Indian in building up his reserve industries. Only by constant and capable supervision can good workmanship and continuity of supply be guaranteed to a market that has grown steadily and encouragingly since the inception of this work 3 years ago.

CONSTRUCTION AND ENGINEERING WORKS

Agency Buildings and Structures

Repairs and improvements were carried out at practically all Indian Agencies in Canada. New buildings and structures were provided as follows:

Ontario.—A new drive shed was purchased for the Caradoc Agency; a small shed was erected at the Sault Ste. Marie Agency; a dock, warehouse, and boat-house were built at Orient Bay, in the Port Arthur Agency.

Quebec.—Sidewalks were constructed at Restigouche.

Manitoba.—Granary at Griswold Agency; two granaries and a building to house new lighting plant at Fisher River Agency; garage and tool-house at The Pas; storehouse at Lake St. Martin, granary at Lake Manitoba, granary and pump-house at Long Plain, implement shed at Swan Lake Reserve, all in the Portage la Prairie Agency; lean-to at Farming Instructor's residence on Waywayseecappo Reserve in Birtle Agency; implement shed on Fort Alexander Reserve in the Clandeboye Agency.

Saskatchewan.—Granaries at Nut Lake and Day Star Reserves in Touchwood Agency; implement shed on Mistawasis Reserve, granaries on Muskeg Lake, Sturgeon Lake, and Sandy Lake Reserves, ration house on Big River Reserve, and warehouses at Lac la Ronge and Stanley Reserves all in Carlton Agency; implement shed and barn on Kinistino Reserve, house for Farming Instructor on John Smith's Reserve, barn at John Smith's Reserve, all in Duck Lake Agency; implement shed on Red Pheasant Reserve in Battleford Agency; ration house on Standing Buffalo Reserve in Qu'Appelle Agency; implement shed on Cold Lake Reserve, Onion Lake Agency; granary at Crooked Lake Agency.

Alberta.—Combined drive shed, implement shed, and workshop at headquarters of Edmonton Agency, also root-houses at Wabamun and Alexander Reserves in Edmonton Agency; root-houses at four reserves in Lesser Slave Lake Agency.

British Columbia.—A float was rebuilt at the Sechelt Reserve, Vancouver Agency, and a float was constructed at the Ucluelet Reserve in the West Coast Agency.

Northwest Territories.—Five storehouses were provided at the Fort Resolution Agency and 5 public latrines were built.

Roads

Roads on Indian reserves requiring attention were improved, and a new road was partially constructed through the Spanish River Reserve leading to the town of Massey, Ont. This work was carried out in co-operation with the Provincial Department of Highways. Stone was crushed during the winter and gravel was hauled and placed along the roads on the Caughnawaga and St. Regis Reserves, Que., and on the Tyendinaga Reserve, as well as on the reserves in the Caradoc Agency, Ont.

Bridges

A bridge over LaCloche Creek on the road through the Spanish River Reserve in the Sault Ste. Marie Agency, Ont., was constructed. A bridge over the Valley River Reserve in the Pelly Agency, Sask., was built in co-operation with the Provincial Department of Public Works and Labour. Materials for building a bridge over the Birdtail River in the Birtle Agency, Man., were purchased and paid for jointly by this Department and the Provincial Government. The Cedar Creek bridge on the Maniwaki Reserve, Que., and bridges on the Walpole Island and Manitoulin Island Reserves in Ontario were repaired.

Wells and Dugouts

Wells were drilled on the Ochapowace Reserve in the Crooked Lake Agency, and in the Duck Lake and Onion Lake Agencies, Sask.; on the Little Saskatchewan Reserve in the Portage la Prairie Agency, Man.; at the Kingsclear Reserve, N.B., and at the Lesser Slave Lake Agency, Alta. Dugouts were provided for stock watering purposes at the Okanese, Star Blanket, Little Black Bear, and Peepeekisis Reserves in the File Hills Agency, Sask.

Breakwater

The breakwater at McIntyre Bay Reserve in the Port Arthur Agency, Ont., was repaired and extended.

Lighting Plants

New lighting plants were provided at Restigouche and St. Regis Agencies, Que., Fisher River Agency, Man., Carlton Agency, Sask., and for the Peigan Indian Agency and Hospital, Alta., and new batteries were purchased for the lighting plant at the Qu'Appelle Agency, Sask. An electric water system was installed at the Touchwood Agency, Sask.

