Annual Reports.

Shingwauk Industrial Home.
Sault Ste. Marie
Algoma, Canada

"First Annual Report -

For the year ending 1st October 1875.

Patron
The Lord Bishop of Algoma
English Committee

Treasurer -
Rev. D. Wilson

Secretary
Mr. M. L. Wilson

Managing Staff.

Principal & Chaplain
Rev. D. Wilson

Institution
Mrs. Henry Wilson
Master
Mr. Saml. Bennett.

Employees.

Harmon, Carpenter, Bootmaker, Seamstress, Laundress.

THE SHINGWAUK INDUSTRIAL HOME, built during the summer of 1874, stands a short distance below the village of Sault Ste. Marie, on the banks of the River St. Mary. The object of the Institution is the civilization, education, and Christian training of Indian Children. The building is of stone, 75 long, by 38 feet wide, with accommodation for from seventy to eighty pupils. There is also a separate building for aged or infirm Indians, who, unable to provide for themselves, either from old age or other causes, are felt to have a claim upon our charity.

ORIGIN OF THE SCHEME.

In the summer of 1871, Chief "Little Pine" of Garden River, Algoma, paid a visit to Toronto and other Canadian towns (accompanied by Rev. E. F. Wilson as interpreter), and pleaded the cause of his people, praying that an effort might be made to improve their condition, and afford education to their children. The following spring, a brother chief, named Buhkwujjenene,

accompanied Mr. Wilson to England, and after an absence of two months, about £800 had been subscribed towards the object in view. The following summer (1873), an Industrial Home was built at Garden River with accommodation for about forty pupils. This Institution was open for use with about twenty scholars, on the 22nd September, 1873. Six days after the opening a fire broke out in the cellar (the supposed work of an incendiary), and the whole place was burnt to the ground. A telegram was immediately sent to England telling of the disaster, and within a few days the sum of £2500 had been subscribed towards the rebuilding of the Institution.

settle the Institution on foot again. Of this amount \$6975 was expended on the main building, \$1044.25 on workshops & farm buildings, \$952.¹⁰⁴⁻⁶⁰~~84~~ on the laying out & fencing the grounds, \$1200.08 on furnishing, \$500 on land, \$952.84 on the purchase of farm-stock, \$658.31 on the infirmary building, & \$455.42 on extra fittings, architect, surveyor, & sundries, leaving a balance in hand of \$202.79. (near \$42). Thus in the good providence of God the work which for a moment seemed to be destroyed has risen again & under far more favorable circumstances than it originally enjoyed.

Note.
This balance
has not yet
been expended, is
already appropriated
to cover expenses
of additional
fittings which
are absolutely
necessary before
winter.

Opening of the Home and plan for work.

The Shingwauk Home was formally opened on the 2^d August 1875 by their Lordships the Bishop of Huron & the Bp. of Algoma. There was a large attendance, the day was very fine, & all passed off most auspiciously. After partaking of a sumptuous repast in the Dining Hall, wh. was beautifully decorated for the occasion, the guests assembled in the school room, where the opening ceremony took place. After speeches from the two bishops & several the gentlemen present, the party was conducted by Mr. W. thro the buildg & grounds, the children walk'g in procession & carry'g flags. In the eve, tea & coffee were served & there was a fine display of fireworks & a bon fire on a little Island just opposite the buildg.

Plan of Work.

One of the principal objects of the Institution being to train young Indian Children in the ways of white people & to make them good & useful members of society, it is thought best that

themselves. For this reason no servants are kept & everything has to be done by the Indian children. Every Saturday afternoon the appointments are made for the ensuing week, — three cook girls, 4 house girls, 4 laundry girls & so forth, — and of the boys — so many farm boys, so many wood boys, water boys, fish boys &c according as may be required. Every worker wears a badge on his or her right arm, & they are on duty daily from 6 to 8.30 am & from 5 to 6 pm, As a rule they all attend school morning & afternoon, but the Matron is at liberty to keep back one or two of her workers during school hours to assist her when necessary. By change every week, the children do not tire of their duties, & there are always about a third of them off duty. It is of course a task of very considerable difficulty to the Matron to keep everything in the Institution in apple-pie order & to have the meals on time & well cooked, with only these raw young hands as her assistants, the greater number of whom cannot speak a word of English, — and great credit is due to her for her patience with them. As a gentleman remarked who came to visit the Home — the quiet unconscious way in which some of the girls would look at the Matron while she was energetically impressing upon them their duties & endeavouring to set them to work would drive him wild. However the children really do try to do their best, & are smart & quick enough when they can understand what is wanted of them. As they gradually learn to talk English, the difficulties will lessen both for the Matron & themselves.

Religious Instruction.

