Administrator's Message

"We have this moment to hold in our hands and to look on it with through our fingers like sand, watching it pass and knowing we never own, but we have this moment today."

We have long the school day a number of times in a group this year and it has seemed to me that some were alike. Probably because as I get older I realize how fast time slips on, and how often I have been on occasions so really had such care by thoughts and emotions the beauty of some moments that never really and certainly only once.

The school program doesn't change each year one year to the next but the people do, and with changing people come variety. Your variety has provided many opportunities to "think" and appreciate the moments we had as we worked, played, social, laughed, and struggled on our journey through this year.

Do you feel that these moments have also reached your child and made you a different person? I believe that often happens without us being fully aware of it, that we do become more fully aware of us than you, or is that "parenting is good" and what is left for us any truly valuable lessons and memories.

We all have left this school year "like through our fingers like sand", but the experience it has given, either as we parent or as we stand out and "think" about.

God bless you,

James Ryker
Administrator

Dedication

To our parents and guardians, you have given us your support and love as we embarked on a new and exciting time in our lives here at Poplar Hill.

You have encouraged us to work and do our best by your example, understanding, and wisdom from love, so we'll always have a special place in our hearts for the love you make a home for us.

It is with grateful hearts that we dedicate this 1990 New Year's to you our parents.