Miscellaneous

A new furnace was installed in the Manitoulin Island Agency residence, Ont., and in the agency building at Griswold, Man. The furnace at Morley, Alta., was repaired. All departmental boats which required attention were

repaired. Funds were transferred to the Surveys and Engineering Branch for the construction and maintenance of irrigation systems on Indian reserves in British Columbia.

Surveys

A list of reserves where surveys were made is included in the report of the Surveys and Engineering Branch.

RESERVES AND TRUSTS SERVICE

RESERVES DIVISION

Owing to the increase in Indian population noted during the past decade, further sales of Indian lands are not encouraged, save in exceptional circumstances, and then only after careful consideration has been given to the estimated future needs of the band membership.

Land Sales and Leases

During the fiscal year, 5,472 acres of land, exclusive of subdivision lots surplus to the needs of the Indians where such land was located, were sold for cash and interest bearing securities with a total value of \$39,932.82. The cash payments totalling \$11,282.97 were added to Indian trust funds capital account. A total of \$60,409.30 on account of interest and \$50,980.43 on account of principal was collected on older land sales contracts. Rentals collected from Indian lands under lease amounted to \$162,524.48. There were 882 current land sales, a decrease of 18 from the previous year, and 1,629 lease accounts, an increase of 157.

Adjustments under Farmers' Creditors Arrangement Act

During the fiscal year, 24 applications for adjustment of land sale contracts were dealt with under the Farmers' Creditors Arrangement Act. Gross reductions of \$77,567.32 were ordered under the Act—\$70,626.36 on principal and \$6,940.96 on interest in arrears.

Fur Conservation and Land Uses

The policy of the Department to develop the fur resources of Canada as a means of providing a livelihood for Indians in their traditional occupation of hunting and trapping was continued.

A gratifying increase was recorded in the number of beaver in the Nottoway River Sanctuary in northern Quebec where their protection and conservation is being looked after by Indian fur wardens selected from the band membership.

The Two Island Rehabilitation Project for muskrats in northern Manitoba has now advanced to a stage where natural forces will assure the repopulation of the area. Mechanical structures were erected during the year and the increase in rat population already recorded is satisfactory. The project is receiving the whole-hearted co-operation not only of the Indians and halfbreeds but of the whole community directly affected by the undertaking.

Much useful information was collected and tabulated on the resources of the northern portion of the Prairie Provinces in the interests of the large Indian population of those areas.

Further rat development work was carried on in the Wood Buffalo National Park to restore the species within the park and in large areas adjacent to it.

There is every indication that the program directed toward the conservation of fur-bearing animals will play a vital part in providing a self-sustaining livelihood in occupations congenial to the native population in whose interests it has been undertaken.

The policy was continued of acquiring desirable trap-lines and trapping grounds for the exclusive use of the native population of British Columbia and the eastern foothills of the Rockies.

Indian Estates

Marked progress was made in the administration of the property of deceased Indians and in straightening out the title and records of Indian lands held by individual Indians in accordance with the provisions of the Indian Act. More than 200 Indian estates received attention. This work will become increasingly important with the spread of the desire for individual right of occupancy which is becoming more evident in all bands, particularly in Eastern Canada.

Timber and Forestry

The administration of the timber resources on Indian reserves in Canada involved the sale and utilization of timber products as follows:—

	Feet Board Measure
Sold under timber licence.....approx.	35,000,000
Utilized by the Indians themselves for domestic purposes.approx.	7,000,000
<hr/>	
Total 1939-40.approx:	42,000,000
Total 1938-39.approx:	37,000,000
<hr/>	
Increase.approx.	5,000,000

Revenues added to the capital funds of Indian bands from timber sales show a gratifying increase as follows:—

Total timber royalties 1939-40.	\$ 76,162 63
Total timber royalties 1938-39	46,197 43
<hr/>	
Increase: (40 per cent above 5-year average).....	\$ 29,965 20

This increase is due to increased volume, to better prices obtained as a result of expanding markets, and to closer supervision of cutting operations. Net returns to Indian funds from timber sales show an increase from \$1.71 per thousand in 1938-39 to \$2.18 per thousand for the year 1939-40, or approximately 27 per cent.

Forest Protection

Fire losses on Indian reserves were extremely low and are estimated not to have exceeded 20,000 feet board measure during the year. No fire protection organization is operated by the Department, but an arrangement made with the several provinces is working out satisfactorily. The total cost of this service was \$4,320.16.