The Rev^d S. G. Wilson, as Chaplain, holds evening service in the school-room every Sunday evening. In the morning, when fine, the children all walk in to town to Church, a distance of about 3 miles. On Sunday afternoons there is Sunday school,

The children repeat a verse of scripture, in order to learn it by heart in the course of the week. In the evening they are taught the Lord's prayer, collects, catechism, & to repeat & sing hymns. A Friday evening bible reading for elder children has recently been commenced & seems likely to prove useful. The main thing we desire with our children is that they may all prove themselves to be true Christians - soldiers & servants of the Lord Jesus Christ. With this end in view we endeavour to take every opportunity we can both by speaking with them together & occasionally by private interview to impress upon them the great truths of religion. It is nice to see them trying to teach one another, - an elder girl teaching a little one to pray or to say its text. We hope that spiritual life is already begining to germinate in some hearts, - but the work of the Holy Spirit is silent & secret, & we can only judge of his operations by the fruits which follow. May many of God's people pray earnestly for a blessing on our Home & its inmates.

School.

School hours are from 9 to 12 in the morning, & from 2.30 to 5 in the afternoon every day but Saturday. About half of the children are at present only just commencing to read, while six or seven of the elder ones have been at school before they came to us, & are now learning geography & grammar & are doing a little at English Composition. On Tuesday & Thursday afternoons Mr. Wilson teaches English, giving Indian words & sentences viva voce for the children to render into English; or occasionally varying the lesson by putting some of the pupils thro' manual exercise with a chair or book or some other common object, which they have to twist or turn or place as he tells them, their mistakes naturally causing some merriment among the rest of the pupils.

Industries.

The Industries taught are Carpentry, Bootmaking, farming, sewing (by hand & machine), & Laundry work. The account of each Industry is kept distinct so as to shew at the close of the year whether or not it has been remunerative. The result so far has been some little gain on the farm, Laundry, & workroom, & a little loss on the Carpentry & bootmaking. The Industrial fund is kept distinct from the Maintenance Fund, & it is hoped that it will in time furnish a regular income, from which additional children may be supported in the Home. In addition to the above Industries, we have begun recently teaching a couple of our boys baking. All the bread used in the Institⁿ is made of these boys, and they are becoming quite adepts at their trade. Two boys also and two girls are learning medicine, & they attend at the Disp^y knowing how to bind up wounds & minister doses to the ailing ones.

The Children.

The Children are at present 48 in number, of whom 23 are boys & 25 girls. They vary in age from 6 or 7 years up to 17. On first entering the Home some of them are very poorly clad & exceedingly dirty, and the first thing with these destitute ones is to put them into a bath & wash them, then burn all their things, & rig them out fresh. It is of course a great change to them having to commence regular habits & run when the bell rings & do all that they are told, and some of them begin to pine under a sense of captivity. Some of them when home-sick seem to lose all control over themselves & make an unearthly noise; others watch their opportunity & run away. Three boys took a boat & got away a distance of 40 miles before we caught them on an island & brought them back. They had been out just a week, living on berries

the shore toward his home which was 50 miles off. Happily
 we have invariably succeeded in bringing back the runaways
 & they have always had a good whipping (the only thing any
 boys have been whipped for), so that we hope that it has now
 been put a stop to. On the whole the children seem
 to be very happy & contented, & all goes on merrily & cheerfully
 day after day. The fish boys catch plenty of fish in
 their nets; the water boys have their prey pony that they
 call "Muknedooshish" (little evil spirit) because he
 is such a bad temper, & draw water daily from the
 river. The baker boys make & bake their bread in the
 brick oven. The sailor boys in their blue serge suits &
 straw hats, have charge of the "Missionary" & do all the
 commissions of water. All are willing to work & seem to
 enjoy their life here, and on Saturdays we give the workers
 a few cents pocket money as an encouragement. Most
 of the children have long Indian names besides their English
 ones, & many of them have curious meanings. Among
 the girls are Pukwunagezhepoqua (hole in the sky), Petahnuk-
 -pudooqua (approach clouds), Wandahsenoqua (child of
 the wind), Nebahumooqua (night thunder); - & among the boys
 are Shahwahnookuhum (thunder in the south), Jakaush
 (a canoe run aground) & Wahsubezhepoweren (man of the distant sky).
 Our wish is to keep the children in the Institution for about
 5 years. That is supposing they are about 11 years of age when
 they come to us, & when the time comes for them to leave we
 shall endeavour if possible to provide them with work or land
 in our neighbourhood, so as still to have them as far as
 possible under our guardianship. The plans for the future
 are under consideration, but not yet matured. The Chief

thought that we are likely to meet with in carrying out our
 plans is with the parents who do not sufficiently appreciate

much afraid of their being overworked. Some of the Communists from partly educated parents on the subject are amusing. One man begins: - "Boss of that place, I am telling you that I am depending on you that you will do food to my children. I want you to learn them food that they might go to God when they die. Put them to work that they might know how the world is going along, but not to heavy work, or food feed. We send our best respect to you boss of that place. Good bye to you all."

Another one, better educated, writes, I am glad to hear about my children are doing well. I am so glad that you have trying to please the children. How much I thank you - but I hope our Redeemer will give you reward. I wish you try my children not to work hard. I am afraid they will get sick. When they start from home they sound well. Speaks of another similar institution which formerly existed he adds - "About 30 or 40 children from here went here to that school. All died except 3. Whites they can work more strength more power than ourselves, I know that much."

