Principal's Message

Each year is special - unique. Each year seems to have its own distinctive personality, formed by the people and experiences of that school year, and this year is no exception. Let me share with you some memories of this year which I treasure. The friendship and cooperation among members of our campus community is precious. We number approximately ninety persons including students from eleven communities in northwestern Ontario, and staff from ten states and two provinces. Our commitment to working together has been really great.

I appreciate too the general willingness to do more than required - thinking about the other person rather than our own comfort. I've seen students helping each other finish up chores, and staff working extra to give the other person a break.

Haven't you enjoyed the new, fun ideas that have come out of this group? Take music night for example. Creativity comes to my mind when I reflect on this year.

With the new ideas has come enthusiasm. And what is more catching and exciting than the exuberant zest for life which has been among us.

Now a word to those of you students and staff who will not be returning next year. I hope and trust that experiencing this time together, with the values you have developed, will further help you to be a productive person in the future.

God bless you.