Mining

A total of \$1,428.15 was collected in payment of mining licences, rentals, and prospectors' fees, and \$5,105.39 as royalties on the sale of sand and gravel. Very little interest was shown in Indian lands by metal mining enterprises. Small quantities of coal continued to be taken from the mine operated by the Indians on the Blackfoot Reserve.

Petroleum and Natural Gas

Interest in the oil and gas possibilities on Indian reserves in Alberta continued. The seismic survey on the Blood Reserve was completed and the operators expressed keen interest in the formations that it disclosed. There was a renewal of interest also in the Manitoulin Island area, Ontario.

Indian Enfranchisements

Enfranchisements under the provisions of the Indian Act during the year reached a total of 40, comprising 99 individuals. These figures are lower than those for the previous year.

TRUSTS DIVISION

Indian Trust Funds

The division administered some 430 trust accounts belonging to Indian bands throughout the Dominion. These trust funds on March 31, 1940, totalled \$14,297,756.59. A comparison with the previous year follows:—

	Capital	Interest
Trust balances March 31, 1940.. . . .	\$ 12,046,835 92	\$ 2,250,900 67
Trust balances March 31, 1939.. . . .	11,978,309 35	2,171,153 84
Increase in trust balances.. . . .	\$ 68,526 57	\$ 79,746 83

Total revenues and expenditures in band fund trust accounts during the year were as follows:—

Revenues.. . . .	\$ 1,338,639 61
Expenditures.. . . .	1,190,386 21
Excess revenues over expenditures.. . . .	\$ 148,253 40

Below is a statement of the major items of expenditure for the fiscal years ended March 31, 1939, and March 31, 1940, illustrating the various uses to which the funds are put:—

	1939	1940
Salaries and wages.. . . .	\$ 61,301 79	\$ 61,558 65
Building materials and repairs.. . . .	19,093 76	15,434 96
Fencing.. . . .	5,298 04	6,720 56
Farming operations.. . . .	25,150 37	39,382 29
Farming equipment, machinery, and repairs.	35,530 79	38,451 31
Live stock purchases.. . . .	6,660 00	20,137 70
Operation and promotion of industries..	25,215 70	29,553 84
Relief.. . . .	192,906 36	191,934 11
Repairs to roads, bridges, and docks.. . .	43,876 67	44,950 00
Seed grain and feed.. . . .	44,323 50	27,894 87

Distribution of Cash Income to Indians

Interest.. . . .	399,061 62	396,536 47
Rentals.. . . .	48,065 40	49,957 35
Land.. . . .	4,758 56	9,679 85
Timber.. . . .	10,315 81	11,614 00

The increase in expenditures on farming operations and the purchase of live stock indicates an increasing interest in agricultural pursuits among the Indians.

Band Loans

Efforts were continued to encourage the Indians to make greater use of their capital funds to promote the welfare and progress of band members and to

enable individuals to improve their locations by the erection and repair of buildings and fences, the sinking of wells, and the purchase of live stock and farming equipment, and to enable them to enjoy more fully the productive value of their lands. These efforts met with a ready response. During the fiscal year a total of \$28,248.94 from band funds was loaned to individual band members, adequately secured by real property and chattel mortgages and by assignment of interest distributions. This sum was advanced for the purposes and in the amounts listed hereunder:

In the purchase of live stock and equipment..	\$	13,419	01
Repairs to buildings, fences, etc..		5,297	93
In the purchase of property—lands and buildings.. . . .		5,025	00
Construction of new buildings and wells..		3,810	00
Miscellaneous purchases..		697	00
Total..	\$	28,248	94

In this connection the following recapitulation is of interest.

Applications considered, 231 totalling..	\$	35,823	94
Applications approved, 175 totalling..		28,248	94
Applications rejected, 41 totalling..		5,828	00
Applications cancelled, 15 totalling..		1,747	00
Average size of loan advanced to individuals..		161	42

Attention was also given to the collection of recoverable advances made in former years.

Personal Savings Accounts

In addition to the general funds of the bands, the division administers 1,063 individual savings accounts, representing a total of \$240,517.46.