Means of Support.

The Home is mainly supported by voluntary contributions.

The Canadian Government undertakes the support of a limited number both of children and aged people.

The greater number of the children will be maintained by the different Church of England Sunday Schools throughout Canada.

The cost of a child is \$75 per annum for board and clothing; but, if clothing be supplied, \$50 will suffice.

The cost of a young person preparing for a teacher is \$100 per annum, and of an aged person \$75 per annum.

This money must be paid in advance either quarterly or half yearly, first payment falling due on the 1st June next.

Clothing for a child should be enclosed in a box, and addressed with the child's name to care of the Superintendent.

For the payment of salaries of teachers, supply of house linen, repairs, medicines, school material, and other sundries, we are entirely dependent upon voluntary contributions.

DIRECTIONS TO SUNDAY SCHOOL SCHOLARS MAINTAINING A CHILD.

Name of Child.....

Age.....

Home.....

MEASURE. Boy:—Length of coat.....in., length of sleeve.....in., waist.....in., length of trouser..... in., head.....in., size of boot.

CLOTHES REQUIRED FOR THE YEAR.

For a Boy:—2 suits of clothes, 1 hat, 1 winter cap, 2 pairs boots, 1 pair moccasins, 4 pairs socks, 3 shirts, 2 under vests, 2 pairs drawers, 4 pocket handkerchiefs, 1 muffler, 1 pair mits, 1 overcoat.

For a Girl:—2 dresses (or skirts and jackets); 2 petticoats, 1 hat, 1 hood, 2 pairs boots, 1 pair moccasins, 4 pairs stockings, 3 chemises, 2 night dresses, 1 shawl, 2 under vests, 3 pair drawers, 4 pocket handkerchiefs, 1 cloud, 1 pair mits, 2 aprons or pinafores, 1 cloak or outdoor jacket.

NOTE.—It is not necessary that all these articles should be new, but they ought to be in a serviceable state. Plain useful things will be preferable to showy ones.

GENERAL REMARKS.

In such an Institution as this, it will only be expected that some little irregularities may occasionally occur, and it is hoped that the Sunday School scholars will make all due allowance for this. It is just possible that some of the Indian pupils we expect may fail to put in an appearance, and others offer themselves instead; in this case it may become necessary to change one pupil for another.

We trust that payments will always be made *promptly*, as it would plunge us into great difficulties should the payment for a child's support fail, especially during winter, when it would be impossible to return any of the children to their homes, and we have *no reserve fund* to fall back upon.

Reports will be furnished to our supporters every three months if possible. Whether the behaviour of the child has been good or bad, the plain truth will always be told.

Any contributions towards the Home, whether in cash, blankets, factory cotton, clothing, flour, provisions, farm implements, furniture, school material, or toys, will be thankfully received by the Principal.

All communications in England respecting the SHINGWAUK INDUSTRIAL HOME, should be addressed to Miss M. L. Wilson, 9, Barnsbury Park, Islington, N.

Parcels of Clothing will be thankfully received.

Report to Indian Department -

Sept 30th 1876.

39 boys & girls - total 47 in residence.

3 doing IVth book, geography, grammar, arithmetic, history.

7 " III " geography, arithmetic.

7 " II " geography, arithmetic.

3 " 2nd part I. arithmetic

19 " 1st part I. "

4 " A.B.C.

1 Carpenter Apprentice -

1 Laundry -

2 In service.

Grades 2 learn Carpentry, 4 bootmaking, 4 farming, 3 tinmithy.

3 tailoring, 4 printing, 3 baking.

One learning latin, three learning English history.

Remarks

The Character of the School has been changed since the summer holidays. There are now BOYS ONLY in the main building, & the few girls who attend are boarded at the laundress's, a little way off.

It is intended as soon as funds will admit of it to build a NEW GIRLS' HOME; At present there is about \$600 in hand toward this object, & about \$3000 more is needed.

The Boys are now taught: - Carpentry, bootmaking, tinmithy, tailoring, farming, printing, & baking. They also do all the house work, scrubbing, cooking, &c. under the superintendence of a female servant.

HEALTH. There have been about 20 cases of scarlet fever since the children re-assembled, but all have progressed favorably.

COMPULSORY EDUCATION. I wd. again take the liberty to urge upon the Dep. the necessity of some steps being taken to enforce the continued attendance of Indian children at school.

I. For the reason that boys of 14 or 15 years of age & upwards

- II That at present we have to take just whatever children, of whatever age that offer, & have no opportunity of selecting the most suitable, & we cannot tell from one month to another how long they may remain with us.
- III The fact of so many big boys coming bus in a state of entire ignorance notwithstanding that we know them to live at home within easy distance of day-school, proves that Indian children will not voluntarily attend school.
- IV. My impression is that the fault lies in the selfishness & laziness of the parents, & the mistaken ideas that they have of what their children require.
- V I know for certain that the same difficulties that I complain of exist equally in every Indian Reserve in Ontario.
- VI I would beg to refer to my letter of the 15th July last & to ask that it may have the kind attention of the Department.

L. J. Wilson
