Spanish 21/4/217 Dear Mr. Phelan. I have received a sent good letter from In Summean, telling me that there are to ord at my disposal for the construction of the beating systems. Really after having cousivesed the thing tofether, R. P. Pollockythe Fathers here. it mill not be advisable to do it. I didn't see all the objections to it. With his Loge me studied the advantages onlynistrations completely Superiors change, each one mitte his or her wear - one mill ask for more, and the other one mil think de is too much and from there frictions, dissertis factions etc. and over 20 - The sugetion that mell followme took the electricity already! what is at pretty beary one - With the heating sys terne it will live a perpetucel one, hecause thez have the washing in ammeras noth as in muter, and for les me doub need out any heat in summer time, so me will lase to beep hear the fire up for that purpose all summer Inhat takes a man as fits man-20 and then there will be again difficulties on that aire

These are few objections to the central sys. three—that the mill unverstant punispally herry two defferent administrations. It mile seem queer that I didn't are all there abjections before It proves probably that I am not fit for this place. fort for the laundy that need improvement first the boiles is not large enough to formish the heat for the dyer the machines, and the dryer should be motified; and as me have to Keppour our own systeme, sung defertise, and a new boiler, some help would be heartity accepted.

Spanish.

THE CANADIAN MESSENGER 160 WELLESLEY CRESCENT TORONTO NATIONAL OFFICE APOSTLESHIP OF PRAYER March 7, 1929 Mer. Lather Provincial _ 196. Lorgerie me for using pencel: I find to wik or few within beach - The attitude of Fr. C is regrettable sworthy of his character sprofession. The statement of (Aver) J. L. is brelievable: I. 6. is only persisting in his proseedings of three years ago. The exil results of his policy show have taught him more wisdown : his main fault to tobe western ful, and indiscreet in his public utterances: he ventilates his grievances from the fulgit, which is always of Jenseul to some hearers - a gentle depend enight help him -I find the Report of the "burgies des konscionaires ungust and incomplete. The secretary did not inderstand the nature of his tuste: his report should have been a time repla tion of the few cee days, and of every opeaker's opinion; instead he has heade it a medium through which to advocate his own views his sarcaster some is out of place - In a word it is a one seded report - The secretary was the whole cheese of the Congress after reading the report- I resolved not to appear any fulther reason to take any part mit - I don't think this report to has fulfilled its purpose, and if I may make a suggestion, it would be that a coul be sent to every knewher of the Congress osking him to restate his views, if they have been misrepresented, and such corrections be ottached to the Report- and read at the newt- Congress with the Report-

des for as I am concerned, I claim that I am placed in a false light. I am put down as arging the amountipolion of the Indians, by sucking them freget their language and augheizing them as quick as por Soble = I claves it would be turnise policy -what I advocated is to prepare them for the emanapation which, as He Risherd adoubt, is evening too foot = to farmiliaries them with the English language, from the ferefait, since a good toujordy of the present generation

Know English as well as Indian - The would be that the coming generalion Dould work their salvations with an English speaking prissionary, if it he recessary - and apparently it will be Decessary, judging from the present secrety of Indian speaking old moronaries - It will take years before the young nusseoners lovering on the horizon and fit for they work tinally it would be send easier to forwide the resessary knissioneries, if it they had not to spend so much line send every interning a languige which will fit them to minister to a few hundred south only, and who Could be helped in the English language as well, with a bill send lasy and reasonable Cooperation on their part = This has been eng own. be prin it time and full light + It is a godlenton assertion to say that - a brussionary gnorthy oddlined gives the impression that religion is a meller of no importance". at the spirito the Church berry against. we sunt where a distinction in this lase : Our Indians are thrown a Drought English speaking seople for all prosperses of life, and speak by drylish Chemselves as well as Indian = an English Conception dud orpression of religions would place them on an even plane with their English neighbors and help those coverley whole to hold she with then - They are working under the empression that they are an inservicely Complen, because of their seclusion and enclusion from ordinary Colygen -Thip - These lost two replacions from sign + is suggested tome by the secretary's remarks under 3 Quelion They were not in my purpo stion_ I can gettery along fairly well with my task I am working Canteon sext to make the book Too franciscon - dampackery a finit Cast of the work: when I get - through I will seven it and knost likely ful changes the made, before surenderry the bearing of today stocked by the Consor RM Vas Servis in Christo Staguerity.