A statement of the year's deposits and withdrawals follows:

	1939	1940
Deposits..	\$ 52,884 87	\$ 75,306 16
Withdrawals..	49,201 57	72,476 34
Net increase in funds on deposit..	\$ 3,683 30	\$ 2,827 82

Annuities

The usual arrangement for payments of treaty annuities was made throughout the country, the total distributions being \$259,894. The distribution of annuities commenced in April and was completed by the end of August. Seven of the treaty-paying parties were transported by aeroplane in districts where this mode of transportation saves time and expense.

SUMMARY OF INDIAN AFFAIRS BY PROVINCES AND TERRITORIES

PRINCE EDWARD ISLAND

Agency.—There is only one agency in the Province. A large number of Indians live on Lennox Island, and others live at Rocky Point, near Charlottetown, Morell, St. Andrews, and Scotch Fort.

Tribal Origin.—The Indians belong to the Micmac tribe, which is of Algonkian stock.

Occupations.—On Lennox Island several of the Indians engage in farming on a small scale. Most of them own a few head of cattle and horses, but their main occupations are basket-making, fishing, and working around the different towns and villages, wherever they can find employment.

Dwellings.—On the whole these Indians have fairly good homes. Several new houses have been built recently.

NOVA SCOTIA

Agencies.—There are nineteen Indian agencies in Nova Scotia, namely: Yarmouth, Digby, Shelburne, Lunenburg, Annapolis, Kings, Queens, Hants County (Windsor), Hants (Shubenacadie), Halifax, Cumberland, Colchester, Pictou, Antigonish-Guysborough, Richmond, Inverness, Victoria, Cape Breton (Sydney), and Cape Breton (Eskasoni).

Tribal Origin.—The Indians are of Algonkian stock and bear the distinctive name of Micmac.

Occupations.—The Indians find employment in lumber camps, sawmills or as stevedores. A number work for farmers, especially in the Annapolis Valley orchards. Generous amounts of seed, potatoes, and fertilizer are supplied, but few of the Indians engage in farming to any extent. During the tourist season they act as canoemen and guides and in all agencies they manufacture baskets, wooden handles, hockey sticks, butter tubs, churns, barrels, etc. In recent years there has been an increase in the demand for Indian handicraft.

Dwellings.—The homes in most of the reserves consist of one and one-half story frame buildings, fairly well finished on the outside, but not on the inside.

NEW BRUNSWICK

Agencies.—There are three agencies in New Brunswick: the Northeastern, at Richibucto; the Northern, at Perth; and the Southwestern, at Fredericton.

Tribal Origin.—Most of the Indians belong to the Micmac race, which is of Algonkian stock. There are also some bands of Maliseets, also of Algonkian stock.

Occupations.—The farming operations of the Indians are restricted mostly to the growing of potatoes for their own use. A number of the Indians find employment in lumber camps and others work as day labourers. In the southern part of the Province they are engaged commercially in the manufacture and sale of Indian wares.

Dwellings.—New houses have recently been constructed and housing conditions have shown a marked improvement.

QUEBEC

Agencies.—The Indian agency offices in Quebec are located as follows: Bersimis, Cacouna (Viger), Caughnawaga, Gagne (Maria), Gaspé, Gentilly (Bécancour), Harrington Harbour (St. Augustine), Maniwaki, Mingan, Notre Dame du Nord (Timiskaming), Oka, Pierreville, Pointe Bleue, Restigouche, St. Regis, Senneterre (Abitibi), Seven Islands, Village des Hurons (Lorette).

Tribal Origin.—The principal tribes found in Quebec are: Iroquois at Caughnawaga, Lake of Two Mountains, and St. Regis; the Hurons of Lorette are also of Iroquoian stock; the Montagnais, who are of Algonkian stock, at Bersimis, Mingan, Lake St. John, Seven Islands; the Abenakis, of Algonkian stock, at Bécancour and St. Francis; the Micmaes, of Algonkian stock, at Maria and Restigouche; and the Maliseets, of Algonkian stock, at Viger.

Occupations.—The Indians of the northern interior and the north side of the Gulf of St. Lawrence depend entirely on hunting and trapping for their subsistence. In the organized central and southern portions of the Province they engage in mixed farming. They are good gardeners and a number of them

raise fruit and dispose of it at nearby markets. They cultivate their land with a considerable measure of success. Where they possess cows they sell the milk to the creameries and cheese factories. Most Indians prefer working for an employer to working on their own land. In the Saguenay district they act as guides and canoemen and on the Gaspé Peninsula they can still find employment in lumber camps and mills. Indians act as game guardians on established beaver reserves. The Indians of Caughnawaga are noted as steel workers and find highly remunerative employment when building operations are active. It is chiefly in the Province of Quebec on certain reserves that the native handicraft projects have been organized and have proved successful.

Dwellings.—In the older settled districts of the Province many of the Indians own stone, brick, or frame houses of good construction, comfortable, and sanitary. In the more remote districts the Indians live in tents during the greater part of the year.

ONTARIO

Agencies.—The Indian agency offices in Ontario are located as follows: Brantford (Six Nations), Chapleau, Chippewa Hill (Saugeen), Christian Island, Deseronto (Tyendinaga), Fort Frances, Golden Lake, Highgate (Moravian), Kenora, Longford Mills (Rama), Manitowaning (Manitoulin Island), Moose Factory (James Bay), Muncey (Caradoc), Parry Sound, Peterborough (Rice and Mud Lakes), Port Arthur, Sarnia, Sault Ste. Marie, Scugog, Sioux Lookout, Sutton West (Georgian and Snake Islands), Sturgeon Falls, Wallaceburg (Walpole Island), Wiarton (Cape Croker).

Tribal Origin.—Most of the Indians of Ontario are Ojibwas, and are of Algonkian stock. The Oneidas of the Thames, the Mohawks of the Bay of Quinte, the Mohawks of Parry Sound district, and the Six Nations of Grand River, are of Iroquoian stock. There is a band of Pottawattamies at Walpole Island, and Delawares at the Caradoc (Muncey) Agency; these are of Algonkian stock.

Occupations.—The Indians in the southern, western, and central parts of Ontario engage largely in farming. The reserves are generally well suited for this purpose. Assistance has been given from both band funds and appropriation to supply the Indians with equipment with the result that lately additional land has been brought under cultivation. Some do well with dairy products.

The Indians act as guides and canoemen and are employed at various industries and trades. They are proficient bushmen and some find employment in the various lumber camps. Snowshoes, canoes, and moccasins are manufactured. The women also find sources of income; some are employed as domestics; others support themselves by making baskets and fancy work. In certain districts berry picking furnishes considerable income.

Dwellings.—In the more settled districts many of the Indians own houses of brick, stone, or modern frame construction, and on some reserves both houses and farm buildings are comfortable and well built. A number of new houses have been built recently on several reserves and each year sees more Indians of this Province living in modern, well-built homes.

Northern Ontario.—In the remote parts of Ontario hunting and fishing are still the chief sources of livelihood. Acting as guides and canoemen during the summer months adds considerably to the income of the Indians. Although agriculture is not carried on to any extent, most of the bands grow crops of potatoes and vegetables. These Indians are, of necessity, nomadic and, consequently, live in tents most of the year.

MANITOBA

Agencies.—The Indian agency offices in Manitoba are located as follows: Birtle, Griswold, Hodgson (Fisher River), Norway House, Portage la Prairie, Selkirk (Clandeboye), The Pas.

Tribal Origin.—Most of the Indians belong to the Ojibwa race, which is of Algonkian stock. Bands of Swampy Crees are found at the Norway House and Fisher River Agencies and in the York Factory district; these are also of Algonkian stock. The Indians located at the Griswold Agency are Sioux; there are also Sioux at the Birtle and Portage la Prairie Agencies. There is a band of Chipewyans at Churchill; this tribe is of Athapaskan stock.

Occupations.—The Indians living along the lakes and in the northern part of this Province depend mainly on fishing, hunting, and trapping for their existence. The reserves in Manitoba most suitable for extensive agriculture are chiefly within the Birtle, Griswold, Portage la Prairie, and Clandeboye Agencies. A great many of the Indians from around Lake Manitoba and Lake Winnipeg work in the harvest fields in the farming communities. In the southern part of the Province the Indians raise cattle extensively and most of the reserves own good herds of well-bred stock, chiefly of the Shorthorn type. They milk the cows and make butter and other dairy products. Any surplus of hay is put up for sale and on some reserves they own hay presses, shipping their surplus to market in winter. Some Indians make their living during the winter by taking out wood; others work for the large fish companies. The women derive revenue from the sale of moccasins and gloves. Most of them are expert needlewomen.

Dwellings.—On most reserves in Manitoba fairly good log homes are to be found. They are one and one-half stories high with shingle roofs. Most of these homes are whitewashed every year, which improves the sanitation. There is also a large number of houses of frame construction on all the reserves. In the extreme north, of course, the homes are more primitive.

SASKATCHEWAN

Agencies.—The Indian agency offices in Saskatchewan are located as follows: Balcarres (File Hills), Battleford, Broadview (Crooked Lakes), Duck Lake, Kamsack (Pelly), Leask (Carlton), Museow (Qu'Appelle), Onion Lake, Punnichy (Touchwood).

Tribal Origin.—The most numerous tribes among the Saskatchewan Indians are the Ojibwas, Swampy Crees, and Plains Crees, which all belong to the Algonkian stock. In addition to these, Sioux Indians are found at the Crooked Lakes, Qu'Appelle, and Carlton Agencies, and on the Moose Woods Reserve. In the Onion Lake Agency there is a band of Chipewyans, who are of Athapaskan stock. There are also a few Chipewyan Indians in the Ile à la Crose district.

Occupations.—The principal occupations of the Indians of Saskatchewan are farming and stock raising. The Indians own a number of cattle of a very good type, principally of Shorthorn breed. They are well equipped with implements and own several horses. In the extreme north the Indians still make their living from hunting and fishing.

Dwellings.—On most of the reserves the Indians are fairly well housed, the homes being usually of log construction with shingle roof. There are also a few homes of frame construction. The Indians in the north move about and their homes when they are out on the hunting grounds consist of an old log cabin, with sod roof, in winter and a tent in summer.

ALBERTA

Agencies.—The Indian agency offices in Alberta are located as follows: Brocket (Peigan), Calgary (Sarcee), Cardston (Blood), Driftpile (Lesser Slave Lake), Fort Chipewyan (Athabaska), Gleichen (Blackfoot), Hobbema, Morley (Stony), Saddle Lake, Winterburn (Edmonton).

Tribal Origin.—The Alberta Indians are of Algonkian stock, with the exception of the Sarcees near Calgary and the Beavers and Slaves in the Lesser Slave Lake Agency, who are Athapaskan, the Paul's band in the Edmonton Agency, who are Iroquoian, and the Stonies, who are of Siouan stock. The Algonkian Indians of Alberta are subdivided into Blackfoot Nation, comprising the Indians of the Blackfoot, Blood, and Peigan Agencies; Plains Crees found in the Lesser Slave Lake, Saddle Lake, Edmonton, and Hobbema Agencies.

Occupations.—Farming and stock raising are the principal occupations. The farming Indians in this Province are very well equipped with machinery and horses to carry on their work, as the Indians in the south own large herds of horses. In good years the Indians derive a considerable revenue from the sale of hay. The Indian cattle herds in this Province are of a very good type and many bring a premium on the market. The breeds are principally Shorthorn and Hereford with a few Aberdeen Angus. They receive good returns from the sale of beef cattle. In the northern portions of the Athabaska and Lesser Slave Lake Agencies the Indians are hunters and make their living from that source. The Indians in other parts of the Province derive revenue also from fishing, working for white farmers and stockmen, and from the sale of wood. The Blackfoot Indians, during the winter, get good returns from their coal mines, which they operate themselves under the supervision of a white miner.

Dwellings.—Practically all of the Indians in this Province own good homes. On the Blackfoot Reserve every family has a fair house of good construction and good barns. Frame houses and barns are also to be found on the Sarcee Reserve south of Calgary and on the Edmonton Reserve. On the other reserves the homes are mostly of log construction with shingle roofs, but there is also a large number of frame houses belonging to more prosperous Indians. These are being added to each year and sanitary conditions are being improved.

BRITISH COLUMBIA

Agencies.—The Indian agency offices in British Columbia are located as follows: Alert Bay (Kwawkwalth), Bella Coola, Cranbrook (Kootenay), Duncan (Cowichan), Port St. John, Hazelton (Babine), Kamloops, Lytton, Massett (Queen Charlotte Islands), Merritt (Nicola), New Westminster, Port Alberni (West Coast), Prince Rupert (Skeena), Telegraph Creek (Stikine), Vancouver, Vanderhoof (Stuart Lake), Vernon (Okanagan), Williams Lake.

Tribal Origin.—The Indians of the Bella Coola, Cowichan, Kamloops, Lytton, New Westminster, Nicola, Vancouver, and Okanagan Agencies belong to the Salish tribes. The Kootenay tribe is located in the agency of the same name. The Kwakiutl-Nootka tribe is located at the Kwawkwalth and West Coast Agencies; the Haidas, in the Queen Charlotte Islands; the Tlingits, in the Stikine; and the Tsimshians in the Skeena Agency. The Indians of the Babine, Stuart Lake, and Williams Lake Agencies belong to the Athapaskan race.

The Indians of the Peace River Block are Athapaskan, with the exception of a small group of Saulteaux and Crees at Moberly Lake who are Algonkian.

Occupations.—Fishing is the main occupation from which these Indians derive their living. Many own power-boats and up-to-date equipment and either fish independently or by contract with the canneries. The summer salmon fishing is a source of annual revenue. Trapping on registered trap-lines is also

a means of livelihood. There are Indians of this Province engaged in fruit growing, some of them owning orchards. A seasonal migratory labour movement is particularly noticeable, many Indians, often in family groups, follow the seasonal crops of fruit, hops; etc., even entering the United States in their wayfaring.

Dwellings.—The best Indian houses are found on the northwest coast among the Haidas of Queen Charlotte Islands, the Tsimshians of Port Simpson, Metlakatla, and Port Essington, and Kwakiutls of Bella Bella. The Indians of the west coast of Vancouver Island also have roomy, well-ventilated and well-kept houses. The high standard of comfort and decoration exhibited is quite remarkable, kitchens and bathrooms being equipped with most modern conveniences. In years past it was customary to build community houses in which as many as ten families lived. Now the young people are building their own homes and separating from the older people. A number of coast Indian villages are equipped with electric light and sidewalks whereas their adjoining white neighbours have neither of these services. The aim in the cattle raising and farming agencies is to discourage the village system and encourage Indians to build homes on their individual farms. On reserves occupied only during the fishing season the Indians live in rough shacks.

NORTHWEST TERRITORIES

Agencies.—The Indian Affairs Branch now has three agencies in the Northwest Territories, namely: Fort Simpson, Fort Resolution, and Fort Norman.

Tribal Origin.—The principal tribes found in the far north are the Slaves, Hares, Loucheux, Sekani, Dogribs, Yellow Knives, Chipewyans, and Caribou Eaters. All these tribes are of Athapaskan stock. The most northerly tribes are the Takudah, who extend to the Mackenzie Delta; and the Copper Mines, who are located along Coppermine River. The territory occupied by these two last-named tribes is contiguous to that inhabited by the Eskimos.

Occupations.—The Indians depend almost entirely upon hunting and trapping for a livelihood. Here and there some cultivate small plots of potatoes. They own no cattle or horses, their mode of transportation being by boat, usually along the great waterways in the summer, and with dogs in the winter. They catch and preserve large quantities of fish for their own use and for food for the dogs during the winter. They also pick and dry large quantities of wild berries for winter use.

Dwellings.—The Indians live in log cabins in winter, using tents and teepees during the summer.

YUKON TERRITORY

Tribal Origin.—The Forty-Mile, Blackstone, and Moosehide bands belong to the Takudah tribe. There is a band of Slaves at Lancing Creek who migrated from Good Hope on Mackenzie River; another band of Slaves, called Nahani, is located at the headwaters of Pelly River. All these Indians are of Athapaskan stock. At Mayo, Selkirk, Little Salmon, and Carmacks there are bands belonging to the tribe known as Stick Indians. Bands belonging to the Tlingit tribe are found at Whitehorse, Teslin Lake, Champagne Landing, and Carcross.

Occupations.—Hunting, trapping, and fishing are the chief occupations of the Yukon Indians. The women also derive some revenue from the sale of moccasins and curios of various kinds, and the men are expert at making toboggans and snowshoes. Little farming is carried on owing to climatic conditions, but some of the Indians cultivate patches of potatoes and other vegetables for their own use.

Dwellings.—The Indians of Yukon live in log cabins.

TABLE 1

Census of Indians: Arranged Under Provinces, 1939

Province	Number in Province	Religion						Under 7 years		From 7 to 16 inclusive		From 17 to 21 inclusive		From 22 to 65 inclusive		From 65 years upwards		
		Anglican	Baptist	United Church	Presbyterian	Roman Catholic	Other Christian Beliefs	Aboriginal Beliefs	Male	Female	Male	Female	Male	Female	Male	Female	Male	Female
